

GRIGORY GRABOVOY
The Teaching about God
Realization of Eternal Life
14.06.2005

Hello again
The topic of today's seminar
this is my Teaching about God
Realization of Eternal Life

in this topic i show
how to do management like this
so that those events those phenomena
or let's even *say* that information
which meets you
in your everyday life
so that this information can be implemented
as information specifically about your Eternal life
and also the Eternal life of other people

in general, we are talking about
so that it is in the collective Consciousness
and in general in the Consciousness of any person
put the work put the management
so that the concept of "Eternal Life" can be realized
as a normal concept , *generally* standardized for everyone

and when at the middle level of management
This concept was introduced as a systemic concept
we are actually getting a stable level of management

that's exactly about a stable level of management
where Eternal life is realized
we're going to talk now *then*
do management at the same time

and in principle the conversation is like this
that when you do management *for example*
and mentally think through some categories of management
then this is also a certain personal conversation of yours
try to work with words now anyway

i.e. periodically output control like this
so that the words you pronounce
for example, mentally periodically

so that they act
from the point of view of the realization of the information of Eternity

because when you work through the word
then generally speaking the word is active
on physical Reality
this is also management

if you can
and you can do it, it's not difficult, generally speaking
make it so that the word is highlighted
and therefore consider
as in the spread of word
you are implementing the technology of Eternal Development

then in fact you are realizing Eternal life
as the information you bring in
generally speaking into informative Reality
and this means at any level of Reality
including in physical Reality

so it is very important to consider here
what when you work
for example with physical Reality
then there is no category of destruction here, generally speaking

because when working with the structure of this information
destruction category required
bring to level well as if remote control

i.e. at the first signs of some problematic situations
or there are destructive elements of information manifestation
you have to be able to do it like that
so that you can have this information
to the level of its manifestation
bring into the structure not implementation yes

i.e. negative information negative information
should not be implemented

therefore there is the first axiom
in this control system
that you should be able to recognize information
before its completion
and translate this information all the time
to the level of precisely Eternal development

in principle, in fact, this is management
quite narrowly specialized
although the concept there is supposed to be "Eternal Life"
it's still a broad concept
and applies to all areas of life

and human development

however, the technology itself
it is quite narrowly specialized
and applied enough

so here we can consider
in general, management
as a technological type of control

and therefore try to simply apply
management technology
because in every person's life
there are quite a lot of management tasks
governing, as it were, contexts of action

and in connection with this there is
Well as if some external situation yes
internal in humans
we must try in all phenomena, no matter what they are
introduce exactly this level of management
where Eternal life is realized

and in this regard it is necessary to consider
generally speaking, the usual positions
which exist in information

i.e. there is some external information there
inside information
there is simply the concept of "information"
there are some elements of physical Reality
and you need to be able to do all these elements
introduce the system of Eternal Development

i.e. in fact it looks like this
that the person who is engaged in this technology
he is capable of any development system
in fact, in any physical thing for example Yes
enter
namely the structure of Eternal development

and for this you need to work
as if a unified level of interaction
with surrounding information
and be able to bring in the Eternal, so to speak
into the management structure

and therefore from here it follows
it is precisely the realization in my Teaching about God

because it is important to deduce here
that the realization of Eternal life is at that level
in which it is realized from a person
leads precisely to the structure of the Teaching about God

because God has already realized it
the structure of Eternal development in the Infinite future
that's why it turns out
that from the structure of the realization of Eternal life
we see the structure of God's Action

i.e. the development of this structure of the Teaching
namely my Teachings about God
this is the level that comes from human action

i.e. here it turns out that we get
the structure of development, generally speaking, the structure of the
Teaching
as an element of human action

and absolutely well so let's say direct level of control
is to be considered
as God does
i.e. how does He realize Eternal development at all?
from the point of view of His Essence and His Worldview

and when you start to see
how the World is perceived
By God
then here it becomes much easier
technological level of implementation
that's exactly the realization of Eternal life

maybe here if you look at it
from the point of view of what a person should do
It would be easier to consider, for example,
there are some more general systems there
but in this case we need

to see the very essence of the action

so you definitely need to watch it

what is the concept of "Eternal Life" for God in general?

in the transfer of information, for example, in the transfer of knowledge

and it turns out that the simplest element of the action

this is basically Eternal matter, yes

i.e. an eternally living person

The Eternal Structure of Creative Development

absence of destruction, destruction, etc.

it turns out to be the implementation criterion itself

Firstly, this is a normal development system

normal creative development system

except that there is no destruction here

i.e. it turns out that the information contains

like some kind of internal capsule for control

i.e. it looks like encapsulated information

in the form of a certain drain

it even physically looks like some kind of bag

which exists

in any control system in any information

and this level well there is possible destruction there

in the development of the system

you can just do it mechanically

how to get him out of here with information

and as if put aside

and from this area

obtain a creative level of management

i.e. in fact the first level of control is quite simple

although in general the difficulty lies in the fact that

to highlight the level that does not match, for example Yes

the concept of precisely "Eternal life" "Eternal development"

but nevertheless, when allocated

i.e. at the first attention

on the structure that needs to be modified

we have a level of further action

here is quite a peculiar one

and by the way, a very simple technology emerges

after all, when God created Reality
and makes Reality
He doesn't control all the elements.
as if initially logically natural

for example, what is self-development of a situation for God

from this point of view His Spiritual development
i.e. some kind of management has begun
the implementation is underway, you can even look at it on optics
how god does

and then the situation develops rapidly
as if by itself yes
what does development in itself mean to God

