

GRIGORY GRABOVOY

**Methods of manifestation of the Soul, Spirit and Consciousness
in the dynamics of the human body**

2003

Today's seminar topic
this is the introduction and dissemination of my Teaching
about Salvation and harmonious development
through the recovery complex

Methods of manifestation of the Soul, Spirit and Consciousness
in the dynamics of the human body

These methods consider the position
when the human body
is an organizing environment

and at the same time the organization takes place
as directly processes in the body itself
as well as external processes
i.e. near the physical body
and at any distance from the body

in this regard, it is being considered
it is the position of the Soul, Spirit and Consciousness
where is the manifestation of the Soul for example
this is also the action of the Soul

those. realization of the Soul, for example, in the form of a body
realization of the Soul in the movement of the body
and implementation at the same time
in creation for this body
for example events

in this case the body is considered
not as a passive system
and as a self-organizing system

where the Soul, among other things, creates conditions
in fact for the next element of development
like bodies
and the whole world

i.e. we are actually talking about high intelligence
comparable to intelligence of this kind
where the Creator gives knowledge

i.e. intelligence with the action of the Creator

when future processes
can be formed, for example, only on a Spiritual basis
or future processes may be formed
only on the basis of the assumption of Consciousness

in this regard, this seminar is based on the fact that
which we fix quite strictly
any one system of action
for example the action of the Soul
we indicate what this action consists of
and further action
we can build on any other element
for example, on the action of the Spirit

and with such a setting
action of the Soul
where the Soul is manifested, for example, by a part of the body
consists in the fact that
that when for example well happen
some processes within a person
then suppose the action of the Soul
example, for the implementation of the function of the spine
consists in the fact that
what is the spine
besides the fact that it is organized in the body
it also performs the function well as if interrelations
with other parts of the body

you can see with both eyes at the same time
what is happening, the dynamics of the human body , what is it about
we are talking about the human body
that the movement occurs vertically

when we speak of the concept of the body as "external body"
well, for example , any information object there
let's assume the body as a physical environment
then in the collective Consciousness the concept of "body"
This concept corresponds to a number of other concepts

accordingly when we

Perception in general
somehow we begin to analyze
then we see that for example for the human spine
body in the form of suppose there, well, the physical body of the stone, for example
this is an external object

and that's when the external object of information
from an external object
through the Spiritual Foundation
goes to the same spine

at this moment the cell is organized
inside the dense physical body of a person

so if we consider this as a Law
something any external element
which is associated, for example, with an internal element
and at the same time we, for example, see with our eyes
if you don't look at the anatomical atlas
then we see with physical vision, for example
just a normal human body
we don't enter inside with physical sight

then here are the technologies of transition inside
i.e. inside the physical body
is precisely the impulse
where is the logic exactly the usual everyday logic including
human logic
it seems to catch an external signal
and on this signal well let's assume from a stone from a plant
from any object of information at all
on external signal
just everything is logged in
into the internal system

well, it's like an "elevator" principle, in quotes
put the element of Consciousness in some elevator
the elevator entered the system
and the control action takes place
how to self-control
keep in mind that this is precisely first and foremost
this is self-control
and then this is control of the external environment, so to speak

so here is the concept of "self-control on a Spiritual basis"
and the concept of "control by external signs"

for the Soul it is one and the same

as soon as you get into this system
where self-control and control are external
it's the same thing
you are in a state of Soul action
i.e. in fact, this is what Consciousness perceives
how the human soul operates

i.e. I have derived a fairly strict formulation
if you listen to this from the very beginning
where we identify precisely the rigid static form
actions of the Soul

so this is the action of the Soul
it's happening somewhere
in this case it occurs in the physical body

therefore the action of the Soul
at the Spiritual level of Perception
inextricably linked with the physical body

therefore it turns out that the physical body
it's quite organic, quite calm in general
goes with that
what we call the physical body
as a manifestation of the action of the Soul

i.e. Soul and body in this case are generally speaking
one
at this level of reasoning

and it turns out that the Soul and the body are one
then to restore the body it's just a matter of
Well as if through external diagnostics of the state of the Soul
for example Spiritual diagnostics
define
what is the task of the Soul in general
what are some problems

and then add at the logical phase of Consciousness
for example aspects of Spiritual management
and we actually get restoration
Well in general, the development of the Soul

after all, any development is an element of action

some element where there is resistance

if all this is standardized
then we get a healthy body
developing according to the Laws of the Soul
according to the Laws of the Creator
Soul Creator

and when we connect the factor
Creator
Soul Creator
here, generally speaking, logic grows in the Soul

for example, we can enter
into the entire system of the World
how can one reason logically
Yes there is an external system of the World it is Infinite this is logic

if we want to then enter the World system
and simultaneously control the external system
for Infinite Development
then we proceed from that
that the Creator created the whole world
He also created the Soul at the same time.

therefore we can through the Soul
enter through the term Soul Creator

so it turns out to be the Creator of the Soul
it is at the same time the Creator of the World

if we do not use such a principle of simultaneity
then Spirit and Soul
action of the Spirit and Soul
in what way is this the same thing
keep in mind that this is an abstract transfer
for Consciousness

it is one and the same as both Spirit and Soul at the same time
create a body for Consciousness

there is a very small transition left
all that remains is to move on to that
how to control Consciousness
the organization of the whole body in general

here at the level of the Spirit
why do i specifically separate
this is the optical phase of the Spirit
it appears as if in front of us
and with such a soft impulse
penetrates inside the Soul
i.e., by the way, often not reaching the physical body
and is perceived as inside the body

and this level is what characterizes
it is precisely the level of the general development of the World

in fact, any element of Reality
it is manifested to a greater extent
in some place
Well for example, as I said now, impulse
and to a certain extent it is manifested, for example
Well as if to some extent in any other place

and here is this action of simultaneity
shows that in order to be logical
diagnose the system
so that it would be on a logical basis
find that point for example person yes
inside a person
and it can also move
she can be dynamic
through which the body is completely organized

so here is this logical phase
this is what as I said happened at the same time
the union of the positions of Spirit and Soul
in the physical body

and external control is already logical control
which actually grows out of three systems

it is the physical body as such that we perceive
this is the Soul
at the same time in the optics of Perception
the light of the Soul is very close at this level
to the light of the physical body

keep that in mind there where is the light of the physical body
in Perception
already very close to the light of the Soul

this means that the process of body control is taking place
pre-control process

at the same time more deeply
this is already complete control

and here is the Spirit who distinguishes
it is what you look at
in this case you are looking with the Spirit

and when you see this difference
in the optics of Perception

because now I'm actually giving
urine hard systems
in terms of, as it were, outlining the architecture
this very model is actually geometric

so the Spirit is what you look at
in this case I said
what can be seen by the Spirit

and when you look with the Spirit
then you see, for example, that you can look there with the Spirit
through the spine

but if you for example spine
don't look at the anatomy atlas
then you see the spine like this
as it is
in the conditions of the Endless change of parameters of events in the World

and this endless change
so that it is stable
for the individual
projected mainly yes in the physical body

here is the growing logic
as an element of the external environment
and as an element of your system well as if internal
i.e. the physical body
your Soul
your Spirit

it turns out that logic is a certain connection
external well, like a lot

and all your development elements

it turns out that there is a gap
boundary system
if you delve into the boundary system
we find ourselves again in the state of the Soul
back to the state of Spirit

