

GRIGORY GRABOVOY  
The Teaching about God  
**Volitional control**  
03.12.2004

Hello again  
the topic of my seminar today  
this is my Teaching about God  
Volitional control

In this topic I am considering  
the substrate of will is when it is directed  
to the control system  
how can it be visualized firstly  
what is will in terms of management as such  
and how, well, with this concept  
use so to speak in management

from a management point of view  
any concentration and any system of volitional control  
this is some kind of impulse coming from you  
some kind of sphere and some kind of shrinking ball , so to speak  
or some mass of information  
which somehow  
or there in a way that directly depends on you  
has a radical effect on the system  
including optical  
on the system of action  
and you get some next action  
i.e. you concentrate your will to do something

but concentration of will  
does not mean that the action is happening  
you can concentrate your will  
but at the same time only prepare for action  
those. concentration of will is needed  
in order for some action to be possible to prepare

There is also a level of volitional control  
as an external factor  
i.e. the formation of will and the management of will as such

i.e. for example, if a person doesn't know very precisely  
what is will in manifestation  
there is collective management or there is private management

then he can simply set the task  
it is necessary to form such a will  
so that there would be some kind of control

and then to perceive the already formed will  
and use it as an element of external control  
i.e. without pressure there is no pressure wave  
this is the one that usually arises  
in the concept of "volitional control"

and there is another completely different factor  
as if from the point of view of management or understanding  
this level of management  
that will can be simply an expression of will

i.e. any person can simply express their will  
at the same time he can express his will  
as if in a random process  
so he can go as if in some kind of election program  
see slogan  
some element of Perception will work for him  
he expressed his will  
but he doesn't get tense  
perhaps this is a completely random thought for him  
what others or he himself might think

therefore, in the concept of "will" here is "volitional control"  
from the point of view of the Doctrine of God  
there is a level of God's Action  
where the all-manifestation of God is His personal Will  
i.e. God decided to manifest himself everywhere  
He manifested himself in some Actions

i.e. will is a personal factor  
still coming primarily from God  
and in connection with this we have such a level  
what is the will  
this is the Action of God aimed at all manifestation

i.e. we see, for example, God in some action  
and at the same time we understand that this is His Will  
those. without the Will of God  
from the point of view of the logical control level  
nothing is being done

from the point of view of the Spiritual level  
God's will is extended  
to the level of creation of the human Soul

i.e. through the will one can approach specifically  
to the structure of the Soul  
and in general to the mechanism of even the creation of the Soul

it turns out that we have a sufficient principle of universality  
extend for example to the level of the Soul  
and we begin to understand that the will of man  
it's not always a high concentration  
namely, for example, energy or action

and that the concentration of control  
where is the action  
well, it's pretty simple , yeah  
not related to stress, for example, a person  
that there is no wave of tension  
that's exactly the wave that's coming at a person  
when it is considered that a person has volitional control

i.e. even when this wave is not there  
we can still clearly say  
that we showed will as if in the next management

For example, if you set a task  
how to build the future with your own hands  
on information  
for this we must do management  
at some point in the future for example yes  
but it may not necessarily be the future  
it could be some geographically simple place

and then it turns out that we must clearly separate  
management level  
at the level of Perception for example  
at the level of action

and here in the level of action of the next action  
it is possible that we can't even do it in general  
we don't need it, we just can't  
as such it is very simple  
to perceive or sense something  
but we often just can't find the time

Often a person does not have time  
he makes a lot of decisions  
and then  
he can't depend on every decision  
some kind of impulse there, volitional to perceive or not volitional , yes  
any  
he must work calmly

in this regard here is the management  
for example in the future space  
it is still kind of non-visualized or something  
sometimes even a signal  
sometimes this visualization is there  
but there is no pressure of will in the opposite direction

i.e. to achieve something  
a person must strain himself, as if concentrating his will  
as some people think or people often think  
and only then does something work out

i.e. there is a certain wave of concentration the body is compressed yes  
a very powerful reverse wave begins to come  
here in common parlance  
this is a manifestation of will, i.e. the application of will

when we talk about future events  
the next element may just be  
or remote  
or a very fast event  
then it turns out that we use will but we don't feel it  
as if a reverse wave  
we don't feel concentration on the body

so between these concepts  
where it is felt  
where it is not felt  
there is a very important element

it is very easy to build a human body  
your own organism  
between two criteria  
a wave of will coming from you  
where you constantly feel well as if so stretched  
or you could even say strained  
concentration  
i.e. you lead this wave as some kind of dense network

