

GRIGORY GRABOVOY  
The Teaching of Salvation and Harmonious Development  
**Method of applying interaction dynamics**  
**Souls of Spirit and Consciousness**  
20.11.2002

Hello

The topic of today's seminar  
this is the introduction and distribution  
my Teaching on Salvation and Harmonious Development  
method of applying interaction dynamics  
Souls of Spirit and Consciousness

before starting a specific technology  
on this topic of the seminar  
I would like to consider the period of events  
which occurred during the past month  
and consider specifically the events at Nord-Ost  
from a management point of view  
which was undertaken for that  
to minimize  
for example, the situation directly related to Nord-Ost

September 31, 2002  
I published in the newspaper "Variant-management - forecast"  
management technology related to management  
from the point of view of preventing a possible global catastrophe

and this technology consisted of that  
what on October 20 and 25  
It was necessary to install light poles  
related to these days  
in the center of Moscow  
and these light pillars  
it should have been put this way  
so that the control goes from the 25th to the 20th  
and the current event

i.e. for example, if a person was  
at the current time for example there in September  
then the current light of Consciousness  
which came from the 25th and went through the 20th  
he was supposed to be like this

so that there is control  
relating specifically to each individual

and if we consider for example  
numerical numerological series  
development of the logical phase of Consciousness  
then there is a very simple principle here  
based on that  
what if we talk about management as such  
from the point of view of prevention  
for example, a possible global catastrophe  
that is, the principle of not recording the event

but if we consider the numerological principle  
logical phase of Consciousness  
where is the light dynamic light of Consciousness  
this is a specific value  
then we can consider  
very simple start of events  
which began in Moscow

if we consider  
row for example twentieth twenty-fifth  
then we get 2 0 and 2 5  
in the logic of Consciousness  
to the left of zero is the minus axis

and in connection with this it turns out  
what if we move the light of Consciousness  
from the fifth from the twenty-fifth through the twentieth  
to yourself  
then we are downvoting

hence  
the first number is  $5 - 2$  therefore it is three  
i.e. the twenty-third number is laid down precisely  
in the numerological system of development of Consciousness

when we consider the principle like this  
that the management had to be carried out  
exactly until the twenty-sixth  
because the principle of control  
still not to realize the negative spectrum of events

then having considered exactly that

what if we add these numbers  
let's say  $2 + 2$  and  $+ 5$  it will be 9  
then the same polar system of work of Consciousness  
points to the six actually

i.e. the next spectrum is 9  
inverted it gives 6

i.e. the principle of number was laid down that way  
which was after the twenty-fifth

if we want to determine the location for example Yes  
then if we consider ancient marine navigation systems  
then two light pillars with a fivefold division  
either with a torch or temporary  
this is Nord-Ost

and in this regard, if we consider, let's assume  
well, what about a series of events ?  
embedded in the prognostic system  
where in the collective Consciousness  
specific management information is included

then we get that events in principle  
well, in this general production version  
where was the wording of Salvation of all  
because that's what we're talking about  
that's what we should be doing  
so that everyone will be saved

event specific quantity  
still, it should be laid down  
exactly as I just explained

according to the forecast about Russia  
I'm from the point of view  
preventing a possible global catastrophe  
laid down such a technology  
that you need to work like this  
so that such a specific little-known gas  
did not cause oxygen depletion

and basically I looked  
quite a lot of students  
who worked on this prognostic phase  
they managed to bring people back

which in general had a sparse system

i.e. where there were processes of oxygen reduction  
they were able to do so  
so that there are still more people  
survived such gas poisoning for example

in this regard, I would like  
so that for example today when we work  
already in the management plan  
according to the technology of dynamics  
Souls  
Spirit  
and the logical phase of Consciousness

must be considered  
what if for example some parameters are called  
associated with specific numbers  
or parameters  
related to the numerological system  
let's assume the logical phase of Consciousness  
consider how these logical systems  
events related to specifics

those. the ability to translate means this let's say the generalized phase  
which is given in the form of, let's say, numbers  
in a specific series of events  
and the ability to do so that, if possible,  
negative factors of events were not realized

if we talk about how appropriate it is  
give the structure of a precise event  
then there are two factors here

if the event is given exactly  
then it may not happen in this place  
and it happens , for example, yes in a negative sense  
in another place

and therefore the main level of management  
is to prevent the event  
rather than fixing the level of a negative event

so no matter what the temptations are  
let's assume under some conditions  
give a specific structure to a negative event

I recommend not to do this  
like those around you  
they didn't want this

i.e. it is necessary to work  
only for prevention  
any negative event  
without specifying it if possible

in the case of, let's say, aviation technology  
of course there are no problems  
there is a plane that is undergoing maintenance  
and it doesn't fly out and it's safe for people  
it is absolutely clear  
OR suppose there is some kind of machine there  
give a specific defect it can be fixed

if it relates to a series of events  
where people participate  
and at the same time, let's assume that there is a specific event  
where there are armed people  
after all, it can lead to the fact that the one who knew about it  
let's say he'll take some kind of double-barreled shotgun and go to defend  
himself

i.e. this also cannot be allowed  
you can't make it so that the forecast  
which specific one caused some danger  
even if only for one person  
familiar with accurate prognostics

let's assume today  
I give characteristics of interaction  
Souls of Spirit and the logical phase of Consciousness  
so in the logical phase of Consciousness  
there is a structure of precise knowledge

that's why I'm introducing today's seminar  
with such an explanation  
that the goal of Salvation is Salvation itself  
and so that it doesn't happen if possible of course  
there was no negative  
or a catastrophic event

and thus  
so as not to fix it anyway

this information

due to this

means the main parameter of today's management  
is that you develop in this way  
the light of one's own Soul  
that the logical phase of Consciousness  
that which determines Perception  
your and collective Perception  
in the form of numbers, for example  
some specific names  
this phase it was variable  
i.e. it should have been as widespread as Infinity  
from the point of view of what is in the logical phase  
does not contain negative status

and that this is a specific meaning  
the state of the Spirit and the meaning of the Spirit  
because the significant Spirit allows it to designate yes

it would seem like a simple word  
but if we have a significant state of Spirit  
which means that there is no catastrophe  
it also denotes, i.e. records that, for example, it did not happen

so how can I just say it again  
what is here in today's meeting  
I would like to note that many of the students  
who used direct access technologies  
and preventing a possible global catastrophe

These students were among the first to appear  
here at the information level  
directly in the structure  
This is exactly the problem of Nord-Ost

and provided quite serious assistance  
I believe that of course there was an action of the collective Consciousness  
there were actions of specific people on a physical level  
but in general, in my opinion  
It is desirable to develop a direct  
and absolutely access due to one's own Spirit  
because direct participation  
if it happens in some other country or some other place  
it is often complicated yes

or is it precisely access due to Consciousness that is what it is  
what if we consider the task of Salvation in general  
then the task is that  
to prevent any destruction at all

and that's why here of course  
methods of management through one's own Consciousness  
methods where they are not recorded  
negative plan systems of hard  
but nevertheless, for example, as I just explained  
in digital or symbolic form  
this is very specific information that exists

we can use this level  
in order to act generally speaking  
at any distance at any time  
and generally speaking have time for that  
to separate the situation in this way  
to prevent a catastrophic event from happening

so the more people  
you will teach such methods of direct control  
of course there will be fewer of those catastrophes  
which do not relate to disasters  
and in a global sense, I guess  
which may not lead  
to global catastrophes

and in connection with this  
according to my system of implementation and distribution  
Teachings on Salvation and Harmonious Development  
I show you how  
vision of the Soul is what you see with the Soul

in fact, I speak in the optics of the Soul  
what do you see with your Soul  
how is this vision  
this is the knowledge of your Soul  
which has a pronounced optical phase  
from the point of view of your inner Perception  
how can you transfer this knowledge  
into the logical phase  
and pass this phase on to others

i.e. to show how technologically simple it is  
you can react to that

what you know but you know with your Soul

at the same time you may know it is not announced  
i.e. the Soul knows  
but in Spirit you empathize  
or you profile with the Spirit

then it turns out  
that the projection is precisely the dynamic connecting part  
logic of Consciousness  
With  
state of the Soul  
and with the development of the Spirit in fact