situations

for this He needs to consider
the structure of the development of your Soul
and then, for example, the Spiritual aspect of development
it's like different optics, different perception
this is development

i.e. to create control
God created for Himself
Soul Management
Spiritual Management
i.e. It acts similarly to how a person does

and therefore, first of all, in the development of Eternity
we must therefore not just consider
a level of saturation with Eternity
any element of information
how much to act similarly

i.e. act as God does
from the point of view of His positions

then we get the whole Reality
i.e. the whole system of actions will be the same
i.e. Eternal
we just do the same thing

if one carpenter
somehow makes a thing
It's enough to watch and do the same

and the same thing will happen

and no need for the structure of the thing
introduce additional wood rigidity yes

i.e. it turns out that this is the second level of management
which is worth it in principle
as if to the level of information even
by Spiritual status
so this is an analogy with action
as God does

and to act similarly
we must know the whole Reality ahead
and should know how to show up yes

God is manifesting himself
He watches His own manifestation

This is what Reality is for God

this is His own manifestation

how a person sees his own manifestation
he does something, he has some creative successes, etc.
he manifests himself for himself

and here is the manifestation of God
this is visualization and information
i.e. God sees His future there, for example , absolutely
and at the same time He sees
the future of all people

for example, at this level of tasks
it turns out that immutability arises
in the Action of God

God can always change everything yes
that's why there is a past future there

because there is God's responsibility to people
if there is some management there are some tasks
which stand in front of at least one person
Reality is no longer changing
from the point of view of Infinite development

i.e. it is a fixed status of Reality

which arose on the program
for example the words yes
in Infinite Future in Eternal Development

or simply Eternity the word "Eternity"

then it turns out that from here we have
status of the organization of society organization of Reality
by the level that the information is designated
and it is passed on

if the information is indicated
then it is passed on to someone
it just can't be formed like that

and here we come to quite again
special narrow area of management
information is almost starting to organize itself
when there is someone to pass it on to

example , if there is no one to pass it on to

information is not organized

here, pay attention to the information
is formed in the information space
only if there is well as if a consumer of information

so if we want to understand
well, just a random example
for example, that it is possible to have different Thinking
various systems to build management
but if there is at least one person
which can perceive
or generally speaking the first person born

then it turns out that there is already a consumer of information

and here a certain property arises
information of Eternal development
which then is as if absolutely unchangeable
because you just have to find it in this system
as if an unchangeable segment of information
which is precisely Eternal
then it turns out that these properties are possible
transfer to the system we want

of course it should be
Firstly, Macro-creative
simply creative, etc.

and here, in order not to complicate this management
in terms of detailing, for example
in terms of that
so that it is not only a creative management option
but in general the systemic control option in any case

here you can see
your own concept of action

so to get Eternal development
Eternity is actually in information
namely to realize Eternal life
First of all, it is necessary to be in action already

because I was talking about control statics
act as God does

it's still a certain level
as if a static control plan
i.e. some kind of agreement yes

in action a person must see
your own action

there is a fine line here
for God also sees His own Action
but He is the One God

i.e. It does not work in the form of increasing the number of actions there, yes
He sees in one action
and Its Action
and the beginning of His Action
this is His next action, so to speak

i.e. it turns out that we should see
actually at the management level
we must see in the Infinite Distance
its primary action

i.e. it's the same as getting to the level of self-organization
that's when man was created
and see your own Infinite development

by the way, this happens at the moment of a person's birth
well biological birth
as soon as the baby takes his first breath

so that's what happens when you look at it
the structure of Infinite Development
you can control all of Reality

i.e. the first breath and control
of all Reality before birth ^{yes}
before the conception of a person this is the level of the Soul's work
and the Soul is Infinite

it turns out that we come to the logic simply
we come to our Eternal Soul
which is located there in the Infinite level of removal
from , for ^{example}, the impulse of Consciousness
from any level of human reaction

and the task becomes simpler
i.e. it is a simple task as it turns out now

to have Eternal development
it's enough to see
your own Soul in Infinity
where it already is
from the point of view ^{of} the current time

then we need to consider
what is current time
i.e. where it is formed from
and why is it ^{supposedly} there
some complexity

any person who has Perception
and any person naturally has Perception
he can see

By the way, this is a fairly strong level of self-government

i.e. this says that
that any person can self-organize
it is enough to simply set him the task

if he doesn't do it himself, ^{for example}
then he needs to be given the task
well, in the form of a diagram of the action

in the form of its own action

after all, it's often management
for example, the structure of human health
i.e. health improvement for example
this is still a personal action

i.e. a person can do management
where is he actually, well, you could say so
simply shows the development trajectory of another person
at the level of for example well, like some kind of scheme, yes

it's just not that it even heals, let's say so
and shows how to do it
and the other simply adopts this knowledge
another person

i.e. well, a certain package of knowledge is transferred
and the person begins to use this knowledge

so it was exactly at the moment of transfer
i.e. when you consider knowledge transfer
i.e. between the initial impulse
transmissions
and between the final
where knowledge is not yet defined

that's exactly what they exist
very high speeds
when the context of knowledge doesn't seem to be clear

we can see the starting point of knowledge yes
that we betray some word
we can see how the word is perceived

but here's how it's transmitted
we don't have to perceive

and here is this element
this is the first element of the construction of that Reality
where Reality is precisely Eternal Reality

i.e. reflection of all systems of the World
into the structure of ultra-high speeds
in fact, well, a reflection on the Soul of God, so to speak Yes
where God already makes a decision

