

GRIGORY GRABOVOY
The Teaching about God
Warning control system
08.10.2004

Hello again
the topic of my seminar today
this is my Teaching about God
Warning control system

In this topic I am considering the process
when any event
it is necessary to warn in a timely manner
i.e. not to allow, for example Yes
negative development of some situation
including health situation, etc.

and in this context I am considering management
to a greater extent the Soul of man
when the Soul's warning action
and generally speaking it is concentrated primarily in that
that the human Soul usually has all the mechanisms
in order to normalize the situation

i.e. we are considering here such a control system
when the Soul of man acts
by task and by means of control from God
has all the time
mechanism of, as it were, one's own knowledge, including

i.e. in fact, any situation is essentially like this
what do you do when you do management
then you already have it in your Soul
and the nature of the action
and at the same time a solution

and in this case
to prevent some situation
this means there is a word "preempt" yes, i.e. some kind of preemption
but if we are talking about warning
then it's like an earlier action

i.e. in this case it is meant
as an action of the Soul
and the action, for example, of an earlier level

those. The action of God, for example

but here there is also the action of the Spirit of man

because the Spirit has an Infinite status of development
he is present
as in the time interval as if before the action yes
and for example in the after-action

that's why when we talk about it
what action is considered in general in life
as something that has necessarily happened
then the action that has the status
still D3hovnogo action

because in this case the Spirit
as a kind of external shell of action
this is a structure where the Soul always realizes
your own system of events

i.e. to say for sure that, for example, an event took place
in the case when it is necessary to take action
urgent for example yes quick action
or simultaneous actions
you need to clearly outline your own Spirit
arrange it like this
that the body perceives the Spirit
as the next action of the whole space
i.e. the whole world in fact

i.e. Spirit in this case
this is the action of the whole world as well
This is a very accurate diagnostic, generally speaking.

then it turns out that when you diagnose the system like this
you get a very clear level
Well as if external coming from the external World yes
and internal parameters
where can you see
what's inside is some kind of well let's assume a glow point
which denotes a distant action
or approximate
yet visualized in general
in the form of some specific technologies
or in the form of specific tasks
but you know that this is an action, that this is a goal

i.e. in this technology it is possible
as a warning of the negative status of events
to highlight , as it were, the universal goal of events

i.e. you know that the goal is designated like this
it seems to be happening somewhere here and in the management
glow

but for the management to be carried out
you need to bring this system back to normal
i.e. you don't designate it at first
like for example a fixed system of some problem yes
although it may be that there is a problem
there is, well there for example, a set of problems
and you need to be able to highlight the system so as not to make a mistake
i.e. you need to be able to select the control configuration
absolutely sure to avoid mistakes

then it turns out that the management
that's exactly the warning control
preventive management
i.e. profiling management, among other things
where you definitely achieve results
it must be a clearly accurate system

and in connection with this your Soul
should actually be reflected
as if at a point in the external world
i.e. you should practically recognize yourself yes
but from the side of the Soul, i.e.
own, so to speak, Soul in action in Macro-action
find out based on impulse
and management
d actions

i.e. in fact, you are striving for that
that point where the Soul is connected with God with the Will of God
this point
it is like your action from you yes
from here from the physical body
and at the same time you see
and myself
and the accomplished action
and then you are not mistaken

i.e. the more here it can be considered so
you load or increase
external control system in manifestations
and in the exact manifestations of your Soul
away from you
the more accurately you get your own coordinates
where you can finally clearly define
scheme of action

i.e. in this case you have to decompose
sequence of actions
firstly, it's better to do it the first time
and this sequence of actions must be precise

i.e. you should see it absolutely clearly
what is the decomposed system
it leads you straight to effective action
because otherwise
if you somehow didn't pull it out at once ^{yes}
this information
then it turns out that you may have some difficulties

i.e., to put it simply, this is what happens in this life
that the information recorded once
then it is such that it is with her that you will have to work

and depending on that
what did you define as the goal ^{yes}
how did you even formulate the goal?
this is how your management will develop

i.e. therefore here is the definition of the goal
i.e. what kind of information reaches you
and why does this reach you
this is basically often the main task

and to profile some problem
i.e. to prevent, ^{for example}, a negative development of events
well, in case of treatment of the disease
it's like getting it ^{Well}, a normal level of information
^{yes}, health conditions, etc.

