

GRIGORY GRABOVOY
The Teaching about God
**The Governing Action of God
in Infinite Development**
05.02.2004

Hello again

The topic of today's seminar is my Teaching about God
The Governing Action of God in Infinite Development

when I look at this topic
first of all I wanted to highlight
spectrum of God's Infinite Initiatives

i.e. when we look at God
as an element of development , let's say
i.e. we look at God and at the same time develop ourselves

then it turns out that the initiative for development
in relation to us
She is Infinite

i.e. the first level of development
i.e. primary knowledge
it is always knowledge of the Infinite level

and based on this when we consider
for example the element of Infinite development
then first of all we should see here that status
what God gives
firstly, the development technology is like this
what is she like for God

and from this point of view He does not belittle
human status
when we talk about Infinite Development
then naturally He sets the task of Infinite development, including

and then when a person develops infinitely
wants to know, for example , what to do next

for example, billions of years pass there
and a person faces a task
and what is there to study further if he, for example, he can do everything there

and when we pose the question in this way
then we are looking at God's position here

where in every knowledge there is an Infinite path of development
and man himself is Infinity

when can we determine this
then we are considering this position
as if of its own development
that the Infinite line is as if of its own behavior
Well, let 's say that in the surrounding
in the environment in the management system of some internal resources
OR let's assume there are the following elements of their own life

we can approach this from the same point of view
that having seen the Infinity of one's own essence
we can help God in that
that the Infinite "I" is its own
also expresses well in general, the elements of the World in the Infinite
understanding

i.e. we can see ourselves as an element of Infinite development
if we do some kind of final action

and when we already find
this is like an internal stimulus for one's development
but this is, in general, also an incentive for the individual
according to one's own development

when every action is an endless action

then we can do something like this for example
what is the movement of the Sun
is it possible to somehow speed up or slow down in the controls

by the way, if you measure it objectively
the structure of movement in the optical range
physical as if the control coefficient
then it is clear that this is what is happening

i.e. it is possible to objectify the management of Macro-phenomena
sort of place them to the side
maximum level of control
even for a specific person

and then it turns out
that we have that system of governance

which is called
a system of Infinite control in general
and having come closer to the Eternity of God
we see that God is that level
where every control is an Infinite action

therefore, based on this
when a person for example there it reaches everything
and that's all he as if it could do yes in Infinite development
every action of his must be preserved
in Infinite Level Control

i.e. every action must be
and Infinite and conscious and necessary
moreover for example there is the next level of Eternal life

after all, when the question is precisely about the Eternal life of man
then the main criterion here is
an element of choice as a criterion for the next action
this is what a person should do next

Here's what he did, for example there are all the main things, as he thinks
and what should he do next?
and what else can he learn

then it turns out that this is the answer to this particular problem
is precisely the level of studying the movement of God
in the status of one's own Infinity

Endless events
and the governing Action of God
at this level
God knows everything and can do everything
and why does He do the following action at all?

and it turns out that when we start studying here
it is precisely this level of further human development
we see that God teaches in general through the phenomenon of the surrounding
world
because we can actually determine
the surrounding world as a controlled system

what we can mean further learn to manage
those systems that are there at the moment, for example
are not considered as complete systems

i.e. some distant future
which contains new phenomena
so the future is not defined
based on
Well as if not defined yes
if we can have many options in management

i.e. why does it turn out that God created such soil
under the feet of man
that it can go in different directions yes

depending on the point of your decision

and because it is a system of movement
i.e. the future is a system of development, it is dynamics
transition of a finite system into an Infinite one

and when we start to see the situation this way
then we see that God gave every person understanding
of all His own understanding there
His own level of knowledge
how can he help God for example
how can he make Infinite Reality
resulted in final and acceptable actions, for example

i.e. when it is in harmony
with their seemingly final actions
i.e. well, he took one step and made a movement with his hand, etc.

