

GRIGORY GRABOVOY

The Teaching of Salvation and Harmonious Development
Method of Managing the State of the Soul
29.01.2003

Hello again
The topic of today's seminar
these are methods of implementation and distribution
The Teachings of Grigori Grabovoi
About Salvation and Harmonious Development

and as a method
the level will be determined
when the state of the Soul is regulated
i.e. it is called
Method of Managing the State of the Soul

and in connection with this
when we talk about the state of the Soul
then first of all we mean
that the light is standing light
those. pillar of light for example there on your right
Soul level glow

and if possible, try to consider it immediately
this light
i.e. to select a fragment of optics
which corresponds to the Soul
in the form of a standing pillar of light
let it even be local
i.e. not high, as if not Infinite, but precisely local

by highlighting such a segment
it is clear that the concept of the state of the Soul
as an element of universal Salvation
defined as a state
i.e. to stand together with something yes
near something
and for example near the physical body of a person
in the area of for example the Spirit

and at the same moment

the state is defined as a functional system
this is precisely the definition
as a functional system
i.e. state function
a state of being directed towards something

thus combining
in the element of his Thinking
as a state
i.e. to be near something on a physical level
and the purpose of the action
we get the space of Thinking
which defines the actually combined
these are the two control functions

and this is the space of Thinking
this is the physical body of a person

i.e. when you, for example, reason like this
you come to yourself
and already in the physical body you begin
define processes
primarily growth processes
processes of organization of the physical body

and here is according to my Teaching
About Salvation and Harmonious Development
dissemination of the Teaching
from , for example, the physical body of a person
with this approach
determined by the fact that when you, for example,
Well you are giving a lecture or performing somewhere
at a broad level of people
then knowing where the organization of your physical body comes from
for the universal salvation
You transmit knowledge even through the physical body

by the way, at the same time
you are getting healthier
because the more people are saved
from the fact that you just say, let's say
Well, maybe it's not even necessary
on the topic of Salvation specifically
but at the same time you save

the greater the quantity

you get it for yourself

and here is this control element
it is actually connected with that connected
that you work in any direction
i.e. you can read any lectures, generally speaking
or generally speaking, when spreading my Teachings
talk about any thing

another question
what when you do it
through the organization of your body
according to the system of universal Salvation
then you at the same time
you pass this information on

so here is the organization of the body
Generally speaking, you can means to lead
actually through the state of the Soul

why exactly co-state
because it is a fairly understandable state
at the level of Perception

but we all work through Perception
and that's why when I say state of Perception
and let's assume the state of the Soul
then we first of all see that element
that we use well-known
i.e. terms familiar to us

and therefore actually spreading control
to the level of action
we see that familiar terms in different positions
this is a state of the Spirit

in fact it is the Spirit
in the direct sense
Spirit as for example the Truth of the development of the Soul

and when you see the Spirit
as optical glow
then you can through Infinite speed
spreading the Spirit
see how the Creator spreads specifically in you
i.e. where is the action of the Creator

for example in you

and when do you want to watch
to an earlier state actually already events yes
then you can see
what do we suppose well, at the moment when a person is organized
there is a natural presence of the Creator

so this is the state of the Soul
that there is knowledge first of all
before the beginning of the organization of man
all knowledge of civilization
all knowledge of the world

and therefore the Soul actually turns out
that it exists before the actual moment of conception
i.e. I generally came to this conclusion
logical way in this case

so if we consider
the optics of this phenomenon
and we'll see
how does the Creator give this knowledge

it is clear that the Creator gives knowledge
it is about Eternal development
teaches first of all
how to practically apply knowledge
related
to the action of the Soul
to the development of the Spirit
to the development of the physical body, for example, yes
or the development of Consciousness

so here is the practical methodology
from what i said
it consists of the following
that highlights optical elements
in the form of, for example , specific color parameters
or even sound, etc.
we can distribute
Well let's say the state function
or generally speaking as if the position of the state of the Soul
when the principle is precisely the state
i.e. to be near something
and the principle is functional

i.e. to act for something
these principles will be combined
in the form of, for example, color

so here is the first control
he is quite simple in this position
consists in the fact that
that for example, having considered the vertical level
green but mobile color
let's say there is something in front of me
green mobile color

i.e. precisely mobility
what makes color mobile ^{yes}
how can I give mobility to the color

so, to give this mobility
you need to reach the level of the Spirit
i.e. the Spirit is dynamic
it's clear that it's moving

if it moves Infinitely
then simply select a small fragment
in this movement
we get movement even of the local segment
in this case colors

if we want to translate the Spirit
for example to another state
i.e. in a different position actually
we can do the following action

ask a question
how to get from green color
let's say blue

so here's how to get it
Well how to convert in Perception
because we work on the border of Perception
then you can get into that position
where green color, let's say, turns into blue

i.e. the dynamic function of the state of the Soul
or you can just find the blue color
and switch to this or that area

so that's when the switch
and dynamic transition
it's the same thing
this is the work of the Soul

this is when we come to this term
how does the Soul work
then we can receive immediately
for example blue color generally speaking
without using technology
in terms of the division of the functions of Perception

i.e. without breaking it down sequentially
what is dynamics
what is action
generally speaking, working
because there is a purpose in work
Well let's say we need to save from a nuclear explosion
some kind of nuclear reactor
we can work like this
What
firstly, if there is time, go into detail
secondly, of course, work immediately

why did I say "secondly, work right away"
because it is best to understand the structure of the work
i.e. follow completely
as if one iteration after another
and receive a specific controlled action

so that's when we work right away
sooner or later
element of work effective work
it should be used as an experience
what has been achieved

so this is what has been achieved
this is something that must be controlled
from the point of view of how this phenomenon is spread

for example, according to my Teaching
About Salvation and Harmonious Development
you can instantly transfer knowledge
which you have achieved
in one particular case
Well for example cured

at least one cell of the organism was restored
then you can pass it on as general information
for example, what can be restored at all
such a specific method of management there

and now as soon as you spread this knowledge
then this knowledge should be immediately universal

and restoration
this process is quite universal
if it is possible to restore one cell
then what problems are there, then the whole organism
or there to restore the organism which is not functional yes

let's assume that destruction is incompatible with life
nevertheless
the body can be restored
through one cell
or through an event
let's say we don't let an accident happen

and this is the choice that the Soul makes
choice in terms of management
through what event to normalize
this is the presence of the Creator's Action

i.e. exactly when you work
at the level of fact
with the simultaneous work of the Creator

i.e. you need to be able to work
simultaneously with the work of the Creator

but the Creator
who created almost all of Reality
It works always and in real time.

and that's when the state of the Soul is like this
which is related to the work of the Creator
you work almost simultaneously
then you get the most accurate
the most dynamic management structure
which achieves action
including, for example, actions for universal Salvation

and now if, for example, we abstract

from well, specific private tasks
and try to make control right away throughout the hall
for example, according to the hall's objectives
Here is everyone who is here
try to make management
according to the overall objectives of the hall
just by doing the opposite action, for example

i.e. through the translation of blue into green
just do the action as best you can

but management must proceed from an abstract concept
if you can translate in your Perception
blue color to green
then why, for example, can't it be solved
any other information problems actually

because the information is in your Perception
this is generally speaking also a certain color light or for example knowledge yes

so here is the translation of one element into another
the simplest translation
it can be very useful
as a system of knowledge transfer

so try now
do it consistently with me
next exercise
which I will now conduct
and it's better to do it in real time
i.e. for example I say
you do it right away if possible

next element
this is a translation back from green to blue
but at the same time you should see
almost all the information
what is macroinformation

this is all the information for your Soul

you are doing an elementary action
but at the moment of this action
you must see
that for example there is information about universal Salvation
where is it in your Perception