it turns out this way
multiparameter multivariate problem
obtaining accuracy in incoming information ^{as if yes}
this is, first of all, the action of your Soul
i.e. it is precisely in the Soul that the answer to the precision of control exists

i.e. the Soul is essentially a very precise system of action
that's from the point of view of a generalized analysis
if it is possible to consider the Soul
precisely as a system, including actions
not only as a single action, an impulse of the Soul, yes
namely, as a system in action
Well, the Soul also has the property
systematicity and impulsiveness of the unity of actions

i.e. when a set of elements can be said so
are the actions of the Soul
but one element too

then it turns out
that when you start to analyze like that
then here is the selection of the exact parameters
i.e. when you see for example
what are you finally well as if you were getting closer yes
to the management goal
then this is where the increased concentration begins

event with exact solution
as a rule it is denser
i.e. more energy-intensive
more so to say, glowing with inner light

i.e. here to determine
what kind of light should we move towards in this system?
to identify the right target yes
or to get
even the primary information as I said
about the scheme of events

i.e. it means precisely to minimize
as if the negative status of events
you need to move on that
what is in the internal status of events
there is a more intense glow
then you are moving correctly

i.e., in principle, learn to differentiate
just on the whole concentrated actually light optics
i.e. such concentrated light optics
which is contained inside well like a hollow sphere

or even more closely it resembles a cylinder

It is important to note here
what if for example we take the structure of DNA
and we'll leave very quickly yes
in the structure of your Consciousness
from the material level of DNA
then we will get a more cylindrical system than a spherical one

here is a cylinder, this is a sharp removal
as if at the same time both for you and against you
i.e. you are looking at the system
practically well how would it work from the other side then

i.e. you give your gaze
multiparametric character
abrupt removal
it is the simultaneity of many points of view

because if we think
in one place
well in the second, in the third, yes geometrically and gradually
then this is a linear development

and if almost instantly
then it turns out that we kind of think
simultaneously from different points
i.e. the optics come from different points
and you kind of start looking at the event from a different point of view, as it were
either from the outside or from the inside
i.e. you start to have a different structure of events

so in logic this is the answer to the question
because as soon as you find it in logic
some kind of extraordinary solution
then often this solution is very effective yes
well, as some kind of creative solution
a thought comes
and you achieve control

i.e. it is obtained precisely through non-trivial, say, systems
i.e., in fact, by means of a seemingly linear simple
but often the system becomes more complex in terms of energy consumption

because the selection of the exact line
which in principle it looks like on the information

as one of the lines
and the weight characteristics of this system
optical
they are minimized, i.e. they are not very high

in your situation it turns out that you need to highlight
as if a stable platform very powerful
which is not the main signal, so to speak

but as the main signal
highlight the precise control
where did you profile you warned
even if you got into some one algorithm yes
actions
Time-Space-Action ratio

and you still got it
that you are moving correctly

because here in this case
it is in technologies first of all of Eternal development
this is ensuring correctness
any iteration of your action

and then when you for example there you go to the store
or do some shopping there
or do some things
you still know for sure, for example
that you go to the store or make a purchase
you act well there you can take money with your hand
pay or you can, for example, look at the item yes
you don't have to pay for it, you just looked at it
i.e. you decided that let it lie in this place
and you won't touch her

i.e. here is the system of transition of decisions

if there is no hard
i.e. you don't have to make a payment for something
this is another level
but nevertheless you perceived the same thing yes
which could possibly be acquired as property, for example Yes

then here there is a subtle level
what's the difference in management here?

well in the event system

i.e. you can know absolutely definitely
that you can buy that thing
which you, for example, absolutely need
it is not necessary to buy
maybe it's an apple on the street
you can pick it ^{yes} or pear
or it's just some forest and there are raspberries, blackberries, etc. growing
there.

