

GRIGORY GRABOVOY
The Teaching of Salvation and Harmonious Development
Approximation method
to the Physical Body of the One God
21.04.2003

Hello again
The topic of today's seminar
this is the introduction and distribution
my Teaching on Salvation and Harmonious Development
Method of approaching the Physical Body of the One God

This method can be considered
as an approximation
as an approximation
to the ordinary Physical Body of the One God
i.e. precisely the physical approximation
Spiritual
approach of the Spirit, etc.

it can also be considered as something like
that when the One God created the physical body of man
then the question here is exactly that
what the physical body should be like

this question is resolved quite clearly
in that direction
that the body in this case is physically ideal
from the point of view of the One God

therefore, since He created
ideal physical body
and the approach to His Physical Body
denotes knowledge of canons, as it were
ideal physical body

i.e. good means physical ^{yes}
normal condition is as good as possible
and interaction
with the Spirit
with Soul
with Consciousness, etc.

in this regard when we speak
about movement
to the One Physical Body of the One God
precisely to His One Body
in this case the term "one" implies
what God has
namely, your specific Physical Body

and here we can consider
First of all, the procedure is obtained by organizing the Physical Body
by the One God himself

i.e. how is the One God
created
Your own Physical Body

and when we come to a solution to this issue
as to a question that is familiar to us
from the point of view of human practice
because God created man
naturally and as if projected that
that He created for Himself
per person

then it is immediately clear that
so that the body , well, in general, feels like the Spirit , so to speak
Spirit as an external creative substance
so that the body can sense itself and develop itself
for this, some differentiations are needed
in self-perception

that a person goes there must be land yes
he must be stepping on something
air, etc.
and this influx of external
the influx of what moves faster
than the image speed
Well, for example, a person steps on the ground there
somewhere walking along a path
and some physical objects come towards him

so here are the objects by the Creator
The One God also creates
before they are generally perceived
as an image

for the One God

any object of information
it exists at this very moment
i.e. it is created at this very moment
for him there is no concept of "past", "future", etc.

there is a specific concept now
in this case "now" is the act of creating now
which of course has a future
there was a past
in relation to this event

so if we look at this issue this way
well, let's take this for comparison, for example
some kind of truck where there is, for example, a driver, yes
cabin and there is a number of trailers

and if the trailers themselves are attached to the car
we consider it as an element, well, as if investigative
i.e. the car goes first
then the trailer starts moving

that means if a person looks at a trailer
just like from the side of the trailer
he logically understands that he is being pulled by a car
because he is familiar with the trailer's structure in general
he can't drive on his own
in extreme cases it goes downhill and if you push it

so that's how it works here
that a person has this sign of recognition, as it were
associated with the movement of the investigative unit
it exists from God
from the One God practically in general a priori
i.e. it exists initially

and in connection with this it turns out
that this is precisely the sign of recognition
which exists in the form of seemingly logical knowledge
for the car
in man it is laid down from the Body of the One God

Now I told you
when a person finds out
as if elements of physical Reality
he perceives them
precisely as elements of physical Reality
as if like investigative systems

well, as a kind of "trailer" in quotes
to some initial act

then by analogy with the movement of a car
actually works as a source like a cabin yes
here the element of recognition is
a specific element of the human body

so this particular element of the human body
This is the physical blood of a person
i.e. the element of blood
this is also an element of recognition

but in principle, blood is designed like that
it moves throughout the body
and finds out all the time
as if the next element of Reality

because it moves by itself yes
for a number of specific reasons
for example, the heart works there, etc.
but also because the functions are embedded in the blood

i.e. from the point of view of the One God
the function itself contains an external form

because for God
from the point of view of this device
Physical Body of the One God
what is the form and what is the movement of blood
basically it's the same thing
and one is as if contained in the other

and if you look at that question
for example why blood doesn't flow out of the body
there is no filtering through capillaries