because the Spirit  
he is developing in this regard  
he is forced to develop like this  
so that no disasters happen

do I use this word now ?  
how he is actually "forced" to develop the Spirit in this way  
because in conditions of the possibility of global destruction  
The spirit is constantly evolving  
towards preventing this possibility

and therefore if you register and perceive with the Soul  
factor of that  
that some kind of catastrophe is possible  
The spirit is sure to evolve

i.e. the task  
first of all, look through  
from the point of view of external and optical form  
external Perception through the Logic of Consciousness  
how it develops

and secondly, if its development  
Well for example, in this regard, not so intensively  
then increase the speed of this development

in this regard, the technology of today's meeting  
she is like that  
what do you fix first  
at the static level  
statics of one's own Soul  
i.e. in fact you perceive the optics of the Soul

who knows what is happening in the world

i.e. the optical phase of the Soul  
which contains  
as knowledge of the current time  
as well as knowledge of the future tense

and in this case  
It is precisely the boundary where the interaction occurs  
optics of the Soul with optics of the Spirit

so here is the border position  
is information from the past

if you exit in this position  
on information from the past  
that is known in the past  
that there are numbers, there are letters  
there are some events

and here is this row optically expressed  
in the form of past events  
including the numerological plan of events  
he says that you are  
in the dynamics of interaction  
The soul that knows  
with what needs to be done in the future  
in order to profile  
what the Soul knows

in fact, what the Soul knows  
this is the logical phase of Consciousness

and here is the optics that is in this plan  
near you  
logical phase in the Soul  
it crystallizes as a very strong glow  
coming from actually from your physical body

when you look at yourself like that  
then according to my system of Salvation and harmonious development  
you see how your body actually grows from the Soul

because the physical body is a part of the Soul

due to this

when you see something organic, like a plexus  
organic body growth  
organic such a finding of the body  
in the state of the Soul

then you see  
where is the dynamics of these intersections  
with body  
with Soul  
with the Spirit  
and with Consciousness  
where it is registered in the action plan  
after all, the task of management is to act

and in this regard when you plan of action  
bring it to yourself  
well, that is, bring it so close  
so that you feel it already in the depths of your Soul

and at the same time as if here  
near the physical or inside the physical body

then you see that the control  
this is something that is constantly happening to you

that's when you come here according to the logic of development  
today's level of management to that  
that your state is a controlling state  
provided that this is what I said  
you listen first  
or watch it on videotape or read it

then you see  
what is your state that controls  
this is what saves you now  
that's why it's not happening now  
for example global destruction  
why does the planet exist  
why does external Reality exist, for example?

and when you look  
that even the state of seemingly calm action  
this is your control  
then according to my teaching about Salvation and harmonious development  
you thus transmit the technology of my Teaching  
in terms of the Salvation of all

through the fact that you want to at least act

and when you set a goal, *for example*  
what do you want in general, *for example, yes*  
Let's assume we look into our own Soul  
maybe some people have it  
those who, *for example*, are not currently at this seminar  
or in the future after some long period of time  
looks at these materials  
they might think  
that an appeal to one's own Soul  
this is some kind of complicated or special technology

and that's why we need to teach those around us  
that's my system of Salvation  
and the task of universal Salvation and harmonious development  
exists  
transfer control  
even due to the primary impulse

and now our task is to learn how to do it  
so that desire i.e. the first impulse of desire

i.e. you wanted to save  
so that it would be a real Salvation  
and you realized all the control mechanisms

this is if, *for example*, with the physiotorics of the body  
consider  
comparable level  
in this case there is interaction

when you want to do something  
to take some action  
you don't necessarily think  
that every action is  
a sequence of some actions  
i.e. you don't necessarily think it through  
what before you get up  
you need to step first on one foot, then on the other, etc.

and so when you do management  
due to the action of the Soul  
then here too it is not necessary to think  
often the entire production line  
which you will presumably master before that

after all, often lecture courses, for example, which I give  
they specifically provide for  
exit to a certain state  
which is obtained  
or logically when you listen to the course  
or due to the fact that there is joint management  
and you add the logic of listening to the lecture  
you are already in this state

next state  
for example, the desire to act  
this is already an action

so i said about that  
that the desire to act is action  
but bypassed the logical phase

if you pay attention  
for example, I didn't explain it logically  
in what way desire  
where is the grain of logic  
where is the technology

I immediately brought it to that  
that through the state of the Soul actually  
I showed where the action is

pay attention here  
when I talk about the state of the Soul  
this is a special optical quantity  
in your Perception

this is, let 's say, a specific light  
that surrounds you  
at a certain time  
and this light has a certain frequency  
a certain geometric arrangement  
near the body

so take a look  
on the state of your Soul  
right now, right at that moment  
that I am now leading today's meeting  
at the moment when I pronounce the words  
look at the state of the Soul

that surrounds you now

and when you see the geometric position  
where is the state of this optical parameter found  
you will see that there is movement there

and I said  
it is about the dynamic level of interaction

movement is happening  
for example in spheroidal systems  
i.e. well, some kind of convex surface  
which reminds that some friction is happening  
and is perceived as a kind of friction , generally speaking  
well let's say one convex surface yes  
where the border between Spirit and Soul is

and this friction is like some kind of movement in the sea  
this is what the Spirit does in relation to the Soul

i.e. the Soul can see the action of the Spirit  
but you don't have to register  
finding the Spirit  
because where the Spirit is  
from an optical point of view, this is a different task

you can see the action  
but it is not necessary to know yes  
what does the Spirit do  
but it is not necessary to find it  
in optical terms

that's why when I talk about it  
that for the prevention of a possible global catastrophe  
under no circumstances should it be fixed  
negative event  
but we must definitely act

and because in the Soul  
the events are very clearly defined  
and the action of the Spirit is development  
if we fix then the Spirit is blocked  
in a specific system of some kind, well, event-based  
and at the same time the development is localized  
and the Spirit must develop infinitely

and here is the endless development of the Spirit  
in relation to your Soul  
this is the dynamics of the development of your Consciousness

i.e. the concept of "dynamics" in this case  
also implies that  
that you are developing Consciousness  
not only by logical means  
let's say there reading books or there listening to lectures  
and so perceiving Reality  
you can, for example, take lecture material  
work this way  
to have an advantage  
for example, the catastrophic development of events of Reality

and this is the lead  
this is a state of dynamics  
both Soul and Spirit  
as well as the logical phase of Consciousness  
because in logic  
you perceive all processes

and when do you cross over  
from logic as if closer to oneself  
i.e. if the logical phase of the glow  
in front of you

then according to my Teaching on Salvation and harmonious development  
transfer the logical phase to the Soul for action  
this is necessary  
First of all, it is necessary to highlight  
the spectrum of the silver color of my Teaching  
where this intermediate system is  
and highlight it on your Soul

i.e. the soul must warm up  
there is warmth towards the Soul  
because you know what you are doing  
noble creative action  
you prevent  
the light goes to your Soul which warms you

by the way it can be felt  
as a specific heating  
coming towards you  
just do it now

take and prevent  
possible catastrophic events  
Well for example there next month  
in relation to the next meeting there  
and you will see that there is warmth coming to you

i.e. the action in the form of simply in fact  
like this temperature parameter  
which goes in relation to your Soul

and here you see  
where your Soul opens up  
where does it spill  
from Spiritual action

there is a concept there called a broad Soul  
or for example a related concept  
with a definition in the ordinary understanding of the Soul  
related to the breadth of the Soul yes

so this is the breadth of the Soul  
Well, which is exactly what concerns  
a structure of sorts of distant control  
it is where on the horizon of the logical phase of Consciousness  
on the horizon of logical Consciousness  
The soul connects with the Spirit

bearing the foundation  
for the spread of the Soul  
is the Spirit

so here for the dissemination of my Teaching  
about salvation and harmonious development  
you can have a spiritual component  
relating to universal Salvation  
make a basis  
and then you will get the whole mechanism  
which is laid down in this Teaching  
in the form of specific technologies

that's when you enter into specific technologies  
for example, the numerological system  
then here, let's suppose, considering the numerical series  
which restores with any diagnosis  
health brings back to normal

you can see it here  
what is the number series  
what is organized by the Spiritual basis  
where is the distribution of your Soul