i.e. you look for a system and get it
there is no need to have a question, ^{well} as if some external status
there pick a berry in the forest and eat it often only
You
berry
and here's the action ^{yeah}
For example, you search, find, etc.

i.e. it turns out
that there is an internal status of any thing

as if of any level of events
and at the same time it's ^{like the same} level
or buy or just acquire
or even find it in the forest
the level of action is what you see
already clearly as its own structure

i.e. here is a fragment of your Consciousness
when you start to penetrate
into the essence of ^{similar} phenomena
a fragment of your Consciousness
your appearance takes on exactly your shape

i.e. the more you concentrate
the closer you come
to my own, ^{as it were}, energy form
i.e. you begin to see your own realization
often in the form of his own physical body, ^{as if} on information

and then to get control
you have to work around your body then
i.e. you first visualize ^{yes}
then you start working

why did i give such examples

such as there is an elementary action
because i mean internet action
in the form of there purchasing being on a physical level
because it is a common action for all people
and here in the collective phase of Consciousness
there is such a level
that the generalized action is for everyone yes
in the human consciousness
has the shape of the man himself
and first of all, himself

and that's when you start
see Norma
Switch to super-fast processes
then it turns out that Norma is now
should spread for example into Infinite time

i.e. how can a person be confident
that he is the Ever-Living
it must mean that the current action
extend to Infinity

i.e. to understand that now the action is yes
the state of a person's life of a normal happy life

and in Infinite time
this is some one value located for example
as inside a person
and in the outside world

Well, this is God's action.
this is the fulfillment of God's Task

when you start thinking about how to physiological
as if about the physical level of this process
then it turns out that there is
let's say some kind of external core environment
at the level of, as it were, the physics of Perception
what this environment has
some very specific character of development
and if this environment is called
as a system
well as a guarantee of provision and Eternal development
from the point of view of knowledge there
then it turns out that you see yourself
in the system of collective Consciousness
where you intensively transfer knowledge

i.e. it's not just you
and you pass on knowledge, for example, Macrosalvation
knowledge of my Teaching
where can you transfer
and to everyone
and at the same time to everyone
Well like such different combinations
different systems of knowledge transfer
but it is the transfer of knowledge

then it turns out
here is the first angle
first wave of information
begins to visualize
exactly like that well how to decipher yes

i.e. you live forever
when you convey knowledge correctly
and what's more, you yourself are of course healthy too
i.e. external control is carried out by
what are you watching
along the main streams of knowledge transfer to others
it is primarily about Macrosalvation

then it turns out
that any level is any substructure of this action
this is actually the Action of God
Well as if showing a person absolutely precisely
where exactly is God's Action Divine Action
often inseparably local
it's from human actions

i.e. what exactly is local
i.e. the person is completely independent
he is on his own at the same time
Well as if he himself was originally created by God
still naturally has lines of direct connections
but here he is free
but some details allow us to understand
that there is action here
and at the same time a person
there for example, hand movement
and it is clear that this is the Action of God

it's like these two levels merge, yes
in Perception

then it turns out that we begin to see
where for example yes the Physical Body of the One God
affects the system of the following events
here is at what point of Consciousness
at what point of the physical body
a specific person

and then it turns out
that this is exactly the angle or let's say a series of events
which must be positive good yes
it means it is revealed
as a structure let's say Well, that's how a person looks on the outside
where there is action Perception of the person himself
and there is actually management
as if already coming from that
what a person perceives
multi-level actually status its own

and then it starts to be absolutely clearly visible here
how is human perception generally constructed
affecting all of Reality

here is Perception and Reality
they become inseparable
at the point of action

i.e. when you start to get closer to yourself
you see that you create for yourself, in fact, Perception
mostly

i.e. your Perception is this in principle
your own intellectual work
and it turns out that when you start
as if in the system of Perception
build some events
then you can just project them
at any distance
and get the desired result

i.e. here we come
to the fundamental level of management
by means of precisely this kind of preventive management

that it is enough to fix
current normal own Perception
Well, perception is basically considered
always normally reagent
i.e. normally reacting

i.e. your personal Perception
Always Norma first and foremost for you

so that's when you start to see
here is the structure
where is such a concept even located
as "Perception of you personally" or "Perception of a person"

then you can see the walking ones
Well like these frontal systems
in the form of some light functions
to a certain segment of information
where it is clear that any bit of knowledge
related to healing there for example from stage four cancer
getting rid of some of these complex problems
or that a nuclear war is not allowed there, etc.

