GRIGORY GRABOVOY
The Teaching of Salvation and Harmonious Development
Method of action with the Body of the One God
18.04.2003

Hello again
The topic of today's seminar
this is the introduction and distribution
my Teaching on Salvation and Harmonious Development

Method of action with the Body of the One God

the point is that when we talk
about the Body of God
then the action is determined
first of all, by our own essence
i.e. we act because we have a body
and the body is God's creation

so when we act
together with the Body
we mean what we see
and also an external control picture from God's side

therefore in this method
First of all, it is necessary to determine
speed of action

i.e. determining the speed characteristics of the action
we come to the logic of understanding that
how is this action defined
from the point of view of achieving results

in normal practice it is logically clear to people
that the question of speed is always connected with that
how do we sort through well let's say options
in order to achieve some result

i.e. speed is like an organic function
emanating from the essence
even biological
organism

that's why it turns out

that when you do some action
then the body works as if

Generally speaking, it is included as an inseparable level
into the system of action
this is external Reality
inner feelings
and some logical considerations
or are there clairvoyant contours

in this regard, we can consider
manifestation of the Body of God
Physical Body of God
as an element that is defined
generally speaking, a set of events

and at the same time
when we talk about physics as nature
as if about some external environment
that is the Body of the One God
It must be built in the image
it turns out the same
as is the Soul in the Image of God
and the body in the Image of God
human

i.e. the opposite principle is used here, but not quite
because I didn't say here what is in action
this is absolutely identical

because if we consider such a simple principle
that there is a sunbeam shining there
it reflects off some glass, for example , yes
and this glass reflects
on the optics of Perception, i.e. on the human eye
this ray

then here is the manifestation of God
originally expressed by the Sun

Well let's assume earlier beliefs
this is for example in the Sun yes
i.e. when the thought moves organically
towards the primary Source
and as if closes in on Him
we are talking about manifestation
that's exactly the Physical level

where God is physically manifested

so to see the One God nearby
it is possible precisely in the Physical Body
you can just look at everything
on some object of Reality
by setting cause and effect simultaneously

i.e. having understood the essence of the subject
and its original existence , as it were

just like a ray coming from the sun
where did this object come from anyway
in general, what is the essence from God's point of view
i.e. the call to God is obtained
two there or more number of times

if you look at the prayer
and many who pray see God right next to them
and moreover in the Physical Body
then the action of, for example, prayer is defined here
namely high-speed transmission well as if information
that the exchange of information is very fast

and God as a multi-level, in general, status of the Personality
It is defined by that
that we see Him
when we do something very quickly at the same time

Well, maybe everyone has noticed
what when very fast
particularly extreme events
then the presence of God is simply in the heart of man
it feels like a creation of God
Well , and they often turn to this moment there
to God for help

so here are the speed characteristics for event management
here is a slightly more complicated transition
including the speed of the events themselves
plus, as it were, unity
with at least one level of awareness
for example with the heart

this is all God's Consciousness
having a Physical Body

i.e. in t Consciousness here we see
like what we do

i.e. it turns out that God directed people
to the elements of Your own Consciousness
which is originally Eternal
i.e. It includes
all elements of Reality and all events
but at the same time
this is a subject for human occupation
and man was created by God

that's why it turns out
that such a seemingly closed autonomous system
like God who created everything
has a Physical Body

here, in general, this system fits in with that
what is analysis
element
as static
and developing due to human actions

because man studies the Consciousness of God

and at the same moment
this has enormous practical significance
this element of action

because by knowing Consciousness
he comes to that
Human
how the Physical Body of God is structured

it is generally arranged by analogy, of course
God He is naturally a man, even in general so let's say maximally ideal in a certain sense
although the concept of "ideal" in a large number of events
this is a rather conditional concept

after all, a person must be reactive, yes
like, like a normal person

then from here
action together with the Body of God the One God
this action is the same
as well as the action with the body turns out to be a person
in the first postulate

and when you watch this
Well as if at the level of comparison
For example, you can run there with a person
to do something to solve some problems
with a group of people or with all people at once

so here is my Teaching about Salvation and harmonious development
it's just the level of information transfer
coming directly from one person
to all
can be instant

just as the One God transmits everything to everyone at once
for the salvation of all

and why is this achievable?
because it is clear that if you act together with the Body
The Physical Body of the One God
then we get a practically very simple picture
do as He does and that's it

