

GRIGORY GRABOVOY
The Doctrine of the Resurrection
**Fundamental Laws principles
and methods of resurrecting people in the Infinite Life**
(1)
17.09.2002

Today's lecture is called
fundamental laws principles
and methods of resurrecting people
in the Infinite Life

in the introduction to this lecture
Well , now the phrase defines that situation and reveals
which I will reflect here for the first time
today is September 17, 2002
a completely new approach
means to the structure of the resurrection of people

and this approach is determined by the fact that
what I consider life
just like the Infinite Life

and the analogy here is very simple
because
Creator
It has always existed from the beginning.
self-created
It is infinite in time and space.

due to this
by analogy in the image of God's likeness
Man is also Infinite

therefore we are talking about that
What
a person exists before birth and before conception

in this regard, from the point of view of this approach
so elements of resurrection
Here I introduce the following concept
as "the fundamental Laws of Resurrection
from the point of view of Infinite Life"

they are determined by that
that in order to produce resurrection
it is necessary to determine first
where there is a man always

i.e. from the point of view of the Creator
after all, man is created
from the point of view of the Eternity of the Creator himself

He is always there

and here is the light of the Creator, it is so all-encompassing
what happens is that we have enough
well, a simple criteria system in general
to understand these technologies

it consists of the following
What
The Infinite Light of the Creator
he naturally brings out the human
from the point of view of equality
here are people objects of information in this way
that man is also infinite

hence
there is always a person

and based on this principle of Infinite life
i.e. Infinite
from minus-Infinity to plus-Infinity

accordingly appear
Fundamental Laws
resurrection of people in the Infinite Life
so the principles of resurrection of people in the Infinite life
and methods of resurrecting people in the Infinite Life

also in today's lecture
I mean, I 'll show the practice of working together on management
towards the resurrection of people in the Infinite Life
and that means there will also be answers to questions
and exercises for every day

and then there will be an afterword
here is a rough plan for today's lecture

so the first part is called
Fundamental Laws of Human Resurrection
in the Infinite Life

and this part is primarily related
to the concept of "fundamentalism"
here in the Laws of Nature
Laws of the World
Laws of Perception for example
or in the Laws that are determined by the Creator"

and in this regard it is necessary here
when considering the material of this actual chapter
i.e. I called it "the first part"
and can we consider
and as a chapter, i.e. where there is an initial principle
namely the "head" in material management
there in the knowledge of the material

the fundamental principle should be considered
What
when we talk about fundamental Laws
we definitely give Reality
including the talk about the creation of man

i.e. from the point of view of the Creator
means technologies for creating a human being
fundamentalism
in the image as the Creator was created
This is the fundamental Law

therefore it means a fundamental Law
which defines this design
is what it means
the truth of the Creator is that
What
man is recreated everywhere

it's really so
because from minus-infinity in the likeness of God
it means he is
so in the current time yes
when was he conceived there born
and in the Infinite Life

therefore the explanation is very simple

and from this point of view
we have a fairly fundamental picture
in the knowledge of Reality

because just to pay attention
on this point of view
we have a colossal system of methodologies
Firstly
he is always there
therefore the only question is
to determine its place

and here is from the definition of place
a coordinate appears for that
for example, to examine and understand
next law

The law states that
What
when we look at Reality
with your own eyes, i.e. through your Perception
then there is a part called Infinite
in the Perception of the Reality of the Creator

indeed, it is quite easy to understand
in the plan it means development again
systems of Infinity of life

and this is like a criteria system
it consists of the following
What
we can look at Reality
as if discretely and see the final objects
but in every element of Reality
in each object
there is the Infinity of the presence of the Creator

so we get
what generally speaking as if extrapolating the system
to all objects of the World
we can say
What
basically any thing is there
any level of information
future especially element
even the past of course

it is an ever-existing system

because from the point of view of the Creator, in essence
everything exists always and simultaneously

so if we take this point of view
and look at the Endless Light in all directions
where the ^{time} aspect ends
then we are talking about that
that all you need to do is simply determine the location
i.e. the coordinate associated with the place and location
for example, an information object or a person

in this regard, the following Law exists
he talks about that

What
when we define light in our Perception
i.e. we perceive it in the form of light
then this light is life
flowing from outside
and growing from within

i.e. the concept of "life"
here is connected with the light in this Law

and it's clear why
What
if we know the place
then it is clear that
external light
And
interior
are united in one
we get the human body

and in connection with this
next Development Act
Fundamental Law on the Development of Man and Society
which is related
with the principles of future methods of resurrection thus
that everything follows from the fundamental laws

i.e. you have to be careful here
what is the fundamental Law
it's still a beginner level
fundamentalism, precisely

well for example there is fundamental knowledge there yes
fundamental for example there is mathematics, etc. chemistry and biology