because as soon as you show  
what can you do on a numerical level  
make management  
or, for example, restore itself  
naturally this is a distribution in the logical phase  
it is very fast

the person who talks about it  
and someone heard about it, for example  
then this mechanism is very effective  
just factually  
what if it is possible to recover through a number series  
then of course it's better who heard it  
he will do it

not even because, for example, he wants to do this  
well for my recovery  
and he will convey this as if latently yes

here is the concept of "latently"  
where is the concept of "pood" and where does it come from, i.e. a certain  
weight

so weight is a manifestation of your body  
in the structure of the logical phase of Consciousness

and that's when you act  
this is what is this action latently  
you see specific numbers

because the weight is completely specific  
to see  
how does a numerical series work, for example a numerological series  
from the point of view of human recovery  
so it's very simple here  
projection of weight structures  
on this wide structure of the Soul  
these are specific numbers specific weight points  
well measured either in pounds or in grams or kilograms  
usually in grams

and so if you want

let's suppose we can build a numerological series even  
exact numerological series  
on event level management

then it is enough as if on three actually as if optical substrates  
make a field in front of you  
the lower level is the structure of the Spirit  
average is the spread  
i.e. expansion of your Soul  
into the optical phase into outer space  
from the body  
and then this is the logical phase of Consciousness

and you just have to look again with your Soul  
through the logic of Consciousness  
the number is visible

let's assume how to see  
that for example from the future number let's assume yes from the twenty-fifth  
the light comes exactly here at exactly this time  
and what number is needed then  
to suppose to profile the event  
negative or possibly catastrophic plan  
in December

then here it is very simple  
use this system of weight contours so to speak yes  
which are projected  
into specific numbers into specific events into forms etc.

and here the question arises  
how to disband this form  
which generally speaking should not be realized, for example

there is a certain building that could catch fire, for example  
it can be seen in the event  
Well, let's say I'm diagnosing an airplane.  
or I do diagnostics of some events  
This it's absolutely clear  
it can be seen simply like in a movie or in more detail  
because in a movie it's one thing to have a flat version  
and here you can see any structure  
down to the atomic level

so that's when you enter the atomic structure

by the way, it's easier to watch from here

please make such control  
Let's look at next month, December.  
and just look from the Soul  
and enter into the molecular structure  
and look from there

you will see that at first it will be unusual  
kind of spherical transformation is taking place  
as if through a series of spheres  
then everything is clearly visible  
everyone sees that place  
where his personal task is to profile

so it is with every person  
which is in the system of universal connections  
there is always a personal task  
and he participates in this as much as possible

and when you see  
what should you personally do for example  
and you do it  
it is a very powerful enricher for all others  
level  
once you achieve control

i.e. shift the structure there  
where there is no catastrophe and there is harmonious development  
and Eternal

then as soon as you show it  
you come to the next system  
my level of Teaching  
about Salvation and harmonious development  
where is your personal task  
which you solve successfully  
it applies to everyone  
because this task is actually universal

i.e. there is a very specific general mechanism of tasks  
each person has

but there is a task  
which is concentrated for example to do so  
so that there is no possible global catastrophe

and the parameters of these tasks are very narrow  
if a person enters the subway  
then entry options are limited

and in connection with this people nevertheless  
go along one level, *for example, along one stream*  
They don't expand or deliver additional turnstiles, *yes*  
of one's own free will

the same in the management structure  
when the common task  
*Well, let's say the task is to ride the subway*  
this is one common task  
for those who move along this route

so here is the concept of "route" where people are moving  
it's their personal *yes*  
but they go through the same turnstile

therefore in the logical phase of Consciousness  
when we talk about logic  
where does logic intersect with the Soul?

how do I know for sure?  
what happens in the future  
and to know right away  
what can we do  
or completely prevent a catastrophic event  
or at least downplay it  
but set the task at the same time  
to spread this technology as quickly as possible  
for everyone

because as soon as this spreads  
bigger and wider  
then *generally speaking, as I already said, it is quite obvious*  
that even minor disasters may no longer occur

why does the question arise further  
*Well, in principle, we shouldn't use force methods*  
and do not do not block *yes*  
possible catastrophic processes

the thing is that the world is very voluminous, *yes*  
into outer space

and if we proceed from that  
what can be done now, well, just take it and use directive methods on earth  
block some systems, let's say  
that outer space  
it also often has other properties

and in connection with this  
the task of spiritual development of man is that  
to be universally prepared  
to any system

for example, so that there are no techno-cybernetic systems  
who could take control of humanity  
there would be no external influence  
from outer space, etc.

therefore the logical phase of Consciousness  
it is based on these three pillars, in fact  
what exactly is in optical perception  
What  
this is external control  
this is control over the development system  
and control from the point of view of organizing the logical phase

i.e. we mean  
what is in the organization of the logical phase  
participate Soul Spirit naturally Creator  
but also a segment of the logical phase itself

so when we want to sort of grab it by the tail, yeah  
actually, this event is tied to a thread  
where is that substance of logic itself?  
why is it often sliding  
in the event

and because the event is in the future  
is not always clearly defined

so let's assume as in the past  
and if it is forgotten  
then it also begins to disappear in the past  
from the memory of people  
some movements of wind and sand grains may occur  
that no one sees  
but you can see it with clairvoyance

so it turns out this way  
clairvoyance for example yes he sees the processes  
well, it perceives processes that are not included  
as if into the system of collective Consciousness

but according to the system of general connections  
each element is connected to every other element

so when you set the task  
For example let's assume an exit to this very substrate  
find logic as dynamics  
namely logic as the dynamics of event management

then you will see that it is that  
which means precise logic  
projected into the state of the Soul  
and on your Soul

i.e. you see precise systems with your Soul  
exact coordinates  
and absolutely definitely from the Soul  
translate into the logic of a kind of approximate Perception

as a management  
I now propose to do the following  
firstly, the task of universal salvation  
at the logical level  
where you control logic and Soul  
simultaneously

then the task of working on the hall's tasks  
where you control logic and Spirit  
simultaneously

and then your personal tasks  
with whom you came into the hall now  
where you control only the Soul

If possible, don't remember  
what did i just say again  
just start working

and I will watch and work with you now

whenever possible when you work

do not enter a trance-like state  
It's better to work in a closer state  
or better or even more precisely self-organization  
this is not a trance state  
this is a state of self-organization  
the logic is quite clear  
there is no need to enter, for example  
in the concept of meditative trance

and the next element  
when you work on a task, for example, universal Salvation  
identify your particular task

because it is quite simple  
you are on the same Earth  
universal Salvation is also Salvation of you specifically  
when you are on this earth  
The earth is splitting accordingly you are saved

i.e. find particular signs of universal Salvation  
in the task of general management

Of course, it is not necessary to consider it there  
that there is some kind of split in the earth in front of you  
like during earthquakes  
that's not the point

see private signs  
they can be customized

i.e. they can be completely internal  
completely somehow, well, sort of intimate  
may be in the form of stripes of light  
may be in associated Perception  
or distantly similar to let's say  
to some dreams of a happy life

so if you take  
these dreams of a happy life  
and bring it closer here  
Generally speaking, there are technologies there  
how can they achieve these situations?

because if you have in the space of the Soul  
it was precisely the happiness of the next life that manifested itself, well-being  
where there is naturally no destruction at all

you can use a fairly simple technology  
what relates, let's say, to the order of dreams  
make Reality

i.e. after all, in management technologies  
due to the state of the Soul  
you do not differentiate the parameters of Perception

like is this a dream or is this a thought  
or is it generally just information  
which belongs to the category of clairvoyant information

as I said the main thing in the management task  
under no circumstances  
do not submit to any persuasion  
nor record the negative status of information

just move yours and that's it  
no matter what happens around  
this is the main thing  
don't pay attention to conversations and requests

of course if well as I said  
controlled system <sup>yes</sup>  
the car is standing still and not going anywhere  
where you can personally control  
can you diagnose it no problem

but in any case  
if there is a minimum level of control reduction  
behind the system  
do not fix the predicted negative phase

so this is the level of a prosperous dream  
this is where there is disconnection  
from the possible <sup>as if</sup>  
catastrophic system of development of events

well, like some kind of spherical ball  
which hung in such a transparent soft  
phase of Perception  
and somewhere he is in front of you <sup>yes</sup>  
closer , as it were, to the heart on the left side  
but on the other hand it is universal

so here is this simple hanging ball

the concept of a "prosperous life" is closer there  
such "prosperity"  
many different theories have been built from this  
in due time

and if for example you do this  
only on a physical level  
to implement i.e. to make some plans  
then of course we can start them  
but as if at the level of Consciousness we will not come to that yet  
that we need to formalize this first  
at the management level  
then only we will be able to implement  
prosperous development of society

in connection with this, according to my Teaching  
about Salvation and harmonious development  
there is a very specific connection  
meanwhile what we do  
and what we must do first  
at the level of control due to one's Consciousness

i.e. if you make some kind of movement  
just a physical body  
then the body must be healthy  
it must make this movement  
The earth must be  
there must be space, there must be air, etc.