when we start to look at it this way
the whole Reality
then we see that every person
he is, in general, very closely connected with another person
in terms of mutual assistance

because well, it's a finite phenomenon, so to speak
as a characteristic of human health
transmitted infinitely
in Infinite number of levels

i.e. one healthy person
can generally organize
healthy life of other people
by creating the Infinity of your health status

and in order to create such a status
you just have to be able to convey it

in the same way as God created, for example, a healthy person developed suppose there is civilization

then we can see

that for example each cell of a person organizes his whole being
i.e. where the Infinite action of the cell
from the point of view of the cell it is like a multidimensional level
or multifaceted level of development
when, for example, processes occur in distant cells
for some cells, they seem to be processes that are, in general, Endless

i.e. there are criteria for knowing any object of information
a cell recognizes another cell

from the point of view of one 's own perception
and be sure that other cells are not Infinite
for a specific cell
well, which is sort of engaged in the process of cognition
No

so we can say
that one of the quantities for the cognitive cell
this is the Infinite development of any other cell
even by the way the one that is nearby

because there is also an atomic level
the cell consists of internal contents

and when the cell begins to explore the atomic level
she generally has an exit to the Infinite environment
i.e. she herself becomes, generally speaking, Infinite
in relation to another system in general, yes
to the adjacent cell

then it turns out that her answer to this question is this
that she herself is Infinite
and in general the answer is precisely in Infinity
as if of finite magnitude

this is from the point of view of for example there at the cellular level
level of analysis

if we want to consider a person's life as a whole
from the point of view of these phenomena
namely the Infinitely governing Action of God
then here at this level of my Teaching
it's just the transfer of knowledge

this is knowledge that is generally universal
in one final action

because even one understanding
from this perspective of management
gives Infinite level of development to everyone

and when we look at this process

in general it's quite clear

i.e. from the point of view of a kind of attachment
to a specific one person

then we see that it is enough for one person to achieve

well, maybe in some of my core activities

some level of Macromanagement

i.e. to achieve through Macromanagement

their personal tasks

solutions to their personal problems

after all, achieving personal goals

this is also a task

and from the point of view of the Soul and the development of the Soul by man

it turns out that when we say this or do this

we develop our own Soul in terms of that

that we generally define the tasks

i.e. we set tasks then with the Soul

and that's when you get out

to the level of setting tasks by the Soul

you see that your any final action

on a physical level

i.e. you rode there on a bicycle, well there let's assume it's three kilometers there

this is an Infinite action in relation to God

and in relation, generally speaking, to the trajectory of movement

as soon as you find yourself in this trajectory

Infinity points

you are in contact with God and it is obvious

i.e. God tells you

Well For example there Light there in the form of a specific level there

where there is, for example, a conversation with the Physical Body of the One God,
etc.

i.e. you are selecting the Infinite Line from that

that you have set up control from the Soul

you can make a trajectory of movement

the trajectory of its development there is actually Infinite

as if in retrospect

i.e. make the control in the past

hence it turns out that management is in the past

also from God's point of view
affected by your current action

i.e. as if by a limited action

for example, by time or by space

and it turns out that in this position

it is very easy to see how variable the past is

i.e. the past also reacts

to your control system

as is the future

absolutely identical, moreover

it's very simple in this system

see the system as if it were a mutual reaction

past

and the future

when you enter the structure of Infinity of action

and when you see

as if the super-controlling Action of God over you

i.e. you don't just do [...]

but you understand how it's done

from the point of view of your Soul

there for example, physical structure

from the point of view of future development processes

then it turns out that for example there

quickly regenerate the body, i.e. take and renew

Well, to put it simply, to replace the body

like healthy and new but yours

you are no different

for this, all you need is just

in this technology take

The infinite environment of the past state

i.e. how do you think about yourself in the past

and make every thought Infinite

that's all

give the property of Infinity

by means of volitional control

then you make a kind of logical change

It would seem like a change, but in fact it is the development of your body

towards just complete health

due to the fact that you saw the real environment in general
what is she like

and when you see it you do it
i.e. seeing and doing for God are one and the same thing

and you learn in this technology
see and do and determine the path of development
when for example different development systems
let's assume we can have
status of completely different development

i.e. the person there is involved in technology for the first time
he may be very advanced in a particular technology
but in this system he can, for example, see
i.e. in this system he can see
control system
she is what she is from God
Get Macro Access Right Away
regardless of the level of development
and in general he can get Macro access
as if in action identically directed

i.e. people can instantly unite
and save civilization from macro-destruction
because for them the controlled past is the same
as well as the controlled or not yet arrived future
i.e. management is a system, in general, of reaction to one's past

and people know the past and it happened
here is the fact of the action of the past
on the future management system

when we can quite well as information
or so to say the volume of information
you could say it's like the energy of the past
translate into a future sustainability system
without changing the picture of the past
i.e. the past still doesn't change for others

and if for example one level is control
when you for example for another person
after all, they also changed the structure of the past
then it turns out that another person has connected
consciously to this process
he needs it for something

