

GRIGORY GRABOVOY
Methodology of healing
**The technique of "invisibility" of clairvoyance
for Perception of other people**

Lecture 5

This lecture is aimed at
to determine
your perspective of clairvoyance
in the criteria of Perception of other people
other personalities and entities

the point here is
that when you start to show
the structure of your clairvoyance
then those who surround you
they can perceive it as a certain wave
speaking
physically determined frequency

and then they begin to understand
that you want to get information about them
or take information from them for something

due to this
I am introducing a technology based on that
to develop clairvoyance in this way
so that it does not interfere with the Perception of others

i.e. so that it does not affect the Perception of others
This is a special technique
it is based on that
that you do not create a superconcentration of information

to put it simply
do not create those forms of information
which can be seen from the outside
but at the same time you have absolutely all the information
which you need

This technique simply allows
achieve results faster
and manage the time it takes to get the result

if this concept of "superconcentration" is involved
when concentration is already visible

then the time may be delayed
before completing this task

if technology is used
which allows you to do it without that noise
which can be noticed
you achieve results within the timeframes you set

therefore, the execution of certain tasks
It also depends on access technology
i.e. speed of access
and the absence of external noise

so this is the technology of clairvoyance
again the manager
the perspective of this clairvoyance includes that
that at every stage
you get the actions and events you need
consists in the fact that
that first I will introduce the axioms
on which the action will be built

first axiom:

clairvoyance of this type
i.e. which controls at maximum speed
and in which, in fact,
under the action of your Consciousness
there are no fluctuations of Perception left in other sources
based on that
that you seem to see with your inner eye
in fact, the structure of your Soul
consider Consciousness
at the level of such a representation
that there is such a big sphere above you
this is your Consciousness

and you are from the Soul
located, for example, in the Soul part
located in the physical body
look
on the structure of your Consciousness
just watch her

after such training
and then once you have made the observation
the axiom is that

What
The soul reacts to Consciousness in the same way
how Consciousness reacts
on the status of the Soul
at the general level of the World Order

This is a very important axiom
its meaning is multifaceted and multi-layered
it changes over time
but it is best to listen to it several times and understand it
axiomatic level

if you set a goal
then the goal can be determined by the impact on you

The second axiom is that:

before performing an action
you should always determine
degree of influence on events
external
or internal sources
in relation to
to you
and in relation to
to this event

The third axiom is that:

if you perform an action
then this is action
should be directed to the Salvation system
from the perspective of not only Consciousness
as if a conscious thought form
but also in the context of the further development of your ideology
on each element of the action

i.e. in fact this means that
what if you set a goal
a certain event structure
or improving health

also by the way an event-based construction

then it is important to move towards this design
improving on every element of movement
through the precise technology of "how to do it"

knowing "how to do it" is

what should you consider
your own path of movement
as the source of this design
which you lay in the future

i.e. for example, some event
so that there is constant improvement and optimization
at all levels
during your inner Consciousness
the axiom is that:

element of your Consciousness
is the center of this structure
in fact you are building
on your Consciousness

so that's what it's based on
from this axiomatic principle
consisting of three axioms
there is a special technology

it is based on that
that you listen to what I said first
about the third axiom

then you listen to that
what i said about the first axiom
i.e. you listen as if discretely

and then when you are already listening
what I said about the second axiom
you should get

from the second axiom
first first

then the third

and then from the third
get the first one

and try to understand it
how does this happen

when will you do this training
This is actually a training
you will achieve the element of maximum clairvoyance
i.e. the maximum degree of disclosure of clairvoyance
in the required component, i.e. for the required task

exactly the one I told you about

what I told
on the use of axioms
need to use one word

use without word spacing
where maybe there is some kind of gap
between words or between sentences

i.e. the use of the entire set of information

so information
built sometimes
without any internal connections
meaning sequential

some phrases can be considered
as completely abstract
and achievements related only to this technique
angle of True clairvoyance
which is synchronous with the system of development of the World