so here are the principles of organizing these systems  
in my Teaching on Salvation and Harmonious Development  
they are connected in this way  
what if we consider the position of air  
as a structure  
which a person perceives for life activity

then it's only worth it in this position  
how to introduce the structure of the Soul  
i.e. to expand your Soul to the organization of air  
through the level of the logical phase of Consciousness  
then we find out how  
as if in an automated action  
we are already doing this

first task  
this is to find and pass on to others

look at yourself through this point  
through this task, in fact, and pass on to others

so when you look at yourself  
through this task and pass it on to others  
then there is already another one  
in your management he has already taken

and therefore  
you can pass it on to someone else in the future  
as a rule you automatically transfer to the future  
and not into the past

of course it is possible to transmit into the past  
so that they can learn it faster, for example  
but to a greater extent  
the collective consciousness is structured like this  
what people transmit for example  
or in the current there in the next second

and this is exactly according to my Teaching  
about Salvation and harmonious development  
why it is necessary to transfer knowledge as widely as possible  
because the transmission is already what I said  
when the desired is already realized  
i.e. you create a platform

if you managed to convey  
that means the Earth exists in the next second

and when you do such control for example  
then why exactly the transmission system again  
because after all, each other also transmits  
i.e. it results in a cumulative effect  
collective action

if we remember about  
Well, how did I abstract myself conditionally ?  
about the general purpose turnstile in the metro  
then considering the position in general just metro yes  
for the metro to exist at all

we go through this structure in this way  
that common goals common physical plans  
for example, there is a turnstile in the metro  
general movement of people

not necessarily a metro and a field, a glade, space  
but definitely Earth  
where there is everything a person needs for life  
at least

what will happen next  
for development into outer space  
this is the task of the next  
now we need to decide  
a specific, urgent task  
at least the survival of civilization

and in this connection the question of reproduction arises  
after all, in order for civilization to survive  
you need to have an endless resource

plus there are technologies for complete restoration  
already restructured systems  
for example after biological death  
resurrection and creation of new development systems  
Infinite systems

i.e. everything should be recoverable

and therefore  
all this can be controlled only if  
if you do it at the expense of your own Consciousness  
as you need it

because everyone is free from the Creator

The Creator created everyone absolutely free  
and therefore if free will is violated somewhere  
then we have well as if a swirling development  
i.e. there is this wide system of the Soul  
begins to connect with the Spirit  
and logic begins to manifest itself as logic  
not identifying external events  
well, like some kind of immune system of external Reality

what if you start to have points of sort of sticking together  
swirl points points as if some anomalies  
then it turns out  
that only requires willpower  
the creative will of one person, of course  
not to be realized

we have a kind of stock  
and we are like practically all the time  
actually in this place

why is it necessary to have universal development of all  
precisely according to the system of Eternal development

because as I have just shown  
these are very simple  
Well, these three systems got stuck together and that's it

and the one who is alone here  
for example, yes, everyone can do this  
if at least one can't  
he begins to capture Reality  
from the point of view of its simple freedom of expression  
will of manifestation

but from the point of view of the Creator  
all are equal  
therefore it turns out that he is in this position  
defines  
function of collective Consciousness  
even if it's in one parameter

and so when we speak  
about the task of education  
then education should be like this  
what if even one mastered it  
For example there are higher technologies there  
they should be universal as soon as possible

so here is the level of flow  
according to my Teaching on Salvation and harmonious development  
it is such that, for example, I conduct seminars like this  
that I don't prepare but create speeches specifically for those seminars  
already at the time of the seminars  
just simply looking through  
the task of universal Salvation

i.e. the principle is very simple  
if you need to diagnose an airplane  
I specifically diagnose and find defects  
the plane doesn't crash there  
if it's a hall, then the task still goes on  
through the task of universal Salvation

or who will watch videotapes there  
I am currently creating this Reality  
when you can see what's happening now  
interaction active and basic

so here is the task of the maximum level of control  
when a person or that can be a collective  
not necessarily one person  
is engaged in the task of universal Salvation  
he must react to Reality  
for the Spirit must be prepared  
precisely to react to any Reality

in this regard, it is precisely the task  
why exactly any  
because well let's say so An infinite spectrum of events  
from external Reality  
it may not only be from the outside  
it could be from the inside

let's assume that people have such conditions  
that as if a multitude of all sorts of experiences  
suddenly as if Well, they came over the man  
and it turned out that a certain point recorded them

i.e. there is a very large number of events going on  
a person scrolls through as if in Perception

so there are also internal surges  
which are just your thoughts  
and their source can often be like the Infinite  
i.e. an unsolved problem sometime in the past

and it turns out that a person in this regard  
does not share at this moment  
what is external Reality what is internal  
that's how humans are made  
we are also talking about the device  
how was it even created

because when you see  
from the point of view of the Creator as He was created  
you can act as the Creator

and here is this compression point yes  
boundary point of internal and external systems

this is a point of absolute rigidity  
where are all the systems logical spiritual mental  
aimed at overcoming  
which is called precisely the Infinite Life  
and generally speaking life in one physical body

because you decide in your physical body  
therefore the resource is already in you  
you do it

and this linear system  
i.e. vertical, as if a vertical column of light  
which begins to surround you at this moment  
when you accept something like this  
as if an internal tough decision

this is actually a structure  
building your cells  
if you look at your cell like this  
it's as if you 're leaning on some kind of plate  
in Consciousness  
and you see that this is actually your cell

so if the cage  
not like in a morphology atlas  
but consider it from the point of view of organization  
from the point of view of the Soul, Spirit and Consciousness  
then this is also a layer system

as soon as you enter the formation  
there you find many different spheres  
which are in dynamics, move, intersect  
and you can very clearly define  
where is the structure of the Spirit  
where is the structure of the logical phase of Consciousness  
and where is the structure of the Soul in the cellular system

come in do it now  
enter the cellular structure  
For example there is a finger of any person at all  
into the skin  
and look at it from this point of view  
these spheres start to spin  
look at their color  
they seem the same at first  
i.e. they have the same silver color

and how they spin in the prostration of weightlessness

but if you look

their content is very specific

for example, it is impossible to do exactly what is organized by the Soul

for example, you can't confuse it with that

what is organized by the Spirit

so that's where you got this exact knowledge from

if you hold on to this exact knowledge

well at least there are milliseconds and some moment

then keep in mind that this is exact knowledge

this is actually a level of omniscience

that's why every logical phase of an event

how we did the training <sup>yes</sup>

this is the highlight of the logical event

why seeing having <sup>well</sup> developing

your clairvoyance

sees not only what everyone else sees

but can see things that are not accessible at all

from the point of view of at least one

somewhere in some forest there is a leaf swaying

Look at him, he's really swaying

well let's go or let's go out <sup>for example</sup> with our Perception

outside this building

in the first seminar in this hall I said that

what is this in september 2002

I said that make a frame like this

so that the glow captures people passing by

but if the glow is coming from you

falls on passing people

then everything is fine with the hall

i.e. the output of the interaction

and if it is only worth <sup>as it were,</sup> setting the task of the Norm

then the task of the Norma is the next development

so here is the Norm of Consciousness

when you perceive everything

what do you want for the Salvation tasks

you need to look at the leaflet, look

Need to diagnose the engine

or some chemical process physical diagnose  
i.e. there are no problems in principle  
this is Norma