i.e. it would seem that the system is logical
as soon as we try to divide it
it immediately means it starts to be divided
but again according to the canons of the Soul and Spirit

therefore if we say
about social processes in general
then development proceeds according to the Laws of the Soul and Spirit
according to the Laws of the Creator in general

and so that we can see what we need next
we just need to push this boundary further
at any level of the future event
view Creator tasks
and generally speaking, there is still time, for example , if necessary
learn
then we get a canonical development
in terms of for example there is a healthy body
healthy spirit
and accordingly standardized events

so here are the normalized normalization of events
i.e. the restorative principle of management

in this case it is that
that we are the future event in front of us
as if we divide
to certain fragments of information
in optical information

i.e. we need to learn to move information like this
as if the light was moving
let's assume at the level of ordinary physical processes

let's assume so if we consider
physical optical light
Well there from the sunbeam
it is clear that it is not stable, it depends on it from the mirror
and the feeling of this instability of physical light

depending , for example, on a spotlight or a source

and the light that has no form

this is a peculiar feeling, yes
it can be reversed in a positive form
translate

when you work with your own Perception
and translate into such a system
when can you highlight
specific fragments

Well For example there is a specific form of light of such and such a color

This color corresponds to the Soul
and the next color, for example, it matches there To the Spirit

the movement of these colors
well, on a kind of control panel
you can create
a sustainable management structure
and one that is universal

because as i said
if we consider Consciousness
such as the factor of the external world
and the fact that this is ours yes from our side
then it is a kind of a substrate
Well, if you consider it as a control panel
then this is the backing of this remote control

if we give the Soul for example there
Well, light blue color yes For example
and we will designate it as a fragment of some such form
which is in a tough position in front of us

then by movement
movement of this fragment for example
we can do management in general in any system

because now
what I just described
this is the exit principle
into the system of the physical World

and this exit is still like that
that you yourself don't spend anything in principle

i.e. you just found a connecting link
in the field of Consciousness

you have entered that phase of Consciousness which is
actually at the junction
as if external Reality
and your actual thoughts

and all that remains is to put it into action
the mechanism is this optical in this way
so that your thoughts are conveyed

you need to restore there
therefore you should move like this
this for example some sphere yes
exactly what corresponds to the Soul, moreover

and diagnostics of conditions
that it corresponds to the Soul
this state consists of that
what firstly can you appoint
because the Soul is Infinite
the assigned fragment is always the same

and if you want to work through the Spirit for example
A spirit that has an Infinite level of development
then you need to create a form first

i.e. with this method of work
fragment of the Soul
it is always in working order

but the Spirit first requires a form
well, some kind of cavity, as if gas had been released, for example, yes
and spin this sphere with gas

i.e. therefore if we carry out the analysis further
that's clear, on a logical level it's clear
that the Soul always works

but that's why it's clear yes
for example, what clear answers exist in this regard

Yes, the Creator created the Soul
therefore it always works
and where is that information located?

that she always works

information is in the area
constantly rigidly statically working structure

i.e. a rigid static environment
which is the work of the Soul
she is in the right place
and contains the entire period of future work

i.e. the meaning is that
why do we know
because it is laid down there what the Soul does
in each element

Well for example, a plant grows ^{yes}
The Creator created the plant
It is clear that there are Laws of plant growth

therefore it is clear what is there
after some period the plant may be
some size
and for this some conditions are needed

the same thing if you spread it
the principle of the Creator's work as a universal principle
exists in the Soul

and therefore it is clear that the Soul is always working

here is the Spirit he can have
either one state or the other
may be in Infinite Deletion
maybe nearby ^{yes}
from the point of view of Perception, namely

and to fix it
therefore we must
^{how to} assign him a state
i.e. enter into the form

Well, we entered it into the form
took this sphere
and started moving
^{for example,} here is the first level of the Soul
some ^{well} there is a computer mouse there
take give such a convenient form

put

so we don't really put anything there
we are just modeling the system

I'll come to what we work on in general
That's what I'm always leading up to

so when we are at the level of the first element
this is a fragment of the Soul
the second level we have fixed the sphere
there she is spinning
you can change the color

the second level says that
that we need to highlight the spectrum of events
better further away from yourself
behind these two figures
where is what we need to implement

and here it is exactly according to my Teaching
about Salvation and harmonious development
the main task is emerging
in fact civilizations
there is a man of humanity

he needs it next moment
do the action
therefore he needs to do so
so that there is no destruction
it must be on some boundary systems
actually as I said
this is the border level
level of compatibility of Spirit and Soul
for the logical phase of Consciousness

do an action that is simultaneous for everyone

because in fact if the right management is done
The earth in the next second there the world exists
then it turns out this is for everyone
one way or another we still do it for everyone

the question arises
and how

very simple just for everything
it is necessary from this point of view
view all channels
how is this developing

when you start watching
you see how the human body develops in general
i.e. how it moves

here's if you ask a question
why does the body move
well somehow in space

it is clear that there is a human thought, yes
there is a desire for action
but another question is what if we abstract from this
and ask a question
from the point of view of the universality of any movement

i.e. why is the action happening at all?
let's assume there hands
why is the man there takes a spoon and eats
Well, it's clear he wants to eat.

but why is this happening?
from the point of view of universality
as if the unambiguity of all systems

so here is the answer
specific answers are included
to specific movements of any body
well including the human body by the way

i.e. here you can find
in what place what body will be located
and in what condition

Well let's say I diagnose there
some technical object
I'm talking about the future
what specific wire is there, let's assume, that is faulty

let's assume there are one hundred and forty wires
specific
and it really does match
at such and such a time this harness, for example, does not work

this means there is a completely accurate system
in the future location
elements for example let's assume the physical world

so when you look the way I showed
you can find unique channels

well let's assume there there is such a principle
like on mars there are some channels yes
this was said and thought about
that these are signs of civilization

i.e. some movements some channels
this is some kind of sign yes
i.e. you can see what is moving and where

why did i say about mars
because, for example, an expedition hasn't flown there yet
they can't say for sure

but why didn't I, for example, bring it there
earth channels as an example
because where you can walk and see for yourself yes
touch with hands
this is what is recorded

and the next element of development
already contains it as a component

examples on Mars where there is no there yet
strict and physical in terms of response
this is an example that exists in the form of that
that this could be so
if necessary we can already make the control
for example, it will be like this

so that's the logic
logic from the point of view of the Soul and Spirit
and by the way, the development of Consciousness is here
it is built so that there is always something there
next action

now I have already brought it to that
what are we doing all this for

Well , we don't really describe it

in fact, we do all of this
logical phase of Perception

and if we want for ourselves, for example
Well, let's imagine drawing an image of this kind
what do we need to take and change there color
which will be more manageable for example
or more controllable
we manage, i.e. you work easier right away
with action

and the one that controls other objects
maybe then we don't need color
maybe only the form can be changed
i.e. all this happens within the framework of Consciousness