and analogy connection is to look at it at all
like the body of one person
co-operates
with the body of another
how they interact with each other
let them play ball or volleyball

and this optical glow
going from person to person
organized by God himself, the One God

then it turns out
this is precisely the event line of communication
which is present in all of this
And
this light coming from person to person
this is the light of the Soul, exclusively of the Soul

man shines on man
at the moment of action
only with Soul

it turns out to be an action element
this is what is meant
if we act together with the Body of God

here is the topic of the method of today's lecture

of course he can shine with Consciousness
and other elements
but when the question is asked
what we always mean
what is well like an instructor
that we need to act together with the Body of God
we shine only with our Soul

here is the element of rigidity of the World's structure
The world is often structured in such a rigid way
what is at the information level
that this is a physical manifestation
this is already a consequence as if very distant

i.e. device
on an informative level, as it were, at the level of Perception
more rigid and more fundamental
i.e. there are Laws
which may not change at all

and in accordance with this
we are getting closer to that
that a person falls into a series of these Laws
that the Reality of that level does not change

Light of the Soul
The Soul is Eternal
and therefore mutual luminescence
even one act of luminescence is also Eternal

so if we talk there for example about that
that it is necessary to grow an organ
or to be cured of the disease there
it's enough to just impose a human matrix
to that level
where there are Actions of God but in the Physical Body

the technology is somewhat complicated
but in terms of simplicity of understanding it consists in the following
what if we talk about that
Well, let's consider such concepts
as the Body of God
which means it is visualized and palpated
Well there are people who were created by God himself

then here is the feeling of the person himself
if we analyze the logical level of Consciousness
that feeling is that action
which is given initially anyway
in the Action of God himself

i.e. God must first feel it
in the logic of human perception
and then make the management

and so, for example, to talk about such a concept
as the Physical Body of God, and of the One God
First of all, we need to consider
what is the action
the person himself, in fact
which, well, is only just getting closer
to the Body of the Physical Level of God

because let's say if there physically
God is near
physically located nearby
and man can act with Him
to cooperate simply as a person
then the result is achieved

but since the One God possesses the properties of a Person
i.e. He well there is one place somewhere
specifically
at a specific time

then it turns out to be an action with Him
and He originally laid down all the actions
i.e. it actually already exists on its own
every physically active person
acts together with the Physical Body of God
because it is as if the element of the body was originally created by God
logical connection

then here it turns out
that we have a principle of simple approximation
precisely the approximation to that
what if even a person is physically
doesn't see for example let's assume One God
it still works out
that he can act together with Him
i.e. to act correctly

and the Body of the One God
it is still an invulnerable structure
i.e. God cannot be destroyed
He can't die etc.

and therefore if you know
principle of remote level of action
together with the Body of God
i.e. we are talking , generally speaking, simply about action

it turns out that it is enough to learn
more or less accurately, at least for one action
even remotely
but if it's nearby it's even better
Physical Body of God if nearby means even better

so it turns out that we can
sign of this action
pass by logical method

if there is a forest somewhere very far away yes
and we don't see, for example, with physical vision
movement of each level of each leaflet

but we can think logically
and enter the microstructure
if we know how a leaf is structured

so the entrance to the microstructure gives knowledge
that it is really a forest

i.e. here is the diagnostics of that
that in the distance it really is a forest
because far means here
all this consists of what we have
in general, in essence, a different, so to speak, diagnostic method
which was originally laid down
Well for example, as a clairvoyant method
what is really foliage

i.e. a higher level of development
such as development of access by action so let's say
such as a clairvoyant viewing element
it gives an identification of the forest itself
that it is really a man who sees a forest
exactly this type of wood
there for example, yes, by the morphology of the foliage

so here is the practical meaning
what to see in Perception
Physical Body of God
It is basically just like the physical body of a person.
we can give this an extra boost
which consists of
that we should enter
into some parallel, sort of diagnostic channel
like the one in the foliage, there is morphology there , yes

but then a very simple question naturally arises
to which there is an immediate answer
what is the simplest element
this is actually the human body

i.e. since it is God's creation
then how else, like, a parallel additional channel
then having known this body at least on one level of action
it is not necessary to go into morphology

and study the action
the finger action happened there

and when we realize this
we see in essence precisely the action with God

then we see the following
what is the level of general development
that's exactly what it's aimed at
that people act together
with the Physical including the Body of God
because they were originally created by God

and therefore they already
logically it is clear that they are acting in His name yes

and He once gave a physical body
so He laid down how it should move in general
in different situational systems

and at the same time a sign of complete freedom of will of the individual
consists in the fact that
that here is development towards God
i.e. well like remote access
namely to act in such a way that it is achieved
non-destruction of the physical body