i.e. fundamental systems
treat it like fundamental systems

and that's when we look
for the expiration or presence of life
at the point
i.e. the life that flows
there is such a concept as "life flowing"
i.e. time passes yes
why does life go on
what does it mean, some level, like for example there is a river of time there yes

and when we begin to analyze the concept of "flow"
we come to the following fundamental Law
resurrection of people in the Infinite Life
which states that
What
when we look at moving space
then we build a person like this
what is minus-infinite option
i.e. before the fact of his being actually with this person
this option is in the person himself

but when we see a person
we know that he is Infinite
i.e. again we get a solid glow inside

but when we relate the space of movement
with space for example development
with space let's assume time yes
then we can definitely say
What
a person has everything
i.e. this
self-perfected
self-created
is practically a closed system there
which can create any creative Reality
just as the Creator created Reality

hence
signs of finding Reality, let's say it this way
in the person himself

they consist of the following
that he needs to know movement
this is the essence of the movement of light
the essence of the movement of things
movements
to realize space as a moving structure
even if it is calm

for example, if you take a cube of some air, yes
let's assume that there is one in front of me
conditionally, at a distance there, at this small distance from me
at a distance of a meter
then in this cube
there is a movement of thought

I take a cube and select it
i.e. this is the same movement of thought
although in reality, for example, I don't highlight the cube
i.e. I don't draw it, for example, etc.

due to this
everywhere we can see a sign of movement

and that's when we talk about that
What
motion highlighting
this is the truth in re-creation
and the Truth of Eternal Development

that concept of "Eternity"
when we talk about Infinite Life
Eternity has a very specific local structure
as if like a small brick creating
namely the structure of Infinity

because
we have Eternity as a static system
Infinity is a dynamic system

so when we have
for example, in your Perception of dynamics
for example the dynamics of Eternity
then we have the element of Infinity

in this regard, the following Law states that
what when you play

For example as if an intellectual function
development of civilization of a specific person
then its creation
from the point of view of resurrection
consists in the fact that
that all the reconstructed elements of information
this is also a human structure

after all, it was created by man

really clear
What
everything that man has created
has something to do with it

and in accordance with this element
we have that fact
that the resurrection of man is simply a matter of following
its logical level of development
[...] we find it

and therefore a sign of the definition of a person
from the point of view of this fundamental Law
resurrection into eternal life

is what you are considering
all coordinate systems
which have a general relationship to humans in principle
some kind of reproduced labor
intellectual work
just work there in the field, let's say

and from this information come to the place

because from all the information it means that
what is created directly by man means
and take for example from all this information
go to
to the information of the whole world
well, basically what is considered as such
logically created by man
physical labor
intellectual
which is as if reproduced on a physical level

then the information will become a very small part

here in the information of understanding let's assume the whole Reality

and in this regard, the search turns out to be quite simple
that the coordinate system has been identified
and a sign of human information
it takes up very little space
or is it always present

another fundamental Law follows from this
The Law of the Creator's Presence in Human Action

and here we define the position
that this Law is defined so
that we act as the Creator originally acted
i.e. from the conditions of infinite life

but when we come to contact systems
well, that is, a person is conceived
then it starts to move on
at the level of interaction with other people, for example

then here we have a discrete, as it were, exchange process
i.e. people interacting with each other
give a configuration where they are connected
like the events of the past that I was talking about
search for a person through past characteristics of events
and the future

and we make the future like this
so that it would be infinite

hence
next level
define the infinite man
in any iteration of future development
this is a special fundamental Law
and it is formulated as follows

man in the infinite future is defined as follows
what is the next step for this person
any person
this is this person

The law is formulated quite simply in sound.
but if we go back to what I said
What

the light of the Creator is distributed everywhere and evenly
it is clear that in the final action
concentrated, precisely the light of the Creator
this is really that person

because it is the light of the Creator
and it contains the future of any person
in an infinite future

Thus
we found a man in the infinite future
proceeding from the light of the Creator, as if coming from outside
and this is the light of the Soul

if you listen for example to the sound of the Soul
specifically coming from the physical heart, for example Yes
or from the Soul as such
located, for example, in the physical body of a person

then we see that the light of the Soul
this is the creative substance
which has almost everything

i.e. we have the entire technological level
fundamental laws
from the point of view of infinite life
from the point of view of resurrection in eternal life

and this spectrum of Laws is like this
that we can quite well define truth in this way
what is the truth of the development of the Soul
is this a discovery or is it a mutual co-discovery
for example, in a mutual, as it were, co-search
mechanism already embedded in the light of the Soul
this is really so and it is understandable
because the Soul is created by the Creator
and the Creator knows all this

hence
naturally all this is there

and here the path to the Creator opens
i.e. we see
What
created by the Creator
this is the Creator