and it turns out that the future is like this
that people with different levels of Perception
with different levels of action
can save civilization
because they will unite
based on their collective past

this is where the so-called system is introduced
collective past
which well for example reproduced in historical information
or which is the past of every person

that's why from this point of view people are also different
because there is no other option
a person who has one development system
always has a different structure of the past

they can't be similar
because in the future it's the same space

and the property of space
in this way we can gradually determine
since we are moving as if according to our own systems of development
and then in the future we should be just as different in general
that's why we are born different from the start

i.e. we find the Law of creation of man in this way
that one person is different from another
here is one person - this is the whole world

when we see this picture quite clearly
then we can determine
why one person influences the world

and because this one system
This is also a determining system
for this person
and as if in an exceptional way or something
when a person sees complex management and everything in general
it turns out that it is the defining structure of the World
from the point of view of one's level of knowledge
and generally speaking myself

i.e. a person comes to himself
when he sees himself in the center of the world

and in this case he has very easy access
because in this system he already has
that's the concept of "time" there
the concept of "space"
or the concept of , say, "managing one's own health"
this is a corollary concept
because he has to make decisions
what to do next anyway

as soon as he feels it
i.e. for him, as it were, the problems are solved for such a person

but it turns out that every person
generally speaking, organizes his physical body
around this status

by and large tasks for a person
always resolved in a positive direction
i.e. it is harmonious in essence
because it is in the center of this system

and so when we study technology here
Actions of God in the Infinite development for man
then we see that it is precisely the allocation of status
what does a person need next
how does he generally plan his next tasks

but there is such an element here
immediately follows from this technology

that the previous tasks
also have Infinite development
This means they are visible and they have an impact.
i.e. you have probably often encountered this situation
that you fall into the structure of past tasks

well, it 's completely identical, as it were
external information environment
because they are the bearers of the same positions
maybe the same structure of the past

although positions change
like a platform, like on a train, it's the same
although the objects may change

and you get out on your own two feet
step into the management creation structure

in fact, in general, by you

i.e. you highlight the level of Spirit
where you just change the content on that platform

and it turns out that the management
it is your own choice

in general, in any case, there is nothing else
there is a carrier and you change something
just take a closer look at yourself
Usually people see this in their dreams
why in a dream a person for example it opens there
in some situations it is cured there

to make sleep healing

then in this case you just need to log in

as if into the internal structure of the World of one's own

like this is where you are in the center of the World

and do it like this

so that the change of these positions would be such

so that periodically the structure of sleep would, as it were, replace

i.e. you rest in your sleep

you kind of take the sphere of sleep or the platform of sleep

and make it constructive, i.e. load-bearing

and it turns out that at this moment you

as if you were doing it on some kind of substrate

i.e. the main control platform is preserved

but during sleep you rest

you give her some time to recover yes

fill it with backup functions

it turns out that you can restore

as if a supporting platform always

then you come to the conclusion that any action

it is clearly predetermined

anyway it is on the same platform

very boring then

maybe psychologically everything is known everything is clear

and here the main, so to speak, criterion moment arises

from the point of view of personal development

as soon as he does n't get bored

i.e. well, he doesn't get the disease, right?

it doesn't go into some kind of unstable states
and vice versa
since everything is known
This is the most powerful level of control
for personality
and there so that the person is not there, well something like that
that he does nothing there
OR let's assume that from the outside he might look like some kind of lazy person
i.e. he has reached a certain level and thinks that it is normal

then it turns out that he should look
and how does God do it in this case?
He even created His own platform.
Your Own Development

i.e. with God the situation is even more magnified, yes
incommensurately
in relation to the position of man

and it turns out when He sees it
He finds that man
this is how he reacts to the situation
that He generally speaking builds His own Physical Body then

i.e. God is busy building His Body
in Infinite development and it does it constantly

then it turns out that God has a certain
Well as if by a property and a certain possibility
or so to say, ability for a person
when He can for example resurrect there
when He can change Reality in any direction, basically
for any person at random

but for some reason
, he sometimes doesn't do something there, he does something yes
a person has a question
why not just take it and take it, for example
and not to improve everyone's health at once

but then here is the question
personal development of the human Soul
then a person must be able to overcome
again in Infinite time any event

and it turns out that the Souls of people are often oriented only for independent action

that's why this system
namely the Infinite level of development
of one's own impulse and knowledge of the action
This is also an access system