and on the other hand  
you can still do the management  
but then between the volitional level of the wave of will  
and the following control  
it is precisely the personality of a person that exists  
in full free expression  
as if it is independent of the will of man  
just by the Will of God

i.e. we just need to define it here  
where man exists in information by the Will of God

and where the will of man is clearly manifested  
i.e. the criteria of will are defined  
external wave  
and the next action

why can we consider that  
and in general it really is so that even just sometimes  
normal information optical action  
somewhere in some specific place  
leads to very powerful results  
although you do not experience any strain of will

and on the other hand  
to stop the reactor  
to avoid a nuclear explosion  
there is no need for volitional concentration at all  
because the higher the concentration  
the greater the delay in the return signal

there you have to act on the contrary  
the principle is very, as it were, distant  
you shouldn't feel it physiologically  
that you are engaged in management

and when, for example, you are together  
you start building  
this position of volitional Perception  
myself for example as an individual  
then it is clear that to build a person, i.e. to build yourself  
It is precisely at the physical level that is meant in this case  
it is possible through a combination of the following systems

In God's name  
i.e. it is a structure  
between the volitional controls of man  
human will, conscious and perceived  
and the third is where the will is not perceived  
a person thinks that this is sometimes a random event

although he is participating in this event  
he just doesn't have time  
due to high control speed  
see how he conducts this impulse at all  
or for him it's as if space exists  
where there is no impulse

so let's follow this impulse  
Generally speaking, one must become aware of one's own body  
then it turns out that the body is the carrier of the impulse  
the body is a construction of Reality  
between volitional concentrations  
conscious or perceived so to speak  
because everything is meant here  
more perceptive

and the concentration that is done by a person  
it's done by you  
but at the same time it happens as if on the side

so here there is a fundamental transition  
to the outside world  
phenomena that seem to be on the sidelines  
they are, as a rule, phenomena  
well, the external and manifested material world

i.e. in this case it turns out to be a very close transition  
that there is a growing tree , a blade of grass, etc.  
This is your will among other things

it's very easy to see a sign of your own will  
just as you came out by the Will of God  
to create your Soul  
this is also where you come out to express your will  
precisely due to the awareness of the external object  
which you control  
by his own will  
but which does not have the true force factor of the reverse wave

i.e. the speed is very high and it is comparable  
with the speed of organization of your physical body

then it turns out that your will is manifested in your body  
and the body was created by God  
in this regard, this is also the Will of God  
through your manifestation in the physical body

and you start to see linearly  
here in this case to think  
where is the Spirit of man, for example, in the Infinite incarnation

i.e. you begin to build the status of the Spirit as Infinite  
on one's own  
here you can see a very important element  
what is the Spirit  
The spirit behaves almost exactly the same way

Generally speaking, sometimes they say  
here you can sometimes even say that  
and see this situation like this  
that the Spirit really becomes the same in properties  
as a physical body by its informative properties

and then we begin to see  
what is the physical body  
between the will manifested  
and by a will as if distant  
level of manifestation  
this is also the action of the Spirit

i.e. Spirit  
physical body  
begin to converge to the point of realization of the Soul  
then it is clear that this is God's focus  
it is always directed to the center of the human Soul

right in the center  
Man always perceives the Will of God  
as the central Will

and then we start to think  
and where is the center of the human Soul?  
how can it be found yes

Well, I mean there is a geometric center there  
event center there

there is a center for concentration of information Yes  
in general, what does the conceptual element consist of in general?  
what is the concept of "the center of the human Soul"  
what is in the center of the Soul

then again we have to use our will  
already human will  
to understand this process

and here we clearly see the manifestation of will  
coming from a person  
but walking the same way God does  
from the Physical Body of God  
it means that the same impulse is going on  
but man is different in that  
that he can configure the will  
For example there locally [...]  
God does this everywhere.

and if you do it exactly like this  
then you can build an external control space  
of their own free will  
i.e. build some trees there and mines and roads  
it would be possible to do it long and routinely, as if every molecule  
create  
but then where does time seem to determine  
other event structures

i.e. God did it for man  
why does god do certain things for people yes  
for example, the Earth exists, some molecules exist, etc.

and then why in this case  
so it should be considered as such  
exactly this position  
Well, that's exactly what the quintessence consists of  
why do we even look at Reality from this point of view

in order to show  
that a person has his own personal tasks  
the will of man is absolutely free  
he can build these molecules  
but then he will waste time  
while he builds ten molecules there

and he needs to live among people  
to determine it somehow  
your position of behavior, etc.