and when we develop
exactly in this direction and in this regard
then the level of development of Consciousness is like this
which is often as if for the linear development of Consciousness
seems to be no particular need

i.e. from the point of view of these Laws
infinite development

Consciousness can always make a resurrection
at any level of your status
because it is truly a divine entity
just like any element of an information object

therefore, since he has a level of connection with the Soul
therefore the mechanism is ready
the main thing is to simply apply and implement it
on target

that's why it turns out
that we have a principle of development
associated with the principle of development towards the Creator in that
that the truth of the Creator is contained in that
that when we look at Him
we see His way
which may also be our path

i.e. we can quite easily follow this path
because He is the way

and in connection with this we can quite go
knowing the fundamental truths in knowledge
fundamental systems
for example in the distribution of information

knowing that when we, for example, suppose we are talking about that
what we need to know
as if the root fundamental systems of the World
for resurrection
and to determine the infinity of life
then the task is to save everyone
here lies in knowledge

i.e. from the point of view of my Teaching

about Salvation and harmonious development
the task of saving everyone is a fundamental task

and we are here [...]
from the point of view of the infinity of life
solve the technological system
aimed at revealing the Laws of Infinite Life

after all, it's really quite simple
to reveal just about everything
The Law of Infinite Life
and then you feel very confident
from the point of view of Infinite processes

and then it turns out that the element is the element of resurrection
this is not a one-time job, this is not some kind of search
some kind of stressful system
what you need to do, for example, to do something on time
there faster

because in reality
everything already exists and is there
from the point of view of this approach
everything is there

therefore it exists I am now determining
the next fundamental Law of Resurrection
from the point of view of Infinite Life

he says that
What
when you see the event factor
you see first of all
Divine factor of the event
and you see with your Soul, i.e. from the Creator

here is the factorization of the event
what we call a factor
how is the level of factorization perceived

i.e. when we look
on some object of information
we say "this is this and this is this object"

here is the selection factorization
i.e. we record the location of the object

in general in Infinite processes

and when we want to highlight
namely the Infinite Process
for practical action
we factorize

so here is the factorization
i.e. the action of finding
this is already an act of accomplishment
the next law is this

what is the accomplishment in the World
means Eternal Infinite Divine processes
processes from the Creator
this is a structure that exists
already first of all before the accomplishment
and always exists
therefore it will always happen

this is understandable from the point of view of that
What
the object is always there

the next law is this
What
We have such a development of civilization
which has a sign of the future
i.e. the light of the future
extends to civilization

it's understandable since there is an object there
as if it fits the shape of future events
and implements

therefore finding for example an object
in the development of civilization
that's exactly what I mean in this case
consists in the fact that
what can we learn from the signs of the future world
find where he is

next law
when we see
as a factor of light in your Consciousness
it is the light factor
be careful here

then the factor of light denotes the presence of the Creator
in the Eternal presence of man

it's understandable because
that even reflected light
this is the light of the event

therefore we have in this light
almost ^{any} structure
which characterizes
as the person himself
and the principle that there is a Creator here
it is the action of the Creator
The creator is clear that he is everywhere
but where does He act?

based on this
and delving into the intricacies of identifying a person
always being, ^{for example,} in Reality
we can say
what is the event factor ^{let's say}
which is reflected in Perception
this is what we perceive with the Soul

and from here we can move on to the next Law
which ^{means} it is formulated quite simply
but nevertheless if we look at it from all sides
then this is a very technological Law
which gives the ability to do resurrection
just ^{like at} the level of search engines
i.e. the level of the search query

i.e. you need to do a resurrection
you say, ^{for example,} you set a task
Where
and you get in the search engine
immediate action
as directed
and into the endless past
and into the infinite future
therefore we are talking about the present

The law is as follows
present
existing in the dynamics of development
this is what includes

all entities of the manifestation of the World
and also the single essence of the Creator

and based on this we can quite well
it means only using
as if it were an element of presence
i.e. the present
identify
everything infinite in terms of events
and determine immediately
by way of identification, as it were
i.e. correlation with Reality
define the next level of Reality
i.e. practically resurrect

and when we have such a status, for example
real

then we can look at process management
as the future
and the past, moreover, infinite

because based on this action
we see that the infinite [...] for example the past and the future
this is an element of the presence of the Creator
here and in the action of targeted development
i.e. in the goal of infinite development there is of course a tool