Well let's assume that she is somewhere near me
but when I say "near me"
I can speak near a physical body for example Yes
but I can say that here - in the space of Thinking
the space of Thinking can be located
generally speaking in one human cell

and that's why if I say "in one cell"
I know where it is organized from
then the physical body for the universal Salvation

and then I see what needs to be done
so that the physical body would be healthy, for example , yes
all people have
so that it has the functions of Eternal reproduction
Eternal development

i.e. it is enough to find
one fixed in this case
target action point
and we get a correlated action
i.e., related, for example, to the Eternity of the Soul

because if you think about it simply logically
The Eternal Soul must of course create the Eternal body

then the question arises
a person who is born to, for example, a level
Well let's say knowledge
that man exists even before birth yes
then the action begins from the moment of birth

but if a person is born with knowledge
that a person exists, for example, before conception
then it turns out
that we actually have this type of management
that all the knowledge that exists before conception
we pass it on to this person
and this is formed by the collective Consciousness

so the more people
can they at least know this knowledge
in terms of just knowledge like I said
then even more people will be born already
with positive experience for example Rescue

and this experience will already be realized
well specifically in human actions
as a development of his future destiny
in terms of Eternal life
in terms of, for example, universal Salvation

so, actually preparing
Well as if it were the ground for future development
and at the same time it is possible to consider
and your level of development
and introduce this knowledge to yourself
or, generally speaking, to any other person

by the way it's like a therapeutic procedure
looks often very effective
i.e. just introduce knowledge to everything
on a specific channel
for example through the translation of colors

introduce knowledge for example at level
cure for some disease
systems of collective Consciousness
namely the most effective systems
and you can cure disease just because
that you entered knowledge before birth

and considering that the Soul exists before birth
you actually just passed it on to the Soul
and there was a cure

That's why
this is not only a cure by the way
it could be event management there

so basically the situation is that
because I always talk specifically about the control system
it doesn't matter what you do
either this event or this treatment

then we must as
Well as if a penetrating state of the Soul
develop a fairly simple position
which allows in real, well, ordinary, everyday events
be able to do management in a natural state

Well how to bring out the control level

from the level of voltage we assume
and replace this with a heartfelt one, let's say
but a natural state
that's why there is a profound state here
well, that is, it penetrates into any control systems

and for the universal Salvation
often should be and be Infinite access
in the plan there
or to the Micro level
or to the Macro level
i.e. to Save everyone
Often, the absence of access restrictions is required
in information

for this it turns out
that the first principle must be
This is the principle of absolute creativity in action
Well, that's what you do when you save everyone.
this is included in the formulation

the second question is what should you do if possible
when you lead someone along with you
to show technological efficiency most simply
i.e. considering that in reality
the information is quite transparent
any well as if an operation any event
connected with the action of universal Salvation
it's always visible

and your positive experience
it still goes on as if well, into the general so to speak "piggy bank" yes
may be in quotes
because it is not a specific piggy bank
in general it can be an instant experience
acquired by someone at any distance

and let's assume in order to conduct information
well, at the same nuclear power station, transfer it to the operator
Often it is necessary to go through some information spheres

and by the way, it exists
Well as if some kind of protection
as if the technological cycle of the nuclear power plant yes
how to transfer information

for this it is easier to accumulate experience yourself
in another place
and light up
and here it is easy to see it
and that's all

to gain experience instantly
it is necessary to penetrate, i.e. to make a penetrating action
and here is the penetrating state of the Soul
this is penetration not only as if into a local point
but also penetration everywhere at once

i.e. here the functionality lies in the fact
that the deeper you go into the information
the more you control, as it were, the general mass of information

Well, there 's a very simple example there
if we have some kind of lever or gear
which moves a very large engine
then it is this gear
and determines the behavior of some big mechanism there

so having access
there penetrating to this gear
you can control the external environment

and this is the principle of correspondence of the ratio
because the physical world
it is often arranged in a completely similar way to that
how the management information exchange system works

and the physical World is also a way of control
so when we talk
about the state of the Soul
it could also be a state of the body
actually the bodies of the Soul
I will introduce the following definition

for example, revealing the body of the Soul
in the form of well let's say of your physical body yes
and seeing that your Soul has the same appearance
how is your physical body
It's easiest for you to work then
with condition
aimed at the task of universal Salvation

so that's when you see yourself
that your Soul is in you
and her condition
the state of your Soul
this is already a saved world
then you see first of all, well, normal, healthy
but already the Eternal body

i.e. here is an external view
gives the coordinate of Eternity
Eternity coordinate
if you look at your skin
it's just a more illuminated Perception
plot
sometimes one point even

so that's when you come in
to this point
you see
that the body grows from Eternity
from the structure of Eternity

we are now also examining the issue
how does the body simply act on control
if you know the mechanisms
as if distribution of information yes well optical

in optics everything is very simple
Well let's assume a large hall yes
or there are millions of people on TV
if there is a light on somewhere behind, it is visible
naturally it is visible if you shine a light through the flashlight
at the level of Thinking, as it were
well, conditionally yes, a lantern

so when you activate some point
in your body
in order to make control, for example
for the universal Salvation
it's still visible one way or another

people are actually almost all
They distribute the signal system very precisely
they see everything absolutely specifically
one way or another you can convey it

so the first one is like an exercise
that's exactly what the transmission is about
after all, this is the first exercise again
pay attention
it consists of the following
what for example there, having illuminated this area somewhere
for example in this case I can say
what in the area let's assume there is the left knee joint
you can light it up in front of the knee
the area of the transfer of the Salvation structure

and then I can generally speak about, for example,
how does the Soul relate
with this site
but the transmission is already coming from the entire physical body
information

and that's when you learn
precisely to transmit information
in terms of relationship with the body
relationship with the body

and the state of the Soul
correlates with a healthy body, for example
you do work all the time
actually restoring the body

well, that is, you regulate the work
there is your own organism
pass on this knowledge
at the same time and by the way

because it's clear enough
what is a canonical system of governance
that there is a healthy body there

and so when you work
through let's assume the action of the body
then you see that the state of the Soul
is related to that
what does the body need to do anyway
i.e. for example, what well let's say you need to go brush your teeth and so on, yes

and when you start to analyze
Why did such an action happen now?
i.e. why are you standing there now, let's say you read the newspaper, yes

this is the reason for any human action

then you come to that
that you see the Creator at this moment

and this and that
how do you see the creator
than for example there than in the heart

try to enter the heart
you will see that the Creator is in you
and generally speaking, it is necessary at the moment of conception , for example

Of course it exists before conception.
then you can go out
for direct telepathic contact now yes

i.e. if we relate to that
what are you for example well before conception
then it turns out
you have that absolute Norm
which is generally always near you

and here is the state of Norma
determined by me now
this is a state
which even at rest
Well, a person is just a physical body
let's say while watching TV there
some neutral program or comedy film
you have control action
which transmits the signal
through this comedy movie
to all others