there we can have that element of Eternity
which is perceived

i.e. management in the structure of development of Eternity
this is a technology, this is a specific action

and by the way, if this value is transferred
for example in a nuclear reactor
it won't explode
i.e. you can take this substance at this level too
just saturate the reactor
or saturate a nuclear bomb like that
so that there is no explosion

if many people do it
then not only will it not explode
social processes will begin
who bring out this weapon

and by the way, that's why I have this, for example
for example, there in the program of the political party DRUGG
there is just a conclusion
nuclear, bacteriological and chemical weapons
and in general beyond the limits of even those orbits
from which it would be possible
level of use there in the direction of the Earth

bacteriological weapons
has well basically the same problem comparable yes

and here is one example , yes
political management
to bring out the system

into a more sustainable development structure

and work in the political system
or there in the social system
in any system at all
which would lead to implementation
namely the technologies of Eternal development
this is the level that allows
to see a person free from possible destruction

here is the principle of freedom in that
so that a person really understands
that something real is being done

so that, for example, there would be at least a Macrocatastrophe

but in general, generally speaking, he is interested of course
so that there is no local problem
with anything with health there and so on yes

it turns out for a person
to really introduce the structure of Eternal Development
into action
is necessary as if well, some similarity in Perception
that no negative situation reaches him at all
nothing negative will touch the person

and here it turns out that we find
well, the internal system, the internal position of a person
in that He feels the same way as God does
at a certain level of information management
i.e. It is not reachable for defeat yes

i.e. God has that information
that defeat is impossible there
and this is really happening

and it turns out that here we have
similar aspect of management
this is when a person is in a dynamic system
finds this status for himself
then it practically goes over
into the same control system

and by the way, you can do this now, for example
log out to the control system
where there is no access to damaging factors

and this system is quite specific
in general it works for a long time and

i.e. it is enough to reach this status in the future
to a person
in case there if even in the future he sees
difficult situations
by the way, not only at home
there are other people there
and this wave is spreading quite quickly objectively

i.e. the level of control in this case
is just a simple matter of finding

control points
where there are no damaging negative factors

i.e. it is a dynamic system ^{yes}
development system system of some search
which does not necessarily have to be done there all the time
You can look ahead a hundred years
there are some points to mark there
and work with them or for some time ahead

so in principle we need to consider here
control in this way
what we have a task to bring
Eternal Development Technologies
including the introduction of the fact that you act personally
i.e., passing on your personal experience

and experience for this must be objectified
i.e. you have to do it and be aware of it
what are you doing right
you must be the criterion of action

so naturally the criterion is
there is your personal fortune
i.e. solving some problems or tasks
i.e. some ordinary activity
^{well} maybe not quite there some ordinary
from a human point of view ^{there}

but it is precisely this activity that should be
which is what ^{almost all} people do, ^{yes}
i.e. any activity from God's point of view
she is the one
which of course he does himself
Human
but in principle God still gives

equal positions for all people

here on the principle of equality
you can see an even deeper basis
namely the Eternity of life

i.e. there is some kind of quiet haven
and this quiet harbor is like this
that there is information, a fairly large array of information

where is Eternal life

i.e. precisely the Eternal development of the technology of Eternal life
they just exist as technologies

i.e. it is possible to access this information

for example, there you can count this information
and get a hard forecast phase there
favorable Eternal development
and everything seemed to be okay
if this is how it works in the search option

but the individual always sets himself
some tasks

The world is changing, so we can only proceed from that
that at any moment we may be faced with
any task means getting up

and in accordance with this, simply if we had time
there we will assume to study and apply some information
where there are, well, some guarantees, so to speak Yes
what in the next second or in a million years
there will be no need to take
there are completely different solutions there
in terms of management it is meant
some other new technologies yes For example

i.e. it is important to work it out here
your personal management status
and not the status of a kind of information collection
or there is a volume of information

here it is necessary for a person
was personally present
in the realization of precisely Eternal life

Here's God, for example
He constantly implements the structure of Eternal Development

if we just observe
how does the control work, for example?
from the point of view of the development of the atom there are molecules
some substance

then it turns out that this is an action
you can kind of track it down, generally speaking
where, for example, during the movement of some microparticle
for example there is a proton

or is there an option, let's assume a neutrino or an electron
where does the connection between God take place
and with these particles

i.e. how is He like
at what point does god make a move ^{yes}
in conditions where a large number of processes are taking place
in general in the world

and from the point of view of the technologies of Eternal development
each particle is also given the right
Develop endlessly

so here is the answer to this question
is in what we have
a certain ^{projection} part
in the development of the situation

i.e. a certain platform that means Eternal development
contains precisely the movement of microparticles there
development of even social systems, etc.

and further this platform
is in a certain place
which is practically
from the point of view of human development dynamics
is related to the person himself

i.e. a person can learn
gain knowledge instantly
and distribute control to Infinity

this is where it comes in
somewhat complicated control plan
because it's one thing to say it in words
another thing is to take and distribute control to Infinity

i.e. it is a whole technology
bringing information to a sustainable plan ^{yes}
this is when a person often solves a specific problem
and this invests a certain resource

and in the conditions of the technology of Eternal development
he still has to provide
The eternal development of information is positive

i.e. he should be able to know the entire distant future

how to bring the future closer

Well, you can take it and zoom in to study it
some fragment of the future
but it will be only one fragment

but so that the whole future is studied
in your one-time action
you need to become self-aware of the physical body
by analogy with how God perceives Himself

how does God even realize His Physical Body

then [it turns out we] are already managing dynamically
coming from the body

and here is the concept of "self-awareness" of the physical body
similar to how God does it
in the realization of Eternal Life
this is how he perceives it generally speaking
development of life