Now I have shown that in Consciousness there exists
that is what the Infinite means here
control of the Infinite Element of Consciousness

where there is still an opportunity yes
ask a question or put a question
this is the Infinite Spectrum

if everything is already known
then it turns out the system is exhausted

and if you look at the methodology
let's assume transmission
well, the knowledge that I pass on
I give with Consciousness, at least I try to give
to a large extent that's exactly it
to create such an element after all
which would be from the Infinite there
well, like a fragment of the glow
gave mandatory access
to the system of universal Salvation

i.e. always leave the Infinite Spectrum somewhere

i.e. even if I give concentration on numbers
It would seem that there is a rigid system of numbers
I specifically enter a number there that
either explicitly or implicitly contains access
in the Infinite Event Phase

so that's how we get there
actually at the control level
beyond the Infinite Event Phase
we see absolutely clearly completely
canonical state
a healthy human body, for example, his own

here is this formula and verbal
It is desirable to study it, maybe even better, several times
to see that the path to which I led
to the canonical level
this is what corresponds
Well, Norma just wants health

and having this canonical state
i.e. in fact you first entered
saw the canonical state

to recover you only need a little bit
I'll have to remember all this
and have light from here on yourself

in principle a canonical body
well, that is, simply the norm of human health
this is the same as for example Well, take it
just a medical norm
there is a norm not only there, but also medicine, let's say, of the European type
you can take the norm of eastern medicine
or any other types of norms at all

and see what the norm is, yes, it's universal

while when you look at Norma
Always highlight your Norm

because you are just that
are you doing and what are you expressing yourself
and therefore your Norma
she may be, generally speaking, completely different
it can't be found in any anatomical atlas

and in connection with this it turns out
that the glow of your personal Norm yes
into your own light
this is very serious
recovery regeneration system

but if for example you take and raise the light higher
just vertically
then you get recovery for all
moreover you get that the normalization of events
from your experience point of view

and in my system it is precisely the transmission of information
I show that if we, for example,
we transfer experience simultaneously
and we pass on the maximum experience of Salvation
maximum experience for example remote control
according to the Laws of the Creator

then we can, in general, quite quickly
and in completely different parts of the world
project this information of Salvation
or telepathically
or let's assume well, at the expense of there book knowledge
there are videos of some recordings

and be able to make it so that the central part
it would be precisely the part that, generally speaking, is not different
from what the Creator gives

i.e. to move simultaneously with Consciousness from the Creator

then it turns out that yes, exactly
if there are a large number of people, for example
they do it as God intends
precisely from the point of view of universal Salvation
Development norm

then it turns out that we have
although it is individual for each person
but the generalized knowledge is unified
where there is definitely no destruction at all

i.e. it turns out that one of the elements of Eternal development
this is a simultaneous action
in the exact, generally speaking, position of the realization of Consciousness

because if for example Well, take it
let's assume if we diagnose
there are a hundred nuclear power plants in a row
then it turns out that it is possible to highlight

for example, only one nuclear power plant
so that it doesn't explode
they can enter there
mobile nuclear reactors etc. yes
some orbital complexes

we must choose exactly
from the body of knowledge
because future information is also knowledge

and how to choose exactly for example
this means that there should be some kind of canon again
this is how to navigate at all

I am teaching that now
so that you have canonical systems
and already emanating from the canon of the human body

if you find your canon
then just for the whole
concentration on your body gives knowledge
in what specific place
the reactor may be failing

because here the element is very simple
concentrate inside but in the Soul
where there is direct contact with the Creator
at the point of Soul organization

then you see
what well For example What defect is there in the plane?
or which specific reactor is failing

because the Soul is at the same time
and instantaneous processing of all information

so that's when you get to the concept of "instantaneity"
i.e. management of external objects yes
then the perceived signal
let's say you are looking at some object
so it's in front of you there the pen is lying down

then the perceived signal is light
you perceive it as a pen

but if we suppose to think about it

that each element of information
it has an infinite system of external connections
with all the phenomena of the World

then it turns out
projection generally speaking of an Infinite quantity

why then in such a local place
it is static this element
there the pen does not fly apart in the form of molecules

if we're not talking about that at all
that there is gravity there or there is a property of plastic
we are generally talking about the essence of the Universe
from the point of view of multi-element properties

so here
there is that position
that the pen is near the person
for example yes logical position

a person who perceives external Reality
It kind of catches and normalizes the signal like this
so that the external system is balanced

so that's when this standardization
it happens deep inside

i.e. well, how deep in the Soul of a person
then external objects become more manageable
even the more distant they are
the more manageable they are

and it turns out
Well, many people have probably encountered this in practice
that when a person thinks deeply
all these well there are stars some kind of galaxies
they become somehow closer and literally here

and if even further yes
then it arises there
phase of complete control of physical matter

bring this phase here, for example, yes
and restore there a cell, let's say, or an organism in general
or even restore a group of people there

Well, for example, give oxygen
I had cases when I had to in the mine
give oxygen
because they were filled up
and for a long time there, several days

and it turns out that here
there is a need for pressure
Well, to create a Reality of this class means
well, which supports life
and human health

and this is the principle of creating Reality
he is like that
what if we are for example very far away , then we go further
then going even further we get closer
to myself
but to the one who is there

and when, for example , we are already approaching ourselves
then the principle of external regeneration arises
i.e. the external structure of a person

i.e. you build yourself
simultaneously with all elements of Reality

in this case you may have a temperature for example
some warmth there
and the movement of this matter is already underway
which creates a fabric as if inside

and it turns out that if there
then the tissue is created from the inside
i.e. the Soul grows a person there very far away
from the inside

at that moment when here
does more on the dynamics of the body
i.e. you walk and eat
for example, do you accept some elements there?
as food for thoughts
where Spiritual aspects of development

and it turns out that I just moved on to the concept
Spiritual aspect of development

in fact, the Spirit is what unites

what's there very far yes
growing from within a person growing from within

and here is the person who is here
in the form of a physical level

and it turns out that the union of these elements
in action let's assume in the handle yes the handle is stable
because we

Well, if you take a powerful field and gravitational
you can hang some kind of molecule
and the molecule hangs there

Physicists are currently conducting experiments
which are starting to approach that
what if two different elements
by gravity due to acceleration there steel
it turns out that we can generally increase
some element of Reality

so here a person works almost the same way
its creation is such
that any element
is organized within this unique field
this is the pen that's why it lies here yes

why there are external galaxies there
that's why the table there doesn't split into molecules

it turns out that if we
from this point of view we consider
where is the dynamics there is still dynamics
on the development of the body through Thinking

because in this case we came to the conclusion that
that "far away"
We thought of that, yes
and we often do it because we know it

for example how to make it so that it can be found accurately
again, there is a defect in the nuclear power plant
nuclear power plant

but if you just run the light from yourself to yourself

Well, let's close it
then any amount of information
it is finite

for example, that image which is very far away
and which is located in a person
as a realization
for example in the parameters of the physical World
closing on the light flux
any amount of information
we always place factually
object in Norma
any deviation from the Norm
it immediately becomes clear yes

i.e. the entire external world is placed in this system
therefore, it turns out to be a deviation from this system
it becomes immediately clear

in this regard, I propose now
conduct training independently
Well, I will work for you too
in this regard
what does choose mean
some external element of information yes
on the Spiritual level, enter for example an image
well, an element of your Consciousness
in the form of for example yes, myself
you can just use it as light
but to know that this is your element
highlighted as far as possible
conduct optical rays to yourself

and try in this in general in a simple version
work this way
that the light of the Soul
this is a kind of platform for work

