

GRIGORY GRABOVOY
Teaching about life
19.09.2003

Hello again
The topic of today's seminar is
my Teaching about life

in accordance with the Teaching
for example, About Salvation and Harmonious Development
or take there if in accordance with the Teaching, for example , about God
then the following line can be traced here
precisely in the Teaching of Life
that we first of all single out life itself as such

i.e., for example, in the Teaching about God we consider
and interaction
and at the same time
The action is primary to God

and in the Teaching, for example, On Salvation and Harmonious Development
the target level is
achieving Salvation and harmony at the same time

then in the Teaching about life first of all
here we need to consider
it is the parameter of the word "life"
what is life
i.e. the allocation of life
and the movement is in control
and in general, the movement is like along the river of life

i.e. act so that you always live

when you consider this Teaching
my point of view , for example there are previous technologies
then the following can be highlighted here
that the very structure of life
is determined primarily in you yourself

i.e. you know how to act in this way, for example
that you live at the same time
as if spontaneously, i.e. you live and that's it
this is the first line of the primary factor of life

and there is also the next line
where do you support life
as if on a logical level
and this logical level is like this
that you are just on everything
Well there for example, you drink and eat
are you taking any measures?

but then it starts to happen
The spiritual aspect of life
i.e. if you ask the question
For example, why does a person think?
i.e. where is his life, for example, at the moment of Thinking

it's clear that he thinks yes
but if we take
the structure of God's development
i.e. initially how God thought
then He had Life before His birth

i.e. He lived because He knew
that He will live
and He is at the moment of self-recreation
already knew the phenomenon of life as such

i.e. there is such a universal, let's say, environment
where life as such actually always exists

and when we, for example, reach such a level of understanding
we are coming
then it turns out that we can consider life
as the primary aspect on the basis of which
generally speaking, a reaction is created
to any other phenomenon

for example if we consider
level well there is no stone there
what applies
as if to the nature of static systems of the World
then here it turns out
that life is what movement is
near this stone yes
which in general is also a form of life
but this is a more static form yes
form of manifestation of life

it turns out to be static things
these are manifestations of life

and dynamic things
this is ^{basically} life itself

if we consider
^{well} even the principle of DNA ^{yes}
a rapidly developing system
you can see it here
that at the moment of DNA growth, ^{for example, in a baby}
we see the following configuration
that the baby perceives the World ^{as if} still inside

^{for example, in intrauterine development}
he perceives the world
as the world goes
to him
and from it
where is it this growing body

and if we look at an adult
when ^{well for example, even when a person is already born}
there is a growing body of course
but a ^{level} of intermediate systems is already emerging
in which there is a place
there is a cure
there is room for words ^{there}
or a place of some external information

this is the intermediate level
it's there
where is your life
contacts God
with the Life of God

and when do you start
enter this level
^{well for example} having listened ^{there}
my Teaching
about Love
About the Spirit
and ^{and in general} ^{For example}
taking as many structures of the Teaching as possible

here you can see that the characteristics of life
this is what actually groups
even here are the various structures of my Teaching

in the direction of life development

i.e. that's what I'm saying
what do we need for people to live forever

i.e. the logical phase of action
Well For example there is the structure of my Teaching
it means she directs towards life

but man is built the same way
after all, a man is like himself
always self-directed towards life

and when we consider for example the following status
this is how an adult perceives it
the whole world

then here it turns out
that the compression system is already starting there
life seems to be squeezing
here is the reference level system yes

i.e. if you compare it to a growing child
this is the World going as if inside
life of the world
embodied within
and coming as if by light from his body
to an external system

i.e. he is generally more mobile
Children, after all, they run more, right?
they seem to be more agile, more mobile

and as an adult he already perceives
well, like the increase in atmospheric pressure
as already that it is located
in a certain projection of life
Well, that 's how the titans held on there
some there like high-heavy systems yes
in the collective understanding

and so is this projection of external life
for example, the outer worlds yes
she starts to put pressure on the person
i.e. to form its shape in general

and in essence it turns out

Well, life shapes form
of every phenomenon
exactly as the phenomenon exists
from the Creator by the Will of His Spirit
Here is the formulation implemented

i.e. after all, the Creator has
May be
and the Will of the Spirit as a Personality
and the Will of Consciousness
and the Will of Logic, etc.

