

GRIGORY GRABOVOY
The Doctrine of the Resurrection
**Fundamental Laws principles and methods
resurrection of human creators**
24.09.2003

Hello again
the topic of today's seminar
is my Teaching about the Resurrection

at this level I show first of all that
that any object of information
he is fully recovering

i.e. the topic is essentially broader
in terms of distribution
fundamental principles of the Teaching
on any information object

at the same time, much more is considered
certain let's say there is the side of the world
where is any manifestation of God for example yes
at some specific point

for example, if we take my Teaching about God
and about His presence
in any as if investigative element of Reality
through the structure of Your Soul

then here we can quite say
that where the appearance of God once took place
it is essentially preserved there

and here is that option
that can always be restored
generally speaking, any object of information
it is precisely connected with the presence of God
at any level of information
in any action
and in any element of Thinking

that's when I crossed over
on the structure of Thinking
then you can say

that the Thinking of man is the Action of the Body of God

when we consider such a process
it is clear that the Body of God is logically in essence
Well, let's say it this way
well, in a unified version, I guess
it's logically clear
that God is present in the Thinking of man
for He is the Creator of everything
including, as it were, the fabrics of Thinking

but when we look at this process
from the point of view of the Bodily Presence
then we find the ratio
with your own body
and with the structures that exist
there for example inside us yes
Well let's assume there inside the cage

if we look at the cell more deeply
it is clear that for example the atom that exists there outside of us
Well let's assume there is a carbon atom
it also exists in humans
it is the carbon atom as a unified system

it turns out that by such logical reasoning
we come to that
what is the external environment
it is also quite unified as it were
she's pretty neutral
and it is universal
Well, from the point of view of logic and reasoning

further when we begin to develop Thinking
into the realm of God's presence
it turns out that the external environment
it is still quite fixed

i.e. to look at the World from this point of view
well then let's say I put my hand on the table there
molecules and atoms touched
for example with the table structure
and it turns out that I felt it
as if the external structure of one's Perception
where at the molecular level , there at the atomic level
it's basically one system

i.e. I found yes at the logical level of similar systems

it turns out that the fact of God's presence
here it is expressed precisely in that

what does God mean by created the conditions in general
absolute as if rigidity hardness unambiguity
some action
coming from any generally elementary
your actions

and when you, for example, move on to further reasoning
then it turns out
God as an indestructible, so to speak, Object of the World
Information object
and in general the Founder of the World
It has almost absolute rigidity.
in the control system yes
from the point of view of human perception

i.e. where God is
is only God there
in this place
this is so as if it were an absolutely rigid system

but in the human mind
absolute rigidity is just that
borders
with absolute softness
i.e. system availability

i.e., the tougher a person is, to put it simply
the more rigid the system, yes
the more rigid the more unambiguous the thought
the more passable it is

Well, it's clear that the systems are more rigid
pass through softer ones

but if we proceed from the accuracy of such
that a single-valued system is like a human being
is present in this place once
then rigid systems can pass
through any other systems, generally speaking

because in the world everything is like that

that each level
has only one, as it were, number, one meaning

there is this person in this ^{yes}
at this point ^{let's assume} there is another one
or is God ^{there in this place}

i.e. when you start
this system is analyzed exactly like this
then you understand that in essence
there is a super hard level of God
^{Well} let's assume that Jesus appears ^{there}
which goes ^{well} there are already some obstacles ^{there}
after ^{for example the} resurrection
as he went through seemingly rigid systems ^{there}

if you master this level like this
then it turns out ^{well, at the level, for example , that}
how matter works in Shambhala
a person can basically walk through walls ^{there, for example}
but at the same time the walls are really real walls
it's just that the level is ^{like} secondary hardness
is located in the wall itself

^{Well} for example, to pass through a wall
we need to find a level ^{that is kind of} rigid and supportive
where the wall basically holds ^{up} to itself
i.e. where she, ^{well,} sort of recreated herself, ^{yes}
by analogy with how the Creator created himself

when you step on this step
then in principle ^{it means} you can go through the wall

i.e. unambiguity and, as it were, absolute rigidity
^{for example} a person ^{at a given point}
speaks about that
that we have control over external matter
at the same time, the controllability is already structured
since controllability is eternal

^{for example,} in my Teaching about Love
I'm showing
what does love have
a completely definite unambiguous trajectory
but this is a sensory level

which practically turns into material

i.e. Love is actually
at the level of remote perception
it is a concrete matter that is indestructible

it's clear that you can build on it
indestructible world

for logic
i.e. the projection phase of Consciousness or something
[...] Consciousness catches
precisely as if a rigid-material level
and this is then expressed in that
what do people mean they can give birth to children for example yes
and at the same time we can say
that from the absolutely rigid logical phase
there are people who develop dynamically

but by analogy with how God created the World
we can say that means they have the property of Eternity
because we have such a fragment of Thinking

namely, such that this is the matter of Love
it immediately becomes the matter of Eternity in essence

and when you come
Well for example to the structure of one's own Spirit
then the Spirit has an Infinite phase at any point

logically clear
we can realize with Consciousness
what is at this point
where the atom is located, for example
there the Spirit has an Infinite phase
we can say yes to every phenomenon of the World
it is connected
by means of our logical thinking
there is spiritual development

some kind of general axiomatic systems to be given there
is water there for example there is Earth and fire, let's assume air
Well there for example in the structures of ancient teachings there
in terms of the World system, I guess

so it turns out that we can
some create gradations in a logical way

but we can also logically say
what if we enter a rigid unambiguous system
and this door opens where man was created
then what's the difference
that we, for example, should use the structure of knowledge about that
what are rigid systems
penetrate any other system

it means that "any door is open"
well, figuratively speaking or speaking in quotes

then here to resurrect the departed
all you need is just him
how to get back from this system
in this regard

and for this it turns out
that all you need to do is just know the way out

Well, let's assume there are such points of view
that there are some parallel spaces there
there are some other systems

in this case I'm not talking about this level of Thinking
which, well, how can you say in physical terms
that yes there are n -dimensional spaces in mathematics, etc.

I'm talking about that
that in order to really resurrect a person
or or in some technologies
this is more in simplified versions
meet the resurrected
then it is absolutely necessary
act only unambiguously

and so if a person
for example, it goes along the level of management, let's say , like this
how well let's say it this way if for Jesus there
the surface of the water is the same surface
that he's walking along it there yes, for example, without failing
i.e. he just goes where he wants to go
he also did this before the elements of resurrection
or there is a resurrection yes
so where is the resurrection

it is his own, as it were, structure of resurrection

so he was at that level
that he was considering the resurrection
as is the Action of God

and when we consider the Action of God
then it turns out it's for God
what's the difference anyway
water air or is there a solid body

if God wants He can move at any point
for He is the Creator of Reality

hence
an unambiguous line as if in the rigid systems of the World
can be found
creating the next element of Reality

and therefore here in my Teaching about the Resurrection
I am looking at the element of creation and
Well, generally speaking , it is defined in the concept of "resurrection"
as structures of creation
or information
or for example there is some kind of tissue system there

and at the same time there is an element of creation here
this is the way
which uniquely defines
development structure

if you are dating for example
with resurrected somewhere
let's say YOU, for example Well there you see him in the distance yes
then reduce this distance
so that he is not, for example, far away
or did not have any optical configurations
in terms of light and shadow there is even

because even a familiar person
when at a distance
you can't always say for sure either
what is it

because here is the dispersion of ^{air}
i.e. the further the Action of the Creator
all the more blurry, well , as it were , His creativity turns out

but another person is also an Action
and generally speaking the level of the Creator
when he is already resurrected he still does not matter
comes from the Creator from the One God

hence
distance is what distorts in this case
and if it's just ^{there}
well, a living ^{but} undying person
what are the problems
you came up
and it is in a fixed system

if it is already resurrected
then here we are looking at exactly ^{this Means}
or you came up
or did you make a level like this
to approach him by Spiritual action

and here is your Spirit
he becomes inseparable from matter
here the Spirit is matter

your Spirit is the matter on which you move

once you switch to this technology
it turns out that you just have to notice
Well For example there is one of the signals in terms of that
what is similar ^{yes there for example} on the resurrected one
then you need to choose immediately
Well as if in a criterial version ^{or something}
absolutely definitely
in general, the next package, so to speak yes, as if there were no actions
at your level of management

this is the first
well, how does the axiomatic sign sound in this case

it is necessary to try
go out

and not to mention trying
you only need to do one thing

to a single level of access

it is formed by that
that you are acting in the structure of creation
namely some of the following system

and the next level
this is the Spiritual phase merging with the material phase

then you have well , practically, as it were, a single yes
management level
like some kind of corridor along which you walk
having created it beforehand

then it turns out
what is the next level
this is exactly the process of meeting
you created it yourself
it's already the moment of meeting

I divided it on purpose
level of creation
and the level of the meeting

Well God created all Reality
then He created man himself
with whom he is now meeting, yes For example

then it turns out that this is the meeting process
this is the fulfillment of human tasks

and when a person, for example, has already been resurrected
then meeting with him
This includes completing the tasks of the resurrected

so it means that in order to
well, how to minimize or optimize
a system specifically related to that
so that in less time
from the point of view of minimization, yes
meet the resurrected

optimize well For example
there to act it Means well in this way

that you see the subject of the meeting itself
as an object located

Well, if we talk about the subject of the meeting
where there are external attributes

For example there are , let's say, some events at home , etc.