It would seem that you are just watching a TV signal
which may come from a comedy film
there 45 years ago

but when you look in such a state
you transmit a signal through the action of images
which you perceive

this is action
it is already a Macro Access action

and I said that if for the sake of Salvation
need to have access to everything
in order to activate the task of Salvation
and its mandatory implementation
then it is also a static element
let's assume there is a TV and some other object in the room
he should also be able to
exit to universal control

i.e. you are actually connecting
any dynamic action
to the task of universal management

and when do you practice
while doing this, i.e. now imagine
I see that there are already quite a lot of images
work right now with your environment there in the hall
i.e. start working right away

this is the task today
if possible, work immediately

and for example you have something there
there's a floor lamp and a chair, a table, a sofa, let's assume
try to watch
how is your condition
i.e. a pillar and a standing position actually
i.e. the Soul stands vertically
Means well, in the form of a physical body, for example
which is in you

so and at the same time, like when I said
"which is in you" yes
I have translated Thinking to the level
that first the Soul and the body is already inside
you are personified with your Soul

and when you see
the continuity of the connection between the body and the Soul
you see how the body is generally organized
in general, in principle

i.e. where do the connections come from?
For example Well there are the glows of the Soul
with some element of the World

you can watch any event in the world
Then

Well, I've just given the way now
view any event in the world
Well, in any galaxy, generally speaking, there are distant events

as soon as you start getting closer
for example the first element I said
that "yes, you can view any events"
look at least at the movement of some particle there
from billions of light years away

but when I say
"let's get closer to ourselves"
I designate this as if I were introducing a new action
let's look near us there or locally

so here is any next action
for the Creator
it is generally speaking new and equivalent, i.e. equal in rights

so when i talk about new action
Be sure to pay attention
that here is the light of Eternity
coming from , for example, the surface of the body
this is what organizes initially
action of the Creator
well, in your understanding, so to speak

in general how to discern the action of the Creator
well, at the optical level
this is where the Creator's action is

so here is this light coming from the body
and distributed as Eternity
and placed in the logic of Perception
like Eternity
this is the action that you understand
in the right aspect for you Perception

Well For example there is a person who knows mathematics
if he needs some other element of science
to know
he's trying, in general
can translate

through mathematical perception

or there is a biologist through biological
in his subject of knowledge

so having the apparatus of knowledge that you have
you can always translate
all the aggregate information
all the elements of that
what does the Creator give for the universal Salvation
through what you have now

i.e. it is not necessary to study something specific there for many years
or master some very long-term technologies
you must understand what is here
and you understand it

i.e. that is why the body acts
that's why the body functions
because you absolutely understand
what to do at every next moment

this is when you enter into the concept of precision
Do you really understand where the Soul is?

here is the concept of "accuracy of understanding the location of the Soul"
this also applies to the state management method

because then what to manage yes
if you have not specified the location

and here is the location
maybe as I already said there
inside the body yes
near the physical body
but I'm talking about the location
which does not correlate with the physical body, for example, yes
in general, this is where the Soul is
Well as if in essence yes in principle

yes, I understand the body
but the Soul is Infinite

then the question arises
where the action of the Soul is spread
to interact with the Creator

well the simplest logical element
which can be applied
this is when the Creator created the Soul
so naturally you can go
according to the structure of development from the Creator
and therefore the Creator knows ^{yes}
where is the Soul

but then we must be able to understand exactly
that's exactly what the Creator gives
and this is ^{generally speaking} a special technology
absolutely accurate

for the universal salvation
as I said, you already know

but to understand and detail
this is additional knowledge

so knowledge is what you take in the form of knowledge ^{yes}
this is one of the fixing positions
presence of your Soul

you know with your soul ^{yes}
naturally "soul knowledge"
there is such a term ^{then}

and I think that if we expand it
^{generally speaking} it means spiritual knowledge
can move to some other positions
^{let's assume} to know with the Soul to work with the Soul, etc.

and here is knowledge in your understanding
i.e. it would seem to be a functional element
it's just an understanding of the ^{actual} structure

nevertheless you see here
that knowledge is the presence of the Soul
^{well} some place
because as I already said we are already talking
not about a physical place

and then you'll see
that just knowing the physical place
I'm not really satisfied

I'm not satisfied simply because of that
what if we save the nuclear power plant there
or some kind of plane or train
or in general the world from a global explosion there

then is it necessary at all?
so that you fix it near you
there in the form of a physical body
state of the Soul

and how then to extend the action yes
to this element or to Infinity

i.e. we must be able to do both at the same time
see
Infinite state
and the presence is precise

and understand at the same time
that if we want we can
For example, I took it now
and the Soul is located specifically in me
in the physical body
in the form of a physical body, so to speak

I can make it wider
then the physical body is inside the Soul

and that's when it's already going
combination of this process
then you can see how the Soul organizes the body
through, as it were, external optics
there is this external glow and some kind of

then when you start working
let's assume through glow
which is logically understandable
Well, it's logical that if you light up around the body
then the glow will be visible
and it is clear that the incident light can somehow act
on the body

so here is the concept of "how to act"
if it's just light that's one thing
so here is the concept of "how to act"

this is the second exact coordinate
presence of the Soul

the first exact coordinate i told about it
the second is how to act

and this is where it comes from by the way
immediately the third coordinate
where to act

Well for example how to act

then it turns into the concept of "how"
Well, it includes a whole range of mechanisms
there let's assume the trajectory is a fulcrum, etc.

so that's where it comes from
place inside
inside the physical body for example

so that's how you enter "from where"
and immediately you get inside the body
you see what the body really is
it also has the property of Infinite action
physical body

i.e. you in general
when you perceive the body as an Infinite quantity
then you see that it has
property of Infinite action

logically it is very clear
any element of the World in general
has the property
influence any other

i.e. this is also there
property of Infinite action

but when you start to ask yourself a question, for example
and how does the dog perceive it there ? let's assume there is a cat there
there the tree is some element of Reality
let's assume the stone there is silicon

how are these elements generally perceived
and in general if we consider

your state of mind

there is a system of actions for example

then the principle arises

that at the moment of knowledge of other elements

i.e. the external world

we must also implement

the system of universal Salvation also

and in connection with this

as an already concrete element

the next action needs to be highlighted

from the form

firstly from the physical form

for example, you perceive a stone there

any element of Reality in general

here the only thing that needs to be highlighted is the person

a person is perceived as a whole and immediately

this is how it should be highlighted

and any other element

can be perceived there for example segmentally

there is an element of stone there let's say there's an animal there 's a tree on the street
yes

try to isolate the signal

which is comparable

with Human Perception

i.e. comprehensively and immediately

then you will get to the essence of every phenomenon

and you will see by the way this is a specific technique of transitions

in the essence of the stone there

where is it organized from

find organization points

then you see

what is the state and action

other elements of Reality

correlated with your action

just like your Soul

correlates with the development of the Spirit

i.e. in fact, the development of the Spirit leads to that

that there is such an element around

as the perception of these elements and their development

so here as a specific training
Now
make management
for the task of universal Salvation
and for your personal task
at the same time
may be higher in terms of the level of universal Salvation

your personal level to light up below there
make such control in that
what you find is actually the essence of the phenomenon

i.e. this is how I told it
that it is possible to distinguish the state
here in the part that I already told
how to find the same element
in other elements of Reality

i.e. how to single it out at all
the structure that organizes the stone ^{there}
organizing ^{there let's assume} an animal tree
in general any element ^{there is} a molecule

and at the moment of allocation of this structure
illuminate your thoughts like this
so that there would be universal salvation
just through the flare
action highlight ^{yes}

You're not specifically doing Salvation there.
and due to the illumination simply due to that
what are you working on
over the knowledge of the external structure of the World
and plus at the same time
solve your personal problems