and it turns out that this is the very quintessence of this management  
is in that  
what exactly is a person's ideology  
his behavioral system  
basically takes away his resource

i.e. what he thinks for himself how he behaves  
basically what he invests in

here we can make a reverse analogy  
already project onto God  
it turns out that God is in principle from the point of view of man  
should do something like this at least

and here at the level of will  
just such an Action of God  
this is an external independent signal

i.e. this signal why a person can build  
because there is  
and the Will of God  
and the will of man  
and it is precisely the similarity that is very abstract here  
i.e. it is a very deep associative similarity  
i.e. it cannot be clearly traced linearly

this is where the multifaceted nature of the external world comes from  
interaction  
The personalities of God and the personalities of man  
makes the World multifaceted and multi-developing

Yes, a person can build a specific molecule.  
if he really needs it  
but then, for example, to improve health during complex processes  
in complex, sometimes difficult processes in the body  
Well there they mean painful  
It is often enough to determine  
focus of human volitional systems  
i.e. how a person made a series of decisions

he has it very clearly recorded

namely the volitional segments  
it is very simple to record in the information  
manifestation of human will  
as soon as you concentrate  
a person is <sup>seen</sup> very simply by everyone around him

in the information it doesn't even <sup>seem to be highlighted</sup>  
but it is represented by a specific series of actions  
concentrated the will  
why did you concentrate  
where did you apply it, etc.

and when you take a row like this  
consider the construction of the organism  
the human body from the point of view of volitional manifestations  
then in a person one cell or even often one molecule is visible  
which can be slightly if the molecule is displaced  
just from the center of rotation <sup>there</sup>  
and that's all and that's the reason <sup>for example</sup> there are no diseases <sup>there</sup>  
concentrated cause

you voluntarily reduce all the reasons  
into one molecular system  
in this case it is enough to take the concentration of will  
move a little to let the molecule fall into place  
everything is instantly healing

i.e. sometimes it turns out that this is a useful <sup>factor</sup>  
ability to work with one cell  
but it turns out in this case  
you work with your cell

if you are considering the event system  
and you need to make such management in events  
that the event will be configured <sup>exactly in this way</sup>  
are somehow transformed  
or <sup>for example</sup> event configuration  
will become completely controlled <sup>yes</sup>  
at the moment of configuration

what you can do at one point  
make management of all events

as God does, He does it by His own will  
not that it perceives at the same time  
there are a lot of wills <sup>there</sup>  
He just finds some radical points.

and everything is always clear to him

and this is the concept of precisely "constant understanding of the World"  
this is a personal will that goes according to the Will of God to man  
God made it so that man would develop eternally  
he must live forever  
so that this reverse wave of universal understanding  
not only there God understands  
but people should also understand the same  
basically well as if in my own way  
but at least strive for universal understanding

then as soon as this wave of people  
i.e. the will to understand and the expression of personal will  
an expression of a kind of will to understand the whole situation  
this wave is exactly that  
that man is there in Infinity  
in the form of precisely the Eternal, Eternally Developing Man  
really Eternal which is now already Eternal

i.e. God looks from here, for example  
and he sees that man is Eternal in the future  
but at the same time He sends all the time  
impulses of Eternal development  
and then He must understand  
this is at what point and what happens  
around a specific person

i.e. the Eternal Man  
located somewhere well whatever it is , yes, for God in the future  
although for God it is actually logically not  
there is no future or past  
and yet the will of man transforms the Thought of God  
into a structure similar to that of a human

i.e. God is already adapting to human actions  
because he has a Will  
it is precisely the reflected will of a person, as it were

i.e. He is free to man  
conveyed his will and expression of will  
Well, he wants to live, for example. there is Eternal Happiness etc.  
be healthy Eternal number of years  
for example, such is the will of a person

but logically it is so  
i.e. the logical criterion of similarity is that  
that in the future a person has it or already now  
here is the task to show that already now  
he is proficient in this instrument  
Human  
and then it's easier for him  
for example, he is not susceptible to any diseases there  
he calmly endures some kind of adversity, etc.  
and constantly strives for one management  
namely Eternal development

and when does he start doing this development  
comparable in the Will of God then  
exactly yes  
then he's already starting  
as if they were practically no different in terms of technological level  
according to the principle of self-construction of the body  
based on the principle of creative possibilities

i.e. in this case a person  
creative possibilities, for example, given by God  
can lead to such a level  
that to develop independently so much  
that they will match  
exactly at the level set by God

i.e. this means that a person can develop  
In principle, infinite  
and at the level of God's primary task