here it turns out that when we consider
Spiritual Will of the Creator

and the Spiritual will of man
if we compare by analogy
it is often determined by the state
there for example, an emotional state

then for God this is a state
this is Reality itself
Well for example Earth stones plants

and here it stands out
it is the status of a person
what if we take a micromolecule
that state of the Spirit of God, for example
in the phenomenon of life itself

and in my structure of the Teaching about life
this is the manifested part there
we can see it there with a microscope
or calculate it in mathematics

then a person is a level
which God reproduced for that
so as not to differ from Himself
in Life i.e.

and when, for example, we come to such a status
it turns out that the person then
generally speaking, he shouldn't die
in this case he is no different from God at all
at least according to the criterion of life itself

why did I immediately single out life separately

Here is life before us
this is absolutely clear information
it has such a fast-flowing changing form
light, very dynamic
and we are in it
we are actually in it

we see only one segment
this information
in front of you

but if we look around
then it's clear from the same status
what a child
it's actually easier for the child

as if to an adult Well, it 's more complicated
in terms of this level of focus, yes
this optics of life
and when

but this is life itself
i.e. the concept of complexity
here it is not included for example in that
that it is difficult to overcome

so these are the problems that a person creates for himself
and for example Well it doesn't do that there
as for example clearly indicates
precisely the One God

here they are often associated with that
what is he well as if it does not differentiate
signal coming
it 's from God
and the signal that goes
from a derivative level after all
and such that God perceived it
as previous
level of self-awareness
precisely the standards of living

this is a very complex concept in principle
and that's why it's so stable

i.e. when God looked
for example the standard of living

Well, that's exactly the level
which seems to spread into the Infinite Future
then he looked at
First of all, the movement of every person in general
i.e. his desires, dreams, his actions

and God paid his attention
but by ^{by} for various reasons
people behaved one way or another
but from the point of view of life
any human behavior is neutral

i.e. for life
when a person lives
any behavior is neutral

just like for God
every man is equal

i.e. after all, it is in the nature of life
there is life itself
no matter how he behaves
i.e. he might be ^{there} for example bad
^{well} from the point of view of others
or is he good or is he something else

but if he is alive, ^{for example, yes}
and at the same time has, ^{let's say}
a certain stereotype of thinking
related to the implementation of some problems

then for life itself
there is no interest at all, ^{so to speak}
here for this information

Well ^{for example,} let's become the information of life
and we will try to understand it
what interest

if a person lives
what 's the point in that?
^{so} should we analyze
some kind of human thinking ^{yes}
from the point of view of life information
it turns out that there is basically no point here

i.e. for life

every person

This is a neutral system and what's more, it's such a neutral system
which fits together very organically
with the person himself
as if with the outside world
where life is manifested
and where life exists as such

what I'm saying now I'm talking about that
what do I need you to consider
it is precisely the process of life as such

i.e. not even in the plan there
Perceptions through Consciousness
and to be in life

Well for example, you can think about that
that "yes, the sea is very good and you can swim in it"
but you can swim in the sea

these are basically two different things

and when we consider
a phenomenon of life that is connected with that
that we are being realized according to God's plan
well in terms of desires
For example there is a man going swimming

then here it turns out
what from the point of view of life
when the process of human thinking
has no significance in principle
and events are happening around

here it opens
it is the structure of direct vision
those. for example clairvoyance

after all, clairvoyance, i.e. seeing other events
this is a vision
manifestations of life again
or life itself yes

and when you move on to this process
then as soon as you kind of tune in
with this dynamic system
well which is called life
in information

or for sure at all
or is it just you who perceives it that way

then you can see it quite well
that the structure of your Spirit is so manifested
that the Spirit exists
as if well, let's say the guiding thread of life itself

i.e. there are if vertical structures
which we perceive
as life structures
and if for example Well, let's consider it
as the surface of something
not even a cocoon but rather a line
it is possible and as such a scattered cocoon

i.e. there are lines around
some event even
and there is a central line

i.e. the central line
this is the manifestation of the Life of the one God
and the outer line is the life of those well systems
who participate in the event

i.e. very simply in my Teaching about life
determine where God is
very simple
in terms of working on information, it's true

i.e. here we see the Life of God
and His Image is already the next level

i.e. for example Well, you could say
that the human cell lives yes
somewhere there locally on a piece of skin
healthy normal cell
but the image of a person is different
he is not a cage

it's the same here
when we see the Life of God
then we see Him mainly in some part
i.e. some manifestation

i.e. what is the difference
for God

Life and manifestation are one and the same

and for a person, for example
for any other system
this means there is a manifested system
and there is life itself