Well, it's clear that there is dense fabric
but by and large if we look at
namely the Physical Body of the One God
then there is no blood flowing out of the body
because generally speaking this blood is projected
in the form of specific events and the outside world
and in general there is nowhere for it to flow out

for the One God
external events

they are the same as
and internal

and why did Jesus also say in his time
what blood when drinking wine
including he compared it to blood yes
in general he compared in a more precise position
is considered here
exactly as we suppose wine
well let's assume it's like the blood of Jesus

then here it turns out
that the object of external Reality
let's compare
with internal content well for example Jesus

here we see
what is this one
this is a comparison
this is such an act
that for the improvement of the blood of any person, for example
as an organizing substance
it's enough to align
it turns out to be an external object of Reality

i.e. to make it so that the external environment
where the blood could flow or change somehow yes
for example, an unfavorable option is possible
these elements are just for the sake of it
bring to control in Normal

then the question arises
what are these elements
it's not just about healing
and about managing any level of events in general

so here is my Teaching about Salvation and harmonious development
dissemination of information
concerning some one signal of one element
for example, healing
this is essentially all the same information
i.e. this technology is suitable
for any level including the level of Salvation of all

so that there are no elements
as if possible leakage
need to enter again

the system of salvation of all
then it turns out
he also saves himself at this moment

that's why the seemingly self-contained task is a target there, yes
Save everyone
in fact, this is the task of solving
i.e. where the solution to the problem is in the task itself

such a term "problem of decision"
it's a special term
you have to be careful here

and when we have control here
then it turns out that the management is well as if of a distant type
i.e. any element of Reality
these are the closest segments
to you
in Consciousness
in Spirit

i.e. the organizing spirit is right next to you
you can fix it
point of your organizing Spirit
The Spirit that organizes Reality

for there is a knowing Spirit
there is a rejoicing Spirit , etc.

and your Spirit that organizes Reality
this is what is closest to you
to your physical body

when the Spirit coincides very closely with the body
and against the background of this coincidence
you see how your heart is created by the Spirit

at the same time it is created
not in the form of a physical organ
but in the form of an investigative system
blood movement

i.e. the Spirit immediately creates a stable future process

and it turns out that you have
sustainable future
because the Spirit works

which initially creates the body itself

this is the principle of self-creation
here is the point
that He will not create in Reality
there is some kind of hole there for example
for example, blood would flow in and change

therefore you can drink as much wine as you want
and Jesus' blood will not diminish at all

and so it turns out that Eternal life
because everything that is reproduced from the outside
i.e. drinkable and edible
does not affect the internal system in any way
Physical Body of the One God

and here we see that
what if well let's assume it is eaten as a body yes
eaten as His Body
then the Body can be
Well, God is manifested in animals there, etc.
in the form of, for example, actions of this animal
or there is this element of Reality

but according to God's task in the future
initially any object must be equalized
i.e. as an intellectual level
the level there is event-based

for any information object
these levels should generally be equalized

if a person has a level of complete freedom
then generally speaking in the future
the animal must go out
to a certain level of personal freedom
i.e. it shouldn't be eaten , right ?
on current biological processes

and here the question is more like this
that the matrix system is being eaten up
what is reproduced from this animal
well, it's like a self-assembled tablecloth
you can eat there all the time
and the tablecloth, it seems, never gets worn out
so here it is

not "seems to be" but by the way it definitely isn't running out

and here the element generally appears
that when you work for Reality
from the point of view of the Physical Body of the One God
i.e. well, you create Reality
you create in an autonomous closed system
those. you create it yourself

hence
you must have all the resources coming from you
i.e. the World should develop infinitely from you
you don't get exhausted
such a principle

and then it turns out
what if we consider for example
well level
let's say this is the same development plan for everyone
and everyone should eventually
be on equal terms
in equal rights

let's assume that in the constitution of the state Grigori ya
I just identified such a point
where is it written
it is the equality of all objects of information
including the animal world , etc.

and in this regard, here is the control element
it is still embedded in that
what is equality
the opposite position that we create ourselves
but the position is precisely that of the One God
after all, God is equal to everyone
in relation to the original

just a man
precisely in terms of freedom of choice
somehow, one way or another, changes the structure of events
or goes along the line from the One God
or he is there for example, somehow it turns out yes
and then begins to recover

so that's when we talk
let's assume about tumor-like processes
then in this case, well, just take it as an example

the human body and say
what is ^{suppose} a tumor in this case

so the tumor is, ^{as it were}, one of the things
from the point of view of this position
when the external picture of physical Reality
becomes ^{as if} not in equilibrium
and the outside world ^{seems to be} pushing through
at one of the points
not necessarily at the point of the tumor and
and somewhere there is a substitution of structures
i.e. well, as a foreign environment, it is clear that it came from somewhere

and in connection with this for normalization
^{well}, not necessarily only tumor-like processes
in general, to normalize the situation
where there is external influence
control element
is
deep internal self-organization
i.e. initially
from the purity of the One Physical Body of God
where there can be no talk of a tumor at ^{all}
everything is quite leveled there, ^{everything} is very well compensated