and what he creatively developed  
embedded in the Soul from the very beginning  
Well for example, the human soul has knowledge of resurrection  
or there about healing in general from any disease  
in principle from any disease  
there is a technology of Eternal development

if he is a creative person  
develops to this level  
then the logical phase is synchronized  
with the Soul level set

and then it turns out that this is exactly the transition  
from the Soul of man to the Soul of God

this is a human action  
i.e., a volitional action  
aimed specifically at Eternal development

and then indeed the Soul of God  
becomes closer to the Soul for example there is a person there  
in Human Perception  
but at the same time a person  
i.e. the Soul of man becomes closer to the Soul of God  
precisely in a linear vector expression

i.e. a person consciously  
due to good deeds and manifestations of will  
begins to approach God  
precisely with the brighter light of your Soul

because approaching is the same light  
because there is no concept of roads , spaces, etc. there  
there is a Soul of God in this World  
and a person simply makes his Soul brighter

and then it turns out  
that there is a synchronization of the Will of God and the will of man  
when there is mutual luminescence  
when the Light of God and the light of man  
are starting to merge  
at the level of Infinite development

i.e. if we just pose a logical problem  
what is the criterion for the conformity of human actions  
to what is or is called the Will of God

for this you just need to  
look at a person from the outside

and see what happens from its action  
the line of Eternal development is spreading  
that means it somewhere connects with the Will of God

and if you look where else  
you can help him, i.e. give him control  
which allows him to be more precise and efficient there  
develop towards Eternity  
namely Eternal development

and if we develop towards Eternal development

then after some time <sup>there</sup>  
let's assume we take Infinite time of development  
after some time there is a fairly high compression  
those. concentration  
the will of man  
other people  
God  
leads to the fact that it arises  
the principle of free thinking

that's why man thinks freely  
it's very easy to see at this point  
that thought is born as a free quantity  
in principle, in many ways often independent  
from previous factors  
this is the principle of precisely the Infinite <sup>and</sup> future development

very high data compression  
displaces  
some third value  
and <sup>for example</sup> a thought arises

but for God there is an extremely high concentration of information  
gives birth to the civilization of man's Earth <sup>there</sup>, etc.

i.e. God is actually located  
under the same conditions of information development  
as a person is in essence  
a person simply has an idea  
which can be realized in material embodiment  
in some actions  
expressed by human action

for God thought is a substance <sup>yes</sup>  
material <sup>or</sup> informational  
or it could even be the Soul of a person  
created in the product of Thinking

i.e. often God does not necessarily have to <sup>be there</sup>  
go to the Soul creation platforms and create  
He has provided enough for him  
and in dynamics He gives birth to the Soul

so it turns out that free thought  
free thought  
that means that in humans it comes from overdensity, <sup>yes</sup>

is transformed into some actions  
but through a person

i.e. if we look from God's point of view  
God made this world this way  
that the transformation of Thought into action  
happens through a person  
because

Why, for example, shouldn't God give man qualities?

Well, let's say some of the closest ones

i.e. take and materialize something there at a distance yes

and at first he thinks freely, moreover  
then he thinks about it and does something with his senses  
there physical organs, etc.

and because this is a sign of the freedom of God's Will  
this is where the freedom of God's Will is manifested  
in human and divine understanding

i.e. the free Will of God implies  
availability of all possible options  
including this option  
actions through the physical body  
often this is the only option  
because then the action is manifested

to objectify the action  
create something at all  
some kind of manifestation is needed

it means the body as a necessity of action  
the mechanism is built as a system of necessity  
not because God took something more for himself there  
or put less there  
for other controls  
or there is information  
not to mention the man to whom He gave  
almost all the possibilities of Eternal development  
in general, everything is real  
He gave even ideal systems

here in this case  
it is precisely the mechanism of knowledge transfer  
mutual learning interaction mechanism  
it is precisely in this way that it is expressed in a volitional manner  
that thought must be transformed

who brought thought to the level of high enlightenment  
can operate at the vibrational level of God  
at least in action  
by local given process

i.e. God can in the whole world  
and a person can learn linearly  
or for your own events  
or <sup>there</sup> in local segments  
also of course related to its events  
but not <sup>as if</sup> personally connected with a person  
there to help someone somewhere at a great distance  
someone who, <sup>in general</sup> and often, is not projected anywhere  
in his Consciousness  
i.e. to take and help any person <sup>there</sup> in the Infinite Future  
and choose a specific one

he can do it, he is free  
and it turns out that this is a manifestation of will  
man and God in Action <sup>yes</sup>  
reveals a very simple quantity  
for a person the likeness arises to that  
how god works in local systems  
where again external systems can be anything

i.e. a person determines for himself  
what does it refer to  
which refers to the external <sup>system</sup> , <sup>yes</sup>

but what about a person  
<sup>Well,</sup> everyone thinks that it is clear  
his personal events physical body etc.