i.e. everything is very clear here
a person is always in life itself
Well, basically that's why he lives

and for example, manifestation for example
that's what i said
some static systems

i.e. if you think about it
then in relation to what
life was manifested
i.e. how to record life at all

static systems need to be created
are forests there
also by the way a form of life anyway
seas well as a rule it's soil stones
stone as the most concentrated system in time
i.e. the concentration of time in the stone is very high

if we are from the point of view of life for example
Let's consider such a process
what we assume we have
dynamics of human movement

i.e. a person is free to commit there
completely different movements
i.e. to move completely arbitrarily
he can behave as he wants

the stone is more static
some external macrosystems influence it
Well there is God's action there for billions of years
may affect
there on the movement of some stone locally

i.e. the life line is very concentrated there
line is what corresponds
as if more in the understanding of man
that movement is life

Well there is a man moving there ^{yes}
the animal is moving
the leaf is moving
the plant can grow

and when we by analogy
logically we come to the conclusion that
that there is also life in stone
but it's just more concentrated and static
we find life everywhere then

so did God
He actually breathed life into it.
after the element of self-realization
in the idea of Life
in that Life is everything

and when you come to this understanding
then they can be cured in a completely elementary way
there are malignant ones
and malignant ones can be cured
including quickly in the last stage

when a person ^{well there} tuning in to the stone
and revealing, ^{as it were,} a compressed structure of life
which in principle ^{is like} from a human point of view
does not change
he enters ^{and} self-configures
in the system ^{we assume} Norms ^{yes}
which exists ^{in general} in natural phenomena
and at the same time it is restored

there is such a ^{common} practice
some people can recover
near the stones ^{there}

the same applies to static phenomena
such as trees that can grow ^{there} for 300 years
and in general any systems that take a long time to develop

the simplest level of control
in this case
this is concentration
i.e. just a blue sky
space where ^{in general} even
if possible not too many clouds

but so that they would be better Yes as if variety

because the flame of life
as well as the flame of human action
it requires more than just a static background

then you can recover simply from that
what are you looking at the clear blue sky

that's how it turns out
that a person can recover
from any static image

but then it turns out, for example
Well there are eyes in relation to the chest yes
to some adjacent part of the body
they are in the same place
or there is a cell in relation to a cell
also in the same place
almost always
especially the cells yes

then it turns out that
well, in that case, if you press your finger
then it turns out that they can kind of shift somewhere

but that's not important
there is a kind of Norm laid down by God
you can squeeze your finger
hold a pen
there is a place where the cage was located
even if you clench your fingers

and it turns out to be a lot of rigid systems
that tightly coupled systems
static dynamic

dynamic can be static
at the moment, there seems to be a mutual change of phenomena

and if you, for example, reason like this
then you can look
for example the following picture

why is there some stone lying somewhere at the bottom
let's assume there is some kind of cave or grotto there
it hasn't changed, yes

and why does a person age?

Well, just ask yourself this question
what is the fundamental difference
if you understand the structure of the World

and when we for example Well there we pose the question
about Infinite Life
then here is the phenomenon of Life itself
as a momentary or current phenomenon
which is always with you
it is of fundamental importance
because with Infinite Life
this phenomenon is always with you

and therefore studying this structure
precisely as a phenomenon
This is exactly what I show in my Teaching about Life
that we can distribute instantly
knowledge of Eternal Life
just caught it in one moment
the structure of this World

i.e. in terms of technologies, i.e. Eternal Development
Well for example by asking a question

question
and starting to analyze it, to reason
be part of the structure of a thing
that means trying to adopt, for example, some information
in terms of statics

therefore, during rejuvenation
in structures, that's exactly what it means
well, constant Eternal Life
moment of selection
phases of a kind of dynamic phase of current life
this is a very important point
and it very conveniently appears clearly
For example there in prayers
when this vibrational movement occurs
so soft

they are precisely revealed
structures like curls of life itself
they look exactly like information
like some curls

and such soft ones at that
what if you run your hand here, yes, this lock of hair
then the hand is restored
and what about this place specifically

i.e. that is why there is a very simple one here
recovery element
having selected the system
and as if entering it
as in the structure of filling and life
you are filled with life

this is where the restoration comes from
it's a very simple technique in general
the only question is
Well, well, well there are bunches of grapes hanging there and some vines
you just need to find them in the information

and it turns out
they can be found
as by reasoning
that's what I said, if we understand
why the stone didn't restructure
there hasn't changed at all