The spirit is an instrument
and logic, well, you are like a sculptor, sculpting Norma
i.e. external control

and try to work in color
i.e. choose the color you like
pose your problems

the task of universal salvation
it consists here by the way
that you work with all the phenomena of the World
so you save at the same time with such work

then this is how concentration on numbers
the number series already includes problems
already the solution to the problem of Salvation

and therefore try to work in this way
on the light stream just remember
that's what the Soul is like the basis

and solve all your problems in general
right here and now at this very time
I will work at the same time as you

[...] replica

yes any
you can work with any objects

when working, try to concentrate your time
i.e. constantly reduce the time for work
as densely as possible, quickly place all the bases
try not to delve too deeply into them
worked and did the action and move on
i.e. build up further controls

so here you are, preserving what you are currently working on
i.e. calmly I say you can still improve
but not for very long there at most, for example it's about 5 minutes there
It's better to do it in a minute

and try to view now
that what you have worked on has a reverse wave
and you are now convinced that you did well at the moment
all the best possible
Moreover, you did it effectively
i.e. you have now solved the problem

so what does it look like anyway
as a diagnostic system
i.e. how do you perceive it as a diagnostic system
why do you think that you, for example, worked and did

let's go to this element now

then well as if we were returning in terms of staging yes

because every time I worked

watched the action unfold

and so the action is aimed at that

what you have to make sure of is that

that you have now solved the problem

otherwise, as if the impulse was original

he means Well, it will be very prolonged.

and the task will drag on

i.e. you can of course solve it there periodically

but it needs to be resolved now

so to decide now

i.e. you have already solved it , for example

so how did you solve it yes i said for example

and how did you solve it?

try to look

what are you wearing now in the form of light optics

Well It's like it's floating, it's coming or something

this looks more like Perception

that this is exactly what is going, moving, going, yes

there is a wave at the same time

why is the wave going

there are some terms there

which are comparable to the movement of the human body

Means Well, in navigation such terms are used , etc.

so that's why it turns out that here

if we look at why we are translating

on the elements of physical Reality

movement of body elements

then somewhere in the speech there is a periodic comparison

body dynamics

And

external elements of Reality

so here is the external movement

it can be standardized

if it resembles or is close in action

to what the physical body does

i.e. a diagnostic element
is the Norm of the human physical body

if you want to know
in this one in this one together management
did you make Norma
information must be identical to Perception
maybe it is not necessary to look and see some organs ^{yes}
or there control health

and the point is that Norma
this is the Norm of the physical body
well, a comparable system

if you take a tuning fork
then ^{in general} what difference does it make, it can be used
for tuning different instruments

and it turns out that here
the principle is the same
when you perceive the Body Norm
then information Norms
i.e. that you have achieved a normal event
this is the same Perception

this is a state
where is the Spirit body and soul
are located at the same time
in one state of the norm
therefore it is actually their connection

and here it turns out
what exactly is the connection in Perception

here it turns out that the action of the Norm
at some ^{specific} moment
solution to some event
this is the maximum concentration
i.e. maximum action
from the point of view
Souls of the body Spirit of Consciousness

and it turns out that any element of Reality
it's still in this position
this is the maximum manifestation
from the Norma's point of view ^{yes}

but that's how it should be
a person strives to develop
according to the Laws of the Creator
therefore it must be
as much as possible as if harmonious yes
maximally manifested in any system

any system works
this is still the level of maximum manifestation
exactly well as if the volitional active elements of a person

and from here if we proceed from that
what is there for example yes, peace, like a person rests
that is, the concept, for example, of "physical rest of a person"
rest of the human physical body

and if we talk about how the Soul rests
then the question arises, yes
what then is the rest of the Soul
how could this be combined

so here is the rest of the Soul
from the point of view of, well, the tasks of the Spirit
Spiritual development
a person must constantly develop
here it can be considered as a proposal so let's say
that this is a complete connection with the knowledge of the Creator

i.e. this is when the combination occurs
then it turns out that at this moment it works simultaneously
in fact, the Creator is also
because the Creator is always in the future

and therefore if we proceed from these positions
then here is the light of the Soul
well, the light of the vacationer or the light there Peace of mind
he is also the light of the Creator

but some kind of peculiar system arises
again entering the Infinite perspective of development
from the point of view of the logic of reasoning of the logical level
what if we talk about rest of the Soul for example
then it turns out where is the next element of development

how can the Soul rest

if ^{such} opportunities exist there
as global destruction

so here the concept of "rest" ^{yes}
as a manifested action of the Soul
is precisely the level of assistance
or the simultaneous action of the Creator
or acting as the Creator

so that's how it works here
what is the maximum action
I already came to this conclusion so logically
this is also the maximum state of rest
from the point of view of the development of the Soul
already development of the development of the Spirit

i.e. as soon as we change, ^{for example,} the position
in point of view
we have the next level of understanding ^{yes}
of this phenomenon

and now if we start to analyze
^{for example} the level is like this
how is it possible ^{well there is} a state of sleep
if ^{for example} the Soul is resting there
or she is busy with some things, ^{for example, yes}
The spirit is engaged in creativity

how can we make sure there is no global destruction

so from the point of view of this position
it turns out that the state of rest
i.e. when you are ^{not actively} involved
there is some problem with logic
this is the maximum manifestation
cooperation with the Creator
i.e. the Creator is doing it here
and then there will be no global destruction

and it turns out that all that follows is
^{for example,} to act correctly
we get an exact solution to any problem
^{well,} that is, at the right time
or comparable to tasks
Souls
Spirit

Consciousness

Peace yes

Creator

so that the exact solution

in fact it is always there

and it is in the big essence

as for example inside the physical body of a person

i.e. the body as an exact solution

and in events

which are located well as if near a person

in the form of his intelligence of action Thinking

so here we can consider

at all

i.e. if we proceed from that

that the person does everything accurately

here is the technology explained to me

it turns out that thought is always generally speaking

well it arises let's put it this way

in the right place there at the right time

and in connection with this it turns out

what a good tool such as thought is

which is understandable

so it can be used for universal Salvation

just like a solution to the inverse problem

i.e. we take the thought

that means we overexpose it very strongly

well how is it peculiar if we planted a plant yes

and we know that it is absolutely correct

it will take and give us oxygen

then we do

we just need to grow it there with water

put soil under it yes

and we will get a lot of oxygen

so if the idea is highlighted very strongly

that's exactly it, since it's accurate

i.e. any thought

Well generally of a creative type

I mean thought action

where there is universal Salvation

this is precisely the spectrum of thought

this is where Thinking differs

from Well as if not the manager from the manager
what we put into the system
Salvation of all

then it turns out that any action
if you increase it very much
leads to that
that any Thinking is a decision
element of universal salvation decided

so, having learned to think like this, for example
we will have in fact
a very stable phase of events and of this kind
that the more people think and reason like this
then the more stable will be the phase of the next action
and the phase will spread
on the elements of external Reality

for example, here it lies again
the same thing but a plastic handle
then the handle will be covered with a certain
Well, let's say with a similar spectrum Yes
on the force field of collective Consciousness
when the pen cannot be destroyed
For example there is a nuclear disaster there

and it turns out that who is around the handle
also yes it cannot be destroyed
i.e. we give each object Reality
properties of indestructibility by such action

and when do we start to analyze
and why does this happen?
and because when we think
we think in some environment

a man goes to the store
he must think
that he goes through some doors, there are some roads

therefore he
if we make the concentration as high as possible
then without even thinking yes

that he is going through some specific ones sidewalks
anyway, we make these sidewalks indestructible
within the framework of Thinking

having created Thinking exactly like this
so that Thinking immediately determines
factual plan of Consciousness
can be sure without stress
that the World will not be destroyed
For example there from some global catastrophe

and in principle if they do so
Well let's say mostly people
it turns out that each element of Reality
will have stability already because
that people understand why he is like this

then it turns out that well yes
the qualitative structure of Reality is changing
when everything is manageable
then it turns out that the thing becomes indestructible
generally speaking, any element becomes indestructible

it turns out if we, for example,
well so let's start reasoning
then we come to the conclusion that here is what
why can't you take it with a spear? break through the atom
yes, the atom seems to be slipping away, it is impossible to get it at all

i.e. it turns out
if we consider this element of development
by detail
in fact, in general, that's what we're doing now, among other things
we detail the elements yes
external Reality and internal

as soon as we start to detail
we come to that
that there are elements that are already there
outside the field of external influence