This is first and foremost a social norm

i.e. why, for example, some international legal systems
orient towards a normal social level

and because the mechanism is social
that's where the peace is
A normal life without, for example, aggressive wars
this is a manifestation of a more general status
as if physical bodies
receive complete free will

and then it turns out
that we have practically the same control
what if for example we want to achieve
let's assume there is no complete cure for well as the most severe conditions
then this is a cure or just normalization of the situation
can only happen because
here is a person
what can he do in social status
as if in the regulations of the Norm of Life where there are no wars
find a niche that is free for him
as a kind of matrix system
when displayed, it is restored to

i.e. social laws
it is a way of rationing and continuing
and therefore man must reproduce
social systems are just like God
he shouldn't destroy it in essence

and if for example he acts like this
that is the Body of the One God
embodied initially simply in man
but then the person is at the same time
God's creation
any person
then his actions can be done absolutely
in the Infinite level safe

i.e. the technology may not be harmful to humans at all
and have, in principle, practically the same range of actions
as well as human development i.e. Infinite development
if the next level it will be created
from the point of view of action on the human body

if the machine acts together with the person

she can't attack him as a person, that means
that is, well, one line of action at a time
they act simultaneously
for management purposes

and here is the important link
to determine exactly
in what way does a person
Well how to get out of extreme situations
then here you need to see
what is the purpose of management
in the Action of the One God in the Physical Body
and a person in his physical body
this goal is one

and so for each one individually
this goal is absolutely not generally united

if you look at the system for example
well, which happens in resuscitation activities
then here it is often the main thing to highlight
connecting link
human
with the level of action together with God

i.e. remind him
where he acts together with God

and then it would seem in extreme situations
when where even resuscitation measures
are being carried out

with different complexity systems
in case of complex conditions maybe
a person can recover
Well, get out of a critical state
because it was synchronized even in the past

i.e. an element of the past
in this case it worked for him
how is the level of action in terms of the Norm

i.e. it turns out that any action is in the past
may have a completely practical meaning
that can save a person

therefore any background

This is, generally speaking, a reservation and improvement
in fact, this is actually a creation
more powerful factor of the next development

and from this point of view, for example, aging
or, for example, depletion of the body's resources
it looks like a somewhat abstract system
the only question is
why is it being implemented

so if you go
from the point of view of the One God
having a Physical Body in one place

then if you look
that there was a crack in the monolithic stone
then this crack from the point of view of the One God
this is an action that is defined
as the action of physical matter

The One God has physical matter
for example in the form of a human body
and the stone cracked

then it turns out that this is what is happening here
some element of destruction
which has a sign generally speaking
completely general, as it were, development

i.e. if the stone cracked
it's as clear as day in all the information

then transfer the information to the physical body
so it turns out it's possible
Well as if it doesn't necessarily concern
of some specific organ
but maybe it affects the body's resources

i.e. the stone was strong and suddenly it cracked
some event occurred that speaks of that
that there is some kind of critical value

so if in the world there are
some kind of natural disasters there
then it affects human genetics

and so for synchronization as if

with the outer part of nature
In general, this level is being introduced
as a level of genetic response

i.e. the level of aging due to that
that there are elements of some kind of destructibility in general
information transformations in general

but it is very easy to overcome this system
if you just develop knowledge to the level of that
that it is not necessary to react
on a cracked stone

and by the way it works very well
rejuvenation or restoration system
when there is only one thing on the whole
any nearest object
Well there for example, the same stone or a broken leaf there
and it's just shielded

i.e. how can a person become younger at all
it should just be screened
it has nothing to do with people
and from external elements
as if they act specifically on genetics
which, as it were, implement the mechanism of unambiguity of the system

if the stone cracked, the leaf fell
this is a property that is unique and unified
and it spreads
and per person

every element of Reality
he has equal conditions
and equal penetration elements
in all areas of information

and so if this thread is somehow removed
you can calmly rejuvenate or recover there
if the disease element is associated
with some kind of exactly such element