why should a person change
what is the fundamental difference

Well, yes, the concentration of time is different.
Well then let's just sort of fix it
Well how is grounding done yes
as if we were fixated on its dense structure of time
and that's all
and then the person lives again
Well there at least he can extend life by 10 years
due to the correct inclusion there in a minute

i.e. the situation here is basically that
that these are the ones that cover it, as it were
lines or stripes of life, these are the movements
they lead to that
what about questions of resurrection
the following question arises , for example

that when resurrected he is often just for nothing
as if it were snatched from the information
this strip

and becomes alive

i.e. the transition is very simple

what well there let's assume there is sand yes
there is dry sand and there is the tide

and as soon as the tide passed

it gets wet

where there is life water yes

i.e. there is life there

it's also natural because there is a tide

life works the same way

life just comes in

Well how to put it mildly

but it's always noticeable

that's the difference

life always enters noticeably

if you listen to yourself for example

then you probably remember that you noticed something

at a very early age, well maybe even there

in intrauterine development

i.e. some kind of white noticeable systems

and when you rejoice

life becomes visible

i.e. joy is that

that you notice life

or in others there or in your own

it turns out to be a sensual level, yes

such as joy

This is, in general, a diagnostic of the manifestation of life

and when well there are people who are calm

but then there is joy of the Soul

that's the difference

i.e. they may not be emotionally happy

but the joy of the Soul gives birth to the heart

creates a heart

hence the sensory level

intersected with the concept of life

well maybe not even in such a simple form

but it gives birth to organs

here is the external life
may mean to create an organ

Please note that in many ways
this is completely new so to speak
first time announced material
in the structures of my Teaching

what is the external system
which you observe as life
you highlight your own structure
can create within you
For example yes some organ

but here the task is precisely that
that this organ is created in the Soul
we need to highlight this optics
what exactly is in the Soul

i.e. life creates
this organ in the Soul

but the Soul
it is already completely legitimate, yours
to highlight as if control
and get
a healthy organ for example in the physical body
or cure someone

but then you can have like a matrix
having mastered some system
Well how to add the matrix of the Norm
and then spread life
just like in all directions
more the better

and notice
the more you spread
the more you will strengthen
that's exactly how the radiation of your matrix form is
i.e. you will be life-bearing to an even greater extent

then it turns out
that you can actually enjoy life
so seeing others here
just seeing other living people there for example

and when you comprehend ^{this Truth}
then it turns out that this ^{means} joy of life
this is Eternal Life in the local system

and what about that joy
when you just see other people
pay attention here

in life there is a very clear parameter
that you are already in Eternal Life
when you feel joy when you see other people
completely unfamiliar people just on the street

inner joy
which ^{seems to be} perceived more
and with heart
exactly with that heart that I spoke about
that this heart can be created by external life ^{yes}
with the heart located in the Soul
and at the same time with a real heart

i.e. on logic
you are closing these two hearts

it turns out to be external joy
she may be ^{well,} actually
not specially created
here's ^{an example as if} joy is real
^{probably} quite difficult to create specifically

and here ^{it seems like} it is not necessary
joy must arise
from natural control systems
from natural affairs

i.e. even if you just rejoice
set a goal artificially
it's not the same joy anymore
this is the external structure
where life ^{seems to} exist only in that place
where are you real
you are with yourself

i.e. life is a structure
practically ^{well} self-knowledge and self-regulation

i.e. in relation to this information
you know exactly where you are
well in that form or it means you are such a person
how God originally created you
for the current moment
for this moment

and when you start to realize this
you see then what's the difference
by analogy with God
all future moments
and all the past moments
it's basically the same thing

as then in the current phenomenon
to highlight, for example, the phenomenon of future life
but it is very simple

do the bare minimum
there is no possible global destruction there
there are some actions on target management yes
well, as harmoniously as possible
for everyone but always exclusively creative

pay attention
that the original actions of life
they are always well as if creative
by themselves

if you are in this system
want to do something restructive
For example there break a branch, let's say even that one
which has already dried up there for example, a branch of a plant

then pay attention
what does the concept mean here
that it will break
in Consciousness it will go like this
that first comes the restoration of the branch structure
then if during this time
it seems like it doesn't have time to become elastic
for example, you can break this branch

but that means exactly it
how does this branch fill with life
you can see it very clearly

but to do it you have to not break it
and for this you need to know the tree
and where does this tree grow
and the whole world
to this branch
saturate for example there is moisture there yes
with vital juices