He can also realize on the conditions of Perception, it turns out yes
God realizes on the terms of that
that the universe is evolving
some processes are developing
around His Physical Body

and considering that He Himself is the Creator of the body
then He can only, as it were, from the point of view of a person
analyze development

and man is exactly the same
if he can see it
in Infinite Development
movement
in relation to the physical body
in relation to him and to man in general
then in fact we can say that yes he is then
ensured the realization of Eternal Life
and for the whole Reality

but then he has to do it very technologically
he must understand that this concerns him personally
that there is some kind of movement or action going on there
and get actually stable
Well as if an uninformed system

this is the criterion that you have looked at Eternity ^{yes}
to Endless information

the fact that the reverse impulse is neutral
there is only a feeling of calmness
i.e. calm development

Well, if you think about it, ^{for example}
why did God set up the management this way ?
so that a person can perceive the Spiritual action

what is Spiritual action anyway
for a person
i.e. why did God need to do this
so that a person has Spiritual control
so that he ^{could} control the Spirit

because Infinite dynamic action
and back on a Spiritual basis
through very intense action
a person receives information about a calm future ^{yes}
about calm management
in some calm state of information

i.e. the first spectrum of Eternity
some light tones in management
where the realization of Eternity ^{as if} in everyday life
it is actually a kind of glow
quite a huge amount of information
some array of information

there can often be a private element
but he shows it so clearly
everything that has developed in this world
what we see is Eternity
not in global information
and in private action
in the word simply

Well, maybe a person will say something, one word
we see that he is a technologist of Eternal development
realizes Eternal Life
i.e. he creates it, among other things

therefore implementation

this is the creation of the structure of Eternal development
similar to how God does it

the only difference is that

that God himself also initially created the body
a person can by analogy with this
perceive the initial level of body creation
and for example the first person yes

i.e. in fact he can see that
as a person in general different
examines his body
and can see how God originally created His Body

this knowledge is open, there are no prohibitions
i.e. a person only needs to want it
and he can see
the structure of creation, for example, of the Physical Body of God
it is the same as the human body
there is no difference

then it turns out that based on that
what's the difference anyway? what's the difference then ?
why does God have Eternal Reality for example
It turns out to be creating He creates there
ever expanding Reality
or somewhere deepening it doesn't matter
the main thing is that the phenomena of Eternity are real
according to a person's faith are reflected

so here is the fundamental aspect of the action
is the presence of faith

for example, the question is this
God believes in Himself when He creates Eternal Reality yes

the answer is very simple
from a human point of view
he must see in a person
element of faith in Eternal development

because all phenomena are created
in relation to a person
from the point of view of both man and God

there are of course other elements of Reality there

but in this case we are talking
about human perception
what is the main
because man is created in the Image and Likeness of God

and not only there in the physical body, *yes*
but in the structure of the action in development

then it turns out that his action is his development
this is an action, *let 's say, of that rational context*
or something of a conscious action
because man, generally speaking, is reasonable everywhere
and here is exactly the structure of Consciousness where it is applied

where they should coincide in exactly the same way
and the Actions of God
and human actions

and that's when you start to see the absolute analogy
then it is clear that you have achieved
in general, the first level of management, yes
in this technology
you have reached the element of Eternity *then*
and such an objectified one
not because it exists simply as information
not because you can be there for a billion years
there to live in this structure of Eternity

and because you act in the same way
your actions
match
with the Actions of God

when you start analyzing
where is the difference
I just went further on purpose
there may be a logical question to the question
for example, here is God's Action
human action
if they match then what is the difference
is this even one action?

in fact, these are of course different actions
so the only coincidence is that
that man understands God

that's when he understands

he can act in the same way, not necessarily now, for example Yes
he can act in the future
just like God works
even in 100 years

and is obtained by the next element
in the realization of Eternal life
this is the preservation of the knowledge of those
which man received from God
i.e. when he considered the level of his action

and conservation in general
Well, it would seem like a simple mechanism
in fact, knowledge needs to be stored somewhere
they need to be implemented somewhere

so conservation is multiplication
in this context
there is a very strict axiom of action
this increase in knowledge is a must
for other people

i.e. in fact, well, a person can get
God has the greatest knowledge
and then he must multiply them
and then the knowledge remains unchanged

i.e. it's not that he should somehow modify it
just pass it on to more people often
this is already an increase

because in each case if one person understood the same thing
knowledge increases by an infinite amount
from the point of view of man himself as an Infinite quantity

and when you have this structure of Eternity
try to implement it into management now
look, take your personal tasks
so try not only personal
in general, the tasks of civilization are simply the tasks of Eternity

realization of Eternal life
by the way, this is quite a public level of action, so to speak
and in general, if we have such a somewhat more generalized and socialized level
of action
we are considering
then it turns out that you need to do some action

based on the objectives of general development

The context is very clearly revealed here
sufficiently voluminous action
those. Macro actions

and so when you start working on your tasks
you will definitely reach the ideological status of action

because here is the Soul of every person
acts as an ideologist of Eternal Development

and set your goals
based on the Macro-ideological action
and you will see
that the tasks will begin to be solved dynamically and quickly
you won't even have to go out to them often , yeah

so try to do this management
Now
through the very realization of Eternal development for all

this is the technology that it requires
there is always work for everyone
Well , in principle it's logically clear