Thus
this is a combined solution of problems
because you are simply experiencing external Reality

and try to do it as intensively as possible
i.e. do not release voltage
work hard
if it's difficult, try to work anyway
and we will work at the same time

when working in the hall
try to look
that the concentration has increased
first in the middle of the hall
then it starts to sort of diverge
between the people present in the hall

and try to do so
so that the glow coming from the people in the hall
it was immediately clear to everyone
who perceives suppose there is a video recording
this lecture this seminar

i.e. the seminar implies
what are you working on
it's not just mono material there lecture
and you work intensively at the same time as me

and at the same time you try to make the management so
what happens is that the person who watches without sound
yes image
he still gets control of Salvation

and when did you do that
pay attention
that this is exactly the state that has come
design of the physical body
i.e. there is your personal physical body
but the Creator organizes all bodies
it turns out logically even
and that's really how it is

i.e. if you go higher
then you can reach the level
Well let's assume there rise imagination there for example above the hall
at a level there, let's say, of five meters
and you can see that there is a point
where is the organization

Well let's assume there is a physical health condition of the whole hall
The creator, by the way

i.e. naturally the Creator works and so on
because the action of the Creator
it is Infinite in manifestation

and here is the Infinite manifestation

in terms of interaction with the Creator
this is also a state of the Soul
i.e. how can you master, for example, all the information
if information is Infinite

you can master
if you can work
at Infinite Speed
i.e. what is the speed of work in general
in working with information

Well for example you are picking grapes
if we assume Well there you collect with one hand
yes, this is one speed
two
and increase

so any bunch of grapes
this is action
i.e. information about the physical World
as I said that the physical World in this case
can be considered
as a kind of support system
for the next element of knowledge

and if you collect like this
why don't you cut the grapes
if you set such an abstract task, it would seem yes
how to create an element of Eternal External Reality

because now
we worked with external Reality
the glow of Eternity from the physical body
which by the way organizes
your physical body is also Eternal
we have already looked at this element

now how to do it like this
to pick grapes without cutting them

for example, you can Well, first of all, sort of yes, imagine it mentally
but we are talking about the fact that grapes should be nourished

i.e. something like a self-assembling tablecloth
with which you can eat, for example
but she keeps playing something there

i.e. if we set the task like this
it is for the universal and Eternal development
This is exactly how the creator set the task
how to ensure eternal reproduction
Well there let's assume there are food products
or some environment
which is the development environment
there is a healthy physical body for example
or even Peace

so that's when we want to find
the following system of finding the Soul
naturally the Soul is there
including there
and it is located quite tightly

True, the positions there are dynamic
i.e. she does something there in this task

and thus generally speaking
if you go over
to the level of logical thinking
then it is clear that you can find it yourself
quite a lot of positions
presence of the Soul
which generally follow from necessity
there are needs for the functionality of the body
as I said, organizations of the whole world, etc.

each of us
can find quite freely
in free time other positions
they can be found in principle
in fact even infinite

i.e. we come to logic
to the infinite expansion of the Soul
in general, by the way, even elementary actions

i.e. I speak in my system
Salvation and harmonious development according to my Teaching
what we must prevent
there at the expense of his Consciousness
a possible global catastrophe there
but that's generally speaking

the most necessary step
for the next action

nothing there like something special
in terms of well, it's made up and not
because we have to do it
because it is necessary
it's just an adequate reaction to Reality

there is a possible system of global destruction
therefore the next action
it should be exactly like this, well, in this sense
to make its implementation ineffective

and if we proceed from the level
that any object exists as if by itself
then provided that the equipment does not always work well
how will this technique work at all
will a nuclear missile be launched
this is also a process of the state of the World, generally speaking

so this is the state of the world
and the state of the Soul
these are related concepts

i.e. if you have a calm state of Soul
as a rule in the World
there are no structures that threaten the entire world

pay attention here
i.e. well let's assume something doesn't happen
what could destroy it altogether
Well let's assume there the Earth or even the whole World

i.e. if you have a condition
which is aimed at action in the World
then something needs to be done, somewhere we need to help

in fact, i just told
about the diagnostic mechanism
i.e. how to identify a point in the World in general
where help is needed

Well Let's assume next month
Let's take and consider two specific countries
there UK France

and we will make it so that in these countries
there were no ecological disasters there

well okay we did the action
due to, let's say, just a color transfer
green was converted to blue
and at the time of translation
here is the translation action taken

so how were we able to translate
one color into another
due to the state of the Soul, moreover
at the same time, it may be without going into detail, yes
how does the state work well simply due to the state

took selected the glow element of the translation
for example, in the form of a silvery-light color
silvery white
and covered these two countries

and we got control
which is generally comparable
to manage the whole world

and then the Soul reacts more calmly
to the next Reality
there for example for this month

i.e. try to select an element so
which is recognized somewhere
as an element that needs to be worked with
this is also a state
which is correlated with the state of the World

so when for example I diagnose there
Well, let's assume there's a plane there
transporting nuclear and some other structures
which should not happen under any circumstances
shouldn't fall on some territory

the task is quite as if Well, it's so tough and specific
or even a single plane
when it comes to just one diagnosis
then it is clear that we are talking about that
that not even one person should fall
if we assume a controlled plane

there are agreements ^{there} and they will obey
they will either change the route or not take ^{off}

then here it turns out
what is the system of responsibility
that there is a nuclear warhead there
that one person
it's actually the same thing
even just one kitten ^{yes For example}

because if you take responsibility for diagnostics
then ^{generally speaking,} full responsibility falls on you

and here is the state of the Soul
which regulates, ^{as it were ,} that
that you are doing some action
This is the principle of full responsibility
for all the surrounding Reality

i.e. why does the Soul have an infinite background
because in fact
She is responsible for all external Reality
before the Creator actually
and when you
^{well and in front of , for example ,} your tasks ^{and in front of yourself}

when you ask a question ^{for example}
like the Soul
^{well, having for example such a factor}
as the primacy of your self-organization
how can she even answer
in front of myself
i.e. what to answer for

then the next question of course arises
what ^{well for example,} you are a person
which has some range of freedom of action
you are responsible to yourself
^{Well yes in front of the physical body}
There are social laws there, ^{yes, that 's clear}

in the end you say
that's where the Soul bears responsibility

but when we ask the question
and how does the Soul answer to itself?

this is the primary level
which was created by the Creator

so that's when we talk about that
that "the Soul is responsible before the Creator"
that's understandable
but how does it respond to itself technologically?

because the principle of responsibility gives and action
if you want to well drive there for example responsibly yes
you study the rules there for example, traffic
or learn to drive better
responsibility is always objectified, as it were

and when you ask the question, for example
for the task of universal Salvation
what is the responsibility
then you see that well first of all it is like this
your most necessary natural action
responsible Soul

i.e. responsibility is a natural state
actually, as if at the level of the heart

those. please note
I gave specific coordinates
this is the heart level

and when you, for example, begin to perceive
hence the responsibility of the Soul to itself
then you see how the body begins to self-organize

and that's why you do the next move
why are you reading the newspaper at this very moment yes
or why are you listening now
there is this current seminar today

and when you see
here in the penetrating state of the Soul
why exactly is this happening now
then you see with your Soul

that's when you see with your Soul
your position is practically invulnerable
at this moment
but it is often small, there are milliseconds

if you can stretch ^{it out} to a couple of minutes
this is already considered a great happiness
many often don't stretch out over decades
there are more than five minutes
if we proceed from this technology

but when you, ^{for example,} start to increase technology
who cares
have you been in this state for at least an hour?
the main thing is to know where to be

so here is the next level of management
it's knowing where to be

and that's when you know
where is located
then you find in fact
another point of realization and presence of the Soul

and here through the level of responsibility
you start doing management
state of the Soul
management through responsibility
^{as if} for everything around actually