because when you work
at the level of, for example, awareness of that
that every action of yours is Infinite
this means it also reaches any system
naturally and in this case it reaches

once you start thinking that way
it becomes clear to you that you can get there
to any system in your body
generally speaking, to any cell of the organ
i.e. you can generally restore it then
once you get there it means you see
once you see it, it means you know what it is , for example well, that's it
what needs to be restored
or for example in principle if you quickly restored it there
what to do next

and here is this difference between
action
end of action
and the next Infinite development
this is a creative message
i.e. the creative impulse of God Himself
when the transition is very fast
from the level of the action's end
to the Infinite next development status

i.e. the next thought
the next level of the idea of Infinite Development
next level creativity

then it turns out that we can quite well see here
that creativity i.e. transition to fast actions
on creative Thinking this is the Action of God

why for example civilization is developing faster and faster
in fact, it means that in essence she is fulfilling God's task
according to the structure of the formation of the development goal

i.e. for example a person who has Infinite development
at some point he understands
that he is there for example, basically I studied everything in civilization
but civilization is developing so fast
that while he thinks so, something else might still arise
or the problem arose again

i.e. God puts it this way
objective or something Reality of existence
and the Eternal development of man
tasks for himself, generally speaking

then it turns out that the technogenic development of civilization
this is one of the levels of development of course
where is God's task
but man-made not in that sense
that for example the reproduction of these systems
maybe destroy civilization there, let's say

the task here is precisely in this technology
such a thing arises
that it is necessary to establish the structure of Spiritual development
over man-made

i.e. the technogenic level is only one of the levels
because people are dedicated, they can radiate the state of the Soul
and in general there is no need for any devices there
or systems of civilization development

but for those people who perceive
for example, man-made level
it turns out that a man-made environment is being created
from the point of view of the personal development of each person

and here it turns out that if people
who, for example, perceive Reality in this way
will start to deal with management
over technical systems for example
or they will simply set a task for everyone
knowledge of the next level of development
the same technical system

then there will be no need to develop there
in general, the systems are supposed to be destroyed
there in the form of nuclear bombs, etc.
or bacteriological or chemical weapons

because we are always dealing
with the need for further development
as soon as a person understands
that any created element
has Infinite functions
from the point of view of the governing Action of God
or from the point of view of the principle of God's Action in general

it turns out that we see this
in general, a system of transformation of Consciousness
that God essentially then gives man the opportunity
even on the basis of one phenomenon perceived by a person
develop already infinitely

i.e. a person only needs to open his eyes
see there your own finger or fragment, for example, yes
or just look at your body
or even see anything at all
he already has the status of Infinite development

that's why a person's thought is seen immediately
even before a person opens his eyes

example , when you consider
this element of development
This is a powerful level of controlling clairvoyance
it is precisely clairvoyance that practically accomplishes
action beyond visible action

i.e. it is meant
that you can perceive one control element
and you are already taking action
i.e., as if you are making an optimal path of development for yourself
even before you received the signal

then it turns out that you can
in Infinite Level Control
constantly transform the signal
as if exactly in a healthy phase if this is health
or just in the optimal phase
the most favorable for you
in the event

so we have already come to that
that when you for example start to see

how does thought work
from the point of view of transparency and external Reality
then besides the fact that this is generally the level of development of
clairvoyance
in fact, quite powerful

you need to see that the Soul reproduces this thought
inside the physical body

and when you see it you find
place of the Soul
inside the physical body a specific place
and how the Soul organizes thought
i.e. how does she generally create it inside the body

when do you start to see it
you see that all parts of the body
connected to each other by endless lines

and these are the lines of Infinity
this is the final, as it were, formation of organs
i.e. the form of organs is Infinite lines of connections

from here it is quite easy to see
like an anatomical atlas of one's own body
from this position
and then the problem of recovery
even with some serious violations
It's not really complicated

i.e. it is enough to see how it is there
For example there the liver or the hand is connected there with another hand
or again with the liver or with any other organ

i.e. here it is necessary to identify the level of Infinity
as if in form

and when do you want to learn this form
i.e. to get a kind of anatomical atlas
you need to consider first of all
action of your body

i.e. you should see yourself as if from the outside
and look at the body from the outside as if with an external gaze
Well, from memory, yes For example

but then it turns out that you can
to emerge as if into an external structure
in relation to oneself
in management

if you can imagine yourself from the outside
and any person can do it
then it is clear that you are using some kind of instrument
introduce yourself

and from the point of view of human Consciousness, generally speaking
and when we talk about that
that each element is objectified
for Consciousness
Endless action

then it turns out that there is a ray, as it were yes or a property or something
information of your body's energy
where you have the property of the primary impulse
and at the same time actions outside of oneself

i.e. the impulse is formed as if inside the body
but at the same time you are looking from the outside

it turns out that you are connected with God in Infinite action

if you have something that hurts, for example
it is enough to generate such impulses repeatedly
i.e. look at it several times as in the photo yes
on your body
and you straighten it out there
First of all, the muscular system
then further internal organs, etc.