here he selected the first external object  
help a stranger seemingly a stranger

and we see very clearly  
how is the connection configured near it  
i.e. we clearly see what is being built, generally speaking  
at this moment his physical body  
by the man himself

to understand  
how does a person build his physical body

on the level that God is constantly  
everything actually seems to be kept in His Consciousness <sup>yes</sup>  
of My Own Will <sup>in general</sup> in many ways  
i.e. any molecule

then a similar element arises here  
that man is created  
due to the external element, among other things  
<sup>Well,</sup> it would seem that the element does not correspond at all  
only to the personal system of events

and then it turns out to be logical <sup>in general</sup>  
the more good a person does <sup>there</sup>  
the more any charitable actions  
saves more  
the more steadily it develops  
the more stable he forms his physical body

then for God there is  
because He is Eternal  
only one value  
It should be generally macro-positive.  
i.e. to do only exclusively everything constructive and good <sup>yes</sup>  
his Physical body  
i.e. it turns out that He has such a Law  
in the manifestation of a person's will  
that otherwise there can't be anything else  
because then the molecules would fly apart  
and where would the physical world be <sup>then ?</sup>

and here, moreover, there are the molecules themselves  
somewhere else there must be in the Consciousness of God <sup>yes</sup> in this case  
i.e. must be built

it turns out to be a super-volitional concentration  
leads to the emergence of such a concept  
that any person is any no matter how he was born  
in general, what kind of transformations have happened to this person?  
can always fully master  
a system of complete restoration of the body  
only if it is his will  
or someone external any external person

i.e. it is enough for one person to declare  
that in civilization there will be all the Everliving  
this is basically enough

all the people <sup>there</sup> can rely on this  
for example, I stated, i.e. my personal desire  
to live forever  
this is basically enough

if someone else will add additionally , for example  
the concentration of quantity will be even greater  
in the collective Consciousness it's even better  
and of course, generally speaking, any person should add  
who understands that if such an opportunity exists  
then naturally it is better to implement it

as a rule, when implementation begins  
then they people understand that this is exactly how the World works  
any other level of the World  
<sup>there</sup> is some kind of decay of biological tissue  
some finite elements  
even seem to be of any particular interest  
another option

and here the next element arises  
that the will is external <sup>and, as it were,</sup> volitional manifestations of the external  
World  
related <sup>for example there</sup> with the technology of Eternal development  
this is a clear line of interest  
<sup>as if of a</sup> volitional and targeted interest  
external object to you  
in information  
<sup>for example,</sup> what interest could a tree have?  
standing <sup>there</sup> in the forest towards you <sup>or there</sup> on the sidewalk

but if you find out  
a line of will directed towards you  
any object of information  
in relation to any other object  
has a line of action  
but it's still an act of will  
nothing would happen just like that

when you start to see  
that this is will, just will, <sup>yes</sup>  
it's not just some chaotic action <sup>there</sup>  
namely will

and everything that is outside the system  
this is will in principle, by and large

object of information or yours  
but not manifested in the linear impulse

and between these elements is located  
namely the Eternal construction of any element  
including the human physical body

then we begin to understand very clearly  
the whole nature of things  
related to the action towards you  
any element of information

i.e. for example, an air molecule somewhere  
through it you can know the whole situation  
you don't have to go anywhere far  
you just need to identify the motive of the behavior  
towards you  
well, like in the investigation of some situations  
motive or concept often arises  
at least an analysis

so to identify the motive there in the molecule of some oxygen  
It seems like there is no logical need, yes  
why does this volitional attention to you exist

and because if you start going further  
from the point of view of the projection of your Consciousness  
precisely in the Macrosystem  
then it is quite clearly visible here  
what exactly what exactly this projection of Consciousness  
this is your personal action

i.e. the motive, generally speaking, is embedded in you yourself  
you define it very clearly  
motivation for any piece of information  
through self-knowledge

and here an element appears  
namely the expansion of the system of Consciousness  
i.e. a person creating his own wave of Consciousness  
by force of will

but the wave of Consciousness is like this  
that it is often not visualized at all  
just light or fast or it's static

but this is Consciousness  
this is Consciousness  
contains all factors of all external events  
This is a very powerful predictive system.