all these things are starting to come into focus
or float there
to the first structure of Perception
i.e. the primary status as Law
development of perception
creating a structure of one's own Perception
this is a positive good status of events

i.e. in fact Perception works
as a search engine

who is constantly looking for the best
in the information system

if you treat your own Perception
as a system, well, actually speaking
as if somewhat external yes
autonomous even to some extent
towards you
and study the mechanisms of interaction
Perceptions and Realities
then it turns out that again it is the physical body of a person
is located in the center
and where the Soul of a person is located

in the same place completely

i.e. the Soul of man
of course it is in the physical body, that's clear
but here there is still such a status
that the Soul has freedom, well, as if in action

For example there in some mental action
It may well be that the Soul of a person
works
at a seemingly great distance
in some other place from the physical body
while remaining in the physical body, it is necessary

and this status of connections, so to speak, consists of the following
that saving is like
or the life of the Soul in the physical body
her position
inseparable connection with the physical body
here we see
that here is the main status of preventing some negativity
this is the Norm of the physical body

i.e. that's where the Soul kind of gently leads out
physical body
to the level of universal Reality

i.e. it turns out that every time
when a person comes out
to the level of precisely universal Reality
even if he lives somewhere at all
for example, away from people
nevertheless, it is precisely the structure that determines
and the event platform
and for example the next action of events
this structure is Soul

it turns out that human perception
in this case it is like this
that the formation of Perception for example by the Soul of a person
allows you to see
what's in the Perception segment
there is a status of Soul

i.e. it is as if completely visible at a small level
Well, actually, it's in optics, yes
i.e. you can see it as some kind of crystal

here it is, although small
but you can see it right away
to your whole Soul

i.e. see it right away
although you look at, well, part of it

and then here is the Perception
of your own Soul
where do you look locally?
and you want to determine it optically yes For example
Well for example in some place
it turns out that she is already near you
she works well as if as an external system
and it turns out, for example, your physical body
in Infinity

i.e. the work of the Soul
this is also one of the Laws of the Soul's action
precisely at the warning level of management
the action of the Soul is always at an ideal level
this is the physical body in Infinity

and it turns out that when we start to analyze
then it is clear that the Eternal Soul is in Infinity
in any case yes
comes to his own physical body

because the Soul
as a level of complete, including freedom of action
naturally after some time organizes the body

and that's when we talk about that
that suppose the process we are considering is resurrection
where for example Well, you need to understand
information transfer mechanism yes
here is the man who was resurrected
or he for example
to the level of its primary identification in information

because as a rule, detection
can very quickly lead to resurrection

that's exactly before the revelation
then it is necessary to determine the status of the next development
then it turns out that it is very easy to see here
it is the level of action of the Soul

because here it turns out that it is the Soul
creates that level of events
which prevents any situation
for the physical body
as if negative

here is the transition of the action of the Soul actually
to the level of action in the physical body
leads to the fact that the Soul exists
like inside the body yes
there is even a specific docking location, etc.
well which in principle is
often depending on the phase in the collective Consciousness
not always in well as if it were exactly in one place
this docking

but there is also an external aspect of the action of the Soul
where the Soul actually creates
this is the outer space
and so that this space is standardized
i.e. so that we get control that is, well , completely precise
and it needs to happen quickly, for example
there are such intervals
because in the system
precisely to prevent, let's say, a possible global catastrophe
Often such questions may arise
that it is necessary to act as if very quickly
or even not extreme
but you just have to make sure you make it in time
perform a series of actions