so when a person
^{Well} ^{as if} to an internal pure source
falls down ^{as if} to himself
then it turns out that we have in this source
a system of absolutely complete self-healing
and instantaneous

and then it's completely unclear
and why does the tumor often disappear without a trace ?
such a big piece once and it disappeared ^{for example}

or event
which has the strongest external impact
suddenly the external source disappears
and it's as if there are no problems at all
and the most important thing was not there

here the element is the alignment of the World
in this management method
from the point of view of the One Body
There is no single level of such that one can say
One Physical God

in the Physical Body of the manifested
i.e. precisely in the human body
in the physical body of a person

when we consider such a situation
well, like an axiomatic level
the words I said
for example, the One Physical Body of God
then here is the manifestation as a person
on a human level
consists of
in a deeper structure in the next structure

well, from the point of view of logic
so that a person can move, let's say
he must step on something
the earth first, for example, should be

that's how it turns out
that originally the Body of God is Physical
through the development of One's own Consciousness is obtained through
logic
gives birth
an element of a deeper relationship with oneself
to Your Physical Body
at the One God

and precisely a deeper relationship with oneself
gives birth, generally speaking, to physical Reality

i.e. this element of the birth of physical Reality
it's like he 's there right away
This is the process that is inherent in humans
as a process of recognizing another person, for example
at any distance

if we assume well ask the question
this is where there is life besides for example planet Earth
then recognition is an element
most closely present in man

here if you need to diagnose
some galaxy there
or the universe from the point of view of what
is there life there for example

then the closest section

like a wave level
when the outside world puts more pressure
[...] of a person

Well, not in a negative way
but simply as a diagnostic level
as a diagnostic system

then this is the presence of the living
and in any form

I once gave a forecast
by vegetation on Mars
then the satellite really did discover chlorophyll
exactly in that place

i.e. it turns out that although I published a forecast
there is an action of collective Consciousness there yes
on work in this part
but then a satellite actually flew by
but there is still a management action

For example, you can take and make control
why not materialize these chlorophylls for example
and which, as it were,
vegetation can't be done at a distance it would seem yes

but on the other hand
yes, generally speaking, this is really possible
I think so
i.e. but this as a practice should be verified

but when we check
depending on which method to check
if checked by satellite method
then it could have been that there was actually
Well, in general, there may not only be chlorophyll there
there may be a situation like this
that chlorophyll itself is not actually
precisely the causal level
there may be more talk about systems like this
that's water
and so on the basis of, in general, so to speak, water
chlorophyll is reproduced
well, in some kind of plant systems like ferns

so here we have

generally speaking, not chlorophyll itself as such
and we have again a more connected system
more deeply embedded

yes, it would seem that with one diagnosis, for example
well, just about vegetation if you ask the question
then again we get into a deeper system
in connection

so here we can say
what is external surveillance system
defines
some event status
there we assume chlorophyll on Mars
or is there vegetation on Mars
this is water, let's assume there is a fern there
ultimately from chlorophyll, etc.

then we have such specificity here
firstly, before the flight of this satellite
I first identified it not so long ago by the way
that chlorophyll is some kind of green vegetation
looks exactly green

after all, it was believed that there was no evidence at all
i.e. in principle, although much was discussed
nevertheless I gave such information
i.e. mobilized of course the collective Consciousness of people

for example, there is a projection, yes, life arose
because that's where the control of life is given
life certainly arises there

but if there was a satellite there before, it didn't fly by very often
he might not have noticed

so here it appears that such a system
what is the logical phase of control
exactly what is related to the logic of the process
this level is kind of very tied
from a point of view

if only there was an astronaut sitting there on Mars
with him, chlorophyll would have arisen
said
we would say yes, we have launched it now
in the collective Consciousness
this information

and right away [...]
here is a pure experiment

but since here
firstly, far away, technically very far away
i.e. we can't do it instantly ^{yes}
there are no astronauts on the surface of mars

then it turns out we are using access
as if of a Spiritual plane
which takes into account the multi-angle nature of possible actions

so here it is
a multi-angle system ^{in general}
in information
this is the control system
which can build physical Reality
practically in front of the Physical Body of the One God

but at the same time build it like this
that undefined systems are specially created
for there is only one God, He creates everything
including the undefined system
i.e. the enumeration of options is a created system

and when we perceive an overload of options
then ^{for example} considering
^{let's assume} the position of resurrection of people
we see that there can be no options at all

a person if he is born he is one
here it is, the unvaried level

so where there are no options
there the system is actually initially Infinite

Well, if we consider then
why should there be plants
also close
according to the level of independence of human freedom there

and then they too will fall into the same status
and have a different type of development

i.e. it will be possible to eat the plant
but without eating it, ^{well}, something like this

i.e. there is no level where the World is modified
in relation to
to the One Physical Body of the One God

because that's where control decreases
there is therefore a modification

and here is the best level of recovery
including the physical body
but besides the physical body
that's how it turns out