Eternal is always for everyone

so work hard
I will work with you

by the way with the information of Eternity
it's quite interesting to work
pay attention here
that work with the implementation of Eternal development
it's quite an interesting job

i.e. it is quite exciting to work there
because the arrays are very large and there is work
and the work is real for everyone
i.e. the work is perceived
how is the structure well as if socialized management
where Reality is revealed first
more or less typical for that situation
when you help many people at once

although for example you can work
to realize Eternal life according to your tasks
make everything around, for example, Eternal

but at the same time you get
that in the integrated version, as if in the investigative
you still work for everyone

any level of your action
is a level
which practically has Eternal development
this is what is special about this situation

for God made one primary Action
realized the Eternal Development of the World

It turns out to be one of the technologies of this management
is that you should
in fact, as if specifically tracking
at the information level
that your every action
this is an action that develops then Eternally

i.e. every impulse of yours
which you optically perceived
it is necessary to accompany into the structure of Eternal development

by the way, this is basically how it looks
i.e. there is a primary impulse
well, expressing some action
Next you must accompany the optical level
to the level of the structure of Eternity

and it turns out that you can this structure of Eternity
can't even be perceived as information anymore
but it's enough to just start accompanying
with the aim of the Eternal development of this impulse

for example, how does God make certain phenomena happen?
they were unexpected, yes
from the point of view of human perception
so how could it be created
Linear World where everything is clear
and how to create an element of surprise
or some third non-systemic action

for this it is enough to lay
into the structure of the initial action
such a development
so that in the future it would be clear what we are talking about
and it is clear that it will come true
but it is not necessary to look at how it turns out in detail

i.e. for God, surprise is also work
i.e. how to create surprise in general
for this you need well for example, this approach is possible

then it turns out that if we
let's assume we consider management in the same way
i.e. we take the initial control impulse
as if sending to the level of Eternal development
we don't need to look any further

It is clear to us that the impulse has passed
into the structure of Eternal development
and that's all
but that's basically how people live
i.e. I just showed it
the structure most natural for humans
it means the person is constantly taking control
into the structure of Eternal development
it's just that he doesn't differentiate further development
because

Well, there is the aspect of knowledge transfer
how to transfer knowledge at all yes

there must be systemic knowledge
but they must be based on something
and in relation to something be transmitted

how to convey some complete information
can you pass it on
based on some other knowledge base there

but usually finished
can be passed on based on matching
with Infinite information, i.e. as if with unfinished yes

and it turns out if we want to understand
how does God sew the ends of some events
this is where the concept of "completeness" comes from
in His Action

it turns out that here we can do it
By the way, this is a powerful mechanism for human healing

all the time in space where they seem to exist
event design systems event organization
all the time from this space to go into control
i.e. do not give a branch of the event
enter the structure
well, some kind of unfavorable situation

by the way, this is even an element of just treatment
can be considered
i.e. to enter this level of management
and all the time bypass the structure of the disease there

hold control often enough
literally there a millisecond
the disease disappears

and here it turns out
what if we do the management like this for example

so that it would be clear to others
and this needs to be done generally speaking
so that it is always clear to everyone else
there even through Infinite time

i.e. it is not necessary
there specifically in the form of some managers
Well for example, it's not just lectures
not only some systemic levels that control
often it is simply a transfer of knowledge
to the level where knowledge is still being transferred
about what man has comprehended

i.e. God made this world this way
that all the best that a person can achieve
instantly displayed
to the level of the fastest possible dissemination of information

i.e. it looks like it is given by God Himself yes
man has comprehended
but God also sends information back as if it means

but in reality, a person often receives information
for example, into the cellular system

then such a person if he is
well in private contact with people
it is faster even at the cellular level of luminescence
transmits information

even by the way, it is visible in such a person
that there is an increased concentration on the cells
as if it were an information carrier
i.e. you can even tell by the glow

and such technologies
who exactly realizes Eternal life
are gradually entering into a management system of this type
that the glow around them increases
due to the information transmission system
where is the non-fixed system of ending events

this is still a narrow technology
where is the non-fixed system of ending events
because if you record it, it's a different technology

and then they hand over control
gradually reach the general background level
and in general like ordinary people

the truth is that they start to transmit knowledge even faster
but this background level is no longer there
local glow where the concentration is high

you can even watch
who is doing it
namely the technologies of realization of Eternal life
at first it has these in general
as rejuvenation points actually in the body
such systems

and if, for example, we are already moving
to the system where the event is finished
i.e. we give the route
we start the event
we translate yes
here is Eternity
we output the event structure here
and we say here Eternity is defined

so here is the structure of interaction

defined as if by Eternity
let's say found in space
Well, that is, the person spent time

after all, finding information is not difficult
you have to spend time, some milliseconds
but still spend

for example, we found it and decided to spend time there
found information about Eternity

so here is the interaction of the final systems
where the impulse is clear
and systems that well as if infinitely developed
i.e. they are dynamic systems
and unfinished, for example, in terms of logic

this is the level where it is brought up
and in fact, the human Consciousness is created
which creates the Eternal physical body
this is a specific law

then this is the area
where such Consciousness is formed
and this is a fairly strong level of control
in the realization of Eternal Life

because the person who has
For example there is the Eternal body
develops knowledge towards Eternal development
develops knowledge about the Eternity of the body
having at a certain level
he naturally implements more
the structure of Eternal Life
in the normal development system

after all, the concept of "Eternal life"
this is a fairly simple objectified concept
it means counteraction
for example, there is global destruction
introduction of the health system there

and the redistribution of knowledge means well by that way
that the most active areas
there's a way to transfer knowledge faster

most of all there are some fundamental management things
or faster or, on the contrary, give more time for analysis, etc.