so here when
it turns out that your actions come from the Soul
work in the space of the Soul itself
i.e. I actually gave
here by means of certain logical connections, including
what we should have here in fact
Well as if it were an autonomous system

as I said, the autonomous system of human Consciousness
in the element of Perception
gives guarantees that humanity will not be destroyed

because as soon as there is such a system as autonomous
and if now a person perceives
then he perceives and there in the Infinite distance yes
in space time

i.e. this line is logically understandable
because what's the difference
if a person perceives now
and he has it so to speak yes everything is fine
Well as if suddenly it should be not normal
i.e. that's exactly the logic in it
which should be just fine

and here you can clearly see
does well come from there is the concept of "youth", "old age", etc.
in well as if at the level of the physiological state of a person
in his health level
in general in real age level

this is exactly the transition
from the level of action of the Soul
to Action for example by Spirit
where God acts towards you
but here too it is clear that it is possible
some kind of external influence, let's say so
or some existence of some external situation

Here's how this situation can affect
i.e. how could she actually
well, or to delay the solution of some issue
or, on the contrary, it needs to be taken into account for some reason

so this is the external action
I'm making things a little more complicated here on purpose
control design
because in terms of the defined
Well as if such levels where there is action of the Soul
and precisely in terms of preventing events

so here we need to introduce some kind of simplification , yes
in terms of
but at the same time it is necessary to identify the environment
this is where it should be
and the action of the Soul and the action of logic

sometimes I take several levels of management

I'm just putting it out there so it's clear
what is the essence of this situation
we can do
precisely for mandatory optimal control

i.e. the management should be like this
that there is a threshold level, so to speak, and where there are some big problems
so that it would not be overcome after all

and here it turns out that they work just the same
purely such weight functions
again the actions of the Spirit

i.e. when you see that the Soul is working
in space as if Well, of my own spiritual action
then it is clear that the physical body is being organized
completely healthy happy
and now the person is in Norma
then naturally he can always be in the norm

this is still a fine line
that there should be no differences
and once you start analyzing it
then you gain confidence in action yes
and you get precise control
i.e. you have it implemented as a specific event
which you need
because you have gained confidence
through their own levels of development
i.e. well, through analysis
by comparing some data

so it turns out that means as soon as you
Well, are you doing more there or are you starting?
Well so let's say the phase of confidence in action
put it as a system well in general as if planned
time-dependent on the amount of work

then it's clear that you will definitely come
to the system level for example there is Macrosalvation first of all
i.e. it becomes clear
what if you can do some action
even well there in the background
then naturally you can do Macrosaving

i.e. it turns out that the logic here is as follows
that she comes to you as if the other way around

i.e. from another place yes
logic of actions but you see it in another place
for example, you pass by and there is a bench on the street
you understand that this is logical
but the information came as if from the bench
i.e. it wasn't you who generated it, but as if it already exists, yes

it is logically clear that such a thing exists
so here is the information that it seems like there is such a thing
must be firmly fixed in that particular plan
that you are always healthy you live forever

i.e. this is precisely fixed information
which is perceived by the Soul of a person , let's say, yes
as an objective Reality
it should be under your control
is definitely already focused in that regard
that you get stable security after all
their events

and this is where you start to see
that it depends on you
that you, for example, can generate a thought quickly or slowly
or not generate any thoughts at all
not in the form of thought forms but just to do everything yes
and perceive something distant as your Thinking

so it turns out that here is the transition
precisely on some automated form of control
in some cases it allows you to receive very clearly
already further positive information
and well, a good one for you

and why is this understandable
It's one thing to record something, for example there is a status
unnecessary to you in Consciousness
then we'll have to sort of clean up the mess yes, the information is complete , yes, analyze
it

or other status when you see
well let's say some situation
and at the same time you do it almost all the time
profile from time to time
and each detailing leads
to hell in general, to a more precise Norm yes

it turns out that this is precisely a warning

some negative status of events
is that you practically
can you make the controls like this
that the selected fraction of events