Souls

Spirit

Consciousness

this is the level when a person ^{really} tries
minimally touch in the outside world

well, for example, like Buddhist philosophy, yes
do not destroy anything

but speaking at the same time
if ^{for example} we are already talking
it is about the element of resurrection
as a practical element
then here it turns out
the method of resurrection in general is that
that all that is simply known here

what ^{is} the physical world
it's designed that way from the start
what is there where there are no options
this is already the Eternal Environment from the very beginning
which is analogous to the Physical Body of the One God
this environment
it's already ^{pretty much} automatic
can organize around itself
the next Reality
and in general an infinite number of systems

if in this Infinite Reality
hits

Well ^{let's assume} biological decay
there is physical ^{death} of a person
then it turns out that this is just one of the options
multivariance

from the point of view of personality and the Soul of man
he can simply choose another option

take and, for example, resurrect
but the main thing is to know the technology
in general, the principle of the structure of this World

and when we talk about healing
as for example a system using let's assume
resurrection technology

then the same level in complex diseases
there we suppose circulatory systems
those that define the systems
generally speaking, any systems
the control element is
just invest
into the most, as it were, weakened systems of future events
invest Macrosave
such global systems
Rescue from a possible nuclear reactor explosion there
so that there is no global war

i.e. generally speaking it is
in essence, this technology is very pragmatic
very specific tough
technologically very clearly identified
Rescue system
well, and personalities too, yes, it turns out
sometimes even primarily personalities
the personality has some kind of pathological systems
there in health

then it turns out that you can restore it very quickly
if you insert the task of Saving everyone there
precisely in the area of the weakest systems
into future events

that's how it turns out
future events
from a human point of view
this is what he strengthens as if for himself forward
i.e. it is a constant optimization system

so it turns out that the Body
One Body i.e. Physical Body of the One God
this is what is in the external system
has what is most optimal
for this Physical Body of the One God

i.e. the external environment is obtained
for Him it is actually
Well, if He's walking somewhere down the street
The One God in His Physical Body of man, moreover
then He goes like this because of the external environment
exactly at this level in a single version for Him
because He embraces all variants of Reality

and it turns out that a person
means to make a precise movement
he still has to work
with some number of options

but when we work for the salvation of all
then we again have only one option

but if we set a task
namely harmonious development
then we can enter the option
as logically conscious
and the need for past experience
harmony is always what a person needs let's say

and that's why it turns out
that there is, in general, a necessary option
and there is sufficient

if Salvation is necessary, it is necessary
in case of problematic systems and development

then harmonious is generally sufficient
but it is wider
it is enough for there to be even Salvation
in general harmony

and here it turns out that what is given
from the One God
as absolutized

Well as if it means a reflex mechanism

it means it's layered on top of that
what man has done in the form of his Consciousness
as the next level of development
for example, harmony from a human point of view

so here is harmony from a human point of view
must match

with harmony from the point of view of the One God

and just as naturally the bodies
Physical Body of the One God
and the One God has an Eternal Physical Body

hence
for real harmony
and the physical body of a person
must be Eternal

this means that a person should strive for that
so that the body develops and spreads
Well, of course, it's the same in terms of distribution
i.e. to invest some effort into external Reality

but such work that would lead to that
that his body develops in the same way
as well as the Physical Body of the One God
The One Physical Body of God

then we get here
well, some system of patterns
related to the fact that management in this sense
this is the proximity control
to the Physical Body of the One God

i.e. as soon as a person comes closer to Him
physically or spiritually
then he understands accordingly in general
and how does it work in this case?
The physical body of the One God

what is he doing
Here is He, for example
there is the One God when he sits in the steam room yes
what is he
does he use a broom or not
and why doesn't He use it at this moment?