i.e. a constant look at oneself
this is standardization

and when you start watching
why rationing?
because then you perceive yourself
as an Infinite System

it turns out that you are straightening yourself out naturally
because you do it because you understand
about the Infinite connections of organs for example

and as if an external level of control

and here there is a peculiar
basically the culmination of today's lecture

in that when I talk about external communication
i.e. when I talk about that
that a person looks as if at himself
it would seem here
and in general from internal organs
it is clear that there is an Infinite connection, etc.

but this way you can see
The Physical Body of the One God
when you view such a position
from the point of view of Infinity
and the internal finite would seem to be from the point of view of the form of the
system
but Infinite in terms of possibilities
and truly Eternal development

and when you look through it as if with an external gaze
i.e. how does the question come about?
who even watches it anyway

i.e. here it turns out that you are watching too
and at the same time, by the way, God is looking here

when you see how God looks
where is he looking from anyway
you very clearly find His Physical Body
absolutely and unequivocally

and in this case it is enough for you
just to draw attention
on His Physical Body
you will get healthier
and you can get healthier for an infinite time

keep in mind
a person always has the opportunity , as it were, at one of the points
to get healthy for Infinite Time
well, it's kind of like an expectation of a miracle
for a person
this is the Reality that is always realized

i.e. that is why there is no concept of "incurable diseases" there

there is no concept, generally speaking, regarding the essence of the end of life
provided that a person can always
get into this position
God gives him this position.
to perceive it as often as possible

often this position is simply imposed on a person
if he doesn't seem to perceive it

is imposed many times
because any action is at least one-time
has a wave-like property, again Infinite
and if a person is born initially healthy
and initially people in general all
are focused on being healthy
i.e. there is an idea and there is implementation

then it is enough to just take the idea itself
this information
you can always recover
because here it's like this, well, it's like the main one, or something
closer to the matrix, so to speak
system
You can just look at it and that's it

if the idea seems like that
what is she like for example logically introduced
well enter it logically for everyone
May everyone always be healthy
and take energy from it again
i.e. you will recover from it

and it turns out that a person can
correctly, for example, to gain control
even if he himself introduces a control system as if
for myself
but as I said, the idea is for all of humanity

and it is in this very section of my Teaching
the governing Action of God in Infinite development
in the structure of the Doctrine of God
I'm just showing that you can act here
critical only in ways for all people at once

creative action for all people at once

and here Thinking works

only in this environment
in management it is meant

i.e. you can of course think as you want and in different ways
but when you enter this control system
We always work for everyone
and the action immediately becomes exceptional
creative for all
in terms of the fact that you received some new knowledge
useful for people

this knowledge is immediately transmitted
and of course this makes it easier for God
i.e. He no longer needs to do the same task
people moved on ^{yes}
approached the structures of Eternal development
came closer to understanding what to do next
when they learned everything

after all, in essence, it's not for nothing that I naturally touch upon
this question now
because now many processes
in the human body in general in social development
are defined precisely by that
what is the correct answer to this question
this is the real Eternal development

when again I once again emphasize here
a person ^{means} at a certain level of development
after all, he has such a question and immediately answers it
it is clear that now he is confident in his future

here is confidence in your future
from the point of view of Infinite development
in this technology it is that
that you won't be in for any surprises

after all, we are still engaged
technologies for precise development of systems
and therefore it turns out that if, ^{for example,} Well you work and work ^{there}
and suddenly ^{there} throughout ^{there} let's assume ^{there} there are billions of years
they have collected some information ^{there}
and suddenly you have some question
and here's what's next

if you don't answer right away

i.e. you won't move on to the creative moment, ^{yes}
the appearance of God
i.e. creativity is what God sends
as an instant action
how ^{so in general}, this relates to the concept of a miracle
but in essence it is
God awareness always
acting in an infinite way