Well, optimization is what is meant after all
more external structure
here is the optimization in terms of that
that you have an external structure
as the structure that you also create
but already at the level of the Soul

Be extremely careful here
because the external structure is created by the Soul
while the path to the resurrected ^{yes}
created by the Spirit

and when you have already learned to use optics
for example Spirit and Soul

you skip here ^{for example}
some element in Perception
It's better that I speak now and you take it

when you listen to the tape ^{there}
at that moment, immediately perceive
you see
where there is action of the Soul
to a greater extent the projection of optics is ^{as if} to the right side ^{yes}
Spirit is a direct system
it can be seen directly by its glow

The soul is ^{like}
so ^{well}, this is the level of bluish glow
and everyone has the same
in this standard process
and the Spirit is like ^a silver level of the path
here the optics are absolutely unambiguous

and when do you go out
in the nature of the unambiguity of actions
in order to, ^{as it were}, the subject area
separate from path level

then you are doing the same thing that God did

when for example I entered the time parameter
at the level of matter means determining
well, like the structure of the development of matter

i.e. the external structure is well for example matter
time is precisely the path itself

and that's why it turns out
that a person often still ages
because the path is expressed in time
it means it has a kind of interaction nature
with things
with external subject area

if these two systems are combined
then we get the Eternal body

i.e. it turns out to be just an overlay of two systems, yes
by force of will

and when you do it
then your Eternal body is yours
i.e. you have received your Eternal body at this moment
starts to enter as if
to the collegial level of Reality
and you get the Eternal body

i.e. a body that did not have the fact of biological decomposition
i.e. you do it through yourself in this technology

and when you do this for example
that is exactly according to my Teaching on the Resurrection
you are passing on experience to those already
that you yourself entered this area
you yourself got into this position

and you are inseparable from him well For example Yes
with the resurrected in the plan
that Eternal Peace
and there is a technology for mastering this Eternal World

i.e. you start contacting him
in terms of technology, as it were, of that Eternity
which is inspired precisely by the image of man

i.e. man is the creator of Reality
and the human level human relations
this is what forms, as it were, the level of the next Reality

and what human relations
this is normal social life yes
this is the birth of children
this is the formation of some kind of ecological system of normal development

and therefore it turns out that here
you are still entering a niche
that in Reality a person who, for example, has not mastered
the structure of management, exactly
well in terms of there yes Eternal systems of development
he is still in it
as a simple person

i.e. that is why the everyday factor speaks about it
that there are some people
which well as if by management practices
For example They do intensive training there
in the sense that they may not think there
how to do this or that action

but at the same time, even in everyday life
very effectively participate as individuals yes
i.e. they effectively enter the management system
wherever they are

so if we consider
so what is the effectiveness of this management?
it turns out that awareness itself
or what about this action of knowing a person
where a person begins already in principle in essence
how to find out yes
know the nature of the world

this action is what connects us
as if with the whole system of Reality
there with each other
in terms of aspiration
here in this technology of my Teaching about the Resurrection
aspiration for example there to resurrect another

i.e. in this technology

here is the knowledge of one and another person
very tightly intertwined
very tight

here is the concentration of mutual knowledge
she means Well as if often several orders of magnitude higher
than the knowledge used there in the structure
let's assume there is no external control there
because here we are talking about all people

if some action concerns all people
then knowledge spreads in principle also quickly

well, for example, on a ship if there is some kind of signal there Yes
somehow act in sync
for example, to leave the city somehow
then everyone does it and it concerns everyone

i.e. what concerns everyone
it has a very complex development structure
that is why God gave the resurrected that way
where do they go actually
by nature, as it were, the primary structure of the World

in fact, they, on their part, also create
Well as if due to the structure of one's Consciousness
oncoming traffic
because there is a kind of system of similarity
that the undying he moves there
to the side for example yes resurrected

and the resurrected one, well there is a projection figure

if in geometry there is a system of similar figures
still experiences something similar there

but the concept of "testing is like something similar"
consists in the fact that
that he creates a structure in front of him

but unlike the living one
so resurrected so let's say yes
in this structure
he perceives almost simultaneously

and the glow of God
and the growth of these corridor systems
that is, they begin to develop in front of him
as structures that move him towards life

if you, well, kind of consider its movement
then it moves as if in a system
well, like, well or what about cylindrical lines?
there are some threads that form him

i.e. the body , well, as if a person were flying there , for example , in zero gravity, yes
on a parachute without opening the parachute yet
this is roughly the feeling he has

but still it's not zero gravity there
on the space orbital station
namely when it flies
when there is external air resistance
there that corresponds to human sensitivity

and in this case
well, that is, precisely at the tactile level of sensuality

so when I consider my Teaching on the Resurrection
then here the structure is precisely the creation of matter
creation of Reality
creation of the level of Reality
this is so as if at the level of a paradigm
a completely new management structure in essence
where is it considered
as a structure of human action
aimed at resurrection

and the structure of the resurrected
which hits the mark immediately

especially now
in the conditions when it starts to move
to the side means well, the Eternal physical body

but the thing is that he is resurrected
he is essentially not in any other conditions
from the point of view of the concept of the One God

God is One
as soon as well So the person gets in , yes

into the structure of biodegradation
still sets the same task for him

have a living Eternal body

i.e. the person has no gap in the task

just biological death

this is a process of removal, as it were, from the solution of the problem

well, for example, through the structure of another type of knowledge

and when, for example, he starts to move away

Human

he still experiences it at every phase

action of the same task

i.e. these kind of hard frontal light rays

who are trying to get it back

and they often return

For example, a person doesn't get there

there in the structure there is biological decomposition

so it turns out that for the resurrected

means to have an Eternal indestructible physical body

it's still basically the same

Well as if already somewhat everyday

in the understanding of the one living there who did not die

task

and he solves it at every level

at every level

question arises

Well as if of the following nature

why at some level

task well For example there is no effective solution there, let's say

Well let's assume the process of biological decomposition has begun

why doesn't the cell seem to form

structure means creation well there is a neighboring cell

and because well in this case

just need to add knowledge

or external control

or he should be the person himself, for example yes, I already know

then it turns out

what level of development we have
which allows people
in real time
as if to be in conditions where they are indestructible
because it doesn't happen
external management structures
aimed at destruction

this is already a close structure
to the structure of God himself
where is God who created the world
he is in conditions
when it is impossible to destroy it

and in these cases, if a person has such equipment
then no phenomena occur around it
some extreme
kind of social atmosphere around him
biological norm of life

and here comes the arrival
to this biological Norm of life he is such
what if we look at the interaction
for example an atom yes
And
social life

but the task of any manager
or any manager, so to speak
which operates according to my Teaching about the Resurrection

this is definitely to be achieved in any case
element of resurrection
well maybe someone reaches later, someone there earlier yes
but still by the action of management
is always a subject area

i.e. precisely the spiritual-subject area
target
similar to how God does it
mandatory resurrection and meeting with the resurrected
and with the one you choose , for example
or just assume there is a random number generator
put
choose any last name
and resurrect him by this very name

i.e. the task is set exactly like this
We can of course talk about that
that one-time resurrection
this is an approximation
that's right, yes

one-time ^{there} millionth resurrection
this is the structure of approximation
to the ^{general} level of Eternal development of civilization

but one thing is certain
when any person is resurrected
moreover
why by the way it is necessary to develop the structure of clairvoyance
that man must be resurrected
which was not defined anywhere
never