it turns out that means we can make life
if we realize the whole world in its entirety
and we realize that in this World
almost everything is achievable
which corresponds precisely to Eternal Life

here are the parameters of Eternal Life
they are still laid down first of all
as a volitional system
it is in the structure of life

here in my Teaching about life
attainment of Eternal Life
this is a volitional system

but in essence, logically, that's how it is
a person is forced to overcome there
forced to recover there
if he has any problems
and solve some issues
it is still a truly volitional system
here for human logic

and here is also the thing that this is life itself
highlighted in your Perception
and the level that you, for example , comprehend
solving this problem
plus logical phase
gives birth to the Spirit of the actual external World

i.e. the Spirit that exists in the stone there
Well, there is a kind of teaching, for example , among the Druids, yes
about the trees there, etc.
i.e. there really is a structure of the Spirit there
which has a certain phase
that structure of life
which one well as if it has its own forms, so to speak

then it turns out
that a person knowing the structure of a tree
and knowing the Laws of Development
can really be used for that
to raise vitality

Well there are decoctions of various herbs, etc.

and here too by the way
there is some kind of arrangement of stones there
even if you take two matches, yes
It would seem that the matches
Well, that's why they are used, to burn

i.e. they have a future structure
that they can be set on fire, for example
Well, someone will set them on fire somehow
and they will burn

but if they are positioned correctly
in relation to a person
they also give life energy

i.e. in my Teaching about life
any structure
which, for example, exists in the current time
can give life

and moreover
if you for example let's say we've already mastered it to the core
the original structure of the World
this is where the Life of God is , and coming from God
and the Life of God as such
One and only
having , for example, a Single Physical Body
precisely in Perception
that's exactly how it is if you look at God

then here it turns out
that you can then light a fire
without using these matches

i.e. you received a charge of life
then you can light the fire
in relation to a thing
well, which should have been burned earlier, I think
i.e. its structure of existence

should have stopped somehow

but it turns out
that is precisely in my Teaching about life
can be seen
what if the match wasn't lit
she well as if it had an end to its development
in general, in the life structure of Perception
in your life it existed correctly
you saw it
or someone wanted to set it on fire

hence
any object in your Perception
must be Eternal
so that the complexity of life is not broken

i.e. basically nothing
should not cease to exist

and it turns out that
Well as if their own life
not a single element of Reality

then it turns out that you have
you can set the fire like that
but this fire will already be Divine
it won't burn your hands

then you can too
Well, in principle, you can cook food there
but it still doesn't burn your hands

i.e. it turns out that
what is food then yes
the question arises from this point of view

so if there is such a fire
that means he himself has this form
which is the life-giving form of yes
there is everything there for example

then it turns out
you can create food in yourself

and this is exactly how the physical body is designed
that all components of life
exist inside the physical body

contact systems
which for example Well, they do
to food and water consumption systems
these are systems of interaction in general
with the external structure of life
in order to know
Well as if an external system
as if from the point of view of the reactivity of your body

pay attention
what well there in case when people are there for example they are starving yes
long enough well as if sometimes for medicinal purposes
then it may be an element when the skin
for example, it begins to absorb microelements
if there is a person swimming in the sea in salty water
i.e. a person begins to absorb the external system

i.e. exchange structures
start working more actively
as if attracting the structures of the external world

well i.e. the world
as if it sticks very tightly
here is the information of the World to man
then this is external pressure yes
pressure of life of the world

and here only that process arises
Well, this isn't some kind of pathological pressure.
but it just exists in reality
such as there is pressure of information there yes

here is an external object of Reality

so, to balance it out
tune in to peace
or let's assume there are martial arts masters there from ancient times
which often had great perfection
but at the same time they didn't really participate
in the fights as such there
having just an internal reserve

they basically could
check your actions
well, strength, as it were it means that they have achieved strength
if they can

Well For example there are a lot of movements to make there
but not to damage some plant sprout, yes
For example there in combat movements

and here is the internal interaction
gave them harmony
in terms of interaction, as it were, external

and in this case
the one who actually practiced and participated
let's assume there in sparring matches
they always set a goal
emphasize some level
or inside the body
or externally
and which would not be damaged

i.e. in any situation
some one level is preserved
either external or internal
then a person lives

i.e. he wins in any fight
informational or some other

and it turns out
if we look at it this way
disease
then it's only worth it
find some reference point
which does not mean changeable

although it could just be a healthy cell
it could be some organ

and around this level
to twist the structure of life exactly like this
how Life was created by the Creator, and by the One God
exactly like that
according to this structure of Thinking
according to this development structure