this is how the conformity analysis would be done
shows what to do in general
even without any special
there are long-term education systems

namely direct action
it is precisely aimed at that

to understand

i.e. we have a transfer of knowledge simply on the whole topic
what is the factor of existence
Physical Body of the One God
conveys all knowledge
according to its internal structure

elementary for a person
if a person runs out of there, well, from a sauna
and jumps into the cold water
then another person watching him says
yes, that means you can do it, i.e. he won't catch a cold
he may not even know the basics of physiology
as if on some scientific level
but just jump

the same thing if at some point
The One God in His Physical Body
a broom in the sauna
so it turns out that he doesn't use it for something

the first analogy is that a broom is something cut down ^{yes}
this means that you can't cut, ^{for example,} the simplest option, etc.

and here we get the next level of regularities
that the approximation by the outer level
gives the Norm of Events

and when you are already approaching further
i.e. analyzing the external systems of Reality
you can see
how the Physical body of the One God was created

i.e. having looked around Him
Reality
this is His manifestation
The Norm of Reality is how It was created

Well, if you take a large ball of thread
and throw ^{this} thread in different directions
then you still need to go along the thread to the cause of the ball, ^{yes}
to the original
where was this ball created anyway ?
come to this

as well as a scattered network of physical events

leads
because He is inextricably linked
with physical events
this is precisely the quintessence of management
here is the point
that when approaching
to the Physical Body of the One God
we are following an unbroken chain of events

and the physical world for us
falls into the same level of Perception
as well as the information world
for a person when he uses it, for example
another control system

and here
and the physical world
and informational
it's all one monolith
they do not differ in terms of movement
This is a special control system

it has a completely different level of stability
at the same time it has a different level
practically from the point of view of control movement
she is clear

the goal is very clear
just to get closer
to the Physical Body of the One God

and with elements of knowledge
there's just not much to do here in general
Well, it turns out that these are basically elementary actions
try to understand
what if Physical One God
in Your Physical Body
makes some movement
then how can I use this experience for myself?

and if we want
it's clear, for example, if you need to search
in the forest there are berries that are edible
then you can use this technology
this is a specific technology

because berries are what is common
from His Physical Body
and is in an inseparable connection with Him

it turns out that this control system
this is a system
Well, first of all, the goal is simple and clear
and secondly, it seems to be done naturally for a person
a person is also constantly doing something
does other things at the same time

i.e. this is the most natural of all
the most harmonious result is obtained
from the point of view of the inherent or something
human control systems

and therefore as a training
now do the following control

take the goals that you have
put them in small spheres in front of you
and just set the controls
here is your management goal
what is your goal now for example

and let these areas begin to develop
towards the Physical Body of the One God
let them start to sort of unfold
move towards Him

and see that any control object
moves precisely in His direction
precisely in the direction of the Physical Body of the One God

when do you start to see it
you see that the management is more intensive
in the event that these spheres move faster

it's like a management method
you work
I will work with you

when you implement control
you see that the sphere has generally reached its limit
to the very Physical Body of the One God
because God decides

essentially any action
determined precisely from the beginning by God
The One God the Creator

namely the Creator God

that's why it turns out
that as soon as you see
that the Body of the One God
touched your sphere
your issue is resolved

therefore it turns out
what is the criterion of correctness of movement
is just for the sake of it
just a normal mechanical trajectory of movement
this sphere
towards the current location
Physical Body of the One God

and based on this if we look
in general, how is the development of the human Spirit created?
Well, by the man himself

he strives for action
in general, personified from the Actions of God
or by God himself
By some divine act
directed there at some
Well, basically at the mission level
feasible supertask systems
he does them, he is a creative person
he puts and executes yes

then the development coming from it
in the form of some tasks
affects physical Reality
for example, there is Einstein's formula, yes, for example
 $E = mc^2$
or there are elements in the form of painting
or generally speaking there might be some
one small invention like a wheel
which affects the outside world
those. system of influence

i.e. how to make it possible to ask the question

how to make an invention
which exactly C will shepherd everyone mechanically

I just named the element
which affects the physical world

then it turns out to be the simplest
spiritual element yes

Well , for example, there it is in the form of a method as an invention
it turns out as if we were talking about Eternal development
then this is a certain system that is changing