For example ^{there} well, let's assume it was made there is an abortion ^{there} yes
how to determine
the person did not manifest himself in the social system

then it turns out that it is possible to determine
due to the development of the Spirit ^{there}
clairvoyance ^{and} management
and then resurrect him
from the level of ^{primary} conception ^{and} so on.

i.e. all life-oriented systems
let's assume ^{there} a man was conceived there three days
for some reason
well, it was ^{like} an option
what a person
Well, ^{there} are different situations ^{and} illnesses happen

then it turns out
that this person also needs to be restored
any purpose is originally given to life by God
it must be realized

and when you start to implement this level
it is in my Teaching about the Resurrection
then you see that the process of resurrection
exactly like this, ^{for example} , by God ^{yes}
"resurrected by God"

i.e. well, in the analytics of management in this phase of the Teaching, or something like that

it's kind of perceived as something

that God is at work here

initially

as a level that gives knowledge

and He does it Himself, among other things

then here is the process of resurrection

and resurrection from external control

it is a single process

where the goal is defined quite clearly

that any life-oriented phenomenon

should develop only exclusively towards life

and primary level

it is always the level of God

i.e. God is where there is development of life

so we very clearly defined

as if a parametric problem yes

the parameters are very simple

there is a certain area

there is some circle there

from point

where there is development towards life

it means there is the presence of God

therefore the Action of God

The action of God here is determined by the fact that

that according to the structure of creation we act

or just like God does for example

or we do it ourselves

but we look so that it happens

for example the action is similar

but the action is similar for example Yes

it's still not God's work anyway

but you can act for sure

only as God does

in target precise control

therefore it turns out

that this factor is precisely the Eternal level of development

there for example in that case for example to direct the thought

Well as if in the case of resurrection

direct your thoughts to where there is Eternal development
and there are no global catastrophes
and for example, they are talking about billions of years there, yes

then the question arises
how can a person understand this process
"billions of years"
but after billions of years
there is a kind of constriction of space
there time begins
the man starts to go out
to the level of another structure

i.e. events begin to change
and generally speaking be perceived
as if block structures
where there is a very strong concentration
to a greater extent space

and then it's time
i.e. time begins to be seen as an external factor
i.e. in essence this is currently
this is penetration into the microworld

and when you start like
such dense phases to consider
it turns out that the Perception of these dense phases
those. overconcentration
this is something you do yourself

as God does
He takes, for example, superconcentration
and receives that the maximum level of superconcentration
is the person in this case
there can be nothing in the place of this person
except the person himself
and no one

and it turns out that there is a level of superconcentration
has, well, such a nature
that more rigid systems yes
for example, the Earth has some kind of flints there
more manifested systems there
like fire

in this case they look like this
that they can somehow influence a person

but from the point of view of the Creator it turns out that this is not so
namely the Creator acting in the same way
how does the One God work
and at the same time creating ^{there}
the following development structure

so it turns out that when we consider
level of interaction
human
with some environment
where it is located ^{yes}
with fire, air, Earth, etc.

^{there} we can suppose consider the following parameter
that a person walking ^{through} the air ^{there}
Well, walking on the Earth , yes, but moving in the air
and not by swimming in water ^{for example}
he acts in analogy with the One God

which also if He passes through this place
on the sidewalk ^{there}
He moves the same way
^{no} problems
we understand
that people understand what is here
there are no ambiguities

and this is the understanding of the transmission of information
when you resurrect another
it's exactly like that
God also simply speaks to you
how to proceed with resurrection
the meeting happens ^{faster}

then as soon as you start
this understanding ^{is like} visualizing ^{and} realizing
then it turns out that you have been there for a long time
in this phase where you are ready
^{for example, yes,} to meet with the resurrected one
but the level of external psychology, ^{as it were}
^{for example,} the social status of society
it may be a little different

but nevertheless
in your daily practice of resurrection ^{for example}
after all, you, as people, for example, did not die ^{there}

you can do it
structure the external world
as I said
The eternal body forms
Eternal level of another body of any
the principle of analogy in the fundamental Laws of the World

and it turns out that you do this every day
and everyday action also consists in the fact that
what do you eat there
i.e. you do something, well, in general, in essence
fundamental actions
aimed at the Eternity of the World

and when you start to reason like this
it is clear that the animal world
vegetation there for example
over time it may be like this
that it will not be necessary to touch it
and get, for example, the structure of nutrition
there from the structure of Consciousness, yes

here we get a very simple option
a person becomes at the same time
as if on a more autonomous level or something
in relation to the outside world

and according to my Teaching about the Resurrection
it turns out that he can then
create and restore
any object of Reality only because
that Reality is fixed in relation to him
in generally quite strict criteria systems

i.e. God created it this way
to restore some mosquito there
or some molecule there
which was moved from this place yes
you need to know the coordinates very precisely

and it turns out that if we, for example,
we somehow determine these coordinates
from the point of view of, for example, ideological principles
or there is a Spiritual state
that God gave an accurate picture

that is what happens in the structure of Consciousness
we must be very clear and unambiguous
highlight
that the resurrected or already resurrected
is located in a very specific place

and there can be no confusion ^{there}
that's what he is ^{there} let's assume it's in third place
or ^{there} in the tenth
search engines in this case
they don't work in this technology here

and here I present the paradigm of creation
where you can create in a specific place
you can take and plant a tree wherever you want
Right
you don't have to look for it in the forest
buy it somewhere ^{along the way}
take ^{for example} black soil in addition to it
and plant it in the place where you want
I deliberately divided it into two or three actions, ^{yes}

if you can buy there
that's the difference ^{between} this tree that you can buy ^{yes}
consists in the fact that
that you act independently in what way
a tree is a reproduced system
it is sold there by people
people were created by God
but the tree was also essentially created by God
in terms of its growth, ^{yes}

it turns out that there is a difference
meanwhile, the tree was bought
or did you pick it in the forest?
it's the same thing
Well they dug up ^{there, let's assume}
it's essentially the same thing
for God it is one action
this is a tree ^{yes}

and when you start to combine these phenomena
you will see that at the level of the logical plane of Thinking
choice of location
and ^{for example} the definition
so the tree in the right place there is a summer cottage area ^{yes}

or there vegetable garden

if it's a vegetable garden, maybe it's a trade
i.e. apples grow some fruits
which you can also eat

then it turns out that you can define a circle like this
that you create your own level
which seems to exist
outside the outer there Universe outside the outer galaxy
i.e. you can build on logic
my own secluded area there let's say gardening
and calmly feel harmonious in it

harmony often occurs there
where you are in control of the situation
at least on a garden plot

of course if weeds appear there
you try to counteract yes For example
but in that case if you cultivate as
Well, basically, either beauty
or use it to eat food
of this garden plot

but I specifically moved away into such a
like a garden-berry theme for that
to show it here somehow
that the whole world is actually built like this
that any action is initially harmonious
because there is also the Action of God
and there is a structure and degree of knowledge

i.e. we can of course take a tree there
and try to find out how it feeds there in the soil
let's assume there is liquid and some microelements
at least logically

but you can observe logically for a very long time
and you can take and read some article on this topic yes For example
but for this you need to learn to read

but man gives to everyone
equal knowledge systems initially

so it turns out that a person
based on the fact that at any age

there from a very early age
can resurrect and meet with the resurrected

but technology, for example, is in childhood
it's completely simple, yes
it's more linear, so to speak
by vertical level of Perception

that people who, say, interact with children
they generally often see certain systems
when a person is still small
but says some more complex things
i.e. he takes some external information

i.e. external information
which does not correspond to age
this is the level of more manifested systems
full restoration of the World

so to an even earlier level yes
for example at the cellular level
for example, to the level of organization, let's assume the fetus
there is such a factor here
that the fruit, among other things, self-organizes
the structure of its development
Well there it helps the mother's body
develop somehow
and for a successful birth

but if we proceed from the fact that it is even earlier yes
Means for example for conception
structure before conception

then the structure before conception is
there is God Himself
i.e. manifested specifically
for example for this person

and it turns out that we have considered
are biological ones there
from the point of view of well as if at the everyday level of Consciousness
as if a biological process of human development

but God is close to him there
where he has not yet been conceived
but when he is conceived
here is the concept of future tense

fits in with the concept of the next person
i.e. mother for example Yes there is a father

and when you look at the world like that
then it turns out that each subsequent structure
by analogy with a person I already conduct
just by analogy with a person
should have , as it were, a phase of the following development
from some initiating sources