The main thing now is to determine the coordinate system
it turns out that it's near you

and here is the definition of this coordinate system
consists in the fact that
that we can formulate the following Law
What
any human action
any action of any element [...]
aimed at that
to be organized
infinite development system
given
What
the object is always there
i.e. it is not destructible

and here is this Law

to view it follow
and from the point of view of resurrection
this means that all people
i.e. all actions in information elements
they are aimed at resurrecting a person
i.e. make it present again
i.e. to return to a normal state of affairs

then the question arises
why do forms of reproduction of this type exist, for example
what is then the element of conception yes
there is an element of human development

from the point of view of infinite life it is clear
in the future
what does it mean to have technologies there for self-regeneration
event management
infinite future is just a technological process
as if the principle of only technologicality
and application of technologies
but from the point of view of the infinite past
why then does there seem to be a sign of a break yes
this element of growth is an element of development

and if you look at my education system
there is, for example, a principle
from minus infinity give information
future of man
then from minus three years
up to minus one year, etc. yes
then endless development

according to this system of education and understanding of the World
it follows that we are talking about what we say
how we speak to the present
always present

and that's when we come to this element
it turns out to be a sign of presence
this is an expression of man's purpose in this World
he was born for that
to make one's presence known

to show oneself is the task of the Soul yes
manifestation
after all, at one time, for example, according to data on reincarnation

the talk was about man improving

from the point of view of the possibility of global destruction
the principle of improvement is that
what we need at least
prevent global destruction
hence
to reconsider the structure of Reality in a fundamental sense

and from this point of view
through the definition of infinite life
we can well consider this structure
and find specific technologies
so that there would be no destruction of, for example, the civilization of the World

and these technologies give a fairly simple answer by the way

when there is infinity
you can always find an object
we can find it there in an hour

that the flower grows there after a hundred years
the tree also grows
or there lives the Infinite Man
he lives happily and he is healthy

then it turns out that it is a sign of action in general
is just a mere
balancing the point of view
balance of viewpoint
based on the knowledge of the Laws of Reality

Well, if we consider the physical processes in the World
then let's assume many physical laws
this is one of the points of view
which was simply being developed

and the point of view of a kind of collective Consciousness
here is a sign of manifestation, this is the development of a point of view
on the movement towards the truth of the Creator

and the truth is very simple
Eternal Creator
It gives the path of Eternal development
how very simple

a person with technology
or there is a Creator who has this structure
so he knows how to achieve this structure

and here we come to the fundamental principles
in terms of interactions of development technologies
with the structure of the Creator
with the Creator himself
with a person

and these principles reflect that
that from the point of view of fundamental Laws
principles are a fundamental system
fundamental
but this may not be the fundamental system

because the fundamental system
are the fundamental Laws of the World
fundamental Laws of the Creator

and when we talk about fundamental systems
i.e. about principles

or for example we are talking about methodology and management

after all, it is fundamentalism in the knowledge of the system
gives , for example, a specific sequence of methods there , yes let's assume there
or gives fundamental systems

and the fundamental system
often it can be as if it is not technological
in implementation

because yes, you can know the principle
that the light, let's assume, well, let's assume there it shines as if linearly, yes
but to know exactly where the beam of light will reach
you need to know the methodology
which comes from the knowledge of the fundamental Laws
Well, for example, there is the spread of light

in this regard, if possible
look at the control system
Well, first of all, how about the system?
which has the ability to mean restructuring

because with the development of the Laws yes

with the development of civilization, let's say, there
with the development of various elements of Reality
we have that the next level can be like this
which includes everything that came before
and we don't talk about the previous ones in any detail
because we have to move on

i.e. the previous one, well, it exists
for example or at that level yes
or autonomously with the purpose of as a methodological system, let's assume
but the next step
may have absolute novelty

and in connection with this
from the point of view of the elements of knowledge, including

in this regard, if possible
when we talk about novelty in the applied aspect
i.e. if we talk about what we need to know
Fundamental Laws of Development
and then we have the following levels

then from the point of view of fundamental Laws
other levels are levels

which are intended as local systems
in order to implement technologically
some positions

and from this point of view it turns out
what for example are the fundamental systems
these are like vector systems
which from this point of view
have such [...] specific

from the point of view of, for example, minus infinity
up to the present time
this means one yes let's assume a fundamental system

in the current time it is different

in the future
it can be expressed differently

and the fundamental Law remains one

in this regard, when you look at Reality
through the eyes of the Creator when you look
from the point of view of fundamental systems
Always watch if possible
to the truth of the fundamental plan
which is the basis
and which is a production
for example the next level of development

when we know the fundamental systems
then we can have many different methods yes
methods of principle systems
and at the same time we are always in a stable position

and here is the next Law he talks about
What
stability in endless life
the necessity of resurrection lies in the fact that
what when we say
about the Eternal Presence
i.e. the infinite presence in fact
any object of information

then this is presence
this is that Divine peace, i.e. Divine light
which gives us the way

coming from this object i.e. from this person
example, for its restoration
by his movement
for example back to the community