By the way, I had this happen in my practice
I restored the ureter
then there was restoration
not really that big
pancreas segment truth

about two centimeters
well which did not exist physically

and I used the same case universal
case of shielding from a falling leaf
it's just that this is displayed in the information
it's visible
here is the same type of action
leads to the same changes
external, it would seem, Reality

or how it works
virological, for example, the nature of some diseases
they are distributed as an element well kind of adequate
external signs of the environment

i.e. if we take a virus
at a specific point in its movement
and apply it as if through a large magnifying glass
on the environment
you can highlight the shape
which corresponds to the external environment
although the environment is completely different

therefore the virus kind of copies the environment
and destroys the body
discrete system of the environment externally

and it turns out that
to get rid of the virus
for example, here is a concept with a variant of atypical pneumonia
which currently exists in the World
as of the current time

here is a virus for example it has
speed characteristics of distribution
the same as smallpox by the way
i.e. virological nature
if the graph of the function is constructed
he's so , so really slow

but at the same time it exists and becomes as if added
element including already cholera
i.e. it turns out that the virus is developing
in general in general phase of information
as a system that simply restructures the body

and considering that
Well there are anti-vaccines there of a mechanical material level
they can't find it quickly
then it begins to change

if the primary form is smallpox
which actually works in a different way
i.e. there is an effect of smallpox
and there is, in fact, the substrate of the virus itself

then counteract this disease
it turns out that this technology is very simple
just to look at everything
take and project the virus onto
look at what element of the external environment
it is fixed

because it applies
to any virological series

and seeing discrete means well it's a coincidence
just break the circuit
create an action coming from a person according to the Norm

therefore the following Law of Action
with a single human body
this is normalization of the situation

at each level of action there is a standardization
towards the fact that the human physical body
must also develop Eternally
and have the same level of further development
just like the Body of God is obtained in the ideal

of course God as soon as He shows and teaches people
and people are already achieving this
God has a different level of Body
level of universality, etc., etc.

we are talking about that
so that the local physical body is not destroyed

and then it turns out
that we have technology to counteract wars, for example
technology that we definitely one hundred percent
does not mean we will not come to the destruction of all
just because

that action together with the Physical Body of God
shows that it is a very simple option
how a person looks at a person

God who is there in the future He is indestructible
because He created
He will not allow Self-Destruction
the mechanism of creation does not contain a mechanism of destruction
In fact

i.e. why doesn't God destroy Himself
if you just ask the question like this

and because the mechanism created initially
taking into account the connections of all at once
it does not contain a destruction mechanism
God intended it this way from the beginning
and He created it that way

and therefore the original idea is achieved
i.e. construction
i.e. as if the plan does exist in the Consciousness of God
God's consciousness does exist
before His Action

He thinks first and then does.
but in Consciousness
we perceive as a consequential quantity
that's where I started now
what is it that a person strives for
when he wants to see the Body of God

and when he sees it, he gets it
all the information at once Norms
just seeing it, even if only in my mind
correctly seeing the necessary points
not to mention physically

why by the way are many saints like that
simply not allowed to visit them
the light comes precisely from the Creator
from the One God
and just see this light
it even affects vision physically

but at the same time powerful regenerative
it is regeneration that is taking place

the regenerative effect is very serious
in terms of the regeneration itself
it is generally quite prolonged

i.e. a person gets into the same situation
in the Event Norms field
approaching for example yes to the saint

and this is this level in general
which exists simply for the sake of the saint
which, well, a person who is enlightened, for example
because of technology or some experience in reincarnation

here when we talk about the Body of the One God
then here simultaneously exists
two quantities
as a property of full light
i.e. light that does not pass through, as it were
means even greater simplicity of access
to this God

because the issue is essentially one of access
it's still a question
that God gives more opportunities to approach Him
than the one located in the light of this light wave
it turns out he's a saint
because God should be more accessible
It should be immediately visible to all people.
and available

that's why it turns out
what if the saint wants to there
he can also let anyone in
well then he needs to get out of the glow phase

the question is of course
as much as a saint needs
and does he even have this technology ?