in this system it is possible to identify  
absolutely any element of your Reality

in advance  
and at least minimize it

perhaps some element  
it happens for a reason and for a reason  
and then at least minimize  
but retaining some action  
to logically tie in with the next

i.e. you are building the space of your future  
as if folding some things there  
well, based on the principle there are dominoes of some kind of figures  
no matter how  
but you clearly move from one bridge to another

this is your path but at the same time you see clearly  
that in the whole outside world  
your control is so synchronized  
that everyone around perceives this as a natural development

and it is already natural for everyone  
because you are doing the right thing  
you are perceived correctly

then the next level arises  
you perceive this system  
as some kind of external system  
which is completely manageable  
and then it turns out that you have  
next level of control

as God does  
He is behind every level  
leaves the next level of control  
for control yes

By the way, this is not the concept of "control for the sake of control"  
and the concept of "system stability" is actually  
i.e. moreover, there is multidimensional control

behind one management group  
many external control systems arise, etc.

the higher the concentration  
the more systems are included in the unit of substance there  
Well, it's logical and clear

and here it is clear that God creates for himself the Reality of the future  
here's how it is in that analogy

that He is as if artificially  
not that it was artificial, but rather on purpose  
from the point of view of human Consciousness  
brings some action under some  
the action is carried out  
the criterion for His next action  
is all the time control over the outside world  
and the World that He created Himself  
but which is as if at a distance yes

i.e. He perceives the external world  
as a system already created and as if it has no effect  
i.e. the person thinks so  
and God forms human Consciousness for Himself  
therefore God will give to man in time  
it becomes more and more clear

and a person can also do some action  
then this action is abstracted yes as if several  
and distance yourself from yourself  
but at the same time he perceives  
this is an action or some event  
as an external event  
and in principle it turns out like this  
what if this event is external  
then it doesn't seem to concern him

i.e. people leave it in the past  
if for God it is the horizon i.e. the current time  
for a person it is the past

from this point of view, if you think about it  
this is why God created the past for man  
Well, from the point of view of the creation of a creature in general, yes  
the essence of man as a species and the structure of the world

for God  
which can create any design at all  
He could, for example, take and do something similar  
that all are equal  
and that's all

but but then the question arises  
how people differentiate each other  
how do they recognize each other, for example ?  
when there is uniformity  
absolutely well as if to take  
and the same figures to build how to distinguish them

this is exactly the previous system of individualization  
each has its own system of events  
logically it's clear again  
and everyone has a different development system

i.e. the past is necessary for that  
so that people build up the collective phase  
which approaches God  
strives for God

i.e. the principle of universal development  
embedded in that system  
that a person can learn something like this  
build another system in a similar way  
and he just needs to be different  
it should be different  
and therefore the structure of the past is made

but then the past can be controlled naturally yes  
since we know that this is a system created by God  
let's see how it's controlled then  
why manage at all

and then what if the disease, for example, yes  
bring into the structure of past events  
and not to let in, as if to screen constantly  
i.e. the platform of the past is somewhere there, it is fluctuating  
and not let her near the physical body  
and that's all  
she will waver for some time and there will be no disease  
it is enough to just output  
beyond the scope of this design

i.e. the past is a fairly practical tool  
even turned out to be for treatment Yes

and when for example we want to use  
structure well there is a past  
to manage future processes  
then here the past is an element of stabilization  
this is a good thing

i.e. we can capture a picture of the future  
if we either concentrate on the will yes  
this picture is good  
or we take an element of the past somehow  
well, a favorable element  
we take and connect with the future element  
and we get a stable system

which is already forming the World in front of you

i.e. you  
your personality  
your Consciousness  
shaping the outer world  
and so harmoniously that you don't feel the difference  
between the World and the element of Consciousness

i.e. harmonious Consciousness  
harmonious will i.e. active will  
the will that is understood by you  
from the point of view of Macrosalvation  
it forms a harmonious Consciousness  
harmonious Reality

and here it turns out that the mechanism is similar to that  
how does god work  
to create precisely the distant space  
naturally applicable  
and for event management mechanisms

an unfavorable event is possible  
bring out also beyond the platform as if of the past  
and don't let them near you  
This is a well-known control element  
people try to forget or something  
well, although it's almost impossible to forget  
as a rule people can't say so right away

and yet if the mechanism is <sup>there</sup>  
exactly <sup>well,</sup> forgetting <sup>there yes</sup> to consider  
then in principle you can not forget if you know the controls

i.e. for <sup>example</sup> for a person  
who has controlling clairvoyance  
or Spiritual vision  
the concept that he "forgot something" usually does not exist  
he still sees everything  
now it's <sup>like</sup> he can't forget anything, <sup>right?</sup>

