1999

Lecture 4

This lecture defines  
the management of the spirit realm  
or to put it another way the Spiritual realm  
through the status of the Soul

so in this case the status of the Soul implies the fact  
that the principle of the Soul is Eternity

i.e. since the Soul is Eternal  
it follows  
how can you change the structure of the Soul  
in terms of the concept of "dynamics"  
so that the Spiritual realm can be manipulated further  
connect  
with Consciousness  
to an event etc

so in the status of the Soul  
it's being manipulated  
through structure  
first of all it's changes in impulse forms  
I'll introduce a concept like this

means an impulse form  
is that which means exists in the form of an impulse  
and has a definite form

but at the same time when the impulse form appears  
then you don't violate  
the statics of the basic object

I mean there's a law in the universe  
that says  
that initially existing status  
is always preserved

This Law is traceable  
to many of the principles of Reality

For example a second has passed  
whatever is left in the past  
it's basically considered unattainable and so on  
so these kinds of laws

is a development of the principle of Eternity on  
to the structure of dynamics

so that's the principle that I'm now transferring to the fact  
so that you can have a precise methodology of controlling  
through the immobility of the static of the Soul

I mean in order to transfer  
you have to make that impulse  
but you have to use  
the existing Reality

and this is the example that I gave  
that it is believed  
that you can't go into the past  
by a physical method for example yes  
says that there is a spiritual method

and when we make a translation into future events  
of any object of information  
we always use  
the transition of the informational or spiritual plane

that is in fact when it comes to  
about the status of the Soul  
we can say that  
that in this status everything exists at the same time

and that's when you move already  
to the management of the existing  
then you have  
a management problem of a completely different order

It's like this task  
if you translate it  
on the plane of Perception of physical objects

There is a table for example Yes the surface of the table  
How is it possible to control  
the surface of the table within the framework of its existence

i.e. how it can be controlled

clearly if you look at it from the point of view of physical Reality  
to connect one element of the table to another element of the table  
you have to connect a piece of the table  
well to connect it in some way using devices

but to connect in the imagination  
you don't have to do anything  
you can just connect it in your imagination

So when you connect in your imagination that is mentally  
and translate it to some object  
like a physical object  
like the edge of a table for example you could cut the edge of the table a little  
bit  
and then you transfer the particles to the other part

then you're imagining first  
that is in fact you have created an image somewhereYes

and now you're detailing

where this image is created  
in the status in which you are working  
at the level of the Soul  
everything exists always in all interrelationships

So you're working at the level of action

I mean I'm referring to action yes so to speak  
as a separate status property of Reality  
that you can manipulate  
knowing that it exists

i.e. if we for a given table for example  
take an action element and move it aside  
we're not filing anything yes  
but we can think but it's also an action

So in action there is  
a level of control  
of some status like physical statusYes

And a level of action even without action on another plane

in terms of understanding it  
For example we may not be sawing off  
but mentally we can realize it

So then when we go  
to the level of the Soul  
it turns out that this principle of "action without action"  
actually exists  
in the basis of the organization of the consequence of the Soul's control  
exactly the consequence of the Soul's control

because in order to come to the root cause  
it is necessary to know how the Creator created  
i.e. the technology of creation by the Creator

So this is the level of consequence that I'm talking about now  
it determines the actual connection  
of the Soul  
c  
with the elements of itself Simply put

So you can't even say "simpler" but more technologically speaking  
because there is no concept of "simplicity" there in principle  
There is just the concept of "words" and "actions"

So in order now to apply the learned principle  
to apply to the management of the Spiritual Base  
it is necessary to understand that this transmission structure  
between the elements of the Soul  
is the Spiritual Base

i.e. in this definition  
Spirit is an element of the dynamics of the Soul

it's like if you do a physical action  
and there's wind

or if you do a physical action with a physical level  
then the Spirit is an element of the dynamics of the Soul

I mean at that level of understanding  
but not in terms of movement  
but in terms of the contour of the Soul in a given area Yes  
we are already moving to the understanding of Consciousness

i.e. how it is necessary to perceive on the Consciousness

well in the state of logical reflection  
to perceive Reality  
in order for this status of the Soul to be realized

i.e. when you work from the Soul i.e. with the Soul  
then this work is harmonized  
for all of space-time  
so it will be harmonized in any case

and it turns out that you have to transfer  
the level of the Consciousness element  
to the status of the work of the Soul

so this translation is exactly the same  
it has already a structure of such a structure  
that in the information of the Spirit i.e. in the Spiritual basis  
there are elements  
that are consequences of Consciousness