well if there is some piece of Earth or stone there
is located somewhere
he rolled down
at least there was Earth from which he rolled

or vice versa there the mudflow lifted him up yes
and splashed back
i.e. different phenomena occur in nature
not even specific
i.e. it may be higher
although selij can be on top

i.e. there are a lot of systems of control
there are in nature there knowledge of Thinking

so here too resurrected
when he strives towards the living
which resurrects him
in this case the technology is very specific

in relation to the living
the one that resurrects him

he has these complex levels, well, descriptive
which I just touched on somewhere in passing
they acquire the subject of, as it were, fundamental reasoning

well, that is, for example, to understand the Law of the World
from the point of view of the structure of the Resurrection
It is enough here to emphasize that
which is very well as if long-term and in time
structure of the Thinking of the resurrected
this is what we see with a momentary glance
For example there with physical sight

and when we look at this process
then it becomes clear to us

why the process of arrival for example Yes
when meeting often also long

but if a person drives for a long time, for example Yes
and he seems to be drawn into the automatism of this process
or there by train
then when he gets off the train there
it doesn't matter if something is driving nearby
he has a feeling that he is driving
well, it's like a physical effect, and that's how it works from a distance

it's the same here
when a person has different time frames
on creating a structure
where the subject of his Thinking is long

after all why long
in man it means the manifestation of God
For example let's assume in Thinking
has such a nature after all
what if a person comes from, for example
Well like a pulse and light there
in the form of hemispheres, yes, here comes the spread from you
it turns out that the resurrected one
the movement of light goes towards it
i.e. these same spheres they just go to him
he should analyze what kind of spheres

difference at the everyday level of understanding
or as in sociological
the whole point is that
that a person also when he perceives
Human consciousness perceives
some external object
he still analyzes, right?

i.e. if you know yourself
and a person usually knows himself quite fundamentally
at least he looks at his finger
he knows it's his finger

but when you have an external object
what do you kind of want to take advantage of
when you take with this finger
some sphere yes there is an apple
then a rather serious analytical process arises
there is an analysis of the entire external world

and here is the resurrected one
when it comes to creation
structures, that is, of the external world
he perceives each element as an element

i.e. at that moment he had
for his Consciousness
there are practically no mastered elements

that's always the difference
meanwhile, who did not die
and those who, for example, were resurrected
up to the level of universal resurrection

mean here that there is an element
as if well, some kind of automatic practice
when he remembers more automatically
that you need to constantly do something
by analyzing the external element of the World

because there he seems to see
like God for example yes or the one who resurrects him
gives him knowledge
it kind of lays down these structures
in your levels for example Yes
there let's say physical or spiritual

and his Consciousness in this regard
absolutely no difference
from the Consciousness of a living person

I showed it now
a very fundamental area in fact
which I previously talked about at all
Well, I didn't say anything about the current one until now

what is the level of Consciousness
which does not differ in any parameters
from the Consciousness of a man who did not die

and this fundamental knowledge is in fact
because then it turns out that by analogy
resurrected as a conclusion, yes, logically
as a proof of inference
he is also no different from a living person
Well, that's what's required, essentially.

because when we work on the structure of resurrection
we must always think about that
that the resurrected man is the same man
which is no different at all, exactly no different at all

and when you
Well, from the one who didn't die, I mean

and when you, for example, develop like this here
then it starts on you in a certain way
to be realized, so to speak, the burden associated with that
that the task of universal resurrection
when other people who you already have will be resurrected
are no different
you decide again

i.e. the whole complex of tasks
is on you again
i.e. it won't be someone from the outside who will do this
specifically every person who does this
he solves these problems immediately

laying the structure of the absence of differences of that
who will already be resurrected
or whoever you will be dating
already resurrected

so if the resurrected person
has even been resurrected for a long time now
for example, he is in a completely good state of health, etc.

even good social conditions
maybe he'll come yes
but if it is different in some way
from its structure well as if from the beginning
which he filled in as something close to a matrix
although it is more of a philosophical and spiritual structure
i.e. he can see things changing yes that's normal

if things are on the same level
it can kind of form another time
he can think about it yes

this is where the resurrected ones come
if everything is the same, as if life is fixed
Well, it's clear that they're waiting for him, right?

but it turns out that you also need to know how to wait
i.e. we need to arrange things somehow
so that he could see the dynamics
that he can come and stay here, for example

so when you are doing something for example
let's assume it's resurrection there are creative people there
then a rather serious question arises here
in terms of being a creative person
often perceives fragments of events
as an element of creativity
Well For example there's some note there
some fragment of words or associations

associations must exactly match that
what he had before biological death

and that's why I'm already spending it now
more subtle in terms of control
the system means by resurrection

and that means that the difference here is still in that
that I found just the level and showed it
initially knowing and pay attention yes
I finally found it in logic now

but I know it exists
where Consciousness does not differ at a certain level
the resurrected and the one who did not die

and when I come here for example
it turns out that exact knowledge is knowledge
absolutely all elements of human thinking
exactly at the moment of the meeting

and now we come to the same thing again
what if we assume so we have
let's assume that there is a need for a meeting
where did you create that spiritual corridor yes
and they walked over it on a physical level

it could be the same Earth
the same sidewalk
the same metro station
but it's yours you made your glow

you see that it is you

well, that is, it exists autonomously
out there there let's assume civilizations of the galaxy
this is your path

and you walked on it
and here the element of meeting with the resurrected one arises

and the moment of meeting is something completely different
this is the presence of God
for example, the meeting of God and man
can happen in a completely mundane way
God came there, drank and ate tea and went on.

but if it is a person who did not die
so, for example, God is in the Physical Body

then the moment here is absolutely clear
God created this man what are the problems yes
There are only two levels
and there are no intermediate systems there

in this case the resurrected one
comes to meet the Eternal Living
has already at least there having the goal of Eternal life yes
with the undead, then

then it turns out that this is the goal of Eternal life
that drawbridge that speaks about that
that it is God who is present here
i.e. the third level that created both of them
having set basically the same task

i.e. it turns out that the decision is joint
the tasks of Eternal development
consists in the fact that
what does it mean resurrected he well let's say he came back yes
just for understanding
well, the fundamental picture of the world
where Eternal development is necessary

if he knew for example from the beginning
I might as well not have left then
i.e. not to have biologically any such transformations

and when it already starts to come out
for example through
Well there is molecular

there is a submolecular
down to the molecular level
then these systems of passage and his
they consist of the following
what as I said what if we consider
molecular level and microstructure
as a projection of macrofragments of Eternal development
or there there ten billion years it is one molecule
in the projection plan

i.e. we see the future in a compressed form
in this regard, it is precisely in the technology of resurrection
here is according to the given structure of my Teaching

and if we consider for example there
structure about Salvation and harmonious development
then the very fact of Salvation
there is the prevention of a possible global catastrophe
consists of only a total of
in regulating the nearest cell
which has there an infinite glow

i.e. it has a completely pragmatic meaning
be able to restore the structure to the norm
at every moment yes
the vibrational structure so that it is normal
then the next one is the Infinite moment
he is normal

i.e. we know that the future is Infinite
because we regulate here
any microstructure

but naturally we are on Consciousness
must know absolutely clearly
that all people can be resurrected
and everyone will definitely be resurrected, yes , or have already been
resurrected
when they were already resurrected
All

it turns out that this element is like
policy for providing the following actions
already includes the structure of obligation
i.e. in my Teaching about the Resurrection
where I show exactly for example in the section there
here is the structure of creation

I'm just showing the methods of creation

here I show first of all
what a person should have
some logical criteria
in order to say
yes, there are reasons to believe that
that a person can have Eternal development
and for this he must manage
as microstructures ^{there} molecular

so he should say for sure
that he could resurrect anyone he wanted
so he can in principle
Means Well there ^{is no implementation} there let's assume there
the experience of Jesus Christ when he knowing that he can
still be fully ^{restored}
and resurrected including resurrected
he did pass this level after all, ^{yes}

i.e. there was no such experience in principle
he showed it once enough

and it turns out that when you know this
i.e. you can resurrect, ^{for example, yes}
exactly those you want

Jesus ^{proved} that you don't have to die.