and to return it back
into the community of people
we need to define the goal
i.e. why is it from the coordinate system
first of all, yes , it came out
and his task is simply
for example, like in the conversation there on the phone
You can call to make an appointment
and he came
because that is the purpose of the conversation
what needs to be met

and from this point of view what I am saying
for example about the world community

in general, about the development of civilization
and that this is the manifestation and realization of the goals of the Soul
on the movement towards the Creator

here is the manifestation, i.e. location and contact
often included in that
for example, the one who needs to be resurrected
he showed interest and concern
in achieving the goal
into infinite time

that's when we talk
about the realization of goals in infinite time
we come to the truth that is already universal

and the universal truth is that
what are we talking about
and when we reason
for example about the fundamental truths of the Creator
or tasks coming from the level

then it is just as universal
for example, let's assume there is a concept of "gravity"
which operates near physical bodies

i.e. and when we talk about the universal truth
then in principle
light of fundamental truth

it is such that we can always have
the same systemic result
in management
in management, for example, for the resurrection of people

therefore if we define the criterion
as a dynamic criterion and a specific topic
What
there is always a presence from outside
i.e. from minus infinity
in the current time it is also natural
and in plus-infinity

and setting the task of attracting, for example, the resurrected
from the point of view of the declared goals and objectives
we must make universal [...]

and here is the next Law he talks about
What
universal goals from the Creator
this is unity with the Creator
in infinity
in development

Quite simple indeed the Law
but in essence it reflects
the purpose of manifestation the purpose of coming yes
precisely through technology there are conceptions
existence in society
promotions
development goals

and in this regard the situation here is as follows
that when we talk about universal goals
we mean
and the goals of the departed
and the goals of the infinitely living

i.e. one integral - universal goal

which actually says that
What
the presence of the Creator in society

i.e. that the action of the Creator
This is also the human path

i.e. the usual, in fact, including the human path
which is personified by that
what a person must learn

and so when we speak
on the universality of purpose
we definitely have each one
in general, even an elementary action
for example, a human creator
when he does something there
just on a regular one as if in a social sense yes
for example, goes to the store and does some actions

and when we through these actions
we see the universal truth, the infinite truth
then we know the tool

who is always near us
who is always with us

i.e. any action coming from you
this is a tool
which necessarily decides
the process of Infinite life

i.e. Infinite life
this is the absolute and universal Reality

here they are already integrated, i.e. connected naturally
and principles of finding Infinite life
i.e. permanent presence at any point as I explained
and what is action as a tool

and the next Law he talks about
that when we see action in ourselves
and our actions
this is the truth of development
and the truth of Infinite Life
then we see this
everywhere
around
in all
and in everything

indeed it is quite simple by analogy we
if we know how to do something
and we know when we do
what are we doing this

it's very easy to transfer to others
i.e. understand from this point of view
everything else

and therefore quite common
what if tissue regeneration is happening there
resurrection
event management
from a manager's point of view this is normal
and he sees those around him in this light
i.e. he thinks yes they can do it
what is there not to be able to do, he can do it

and therefore it turns out

that we can teach others very easily
all you have to do is tell us about yourself in this case
as much detail as possible
and well, try and take it into account
the point of view of others
therefore there may be another formation there
or they are busy
that's all there is

i.e. from the point of view of another education
they are the same but education for example
maybe, well, let's assume there is a different profile of activity there
it may in some way just lead to that
that it is necessary to agree on the language of contact yes
that's all

and in connection with this it turns out
What
the knowledge already exists
they already exist
and everyone has them

therefore naturally there won't be
possible global catastrophe
everyone has this knowledge
and this knowledge is fundamental
this is life itself
there is a norm from the Creator
this is the Creator

therefore elements of possible, for example, global destruction
why are they given, the question arises
why does civilization come to this

what do we mean we collide
with the possibility of global destruction

so here is the principle as I said
that the principle can be vectorial
i.e. the same principle
he can speak for example
about different directions

because if we have
let's assume the level of output, well, information
to an event, let's say from infinity

then the principle of disseminating knowledge there
it consists of the following
somehow attract knowledge
at the current time

those. first you need to do some thinking
in principle, it turns out to be a very large amount of knowledge
past

and if we talk about the principle of knowledge again, yes
we mean the point of view
i.e. the principle is always formulated in the same way
those. principle of knowledge

but if we mean the future point of view
then we get it right away
because we can see the future
from the events of the future coming to us
the future is easier yes in Perception
it will be realized in a second
it's very simple in a second it's already the future
and we understand it is close
and it is not difficult for the Soul to perceive

therefore when we talk about principles
here we must keep in mind the vector nature
but in connection with this
there is a fundamental Law
which is not a vector

it is comprehensive
and at the same time carries within itself
Creator level
as the level present
in His knowledge
everyone has