This is a rather unusual angle that I'm showing here  
the point is that I'm not showing how it's quite clear  
that Spirit can vary Consciousness  
depending on the state of the Spirit  
and the Perception of Consciousness changes  
That's clear enough

but here I'm showing another element  
that in the Spiritual structure  
there's an element that comes from Consciousness

that is if you think about it in a way that you're just  
just thinking from Consciousness to Spirit  
then we come again  
to the area of Consciousness  
but in direct contact  
with the realm of the Soul

so this method is actually unified  
and it says

that the Soul is in contact with the Soul the whole  
Consciousness  
body  
Spirit  
well physical reality etc

thus  
declaring the essence of the Soul to be the foundation of the Universe  
as it is as it was created by the Creator  
we can move on to

how any element yes  
in its unified sense  
is controlled by the Soul

I mean they say there's a "developed Soul" for example Yeah  
Why is it developed?

So the principle of the Soul's development  
may be from the Creator  
but the principle of development can be  
from the development of the Consciousness for example  
which also comes from the Creator

i.e. when the Creator's development is going on  
and what He put into the thought of this creature  
then we get the Divine principle of Eternity  
Again a return  
not even a return but again a declaration of Eternity  
as an element of every movement

So in this way I have deduced in this case  
such a formula actually verbal in this case  
that  
when the element of the movement is Eternity  
we come to the status of the Creator

i.e. the task of management is  
to understand  
that the Creator has placed in each period  
on the individual for example  
the Consciousness  
the Soul  
on  
Personality is a complex concept  
containing Soul body Consciousness etc

so that's why in this case  
as we go through the development of the world  
we have to understand more  
the status of the Creator

So the knowledge is from the Creator yes  
and is your direct knowledge

and knowledge from the Creator  
is what you have including the real thing  
that you are moving there  
you have certain plans there and you realize them  
it's happening so it's from the Creator

i.e. actually linking  
the Creator's deep true knowledge of the Eternity of development  
with what you have in reality  
which confirms the fact of your actions from the Creator

we have a transitional level so to speak  
that says  
that we can have the knowledge  
which is given as the next step  
based on what we have now

so it's actually I've established a law  
that exists at the level of understanding

so I'm moving on to the next area  
is the Laws in understanding that exist and their development

that is every development can be correct  
so knowing  
that the environment  
is oriented in such a way  
to develop according to the Creator's status  
all of your actions

so the Creator has obviously laid down  
that status unequivocally  
and in many ways He has already laid down  
with elements of training for this status  
you just have to know then  
where these elements are contained

And so when we speak of a developed Soul  
is that it's developed in the area of cognition  
in the area of interaction Yes as a rule

I mean for example they say for example "there is a Soul developed" there

"soul developed" "he has a developed soul" for example

because he's interacting correctly

i.e. it means that he understands  
the structure of action yes the structure of contact  
with another environment for example

and it turns out that the more developed the Soul is the wider it is  
For example Jesus has the development of the Soul there for all people there  
for the whole world  
and it turns out that He is also a part of them

hence the consequence of this is that  
that the way of movement to the Creator is the way to Eternity

and the meaning of this movement he unites then  
the status of Consciousness  
и  
the status of Spirit

i.e. where there is Eternity  
the elements are transformed according to a unified principle  
i.e. the element of Spirit becomes an element of Consciousness

There's a unification  
well completely different angles in understanding  
because the word in its Infinite development  
becomes the Word of the Creator's Truth

for example as in ancient Tibet it was considered there  
that by saying this word  
he goes out for example a lama directly to God  
but the word was very long sometimes

so it turns out that the transition of verbal forms  
is of fundamental importance

So when you listen to this lecture  
the transition of for example the "o" sound  
you'll notice  
before the "o" sound and after the "o" sound  
it's a transition into a niche where the verbal phase  
merges  
with action

so the word-do will be one

and so when "In the beginning was the Word"  
then the Deed was the Word

so from this point of view  
the word Eternity defines the CauseYes  
the real existence of Eternity

i.e. in order to find  
an event management mechanism  
and apply it instantly  
you have to have a status developed in such a way  
that you always predetermine the event in a positive way