I'm giving it to you
it is this structure of Thinking and development

i.e. just set a task and complete it
Well there for example , with my heart, yes with my heart

then it turns out that you can
build your body on life lines
and it will be natural for you
i.e. a naturally living person
he doesn't feel the weight of life

Well, that's ^{really} what people there are for the most part
Well, in healthy people, ^{yes}, to a greater extent
the condition is such that they feel normal
and feel at ease

i.e. external pressure
the so-called, ^{well}, in quotes, "pressingness"
i.e. external information of the World
where life has the same right
^{it means} there is an existence there
trees
plants
some kind of midge
as in principle at any other level

and interaction
harmonious interaction
assumes non-destruction of forests
non-destruction ^{for example} so some kind of system
^{well} any information

and here it turns out that it is very important
is again for analysis
in the structure of my Teaching about life

is the structure of the analysis itself
based on ^{the assumed} level of the stone of the same ^{yes}

here are the stones lying next to each other
but ^{for example} they don't destroy each other
there or somehow they don't even move often
if there are no target flows, ^{let's assume}
unless they are moved on purpose

or galaxies
they are somehow hanging nearby, these planets
but for some reason they don't fit together

Well, it's clear that there is a concept called "gravity"
there is physical

I speak from the point of view of the Spirit of your knowledge
why are they hanging next to each other and not colliding

and because here
structure of the World your Perception
highlights what you need

and you form
in your own life
this structure of the World

here you are already coming
Well For example there to the structure of God
which is your manifestation
precisely in you as an Action

you are the Action of God
but God is indestructible
then you too are indestructible

i.e. it turns out there are no problems at all here
from the point of view of this approach
any person who left well there is anyone who died
he must live then
it may just be later or under different conditions

if we kind of think about it here
where from, well for example such quantity yes
there, for example, God creates new souls

and how does life move in general
in terms of there being some measure there yes

then this is this Buddhist theory of reincarnation
that's exactly what she is
what is the element of the World
movement was expressed
well, an unchanging source of life
of this Soul

basically this is the Soul
this turns out to be the Eternal Source of Life
in fact, if so, how is it not destroyed
if you look at the structure
exactly as it is
then in life there are phenomena
which are Eternal from the beginning

there is the presence of God
but there is also the development of the personality itself

and if we intersect with the structure
personality

And

God

then it turns out that in personality

in general, the characteristics of those are often not reflected

that he is, for example, a human being

he doesn't always compare himself, for example, with the level of topics

that's where let's say God is located yes

in it where He is manifested in it

and where is he himself?

if you ask yourself this question

there is no answer to this question in general

at least fast

You can analyze this for a very long time

and rise further and further along the line of life

but at the same time you will see only life

i.e. here is a very simple technology

see just life

and therefore to live

just to ask a question

the one I was talking about

where is the difference between

you

And

By the action of God

this is where there is a level, so to speak

or division

or vice versa, greater density

or what? here are the interactions yes

and then you already live permanently

just by asking a question

i.e. it turns out that life is a criterion

exists even in the structure of the question

i.e. if you are ^{good} at anything at all ^{as if} interested
so it turns out you live
from this point of view

and therefore the meaning for Infinite development
under current governance structures
all you need is just that
that you set tasks and accomplish them

and when you set the tasks of Eternal development
then you end up with so many things to do
you ^{basically} have to all the time
to be interested in something to do something

it turns out
the goal forms Eternal Life itself
Eternal Life itself is formed
just a logical goal

i.e. a person is designed this way
that the logic of life is that
that it has an internal system
as a system of questions and answers
as a mind
as ^{in general} your physical body

the body is
^{Well as if it were} a proposal to the whole Reality
about life
and in general as a phenomenon ^{and} the body itself
and that's why we're looking at this system
as a very soft and favorable system
for a person here in knowledge

that the question is not so strict
highlight where God is ^{there}
in terms of interaction in life
and where is the man

but because you highlight
in the structure of life itself

this is where a very important issue arises
softness, that ^{is}, contact with God
in the fact that God also lives
i.e. He is in this environment
for a person

and for Life well for Life
and for God
this turns out to be one universal environment

here we finally found it
a system that says that
what we have in common
Well yes, of course this is logically common
but it is precisely in terms of management
what is common is precisely the concept of Life

and we use it
as a person
so is God
then on one level
Well as if by one source
which of course was originally created by God
but He created something very important here
knowing
that this exists it is
and this is the basis
on which He will make Reality