Well, let's take for example the technology of Eternal Life
physical body of a person

then it turns out that yes if we
he knows
then it turns out that if one person knows systematically
if everyone learns, then everyone will be saved

i.e. we are for the development of the general
we have exactly as technologies
i.e. a certain developing system
not generally static in logic
so that it is precisely the Eternal development

but if we have static development
then how to translate this to the Eternal configuration
Well, it's the same wheel

so it can be translated apparently
due to the very large volume of actions
there are related to the wheel in the future development

but in the case of antigravity systems there
It seems like the wheel is not needed
again some kind of gap arises
or maybe it's not really necessary for the plane
which sits on the surface of the water
there are already some exceptions

then we get an element of exclusion
this is a developing world
because there were no planes yet
the wheels were enough yes
well **except** for example the horse's hooves

then here from the point of view of contact, let's say yes
external moving Reality
horses there or some kind of cart
and lands
originally created by the One God

then the following development occurs here
may exclude, as it were, the previous level

then in the concept of "technology"
there is often a canonical element included, for example faith
here is a man of faith
that means he can, by the way, quickly recover
from illness
I just believed that it enters the system
namely the True Faith
into the future Norm of events
created by the One God

and then he has no problems
he really is healing quietly
i.e. he simply has no problems at all

and how can a person get it?
such a reliable faith

he must meet somewhere
it turns out well how to come to an agreement yes
he should meet by analogy
for example with the Physical Body
well, that is, simply with God alone
but in the physical body of a person
met agreed shook hands
and he has a clear belief in this event
how come I'm talking about one element

so when this event is decided, as it were
Well why did they agree?
Well, he can do something, he's a man
God alone does not demand anything from man, generally speaking.
some kind of unconditional submission
a person must choose for himself

so he says
"Yes, I will do this and that"
everything is agreed, the event is decided

and it turns out that, well, it's like an absolutization of faith
that's why the resurrection of Jesus for example
as the level of his Eternal Physical Body
this is also a question of absolute faith in general
as if the accuracy of the path

so well I say yes of course there are others
religious systems
but I give one of these concessions as an example

then it turns out that we have
level of development associated with that
that comparable human actions
a person if he agreed with another
there he shook hands or signed a contract
he saw his physical body
the same

Well, there is a person there in principle
You can negotiate with a tree if it knows telepathy
but how can a tree not sign for example yes
we can only agree telepathically

so here's the difference between that
what works
and the fact that it is kind of static
what is it

man in relation to tree
this is a control system

and a tree in principle can only give passively
some products of their own production

that's how it turns out
that any control level
he means that
that his level of faith is like a guarantor of hope
there should be a more control system
or comparable

so here is a comparable one
this is again the Physical Body of the One God
at that level he enters
into certain, as it were, contractual systems

and that's when we look at this state
like a man's dream

then we see that
this is the entry of the outer world
into the human being
when a person sleeps
he often feels some kind of action inside
reminiscent of the actions of the physical World
or in the physical World

that's exactly what's happening here
actually the entrance i.e. the passage is practically
coming from the Physical Body of the One God
to the human body

but the passage is not carried out explicitly
i.e. there is One God, He must approach everyone
He won't breed there.
He has one Physical Body
the same as in humans

The same
on the contrary, if you think about it
then He was created just like a man
if you judge from a human perspective

and therefore he can enter
through some mechanism
which is correct for everyone at the same time
well maybe at different times , for example through sleep

and it turns out that this is the entry element
element of interaction with the Unified Body
The Physical Body of the One God
here it is precisely in the process
well, more relaxation, I guess

a person sleeps when he is more relaxed yes
some special state
namely the state of the primary creation of the body

because initially, when there was only an embryo
he had a condition
in general, the mechanics are very simple
when man, for example, just began to emerge
for example, there, a day after fertilization, there are eggs

here it turns out that he is, in general, in a passive state
and so it turns out to be an act of initial generation

originally transmitted this is a calm act
those. some calm ^{Yes}
that's why he sleeps, i.e. he lies down

and if ^{well there} we consider the case
that someone can spend four hours ^{there for example,} sleep
and then work
there are such historically cited cases

then it turns out that the person
it just compensates to a greater extent
that he just interacts more
with the Physical Body of the One God
precisely at the level of knowledge

i.e. it is due to that
that he is, ^{as it were,} behind the elements of knowledge
sees His Body
at least he knows
where is the Physical Body of the One God
^{well maybe not so obviously consciously}
but as if this light of penetration
light of interaction
it is also carried out in the waking state
^{as if he misses} ^{yes}

and in order to pass
you need to have a ^{very} high event series
i.e. such people do a lot as a rule
^{well, except if it is, for example , a pathology}
and I mean
when a person really does a lot
then such people usually
they do a lot and sleep little

so that's why there are so many here
because God He passes through actions
i.e. the One Body of God as an element of the event

if we know
^{means} the organization of the Physical Body of the One God
we learn, ^{generally speaking,} the organization of events