^{then} you can manage the micro level ^{yes}
any

it is clear that ^{as if having} well like such starting ones ^{yes}
initial positions ^{or something}
you can very well say
what ^{does it mean} in the future ^{for example} at the management level
where these events are already winding down
precisely in block- ^{like} spheroidal systems
where time begins to separate ^{yes}
and exit as a control fragment

i.e. events are measured
and time ^{in general} in this case is obtained by analogy
event structures are measured

and it turns out that there is an infinite number of events
hits ^{for example yes} in one cellular structure

then you start to manage all events
and it is absolutely real in that sense
what is the structure of Eternity for you
Well as if it starts to move here
i.e. to you

intuitively, as if logically even
i.e. there is a certain concept such as "intuition in the field of logic"
She starts working here
but this is already, in principle, external control
where God gives logical knowledge

and that's when God gives logical knowledge
it is clear that there is the presence of God here
It gives logical knowledge

the logic is also different
there is logic, well it is built
at some trivial level of thinking
for example, cause and effect
and there is logic given by God from outside

and that's when you start in the logical phase
already highlight
for example the structure of development for example God
in the logical phase
you understand that nothing
or external approval
any event
which for example logically influences you
it
or even spiritually
it can't move you from the real path

i.e. you are like a monolith and any external processes
any management is for you, actually
there is only one way
which generally speaking needs to be implemented
to achieve for example there is Eternal development

i.e. then the person stops getting there
as a rule, it means in some kind of depressive states
i.e. at least less and less gets in
if it hits at all

because as soon as it starts working

in this system
he practically seems to be avoiding tasks
I think in many ways it's like well, something like that
a complex depressive structure or something

because well, the concept is exactly what I introduced the word
like "depression"
because there is external pressure, yes
and as if there is a desire to resist yes
this multi-level plan or something
this is still more of a phase, often logical

i.e. at the first level
although it is like pressure from the Spiritual plane
this is still perceived anyway
as an influence on the logical level

as soon as we are in the logic phase
we have stability
much less reason to pause
as if active development
i.e. well how to influence somehow
from the point of view there is external well as if we don't need the design, yes
which relates, for example, to depression

therefore the person who is engaged in resurrection
I don't think so under any circumstances
means to enter
into the structure well as if the burden of this design

i.e. its task is to always be there
in a state of action
How the Creator Works
God is One, He is always acting
there are always some actions of Reality

and on the other hand, the situation here is like this
that the very path he began
this man
Well, first of all, he is correct and that is clear.
and even morally, i.e. criterially, it is clear
there is no point in talking about another path
as a rule, it does not arise at the moment of decision - making

but it does not arise initially
because man is like that in essence
in the Image and Likeness of God he is made

as if it were realized in its own Consciousness

so it turns out that these fragments of Consciousness
who are his ^{well} as if they organize
they start to go to him at the same level
that he perceives the entire external world in the same way
i.e. it becomes similar
already manifested in the World

he perceives the outside world in the same way
as the structure of the external construction as I said
i.e. external information as certain spheres
coming to him but already from the World

and by analogy he then transfers
resurrected
into your area of creation
where is the outside world
from contact with him
he's changing
he is somehow recreated by it in his Perception

and so if ^{means} we say
about the structure of Thinking, ^{let's assume} that a person has ^{yes}
where is God
then in the structure ^{it means} Perception of the World
there is a man there

this is the fundamental structure
I gave it to you now
that in the structure of Thinking one can very clearly define
this one is autonomous
^{Well,} to which I brought more axiomatically, ^{yes}
it is precisely the autonomous level of man
where you already start receiving
meeting another person
but definitely

along your spiritual corridor
you meet him

so now do this control
and I do it with you

Now I am entering a subsection
my Teaching on the Resurrection
which is called

these are the Fundamental Laws principles and methods
resurrection of human creators

in this case are considered
the same constructions as the Laws
principles and methods
but the paradigm itself is, as it were, a conceptual system
it is considered more
as a structure of interaction
means a person
with another human creator
where is God the Creator He is the level
who created this person
and the same as level
which shows him
how to create

i.e. the structure here is complex

and I'm not specifically reducing it here
well, the level of complexity of the system , so to speak Yes
because the process of creation itself
this often means a complex process

so in this case we will consider
as briefly as possible of course
and quite clear and understandable
that when we consider
let's assume there are fundamental Laws of this section of the Teaching
it turns out that we can talk here
still about complex connections
and often as if in a verbal system
manifestation of understanding for example can be different

For example there one word can lead
to understanding that
that the action you performed was correct
this is a level in principle, it is generally completely different
rather than the level of linear or sequential control

here the level of the word converges with the level of the action

so it means
Fundamental Laws of Resurrection of Creator People

here I share
three levels of fundamental Laws

the first one means we are considering the resurrection of people
well, as such
these are the ones that need resurrection, yes
i.e. they had, for example, recorded
fact of biological death

the second level is that means resurrection
that we set the task at the same time
restore external parameters
as if changed from the World
if he was there somehow negatively
Well, some destruction did occur

and the third level is the dissemination of knowledge
on everyone around
so that the living would not be, for example there they were destroyed

and at this level, so to speak, of knowledge representation
I'm talking about the first fundamental Law
it is formulated as follows

when the resurrected one creates in front of him
The reality of access
into the world of the living
he does it this way first of all
that all access parameters
everything he creates for this purpose
This means it has full recovery functions
by his will

i.e. it turns out that the resurrected one
should not just create some element
he still has to look at the structure of that
that the recovery function is correctly embedded in them
here in the element yes means Reality
exactly the one he creates

then the next Law is formulated as follows
what is the resurrected and the one who resurrects him
including for example the One God
so they all always act this way
that their effect is maximally expressed
at the micro level, for example, it means Well as if the areas of creation are here

and minimally expressed
in Infinite systems from this level

i.e. we are talking about that
that the most manifested systems
are in for example, in the very center of the event, yes
if a molecule is created there, it is like an atom

and to a lesser extent they are manifested
in an external system

thus it becomes clear
why is the concentration of the world there For example Yes
The land is such that people live here.
and then we are enough
Well there in a large optical range
we don't meet other people, let's say

because it is the Law of the World
we if we concentrated
then all other manifestations are already so far away
so that it would be harmonious here yes

to meet them
we must increase the level of concentration
translate to the level of logical concepts

i.e. we must develop for this
have a level well as if intellectual yes
cultural spiritual development
allowing to ensure this same Law

in fact, this is at the level of , well , normal social behavior
means the free will of another person
or another community

and based on this
so we can immediately say for sure
The third law what does it say

that knowledge about Eternal development
should spread instantly in this way
so that they could be created
and also recreated
any level means reception and transmission
this information

therefore the first parameter
knowledge must be created first

i.e. how to create them at all

if for example Well there at this point well there are no known technologies there
gaining knowledge

then it turns out what does knowledge creation mean
it is first of all any element of human action
or some object of information
any

and it turns out that when we come
to such a level of understanding of the World
The world becomes very bright, simple and accessible
i.e. there are no problems there

any action is knowledge
you are here
in absolutely well like on a universal level or something simple
knowledge
and at the same time you are completely ok as if not burdened by that
that you need to know something else
something needs to be investigated

By the way, such a level really exists
often manifests itself during certain periods of childhood
everyone probably noticed such a bright horizon
this is the knowledge that speaks about that
yes, there are no problems
and the most important thing is that you see that you are passing on this
knowledge
even if you well as if you are doing nothing
at this moment
i.e. you are walking somewhere along some country road, for example Yes
at this moment you are actively passing on this knowledge to others