Now I've shown that this is just the norm  
which is the norm  
for example, intracellular state

how does it even exist from the point of view of the Soul  
it is precisely organized optics yes  
in fact, it is organized  
optical manifestation of Reality  
physical body

and there are a lot of external and internal events there  
that this is a normalized state

and therefore in connection with this  
we get something like this parameter  
what if we have a Norma state  
then this is the state that  
firstly, it is already contained within you

I gave only one example  
where in the intracellular system  
and how to look  
to obtain the Norm criterion  
well, like some kind of tuning fork

but generally speaking, more criteria can be found  
let's do co-management  
and in search of a criterion  
please note this is new  
in the production version control

because in search of a criterion  
you need to find the actual  
such management  
where well how to set the task of obtaining knowledge  
you do creative management

so here in search of the criterion  
do the same tasks  
universal salvation  
immediately proceed to performing the tasks of the hall  
and the next level

performing their private tasks

Well, it's a bit tense  
some pressure arises  
to the inner string of the Soul  
which is localized, for example, there in the heart area

so that's where the heart is revealed  
as the structure of the dense state of the Soul  
you see that you can restore very quickly  
thus the heart  
not only for myself

if you do an action in search of a criterion  
you often get super strong control  
but in this action  
you are recording a positive event  
through the Norm of your state

after all, we must develop harmoniously  
therefore the task of management is as follows  
that you should have Norma  
because you are rationing yourself  
and the Norm must be universal

as I said in my Teaching  
about Salvation and harmonious development  
It is only necessary to show the structure of the Norm  
it is transmitted almost instantly

so that this is passed on to everyone  
and at any distance  
let's move on to that  
what what is happening  
with your body with your events  
when you solve situations

because in reality you solve them with a load  
one only has to set the task of universal Salvation  
you won't get away from her anymore  
i.e. on the information it is in front of us  
you still think about her one way or another, or you don't think about her  
you solve it anyway

anyway, a person has to take that into account

that global destruction is possible  
if civilization developed like this before the Curie effect  
when there was no such thing  
for example, the detection of radioactive elements

it is like a repressive phase of historical development  
she was local  
but from the moment the system was found  
which has already led to a system  
global possible destruction  
civilization has practically the same laws

it turns out that it just happens historically  
that humanity can develop in this way  
what does it mean that some elements are happening  
when well as if social speed of development  
can't keep up with what's going on  
for example in research into the physics of processes

if we talk, for example, about the technocybernization of society  
about what might happen  
completely different processes in the future yes  
from some discoveries of super-complex spheres  
I don't know any there, or rather I know, but I'm saying  
that I don't want to record this information

i.e. the following situation arises  
what we need to do is  
so that this knowledge is on a negative plan  
didn't materialize yes, you can say there I don't know  
and this may not really come true

i.e. the task of management is to  
so that a person does not depend  
from the development of external Reality  
from the point of view of social processes  
he was created by the Creator, was Eternal, was healthy  
and the events of life were favorable in it

in this connection, the problem of management arises  
where you expand your Soul  
on social on control processes  
some physical elements  
on what they actually do  
other people other departments other systems

and in the Infinite version  
the task of a person is still  
control almost all systems  
including at the rigid-logical phase of Consciousness

so if you ask the question from the Creator's point of view  
such a logical phase of Consciousness created, for example  
which one well as if it controls  
as a person often thinks it can be  
that only some part of the processes

so here is the logical phase  
in this case it is also arranged in layers  
and here is the base, as it were,  
this is what we are looking for, this is the highlight  
what is the logic of Perception, actually?  
where is it anyway to get it  
and expand through management

i.e. don't memorize texts  
and just add control  
and calmly watch TV, for example

where is this logical phase of control  
TV it can be like this  
that you can watch any program  
or write something think about something  
but at the same time the logical phase  
must control all processes

so from the point of view of the Creator  
such a management process it consists of  
that logic is what your body's expression is  
This includes your physical body  
You think logically, don't you?

so it turns out that the body  
human physical body  
to consider  
how do Thinking processes occur in general?  
how do the processes of fixing some things happen?  
as in general well elements of Reality  
how does a person make a decision  
why does he make this decision  
having some logical front

I'm speaking now for the sake of exactly this  
about logic for the sake of a fairly simple thing  
how on the spectrum of perceived events <sup>yes</sup>  
create full control  
according to external and internal Reality

and the perceived events as I already said  
there may be different  
there is reading some book  
at the same time, you need to save  
still full control

and in connection with this  
The creator created exactly this kind of task  
for a person  
when he is solving some issue  
creates complete control  
or, for example, while dealing with some issue  
creates complete control  
due to fixed logical levels of Perception

in light optics  
it could be some thought  
some desire to act

and now if we correlate this state  
with the cellular level that I talked about  
then here is the interaction of these spheres  
for example, the sphere created  
With soul  
In Spirit  
and the logical phase of Consciousness  
and their mutual light  
they create specific technologies

and here, for example, according to my Teaching  
about Salvation and harmonious development  
the specifics of these technologies are that  
what you should see is the universal principle of creation  
as inter-atomic there cellular  
even pre-cellular pre-informational level  
so is the principle of your own Consciousness  
how do you see yourself in <sup>general</sup>  
well, the one in which you see in the mirror  
just perceive in the physical body

and this is the unity of Perceptions  
unity of perceptions  
this is what forms the structure of your Soul

structuring of the Soul  
those. actually structure  
this is what determines the individual qualities of a person

and when you can expand the structure of the Soul  
i.e. well, make a move  
this is still a fairly rigid structure of Reality  
the structure of the Soul is what it is based on  
almost all of Reality

if you can expand it with a logical action  
i.e. having found this level  
coming from the body of the Soul  
such very bright optics hard optics

if you can move it  
then you can disband  
any negative event  
which you perceive with your Soul

your Soul is already like that  
what can you do in a reading state, well, in a logical phase  
any material  
doing anything  
you already manage as an experienced manager

i.e. the transition from well let's say entry level management yes  
for experienced management of the manager  
at the level of optical phases of perception  
it turns out that it's just that  
that you are finding the coordinate system correctly  
which I just described, exactly described

and when you do this management  
you see that event  
as if it is being demarcated, being divorced  
some negative layers are being disbanded  
very simple, very clear and absolutely obvious

i.e. this is the building that can burn down  
it means it is being taken out into another layer  
Spiritual plan of management

and this plan becomes like this  
that the building won't burn down, for example

when there are some pre-signs of an event  
when you see such action happening  
then you have a task of personal management

example , one of my students  
considered the fire at the time  
which took place at the Ostankino TV tower  
and in a year  
and so he came and said  
I saw her first on the roofs [...]  
very strong fire  
he worked there for a month  
he eventually straightened it out  
that means somewhere in about a month  
and what's more, he spoke of such feelings  
he almost held this tower with his back

in the end, he apparently was and is engaged in business  
he then began [...] says I put it  
and I told him  
This is actually a personal task  
once you saw it, then you should personally do it

Of course the task of minimization is precisely  
or generally correcting the situation to the norm  
This is a personal task for each person

and with this instrument of structuring the Soul  
in line with their tasks  
i.e. you structure the Soul in fact  
this is a hard, sort of frontal glow  
Souls proper  
you are focusing on the task of, for example, saving everyone  
then the task itself is already Salvation

I said it at the beginning of the meeting today  
that the task of Saving should already be Salvation

so this is a specific mechanism  
when do you come  
to the structure of one's own Soul  
you get a personal task and do it  
why for example in a second yes

you have the next task, etc.

because by doing one thing correctly  
the task is transmitted to everyone almost instantly

and therefore this is the integral characteristic  
it is such that at this moment in fact  
a very large number will be disbanded  
catastrophic events

after all, if you look at the state of just the equipment  
which now provides control  
behind satellite systems even behind nuclear weapons  
there are quite a lot of problems connected with that  
that complex systems are usually  
often break down

but still it doesn't happen yes  
for example, there are global catastrophes  
Collective Consciousness is often at work here  
basically everything is arranged on principles  
it is the actions of the collective Consciousness

and it turns out that the Consciousness of people now allows  
contain the escalation of catastrophic events  
Well, for various reasons  
someone is holding us very tightly to a position of well-being  
someone is trying to help somewhere with something  
participates in some movements like Greenpeace, etc.