so here is the manager
coming for the salvation of all
must be able to work in any phase
the highest glow
or there is direct access
where it is needed
for example, in the treatment of malignant processes
it's better to have a glow phase sometimes

if it means for a different type of disease
there is a musculoskeletal system of bones
then vice versa
need to work in the background

i.e. therefore, as in healing
action
direction of action
and regulation of one's own level
is selected depending on the purpose

and if we have, for example, a management level
which refers to that
what do we mean by getting control actually as a goal
i.e. control is implemented
when a specific goal is known

then here it turns out
that this goal exists in events
simultaneously given by God
this means we need to know Him by acting in purpose

hence
we are always getting closer to God
including to God in the Physical Body

so any action
this is an approximation
if the action is precisely creative

why creative
i.e. for example, Salvation of all
and the action of managing through this
with their own systems and personal tasks
this means the principle of creativity
Well as if passing through the general to the particular

but if we consider
Well let's assume why not a destructive option
including yes brings closer

because God was originally created [...]
i.e. creating
it is impossible to create technologies of destruction

and therefore
approaching is creation
creation is an approach to the One Body of God

and so when we come to this logically
then your personal control
it now consists of that
what you should just do on everything
the following control structure

what to take for example personal tasks
how to arrange it on the level
that when the Physical Body of God acts
in the implementation of issues
then you talk to just another person
having a physical body

and in this regard the conversation can be
taking into account spiritual aspects
well, that is, spiritual expression

and now having laid the goal of management in spiritual expression
in dialogue with the Physical Body of God
so you get control like this
which often occurs between individuals
well there as if the conversation warms up and events are being implemented, etc.

and here you just need to get out
on the Physical Body of God
and it's definitely going to happen

this should not be a performance
and specifically what you actually enter
in Spiritual contact with God

but when you enter with God
in Spiritual Contact
then here you see
that the Spirit of God is the expression of His Physical Body
it's easier for you

and it turns out that you can decide
just by entering this state
that God has a Physical Body
you somehow bring out your problem
here in front of you
and she decides

because that's how you see Reality

and now you do this exercise
so this is actually not even an exercise
and concrete practice

i.e. do it this way
set your goals in front of you
The One God is right here in front of you.
i.e. He is in front of everyone
Well as if it were possible and mentally yes
or you can just physically
here to interact

and the main thing is that it happens
the only Physical Body of the One God

when do you go out
you solve the problem as if even invisible
i.e. it is being solved
because you are in Spiritual contact
coming from the Spirit of God

and from the Spirit of God
having a Physical Body
not just like God well as if in general understanding yes
namely the Physical Body

and look here
how quickly can issues be resolved
here the issue is resolved almost immediately organically
as if the problem didn't exist

Now, go out into this spectrum
come out and lock in
that's exactly it

work now
and I will work with you

for example, if we consider the question
why if we see precisely the Body of God
at the physical level
then why does it become easier to solve problems
Spiritual plan

i.e., in principle, logical or social questions

or health issues
but on the Spiritual plane

because in essence when we talk about that
how is God manifested for example in nutrition yes
how His action is manifested
then nutrition is reproducibility yes
physical body of a person
its functionality
for further

and it turns out that when a person eats
he is simultaneously simultaneously
depending on what other products there might be
let's assume if there is bread
then the approach is precisely to understanding
co-operation with the Physical Body of God
it reaches the level of the absolute level

here the question is also about the level of products
having some functional or applied significance

that's why we get that option here
what if you drink
then the concept of "drinking" can be such a concept
what can you drink for example wine you can drink water
but it's liquid

here are the liquid characteristics they are combined
i.e. universal from the point of view of the One God
so the wine can be characterized
according to the characteristics equal to water, let's assume
or vice versa

i.e. for the One God
Generally speaking, this is one product

here is His Perception of liquid
He also created water.
He created the grapes
from which wine is made
i.e. at the level of the Spirit it is one product

so when you act
with the Physical Body of the One God
you get a universal control system
which has multifactorial significance

because here you get
basically one well in general the level of reactivity
which is available from the level
in essence the organization of your Soul

initial level

because for the Soul
at the point of its initial organization
all phenomena are practically the same
as originally at the moment when God Self-organized

and it turns out
that the realization of the Soul level
in Spiritual action
is related only to interaction
physical bodies
God is One
And
man created by Him

it turns out that based on this we can interpret
that human interaction
created in the Image and Likeness
this is also the action of their Soul

i.e. the Soul knows for sure
is this person in this place
and why does that mean he should do something specific here
although on logic on Consciousness
he is a human and can still ask questions
why is that

and that's why I think
that there is a lot to learn here
from a simple level of human contact
communication between people

and in this case it is only necessary here
enter
it is precisely the level of the essence of the presence of the One God
where it will be clear
why is the situation exactly like this now

after all, God who created all people
It's completely clear to him why this is so.