Well like some kind of plan that you laid down
it will definitely be implemented
if you this plan as if events or area of events
you will be able to pull as close to you as possible
Now

and when you start doing this
it turns out that even if there are some complex systems there
some things are happening

Well there are often even complex macro processes
then you can even intervene here
to the minimum process level
and try to get

and as a rule it works out
if you make this type of control quickly
that you, for example, are in real time here yes

Well there listening to a lecture in the future this
can you make the control
see where exactly you saved people
here there should be specifics

and once you are in the new parameter
I have already shown the next parameter
you show that you saved some person
let there be at least one there

Well, you can just say they cured, they saved, yes
it is not necessarily any other action other than treatment

you understand that this is it
next status of sustainability in management
i.e. the algorithm of the received information will then be normal

and it turns out that there is here
Well as if several successive systems
this is an action in any case
when whatever you do is good for you
following
this is an action at the level of physical quantities
in space
the action can be done in time, etc.

and they give all these systems in projection

the same positive structure
i.e. it looks like this
what do you take and start to consider
what systems exist
and project everything useful onto you
as if you attract light to yourself, well as if artificially
this is creative light

you take it and just pull it out like an elastic band , for example, yes
instead of focusing
i.e. to that place
where there should be an event favorable to you

so here it is
this external system of actions, as it were Yes
it's not specifically you who take and decipher the event itself
and here is the training system
means people around you
to the fact that the event is favorable

i.e. you basically don't know the answer
while we're talking about that
that you didn't record the answer anywhere
but you just need to have good normal events

then it turns out that you should get a lot
Well as if weight systems from the outside world, so to speak

and then the Soul must clearly differentiate
where is your action where are you personally
and where is the outside world
Well , it's clear that this can be related logically here
that the person who looked at Reality
Well there through physical sight
he immediately understands where the boundary of his trajectory is
if he goes there by some kind of transport, etc.

it turns out that here, in this very system
it is necessary to be able to highlight such status
that is external control yes
it is also the internal status of a person

i.e. you kind of move yourself
control system in this way
that what you create is that
that, well, first of all, exists in the Soul
it is like a projection onto the Spiritual system

i.e. even in the Spiritual faction it exists

i.e. it turns out that you come to the conclusion that
that almost all the phenomena that are described for management
they exist somewhere

and that's when you start to clearly understand
what is integrity in this existence ^{yes}
all phenomena at the same time
then it definitely means that your dream has come true

it turns out that position was realized
that you have precise control over a combination of reasons, ^{yes}
external and internal actions

This is the most stable form of governance
which allows you to finally get there
before the task
i.e. to highlight the characteristics specifically now
and you start these characteristics
Well, now ^{it's time} to start working on it
in different social environments
and you get control already in the social environment

i.e. in fact
the level of warning of some negative event
is what you bring into the social system
in general, into any information system
^{precisely} a stable status that does not depend on
from some accidents

i.e. you
Well, often it really doesn't depend at all
and that's why it turns out here
that as soon as you get ^{say Yes}
such is the management status
then you can control it very clearly
^{as if} the next thought already
i.e. the next development
and of such quality
that the thought does not lead to that
that some negative status will arise in the future
i.e. such ^{a thing} Shouldn't a person have feelings ?
that the more he does something
the more possible problems there are

not really

the number of actions from God is determined in this way
that every action is practically equivalent
in the system of, as it were, external and internal Reality of man
Well, it happens that there is more on the outside and less on the inside
or vice versa

and it turns out that here we have
fairly simple system in general
what autonomous systems that contain
precise and correct decisions
they are located
as in Infinite distance
towards God from man

and they are as close to humans as possible

i.e. it turns out that we can cover
this is a unique beam, yes, in this way
that we record the current, for example, control
and at the same time, this is exactly what goes into the Infinite level
this is what builds well as if building
at the level of information of your Consciousness
builds the whole outer world for you

then it turns out that it is a stable system
it's just a matter of control
exactly for your level of the World
this is how you perceive it
those. you don't necessarily have to know clearly
where in which country which cities and in detail
but still you can do the management
to protect all these cities

