Lecture 2

So the second lecture defines
the Laws of Communication
between
the elements of Consciousness
и
the elements of the Soul

so in order to develop and apply
the controlling clairvoyance of Salvation technology

the elements of Consciousness
then they must be connected
with the Soul elements
with the special technology of transformation
Soul
of the Soul structure
into the structure of Consciousness

means that the process initially comes
from the level of the Soul
which is the level of the Creator actually

so that's the transformation into Consciousness
of the Soul structure
it's a so to speak a special technology
which is reflected on the Spiritual basis
but it is reflected in the form of so called action
that the Spiritual basis has on the Consciousness

Here I am doing a special detailing and fragmentation of which
let's say concepts of the World
in order to bring out the essence here
here is your controlling essence

but to reveal it in such a way
so that you already have controlling clairvoyance
to be able to have for example if necessary healing
any irrational techniques

just from listening to this material
I mean when you listen to this material
the information is so formed around you
that there is a so-called mantra principle

and according to this mantra principle you actually do
so you actually organize events

so when knowledge is transmitted from teacher to student
not all knowledge is given in the form of words
but some of the words
are given the status of control

So what I was just talking about
is time so first of all in the first lecture right now
in the part of the lecture right now

is to create a special level of information
around you
So that creates the environment
that is most optimal for you

So that's what it means when it comes to
when you look into Infinite Time so to speak
or you are consciously aware of it
you must realize
that there is one simple axiomatic fact here

that in any case
to deal with all the phenomena of Reality
let's say with people there
with some situations
must be dealt with through the level of creation

because time is Infinite
matter Infinite
Space is Infinite

You still have to negotiate
like in Uzbekistan they make a teahouse
Then you have to know how to negotiate
to negotiate on information
or actually in events
not to use methods that mean rigid influences of some kind
physical for example

Replica: violent

Yes violent

So the principle is
is that once you know that
it's immediately clear how to behave

I mean let's say that even if
let's say there's an external circumstance that's pushing you
to adopt
well some methods may be more rigid
one should be able to get out of this situation in an informative way

this notion of a "miracle" there
some informative sharp growth
that you internally throw up
as if all your problems
you get a solution

So you're not destroying anyone out there you're not touching anyone
but you got a decision

on information yes you can move there
but you haven't physically touched anyone there

or you move on to the next step

or if there are previous actions
there are negative physical ones
you've sort of settled them in the information

then you can evolve
and your personality
it already becomes Infinite

i.e. here in the Infinite development there
I'm giving you the complete restoration of matter
then there you will already see
the status of the total restoration of matter
where it is

So the point is that what was needed
on the level of creating the spiritual design necessary
in this verbal status I've laid down

So the challenge is this
to listen for the first time so to speak
this second lecture
without really getting into the structure of the verbal phase

so you basically need to have the Spirit formed

Replica:
Just listening and that's it

GGRABOVOY:
yes
so the technology will be clear in words later on