I show it all the time
how to prove that it is actually impossible to destroy
human
Well, naturally, yes, humanity

and then the question of nutrition arises yes
why then if there is a person there
then, for example, well, after some time
I have to eat again

so these are again elements of collective Consciousness
if well there were situations when in groups of people
so when well in extreme systems
At one time I did a number of materials on pilots
purely practical materials
when there are a lot of people when they concentrate
In general, their cycle is delayed there
Well i.e. they are not even in a state of suspended animation for much longer
they endure there much longer
there are no certain loads there, etc.

i.e. this principle is like yes to the closed system
well under the circumstances
it shows that again, going into detail
and descending, for example, into the microworld
it's clear what's there you can't break a molecule there with a spear

and it turns out that if there macrocosm and microcosm
combine in phase here Perception

this is why the Creator cannot be harmed
why can't God be there, for example, to offend to get
although God created everything

because the principle of combining the macro and micro worlds
in this case it looks like this
that God is always outside the vulnerable system

and when do we start creating
element of development of technology for example
element of development of events
then you need to be on the platform of invulnerability
precisely the action factor
where do you create from

so these elements of invulnerability are actually
Well, they are actually nodal, actually
elements of human consciousness

i.e. Consciousness is built like this
that it is always external to

to the action element

It is natural that for example
go to the same store again
first you need to think about the trajectory
think of something again
when you're already in the store you have to think again
i.e. constantly something external

so these are the elements of external development
they are born, including in the Soul
Naturally the Soul has its own tasks
maybe you need to do something else
don't even go to the store at all

then it turns out that the spectrum of the Soul
it shines for example in one direction yes
a man wants to go to the store

and here
projection phase of an already existing series of events
event-based
gives birth again to the Norm of man
i.e. the norm of the human physical body

a person who has a physical body
absolutely free in terms of choosing a solution

and it turns out that the Creator
He is present again
Here

combination of action optics
and optics, for example, the development of the Soul
optics of the aspiration of the Soul

and this is here
where here yes
platform what optical system of perception
after all, we work on optics
It's easier for us to work with specific values

so this is the optical system of Perception
this is the Spirit
in this case the Spirit is manifested in this way

and here the Spirit is already like that
to build this sphere, so to speak
and then how to pump it with gas and put it into these frames

here is the Spirit that is stable
because we came to him
for human tasks, i.e. for implementation

when we come to the Spirit like this
then he is here
by the way, that's how we see it
look carefully

and when you work for example
well, already on a Spiritual basis with a concentrated Spirit
which in principle also has the appearance of a sphere

but here the concentration is already
conscious as if a plan where the Spirit is free
i.e. both concentration and freedom at the same time
the greater the concentration
the higher the freedom of action of the individual

so here is the principle of maximum concentration
i.e. dense physical
human physical body
this means the principle of absolute freedom of the person himself

and it turns out that we
we can, for example, develop infinitely
because it means Infinity
this is maximum freedom
and dense bodies they are therefore infinitely developed
i.e. they have the whole mechanism for Infinite development

it turns out that we came to this conclusion based on logic
It's clear that we should look at it right away
where is it embedded in the body, for example ?
in the dynamics of the human body, for example
from the point of view of the logical plan of thought

for example, you can take work on the optical process
i.e. to reveal optics
Well for example I see a plane there
if any of the parks there
out of 150 aircraft conditionally

by the way, this is a specific value right now, yes

there are 150 planes

there is only one Il-76 there

for example, a malfunction of electrical equipment there
in a specific sensor

then it turns out that why exactly yes
this environment stands out

because in this case

there is another mechanism

development of , for example, a diagnostic system

and control system

that the Spirit he organizes

generally speaking, such a concentrated Spirit is a free Spirit

he always organizes a normal system of the World

those. Spirit as for example the action of the Soul

how is the expression of the Soul

Well, after all, it is an investigative level, including an investigative level

The spirit of man is meant

there is also the Spirit of the Creator

then it turns out that if we

I meant the Creator God

so when we combine

Spirit of action

who grows Norma

it is the human Spirit

we can build absolutely

well actually secure systems

from the point of view of the Infinite development of man

i.e. let's assume that the technology does not destroy

that food

which does not require destruction and creation, etc.

therefore, the task here is the development of the Soul

it consists of the following

that we can actually create Reality

which is manageable from the point of view of logical tasks

because if you look

logic at its maximum level of concentration
it is reflected very simply, generally speaking
in real world objects

because if you look at it in general
how are molecules connected
how do the elements of the universe come into being?
then here even at the minimum level ^{yes}
logical understanding
it's clear that it's at least big enough
number of ^{seemingly} random events
connected in a chain of development

it turns out that this is if we switch to logic at all
this must be a very high logic
by level ^{and} intellectual

but that's who she is
i.e. it should be, then it is like that

we when we get a reverse wave
that's what she is
therefore the logic can be constructed as follows
what are logical elements
can hold an element of the material world

i.e. everything I said if we output
into fragments of logic
i.e. we take two logical elements
we put it next to each other
and inside between the logical elements of the action
we place some element

Well, let's say we need to materialize the board ^{on a plane}
so that he doesn't fall

enough ^{means} to make to fix
well, to fix on two adjacent elements
which haven't burned yet if

and ^{as if} the third element of the action
just to concentrate there
where ^{well let's assume} the board ^{burned out} there
and this could cause the plane to fall
so that II, well there 76 could have fallen ^{, generally speaking}
if it weren't for the ^{management}

hence
it turns out that the allocation of 150 aircraft
one
this is the act of Salvation
which practically exists at all
as a logically directed action
in general, according to the task of universal Salvation

when you are out of logical phases
that we need to Save Everyone first as a mission

the second is this
anyway, well, to do the next step
civilization still needs to exist, yes
For the world to exist

and the third is already a transfer
that's when all three elements mean Well, they fit together
we see a very specific object
and what's more, we see what can be done here

i.e. I am from the elements of presentation
by the technology of the Soul of the Spirit of Consciousness
and plus body dynamics
already translated into conceptual elements
which generally speaking work exactly the same way

i.e. the concept of "goal" can be the same
as if you knew the whole mechanism of achieving the goal

in human perception conceptual system
it corresponds to that
what generally speaking Well, it can be proven
or for example to what some basis can be drawn