and then you will clearly, ^{as it were}, open up before yourself
the next one ^{is} a billion years old
^{Well}, of course I'm saying this purely ideologically
we are actually talking about Infinite development again

and when you see such a structure
First of all, this state of the Soul arises
i.e. precisely the state of the Soul
when a person understands
why was it created by God at all

i.e. in general it's not even that
what exactly ^{does} God want from him
maybe He even tells him
^{there for example}, develop freely, live forever and so everything is ^{yes}

i.e. in Infinite development the concept of "something wants from a person"
it already belittles
a person becomes more ^{of} a free personality
in terms of what he creates ^{there}, he does not destroy
he solves things in an optimal way, ^{so to speak} ^{Yes}
from my point of view

and the question arises again about the state of the Soul
and this is the state of the Soul, this is that state
when the Soul becomes aware of its physical body

i.e. the Soul comes ^{as if}
into ever deeper harmony ^{or something}
with the physical body already Eternal
i.e. the concept of "Eternity" is that structure
when even random events don't work
this means maximum external control
i.e. there are no negative events
and also body awareness

and that's when awareness of one's body becomes universal

after all, we are talking about the fact that the body also means Infinite
then we get exactly that harmony here
when the body in general Well, it would seem so
local physical body of a person
can live in any environment
in any environment it can be well meant
it can create oxygen there
it can create Reality

and it turns out that we have
in general, it's a peculiar phenomenon
that's when in this case we look
on your physical body
we see the Physical Body of God
how god creates you specifically

i.e. we come to the conclusion that
that we see the mechanism of creation of your body
by God himself

then what are the problems?
come to this point with your Consciousness
what's there, well learn to do these movements
by his faction of Consciousness
by analogy with how God does yes
and please restore or create there
what do you need

i.e. then it turns out
that the management structure is quite clear
another question is that you need to go back well as if back
i.e. the created structure
to realize in physical Reality
i.e. do the following movements yes

this is not a mechanical creation after all
and not a separate creation
you live and do not stop living

so when you talk about this element
then you should look
as God in what area of information
he creates the Soul of man

those. even a vision of the area

where man creates the Soul

for example, from the point of view of its development

it is God who creates the Soul, this is the area

and there is an area that is a little lower on the vertical level

where there is as if in fact, such a concept as "Soul of Development"

i.e. it is precisely the structure of the external radiance of the Soul

i.e. Infinite properties of the Soul

i.e. the property is separated from the development structure

This is how God distributed the phenomena

so that it is understandable to a person

how to develop spiritually

That's why he did it

by analogy, as it were, with the structure of the organization of the Soul

made the world discrete

i.e. one object differs from another

and by analogy, a person, as it were, is gaining

long experience of difference in objects

begins to distinguish

where is the creation of the Soul of man by God

and where is that Reality in general?

where a person can participate

i.e. a peculiar system of radiance in essence

and logically this is the Soul of development, so in general you can say

and it turns out that we see a connection

when a person works on development

i.e. when you see the structure of your own Soul

and you try to generally reach the structure of the Soul

from which God created

i.e. you create the Soul of development

but you formulate it as the Soul of development

not as some kind of development principle

or there is development technology

namely the Soul

i.e. you create not the sought after Soul but from God

given to you

yes, in principle you can structure it too

or to do more generally complete action

but originally created by God

it is only created by God

and when you do the Soul of Development

you see that the concept of "Soul"
this is the transfer of technology in words

then it will be clear that it is possible to impart intelligence

for example, to animals yes

it is possible to give intelligence to plants

to any element of the World in general

and make any element of the World creative

if the element is built

according to the original property of the Soul

i.e. in the reflection of, as it were, an element of the Soul

and it turns out that well, in order not to complicate things anymore

at the level of Perception this is the process

in fact it is quite complicated

and what is the least complicating thing in this case?