^{Well,} it would seem there is nothing special to learn there
The Physical Body of the One God
since it is by analogy ^{well kind of} the same thing ^{yeah}
took the atlas of human morphology

and looked, it seems there are no problems, it's clear

but here we are talking
about the True Primary Organization
about the fact that as I said in the case of a "car with a trailer" ^{yes}
what is behind the trailer ^{yes}
what is behind the manifested material World

and that's when I'm talking about it now
what if we say
about the elements of physical Reality of any
then the primary element
^{as if} accepting information
and implementing this information
this is blood that does not flow out
because the world is so harmoniously arranged
and not because her capillaries are there squeeze

then if we have
Well, for example, there is an element of absolute protection, ^{yes}
let's assume there from bullets or from some external event

why during the Great Patriotic War
in general in different situations
there were people who went through heavy fire
they were not affected
^{means} machine gun, fragmentation, etc.

and because the situation here is that
that the world was arranged that way for them
that it did not contain
namely the elements of the external input
Well, for example, this is super concentration to achieve a goal
there is precise knowledge
met the One God ^{well as if yes} agreed
the exact knowledge that there will be nothing problematic there
so he calmly walked along his line and that's it

so here is the line of entry of the One God
Well, they talk about some parallel spaces, ^{right?}
etc. there in the worlds
so here is the entry line actually according to logic
it is precisely in this method
approaching precisely the Physical Body of the One God
this is essentially what has already been laid down
in the person himself
these are his specific actions

for God is manifested
and actions
and some events
Everything is God
if we start from this point

it turns out that from this level of monolithic
the principle of complete freedom of the individual
it consists of the following
that you have the opportunity
firstly, discuss, i.e. can you do it ^{there} or not?
or you can do it yourself
but then you have to create more

here is an element of absolute personal freedom
it is a constant creation
creative creation of the next Reality

i.e. it turns out that in this case
this was originally laid out by the One God
and therefore you have no boundaries at all

therefore absolute freedom of the individual
it is in the Infinite creative creation
some of the following elements of Reality

and from this it follows that if we consider
^{for example,} the Norm of events in terms of Thinking
now we are moving on to Thinking
what we do is manage processes
through elements ^{such as} Thinking

then it turns out that you can enter here
into the system of Infinite Thinking
just say this section
this is some kind of Infinite source ^{of} energy of information

here we take it and connect it to the task
and let it spin there by itself for an endless time
and the goal will naturally be achieved

This is why Thinking can achieve the goal
because Thinking is actually
this is a sign of the next
Infinite creative freedom

why is it always possible
at the expense of there are control technologies

In Spirit

Consciousness

for example, to restore the physical body

and let's not allow it there

well, some kind of catastrophic

well, maybe not even completely catastrophic

at least around this event

you can even prevent yourself from thinking

about this event negative for you

on the other side

because you can through Thinking

to cross over

into the next phase of development

and from this it follows that Thinking

this is the next phase

natural, i.e. your free development

Well, for example, if you ask yourself a question

from the point of view of the One God

Why Thinking at all?

Well, people would go for tasks, for example

at the level of feelings there

or other mechanisms that are just there

as Spiritual vision

and so everything is visible and the person would go on his way

he knew where he was going and he had clairvoyance and there were no

problems there For example

although clairvoyance

can also be perceived as an element of Thinking

from the point of view of already knowing the Laws of the World

then it turns out that Thinking

precisely as if reproductive Thinking

creating the next Reality

this is well, the strongest in general

like a self-cleaning mechanism

mechanism for creating the next Reality

and generally speaking this is an element of complete freedom

which is a necessary element

i.e. we came to the conclusion that

that even such a familiar phenomenon as Thinking

This is actually a necessary mechanism

so when do we start to penetrate
well deep inside yourself
and we look at this thread of knowledge inside
then we see that Thinking grows as if from within
inside a person it is created there by all organs
all elements of Reality in general
the whole world actually
The main thing is the Soul initially

and at the same time it appears as if outside
i.e. like some kind of program there
well, the behavior of a specific person
i.e. he thought of something and went