and quite by the way, a logically simple thought in fact
^{Well,} I came to it by a different path.
at the expense of the task of universal Salvation

working like ^{a well} ^{as if} conducting information
through the structure of the realization of the Soul
in words or through the action of the Spirit ^{yes}
i.e. not only through the logical phase of information

and when you start to see
what can be said with words
through different, ^{well,} in fact, manifestations of one action

i.e. to Save everyone
you can work
With soul
In Spirit
Consciousness
body
or finally call on the phone

combining all these actions
and say that in some reactor
there and the problem will be solved

but it's a task
not just do a one-time action
do it at all
so that for all times there are eternal
the system was being laid
Infinite real development
namely harmonious creative from the Creator

therefore every action
should be clear

and that's why I try to go deeper
into different systems of manifestations

because the more experience you gain
the more actual action accumulates
aimed at implementing management
the more we have
in fact, precision in control

those. quantity of material
outgrows
in general, as is usually accepted in practice
into a specific management methodology

so if you do it now
namely specific management
according to their tasks
from the total material
only today's part of the seminar

this is what I listened to
you take it and immediately apply it to management
for my personal purposes

just right away
so I set a task
right away as usual yes in real life it happens
do management right now

you will see
that the task of universal Salvation is done

by the way, it's already up to you
and made by the Creator

another question
that you should be able to do it yourself
according to my Teaching
everyone should be able to save if necessary
and the whole world as well

and in connection with this it turns out
what did the management do
in this case you must be
objective and responsible again
before the action
because your action is clear to everyone
and even more so you are engaged in the Salvation of all
It's better if you do it exactly as quickly as possible
and spread well as quickly as possible
or there is endlessness

so the next level of the state of the Soul
and this is the level
when you already manage the state
this is the level of information dissemination
or even to one specific person
in general, this is also possible

if it gets very accurate
only one person
this is already a lot
means for Reality for the whole World

or for everyone

and that's when we say "or"
we see that generally speaking it is necessary to teach
for example, save everyone there or just one
Generally speaking, it's essentially the same thing
here is the number of actions
by the number of controls

and therefore the only question that arises is
to be able to well How can I differentiate it?
by optical fractions of Perception
first element second third

let the first one be some complex element, let's say
the second element will be, let's say, less complex
after all, we're not even talking about the level of difficulty
but just when you are able
precisely in the calm state of universal Salvation
knowing that you will definitely save
move on

This is, generally speaking, an element of promotion
next move element

at a very active rate of development
often the element of movement is not considered
i.e. let's assume a person is engaged in management
and it picks up such a high speed
that he then does not feel the movement

and the question arises
what is the structure of its development then?
Well, the world is not collapsing
it won't collapse by the way

then we have to assume to do something
so that if in normal work
a man learns to write
over time he sees
what does he write there more yes
how to set dynamics here

so here is the dynamics of the state of the knowing state
The soul that knows

because there is a state of rest
where is the maximum action
but at the same time you know
that in fact everyone is saved

and this action consists in the fact that
what are you for example Well as simple as it may be
or control
or be in a state of controlled rest

why "managed"
because it still exists there
global destruction systems
at least reproduced

the intellectual level of a person there
there are some kind of chemical bacteriological nuclear weapons
and similar systems of global destruction
talk about that
that you can, for example, just relax
it can be done quite conditionally

i.e. yes, it is possible to create conditions for relaxation
which in general can be said so
this is where management is done
which is called rest

at the same time, something shouldn't explode somewhere
it is controlled
and then how do you enter the gap?
which you call rest

but how about if we talk about that
what is well there is real relaxation there
there are a lot of other systems
well, galaxies, etc.

well over time the level will be eliminated
when people can destroy themselves
due to the global destruction systems there
but where is the guarantee supposedly yes
that some large cosmic body
there will not be directed towards the Earth

therefore the level of rest
level of seemingly calm work
this is actually a level
states of complete control
behind all the surrounding Reality

and when do you start
this is the state to get into
this is controlled
and already generally speaking controlled rest
generally speaking, it goes over Well what can you call it
as a rest of the Soul in fact
i.e. rest of the action of the Soul yes
rest of the action of the Soul

then you see
that this is a natural manifestation of human actions

that's also it
that the Soul is in its most natural state
where there is a system of complete control over Reality

because if you look at it logically, well,
what does any person have to do with it
performs some action
The world is not destroyed
therefore the person took part
in its usual action

and that's when you do your actions
while being aware
where does this connection occur
in what place near the physical body

here I already say
about a specific place
near your physical body

then you start to see
what exactly is this action
which for example is near you
it is the action
which well in general it is
as a source of information for that
Well, what to do next ?

i.e. well let's say I'm diagnosing some plane there
and it is not necessary of course what exactly is here
there is some structure there that transmits information

but when I say
where does the optics and the information itself come from?
where is this block even glowing
which, for example, talks about a defect in the plane
or about some disease
how can I cure it?

i.e. we are talking about that
what it can be of course
and in any other place
but here is the very concept of "next action"
actions of such as the Creator shows
for the purpose of universal Salvation
this is such a concept

located
in the structure, generally speaking, of the logical organization of action

i.e. we must
first of all, we need to organize the action that we need
then manage

Well let's assume if Reality is diagnosed
and suddenly some elements are not standardized
first normalize
then bring it back to normal
and get that there is a norm, i.e. there are no problems

after all, our task is not to identify
and do it in order to avoid problems

in connection with this it turns out
that even at the initial level yes
as if information management
we are forced to do management
as if the primary source

Well let's assume the concept is this
here is some primary information
and if we know how to diagnose it there
then maybe we can record something there

but that's the manager's job
not to fix generally speaking positive
and to do this you need to make a correction to the information
from which you receive information

that's how it turns out
that the state of the Soul by preliminary action
what is the future yes
preliminary action
preliminary action of the Soul

having considered the future
as a preliminary action of the Soul
we can say that from the future to us
spreads well let's say a signal
By the way, your own infinitely developed Soul

and it turns out
what if we can regulate for example

state

in terms of the absence of macro-disasters there
or any local catastrophes at all
in general, just so that there would be an ideal, for example, Norma
ideally

then it turns out that we can actually
state of the Soul
determined by the structure of the future
fix in Norm

and at the same time, this is generally speaking
Eternal harmonious development
when we have precise control
the whole situation ahead

then it turns out
that's control of the situation
he resists
that's when you look further
for example further than the future let's do it this way
The soul can look at it in other terms

and looking further than the future
you will see that all this comes down to
into the absolute freedom of human will

i.e. when you move into the structure of the future
then absolute free will
i.e. a person has a full expression there
Well, naturally in a creative way

i.e. he is free and infinitely developed there
and can develop forever

so that's when you look further
then this is what you see
it's you
Well let's say that's what you are
or that's what you are
the person is like that

that's what you are
because ahead, well, further, yes
as if further even than the future

we look at this point all the time

everyone is happy ahead
Everyone already knows technology better
there according to Eternal development
everyone lives forever

and that's what it turns out to be initially
that the physical body is created and adapted
towards the future
because there is exactly this element ahead

so here it is "further than the future"
you actually get to that
how your physical body works
the next second
I'm coming back to this problem again

and why further well it 's clear that you
well the future is like a time interval yes
it flows
but it turns out that you are formally outside of it, as it were

because you act in your own way
and the future is in general as if it were already becoming the past

then the question arises
and how do you move the structure of the future?
how do you even take it
and so you stretch out events past you
if we already proceed from the tasks of general management

so this is the state of the Soul
determined by place means precisely docking
as if the structures of the future with the physical body of a person
this is that structure
which can show absolutely accurately
that the structure of destruction as such does not exist

if, for example, we ask the question
where does the destructive action come from anyway

then it's only worth it
Well for example, there is a controlled escalator yes
if you stand on it and it's very good
reserve its stability

he clearly won't fall
he will still take you somewhere there in the future

so if we talk about managing Reality
from the point of view of future processes
did you know that you can compress elements

