

GRIGORY GRABOVOY  
**Individual course**  
1999

Lecture 5

This lecture provides knowledge of  
how the Spiritual Framework  
reproduces events  
and these events are  
a ready-made element of the Spirit's impulse

that is actually an event  
that is outside of space and time  
is an element of the impulse of the spirit  
that created the event

so I'm actually showing you right now  
that system of connection  
where you have a multiplicity of information  
i.e. all the connections  
in every element of those connections

so you want to build a situation  
and you have it at the level of the spirit  
and you're getting it from somewhere

so actually when you want  
to build a situation  
to heal someone  
to guide someone for example  
transform an event  
you take  
First of all if you want to cure  
there's a diagnosis for example yes

But if you want to make an event  
the way you want it to be  
you set your own goals in a lot of ways

So when you set goals for yourself  
you set them based on known properties  
like there's a diagnosis of the elements of the event

and part of that is what is truly yours  
that is Spiritual  
coming from your spirit from your soul

so it's that element that's the main element  
in terms of control  
and this is the element that forms  
the events that I'm talking about

that is the events that you're building  
already exist  
at the level of your spirit

actually looking at  
your own Spiritual structure  
at the level of reproduction of ready-made already known  
already known events  
you come to the level of the Soul

It turns out that the Spirit from this point of view  
is and well as a known factor  
for the Soul

i.e. the Soul creates events  
within the Spiritual structure  
and you receive these events  
for your Consciousness

so when you consider  
this position of the world  
you immediately see  
that the world exists on a spiritual basis  
So because that's where events come from

So it turns out that to get an event  
you have to know  
how your spiritual basis makes them

because I've already told you about it  
how it should be done  
but on purpose I didn't say some details that connect there

Nevertheless I said again  
that the spiritual basis makes them  
and I asked the question again  
how

it's clear what it does where  
where the spiritual basis intersects  
with the event base for example

For example if the material thing  
is curing disease  
it's like creating the right event  
if it's spiritual i.e. the sensual part of feeling a thought  
creation of the right thoughts of the right feelings for example etc

there's an element that relates  
to the feeling of Love  
so there's Eternity and Infinity  
It's a different system there  
There's a system of absolute statics

It's different and it relates  
not only to the Spiritual base  
but the Soul base  
the base of the World

That's why Love is considered and is really  
the basis that has  
both an Infinite and a kind of local factor

When you consider this stage  
you see that the world is made of Love  
so it's enough to realize that  
as you create from Love  
that is to say that the building block of every event  
is Love

when you're building  
one brick two bricks three bricks  
you get Spirit  
Spirit is a reflection of Love  
in terms of the reproduction of events  
It's the word Love that describes it technologically for example

so when you look neutrally without words  
you have Spirit

but when you want to get the technology  
you look at  
the first position in terms of Love

The word "creation" gives you the big picture  
and it's often blurry  
and Love is the building block of any event

So that's why when they say  
that the Creator God created  
and it means that His creatures are such  
that He shows them Love  
It is true  
just by the technology of the world

so by analogy with the way  
the way the Creator created it  
you act accordingly

having considered  
the elements in the form of Love  
see  
how there is a connection between the elements of the structure  
and then you move on to other structures

there on Perception in the form of feelings of some kind  
feelings of creativity feelings of desire to build something etc

and see  
the translation of the concept of Love  
in the translation of the word  
I mean when you do it you have to understand  
you can understand but how do you translate it into words for example

I mean this is where it's important to get  
this technology  
of developing your own spirit  
so that the words are components of this Spirit  
of this state of Spirit

i.e. when you have a state  
you have words  
and the words are already building

so there is also a principle  
that "In the beginning was the Word"

so when you consider  
the verbal phase the descriptive phase

you can instantly for example abstract  
and get a non verbal phase

a phase that is not described but where everything is known  
This is the state of the spirit it is also there

you don't even look there

It's kind of distant There's an example in physics  
Lomonosov there supposedly had it that  
that if there is a forest somewhere in the distance  
you can't see the trees moving  
If you get close you can see them  
I mean it's an optical principle

but still somewhere in the distance  
you know there's a forest out there  
like what's out there specifically  
but you don't want to get closer

Then it turns out that on a spiritual basis  
What I'm getting at is that  
you always know what's ahead

and your job  
is just to take it from there

and when you take for example  
and often if you only need to take  
only in one design  
then you get just a system of salvation

and you get that you can naturally always save  
because you go often  
on only one possible path where there are no other options  
hence accurate diagnosis accurate control etc

so that's why your job in all of this  
will be to understand this lecture  
from the perspective of your own spirit

and to see  
how your Soul is organizing that Spirit  
in the moment of understanding this lecture

That's enough for now

then in about a month and a half  
you make an appointment  
and come back with the results