It can't be said that this is a program that was imposed on him
he first took stock and went
if he doesn't think, well how does he think and go
for example, he perceives the situation there quickly, yes
in some cases the pilot does not have time to think through some actions
or is this level comparable
with direct vision level yes
then it is visible anyway and he follows what is visible

but thought is that form
which if you think about it
that "I'm thinking about this and that"
that [...] as if means as a thought

and it turns out that it's only for a total of
we can say that a person always thinks
but he perceives it differently
or it's like an intuitive instant type system
or it is like a form that is called "thought"
there, for example, there is a "well-expressed thought" there
or something like that

such statements they say about that
that thought can be separated, as it were, from Spiritual action
but in essence before the One God
we always have something for Him
and thought
and the Spirit
generally speaking even the Soul
Human consciousness
For Him, these are generally equal systems
except that of course He

initially allocates the Soul
at the level of the depths of your Soul

so the Physical turns out to be the Body of the One God
there is a sign comparable to us
a sign when we are generally mutually recognizable
these are the Souls of people
and the Soul of the One God

and it turns out that when we logically highlight
Thinking or there is Spirit
i.e. we separate one fragment from another
in a way that is simply logical

then the One God does it
that He gives us this opportunity to highlight
He also gave the opportunity to sort of distribute

then it turns out
What kind of opportunity is this?
what we highlight
if we are in relation to other categories
we are , as it were, in an external position
informative categories in general often
or informative there events

or is the situation here that
what if we have for example
well some kind of control is given
then these are not always only informative events
there may be events initially given
Spirit
Soul

so this is the outer element
this is the physical body of a person

i.e. God gave
namely the physical body
to have an external analysis system in management

i.e. it is still a controlling body, yes
control system
therefore it is natural for the One God
there must be a Physical Body of a person

and it turns out that

Well, by the way, we're getting to that now
I just brought you logically

and considering that the text of the seminar
it is created at the moment the word is pronounced
i.e. I'm not preparing, I just see
what is needed for the salvation of all
how do you perceive it
how will others with this text and these actions
to save oneself
there is not only text there
and also direct management actions
are happening on my side

and it turns out that we have
interconnected system
what is the physical body of a person
proves
the existence of the Physical Body of the One God

and when we come to this
the act of faith is complete
then in general [...] then naturally
everyone believes and everyone is saved

especially since, for example, evidence
there is the resurrection of Jesus
Well, complete regeneration
are different systems there
associated with full regeneration or resurrection, yes

it turns out that here
if we touch on this topic
then we see development in Infinity
as it really is

i.e. we can then know
there are stars there how are they organized
i.e. we can know
any distant worlds and Realities
from the point of view of simple comparison
precisely the movements of approach
to the Physical Body of the One God
at the same time it turns out to be realizing

Its relationship with external Reality
there the awareness is more subtle

as I said in the example of that ^{same} sauna
where there is no cut broom, ^{there} nature is not damaged , etc.

and when we begin to move towards Him
knowing that He is in the Physical Body
we make the task much simpler

from the point of view of management methodology
it looks like just a distribution
some of these peculiar ones closer to the lines of force
towards His Physical Body

This is where the act of faith comes in
where the Physical Body of the One God is
i.e. to see Him is already to believe

there is nothing there at all, ^{well}, naturally there is nothing there at all
concepts of any "analysis"
because if you see a person
do you believe that man exists
but you can't help but believe here, ^{yes}

and this is what it is based on
True faith
True movement
and generally speaking True Salvation
in terms of ^{well}, ^{well}, Salvation
it always exists in a larger sense
another question
that the speed of achieving True Salvation

you can ^{either} sail there on a ship
and there, ^{for example}, seal up some crack or hole there
but at the same time are all the doors sealed up ?
what is True Salvation
and the Truth is when everything is fine ^{on} this ship

so here is the concept of "truth of Salvation"
this is when it really is
there are no real problems there
and the person ^{there} definitely survives there

events are definitely shaping up into normal situations
and exactly he achieves the goal of control ^{there}
creatively for all achieves
for myself as well
and everyone is saved

here is also an element of Salvation of all and Eternal life
consists in the fact that
that as soon as in the approximation
you know the Physical Body of the One God
then you are simultaneously proving
that this is an effective mechanism
and as is already self-evident
that He has a Physical Body
and shows you the development

then showing
as the Physical Body of the One God
gives you development for example
you are actually creating
normal stable world

i.e. the Physical Body of the One God
shows
how should you create
physical Reality
and generally speaking, how to recover yourself
and how, well , in general, can you teach others like that let's say etc.

therefore, as a control mechanism
I suggest this method many times
on completely different elements of Reality
apply

including , for example, your health, yes
Saving others
Macrosalvation
some target control systems
there are physical elements of Reality
informative, etc.

thank you for your attention