Every person has this

i.e. just like the Creator is the One God, for example
transmits knowledge in any Action
you also have such structures
emanating from your physical body when you transmit

and here in my Teaching about the Resurrection
transfer of knowledge is a means of influence

on physical Reality

and using, for example, fundamental Laws
you can get it quite well
completely control structure
through actually in general understanding , let 's say so

through understanding the goal and task

Well as if synchronization

bodies

Souls

Spirit

Consciousness

as if external Reality

try to take it more generally

more vague

do not take fixed values here

because any of your actions is the status of the Norm

so you think this is the norm

The Creator God gave you the One God

it's here to think so

no action can be given priority

and no action can appear as if

well, more so, requiring attention, yes

more important

that's when you get into something like this

then what are you

in a state even if you enter into such

then you understand that the level of action, for example, yes

which you have

in terms of for example there is no future development

This level is defined more as if

by your own desire

your original level given by God

you see what god did

and that He is here

that's when you do it like this

you record and perceive the situation

then you very quickly well you see

these are the basic principles

means the resurrection of the creator people

first principle

a man who creates is also a man who acts
in terms of presentation
any object of Reality
as an object that has its own point well actually
locations
your control point

i.e. the person actually
represents any element of information
it gives personal characteristics

first of all, by my own personality, yes
he is the creator
and that means

but there is another level here
what we are saying means that the resurrection is happening
namely the people-creators
but they should anyway if we are talking about
about the resurrection of these people
to pass on to them the knowledge of how to create

i.e. there are, for example, people who create Reality
then it turns out that it is a variant of personification
any element of information
it is like a kind of carrier for transmitting information

your personality

and the principle is quite logically clear
when you emphasize
on some thing
is a molecule there
molecular structure
there in the macrosystem
on any everyday action
you bring your understanding to this level

and the resurrected one who creates Reality
going into this world of the living
like he's removing information from this area
for him it's a ready- made layer
where your personality gives away the whole structure

therefore the following principle follows here
that the undying one who gives
management structure for resurrection

gives a whole complex of practically his knowledge
for a specific resurrection level
the one who is resurrected

i.e. we are not talking about the entire spectrum
let's assume that the person there is a specialist in mathematics
or there in philosophy or in religion yes
then the resurrected one gives a generally certain level
impulse-creation to get your part there
technological part

what does he need to know
Well let's assume to build a path of movement
like by air yes
to the world of the living

he needs to know for example there
that means the dynamics of air movement there
when the fan is running, for example
by the way, such knowledge often helps, very simple

and he builds these layers as if rising
because the resurrected one enters this world of the living
in fact, often mechanically
i.e. it kind of pushes off like on clouds
from these fragments of air
and it just pops out and that's it

i.e. there is often no fundamental level here
this is the kind of structure he will build
in his Thinking
the main thing is that it is correct
then this design is what gets in
into the management structure
especially if there is a creative personality there
In principle, it can be released on sound systems

i.e. let's assume he is building
sound level structure and control
then it turns out that he perceived the desired sound
he is in this world of the living
and that's all
i.e. for him it often doesn't even happen
care structure

so if the sound form
interacts with the Soul

and the Soul, for example, manifests sound and sound form
then he is not perceived as a person
like a man who has left the world of the living

because the sound immediately has an Infinite nature
it also has a source that turns into sound, for example
where is the sound for example for those who left
this is the level of light

after all, those who left are understandable
that sound as a physical environment
must be converted convert
in Consciousness
on some structure, for example submolecular
even before the molecular luminous quantum level

it turns out that it is light

and since he has the structure that his Soul
forms a sound, for example, yes right away
Well let's assume there are famous there for example musicians

or let's assume there is a historical moment there
let's assume that if we take that for example the fact
that Paganini once had a moment where there was one string yes
and he for example Yes, I played a concert

but in principle it really can be done
if the Soul forms a sound

i.e. the Soul forms the sound
and the audience, in principle, may not notice
the sound is real
and for example for those who left
let's assume the sound is a transformed form
it gives the glow of life

that's why by the way there is no feeling
that the man left

and when there is no such feeling
he actually didn't leave by the way
i.e. there is no process as such a biological process of death

and here by the way
it is precisely this fundamental moment that is coming
that the structure does not have the characteristics of care

it practically falls out almost instantly
into the zone of actual resurrection

i.e. if a person has learned yes for example during life
it means it is correct to somehow record the environment
which for the optical range, for example, looks like this
what is life

i.e. in the structure of the seemingly resurrected it looks like
as a clear path towards life

it's logical if a person has it
he's not dying then that's for sure
as if even in any situation

but if some difficult situations arise there
then at least he certainly survives with multiple reserves
this is the degree of development of reserve levels there
let's assume there is health

or a person in some situations
this is a colossally high level
if he is like an optician or something like that, Mira actually
optics of the living world
means it reveals
as a completely unambiguous optic
for myself essentially

I always speak from the point of view of the living
because from the point of view of those being resurrected
it looks like just a really bright light
which they still have to differentiate
I call it the World of the Living for those living there

when you have
such a clear and tough management phase
it turns out that the following principle is implemented
that absolutely rigid unambiguous
the control systems that you implement there Yes
upon achieving some personal actions
this means that the systems are absolutely strictly and unambiguously designated
and existing in the World
only in one place
and in one copy

i.e. logically clearly somewhere you thought it out yes
in this place is located

this optical thought
and it seems to be clear that it is fixed at this time

and but as I said at the beginning
because the Physical Body of the One God
it is also one
and it has specific characteristics of the person there
is located specifically here

and in this regard it is clear that He is alone and here

so is every person
and every thought

as soon as we come to this
well, on a fundamental basis , perhaps ?

Well Well, in general, I would say
that regulation of the situation
it is precisely some kind of regulation that arises
in the structure of relationships

we see that any action
why is it clear and located here
because it is done of one's own free will
as if this object of information

i.e. here is the molecule, it is located right here
because there is a certain phase of the will, spirituality
i.e. God's presence
where there is a specific algorithm of actions

why is the molecule here
i.e. this is also an initiative free structure

and it turns out that the World is located
in terms of free will and interactions
i.e. so that the World is not destroyed
just this design is enough
Well, at least keep it at the same level
internal, i.e. spiritual content
next action

i.e. in each subsequent action
lay down the principle of complete freedom
provided of course that there are control functions
from your Eternal body
and you ensure development

therefore at this moment of action
your goal must be Eternal

when you do an action
at the level of the logical phase of Consciousness
it is clear that the action is, in general, initially clear
what is Eternal at this moment

i.e. at that moment they were not destroyed
so you made the action as if it were a structure
which is currently located there
in normal condition

but what difference does it make to you
you are so there let's say in billions of years
what's holding you back yes

if you ask such a question
then the following principle is implemented here

current action on the structure of the creation of the World
from the point of view of the resurrection processes
it has the same characteristics
that and action in Infinite time
there in billions of years
or generally speaking in Infinite time

i.e. the action done now
it is no different from what you will need to do
there in billions of years
in order to achieve the same effect

and therefore why does a person have such a structure
which well there for centuries practically
Well All in all Well, essentially it doesn't change
human tissue structure

if we assume the animal world
being in certain conditions
it changes color somehow
well, somehow it changes morphological structures often
then a person is always kept at one level
because it is initially a kind of canonical level
as if it were a signal plan for the whole world

i.e. his actions were initially canonized

how the actions are correct and they should not change
a person should not be reborn into a cyborg system
should not mutate there, etc., etc.

and when we look at this process
it is clear that for the animal world yes
for the animal world there are plants
to enter
as if in intellectual contact with a person
and live on the principles of equality, freedom of creativity, etc.
and have the same management plan
it's enough just not to change

i.e. if well it could be like this
Well in general, that 's more the impression
that the philosophical structure of reasoning
In fact, it is a completely practical system.

if an animal learns not to change
in the habitat
then their intellectual level
will reach the level of a person
and then at the level, for example, telepathic
it will be possible to communicate completely freely
well let's assume it's like with people

i.e. the difference starts to disappear there
between there elements of the external world
and elements of the level and level of human management

and then it turns out that it is enough to fix this structure
it will be clear that for example there is a molecule there yes there is some oxygen
there

has the same intellectual
as if in comparison with a person
plan
which can very well analyze the external system

well, we'll isolate the oxygen molecule there, it's here , yes
here it has communication functions yes
i.e. well as if approximated to human Consciousness
as if functions of meaning awareness

and it can differentiate the computer quite well
the computer device is quite
No problem

i.e. it is absolutely possible
through it you can view the entire microcircuit
to understand how the system works ^{means}
because the molecule understands

but when we talk about a person
then the molecule begins to differentiate the person
as a structure ^{well as if at a distant level}
where there is just light

and when it approaches
she must become human-like
in functions
understanding
management
interactions
with the outside world

and it turns out that the same is true for a person
he is approaching God
he must be like God
as if this structure is completely unambiguous

and movement towards God
This movement is often perceived as personal development

but if we consider a system of fixation, ^{for example , yes}
how does a person think there
at the level of quantum radiation ^{there}
then Thinking also has the form of a person
i.e. a sphere, but ^{in general} it has the shape of a person

i.e. the person maintains his shape
even in Thinking
i.e. if you select the active part
spheres of Thinking ^{yes}
^{for example, a person treats some cell of himself}
^{Well, he just injured his finger ^{there, right?}}

then the sphere of Thinking is such
what which cures
it is more emphasized by the shape of the person