but the task of the manager is to  
so that in my opinion, as I think  
according to my Teaching on Salvation and harmonious development

being able to act wherever you are  
as in prevention  
and at the present time, as if reactively

so when i said  
for example today I am setting the structure of today's seminar  
then I consider it again  
one very simple task  
how to achieve that as quickly as possible  
that universal Salvation is a controlled system  
and we achieved it like this  
what do we know about it logically

and here, for example , when I speak again about the logic of Consciousness  
then in this problem  
logic of Consciousness logical phase of Consciousness  
this is what is actually well united and a single whole with that  
what is Soul and Spirit  
where there is the presence of the Creator  
according to His task and purpose

and when you are from the structure  
actually the Soul of this hard frontal glow  
coming from you for example  
go out according to the Creator's task  
do you see which way  
what actions do you need to take

By the way, these are very tough, specific actions  
specific steps , so to speak  
specific means activities  
they are very clear, they are clear and visible to you  
and you try to look at them now  
and make such control

looking at your personal tasks  
then according to the Creator's goals  
look what needs to be done now  
for the universal salvation  
to solve the problems of the hall for example  
or do it to solve it  
for example, there is a private task  
what needs to be done now

i.e. the light coming from the structure of the Soul  
goes through that structure  
where is the Spirit Soul and the logical phase  
it's a single whole  
where the structure of your Soul rests

and already coming from the Creator  
in fact, it is your Soul  
but how did the Creator create it?  
i.e. how it is structured by the Creator  
where are her tasks

when you see it  
you get a very specific mechanism

and work on it

and then when you do the work  
the work is illuminated by the light of the Creator

because in the work that you receive from the Creator  
the implementation mechanism is included  
The Creator who is himself Eternal  
and created the goal of Eternal development  
It naturally provides a mechanism

of course the question arises  
why doesn't everyone take yes  
and use this mechanism  
because this mechanism needs to be found

after all, the task of universal development is precisely the Eternal  
this task is simply to gain knowledge

and when you have this knowledge  
then all phases  
Soul Spirit Consciousness other elements of Reality  
everything is connected together  
in terms of simply Perception of knowledge

and knowledge about any element  
for example I look at the video camera there yes  
a red dot indicates that recording is in progress  
I, for example, don't think this through  
that's what the red dot says  
then it means recording is in progress  
that's why it's so clear yes  
I don't formulate this thought

so that's when you translate into knowledge  
it turns out that from the perceived knowledge  
you always have development  
towards universal Salvation  
when you come to knowledge like this  
as I just said  
when you see what is embedded in this knowledge

i.e. coming to you

and when you see  
what is coming to you in the form of knowledge

this is what is the level and the symbol  
presence of the Creator  
that this is your personal  
and you know and understand this  
then every action becomes controlled  
you can see well watching some program  
and at the same time know for sure  
that there is no possible global catastrophe happening

and this knowledge is already reflected  
in your heart  
in your Soul  
in your logical phase of Soul Consciousness

pay attention to the Soul Consciousness  
so your heart gets organized  
and you are completely organized because  
what do you know how knowledge works

and when you see how knowledge is structured  
not because it's some kind of object or some kind of TV show  
or some element  
just well let's assume right now there is a lecture element  
element of the seminar when you work

that is knowledge that is actually transparent  
so in the optics of Perception  
they actually unite  
the truth is already in motion  
they unite in dynamics  
exactly  
action of the Soul  
action of the Spirit  
action of the logical phase of Consciousness  
and other elements  
which you perceive  
as elements, for example, of the external world

Well, you haven't considered it yet  
how is the action organized , for example?  
access action suppose in growing tree  
how does your Consciousness organize a tree?

then for you externally there may still exist  
external elements of Reality  
which, well, kind of additionally still exist

in the elements of knowledge

so if even leaving the picture like that <sup>yes</sup>  
without translating only into pure knowledge  
Well, there is a concept of fundamental sciences.  
and there are some application systems

so if you look at this knowledge  
as elements of interaction  
Souls  
Spirit  
and Consciousness  
then the Creator gives that  
what organizes this knowledge  
those. space  
the space of action of the Creator

and when you look at this space  
then your Thinking is in this space  
this is a very quick comprehension of knowledge

this is instant access to information  
it is to act as the Creator does  
because you won't be able to enter the space  
if you yourself do not act as the Creator  
synchronization by light parameters

and in connection with this  
when we consider  
such an aspect of the development of the Soul  
then this knowledge is also there  
and your own body

when you treat your body  
as to my knowledge  
then you see that the body is arranged harmoniously

and <sup>for example, well,</sup> restoration of self-organization  
it's a process <sup>of sort of</sup> catching  
Well, there is a certain flow of knowledge  
and some state is just the capture of knowledge

let's assume if we consider  
well ancient buddhist technologies  
then they worked on flow levels  
and here certain levels of vibrations were made

when external knowledge  
gave them almost everything they needed

So now I propose  
such a training  
which speaks about that  
that the knowledge that you perceived earlier  
well, for example, like ordinary knowledge  
and now we can perceive it as knowledge  
exactly like that and like what I just said

then try  
at this level of Perception of knowledge  
it doesn't have to be streaming or there  
a lot of time has passed now  
from ancient Buddhist technologies  
it's a different time now

nevertheless try to absorb the knowledge  
if you want to see ancient buddhist  
correlate now  
i.e. relate to the current time

but it is best to perceive your own specifically  
what is near you and work with knowledge  
direct knowledge  
to the task of universal Salvation again  
Hall tasks  
tasks of those who will watch, for example , this video recording

and at the same time  
or someone will proofread the texts, let's say  
Who will this information come into contact with?  
in Infinity

work on the tasks  
The endless development of these technologies

then come to your personal task

then take a personal task  
do it higher i.e. first  
and integrate i.e. make everything one

and do it at the level of just Perception of knowledge  
not even specifically

enter the state of Knowledge Perception  
and work with the Perception of knowledge

work more with your Soul  
I work with you  
try to pay attention  
on me and on those around me at the level of knowledge

If possible, try to work like this  
so that well there is such knowledge that they press yes  
as some kind of compelling external mass of information

try to get away from the pressure  
this is the concept of "knowledge presses"  
these are more everyday concepts

by the way it came about in this way  
that when you do management yes by knowledge  
for example, you take information from some book, let's say yes  
the book has weight

then according to the principle of equality of all objects of information  
if you perceive the information of the book  
you are in logic, in the logical phase of Consciousness  
as if you were loading yourself with additional mass  
at the level of logic of perception

so try to work this way  
so that knowledge does not load  
keep the weight that you have from the Creator  
well free not loading

then it turns out you can master it  
Infinite amount of knowledge  
and at the same time you will not, for example, use discomfort  
and perceive an infinite amount of knowledge

therefore the task of management  
in this case it is  
that you must definitely work with knowledge  
but not loading  
you can watch TV  
you don't have to touch  
there how exactly to take some literature from the TV  
some to participate in some plots  
well, it's about the same principle

you work as if remotely

and when you work for example  
look through the structure of knowledge  
that the solution to the question of universal Salvation  
questions, for example, well, there are personal tasks  
becomes harmonious

because well knowledge has a criterion  
can be perceived  
can be directed  
can be transferred

and in connection with this here is my Teaching  
about Salvation and harmonious development is based on the fact that  
what I give here is precisely in the verbal version  
often quite a lot  
in the sense that these were  
simply expressed, for example, knowledge on paper, for example  
and which would transmit the entire technology as a whole  
and that's how they should convey it  
in essence of management action

so when did you work  
through the structure of knowledge  
then you see  
well, by the way, there is a concentration of knowledge  
you can just see the hall is very concentrated  
in terms of knowledge

but knowledge is universal  
therefore, as according to my Teaching  
about Salvation and harmonious development  
precisely through the recovery complex  
you should use  
i.e. restore normalization  
your events for example yes  
your body  
and be able to convey this knowledge

so how can I convey it at all?  
there's nothing special to do  
you are just a simple knowledge

the condition by the way is not critically different  
from the structure of ordinary knowledge

and if you look at my work  
this is "Applied structures of the creating area of information"  
that's exactly what I described there  
what how can you do Perception in this way  
what well when you read some text there  
it is written in the form of technologies  
if you read it carefully

how can Perception be made like this  
to be able to regulate the speed of perception

and when you do for example  
here is the regulation of the speed of Perception  
then the most maximal simplest element yes  
when you are at rest  
and at the same time perceive it to the maximum

i.e. well, here is a fairly simple element  
be at rest  
and at the same time perceive anything  
at any speed

and this is a state of peace  
this is what organizes your physical body  
from the point of view of the logical phase of the development of the Soul

in these formulations  
try to think about it  
from the point of view of an element of vector knowledge

for example in my Teaching on Salvation and Harmonious Development  
in the section means management in politics  
I show how it can be used  
technology of knowledge obtained in political systems