Well let's assume there in treatment
there you can simply pause some process

and healing occurs instantly
simply because some process is suspended
as if Well, the body just sort of "moved ON "

and it turns out
what if you work with elements
for example related to that
how to spread the state in general
to control the future
then it's best to act
through logical postulates

for example, an area where destruction absolutely does not exist
although i still said
that this point is found

and as if combining the found point as if
with logical level
we get it again

Well For example there is your healthy physical body
all others
and we come into society there For example there are Eternally Living
i.e. everyone lives forever and they rejoice

we see
what is the way out of this state
as if when you look
structure of the external observer yes
organizes all other elements of Reality
through this structure one can see
how are they organized
all other elements of Reality

and when you see it
it is clear that they can be influenced

Well let's assume how the stone is organized

Well, they came up and turned some kind of tap
was organized differently

you want to prevent some avalanche from falling from the mountains
look at a very simple practice
enter the structure of the Eternal Living
how to get out of this information
as an outside observer

and see what to do
so that the stone doesn't fall from the mountains there

to screw his organization as if
so that it would become more established there , etc.

i.e. the meaning of managing external Reality
in this case it is that
that the state of the Soul is in the structure
beyond the future
but touching at one point
and of the physical body
makes it possible to do this
very precisely control the entire external Reality
on fairly simple logical postulates

if you start let's assume Well, let's do some management
on some elements of personal actions
then if you go beyond the structure where it exists
well , for example, to go out there where there is no destruction, yes
then any of your actions are positively creative

why look for this information
because there is one of the elements of action
which speaks about that
let's just go creatively
and how not to not connect
with information of destruction and all

as if but this is not a way of leaving as such
from information
because there is an element of struggle
necessary, no problem
we will win anyway

i.e. but how to waste time on a fight there
it's easier , for example, to make an action aimed at that

to get out at the right speed
to the right place

and for this it turns out that there is
there is the following problem
which is designated
as a state of absence for example generally speaking information
about destructive environment

This is generally logically understandable
that this is a special state

and for example if I diagnose there
Well let's assume there are 75 planes there
By the way, these are the first works I carried out
as soon as I started
I had about 70 planes

this is every plane for example Yes
if you look through well let's assume there for a second yes
It's been 70 seconds a minute now and I have to spend more somewhere
and it turns out that, as it were,

and imagine if the task is diagnostics
with the principle of full responsibility
because in essence it doesn't matter one way or another
responsibility it always exists
before the elements of external Reality

there if there is no with some system of contracts
and they are not subordinate to you
then you still have to find a way, yes
to regulate the system

it turns out that how can all the elements be entered
into the structure of positive events
which is flowing on you
Well , let's suppose we compare it with that
what are you watching tv
and all the time positive events

and negative ones
there is some kind of filter there
he just takes them and throws them away

this is the meaning of this filter

what is the point in this case
how not to record a negative status

so that it doesn't get recorded
this negative status
it turns out there is enough here
generally speaking, a very simple action

again if returning
to the translation element
there from one form to another
let's assume color in color
or there are forms in form

so if we translate the structure of Perception
from the level of human perception
to the level of another form

for example, take and look through
how on Perception
the man looks like
generally universal or some specific one
and what does it look like ? let's assume the same stone
which should not fall from the mountain there

so if you carry out the action
only through a person
i.e. first highlight the person
and then move on to the stone to this glow
the stone will not fall
on that particular person then

Well, maybe I should just say
it won't fall out of nowhere at all

i.e. and as if here is the action of the transition
from a person
to any other element of Reality
immediately objectifies the environment
in the structure of the absence of, as it were, restorative
Well there are no negative or destructive elements

and that's why it turns out
that acting from a person
again yes we came back the same
to a very simple thought actually

to postulate actually to fact
that the human body gives absolute control
in terms of if you go from the body
to some object of information

Well Let's assume a simple example of control
you want to somehow normalize the action ahead
or even cure it

took first recorded the glow of the body
translated into the structure of the Soul as an element of luminescence
and you will receive the action of Reality

what is the difference between Thinking and Reality

in that in this case
highlight the body
you can highlight
just with my own Soul

at the same time you can transfer the Soul
Perception of the Soul
into the structure of one's own imagination
i.e. into the system of Perception

because it works out
that the Soul itself organizes Perception
she herself is invulnerable
therefore logically
you enter the invulnerability zone

and this structure
can be used periodically

Well there in case of some there
let's say somewhere if you see an emergency situation
you can immediately enter just this thought form
and you will see that accidents are common
example , when I use it
it doesn't happen

and at the same time
it may be in the future ^{yes}
the plane to be specific there
try to make sure it lands there normally, etc.

and yet the concept of "action"

or there "try to act"
consists in the fact that
that everything depends on strength and time

if you work for a long time
then as a rule any action
can be brought up to the norm
it all depends on the amount of work

so I think the task is ours
be able to bring it to fruition
generally speaking, management for universal salvation
to such a level
so that through the development of management
any action did not lead to for example there to destruction
including let's assume there to biological death, etc.

and if we bring this to fruition
to the level of general development
and just take and, as it were, disconnect this contact yes
with destructive information

then it is clear that the person does not die then
simply because these people live in this environment
they live, they have no other concepts at all
they just set a goal
and in this environment they are reproduced

it turns out that this is human development
such is the development of the World
it begins to push apart the external Reality

Well for example why does the question arise
so much space around
where are the next people
where are the following elements of life manifestation

so here are the next elements of manifestation
they are concluded first of all
in the realization of the people themselves
if we realize our own development in this way
then we can build it ourselves
infinite number of manifestations

and this is external
the future coming to us

will be manageable

after all, we are setting a task
controllability of the external system
us

what's the point of us meeting ?
with some let's assume there destructive
elements of future development

Well, there are some movies about aliens there.
destructive plan
Well there 's no point
to encounter this type of Reality
even if it's a fantasy

and therefore
with Eternal development
the question is precisely about the positive course of future events

so this is the state of the Soul
which excludes the structure of the destructive plan
i.e. it doesn't make contact
maybe even logical
just to avoid wasting time

and the next element
that's why the future is like this for us
because that's how we develop

the more intensively we develop
in that direction as if of the future
positively
and excluding any negative characteristics
the more intense
the future is also developing positively for us

Well let's assume a physical fact
the faster the sprinter
picks up speed
the faster he reaches the finish line
which awaits him in the form of victory, for example
the comparison is a bit abstract
from physical Reality

i.e. if you, for example , type
exactly that specified speed

at the right point
then you naturally come
through universal salvation
to the next element of future development
which is manageable

so that's when you start
engage in future management
the question arises
so much was done in the past yes
then why was it done, etc.

so the future has such a practice
as the folding of the optical phase of future processes
if you kind of "subjugate" the future to yourself yes
put the control of the Soul over the structure of the future
then it starts to sort of turn up in the optics

and in optics it's the same as well, so it's real
the more you concentrated the future
the more you turn it there, the more manageable it is
the smaller the volume , the easier it is to manage

it's easier to control it as if it were a single signal
which is just well as if completely adequate
the impulse that you conduct

so here is the translation into the structure of the past
i.e. the use of the most developed creative experience
in the direction of some actions
allows you to create specific technologies, among other things