By the way, you treat using this technology, pay attention
what if you put the control sphere
^{there are diseases in the area}
then select the area of the most intense lines

where is the form of man

then you kind of focus
focusing control occurs
not through there focus like a normal optical focus
namely through the level of human form
and specifically there in contact with human skin
with such a level yes
skin of the human form yes conditionally

well, in fact, you kind of highlight it there mentally
some level of a person there simply as a form
and you start with some part
to the sore spot
this is the form to orient

Well for example, with the little finger of the right hand
as if a singled-out image of a person
touch suppose there to the spleen
then the spleen is restored

if in the right hand
Well there let's say with the thumb of the right hand
touch the liver
then the brain is restored

i.e. it is possible
this sequence can be studied
it is even possible to build a whole atlas of interactions
there are no problems there in principle

i.e. it is possible to single out a very simple and constructive one
control system
for the restoration of the body

you can also make control
For example there by external systems of Reality
and here it arises
The next fundamental point is quite
aimed at what you already state here
almost as if logically having reached this point

next principle
that man is the creator who resurrects
it works almost the same way yes
at the level of the Creator God the One
as well as the resurrected one in the plan there

Well in general, the implementation of its tasks of Eternal development

and here it should be added that these actions
are located
in the space of the Soul of God

that's when we start, that 's the level
consider

for example in my Teaching about God and Teaching about the Soul
we are considering levels of optical implementation for example yes
for example, the action of God and the manifestation of the Soul

then when we consider precisely the Soul of God
then here we see what it means to exist
is it God's free will?

i.e. this, so to speak, comes from God, not like this
mandatory structure for execution yes
A person from the Soul gives only as a rule
free
i.e. acting from the Soul
that's what he wants yes
but he may not force
this is his natural state

and that's when we look at this level
then here it turns out that we have
pretty simple to understand, I guess
well, purely applied methodological management systems, I guess

I'm already switching over now
to methods of resurrecting human creators

when we consider precisely the methodological part
then the methods themselves they look often
as methods that in terms of paradigm or concept
or strategic or something yes level yes
they may look completely different
in no way coincide with those methods
which, for example, I gave on the video course
in 2002 on September 17

and so here when you look at the methods
you have to look at the structure as if Well in general, the target
Well for example you are driving a car
You have the same management methods
on a plane it's still different if you're a pilot

and here we need to consider the approach in exactly this way
there may be some common things there
but often they do not coincide at all
even a different environment in management
the object is in another environment
if the plane is in the air
car on road on compacted soil

so here we move on to methods
must immediately abstract
from known methods as far as possible
which you had before
according to the meaning of the structures of the resurrection of people
or there are meetings with the resurrected

go to what you are currently now
immediately perceive what I am creating right now
these methods
because you have gained that level of knowledge
which allows these methods to be created

including the fact that this is a set of this knowledge
I went there, well, completely individually, yes For example
there in different systems of your management

that's why we come here
to the methodological level to methods as such

so the first method is next
in order to resurrect the creator man
it is necessary that God be present in the creator
as a Resurrection Action
and Outgoing Actions
as from the very one who resurrects
and the Action emanating from the one who is resurrected

therefore we must highlight
God is precisely in Action
it is precisely this concept to highlight the Action of God, so to speak, yes
well then in general, to distinguish essentially from the Soul and the person
what do you mean the one who resurrects
and the one who is resurrected

highlight God after all
i.e. the selection of God
i.e. they must perceive God as an external system

i.e. as external as Personality

here without singling out God
i.e. he must see God for sure

and then it will be clear
when he considers God as a Person
for him the world comes into balance
and naturally in this World there is no place for death
there is already a resurrected one there

this is where this method ends

so the second method is the following

in order to make a resurrection there
super fast super urgent or there for example instant
where there are no time parameters
it is necessary that the Action of God be determined
memory of the resurrected

this can be done very simply
what to take for example just perceive
the memory structure of the resurrected
any element there
what did he remember yes
ask a question
it doesn't matter even here
that he is there for example, I really remembered

that's what he could remember yes
he could remember, let's say, the Kremlin, yes
or there is a TV , yes he could remember

and when you take this fragment
enter that this object, for example, was created by God
just enter this information

and by analogy with when an object is created
you pass on all the knowledge
creation
you instantly transfer the structure of creation
and then the person is resurrected

so the third method
in order to highlight means in memory
structure created by God

you can make it so that your memory is
reflection of the Memory of God
for your Consciousness

and at the same time you can act
by analogy with the resurrected
in terms of some similar actions
For example there to fish or drink something yes

here arises
a kind of conversion of that state
what about the resurrected one
and the one who resurrects
there is a section of Consciousness that you
Well, you could say that it's identical

so this is the area of Consciousness
this is the Consciousness of God

and when you, for example , start to consider
on this structure, well , this process
or should we consider it at a higher level in general ?
what will happen next yes
it is clear that in the Consciousness of God this exists

i.e. you perceive God
through Consciousness
this is the most well , as it often happens, the fastest
path of implementation

because if the Image of God is perceived yes
and receive knowledge from Him
this is possible for processes
may often not necessarily fast
Well there in the analysis when a person creates
or when he needs it specifically for Salvation
suppose yes the Image of God

and when a person must make a decision instantly
it's clear what he needs
Primary Action which is here
if it unpacks the image yes
then he wastes time

so why else is it necessary
The image of God to know very accurately

Well For example there in the physical body of a person
then there is no need
for example, constantly unpacking it

that's why it works
that the allocated Image of God
For example there for all people
it will definitely help you get your bearings
in the following situation

that since there are so many phenomena of the World
and for example a person so that well for example, ask God
about some phenomenon
it should sort of fix the whole row in control
ask later
then, as it were, let go of these phenomena

but the World is completely freely manifested
there for everyone yes
so it turns out that there are such fixing moments
it can't be done

and it turns out that this is the state of the Eternal Soul
here Eternity comes from necessity
act with everyone or something respect the will of others yes

it turns out that Eternity
this is a criterion of a moral nature
in this technology
but in essence this is how it is

the thing is that we have Eternity as a need
so as not to hurt the interests of others
according to the Eternal creative development
this is meant first and foremost

negative development status
here and simply considered as if a program of education or something
when a person still reaches the level of the Eternal plane
and Eternity here is still like a layer of a single-valued level

so it turns out that Eternity is
human need
in terms of well as if free will, including one's own

when he knows that his will will be modified
and for the Eternal amount of time

he will still achieve some specific events
which he wants

then it is clear that man is free ^{yes}
he acts in analogy with God
and he can reach any level
including Eternal development

and the next method is just that
method of achieving

because the obligation to achieve
This is ^{basically} a fundamental level
Well, in essence, the development, ^{so to speak,} of Consciousness
development of Reality

because when you know what you achieve
necessarily some level of management
then what are the problems?
it is clear what you achieve ^{for example there is} Eternal development
what difference does it make to you if you achieve everything

and here it is exactly
the method is of fundamental importance
achievements exactly

so it consists of the following
to achieve
^{well} from the point of view of fundamental Laws
^{means} the resurrection of the creator people
resurrection of any person
^{there is} restoration of any information object
it is necessary to do so
so that all external Reality
including the Reality of the One God
including all resurrection processes
all levels
were shown
with your own body

and when you ^{see} such a design
as a target design
do you understand that the body
firstly it already contains ^{yes} but in the Soul
these structures

and so in this case you determine

location of the Soul

i.e. you show that the Soul must

for example, to be in a specific place

there inside the physical body for example Yes

and then you can fully with the light of the Soul

highlight your next events

at the same time your body is a level

which is forming

this is this unambiguous corridor

meetings with the resurrected

where, resurrected, he is already ready for the meeting

and this is where it happens

the most crucial next moment

method of meeting with the resurrected creator

so here the word "Creator" has two levels

i.e. the resurrected creator who creates his own path

meeting corridor

and the Creator is the One God

when meeting with the resurrected

you are dating at this moment

with the Physical Body of the One God

manifested and remotely

I mean in the form of some events, for example Yes

manifestation of the Physical Body of the One God

including the events themselves

so this method is in that

that you are in the Image of the Creator of the One God

must consider their own actions

i.e., we should, in principle, actually do as He does

it's elementary clear

the most difficult point here is that

that the resurrected which means created

own technology

he must create it in exactly the same way

as you do at the same time

and just as the Physical Body of the One God does

then it turns out that synchronization

you are allowed to meet for sure

and here the next point arises

on the principles of perfect free will
in any case, mathematical, scientific, etc.
the principle of freedom of behavior of an object
if it is an unlimited system
this is the basic level from which it follows
system stability