when you make some kind of construction
Do you understand why this or that level
you placed it in one place or another

and based on this analogy we can say
what we can determine for sure
object of action
we can determine exactly
any element of Reality in general

if we just go for it
here is practically the same logical course
what if it is already clear to God
why did people gather
or some events are happening
then if you do an action
it is clear to you too

but if you understand by the Spirit
then you can see another Reality
remote well what does it refer to
there to Spiritual vision or there clairvoyance
Well, it depends on what you mean

and here it is
that the Spirit understands, i.e. the Spirit knows
this is the level that corresponds to that
that the knowing Spirit is always multifactorial

i.e. he can unite everyone and everything there
as a sublevel
as the One God does

and it can practically be
Well as if to see an individual picture
while remaining individual
it is simultaneously generalized for all

and here's why
when we speak specifically about the Spirit
Well for example, the Holy Spirit
i.e. the external Spirit coming from the Body of God

then we see
what is the level of generalization
in this case it comes down to this

that we visualize a picture of the Action of the Spirit of God
i.e. going almost to the human body
as from the One God
and at the same time coming from the Spirit of man himself
Self-healing spirit
Spirit means organizing the body

and that's when the Spiritual message
organizes the body
then it turns out that any environment
absolutely any system contributes to this
so that the body is normally organized

and these so-called discrete systems
which I talked about in the virological variants
they become ineffective
if the Spirit is at the level of their understanding
i.e. then the virus becomes non-functional

and generally speaking any disease
will not be functional
i.e. it will then be cured
if it means Spiritual characteristics are such
what you can do
into the state of Spirit
and into the state of the physical body
enter
as a parameter of individuality
and the parameter of universality

because if the outer level
as a parameter of universality
you enter it as a control system
for example, some processes

then you just need to introduce it, as it were, into the body
in the form of action
this system becomes the control system
and in general controlled by you
i.e. you can control the system
because the signal is inside you

this is what human feelings are created for
if you ask yourself a simple question

Yes, man has feelings.
but here is the functional action for what

how to act with feelings
together with the action with the physical body of a person

we talked for now
about a somewhat vague spectrum of action in general
for example actions with the body
there wave your hand at the same time yes
and be cured
or reach well there is an event level

co-Spiritual action

if we speak
about the level of action with the Physical Body of God
then here we can generally consider
next question

what is it for God?
human feelings
and his physical body
it's basically a one-level system
again the universalism of God's vision

then it turns out that if we, for example,
for example, we have a management level like this
what we want to understand
this is how to act with feeling then
together with the Physical Body of God

then it should be clear to us
that external for example action it is like this
that when you manage some event
then you kind of well, are you considering it?
here within the framework of this event
what elements are happening yes as if
somewhere you control them well spiritual content

then you can see it here
how to act and feelings
together with the Physical Body of God
if we introduce some kind of external control
which you in general
there is volitional visual control, etc.

and it turns out that if we, for example,
we have a management level
directed

for example, for some specific action
then here is the level of objectification of action
i.e., as if external control
in this case it is actually
basically your physical body

i.e. a sign of the objectivity of the action
for God and for you
is your physical body

and considering that the sign of objectification
as a kind of pillar of Reality
he should be Eternal in general

i.e. God's purpose is this
what is the objectification factor
i.e. the compatibility factor

or a factor somewhere to a greater extent
simultaneity of action
this is the physical body that must be Eternal

for God acts according to the Eternal task
and of course He must act
by levels that are Eternal
how to fix these levels
Eternal constructions in fact
body based on this principle
must be Eternal

and when do you understand this principle
then you see
that it is enough to introduce an external control parameter
consider the principle of the Eternity of the body
due to the task of God Action

and then it is clear that feelings are active
together with the Physical Body of God
this is a parameter of the unfolding external Reality

i.e. you will notice that you often
feelings seem to open the world for you
well some door yes

and this is by the way the most powerful recovery mechanism if
human body
if you open it correctly then you are healthy

this often completely restores the body
just one fleeting associative feeling
like an instant recovery system

i.e. the man hit his pole
precisely matrix
once and he recovered
i.e. he passed through that place
where God specifically assigned him the task
maybe not necessarily physically passed
passed the correct action

and that's why I introduce this concept
as a concept precisely of "actions achieving"

i.e. there is a concept of "karmic systems"
but to save a nuclear power plant or the planet
from global destruction
often cause-and-effect systems
can load

and to achieve the result
you just need to, like, in general, it's okay to go through here
just for some system
how to enter parameters into a certain "plug" there
and everything will be saved at once

i.e. this certain "plug"
this is some kind of Norma system
this is where God acts
and the totality of man
in feelings
in actions
in the physical body
match