i.e. a person begins to analyze
more systematically more detailed
everything that happens
and it has an information processing mechanism
at the expense of Consciousness
increases sharply at this moment

after all, the technologist who implements Eternal Life
he must actually control
a large number of factors
precisely from the point of view of Eternal development

for example, a technologist who has developed a niche around himself
and where they appear ^{yes}
elements of Eternal life are realized
there should also be excluded
elements of earlier destruction of the World
i.e. it means resurrection
which are to take place
even at a controlled level of analysis
how do they happen

i.e. this is the level of development of Eternity
so that a person does not pass away from ^{life}
i.e. the absence of death, etc.

this is a whole level
well, some kind of complex of events , so to speak

in the usual sense
in organizational terms, ^{let's say so}
or just there in action
but at the same time this level is quite natural

that's when a person looks
deep down ^{well as if of} one's own organism
if I may say so, it's simple there
such a rather peculiar term to choose
^{for example, "inside the body"}
where it doesn't matter

such a simple level of control
just direct the structure of Consciousness
inside

you don't even have to go through the ^{skin}
where ^{well as if} in the management structure
i.e. do not form the accompanying words completely
there you can form a basic level of words

then you will see that when approaching you
you are actually leading in this impulse
the whole Eternity of development

here is an impulse that can be directed towards oneself
only if you have on the other side
the structure of the Eternal number of situations

this is a simple example of how to find yourself
in information

and if somewhere the situation is local, ^{for example}
it is precisely in the information
from the point of view of Eternal development

because when there is an infinite amount of information
you must be able to clearly define
addressability of any event ^{yes}
including finding yourself there

why would this be technologically required
because in the conditions of Eternal development
need to understand
where is the system of action ^{yes}

^{well, that is,} there are actions
of your Spirit
Consciousness

so where are you
you always understand and know anyway
and in information it is an applied control element

^{for example,} an infinite number of events in the World
God created the world
He created Himself
how does he even find it then
Your personal action ^{yes}

and the simplest postulate
then God needs it, which means the physical body of a person is obtained

then there are no problems He immediately finds Himself

but here comes the next level element
after all, God could have created a completely different Reality there
and here is the fundamental level of the human body
then what is it

what is the body of a human being for example
Well, let's say in the Divine understanding

all phenomena are connected with each other
in the projection plan
for example, it turns out to be a human body

and inside any thing
also exists as a projection system of the Infinite World

means physical body
this is a certain level of management

there is a level of Consciousness
who is in charge of this management

but here it turns out
that only in aggregate
physical body
The soul of man
Spirit
Consciousness
we have well, having supplemented this list
there are also different levels of human development
we have, as it were, the task of personality

so this is God's task
in the program yes for example information
i.e. God transmits information to man
and so, generally speaking, He can have only one task
at God's
to convey precisely the task of Eternal development
to a person

that's when God comes in handy
it turns out that if we start such management
do it regardless of even the management level

i.e. for example we can mentally pronounce a sound
initial sound level

change the sound structure

here we can see that there is
pre-verbal
pre-information level of information transfer

i.e. God looks at man
and interacts at the level of the Soul
God and man

and this is where the primary level of division arises yes let's say so

because in essence Eternal development Eternal life
this is an approximation
to the status of Divine development

i.e. when a person is very systematic, clear but independent
maybe a person has a way there
there is no need to expand galaxies there
maybe you just need to live forever and that means everything

and then it turns out that here he is
must understand very clearly
that Spiritual union with God
i.e. the ability to recognize information
my
and God's information
this is the status in the realization of Eternal life

i.e. only in this way can it be realized
real human Eternal life
when a person interacts with God
in terms of the main task of God, in fact

i.e. a person perceives
that he must know all the Infinite development
he must learn how to live forever
he does this deliberately
although there is a lot of work
It is clear that there is a large amount of information

but somehow it just happened that way
then we need to accept it yes
Well, that's a logical, simple line of reasoning

and if based on this status
a person still sees further

how God imparts to him the following knowledge
and he is already beginning to pass on this knowledge to others

it turns out that one volume is enough
he mastered
Human
and he basically doesn't need it
he begins to act further, for example, independently
i.e. the finiteness of the action arises

i.e. the expression as precisely the "finiteness of the action"
it is in the awareness of a certain amount of information

this means that initially a person has
quite a lot of information
actually Infinite ^{yes} property

any information has the property of Infinity

then it takes on some volume
he has enough
and therefore the finality of the action
it is still an expression of a person's will

a person finds it himself
in the structure of Infinite information
in the structure of Eternal Life
namely finite elements
those that interest him

and how does he find them, for example?
here from the point of view of Eternal development
for example there is a resurrection structure
this is still a restoration of the status of Infinity

structure of achieving action
some at some point
this is exactly development
let's assume in some specific coordinate variant

i.e. you start doing management
achieve control
take control to some level

so that for example you get
not only the final action for yourself ^{yes}
but they defined the criterion

that's why you are for such and such action
got some result

i.e. for some final action you get a result, etc.