i.e. at the moment of viewing he knows everything  
and with clairvoyance it's the same

and here we get the following  
the more concentrated the human optical system is  
the more concentrated his Soul is  
at least in optical manifestation  
which means he is more enlightened

i.e. he has more technologies  
as a rule it can be  
for the implementation of Macrosalvation <sup>there</sup> at least  
and often to implement their tasks <sup>there</sup>  
in a very effective way

the more a person becomes, the more <sup>well</sup> For example it's clear <sup>there yes</sup>  
transfers more knowledge  
the more concentrated it is in the Soul, <sup>for example, yes,</sup> in the light of the Soul  
and the more it can spread  
namely knowledge about the state of the Soul  
i.e. about Eternal development

because the Soul is always Eternal

and it turns out  
that when he increases concentration in this way, for <sup>example</sup>  
Human  
he participates formally and in fact  
in the creation of knowledge about Eternal life about Eternal development

especially since at certain levels  
the difference between the Soul and the body no longer occurs  
in Perception  
then it is clear that the body has it  
the body radiates this knowledge

and now it is enough for another person to perceive  
on your own volitional impulse  
radiation from the human body exactly that  
who has the technology of Eternity  
then another person will take it very quickly  
precisely at the technological level  
because it is a manifestation of will and action  
it always convinces

and when, for example, a person  
having a volitional control structure  
towards you  
sees that your body and there is your action  
has the function of Eternal Development  
and really Forever for example yes  
then he naturally already has a convinced image  
forms , as it were, the following volitional system

i.e. to form the next volitional impulse  
Well, it is desirable to have some conviction, yes  
in order to work precisely for this purpose

or at least have information  
if a person is not convinced

but from the point of view of development  
here are the technologies of my Teaching in this section  
It is important that having determined the volitional structure of a person  
it is possible to bring it to the level of conviction  
that he must be convinced that he must live forever  
the technologies of the Teaching allow this to be done, etc.

and when for example you look at the situation  
here in the distant future yes  
from the point of view of current development  
then always  
It is always possible to capture a segment in the future  
which is favorable for you  
well, practically well let's say one hundred percent yes

i.e. the future in such transcription  
it is precisely the manifestation of your will  
there in understanding how to correctly will in the space of information  
which is basically at the level of the concept of "will"  
the past is a controlled quantity  
or is it the right size there ?

but if there are any unfavorable events  
can be completely removed from the volitional level of control

i.e. the will still allows one to create  
these gateways, these screening systems, etc.

and when we look already into the Infinite future  
then this is the picking up of a favorable event  
this is actually the shape of the future  
i.e. the form of the future is infinite, it is the only one  
everyone has favorable events, everyone has technologies  
namely the Eternal development of Eternal life

and in connection with this it turns out  
that the future, in fact, is the Infinite  
which well implies the presence of certain events  
which means that in general they are visualized and built there  
all this future comes down to just a form of information

and here is this form  
which we can pull from there  
like here  
When pulled, it sort of unpacks  
into the body your physical body

i.e. to, well, rejuvenate  
or there to improve the physical body  
it is enough to reveal the shape of the future  
from the point of view of Infinite development

you need to see the truth when you get closer  
exactly your segment  
and when you see your local segment  
then already approaching here  
you see your physical body

and here is the local segment  
and the global segment  
for God yes  
all Reality for you is, well, private Reality, let's say  
converges at the level of universal action  
again in your physical body

here from the point of view of God and man  
human personality  
God and man have chosen at the level of their will

for example, the physical body of a person  
and their wills coincided  
otherwise no processes of this type would occur

since their wills coincided  
Eternal God who in the information of the will  
puts in a specific information system  
i.e. here we are still dealing with the fact that this is the Will of God

contact with the will of man  
creates a body  
then it turns out to be the will of man <sup>yes</sup>  
is generally speaking outside the system <sup>there</sup>  
<sup>well</sup> at least such as current levels  
or what about human actions ?

i.e. the will has  
at least one of the coordinates of the will  
has an external factor  
i.e. the will always has an external level

and when you start this outer level  
search  
then there is God  
there is an action of external systems  
i.e. again Macro level <sup>yes</sup>  
but it is already regulated by you very precisely

here is a very important mechanism  
what when you enter  
into the external control system through a volitional feature  
all processes of the World are regulated there by you  
It is precisely external processes when

and if you take this point of view  
then access to any event is elementary  
you can take any cell <sup>there</sup> and restore it in the body  
you can even take a whole fabric <sup>there</sup> , somehow <sup>unnecessary</sup>  
for example, restructure into a healthy <sup>one</sup>, etc.