I have already entered the next level
when not only feelings but
revealing the world and creating the world

i.e. it is obtained as an element of the creation of the World from man
the sensory plane comes into play in many ways
and first of all it is the Love of a person

and when there a person loves the World
he can build

in principle any element of Reality
and generally move
some objects there , etc.

it's like a manifestation of Love
Love in this understanding gives the Norm
i.e. the other person does not suffer from this
on the contrary, it simply develops

and when you get the action intentionally
why move something for example
if it is really necessary yes for Salvation
you can take it and materialize it there
well some element is big yes
in flight the plane for some needs

but you can set a task
there put a small grain on the table
and sit over it for a long time
but if it is not part of the task
simultaneous action
and the goals of the One God
in all manifestations including the Physical Body

on the contrary, in this case God is all-manifest
then it will be like this it can be a very long task
before synchronizing
and materialize this grain of sand

those. action task defined
first of all, as if in co-reasonableness

it's understandable when people go with each other
They wisely give each other space on the sidewalk
and there is a level of , as it were, logic of action
here is the level of logic of action in these processes
this is universal salvation

that everything is already so clear
that all should be Saved to live Forever
and initially logically it is even understandable
even based on the practice of the development of civilization

that when we see elements of a destructive nature
as elements going means well, into some kind of Reality
then we can consider them
as elements very old and emerging

to the Primary Action Element
One God

i.e. any kind of destruction there war
it's like a "before Action" element

because actions are always creation
then the question arises
what is the concept of "before the Action of God"

so, well, God created everything
made one single action
The world came into being

so in this case "before the Action of God"
this is a factor where the One Body of God is manifested
or as the bearer of universal Salvation there
Light
or as the One Body of God
does not allow the origin of some factors

Well let's assume since He is indestructible
then naturally He can appear there
where is the fighting
but since He is universal
and this applies to everyone

and what kind of person can get caught in the fighting
He doesn't come there.
i.e. He doesn't stop wars there For example yes, with a wave of the hand
because then where is the development
first of all civilizations

but the true principle is "before Action"
this is the principle of the system's, as it were, undesignatedness

i.e. if the system is designated
for example there is a positive effect
it is marked as strongly positive
and the system begins to develop

then "before Action"
this is what does not mean this system
i.e. a certain view on the level of equality and complete freedom
that the system of creation must develop
into the designated system

from the point of view of any element of Reality
if we want to understand
what are undesignated systems

Well, take any element of Reality
there is a vacuum in the air
he perceives the developing
positively developing world
how can a system still be unmarked
for his level of Reality or something

this is so there is a speck of dust there
what difference does it make to this speck of dust it would seem there
before the development of civilization
but in reality there is a big difference

everything is a sign of collective Consciousness
and this speck of dust is located
exactly in this place
as a sign of some material substrate
generally Peace

and if we develop like this
it turns out that any actions
Well as if of an antagonistic nature
in terms of creations of creation
this is what the developing world is
so it doesn't actually determine
a precise development trajectory

i.e. we are talking about the fact that the car is moving
she can just go like in some thicket
knocking on trees
maybe you can actually get out on the road and drive normally

and that's when we develop the World
then the level "before Action"

Well let's say why there is negative information
it's actually just a level like that
something that God gives
how can you even do it
but we just don't use it at all
we're driving along the road there, we're just driving, like
and this car can hit trees

i.e. the question is

generally speaking in personal freedom of choice
for God created in the Image and Likeness
human
including, by the way, the physical body of a person

therefore he must choose
or he goes and has knowledge
i.e. gains knowledge and develops correctly
or he doesn't want to be there

it turns out that this is the level "before Action"
it's just an element of personal choice
which is perceived by a person in this way
i.e. a person can perceive that
that God did not act here initially

and that's why all the wars and all that stuff
this is very old information
which until the first sign of creative Action