Moreover, these may be earlier political systems  
for example, consider the entire path of development of civilization  
and having considered how they were solved  
some complex issues in historical development

we can simply group this knowledge  
concentrate and obtain investigative elements  
to solve future facts of civilization development  
in a favorable political climate , so to speak

but at the same time decide like this  
that we use just for nothing  
resource of previous decisions

and when do we use  
resource of previous correct decisions  
that did not lead to disasters  
or some cataclysms or wars

then it turns out that prior knowledge  
can be a very strong quantity  
if you only record positive status  
and apply it as if in an infinite number of actions

i.e. if we say  
this is how we need to be prepared  
so that in Infinite development  
always be prepared for the following situations

then in a political sense  
there is one specific mechanism for this  
There are many such mechanisms, but here is a specific one  
must be used  
previous positive decision structures  
in political situations  
in order to solve all subsequent

for this, as it turned out, it is necessary  
just to create everything  
memorandum between different countries  
which would regulate the decisions of all countries  
in a given situation

they just all have to sign  
There is no such document at the moment  
those. the mechanism has already been developed  
what to do is known  
states have existed for quite a few centuries

that's why it turns out  
that often it is just a logical phase of decisions  
allows you to make it favorable  
at least the political climate

and if you make it favorable  
then, for example, it is possible to remove all nuclear weapons

beyond the limits of possibility there explosion on the planet

there at least to take into outer space  
and in the case of direction to Earth  
it is possible for it to be destroyed, etc.

i.e. it is possible to solve many issues politically  
that's why in my Teaching  
about Salvation and harmonious development  
It is precisely this section of management in politics  
this is the section that talks about that  
what is needed here for people to participate  
at the level of your personal knowledge

they often say that a person is somewhere in the kitchen  
and why is he thinking about politics?  
and because he must also participate in politics

and here is the degree of participation  
this is how you perceive knowledge  
perceived knowledge  
you receive it to yourself

i.e. you get that  
what if you perceive knowledge now  
as political knowledge  
then you can based on the plots  
which, for example, appear in the press  
get your own management

and this management consists of that  
what when you do for example control from yourself  
in terms of for example well, some personal aspect

the control you get  
considering the political aspect  
as if control for all  
regulation of the political system  
regulation of the social system, for example  
then you get some gradation  
knowledge, for example, there on the structure of politics  
according to the structure, let's assume it's social  
according to the structure of health restoration, etc.

and therefore if you do come  
to the task of realizing one's own Soul

in terms of universal Salvation  
from the point of view of that  
to organize knowledge in the logic of the Soul  
in the logic of the development of the Soul

that is, the point that is exactly located  
in the physical heart of man  
but she is Infinite  
where do you have a structure of general development  
and one that is expressed  
very specifically in that case  
when you look at some event  
and you can through this event  
regulate physical Reality

i.e. if this is well let's just say it in short  
then differentiated knowledge  
which exist as incoming

you can do it yourself, i.e. by doing the management yourself  
do it this way  
so that the control that comes from you  
it was like this  
so that at the moment of differentiation of knowledge  
when did you differentiate knowledge  
this was the next resource to manage  
i.e. as if the next source of control action

and it turns out that any differentiated action  
this is the source  
for the next level of management  
in this context

i.e. it is only worth perceiving the difference in knowledge  
well, that is, not some kind of solid white spot , for example, yes  
which by the way over time  
also begins to differentiate  
from your Thinking

and to consider the acquisition of knowledge in this way  
that any differentiation  
this is the source for the next action  
and control action

then it becomes clear  
what can you do management then Infinite yes

and a resource for your management  
where is there  
as a principle of self-healing  
and the next action

it's just the knowledge of that  
what about differentiation  
from a multitude of elements of Perception  
which are obtained in one act of knowledge yes  
you get generally speaking  
unlimited amount of actually energy

and it turns out  
what are you looking at  
this is the source of energy  
in terms of management  
let it be a TV show book  
or transmission of information

and it turns out that if you  
for example if you make such a differentiation  
exactly like that, just like I said  
that there is no need to look somewhere yes For example  
This is where the concept is even more appropriate  
already in such an applied sense  
not as a source of energy  
as a means of organizing this energy  
how do you even organize this energy  
in this knowledge  
How do you organize this knowledge anyway?

and when do you set the task?  
complete control over the situation  
then in order to organize, well, there is the action of knowledge  
for example, movement towards you yes  
and there is movement near you

then you get  
that on the spectrum we assume two movements  
you can get control  
on knowledge creation

because acting as the Creator  
you must also create them

then a simple enough question arises

some TV show is on, for example , on TV  
how can I view the creation path yes  
of this TV show  
where is your collective consciousness structure  
participated in this TV show  
or there in the book  
or in some element of Perception  
complex chemical or physical formula  
in a mathematical equation  
where did you create this equation

and when you start going down this path  
Well for example you don't know math  
for example, in terms of higher education, let's assume

but nevertheless you need to look  
how did you create  
and creation implies knowledge

hence  
there is a layer, like an internal glow  
from an expanded state of the Soul  
where the Soul is present outside of you  
and at the same time  
being in you  
i.e. you and the outer space

so this is the state of the Soul  
this is what allows you to understand  
any element of Reality  
i.e. to know it  
and be able to create it

because the control element is in knowledge  
is also an element of knowledge creation

and here in my Teaching  
about Salvation and harmonious development  
knowledge creation element  
when it comes from the action to you  
and near you  
knowledge coming to you and passing by you

then it turns out that if  
to you  
and near you

they may not intersect

and the control element is that

What

the same applies to you

and what's next to you

it should be like this

to get the same level of Salvation

everyone must be saved

including the element that you perceive yes

in the form of knowledge

it turns out that the control element

is in this case that

what is the state of the Soul

which is based on your task

this is what achieves the goal in this case

when I talk about that

that the task is an action and this is Salvation

it turns out that in this case

Generally speaking, this is how the world is structured

from the point of view of the development of Consciousness

that the task of Salvation is already Salvation

because that's how the principle of knowledge creation works

when we consider

namely dynamic systems of interaction

Souls of Spirit and the logical phase of Consciousness

so this is the logic of Consciousness

when you move to a level

for example, well, proofreading , for example, lecture material

what is happening now, well, it seems to concern precisely the level of that

that you can listen to the lecture for some time

and for example it can be done this way

what to perceive and information

in general constantly Soul

but if you are giving a lecture

this should match

i.e. knowledge that is directed

to the task of universal Salvation

no matter how it is accepted

it must always correspond

the same goal  
it should not be distorted

and in this regard, even if you read a lecture  
or watch, for example, a video tape  
then it turns out that the goal of management  
associated with universal Salvation  
this goal she doesn't really allow  
that's exactly what it means to distort

i.e. you can, for example, take a video cassette and transfer it  
everyone can understand it in their own way  
but nevertheless he will understand exactly  
the main task

and there is a lot of material, for example, yes  
many different methods ways  
then ultimately all the methods and techniques and technologies  
which I give according to my Teaching  
about Salvation and harmonious development  
they are aimed at developing  
your personal opportunity  
react correctly to exactly that  
for example, a possible global catastrophe does not occur

I use my own experience, for example  
in diagnostic systems in management in healing  
in full recovery, etc.