let's say I'm looking at a new object and information
Well, at some point, let's assume, after the diagnostics of the aircraft
I somehow started diagnosing vessels that were quite large
from the navy

and generally speaking, well, for me it was clear
that it is the same thing
it really all came together there
I diagnosed correctly

but it is a new information object
if I were to draw some kind of analogy
I got it there that the plane is designed like this

but then what should I do again to take these catalogs of parts
there is something to study them
I have never studied these catalogues at all
Well, I just found the page there by number
the right unit if it was necessary to show it simply

there exist in technical systems
troubleshooting algorithm
sometimes I just indicated the algorithm and that's it

so it turns out that here you need to be able to
make any spectrum universal
from the point of view of Perception
and management of this spectrum of events

or there if we are talking about human health
each case can be completely different
even with the same type of diagnosis

therefore, it is necessary to choose a complete system
both in Perception and in action
in relation to achieving, for example, healing

and it turns out that all these phenomena, yes
versatility
they are simplified in Perception in some other way
what a person perceives
completely different elements of Reality
physical vision
and the principle of universality is actually laid down
in the mechanism of Perception

i.e. the object of information
he always gets into the transformation
into the universal zone of Perception

and when this level of Perception
begins to differentiate
then it turns out that the person himself is being built again
a person is built from his own Perception

and here it is well completely clear

The Creator is always here, so of course He builds

when you, for example, begin to understand the situation
why there this or that disease
often depends on some, well, not entirely clear, yes
for the logic of ordinary cause and effect
systems
that suddenly gets cured

for seemingly incomprehensible reasons
because it is often enough to restore
external construction element
in relation to what is in Perception

at least look at the signal
how does one get sight at all
information
walk on it and often a large number of diseases
can be cured by simply normalizing the signal
coming from sight

just even work with this level
precisely through today's material
moreover, through the same element
is being restored
and any other element of information

it is restored as an element coming to you

and therefore it turns out that "coming to you"
must always be standardized

it means there is a field of some Norm around you
if something hits you
in the form of optical glow
you normalize everything
so this field by the way is completely well how
the volume of the sphere is absolutely real it exists
is digitized on then there is

and all the elements of Reality are obtained
they are still projected one way or another
and therefore they are all standardized in this place

and when you start from this place yes
to cross over

to any point of Reality
you can find yourself everywhere
i.e. your presence in any element of information
well in the form there segment of Consciousness yes it is meant

therefore, highlighting the element of Consciousness in this way
from here
so you can quite well go out
on the event management structure

of course if you are driving a car yes
but only takes up a small part of the car
you can control it

so that means try now
make the following control

exit already through the conceptual system
what I said Spirit Soul Consciousness
these are elements of direct control

and now through the investigative through the conceptual system
get into your own line of events
as I just said
and find your information element
through it as if Yes
pull the light strings
normalize the events that are in front of you

through the task of universal Salvation

start working now
and I will work with you

by the way, with this level of work
It's very easy to watch how people around you often work
who wants

i.e. it looks like the movement of mountain climbers
that's when they climb up there along different trajectories
They have all these ropes visible
and so you can watch other people climb
what trajectories
what equipment is used, etc.

so here since we entered

in event detailing
i.e. they entered
into an element of its presence in the event

then it turns out that it is clear that
well if there is another one a man is driving another car
you can see what kind of car it is and who is driving it, i.e.

that is according to my Teaching
about Salvation and harmonious development
through the detailing system
and the action in detail is like this
you can transfer the Rescue system very quickly

well if there Some car's cylinder burst
in principle it is possible, for example Yes
give a hint to another driver there
i.e. to be able to do it

and that's why it turns out
that the principle of such external
well, actually human control
over the situation
under own management
we manage our own system

it boils down to what you can
do management this way
that doing your management for example correctly yes
Well, serve the canons
let's assume there if there is a car then it is a working car

and therefore it is desirable for others to understand
that it is also desirable to have a working car
since yours is running fine
they watch it and in general have working cars
I'm somewhat suitable
from the point of view of course there may be simplifications

but another question
what if you for example want to pass on experience yes
how to fix a car at all
you can send it to a good auto repair shop somewhere
or be able to do it personally

so it's a question of personal action

if you do it yourself
or for example for you to do that
to make it less time consuming
you can send it to a car repair shop, for example

so from the point of view of the Creator
personal action for example Yes
subject to developments
can be concentrated generally speaking
at the unit level

i.e. you can take and print a leaflet there
about the workshop address and just hand it out
from one place

and when you start to rise
Well, according to logic, let's say the center and these climbers are higher
which I just mentioned

then we get that this center
from the point of view of the idea, yes
it is not really achievable
Yes, they set some heights for themselves
then they want to climb even further

and from the camp's point of view, this is where the climbers are
the center is generally divided into groups
from which group
but at least it's there
each group of climbers

so here is the combination of physical place
here they climbed to some peak
but in theory they still want even higher as a rule
get up

i.e. it turns out that the physical center is yes
to the tasks of mountain climbers
it is not, well, first of all, final
secondly, it does not appear in the Spiritual understanding
generally something like that maybe even be there
intermediate place

i.e. it turns out that a level arises here
well, ideology and movement of human personality
and the level of its location

I specifically took the mountains for this

because from the point of view of mountains , well, the structure of mountains in general

on minerals for example yes forms

various forms

for some reason they are located next to each other

from the point of view of abstract logic

if we take a mathematical model

there and describe there yes there is

long some surfaces of the oceans

well vegetation

and suddenly some broken surfaces

that's where they came from

from the point of view of the development model in general

so if we of course

we do not consider issues of tectonic movement

but we just want to say yes there is a universal model

average

then it will work out then understand

why exactly is the geometric line broken

against the backdrop of the ocean surface

this doesn't fit into logic

so that's why more people climb mountains

rather than swim long distances

so if you think about it like this, here's the device

element of collective Consciousness

in terms of achieving goals there

because it is a single system

from the point of view of the generalized development model

and so it turns out that a single system attracts more

in the collective Consciousness

and the one and only Creator

naturally then it attracts everyone

including elements of external development, generally speaking

Well there the same stones somehow change

the same vegetation somehow changes

so here is the desire for unity

the desire to ensure that this movement is well correlated

for example, you can say yes

Do climbers have a love for the mountains?

do mountains love climbers

Well, if he went up well, then they love him.

i.e. there is a reciprocity of the system, as it were

man system

system man yes

it turns out that among other things

when recovering from diseases, by the way

it is often sufficient to standardize the external system
to completely cure

and even a very complex disease

revealed for example in the change there forms

for example, to regenerate an organ

which is removed

it is often necessary to align the external system

and this is the action of the external system

restores the organ

although we are generally speaking with a person

we don't even do this in this regard

and it turns out that if well let's say in a specific case

the ureter was removed from one of my patients

so, to restore the ureter

I need well there I just

how technologically it was the main element

for the growth of the first element, as it were

there first centimeter

that I entered simply into the memory structure

somehow he perceived a tree as a child

and the broken branch was restored in memory

that's all

the ureter immediately grew by a centimeter

then basically he grew up completely

Well, then, to be honest, another technology was added

but the first element of the action yes

This is an external system restore

at the level

[...] replica

Well there is an abstract system on the tree
because the ureter is also long
he associated in logic as
if it is cut off, it means that the tree is broken
means in this regard
it was enough to restore
element of external Reality
and in memory

from what I restored
By the way, I observed it later
element of the external level of development
it turned out that way because of that
that he restored the tree in his memory
so it turns out that I looked later
on physical Reality
Better yet, the grass has grown
there in certain areas of the Earth

i.e. the result is a regenerative action
it would seem that yes, in the memory of man
leads to the fact that it grows better here
and i.e. in the current time