and thus we see
that in the structure of the Eternal development
A person chooses structures for himself, well as if localization

but you can choose
some local development systems
i.e. how to localize information
but without diminishing the status of Eternity
i.e. without leaving the path of Eternal development

then you can choose
but at the same time the structure of Eternal development
always fix as the basic structure

then it turns out here in any final action
you have a very powerful resource
renewal of forces for example yes
health restoration
there are healings of other people, etc.
non-dying for example Yes

and when you are here, well, actually studying
and you know how to learn, by the way, it's not difficult
see this inner line
namely, Infinite development
in any seemingly final action

i.e. you look at the action as if from the inside

here is a certain sphere of information
action means there is a segment of the sphere
and looking from the inside
it is still possible to be in the center of the sphere of Eternal development
Well, in geometric terms

although you can do it in a different way
but at least approximately

it turns out that you gradually get used to the idea
that whatever your actions, whatever you do
gradually lead to that

what are you actually implementing
the system of Eternal development in any action

and this is a sign of concentration, yes
directed towards this action
a sign of unity in fact
a certain level of so to speak intelligence
so let's say all people in the collective Consciousness
for this purpose
implements that
what exactly is the realization of Eternal life for all
it is often a simple transfer of knowledge
and often of a verbal type

i.e. there is nothing else there except in the verbal version
maybe you don't even need to know here

and that's when we come to that
that for the realization of Eternal life
in any system of civilization development
in general in the development of the World
verbal action required
i.e. precisely the finished expressed by a person

i.e. we see the transition of influence from the word
i.e. the voiced system
to all external Reality
which may not seem to be connected with the word at all
there is some part of nature, etc., the animal world, plants

and as soon as we start to observe
connection
between the word physically spoken
and some element of some kind For example there is a stone plant
any galaxy in general outer space

then we move on to observation of this kind
when a person thinks
and how is this situation connected, let 's say
with external development

it turns out that we begin to see
as a human thought
affects the whole Reality
i.e. how your thought influences Reality

and then you basically enter

into a system of mutually intersecting, mutually similar

all external Reality Infinite Reality
interacts
with your Thinking
what is Infinity i.e. Eternal development

and at the same time
your Reality of Thinking
influences
to Eternal development

i.e. it turns out that it arises
natural state of governance

by the way, in this management
it is in the realization of Eternal Life
very peculiar aspects of management occur

you start to manage
then [Eternal life] is realized
and the situation can recover to that level
provided of course that knowledge is obtained there
event improvements
about the same type
how did you get before management
well with those changes
that you improved the management indicators there
or solved your situation

and in general the situation may resemble that
which was before the beginning of management

as if God when does he start doing
He basically comes to the same thing in essence
adding or somehow reducing events there
he can do it in the event system
very clearly add something reduce something

and that's exactly when you work
in the structure of the Eternal Administration
you actually get it often
resumption of the primary situation
i.e. the level of absence of information is realized

in human perception

start working
get a system of actions
and practically the situation is about the same level
how was she for example Yes

also a characteristic action
in the management structure of Eternity
it's just that everything here is managed naturally
to a greater extent in the Macrosystem

i.e. you transmit knowledge about Eternal development
which either instantly or later
they will definitely come down to you
and you realize Eternal life
in the structure of health for example

By the way, this technology is very easy to use
to normalize health to the initial level

i.e. you make this type of control
what's up to the level
Well if there are any problems
and if there are no health problems
it means just event management
then it is immediately realized
even in management with recovery

you do the management
through the system of Eternal Development
and then you get primary status
well, the absence of diseases, for example

nothing seems to change in the world

and here you come
to the main level of management
as if it were in this technology
as some kind of secret of management
which to know
some concentration is needed yes
a certain commitment to secrecy, so to speak

although there are no secrets in the Salvation Department
but here, as it were, a certain nuance arises , well as if admitted yes
to the information specified

although in reality it is the free will of man
he wants
will be allowed

doesn't want to
No
he wants to listen to something and wants
he may not perceive

he may perceive a completely different meaning
in this information

but here exactly this type of level arises
Well so to speak in management as such
what does it mean that God is going on at all
before His initial Action
i.e. how does He organize His Action in general?

that's from the point of view of the primary logic there
when logic is perceived that the action is expressed
what does God have to do with this action?

and that's when you, well, according to this development system
move on
you see that in reality there are no secrets
because it's primary information
it's not formalized in any way

to create a mystery
we must in primary information
to introduce some conventional meaning there yes

but the primary information is neutral
any aspect can be obtained from it
the initial action and the final one are often the same
except for the actions themselves

i.e. the event is born at a single level

and so we come to that
that all events are actually born
to the primary level
it is precisely the birth of the World and the creation of the World that turns out

and already at this point
when we come to it in this way
we see that from here it is quite clear that

our task

realization of Eternal life

this is the ability to bring into the event development system

which is initially clear

your personal context, i.e. your personal will

and here is where God gave freedom in action

to any person

that any person can contribute i.e. re-create

or create there

the element of creation is obtained

then your own personal control system there

somehow implement your personal concept of action

and this, by the way, is the most stable form of governance

in the realization of precisely Eternal life

i.e. development of personal action

precisely in the system of initially laid down events

this is natural from the point of view of personal choice

there is an initial event

you can make control for example

there are those that will happen anyway

because that's how the collective Consciousness works

and it turns out that they are the most typical

in the management of the main number of people

so they will happen from the point of view of creation of course

any negative status can be overcome

because the collective will will be determined here

and it turns out that in the implementation

namely the technologies of Eternal development

here you can see

where inside each person yes

or there near each person

where does it exist in you

it is precisely the structure of Eternal Life as such

highlighted in action on well some overcoming

to some change in the situation

and it turns out that when you start to see

this system of Eternal life as such

that exists in you

i.e. this is Eternal life, it is in you
and you just need to implement it on everything

then there simply arises an element of relation ^{yes}
in what case do you implement there
tasks of the Soul