I basically introduced it by simulating the control
because it's so convenient to fix
negative level of information

by the sign of something as if simply that
that she is older more well as if dark
and has earlier characteristics
to the sign of creative Action

when we take this control
and by the way it exists in Reality
when we take this control and get
that we know these characteristics
we see that the characteristics
as if they were starting to melt on their own

i.e. the principle of detection
this is the principle of operation
i.e. if we know where something comes from
then we solve the problem very simply

therefore any problem can be solved
having revealed in it only on the whole
the earliest sign
on the negative spectrum, so to speak
and just adding to everything
compressing time to a more modern one

well, that is, increasing the speed of time to a negative level

from the point of view of Divine Action
this is very logical
in an infinite amount of time
everything will return to normal anyway
and we just set the time counter to speed up
we get the Norm

by the way, in resuscitation measures
well, in some kind of quick recovery events
or as if urgent response
often people feel as if there is some kind of slowdown
arising well according to Perception

then here is this slowdown
this is what the Soul grows towards the World
The soul seems to bend the World
and takes control of this part upon himself
already acting to a greater extent
together with the Physical Body of the indestructible God

then it turns out that
well , the person dies in the wrong place, etc.

here here here periodically this occurs in people
as a control element
due to the fact that at that moment he understands
how the Physical Body of the One God is structured
and how it functions
and how it interacts

because for God, generally speaking, there is no difference
body air yes
for Him everything is one
He also created air.
i.e. for Him these are objects of the same order

and control is obtained from this point of view
it's completely fine in general Well, it's so simple

i.e. if we have, for example, such a picture
then it would seem that if it is the same environment
then it is generally a sign of differentiation
that's why god created people diverse
there going for their different goals
if you look at His tasks

then a diverse environment
this is a sign of objectification of action
that means from the point of view of God Himself
This is exactly how he creates the structure.
because He needs it so much

i.e. "objectification" and "need"
well from the point of view of His free will
i.e. any manifestation of the World
it is also complete free will
in the Action of the One God

and it turns out that we have a connection
why does a person need freedom
because God acts absolutely freely

and the option of co-operation
simultaneous simultaneous action variant
this is again absolute freedom of man
He created in the Image and Likeness
He can't just take it and limit it in something.

and here the next element appears
what to get
universal control
from acting together with the Physical Body of God
you have to act as a physical body, that's clear
but it is possible to act differently from conventional systems
feelings exactly the same
as well as action with the physical body

pay attention
This is the first time I'm introducing this control system
because of the equality

namely, volitional action on a sensory plane
with the action of the physical body
if there is contact
with the One Body
namely the Physical Body of the One God

This is the first time I've introduced this design
so you have to be more careful here
today is being introduced for the first time
because here arise
very strong governing moments

what type

any movement with the physical body
may lead to management
but it is possible on a sensual level
there to influence physical Reality
so, i.e., this is the same level of management

i.e. sensory means plan
well, how do the parameters of feelings enter there?
and the instant access plan

when we perceive with our senses
we often don't perceive it
that it is here, somewhere locally, in some place
This is a universal access level

and therefore the work here is universal
and here you just need to be more careful
because the feeling must be related
with your physical body
i.e., as if proceeding from the level of the physical body
as if from within and from the heart

i.e. you must clearly understand
that feelings come from you
first criterion

and the second criterion
this is something you should see at least once
The One Body of God i.e. the Physical Body of God
even if it's through remote viewing
to fixate
the best thing is at the Spiritual level there is interaction

i.e. that's the advantage
that when you tune in
on the Physical Body of the One God
you often don't need well how to go high
to the level of information access

i.e. let's assume Well God forbid there
of course it's some kind of extreme situation yes
there we suppose to urgently make a decision there about the plane
who has some problems

if we go out at the technological level

and to go out on the Spiritual plane just for a long time
but time goes by
and if you just kind of remember just as a person
then this is instant control

and therefore the level
or in extreme systems
tuning in to the very Body of God Physical
you get almost instant control
and right away

but this is not necessary
only for instant control systems
this can be used
management apply of course
in general well, solving any problems

moreover here is the Spiritual level
it is precisely what gives it practically
Well in general, such stationarity in action

so when you get control here
well, actually, it's universal , in general, in a one-time action
that is a sign of universal Salvation
here is
here is according to my Teaching on Salvation and harmonious development
that the One God is alive
He is here nearby
therefore naturally everyone is saved

He is also the guarantor of universal Salvation.

This is where I end today's seminar.

Practice intensively if possible
while simultaneously receiving knowledge here
from that state
which arises

when interacting with the Body of the One God
with the Physical Body

thank you for your attention