then it turns out that Macrosystems exist
which allow
get practically comparable management
i.e. fast effective in this way
that you only need everything
how to get to external information Norms

i.e. there is also the following method in this system
it is enough to normalize external information
and how to fix it somewhere yes
and this Norm is constantly in effect
like some well as a standard or in a sound version
like a tuning fork
which constantly sends any events

first to the signal that normalizes as if it were a gateway
and then they are reflected and reach you already
in an improved form

so that the events are somewhere
negative status was not recorded
there is another principle
as if the next level of management

on the contrary, on the other hand, everything is possible
you perceive
in negative status
and you start to decide
from the fact that there is a good status
there is for example one that exists
Well for example, as requiring a solution

kind of a negative status

then it turns out that by combining these positions
at the level of one's own personality
you get the following picture
that methodologically it will be expressed as follows
what can you get
further action your own yes
as completely clear as I said transparent for you

and when you see what's next
i.e. well as if the action is transparent to you
this is a level, well, after all, it is Infinite
then it turns out that you
when do you start well as if to move from Infinity
to yourself
then every thing you do becomes famous

i.e. another control parameter as if in the future yes
consists in the fact that
what you practically have to know clearly
as if a complete signal in the development of future events

and it turns out that when you, for example, have this signal, yes
in the development of future events
see how completely well as if unambiguous
i.e. even your future event is completely clearly defined
then it is clear that this is precisely a warning action
is just well actually right to go yes
God gave to everyone

absolutely the right way from the start

and then it turns out
that since He gave the right path from the beginning
then if you don't deviate from it
then this is a warning
some negative situations too

so here is one of the components of preventive management
at the system level ^{yes}
system warning management
precisely a warning
some negative events
that's what I mean in this case
prevention of some problem level

then it is absolutely clear to see almost ^{as if yourself} ^{yes}
the ability to see ^{is} a simple technological device
If a plane takes off, you need to see it before it lands.

how do you go out ^{for example} and everything is fine

i.e. the ability to see the future situation
but here's how to see it
for the plane
you can just walk along the glider ^{for example} Well
at a certain speed of Thinking
and you will immediately see the result in the future

if somewhere ^{there} is some kind of disposition
something needs to be improved ^{there}
so that there is no strong vibration
so that the engine works better, etc.
you just need to highlight it on the planner
or maybe even on the most frequent engine
levels
and make them more active

This applies to all types of transport
i.e. to highlight levels of positive action
and just activate

then it will work out
that possible future events of a negative nature
they start ^{well} ^{how to} restructure
here the main thing in practice is to be able to understand
where the impulse is transformed

here is an event for example yes it was restructured
then you get this pressure structure
or some negative status
how is she and at what point well as if it had opened up yes
with your line of events

so this is the most intellectual
Well, the level of control must be precise
that external action is yes
well, that is, it is precisely some kind of even peripheral action , yes
it must be absolutely clear and unambiguous
and how well completely controlled

there is a nuance here
that you must gain control
even behind the system of random events it would seem

and then it turns out that this level consists of that
that in Macroaction you are constantly concentrating your attention
on seemingly unimportant systems

i.e. there is a position of the Soul
when the Soul is like very much in such a linear version yes

looks at some not so negative events
and they are sort of fixed around the event
which has been changed for the better

here is the transition and how this division happened
this is a transition of a kind of fixing level of the Soul
the Soul previously worked simply as an autonomous system
like some kind of control system
then in this case there is also the light of the Soul
coming from a clearly focused level
where the Soul is in the physical body

then it turns out that when you switch
for example, the action of the Soul from the physical body yes
into Infinity

then here you see that here is the construction of Infinity
this is the work of the Soul

i.e. the construction of Infinite development
this is the work of your Soul

and here you can see what can be built
Well as quickly as possible through Macrosalvation
you can also build through Macrosalvation
because you want more fundamentally

but here you can see that you will definitely build
this is the level of Eternal development
it always exists in human perception

and then it turns out that this is precise control
this is the management related to that
what if you for example you enter digital series
or do color management there
some other technologies due to knowledge, etc.