the more you can see

this effect in optics is exactly like this

i.e. and a complex mechanism when a person creates

as if a system of self-development

there are a lot of connections there

but when we look from afar

and we see above the structure where the Soul of a person is created

just in Perception

then the element of development becomes more understandable

i.e. it becomes more understandable

or generally speaking, they are simply understandable

images

where a person generally does it himself

Here we can work out absolutely clear

development systems of the future

quite definite

i.e. to know absolutely clearly what will be there

at such and such a second

at such and such a time and there are no problems at all

if you enter this system and work

and it turns out that here is precisely Infinity

it is passed as a property of actions

i.e. a person acts somehow

by analogy with how God, for example, creates the Soul

and then the physical body can be moved

but through the glow area
where there is action of the Soul
already created by God or being created by God yes For example there etc.
That's why
I have for example for other people

and when you start to see this area
i.e. work near this area
you come to the conclusion that, generally speaking ,
what is infinite for a person
i.e. the Soul is Infinite from the beginning
and this is also being implemented there
the system of Infinity of the World in any action

and here we get, as it were, the final glow of the Soul
i.e. locally you see the glow of the Soul
this is the Infinite System
but how is the Infinite system created

for this you need to see this space

and depending on how close you are yes
according to the level of one's own development
so you get your own tasks then

and so receiving tasks is a vision of the situation
real vision
because receiving tasks can of course be different
but when you start to see the situation in full
you get not only tasks but also strength, i.e. the path
the path is also power

when you start going down that path
becomes solvable for you
in general it turns out that absolutely any problems arise here

because any problem is there Yes
stretched out to the Infinite structure
very easy to calculate
because all the properties of the problem are embedded there
therefore there are all the answers to solve it

i.e. the property of Infinity
aimed at a seemingly problematic value
useful property

you can very clearly determine the status of the problem
from all sides, which means we can solve it calmly

because as a rule

It happens that the problem is not solved

if the characteristics of the problem are unknown yes

as such, let's say completely so

so on the one hand we don't enlarge

systems of this problem

and we just translate it into everything

into the space of Infinite quantities

and we just get a kind of decomposition, well there in the Endless Row

which, in general, can be restructured very quickly

take only one link from this row

transfer to another system and everything problem solved yes

no need to push a big stone

no big effort required

Just look at him

from a molecular level point of view

and, for example, pull out one molecule

the stone may crumble, no problem

and it turns out that this level of solution

he is also like this

what is the stone, in essence, if it crumbles there

leaves some for example traces

in the physical world

and it turns out that after all it is your personal problem, for example
or the problem of civilization of the people, etc.

and therefore the solution is in the Infinite variant

gives an exact coordinate embodiment of that

and where to distribute the available material

i.e. it will be immediately clear that if we remove one block

and where will we place the rest for creative development?

that's also clear

because the World of Infinite quantities

there is always a place to put something

and from this we see

what does a person have

the property of Infinity means well which he studies

or which he acquires

in general, it works out here
a kind of unique value
what does this property convey to a person
the status of Eternity, as if in an absolute sense

i.e. a person begins to realize himself
in the status of Eternal
as a whole the level of Infinite Consciousness

i.e. he believes that the Infinite state
this is its natural size
and it seems that there can be no other state in general
this is one of the Divine states
when God He is generally located
in a state of supreme harmony
i.e. He has no problems, generally speaking
with choice of next action

and that's when a person studies
these are the structures of Infinite development
then the next action for him
the natural level of his condition

i.e. the state of the Soul is the entire external Reality
The soul passes on
into the structure of Eternal Infinite development
being in the physical body of one person

then it turns out that for a person
in general, in essence, the following situation arises
that all external information
this is, in general, the level of its implementation

i.e. it is no longer there in search mode
here's what needs to be done there what solution to choose
to make the best decision
but just for his entire condition
state of the Soul
where he, for example, implemented it himself
own physical body
through the structure of the Soul organization
i.e. he gave the body the properties of Eternity yes
properties of Eternal development

then it turns out that in Infinite development
another level of simple state arises
i.e. the one that can now be understood logically

or by way of ^{Spiritual} insight
or by means of ^{development} technology
in the study of the processes of this level of development

and it turns out that we see such a level
when now ^{for example there} by logical reasoning
or by solving the problem
where ^{in general} you need to have answers to any question

it turns out that we are quite considering here
the management process in this way
that we having that state ^{means yes} Eternal development of man
when it works out in the grand scheme of things
any decision he makes is the right decision
in this environment

and now imagine an even more free ^{yes}
human condition
than that whatever he does it's all right

and then, ^{in general,} the situation is completely different
The world is beginning to transform
to other criteria systems
social, spatial ^{and} temporal, etc.