The law is as follows
we have universal knowledge
and everyone has
your individual knowledge
in pursuit of universal development
to Eternal Life
and Eternal life
this is universal knowledge

and when we talk about Eternal Life
how does o mean well, like a static system of Infinite life
it turns out that individual knowledge
this is the Infinite Life

i.e. the presence of a person in Infinite life
this is the revelation of his individual knowledge

so resurrection is quite simple
if you even remember there
human traits yes
or some characteristics

[...] Name
because individual knowledge
he knows himself, he knows his traits

having gone this way
we resurrect it very simply

so when we talk about that
what does resurrection practice mean
based for example on fundamental Laws
is that we have to move
from the point of view of, for example, the truth of knowledge

then the truth of knowledge is contained in that
what do we know where we are
and then we know what to do next

The following Law says that
What
when we move into Infinity
we always know for sure
what do we want
where are we
and we know for sure
about the presence of the Creator
in a specific place
in a specific action
and how He gives us knowledge

due to this
when we talk about movement, for example, to Infinity
it's quite simple
This Law is explained in the following way

that there really are super high performance driving characteristics
into Infinity
where everything is
everything is known
each next element

you can always find out
what was in the past, current or will be in the future
very simple very clear coordinate system

being in this system
always known
what to do

It's only worth it from this position
consider Reality
and participate and work in this Reality
we have a comprehensive Reality
which is absolutely controllable
there are no unsolvable problems there

and in connection with this
we have a very simple light
as from a very distant level of Reality
coming towards us
where we have a completely simple level in events
What
any action is knowable
even in that case
if it is an elementary action
I mean everyday action
action of cognition
Macro Rescue action
and it is knowable

and here a special series arises
fundamental laws
which talk about that
what is knowledge

external knowledge is technology

i.e. it's one thing to do an action
another thing is to know it

that's when we talk about that

that we need to know the action
then the fundamental Laws are as follows
for the resurrection of people

action cognition
this is a reproduced action
in the Infinite Future
It's really very easy to understand here
what if we move away to Infinity
and the action will be sustainable
we will find out everything about him
and at the same time we as the structure of our manifestation
we have ourselves in an infinite form

very powerful law
containing Infinity personally you

and if you are Infinite
then your light will make others infinite

i.e. resurrection in this case
just to draw attention to yourself
from the point of view of knowing one's actions

The next Law is quite simple
and talks about it
What
when we have a practice such as Salvation
in the form of specific collective actions
all people
information objects
then individual practice
this is also a unique and comprehensive action

Quite clear
from the point of view of the previous Laws
What
The Creator who shines on everyone
and creates the principle of the Macro- or something of the glow for everyone
and everyone shines

therefore he acts individually
spreads light to everyone

so one can save the whole world
when he knows that it is about peace

who is saved in any case

here are the coordinates of the obligatory salvation of the world
i.e. Eternal development and Eternal presence
they are contained in that
what why is known for example that exists
well, normal Infinite World
everyone is developing endlessly
everyone is healthy and happy
because it is
since it is in Thinking

and we come to a very simple truth
from the point of view of the fundamental Laws of the resurrection of people

This truth is based on the fact that
What
when we talk about resurrection
from the point of view of Thinking
then we can only talk in that case
if this really exists

and when we, for example, base ourselves on the practice of Thinking
as on the glow of an individual object of information
to all objects of Reality

there is a principle of interaction of information

i.e. I can think about an apple
the apple lit up
and in principle it also lit up a person, for example , let's assume
it lit up, let's say , some nearby apple there

and here is the reflected light reflected light
which falls on any object of information
this is the principle of omniaction
only one unique object of information
and the principle of obtaining external knowledge

and that's why it turns out
that external knowledge is like technology

she is in the primary impulse
i.e. in the primary status of creation of actual matter
creation of an information object

and when we understand this status
i.e. we look at ourselves from the outside
then we see the grain at the same time

i.e. when we look at the grain
and we see ourselves from the outside
this is different

but if we look from the outside
and we see the grain
this turns out to be the third
when we have an interaction between two _{yes}
we can have infinity
but we can have Infinity
and have only one

in this sense we must
look at the world through the eyes of others
and the eyes of those around me as I said
it could just be your eyes
because your light will spread
and has all the information external

therefore the selection of just
one unique individual characteristic
in action in development
This is an absolute solution and a solution to the problem

i.e. your knowledge alone is enough
any just any
light signal not to mention special knowledge
and you can achieve the resurrection of man
in the Infinite Life
Now I have proven it

because the light of Thinking which as I said
may come from an apple
can get to physical Reality
maybe just as unique _{yes}
not necessarily an apple
man in thoughts
any element

therefore it becomes real
because he connected
connection principle

and when we talk again about the principle
it can have a multi-vector nature
there may be a variety of connections yes