I mean I've actually just brought you right now  
to that status level  
when you were there  
including the technology of working through words

Being there you've already been saved  
and saved others

i.e. this system of action which is laid down in the training  
it presupposes the same form of transmission  
to others  
to yourself  
to the whole future etc

i.e. Salvation doesn't imply probabilistic possibility  
it implies only  
an unambiguous and real structure that can be realized  
but already because it has already been accomplished among other things

Here again I'm moving to the technology to show you  
why it's done  
because in the future you have realized it

and this combination of the future with the present  
gives you Spiritual status

It turns out that when we take and combine  
an element of the future  
with the present  
we get the element of Spirit

So when the Spirit is created  
as an element of yes event  
then you can see that your own Spirit  
contains the event

and here in this case it's easy enough to manipulate  
by changing just the whole Spiritual content  
that comes  
from your own Soul

only these decisions that you have already had for a long time  
they are contained in the element of the future

but the element of the future  
if we see the world not only as coming from you  
but when we consider  
how it's shaped by the principle of common interrelationships  
like your spirit  
in terms of space-time

So from a space-time perspective  
the spirit element  
is formed by combining the future with the present

if you take  
the future with the past  
then you get the element of Consciousness

So it turns out that the current then  
is declared as a reaction yes  
that's what you get the element of Consciousness

So in these phrases you can find in these phrases  
very simple technologies of reactivity  
but according to the controlling status of the already accomplished Salvation

i.e. in this case when you know it  
you are already invulnerable  
i.e. you come to the structure of your own organization

and that's when the structure of your own organization  
begins to grow further  
then you realize further  
that for example you realize  
what it means that for example if you take  
an element of your future

your future exists in informational terms  
just as there is  
the element of your spirit

So when you take your past  
the spirit element already existed there and you were there

So in order to become Eternal and not to be destroyed  
you have to copy in this element just a little bit  
your existence for example from what age you need to be  
to the element of the future  
i.e. to reorganize your spiritual basis

It turns out that in this status you are already there

but because the Spirit has  
exists in the future  
and not only does it have a presence there  
but there is a reverse mechanism

of connecting the mental that is the mental connection  
the future with the past  
you can get Consciousness

but from connecting the future to the present  
you get Spirit

So the question is how do you connect

if you connect mentally you get Consciousness  
but then how do you connect to get Spirit?

So creation means  
the creation of all the elements  
you have to be able to create your own Spiritual base

and then you get the technology of spiritual development  
it's not going to be  
in some kind of instantaneous just  
or a creative impulse like that  
or reading  
or development  
so any kind of you know specialized technology

when you profess the basic principle  
"Thou shalt not kill" "Thou shalt not destroy"

then you have  
an infinite structure of development of the Spirit

And hence it follows that since there is the principle "do not destroy"  
"do not destroy" it sounds  
then as soon as you build  
on all the elements that exist  
your optimizing position  
you get instantly  
into the structure of information creation

i.e. here I have declared  
a fundamental principle in general  
which was not announced for quite a long time  
due to the fact that there were not those problematic conditions  
for the possibility of global annihilation

but nevertheless this principle should be declared now  
This is the first time I am doing this

So here the meaning of this principle is that  
that as soon as you build without destroying anything  
you come  
to the building blocks of all information  
i.e. the actual True Knowledge of the Creator

So you have to be eternal in this way  
not just because you're building or because you want to  
but you are created

because True Creation implies Eternity

So it turns out that since you're created by the Eternal  
you just have to find the Eternal angle  
in controlling  
of the external and internal environment

like finding that Eternity angle  
in every event  
is a specialized technology  
and as I was saying  
it is mastered by the experience of harmonious development

and then it's on to the next year  
when you come  
I'm laying down non-destructive technology

i.e. the technology that says that  
that by using the harmonious principle of creation  
you can always regenerate yourself  
i.e. first of all to prevent problems  
and secondly completely restore yourself  
at any point in space-time