this is what structure means
in general, his own development

for He saw
Life as such Your own
before the act of Self-recreation of Self-creation

and here it turns out
that God is the whole external static Reality
defined
as Reality of reflection

i.e. Reality of Reason
perceiving Life

i.e. for example there are stones mountains galaxies
this is a certain form of Reason
which perceives there for example your life yes

and if this is Reason
then you can always come to an agreement with him
i.e. it is always possible
activate the oxygen molecule in a vacuum yes
you can always create a site for that

to breathe in this vacuum, etc.
if we develop the technique further

and by logic
God has determined the accuracy
after all, He didn't cross the molecules there once again
where it is not needed
He knows exactly how

here to know exactly how
need to use
just one criterion
generally accessible to everyone

you just need to fix it
such a characteristic
what to watch
where life grows

i.e. where it grows
then you are doing it right

and when you
you observe this characteristic
By the way, this is the characteristic
very easy to understand

growth is always going on
Well it looks more like a cone on the contrary ^{yes}
like a bouquet growing from the center
and growing as a rule
always towards God

Life always grows towards God.
well, according to the system of crystalline orientations , so to speak
this is a very simple level of understanding

God is where you see Him
on Consciousness
or perceive by the Spirit

grows towards God

and therefore
eventually you come to yourself

i.e. studying the phenomena of life

you still come to yourself
but precisely at the point of life

i.e. at that point
where do you live

when you, well, you live completely, right

when do you start
proceed from this level as if a point level yes
then you see
at this point is generally speaking the whole world

i.e. you realize
that the whole world is alive
which is divided
into a seemingly perceptible part
Well there are external Macro-phenomena

and as if the inner Spiritual part

i.e. in life
logic is like an external part
Logic of Human Perception

Consciousness is the external world
from the point of view of life
or from the point of view of life information
or for life itself as such

while the Spirit
and Spiritual basis
Soul
it is you yourself

and it turns out that this is what
inspiration and life
Spiritual phase of life
gives birth to your physical body
which is the boundary
between logic
And

for example, Spiritual level
which has an Infinite phase

because life is at the same time
it has a compressed phase

For example there in the form of information
but at the same time it is a source
Infinite Divine Level of Eternal Life

and in such rather complex systems
in this case there is no need to even go into them
because the phenomenon of life
it itself shows how to proceed further

Well, a simple example is a ship sailing.
there are some phenomena of life at sea yes
but he floats
and the next phenomenon is determined
including the characteristics of the sea
or the ship itself
or there is a crew

it turns out that if we don't have there
some external problem
in relation to this ship yes
lightning or some external influence
that is natural life itself
determines the next move

Well, it turns out to be a somewhat philosophical Law
but nevertheless it looks real
We still don't go far from Reality
especially in the phenomena of life
which we know in essence

and when there is external influence
for example there is a possibility of lightning there yes
then here we see that God does so
so that others can understand

pay attention here
external, well, kind of threatening natural phenomenon
this is so that others can understand

i.e. we are talking about that
what is he
through our Perception
passes on to others

but if well at the same time He does not threaten
He understands that this phenomenon can be circumvented.

for example, you see thunder
and the phenomenon
the other one doesn't get into some difficult situation

but if the ship is already there sailing on the sea like that
Well, this is ^{how} events are unfolding
around him
that lightning is passing somewhere very close, ^{yes}

then the question arises
and who perceives it now?

to find the answer to this question

how to get around this section of the sea ^{yes}
to prevent lightning from striking the ship
i.e. for this you need to turn to another

and here in my Teaching about life
another life-bearer
he always gives an answer
God always brings an answer through someone

Well, of course I'm not calling for it ^{there}
as if to look very closely ^{there}
here I am voicing more
the philosophical meaning of this phenomenon

but nevertheless it happens just as often
the person ^{there} gave some kind word, said some advice
and yes, things have moved for the better

i.e. this one here
as if the culmination of life
in terms of implementing the collective will
that's how everyone lives
and ^{that means everyone} is developing
there is no biological death ^{for example}
there is no destruction at all

this is the culminating moment
it is contained in that
what a person understands
what's in the wild ^{there for example,} human life
some other creatures
God
there is one very ^{serious} status

that life is first of all defined as such
initially to everyone
and it is given to everyone on an equal level
including
it is given on an equal level
and to the One God

and in connection with this it turns out
that God is One
here at the standard of living
can tell everyone very quickly
like along the corridor like like
Well, to put it simply, as through an information channel
can tell very simply

well, all the phenomena of the World , for example
how one should have , for example, Eternal development, etc.