it would seem like a connection
it can also be diverse
i.e. a set of connections at one point
one into the other there
or one there with many

therefore, again, a fundamental Law is needed here
the principle only gives an approximation
i.e. the first element

and here is the fundamental Law it states that
What
any element of information
reproduces any other element of information
but in this way
what is the dynamics of infinity
is located between them
and in them too

this is precisely the dynamics of infinity
I have deduced a very important characteristic
technologically very important

because when a person works and counts
that this is his individual characteristic
this is the dynamics of infinity

something internal and something that aches the Soul
this is the dynamics of infinity among other things
if it's soul-stirring
It's better for happiness to ache in your soul

and in connection with this
we have a sign of this individuality
as a personal action aimed at
again universal salvation

because it is
it is in the future

We are not making anything up here

i.e. this is i.e. this light it comes to us
and it is present in almost all dynamic systems
for example, well, how can I say that?
that it gives a certain shade and a certain hue
shadow of light i.e. light shadow
a shadow that is not a shadow

she is coming to us
and we are in the whole future
we see this perfect Infinite World

therefore we still have a glow from it
we go through it
when we make management through Saving All

It's one thing to think that we need to load it
i.e. create ^{yes}
then make the control
how to waste time on creation
and it already exists
in infinite development it already exists

so the question is
to just walk down the streets at different times
either we build a city first
we will make sure there are communications
and then we'll walk along it

it anyway ?
where there are already communications
there is everything
there is even a way
somehow get in and go further
with experience accumulated for individual action

therefore individual action
according to the fundamental law about the meaning of the resurrection of people
consists in the fact that
What
we are the light of Truth
infinite dynamic Truth
about Eternal endless life
where is Eternity
it's just the static of infinity

this light

This is also a building material, in fact
i.e. the basis
for the commission and for the formation
individual action

I am now very attentively very widely
I'm considering
sign of individual action
because individual action
this is all you actually do

if you know his Laws
its presence and distribution factors
then you have
a very serious system, actually fundamental
and it really is fundamental
in any of your free development
you are free
That's why
that you know everything

and then you can be in your freedom
assign as characteristics of individuality
all information objects

as I said, the one who knows how gives to others too
when you are free and you can
you can give these signs to everyone
and they can do all of this

i.e. complete absolute freedom of everyone
provided there is universal unity and aspiration
to the Creator's goal
to endless life

and here it turns out
what is endless life
endless development
this is true freedom
and this is everyone's free choice

because I explained it based on individual characteristics
in law
individual development

and here is the Law of Individual Development

from the point of view of the resurrection of all
it is concluded in that
I mean with infinite life
What
we must unite
for the purpose of even greater freedom for everyone ^{yes}
an even greater level of creativity for everyone

and with an infinite number of events
it's quite simple
because it is infinite
this is something that always has common ground

and therefore there is always
solutions by the way

this is actually the answer
to the task of developing civilization

if the task is global destruction
the task is that, well, I mean
the problem as a vector system
the forces ^{do} have a task, for example, those who ^{are well} concentrated
there in the form of nuclear warheads ^{and} some forces there

then the problem of the inverse type ^{is as if}
it is also called as a task
it is aimed at that
so that there is no global destruction

and in connection with this this task
this is actually a solution to the integration issue

Well, if you look at the part where I said
"and why ^{does} this situation exist?
what are global destruction systems"
here is the answer to this part that I am talking about now
This answer takes the form of a fundamental law

we solve our problems this way
so that they were
comprehensive
universal
gave endless development
by analogy
with the Law of Development of the Creator

how the Creator evolves
when He is everywhere and always
It develops endlessly.

the answer is very simple and logical
he is in thought form

and when will you learn
to make from thought forms
absolute proof of Reality control
then the transition to action on the physical level
it will be just a technical element

but I actually proved it now
from the point of view
such as management constants and universal Peace
and as you noticed, I introduced a thinking component

therefore if I can think so
so it exists
at least yes
existence is only because
what i think in one place
therefore it is stable

and so the situation is as follows
that the light of this universal development
common to all
this is an action directed at oneself
and through endless life

when I say
what to do first Macro regulation
then you do private management
then any private action
it's still connected
with all the elements of Reality

and therefore it turns out
what is your action
i.e. what you manifest in the form of action
in the form of a certain level of management so let's say

this level is like this
what do you have in front of you in general
practically united
generalized comprehensive version of Reality

where is the Creator
there is your Thinking that determines Reality
let's say a fragment of collective Consciousness in fact
which is Consciousness
created by the Creator anyway

if from this point of view
look at your actions
then any reproduced action
this includes what you have recreated and created

so when we talk
about the system of control for example
or a system of Perception based on that
what does it mean we need to do yes
i.e. in order to solve problems there
universal salvation
Goal matching tasks
and the correspondence of the goal to the tasks of the Creator
and also goals and their goals