So this is where the next ideological principle  
the following ideological principle  
that if you have a developed spiritual basis  
you can create elements of development  
not only in a favorable environment for example yes  
which exists  
but you can develop the environment

so it's actually saying  
that if you have  
an orientation of creative development  
then you have to transfer that creative development  
to any object of information

then the meaning here is  
that you can move  
on the path of creative development  
and this is the only way  
but this movement must be accompanied by the fact  
that there should be no restrictions  
for you there should be no restrictions

i.e. in this case you are already supporting the structure of development  
is already supported  
in the status of Eternity of your creation

i.e. it turns out that in this case  
that you for example ordinary events  
for example healing someone  
or just the regulation of optimization of the event  
to do something right

that is this whole event should be such that  
so that it exists always and everywhere  
So the whole event means the whole complex

Once you get to that element  
you're technologically correct in your approach

to the solution of the problem

in terms of healing

That means using

this principle outlined here

you are restoring in such a way

so that the organ is actually Eternal

i.e. and you immediately provide for all possible connections  
of this organ

of this organism

and in this way you introduce regulations  
into its structure

which is laid down by the Creator

"regulation" means something

what was originally done so to speak

and where the person was directed

i.e. when it comes to what is the Creator's Truth

i.e. that which was bound by Him is the Truth

and that which was the Truth

and what has been transmitted

is that the Soul is Eternal

and therefore the concept of Eternity translates to the body

So once we have that perspective

then there are no means of global destruction

Then there is no point in developing nuclear weapons for example

So it turns out that now is the time

that the next element is

the declaration of Eternity of the element of the Soul

which is the body

which is the Truth of the Creator

it begins to evolve into Infinity

which represents the Creator himself

i.e. it's actually a reverse development

from the realized

is the Creator's Action

so the control of the event

can be according to the same principle naturally too

i.e. when you see  
movement  
from the realized  
to you  
then you can change the realized  
It's about managing the past

if you see  
what you want to have  
in the future or in the present  
then the reverse motion  
moves  
into further movement

that is an existing principle  
can simply be translated into further motion

i.e. the existing technology for managing the past  
can be translated simply by  
by putting the thought into the future  
and you get this  
you can already manage the past

so that means that what I'm giving you here  
I'm showing that every technology  
can be translated  
into the technology that you need

so that's what the principle of instant salvation  
the principle of instant salvation

you know actually once you've done  
did an action and got an optimization  
it also means that you're saved and you can save  
or rather you can save yourself and others

I mean in Salvation technologies you have to use  
any  
logically realized  
or spiritually  
or spiritually  
realized structure  
in order to anchor it positively in Eternity

so the next step is  
is the anchoring of the elements of the accomplished

and their prolongation into the eternal structure

i.e. for example with one impulse you cured someone  
at least one cell restored  
from this you can already take  
that you can and are Eternal  
and save others

which is actually an element of self-repair  
and eternal existence  
i.e. non-destruction  
is due to the fact  
that you're not only coming from a spiritual structure for example  
but you're going to the spiritual structure from the event

So by combining these two statuses  
of course it's clear that you're coming even closer  
to the structure of your own Soul  
and the organization of the body

I mean what I've said is that it already allows you to regenerate

but what we're talking about is that if you study in detail  
and your own deepening of this technology  
you can't be destroyed at all

So this is the basic ideology  
which means that it should be you  
to be realized  
and the meaning of this realization is something else

the one who works on a given ideology yes  
he takes the ideology to the next and so on and so forth  
it turns out that he is the one  
who gives the true and correct knowledge  
under the conditions of existence  
a system of global annihilation

which is the way I'm giving you  
the system of Salvation  
it's that context so to speak  
the index of spreading  
of information around you  
in thought  
in action  
it is the essential principle

in all your future endeavors

So for the next lecture it means you'll have to  
to prepare

this so to speak thought-form  
such a state of spirit and soul  
in which you  
an element completely minimized as it were

i.e. you can send an impulse to heal  
even one cell  
not to mention that you can already  
already regulate events  
to heal

but even a minimal impulse of a restorative trait  
you must transfer to the eternal status  
your own  
and others

which is actually a system of Salvation  
according to your special level of development

What's "special" is that  
is that you can learn this technology  
just by listening to it without even looking at it  
just by picking up this tape  
just by like thinking about it  
I mean in the Salvation system it's implied  
access  
through any of the possible channels

or like I dictated  
everything  
Even if you weren't sitting there listening to it right now  
you should still be saved by now

You see that's what it's called  
individual salvation system  
and save others of course

So by the next lecture  
it will be necessary to formalize the task  
minimal realized creative elements  
eternal