i.e. you must definitely reach the meeting

then it turns out that synchronization comes from that
that the resurrected must have contact
with God
with the original tasks

i.e. at the moment of creation when he creates
he must have a path to this level
and it must have mandatory contact

so the main thing here is to establish contact
by analogy with how you see God
i.e. differentiate God
i.e. to see His Physical Body there
and how to fix it, highlight it

by analogy He will see it
and then they won't have all these options
of synchronization are broken, yes
fixation or arrival at a given moment

for example, in prayers
or in some extreme actions
often even long-term
there is a certain key moment where there is this
it often passes quickly
some kind of fixed side

and here is this fixed side
this is the Eternity that you have
this is Eternal real life at this moment

if you hold it for a long time
then you stay there for a long time

but then external informational fluctuations
like a collective level, for example
not everyone knows how to be
in the structure of Eternal development

they gradually seem to come out
to the everyday level of Thinking
and you kind of start to get distracted yeah

although before that you may be in the same place
in this place
and be completely indestructible
but on logic you begin to suppose to be
at the level of the usual everyday plan of Perception
For example there are shops, work, something else

so here is the next method
it means it shows and gives the technology of that
how do you think about everyday life
transfer to management structure
for the resurrection of human creators

it consists of the following

in order for everyday thinking
namely the human creator
people-creators
bring to meet the resurrected
you only need to do everything
means take any object of information
which is around you
and this object
combine
with the resurrected
in terms of control from the Spirit
this is where the optics of the Spirit are revealed
it's usually from the heart
at this level it works to the left

namely, from the side of the Soul, some may be
this could be in principle
in general, any object there is a macrogalaxy

as soon as you combine
you get resurrection
in any everyday activity, including

and at the same time the main axis here, so to speak
or what, the main semantic axis
is that you create this object in the same way
how the One God created it

and so you create
what is special about this method
you this object glow
of his own physical body

i.e. it is the radiation of the body that goes to the object
it creates it
as if at the control point in front of you

the next method is
what is the physical body
aimed at the resurrection of the resurrected
it means it is always in the same position
for the One God

this is from the point of view of the previous part of the lecture
it is clear that you are even more exposed
when you work with some unique level too yes
for example resurrecting someone

and it turns out the method is that
that since you are identified
and this place is determined for you
then you can be seen
the resurrected one can come to you
that's all

i.e. the main thing is to understand this
this is the method

so the next method is that
that when you look at colors any
then the color can be transferred to the resurrected
as a structure that exists before its biological departure

and the method and its essence are revealed in that
that it is only necessary to fix in the current time yes
some color
to the biological care system
how to set the screen color screen

then the person at that point
he hardly leaves
from the point of view that it was sort of shielded , yes
the level of care there is from the parameters of the Norm
any Norm

here's an example there he is until the fact of biological death
was somewhere
you have recorded
but the most interesting thing here is what starts further down

that once you have fixed
then first of all you transferred the control plane
from the point of view of current practice
that you have some experience yes
to that area

it has evolved since then
i.e. development begins from that level
where did you give him this color
color as a structure of the Infinite phase of interaction
passed on yes then all your combined knowledge

and it turns out that he has been coming since that time
but at the same time actually having at the basic level
your entire control system

this is a colossally important system, it would seem simple, yes
but from the point of view of creation it is very important

i.e. if the plane is flying somewhere
and for example the pilot well there let's assume he's sleeping, yes
someone wants to fly instead of him
at least he has a plane
and that means he can wake up the pilot

so but if the pilot doesn't sleep yes
then he can learn

here is a nuance of a philosophical nature
consists in the fact that
what does resurrected mean
here he freely chooses what to do
we are absolutely fine like all the time
we are considering here in today's lecture

In general, I always often emphasize this
that the principle of freedom is still choice and will

next method
from the point of view of freedom of choice and will
consists in the fact that
what when do you want to meet

with the resurrected in a busy place
that means the element of his resurrection before the meeting
i.e. he who is resurrected is as if he has not yet been resurrected
you start the primary action

and here is exactly the meeting
with the already resurrected
should happen with, well, some kind of mental concentration
some sphere
and in the center of a busy place

why is this happening
because as I said there are certain connections
talking about that
that the maximum concentration occurs
somewhere in the center of some event
and the next ones are going on at a distance

i.e. based on the principles and fundamental Laws
it becomes clear
that we should try to meet
right in the center

even if they go remotely
let's say two or three people
calculate geometric mean projection lines
just straight
that come from them towards you

and find the projection component
i.e. fix it in the same color
for example the wall of some building yes
there is a reflected beam

and as soon as you fix it
average line length
come in this line

primary criterion
is a person if he is nearby there is a plant
and if it's just a building
then you need to choose
roughly like a geometric center
may be a collection of buildings
i.e. to be approximately at the same distance

This is a fairly accurate coordinate system.

It is precisely in the technology of action of people-creators

i.e. they are the creators of this plan here
that they are still learning to create
when they are resurrected
they are still learning to create Reality

there is a fundamental difference here from that
that's what I gave in a lecture on September 17, 2002
where the talk was about the Resurrection of people in the Infinite Life
i.e. the search engine works more there
in control yes

and here it works from the start
the fundamental meaning of creation is still
man creating
he may not move anywhere at all
he can just create in this place and that's it

and at the same time
in order to meet such a person yes
something like this needs to be done
Well let's say a person makes a fire
how does he know there is a person there
also makes a fire
another person

system of similar actions

it's clear that a fire has been created, which means there is a person there
or at least lightning
but if there is someone else moving on the horizon
with figures of people
then this is a person

and as if this level of uniformity of actions
leads to that
what does it mean to make a person resurrect
precisely according to the structure of creation
it is necessary to take actions that would be understandable
or the actions are the same type

then understandable actions
this is so let's assume there is a fire there

the same type of actions are those that
a person does let 's say when he eats with a spoon yes

this is a monotonous action

therefore just eating with a spoon
this is the technique of resurrection
uniform action
other people may come to this technique
resurrected

and it turns out that for any action
any manifestation of a person
on any factor of his Thinking
resurrected people may come

why will everyone be resurrected
because from the point of view of this technology
so even the form of a person as a form is uniform yes
leads to the Norm, i.e. to resurrection

and if we look at this process more broadly
then the following method is implemented here
well, which acts on its own
even if we do not consider its external connections

we have a wide implementation
own Thinking
in the Soul
Physical Body of the One God

and from here it is clear
that the Soul of the Physical Body of the One God
so it is the level of creation for example resurrected yes
but in a different time

then here the control element is very simple
what difference does it make to us, for example
The Physical Body of the One God
if we start thinking
in the space of His Soul
why wouldn't He take this person and re-take him
you can't put the already resurrected one here
It doesn't make any difference to him in principle.

if we think correctly
then this person appears in this place
and we just meet him

but for this you only need a total of

have as if a reflected beam pointing
and where did God put him?
where did he put it

i.e. and this reflected beam is the so-called yes
due to the phase of your Thinking
this is your Spirit
developed in the Consciousness of your Soul
precisely according to the structure of resurrection

i.e. at the Soul at this level
have your own Consciousness

i.e. we have been talking about that up until now
what is Consciousness there personality yes
which is a manifestation
actions
Souls
Spirit
there is a physical body, etc.

and if we consider the phase of Soul Consciousness
then we come
to a completely fundamental level of knowledge of the World
from the point of view of Consciousness and creation

that two seemingly not physically identified phases yes
Soul
and Soul Consciousness
they can quite easily implement
physical body human
i.e. well, just create it

why did God, for example, so simply organize himself
and can easily have the physical appearance of a person

because He has no problems there
there is a Soul
maybe by analogy with this level of a person
level of Consciousness which includes the truth also the Spirit

i.e. God's Consciousness is different in that
that it has at once the Infinite factor
i.e. the factor of the structure of the Spirit

and He took and self-organized

and as soon as you transfer this knowledge
the one being resurrected is just that
although he doesn't have yes for example, a biological body
then he can calmly
based on these two simple concepts
create your body, i.e. realize it

the process of creating your own body
it turns out to be a process of realizing that
that the realization of the body can be
only from one level
Soul
and Soul Consciousness
in principle it's all the same structure

This is where I end today's seminar.

Thank you very much for your attention

as a practice, try to do more
subject management related to that
what needs to be connected
various structures of my Teaching
for example about God
about Love
about the Spirit
about the Soul
and consider these structures
as a level that will also be implemented
in your practice after all

Thanks again