and when you start to explore this level  
from other people's point of view  
then there is a very simple point there  
the will of any person is still health as a rule  
basically almost one hundred percent people want to be healthy  
one way or another, <sup>yes</sup>, deep in the Soul

either it's logical or they express it explicitly

so from here there is a path to another person  
here is the will of man to you  
and since he wants to be healthy  
then you can tell him  
yes, you can always be healthy  
highlight the shape of the future  
from the point of view of Eternal development  
and then you can live forever  
then you have to be at least healthy  
there in the intervals of this Eternal development

and it turns out by will along the line of the person's will  
you can get close to a person  
i.e. God allows that action  
when an action means it comes from the will of a person

from a health point of view  
such will is usually manifested

and then you can move on not only there to health  
you can switch to an event system  
i.e. it is still an access system  
access system not only there  
in some physical processes  
but also in social processes  
some knowledge can be brought to a person's personality  
but in order to get closer to a person  
then he needs to be given knowledge

but we have identified the structure precisely by the feature of will  
from the point of view of Infinite development  
it means a person who approaches another  
by will  
he must constantly provide him with knowledge  
about Eternal development one way or another

then he will come closer to him  
i.e. to convince a person to talk to him  
he must be another person then  
give him knowledge about Eternal development

i.e. the transfer of knowledge about Eternal development  
this is a necessary value  
for the volitional control structure

from the point of view of will  
from the point of view of the structure of the World  
by volitional means  
this is generally speaking the only possible design  
where, for example, it is possible to unite the willpower of different people  
move simultaneously in one direction

and in principle it is known that indeed  
volitional collective management system  
it is always more effective  
or at least in general it can be more effective  
what does the action of one person mean

although I think that one face is natural  
can act  
or more efficient  
or at least there as a group of people

i.e. from the point of view of probabilistic information  
one man's action  
it still can't be considered lower  
than there are groups of people

but nevertheless it means concentration of will in this case  
it is such that due to the fact that people are concentrated together  
they pass on knowledge  
that this collective action is very important

and then by collective action  
Macrosalvation can be achieved  
Salvation of everything and the World  
from possible for example there is a global catastrophe

then it turns out that this information  
still quite important, quite necessary  
because it popularizes management  
from the point of view of Macrosalvation

for example, my Teaching can be simply well teach there  
and can it be further popularized?  
by means of technological methods  
using some special lectures  
For example there is an act of will there  
this is still a special technology  
which allows you to manage

through volitional signs  
according to the signs, they are still more severe

because it may be that a person's will is unambiguous  
and you need to get closer to it, for example  
and give him control so that he lives there Forever yes

so it works out  
what if he made some preliminary decision there  
this is not necessarily the solution  
Well let's assume that it is negative for a person  
he might just be there  
made some life decision

then here's how to get to him  
Eternal Development Technologies

but a technologist who, for example, works like this  
he knows that he is fulfilling the Will of God and the will of man  
yourself or another person

then this is the conclusion  
namely the obligatory Eternal development yes  
to another person  
this is a joint will  
and man and God  
but at the same time, still at the same time  
this is a sign of the complete freedom of another person  
which has precisely the volitional factor of action  
and so, when he is free, he makes a decision

then it works on a volitional level  
when another person makes the decision  
he takes it for sure  
at least consciously completely

and often he also makes the following control into the future  
as if scanning the processes of the past , etc.

and it turns out that this is the level of mutual will  
God's will be there  
human  
and the following persons  
This is the most powerful level of collective management  
where is this sphere or ball of will

which has a kind of super-powerful radiation  
these rays are not visible at the same time  
because positive action is not even that [...] but light is just  
bright light that doesn't put pressure on the eyes

then it's only worth it in this formed ball  
which I just mentioned  
take control at least  
Well like a simple technology  
take it and mentally touch it with your hand yes  
to such a ball  
or put another person next to him

then there is a powerful volitional control  
where is your will to save man yes for example  
or help him there  
and the collective will of the whole World  
including the Will of God  
and then you get the most powerful action  
precisely in the structure of information  
volitional action there is a universal volitional action

and here the tasks are solved very clearly  
precisely according to Macrosalvation

once you get into the Macrosalvation structure here  
you decide instantly  
the basic level of its tasks  
even far in the future  
strategic management

and that's when you work with this technique  
at the level of final management yes  
in this topic  
see that the effect is very stable  
very often it can be fast and very controlled

it is practically possible to work with complete precision

This concludes today's seminar.

Thank you very much for your attention