I later started watching in digital
it turns out that this is also one of the mechanisms
for example, growing plants more quickly

just enter
into the structure of information of the past
restore some broken plants
They grow faster here
the ones you want

and if, for example, we analyze
then by the way the same surgeon who cut him off
he later established that the ureter was in place

so in his memory, basically, it all poured out
just for the sake of analyzing the situation
i.e. he is, well, a rather unusual case
He cut it off himself and the ureter appeared again

i.e. it appears that well how would i pay attention
the surgeon simply analyzed the situation

from the point of view of well as if professional
then later maybe according to the structure of the universe

but what's interesting is that the analysis turned out to be that
what is he like for example there he transmitted, as it were, a certain phase of
information
still of a constructive nature
if the ureter has grown
what is best for the patient to do

i.e. how would he, well, actually speaking
I didn't spend much time on this information
quite unusual
I would just like to give some recommendations

i.e. this says that
what does any mean Well, it 's an external system
which well the status may not be an ordinary situation
it still works quickly towards standardization
even more improved standardization

and by the way I have repeatedly encountered it, for example there
when healing there from well there are the most serious diseases
which are considered to be incurable
there by some ordinary means

people who get used to it very quickly
it's literally there at most there 's a completely new one there
maybe even a few minutes often

and immediately think about what to do next
i.e. like this or there rest
or you need to go somewhere or do something
this is exactly an improvement even for the Norm

i.e. here is the structure of the improvement of the Norm yes
here is the desire for a single Creator
aspiration where there is well as if it were an option for the absolute Norm
this is a specific mechanism of the next action
according to the Laws of the Creator

i.e. if you come at the level
optical glow element
to some point of realization
i.e. what did you do here

the next element to be Norma
to generally follow the ideology of the Creator
in terms of action
this is the next element of the action

Well, it's clear that the whole world is being transformed
anyway the action happens first
It is better if the action is under control

and this is the upper action
this is unity with the Creator
this is ^{well} faith yes faith in the Creator faith in God
i.e. that which gives an unconditional action

Well, maybe someone believes it often
well, in some element of concentration
let's assume there he is a great professional, he knows
here in this spectrum
and he already works more for that
what is he ^{well} as if it already simply has
spectrum of a single concentration
and he makes a quick decision

so that's when we talk about action
as as the Creator
that is faith from the point of view of professionalism
that you will do it ^{yes}

how can I even say that
yes, this diagnosis will definitely be cured there
how exactly is it not going to explode
there nuclear power plant ^{for example}

First of all, we must prevent this from happening
if it is ^{for example} a potential explosion ^{yes}
and the cure must be precise

Well, everything should be accurate
because you know it
not because we can experiment here
you can't experiment

every action is an action of Salvation

and under the conditions ^{means}
Well, an infinite number of actions, ^{yes}.
under conditions of Infinite development

we must have absolutely stable
precise control tool
if we don't test the system
we must know for sure that the system is controllable

i.e. it won't be there global destruction
there will be Eternal development, etc.

therefore it turns out
that here is the element of faith in action
or element of body action ^{yes}
dynamics and here is the usual dynamics of the human body

why does a person seem to be ^{well there} he makes a decision
he knows for sure that he will get to the store

because this is exact knowledge
he doesn't analyze what if it's somewhere ^{there} in China
nuclear ^{weapons} or something else will explode
he knows exactly this exact knowledge
after all, precise knowledge is inherent in man
as an element of its dynamics
element of its development in fact
and even of a domestic nature

but we can move
i.e. to transform an element of this development
on target
a goal that we simply imagine ^{mentally}

we can do this in just a few
projecting the glow of the human physical body
projected onto the task of achieving the goal
^{well,} a kind of algorithm plan

^{so} they took it, there is a task there, a cure, ^{yes}
yes it is there
or is there a task of universal Salvation

so that's what projection ^{means}
but still through universal salvation
as an element of necessity even
then on the task

and it turns out that here is the projection algorithm
glow that remains in the trail

it projects

well, like a reverse wave of reflected light

So she gets there

to specific elements of the physical body

and through these elements one can perceive

what exactly should be done

i.e. here is the diagnostic mechanism

what to do next time yes in a second

there, for example, on the task of universal Salvation

I know exactly what to do

well, like a lighthouse

there the next word should be exactly like this yes

some color if I need a color

or contain such and such musicality

Well, in a hidden understanding maybe even

i.e. I don't sing

but I can take and add

there is sound for example

at the management level

and therefore therefore if for example

Well, I need to take and add the rustle of the waves

I took it there added let the word be with the rustle of the wave

please let it rustle

Infinitely means the word will be absorbed

it turns out that if I took it there and told about it yes

amplification occurs

a person understands what it is

and immediately starts using this tool

this is very very useful

for example, to cure a disease like this

add the rustle of the wave it is also Infinite

so he is constantly being cured

and it turns out that a person's action, for example, yes

human action aimed at achieving

this is the action that creates in each element

the Reality that you plan for yourself

if you plan The reality there is universal Salvation

it means it is naturally achieved

i.e. this is when the docking takes place
i.e. you see it
well , the plan of ^{action} coincides with that
that the implementation depends on you
she always realizes for the better
this Reality

i.e. the task of universal Salvation
will definitely be achieved
because it doesn't matter if there's at least one person
set such a task
everyone will be saved anyway

and if everything is fine then ^{it 's like} there are simply no questions

and it turns out that this is precisely the accuracy
this is when everyone does it

i.e. then there is definitely no need for any experiments
it is obviously clear according to the Law that this is in fact
already the Laws of Development
if they ^{are distributed} according to schedules
what I'm talking about is shown at the implementation level

Well, I am a concrete practitioner after all
I am constantly in practice
here are the controls on Macro-salvation , etc.

and it turns out that these are the Laws
and the Laws that create Reality
i.e. this is actually the basis
fundamental level of Reality

and it turns out that if we, ^{for example,} have this Reality
in its fundamental understanding
we start distributing ^{well} to everyone
at the level of the task of universal salvation
when everyone has already been saved ^{then there}
Infinite development

then it turns out we can use it multiple times
the same word and ^{in between}
^{for example, let's say} I say this ^{there} "it works"
next time I'll say "it works" again
next time it "works out"

already a more concentrated system

and I always use the same word next to it

and therefore any elements that are familiar to us
they will be the same it would seem yes
but are no longer destructible

i.e. how to recognize it at all
what kind of person is indestructible who has mastered technology
and what is it like there? Well, maybe he still needs to practice.
there or practice

but everyone should be equal

that's the peculiarity of the system of non-destruction
that firstly it is desirable that it does not fail at all
there is the possibility of destruction there
even minimal