For example Well there let's assume there is overcoming of space yes
there is a plane, a rocket, etc.
essentially using technology
and conducting these structures
as if turning up future processes
where the Soul is developed, open and free
here is the criterion
how do we even deal with the future
how to build the future technologically accurately
so that it would not be destructive to civilization

and for this we must
very clear signal of freedom of the Soul to follow
when the Soul is free and as if liberated and open

then accordingly we have
absolutely controllable future
we build any technology
then technology does not destroy man
use suppose current experience yes

so try now
do a training
which means which is designated as follows

from the state of freedom of the Soul
when you are absolute like that well well It's a matter of taste
on fishing or on vacation
where, for example, I can imagine fishing , let's say
although I haven't fished for a long time

but somehow here
the situation is not about catching yes
fish can be caught and released
as is now the case in some places

the question is
that there is a certain state
let it even be small
you find a state of freedom
and at the same time you through the state of freedom
you begin to see
how it happens
normal development of events in fact
yours personally

then by the way you don't even need to put it here
Here's the idea
universal salvation
of course your events are normal
then there is no global destruction

as if in this environment it is very clearly visible
that's how, well, like in clear water, so to speak Yes
try hard
Well there if not water then air
i.e. very transparent to see
that in the natural state of the Soul
which is in the future free
you get the signal here
and your events are positive

i.e. what you want you achieve

at the same time, right now and precisely for their own purposes

don't exclude don't go there yet for general
specifically, personally, my own
and we do such management
I work with you

when you work in such a management
your Norm is a natural state
i.e. what you set as a task Norma
this is a natural state

i.e. there is no need to apply special data
control systems
there you just need to highlight
that the signal that comes in the form of well achieving control
this is a natural state

if possible, exactly like this
once again with this addition pro-manage

because Norma is natural
according to the task from the Creator
in general everything should be fine

so try to see the signal yes
where in this state
the level of knowledge of the Creator is coming

pro-managing in this way
try harder in the future
for example, when viewing, let's assume there is no video material
or reading the text
try to see
where is every next time
you add management experience

i.e. where do you report the specifics?
already passed controls
and what is experience anyway for example yes positive

Well let's say there is a task to save everyone yes
say, a thousand aircraft there
they didn't fall yes

or save the nuclear reactor there

but next time
every next time
there the situation is different in Reality

and therefore this is where it is in the Spirit
where here in the state of the Spirit actually
what determines is found
the following control is required
even if you don't do the active phase

i.e. it is enough to know, *for example* , such a truth
Well, once you did the management
at least once it was clearly realized
try to remember

by the way, remember
this is also a special task
because there is always a factor of future events
which speaks about that
what is the extent to which this management is effective
next time *yes*

so if you remember
you are in a stable position for a while
which speaks about that
what were you able to do management

and this is a stable position
this is the highest concentration
actually an element of the future
in the element of the past
in the Perception of your Soul

I introduced such a term as "Perception of the Soul"
you perceive here already with your Soul
in this system

and when you start to see this impulse *for example*
then here
past
connected
With
future

and here is this connection
again you see it in person
your physical body

in the element of Perception
connecting the past with the future

logically it is so
you perceive with your physical body
elements of the flow of time there for example
it is clear that this is your physical body
but here I showed it through the Perception of the Soul

and that's when you perceive with the Soul
then the Soul which means it correlates
with the Spirit with the state of the Spirit yes
there is for example there is a pillar of light that corresponds to the Soul
for example, you can perceive it like this, let's say from the right

can be considered
that somewhere on the left there is an infinite light
corresponding to the Spirit

so here is the connection of the light of the Soul and the Spirit
again there is a construction of your body
construction of body movement

i.e. if we set a task
mentally go there
somewhere to a specific store or to a specific place
then the thought is somewhere
in the future, precisely in the future element

so here is this "somewhere"
if we take the structure of the Soul
and corresponding to the future

and the Spirit
which, generally speaking, is developed in dynamics
in the future
then the connection is a boundary connection
it is where what you are planning for yourself is located
precisely in the structure of future actions

and this is only
from the point of view of managing the state of the Soul

this is one of the methods
in this method it is here

then you can very clearly
see
how does this element relate
with an element of universal Salvation

let 's say in front of me
information about universal salvation
here, for example, is information of this kind
Well, well, well, well, well
By the way, it was after the seminar
I will be there handing out certificates to volunteers
Here's an example yes action
volunteers to spread my Teachings

further I consider let's suppose
for the task of universal Salvation
this is what the action should be like

here is Macrosalvation
I'm just on Macrosalvation
I light it up by force of will
signal yes
it is clear that I then enhance the effect
for example, which each volunteer will provide
there for the real Salvation of all
there in the future for example or now

i.e. it turns out
what can i do suppose control system
you can also do this with any of your events
The main thing is that the event that you achieve
was directed best most effectively
for the salvation of all

then you get it
you are putting it into a common fund
so that's how i said it
there is a piggy bank , so to speak, "preliminary" , but in quotes
hence the general piggy bank of knowledge of these positive ones

so here is the current time
this is a cumulative system
well knowledge information

exactly that system
which is actually so maximally developed
that just like the Creator, she always exists

find in your body
in your body
there in his personality
a structure that generally always exists

Well, as a rule, the search begins there
from the heart area they rise higher there

good find yes
found some position
and take a good look if there is one

and by the way, there really is
it's right in the physical body

that means if there is at least one such position
then what questions exist further
therefore it can be developed as if

Well Let's say there's a person who wants to build muscle
if he could pump up one muscle there
then he can in principle do it at all
pump up the whole body
if he has time

or there Let's say a person started practicing karate, yes
here he started, he succeeded in something
Karate, by the way, is a strictly defensive system
here in the philosophical understanding

and therefore if there is such a type of struggle, it seems so
action of life development
as some kind of active action

but if we like this action
we are deducing
to a comparable level
correlative action
then we see
how do the other elements relate in general
in our Perception

how is that even possible
we walk there on the sidewalk
we go to the store or go somewhere to a specific place
how are these phenomena related?
with us

this is the state of the Soul
related to your action
with the action of the Soul
with the development of the Soul according to the tasks

and here we understand
what are the tasks of the Soul
which are being implemented
in your specific actions

for what you
from the point of view of the Soul
there you are in this specific place

and this is called penetration
where the Soul penetrates
into the structure of future events
and in your personal action
your personal action
and the action of the Soul
it's the same thing

when you learn to do this
By the way, this is quite capacious
and a slightly more complicated technology

but when you for example for maybe a number of tasks only
not necessarily all the tasks are there yes

I teach how to act
namely the set of the number of methods
as a rule
more the better

but when you act of the Soul
you are taking out
to the level of the target action
there are personalities there
people for example
civilizations in general

and Peace in general

then you get
that the Creator is present in you
in the form of what you get
well, just like absolutely pure knowledge or something
in the following direction

and this system of absolutely pure so-called
Well in general it's really just pure knowledge
this is what you actually do on a daily basis
here's to doing something every day
have to have some knowledge
something needs to be done
and how and why

and this is this
place of presence of actual knowledge
in your action
highlighted in the form of dynamics
by the way, for example, it is possible to develop the Spirit in the form of some color
this is what unites everyone, generally speaking
unites you
unites some related phenomena
with your actions
Well let's assume there is some kind of purchase there
some action for the universal Salvation

and this is the unifying principle
i.e. if we consider
in any element of Reality
there is a unifying principle
what unites us all
that's according to all the criteria

try to make controls
when you through this element of unification
find yourself
and for example, you completely restore yourself
in terms of the next action there
not logically there
not because you just say the phrase
"now you 'll go there and do this and that"

and you do it because you do it that way
as if Soul and body

it would be the same thing

i.e. work in that state
exactly their personal tasks
that's when the Soul and the body are one and the same

then it's absolutely clear
by the way it becomes completely clear
why is there a particular problem
it exists that's why it's worth it
what action is needed
to solve this problem

this is the essence of the state of the Soul
revealing an accurate picture of what is happening
this is one of the points of your Perception
where the state of the Soul is always fixed

and this, by the way, can give very serious answers
practically if this technology