and also that those who master the Teaching  
and practices and shows results  
either in these same areas or in some other ones  
they also increase the resource  
precisely according to this knowledge structure

when you perceive material for example  
then here it is not necessary  
let's assume that we heavily load the information with topics  
so that you can sort of logically digest this information  
it is possible and it is possible to study it logically and simply  
it will still be the same comparable action

but you can try instantly yes  
get all the management resource  
through the state of the Soul  
where in your Soul

in dynamics there is  
contact of the Spirit and logical Consciousness  
those. The soul is static  
and Spirit and Consciousness are in dynamics  
at this point they come into contact with the Soul

this is the principle of quickly acquiring knowledge  
if you, well, let's say, remember those states  
when did you take any exams  
then there is some static  
if you need something from somewhere quickly there  
or remember or somehow strain to look  
information  
then this is exactly how it happens

static state of the Soul  
and at one point  
the dynamics of the Spirit and the logical phase of Consciousness

i.e. you can see where this point is  
precisely in relation to the physical body  
near the body  
and often in the physical body  
possible on the border area  
for example on the skin

i.e. dependence on the point of view  
this point is always in the same place  
all people have

so, to pass on knowledge  
it is enough to illuminate this point often  
for example, there is a glow of the heart  
and you get knowledge at any distance  
and very specific ones at that  
you can even dictate as if through a dictaphone  
who does what and they will generally be  
can hear quite correctly  
if of course they are located there yes  
by free will they want it if they do it

so try to do management now  
now it's like this  
what do you take, just dictate, well, kind of dictate  
not necessarily in words  
but at least somehow give the thought in the form of a glow

elements of event levels  
again today the seminar is going very hard  
the task of universal Salvation first

then solving the problems of the hall  
those who will continue to work with the material  
and your own tasks

however, there is no need now  
own task to bring out higher

i.e. it is the strict hierarchy  
universal salvation  
Hall tasks  
then personal tasks

and try through the point of static Soul  
as if through the Spirit to transmit, as if to dictate control  
after all, people are often used to just talking  
and at the same time what he says  
is being executed

here is the method  
you're just kind of talking in your head  
no need to say  
and simply implement light-optical levels  
and that's all

and try to do it this way  
so that problems are solved  
here they are deciding  
for example, I continue my speech  
and the problems are solved  
i.e. we don't stop on purpose  
on this control

next element  
this is when the Spirit is universal  
and it is manifested in your physical body

i.e. the universal Spirit is manifested in the physical body  
i.e. it covers your body  
and the dynamic Soul creates  
logical hard phase of Consciousness  
your harsh perception

This method allows us to do so  
perceive structure  
that all external events are normalized  
as per the tasks of those who shape events  
for example you are in the hall  
and the information that comes from you  
it is immediately standardized  
It's only worth it for her to somehow come out to this optics

she's coming out anyway  
in visual form  
and in the information

and the next level is this level  
what if you do hall control  
try to react to what is happening in the room

i.e. to make it so that there is specific management  
for example , in this case, look at the state of people  
look where someone needs help now  
the principle of collective and mutual assistance

and make it so that the sequence of events is like this  
that as if in the next second  
Infinite amount of time forward  
you had correct control

i.e. you should manage it like this  
so that the action is not discrete  
right now

i.e. the meaning of management is precisely  
With soul  
In Spirit  
and the logical phase of Consciousness  
this is a creation of such  
well, like autonomous areas of Perception  
Infinite Line Infinite Control  
coming from you

hence  
for example, restoring health in one person  
this is often among other things  
a must-have for this person  
virtually an Infinite Line of Favorable Events

i.e. try anyway, well, for example, first of all  
make management by  
well, for example, on restoration around you

for example, there are people near you  
make management  
rebuilding yourself  
and around itself  
and so try to do it right  
expand the sphere of light around you

frontal well the border that moves  
this is exactly it  
she comes into contact with other people  
and restoration occurs

while considering the processes  
as I just showed at work  
Souls of Spirit and Consciousness  
where are you logical phase of Consciousness  
are you considering  
as a structure of perception of another person  
or let's assume other people there

at the same time your personal desire  
restore  
i.e. here is a sphere that diverges from you  
she is in contact with another person  
desire is a state of expansion of the Soul

she is in the Spiritual aspect  
produces  
precisely in the expansion space  
Infinite expansion of the Spirit  
performs restoration

just three elements  
know what desire  
expansion is the expanding Soul  
aimed at restoration

the second is what you perceive  
this is the logical phase of Consciousness  
and the Spirit is what instantly transmits knowledge  
i.e. makes the transmission virtually instantaneous  
and action makes it sustainable

because the act of restoration  
passed on to others  
he is already different  
i.e. people are already in the future  
they see this person as healthy, *for example*  
or he has favorable events as well  
and favorable events as well

i.e. when you see "or" and "and" *yes*  
then you can, *for example*, "whether" i.e. this "or" "and"  
in Consciousness you can simply cut off the logical phase  
and leave simple and favorable events

i.e. try to work with words as well  
so that the logical phase  
moved into the state of Soul  
such action *was carried out*  
so that the logical phase sets the tasks precisely  
in relation to the expansion of the Soul

because good health  
and favorable events can be left in control

so try to balance your thoughts often like this  
so that it is completely specific

and when you already translate the thought  
into the state of the Soul, *as if a thought grows*  
into the statics of the Soul  
who knows that the action is beneficial  
then nothing is happening around then *in general*  
and a possible global catastrophe

because statics is developed  
through the correct technology of action  
leads to the fact that in the future  
actions become creative  
i.e. not distorted

so when we talk about that  
how can one know for sure, *generally speaking*  
that there will definitely not be a global catastrophe  
that there won't be even local, and *ideally*, catastrophes  
then we can say this when we know for sure  
that we are working correctly

and here is the development of correct work  
development of correctness in the work of one's own Consciousness  
this is the criterion that allows us to always know this  
Well, some billions of years pass there  
and here's a billion years and the next second  
what action should be taken

so this knowledge should be like this  
so that it doesn't sort of correlate over billions of years  
but it is enough that the knowledge is accurate  
at least at one level of distribution

that's why i always suggest to practice  
It is important to track the results very accurately  
as on a physical level  
and at the information level

often what is on the information  
at the informational level  
you manage to prevent  
this is what is most significant

because having considered some negative event  
which can lead  
to a possible global catastrophe  
if you disband it  
then in conditions when you have made at least one control  
at the expense of Consciousness  
further it is already reality  
i.e. it means you did it

it turns out that the next management is already  
Well of course then you have more stress  
i.e. the responsibility is even higher, etc.

and for every action of course it means  
Well, first of all, you get the following tasks  
i.e. the usual path of a rescuer

having done some actions  
you are doing as usual  
next and next tasks etc.

so if possible, you just need to get used to it faster  
and then it turns out that specific actions

this is where you are absolutely sure that you are doing the right thing  
it must be that  
that you should be in this state  
what are you doing right

because the task is precisely  
prevent a catastrophe  
not to fix even the smallest elements

if they start to be realized somehow  
Of course we should start preventing them then  
and to a greater extent personally at first

Of course the legal system helps  
all who are involved in the system of direct Salvation  
social levels support  
the state is obliged to support  
there are such people there authorities, etc.

but the main task for managers is to  
to do the job personally first and foremost

if already there in the most extreme case  
for example, use the structures of the logical plan <sup>there</sup>  
such as social structures  
security systems  
security systems, etc.

so we need to work it out here  
it is precisely the element of personal participation

if, well, let's assume there is some kind of catastrophe, for example  
external from the point of view of outer space  
it turns out that the exhausted resource can be like this  
what if you start using  
social characteristics  
then how to achieve external control <sup>there</sup>

that's why I think the main thing  
this is a personal practice first and foremost and

Of course, if necessary, you can always use it  
any creative systems <sup>there</sup>  
always rely on the organs <sup>there let's assume</sup>  
interstate state, etc.

and as a conclusion to today's seminar  
I would like you to do it again  
based on the totality of knowledge gained today  
using for example knowledge from earlier seminars  
from some of my technologies  
on the task of saving all

concentrated management is already like that  
as if the total sum  
again connected with a specific production  
universal salvation  
work on the tasks of the hall and the tasks of those  
who will work on Salvation technologies  
by direct access

and your personal tasks

here make such emergency very fast control  
as if instantaneous

Shine the light of Salvation right here

Thank you very much for your attention

I'm finishing for today