Well, due to circumstances, people can be emotional
they may have
some kind of changes in health, let's say
but nevertheless any even emotional person
in the general spectrum for any combination of events
must be indestructible
just like any element of Reality

and when, let's say, we generally set such a task
we start moving towards it
well, even if there is more than 50 percent, yes
in the collective Consciousness of people there
they think about it and do it
the most important

then we can see right away
changes in the elements and the external world

because as I already said
so the mountains can love a climber
i.e. transfer of information
occur as an external element of Reality

and that's why it turns out here
what we have is a kind of learning process
to all elements of the World

and here is according to my Teaching
about Salvation and harmonious development
we must develop at the same time
all elements of Reality
at the level of ^{well,} equivalence of action after all

in Infinite Development plant ^{for example}
can even achieve logically
comparable intellectual level
or there dog ^{yes}

then it turns out
or some not necessarily animal ^{there}
or maybe there is an element of the crystal's shape there

then it turns out
what ^{well} as if a slogan of universal intellectualization ^{yes}
if we distribute ^{it like this in general}
at the level of logical perception

i.e. each object can be close
to an intellectual level comparable

then it turns out we already have
^{well,} some concept of "general intelligence"
where intelligence is controllability, among other things
controllability mutual controllability interaction
and at the same time a spectrum of complete freedom
each object of information
including let 's say a molecule or an atom

and here already arises
absolute controllability in fact
system
due to the fact that we have moved very far away

as I said today
if we are very far away we come ^{to} ourselves

and therefore when we move far away
not only by distance but by possibility
be able to control all elements of Reality
the closer we come to ourselves

and therefore we come again
to the dynamics of one's own physical body
because of one's own physical body
as a rule it is completely controllable yes
provided well means full health
it is absolutely controllable
if there are no pathologies in the motor system, for example

and it turns out that this is where it comes from
the next element is well in the knowledge of Reality

what is the next action
where there is body dynamics where there is movement
this is the harmony of the Eternal universal development in general
and it is universal because I described it
that we interact with each other

and when, for example, I explain it like this
that the verbal part which is, well, to a greater extent
somewhere based on philosophical aspects, among other things
interspersed
with the optics of Perception
where are the specific figures
specific control systems of action

you can produce
my more Spiritual system
which is the Spirit that is indestructible

when will you produce more?
For example there you watch lecture after lecture
there let it be on video or there, for example, I will conduct
then you develop a mechanism
who well formulates well or something at the same time
level of development of the next Reality

he precisely formulates
i.e. first of all, you set the task accurately
you can then record what is necessary
and what's more, you are still absolutely free here
i.e. in principle you can set it however you want

and so that from the point of view
well, precisely the general development of universal freedom
you could work out the right trajectory
then the task is precisely to save everyone

this is the beacon that has always moved you
well, some kind of moon- like movement appears
which leads to the same thing

Well, well let's assume the wave strength is yes
in this place if you roll the ball
he took it and fell somewhere in approximately the same place

and if we lock him there
then we get the sun
i.e. the ball has nowhere to go at all
inside the system

i.e. the more we concentrate the system
then first of all we can come here
but we can close the system altogether

and the closure is a system of rigid lines
well, there's a cross-shaped one or something like that
this is exactly the tough system

i.e. closure in action
where we don't consider figures for example
because rigid line systems are actions

and so if we look at the symbolic level
why do the buildings have corners there
why is something more convenient there for the body and the person

because many rigid systems
this is movement
i.e. direct systems linear systems

for example convex systems yes
more management of the future processes there

we can consider the elements in this way
in terms of where the element is located more

and then in front of you
well how can some such table rug be
where in each level you can see
what if bulge
this is more of a projection of a future event
a straight line is more flat
i.e. the dynamic system of action now

if the level is lower ^{yes}

This means that this system is bigger than the past.

and distributing, as it were, well, in Perception levels

can you please as if it were a kind of training

to work out

Well in general, a deterministic system

those. self-learning system

management of external elements

if we relate form to time

By the way, this is a pretty good training

where you are simultaneously rationing all the time

well, that is, you are actually recovering

because Norma is one of them

and your own understanding of external Reality

as I said it is enough to restore the external system

and you recover

i.e. well, somehow I just found it in some magazine

what are they restoring anyway

I think people in France are generally in wine

i.e. well, there he climbs into a wine vat with wine

and his health is restored

but in general, wine is also one of the aspects of the Norma

standardization correlation Norms

for the body in general

and when he gets into that wine, for example

he basically has it

external control function

same thing if you

for example, let's say you do management

Well of course it's not quite the same thing

but it seems like an illogical mechanism from the point of view

modeling through Consciousness

i.e. make the structure manageable

due to the systematic nature

basically then in the level of Reality, perhaps?

systematicity

when the external system can be anything

after all, it is important to develop exactly this spectrum here

elements of Reality of events
there can be an infinite number
how can we develop a system here?
Here I propose, for example, this line of systematicity

and when will you already cross over
from there well let's assume forms
to the elements of the Spirit of the Soul and Consciousness
and you already start working for them
what you have full control over

then firstly no one will be able to displace
because your Creator gave it only to you

and secondly, if you don't move it
and have you achieved for example that
that in the next second the planet there is indestructible
all is enough, your work is enough

and when, well, of course, everyone works, yes
but when everyone works, then it's even more sufficient

and this is the level of multiple redundancy
due to development technologies
systemic and technologies

for example, I am describing
I say that the spectrum of the Soul is there
color of the Spirit
or optical Perception of the Soul
optical Perception of the Spirit there
logical phase of Consciousness
or the dynamics of the development of Consciousness
in relation to the physical body, let's say

these are specific elements
which well let's assume if we take the element of the Soul in optics
there light- there is silver
may have purple tints
and consider that this is an element of the future

so silver is such a white color
Spirit in the current time yes

and let's suppose there is a golden glow
this means Consciousness is a logical phase of Consciousness from the past

then just working with these colors
it is quite possible to engage in the standardization of elements

that's when you think about the future
naturally this means what corresponds to the Soul
and right away, by the way, there is a training session for working with the Soul

in the current time and the development of the Spirit
Well, the Spirit, in principle, develops from the current moment

why for example Jesus and the saints have yes
golden glow

because the Creator gave them initially
before they appeared
He gave it from where?
including
from the starting point of the organization
i.e. from as if from the past from the gold of the golden glow

so it turns out that we have
various optical elements of development
and in general the ability to work with them is also in terms of training
creates at a certain level
namely the design of absolute controllability
from the point of view of Reality

for example, I diagnose there airplane
it's true
This defect is indeed fixable
the plane really doesn't crash

and when you enter this element of Reality
Well, there doesn't necessarily have to be a plane there.
you can save any system this way

for example, to improve a person's health
decide at any distance
some management systems

and it turns out that this is the position of action
she produces

exactly well as if a hundred percent guarantee
which definitely won't happen at most
Well, this is a global catastrophe, this is the maximum form.

if there are a lot of people
it is already known for sure
that not even a local catastrophe will occur

and if everyone is concentrated
at this level
here I am again bringing up the same thing
which will not happen at all
Well like even some minimal ones
not to mention the catastrophic ones
there may not be minimal painful phenomena there

and it turns out that this is the level of unification
aimed at achieving
it turns out there is freedom of action for everyone
it is clear that this is the level of the Creator
initially gave complete freedom to the individual

i.e. one can logically come to this
what is the level of the Creator

and generally speaking, build on this
dynamically as if a logical system
taking into account its own logic of development

This is where I end today's seminar.

Thank you very much for your attention