Spirit

Consciousness ^{for example Yes}

some of my personal tasks as such, collective ones

and when you implement the tasks
namely the Eternal development of Eternal life

it turns out that they are different after all
sometimes by the way it is quite clearly visible

^{as if there was a} difference in action

when the tasks of Eternal development
then the interaction is different accordingly

if just private tasks

naturally let them be Macro-creative there

in management through Macrosalvation

after all, this is a private level that is observed here

and from here if we implement

tasks of Eternal development

based on [,] for example, a person's task

then there is an inseparable connection

between the tasks of man and God

when a person sets the task of Eternal development

he has an inseparable connection with God

because He also has God

tasks of Eternal development

and God gives what He considers necessary

and a person realizes his

what he considers necessary

not only because it is his personal task

often because he sees

that this is God's task too

and based on this we get

such an integrated living ^{so to speak} in the real understanding of the Reality of the
Eternal development of Eternal life

i.e. this Reality exists as such in itself

i.e. Eternal life
this is a form of information that looks simple
as Eternal life

means one of the ways to implement this information
just take this information
and enter into the control system
as the structure of Eternal life
as a structure of Eternal development

This is by the way the most
there may even be a simple form of management
ability to enter in advance in the way I said
highlighting information

ability to enter this information
into the event system

you just need to know there
where in the events is there a place for this information
time
and how to put this information in general

well, it's the same as a building material
i.e. there is this information
we need to just take it and write it into the event
place inside event
this kind of cord and rope

by the way, it just reminds me of some kind of tourniquet
this information looks exactly like this
such a golden-silver color

the deeper we go into the information
the more accurately we understand how the human body works
from the point of view of time for example Yes
from the point of view of space

i.e. when the device is clear
then the systems of interaction are clear
man and Reality

then often by the way it is not necessary
to perceive something

technologically it can be implemented somehow
it's enough to understand

and therefore the realization of Eternal life
this is a special state of understanding
understanding of inner understanding
how it works on the internal level
human body
his life yes
his Soul
Consciousness
it could even be just a human action
from the point of view of some distant Infinite level
systems

and here is where it is also important
that when you start seeing the Infinite Deletion
then you need to see yourself in an unchanged form
again in the information

Here's God , for example
He created all Reality.
and then if He looks at Himself in the Infinite distance
For Him, nothing will change
In principle, he didn't gain any special experience there.
He has already created everything.

and for Him is Infinity
He himself, without any experience at all
He himself

and it turns out that when a person begins to perceive
its development well by analogy
maybe only on a sensory level as well
By the way, this is a colossal source of control
from the point of view of well for example, health improvement yes

who is healthy
for those this is the level of multi-system action
i.e. just for a certain level of energy resource
if I may say so
it is precisely this level of control
that with the implementation of Eternal development
a person does not change in his basic essence

Of course a person changes the level of management

i.e. enriched with knowledge, etc.
but it doesn't change
in the structure of Eternity as such
because he is Eternity
he can't change
in relation to the same value

and this is the principle of immutability
man and Eternity
it's very rigid fixed
absolutely unambiguous status
which very clearly defines
that yes, Eternal Life was introduced by man
well at least at that moment when he entered yes

and here if he sees that he has implemented
then this has Infinite development
it's not just one moment
it will come back to him anyway
in his own knowledge

and when, for example, further if we consider
this is how it is managed

well, that's basically what I said
some mystery seems to be
that a person simply knows himself
there in the Infinite Distance

although in reality it is not a secret
and what is a secret
it's just the next level of knowledge
there if it is already open it is no longer a secret

so that there are no secrets at all
there, precisely in the system of Infinite Development
then it is enough in those cases
when a certain level of knowledge has already been realized yes For example
and this level of knowledge becomes known

that means a fairly basic level of control
do it on the basis of the knowledge that is known

i.e. one person became aware
well everything is clear yes at some point there
the man learned the multiplication table
it's clear to him

as possible based on this knowledge
make the whole world sustainable

from God's point of view He
It was enough for Him to understand one element of the World
and He made the whole world stable

to understand it
He made it so that He understood him.
He creates everything

and that's when we start to get into detail
into the control system like this
that everything that we do for example yes
everything that we create ourselves
we can understand it as we need it
i.e. how we want in this system of Reality
i.e. we create our own understanding

then it turns out that this is already a level
which implements completely autonomously
the structure of Eternal development

i.e. it turns out that you can
due to the fact that you understand some structure

and from God's point of view
anyway you have the same knowledge of Infinity
namely Eternity
then any derivative concept
it is what you create

i.e. you can enter
into the structure of creating any situation
and here a rather serious problem arises
control system

you can see how you influence any situation

and this is this penetrating precise understanding
of this system of the World

i.e. you can see
that at any point in the development of the World
wherever you are
you influence Reality in this way

what do you practically get

Well in general so let's say it's quite clear, although it's a link
but a fairly central level of control
for the whole Reality

what's important to see here is
that with the link development of information
you still control the whole Reality

and that's when this action
you are doing it on a human level
then naturally you implemented it
Laws of Eternal Development
i.e. you manage at any point just as effectively
as if you were in control of the center of the world

then it becomes clear
that you then live forever
you realize Eternal life
for all elements of Reality

because any external control point there
this is the same fundamental area of management

This is where I end today's seminar.

Thank you very much for your attention