i.e. life is like a channel for transmitting knowledge there
your personality
where are you with your initial standard of living
already at the same time never from him
Well, they shouldn't, in fact, according to God's plan
move away

and in connection with this it turns out here
that the status of your life is determined by that
that you also have a responsibility before God
for the fact that He did so much
and when He sets such tasks
He created you
this is more of a basic level

then it turns out
you have to do something too
so as to justify, so to speak, His trust

why does internal monologue exist
between God and man
where, for example, a person asks for something
or God does something to him

but in essence a person lives his life
Well there approaching God yes
and fulfilling His tasks
towards Eternal Development in essence
he is fundamentally here

it still rises
status of public consciousness
He then takes it
and somewhere these actions are manifested

Well of course there is such a level
that a person, for example, is in the mountains, yes
he is meditating there
but he found his status
in relation to society all the same
even if he is in the mountains

in modern conditions
this is becoming very relevant
to acquire direct management practices means
Well For example there using the technologies of my Teaching
precisely being in natural conditions

i.e. not, for example, somewhere in the distance
where possible of course
control external elements of Reality
but how then to bring life
into the technical system

i.e. how to make life, for example,
which actually exists
well in quality there
it means some external static system
let's assume there is a dictaphone as a form
through which one can view life

i.e. if so how is this manifestation
or there is a stone
or table
any external element at all
which does not correlate
precisely with the concept of man as such yes
which is built
precisely in the Image and Likeness of God

then it turns out
what if we have let's assume the possibility there
make some sounds yes
create such phenomena
what if we
there let's assume we can create images yes

if we can think
and create, let's say, a control system
in the form of a physical body

then it is the approach of God
to you
this is what your physical body is healthy

you are obliged, it turns out formally
Well as if possible
when maybe even you have
as if there was logical time for that
to take care of yourself in terms of
Still, the Norms of Health and Eternal Development

if you want to do something like this for example
example , so that you can do it with the action of the Soul
and not in words
Well let's say you took and made the control
and everything happened

what's the point of saying anything then?
Well, everything turned out well and positively

then this is the level
which you made Soul
but which you could do with the word yes
it means he realized himself in this place
only in one criterion

i.e. if you said the word
then the Soul would work more through the Spirit
i.e. through the statics of one's own state

and that's why it turns out
that remote actions, here is the control transfer , for example
they are generally aimed more at that
that a person should not well how to just work
as if by implicit systems

a person must necessarily
work with words whenever possible
because the word
you you gave it
in a calm state of the Soul
and the word can spread constantly
sowing this very energy of life

i.e. Word and Life
these are often inseparable concepts

if for example hidden control
is done in the management structure
there according to the technology of life

this can be done
but first of all then you
you are moving the structure of life somewhere
what is not advisable to do
you have to work
within its own management level

i.e. life is always in you

and the Word that brings Life
there is the right Word that brings Life
well any word there for example, on safety precautions
at some enterprise yes
saves life gives proper development

and in principle this is a word
constantly brings life
there are rules for operating a car
there is an instruction manual on the operating technique of some unit
and there is life in this

i.e. it turns out that
we can well consider here
the following structure
that the Word is Life yes

but initially if we consider, for example,
process by word
i.e. "in the beginning is the Word"
and so it turns out
that reproduced as if
sound form and verbal or letter form
this is the level that well as if logically implied
God
One God

i.e. He created Life in logic

that's why a person thinks logically

it is possible to create it in a logical way
but at the same time if you develop logic
to the level of the Spiritual plane
insights ^{yes}
it turns out that we are definitely provided with that
that life never ends

for life
this is also, ^{in general,} absolute accuracy

life connects all phenomena with absolute precision
that's in the plan
^{means} the Reality has already been manifested
and in terms of God's original tasks

when will you work
with the structure of my Teaching about life
try to work more confidently
because ^{it's like} a level of confidence
here you need to enter it yourself

because you know life
you live, so you know her

it turns out that in this case
you have the concept of confidence
should be introduced ^{by} their own will
if necessary
and you can't go wrong with that
you live are you confident

and at the same time fulfilling the Creator's task
and knowing the structure of Life
You know
that you can very well live forever

i.e. this is knowledge
it comes here with understanding
namely work
here is the structure of my Teaching about Life

This is where I end today's seminar.

Thank you very much for your attention
