

GRIGORY GRABOVOY
10 Technologies – Health Formula

High speed control principle

Lecture 4

Implementing your Salvation technology
from a global catastrophe
I have determined
positions of human consciousness

under which
this Consciousness must be able to counteract
increasing existing threat
global destruction

in accordance with this
every person can participate
in this general program of Salvation
and allow yourself with the help of thoughts
with the help of the mood of your Spirit

be able to overcome
a wide variety of diseases
the most varied situations

this technology is spreading to everyone
it has no limitations
she is absolutely creative

and in accordance with this
she can practically
solve any kind of issues
and can spread over any distance
in any social strata
and for any time

therefore the development of one's own Spirit
through the knowledge of one's Consciousness
of your thoughts
allows you to control the environment of Reality to the extent
in which it is necessary

in the conditions of development of the man-made path

this is very important
especially at the present time

I'll move on now
to consider a specific case
associated with the use of this technology
for healing
from inoperable pancreatic cancer

and we will extend this case methodologically
on all other principles and methods of management
as I call them
due to the fact that this is precisely what management is

i.e. the solution to the situation
in time and at any distance
in case of pancreatic cancer
the cure is based on that
what information is healing
located
in the chest area and below
somewhere in the area of the stomach projection

and if concentration is done
through this area
on the area of the human heels
that is the human body
interacts
with the external environment in this way
that the body's receptors are activated
which define the Norm

i.e. health in relation to this diagnosis

this principle
spreads to other diseases
and thus healing occurs

you need to do this concentration
concentrate additionally
on the big toes

thus it turns out that
that having learned one practical technology
you can spread your knowledge
to solve completely practical issues
already across a wide spectrum

virtually any spectrum of diseases

and help in critical situations
which can be completely different

the speed must be very high
so in this case
This is the principle of high speed control