you can get such a status that the whole future
it is already known because it is enough to know
precision in at least one element of the action

well, i.e. if there is a flood , then the flood concerns
all elements of this region

and that's why it turns out
what if you are fine in one place

so apparently in other places too
at least at the level of your gaze there
there on the physical level
or there logical

we can say that if the house in the region is normal
then there is no flood yes as if it could be somewhere far away

and it turns out that it's enough
often ration only yourself
i.e. to normalize only the structure of one's own Soul

then it turns out that I am saying this on purpose now
moving as if from level to level to see
that the Soul is the system that works
first of all, in itself, yes
and secondly there is direct contact with God

in case for example especially well if some
Well there might be some extreme things there, yes
in development
and that this is precisely the action of the Soul and body

in relation to the event
in this case, almost as if by energy impulse
on exactly the opposite wave
it is often perceived the same way

i.e. The norm of events is the correct solution there
when the optical parameter
which goes towards you
from an external event
perceived
and in soul and body alike
this is actually a very important element in management
because when you perceive the signal in the same way
and Soul and body
and often it is both Spirit and Consciousness
this is already definitely a strategic decision
your questions ^{yes}
try to remember these points

and often here is memorization
and generally speaking the desire for this point ^{yes}
already gives results
because that's where it's actually located
Well as if the key form of management

and you as soon as you are
in totality, or something, in order to warn
negative event

Well, first of all, as I said, we need to
try to define the goal
create all conditions
so that the identified event is no longer problematic
if possible
then a system of all external analysis is built
well, like in a normal optimization system

and this system it starts ^{for example}
Well there to show oneself in such an autonomous way even
what is most evident there Well, that's a clear version of events.
which lead to the desired result, etc., etc.

it turns out that in the end
you must go
to a generally quite calm inner level of the Soul
where the Soul is not separated from the body
and you start to feel it

and that's when you come to that feeling
that the Soul is not separated from the body
this is the next sign of management
then you already clearly and already receive
as if a completely stable status of personal control
where exactly do you deal with the event

i.e. enter into the Norm

and that's when you moved into this
Well as if a normalized level of one's own Perception
consider that you have finally achieved control
essentially accurate
so to speak, by the result
not only as such there linear yes
and in general, in terms of overall performance
that's how it is for everyone
even more like a general status look
not only there for yourself you achieved
and in terms of effectiveness for everyone and for yourself
like, well, so as not to connect these concepts
Well as if so let's say tightly or there quite tightly

it turns out that for everyone and for myself
this is also a manifestation of God
God gives knowledge through everyone

and that's when you start to see
this very control system
that God gives knowledge to everyone

you see that the warning control
this is often the situation
that you just need to be at the level
Well as if some kind of average Norm
now it's fine
or give the structure of the Norm
and try this structure
as if to hold as a control position

that's why i gave a lecture today
often without bringing
for example to visualize endpoint management
but practically just a person is walking
remember or speak there all the time
now he will come to such and such a place

it's not necessary yes

i.e. it is enough to simply go correctly knowing
that there is such a way
that's why today's lecture today's seminar
that's exactly what you get
the technology of action is still the Soul that knows
that such a path exists
and it is not necessary to go into detail

it is not necessary to provide a control system
and it is enough just to show
Well as if a legislative system
understand that it even exists
and you are already in control, yes, you are definitely coming
this is precision

precision is precisely as if in the obligatory precision of the accomplishment
in mandatory precision control
and it doesn't matter what's around

i.e. here is the selection of the position of precision
this is the precise control in this design
it is the management of the Soul first and foremost
Well, as I said, there is a sign of Soul and Body
this is also precise control, etc.

This is where I end today's seminar.

as a seminar level
try to work very intensively with this lecture
here after listening
immediately at least there for twenty to twenty-five minutes yes
continuously

i.e., in order to focus the target functions
and through them obtain specific control

i.e. simply due to one's own position
only due to the direction of action
then you will cover all the phenomena of the World
and it will work absolutely accurately

thank you for your attention