and as soon as you understand this structure
you see that your body is actually now
well and your Soul of course ^{yes} Consciousness your Spirit
generally speaking, we organize everything together
^{in general,} we are organizing exactly this system
i.e. we try to highlight in system management
it is this environment when we speak and think
it is about Infinite development

i.e. when we organize, ^{let's assume,} a management system
coming to us as a ^{personal choice , yes}
i.e. we choose it personally
because we know the next level of control

i.e. we believe that we do this consciously
because we should at least ^{say so} spiritually ^{yes}
to realize at the level of the Soul
and how does God even realize Himself?
^{there} in Infinite Development

then it will be clear to us what we should do
and where is our inner light
i.e. where in essence a person is connected
with this Reality
and with others

and then it becomes generally clear
a system that is not absolute
the system there, for example, is some kind of fantastic
or some very distant Reality
because when a person enters this state
Generally speaking, he is actually in this state

this is the meaning of real management
there you can diagnose some level of Reality
there are planes, equipment, people
can be accurately diagnosed
i.e. that's how it is

I diagnose there, yes, that's how it is
but you can just think about it
but it all depends on the condition

what system is a person in

i.e. either in a real system
or it is located yes in the structure of Thinking

so this is the system when a person comes
to the level
where any of his decisions is the right decision
from God's point of view
this is the level where it turns out that the diagnostic environment
this is the environment that he creates, generally speaking
i.e. he sees the maximum level of his participation
in this environment

and although they exist
external of course yes phenomena of Reality
then they become clear
from the point of view of the same picture again

how it folds from the Infinite Link
some element to a finite value

i.e. there is a car driving there, but what about the connections? Endless
are folding
exactly in the element of this machine

and it turns out that the person is participating
not as a carrier , i.e. not he ^{there} with a great tension of Consciousness
creates this machine or some organ restores it
but he simply knows everything and participates with knowledge

and knowledge alone is enough
according to this structure
i.e. where are these Infinite lines connected
and then man receives control again over everything
knowledge is universal

generally conveys this knowledge
transmits quite quickly
almost instantly
for knowledge is immediately transmitted to all

and it turns out that the picture is like this
that now we are already participating in this process
the only thing is that participation in this process
the fact that we participate ^{in general} often at different speeds ^{yes}
on different controls
it still speaks about that
what is on the Infinite level
different speed characteristics ^{for example} Yes
they are quite conditional
because it turns out to be their final speed
has Infinite realization

and here it turns out that we are in this way
we are at the same level
what for God
all levels of Perception are equal

and as soon as you start, ^{for example,} this mechanism
set out in today's seminar
since the seminar implies
that you were also doing work now

and I showed what elements need to be considered
and this is also work

you try to apply control in this way
to work

as towards the development of Infinite quantities
i.e. to see the Infinite from the finite quantity
and vice versa
from the Infinite to receive
Laws of development of finite quantities
The laws of their formation , as it were

then you come
into the status of precisely the Eternal harmonious development
when you don't really need to set tasks anymore
like tasks where an effort of will is required , yes
or the decision requires an effort of will

The world is becoming very mobile
it becomes real in terms of precisely Eternal development
but since this is a control system
then when you log into this system
you manage very effectively
from the point of view of the harmony of the World

i.e. any creative solution
is realized because you see the connection
you just have to pay attention
maybe even Spiritually it is not necessary for you to see the connections
for example through the logical control structure

I was still mostly holding on now
on logic control

and when will you cross over there? let's say so even more so
to the Spiritual level
to the level of the Soul
it will become even easier and easier for you to manage this system

and when you see for example unifying actions
level coming from you
and externally, but in essence it turns out to be God, yes
acting in general in a compartment in all manifestations

then you will see that this harmony is understanding
Divine level of Infinite development

i.e. this harmony is that
what do you know well for example one of the states yes

future Eternal development
you can already answer the question

what to do next
and you don't need to think about this question
you don't waste time
you are engaged in specific practical management
this is another property of, say, this control
what do you answer to the questions of Infinite Development
and calmly, you are always developing

as a practice you would like to have this technology
make management
there for example, first of all, strategic, i.e. remote level
then at an approximate level yes
some tactical control systems are closer

and compare that control mechanism
practically the same
here on Perception

and this comparison will give us the opportunity to understand that
what are you doing right
well, or it's a cure for diseases
or these are some events, etc.

this is very handy
a very clear criterion level is still here
today's lecture it can be understood
that you are going right
just by comparing actions yes
you often don't need any other tool

but this is often the main task
we need to make sure there is no tornado or disaster there
but we can't allow checks

that's why today's lecture allows us to find
this is another diagnostic path to the correctness of actions

This concludes today's seminar.

Thank you very much for your attention