Well in general use

for example, I used it in diagnostics of equipment
when it was definitely not possible for a plane to crash, for example

and really down to the smallest defects
absolutely everything can be found

i.e. when you see
Well, the task is to find one hundred percent
in terms of percentages of the so-called
that the plane is the most important thing there For example but didn't fall
or the event did not happen negative
or he was restored there the person is sure

here is the obligation of action
these are the exact coordinates
which are recognized by the Soul

and so when you already know
you will recognize first with your Soul
further in general in principle
just technical actions remain
well, to do something on the physical plane
there For example should I call there or well? there is something to eat there yes

or let's assume to ask the question at all

here's how to make food like that ^{there}
so that ^{there for example} it was possible
are fewer destructive phenomena ^{there}
Human
how should a person develop in general? Infinitely
how should he develop the external environment

just take a look by the way
can I ask a question?
in this state
solve something for the Macro level of development
and the question is that you have a lot that will be resolved very quickly

your future level will be positive
because you decided for others
^{well, in general, for civilization, for example}
how to do ^{well} like a technology
understood the technology

further you see
what is the concept of "technology"
this is what leads to the solution

i.e. you are always acting at the same time
after all, a concept is already an action

it turns out to be fixed
^{as if the primary level of the Soul}
^{Generally speaking, it exists}
what is the perceived element
it is already under control

it turns out to be like technologically
management is taking place
^{Well let's say we took it and laid it out on a strip}
there used to be computers
the sequence of events was punched on a punch card

how to break down these actions

so if you lay it out on this tape
then it turns out that again this is the level of the state of the Soul
in the future

if we take one state ^{for example yes in the future}
this is your Soul

no problem, you can use it completely

In fact

well with the methodology of action for universal Salvation
you can manage

because that is where the universal Salvation is
your control has no boundaries
in relation to the elements of Reality in reality

unless of course another element
then basically we are there
I only work at this level
because the task is very simple and one
make sure everyone is saved

so when we act like this
that state future state of clear fixation yes
these are your own states
personal fortunes

and by the way just them
mark with different colors
and let's assume in space from the physical body
place in different places

then just moving these colors
you can get for example the following color
and get event management
and at the Macro level

Well, that's why you can conduct a simple training
there is a blue color a little further away
and there is light blue in front of you yes

you will receive in the future
this is the state of the Soul in the future
future management of the future
and closer to this is a clear fixation
understanding your tasks

Now you clearly see what the task is
look at the root of it all
why do they exist
i.e. find all the root branches

and at the same time you decide
constantly solving problems
find

pay attention
that when you solve a problem
because you are constantly pulling the task onto yourself
so that there is no global catastrophe
anyway, there will be some event moved forward
then first we need to make it happen at all

and how would you have carried out these actions
you can get
again the same let's assume there is green color yes
or is there white color
and fix it
that there is some color that you liked
This is Norma
just fix in color

receive a signal in the form of normalization
and that's all
get signal stability
in the form that you do additional control, for example Yes
How do you regulate it at the moment?
also assume that the impulse is direct

so this is the direct normalizing impulse
as if secondary but after control
this is an instant action
already based on the totality of current experience

i.e. for example, here I am today's seminar
gave some specific technologies
which I specifically often call
but at the same time we came to the conclusion that
what I said is the volitional level of secondary control
this is also this is action
which clearly fixes
that the event will definitely happen

our task is to achieve that
so that it is known for sure
that a nuclear reactor there, for example, won't explode
that the plane won't crash, etc. yes

that the World will not be destroyed
we need to know this for sure
generally be able to do it accurately in reality

and here it is
this is such precision
this is a combination of the Spirit of the Soul and the state

[not verified]

Consciousness in fact
i.e. when you perceive with Consciousness
with the actions of the physical body

so it turns out that at this level of, let's say, management
that any action is concentration
Well as if just now, well , let's say , the above-mentioned combination of states

i.e. this is still the maximum concentration
and any minimal action is obtained

that's why it turns out
if we consider in general
in every action
exactly this maximum concentration
which I just mentioned
and we start to highlight
from this it seemed so rarefied action
the usual action of the human physical body there
there are hand movements

highlight
what at this moment seems to shine most strongly in the optics
to light up there for example a hall
for the universal salvation
to solve personal problems there

by the way I say and do
pay attention here
and do it at the same time
together with me

and when you do it
then further if even
let's take it for granted Well, there's already a video recording there, yes

or there is a text level
then he also already has information
which is actually located
just like in the material there are videotapes

those. for example, a video cassette
which lies and put on the table

she can spread knowledge
for the universal Salvation
let's assume across the table yes there for everyone

i.e. the way of information output about Salvation
becomes universal
from any word there is an action
it doesn't necessarily have to be a cassette tape, there's a video recording

or at least what you remembered
or what was best implemented in management

this is what you have implemented in management
then it will never disappear
it will be like a golden baggage of humanity
which will shine constantly

the more such cells are organized
the closer we are to the level of collective management
as the Creator does
as I said get up
at some distance above the hall

you can see how the Creator acted
in relation to everyone, etc.

if the collective level is maximum
or, generally speaking, they completely control everything
then we are actually directly
we see the whole structure of development
from the Creator then

and then it turns out that everyone is individual
there is a concept there for example "clairvoyance"
there is some kind of supposedly clairvoyant information

so let's assume if some concentrations
someone is being taken out

then this is one element when everyone knows how to move
then here is true freedom of action

i.e., as if in essence true freedom
it arises then
when everyone has
independent direct level of contact with the Creator

and at the same time it acts as if simultaneously
well, in fact, for the needs of each person, among others
that's how it works in this system
and at the same time the control is, generally speaking, quite precise
in relation to all structures

so try to make the management now
when you output as if control
to the highest level
and you take everyone out
here's who's in the world now
or will live in the future

then try to deduce it like this
so that this level of interaction
was direct with the Creator

and when you see
that the interaction has already taken place
by the way, this is immediately visible

here by the way is Macroaction
it often happens instantly
especially for everyone when
then you see that it is your personal problem
quite clearly solvable
some specific deeds, actions

and now you have made them
and do it now
see what you have done for everyone

here, if possible, see
where did you do it for everyone
where is this state of the Soul
fix it

i.e. here is the dynamics of light color

where is this mobility what kind of information
what kind of information perception is it

if I'm talking about mobility
what is mobility in general, etc.

i.e. in mobility
basically I mean
some rarefied level enters
still , as it were, a pre-light level of realization of Perception
it is not necessary to perceive in light
can be perceived as a state or in color

that's when you work
with the state of the Soul
you can often do without a color spectrum

at the same time you can work with your Soul
as if without spending practically
time to perceive color or light

and then how would you work directly
like in real time yes
this is again the most natural state
take it now and work it out quickly

when will you work
well, how about after the seminar
try this part
It's best to do it multiple times

this is just the norm of the event
it can be felt and seen directly

and here is Norma
she should be the best
for everyone
Norm

This concludes the seminar
Today

Thank you very much for your attention