I have separated the true goals here
they are visible quite transparently
when you come to individual action

then here we see that
which is already in fact in a generally applied aspect
when we apply these Laws to the essence of management
we see that these Laws can be implemented in different ways
but always with the same result

you achieve infinite development
that the element of resurrection
that the principle of one's own, for example, infinite development
and giving such a characteristic as knowledge
resurrected
that the resurrected can Eternally develop
and the differences disappear

but the differences from this context
it's clear why they disappear

because everything is there initially

i.e. no one from anyone with anything in principle
essentially no different

so when we are in the social aspect of society
we introduce the principle of a kind of collective Consciousness
related to that

that we, well, as it were, simply re-manifested his presence
we see the true will of the Creator

He is located

and He wants it

i.e. He is created this way and this is what he does

we must do the same accordingly

the principle is very simple and quite clear

giving true real freedom

each personality

and giving a fairly good level as if or what?

if you look at it from the point of view of the principle

reactivity level per system

because if we

well, on the development system

if we consider this principle for example

from another point of view

those. principle stated

as a principle for example of the development of infinite life

we will look at it the other way around

as if going from the general to the particular

then every element of your action

i.e. each element is actually in general light

this element is basically

it turns out that it contains a level of universality

but when we move to the individual level

i.e. if we, for example, look at the general system

then the fundamental parameters

they can be varied

but with an individual system

only the fundamental Law works
in this case
in endless development

i.e. when you know the fundamental Law
then you have Infinite status

of course, for example, a fundamental system
there is a methodological system there yes
there is a universal management system there
they give characteristics that are often quite useful
if this is a technique or there as if a control system
special through Consciousness
then we get a dynamic action
which is based on certain technologies

but when do you know
Fundamental Laws of Infinite Life
you always know that it's just
the task is to find the infinite man
and you calm down

i.e. this task is quite simple
but here it is for example, some big park
anyway, the person is sitting somewhere
you, yes, you can walk through this park for a long time or shortly
but he still sits somewhere
and you will definitely find it

hence
a sign of absolute staticity in development
and naturalness in action

as I said, naturalness also comes from that
that even Thinking is already a designated action
and the light of creative Thinking
this is an accomplished action

unlike light, for example
if you can't even name it
what is this light
if, for example, we are talking about destructive systems
these are rigid, shadow systems

and when we talk about, let's say, the concept of "light creation"
then this is the true light yes

that which is the light of Infinite life
this is still a different light

it is filled in every element
true creation
it is filled with Infinity
you are in a state of absolute peace

this knowledge gives accomplishment
i.e. a calm level of knowledge
he gives fulfillment

in the end that man from the park bench
will rise and come into this world
because further on the light generally decreases

and when you are in this state
and you know yes in knowledge
then an action happens that comes to you

worry about that there
no need to force it
It's better not to worry at all
and to know

knowledge is precision
knowledge is attainability
and this knowledge is a must to accomplish
in fact, in a certain sense
absolutized from this point of view
Pictures of the World
from the point of view of infinite development

and I just brought it from one side
logical arguments
which have a system of actually generally absolute
from the point of view of infinite development
evidence

you can see
what if we consider a logical , well, sort of system
there is a principle of management of course
i.e. I look at Reality
in the form in which it exists
and I pass on this knowledge

and also that contact
logical system with Reality
gives that logical thought already contains action
originally mine

it contains
I see the surrounding system there

That's why I even think logically
I am still present in Reality
and everyone is also present

therefore logical thinking often has
and in matters of resurrection it is almost certain
especially with super-fast resurrection systems
very rigid fixed nature

and here is the next Law that says that
What
when do we mean use
well, normal yes Thinking for resurrection
we are creating a system of unambiguous actions

pay attention
what you don't think often, like, well, multifactorial
and with high-speed resurrection systems
from the point of view of infinite life

it turns out that there is a principle of multifactorial level
from the point of view of a kind of branching of thought

but if you look
for logic and development of thought
it is clear that nature is consistent

and then it turns out
that any Thinking leads to resurrection
from the point of view of Infinite Life

and it turns out that there is no such parameter as such here
that there is some kind of wrong path there
or there is some kind of incorrect system there

The world is so rigid in this regard.
what did i say
that the glow from the future is such

that this is just a kind of direct path

the path to salvation is very straight
there is no need to do much there, isn't it?
systems of some kind that are very complicated to manage

because we are already saved
in the Infinite Future we are already Saved

what's wrong with the future is that it's just infinite
that's why it's always there
i.e. we are always in this state

and from this it follows
the next fundamental law
which is like a summary
preceding the Law, for example, by Infinite Development

The law says that
What
we are always there
universal salvation
our actions are as follows
that we will definitely do it
