

GRIGORY GRABOVOY
The Teaching of Salvation and Harmonious Development
**Methods of organizing by Soul
structures of Spirit and Consciousness**
18.12.2002

Hello

The topic of today's seminar
for the dissemination and implementation of my Teachings
about Salvation and harmonious development
through the recovery complex

methods of organizing by Soul
structures of Spirit and Consciousness

these methods will be considered
principle of managing future events
where we first record future events
as a structure perceived, for example, on a Spiritual basis

then the events are translated
into the structure of Consciousness
i.e. to a greater extent in the logical phase

and then we organize management
already from the Soul

and in the process of this management
occurs as a self-healing structure
i.e. the Health Norm is realized in the current time

is also being implemented
Health Norm in Future Events
for example, your Norma personally
and plus it is being implemented
Future Event Management Framework

in this method
where exactly is the Soul
organizes the structure of Spirit and Consciousness
a unique principle is considered
as if information flowed
optical information of the Soul

into the realm of the Spirit
and into the realm of Consciousness

if for example we consider
Well, that's a simple example
as when they talk about a person
that, for example, a "spiritual" person
and let's consider such a principle as a "spiritualized" person

then having considered these positions
from different geometric points of view
we find here
quite specific technological
in terms of application

technological property of Consciousness
be able to
from different geometric points
implement different types of management

for example, if we consider the principle of a "spiritual" person
consider in relation to oneself for example
as if to look at oneself from the outside
that concept of "spiritual"
in Perception external Perception
i.e. you need to tune in to that
what are you looking at yourself
as if from a distance of, say, two and a half meters

and when you say "spiritual" person
for example, you are a "spiritual" person
then the first level of Perception
from that point
is the level of Spirit
i.e. you see first
well, kind of like steam
in Perception
information of the Spirit scattered as if at a micro level
Means like small white particles
which is the Perception of the Spirit
but outside of you
This is how you perceive the Spirit

if we say "spiritual" person
then considering this case also from the outside
we see first of all
at the same optical level

we see the level of the Soul

i.e. the Soul is perceived
as the structure is also already close
to Spiritual characteristics

in optical terms
and at the same time we use for analysis
just a few words
i.e. well, the words "spiritual" and "spiritual"

when we look at the big picture
then it turns out that the concept
precisely a "spiritual" person
this is a concept when you can look
mostly from outside

although it is accepted in everyday Consciousness to consider
that the Soul is "flowing from"

and when we
expiring in action and

and when we look for example
where is the status of the Soul organizing the body for example
we are talking about what is happening at the moment
The soul organized the body in this way

where is she at the moment
the question arises

naturally considering the body as part of the Soul
we can quite say that yes
it is also located in the body

but when we set a task
complete, for example, the presence of the Soul in the body
i.e. we are talking right now about the whole Soul
is located inside the physical body

then "spiritualized"
here in this position
it is the spiritual person
perceived as a human being
where do you hear inside yourself

Now say the word "spiritual" mentally

and look
than you hear
and where

then when you do it
at the level of Thinking you perceive
then "spiritualized" you hear inside yourself

and when you analyze
Well for example, here is an analysis ^{yes}
it would seem that it only takes two words
from the point of view of place

because in this particular lecture material
I show the place of work
Here

and when I say
what place is that
what can be captured in words
then in this case
defining the place is like an example

i.e. that you can choose a place
we can consider the position
at the logical phase of Consciousness
and here is the management according to my Teaching
about Salvation and harmonious development
happens first of all
in the structure of universal Salvation

and when we do the analysis
where is the structure of the implementation of the Teaching
then it is located there, which I have already announced earlier
that in the Teaching the task is
preventing a possible global catastrophe
and the fact that preventing a possible global catastrophe
exactly ^{how} it is classified as a task
this means that the meaning of this management is that
that the problem is being solved

and when exactly is the purpose of the Teaching
universal Salvation is established
then an earlier level
which was already in the form of the goal of the Teaching
it is realized in that
that when the technology of the Teaching goes

that is precisely the task and goal of universal Salvation
this is what characterizes, generally speaking
each next action

so in this case
when I talk about the application of the technologies of my Teaching
About Salvation and Harmonious Development
I am considering here first of all
that position that action i.e. the next action
always implies that
what was said earlier

and so as not to constantly implement, for example
structure well as if referring to earlier events
those. constantly not let's assume not to implement
as if a factor of remembering that
what is the original structure
or a structured system

we come to that
the main thing is to define the goal
and then the action spreads
as an action containing an inherent principle

so if we look at the human body
from the point of view

(replica)

i.e. if we assume if we consider
from the point of view of the body
as a system for implementing all external relations

i.e. we do not analyze
why suppose we have one cell next to another
that's why the structure is set up this way
we don't remember it all the time

moreover, if we ask ourselves
It is precisely the task to remember this
then there always arises a multitude
as if unrealized decisions

i.e. here's how to say it exactly
that this particular cell is currently here
and why is she so connected to herself

i.e. it constantly arises
more questions depending on
if we pose these questions more broadly

that's why in technology
where the Soul structures the Spirit and Consciousness
there in the conditions of the task
i.e. in the structuring method
the structure for accounting for those phenomena is immediately laid down
which we do not analyze

because it is important to us
in seemingly such general terms
as Soul Spirit and Consciousness
in fairly widely developed
for example in the system of social Consciousness
esoteric consciousness
in the system of analytical Consciousness

it is important to us in common structures
highlight a very specific part
and this particular part
must be implemented with absolute precision

i.e. the ability to speak in general matters
and get a very specific result
from seemingly fairly common staging structures

so the first goal is
in this technology
this is what you should focus on
on their personal tasks

i.e. the main task
focus on personal tasks now
If possible, look in front of you
sphere of personal tasks
and when you see
sphere of personal tasks
look at this sphere from the inside

and the task is contained in a very concentrated manner
in such a well For example
so it could be a light whitish color
sphere
where inside
how unique even such steam can be

from microparticles of events
and each particle is a micro particle
this is a specific event

and now you are looking inside this sphere

now take and lift the sphere higher
and look
how is this sphere
through the system of universal Salvation
through a collective system
through the system even those
who is this for example Well, it's not explicitly involved

how does she move
into the structure of your external Perception

here's how to do it
so that while inside the sphere
through the dynamics of the sphere
i.e. you are moving some external level
for example, the Spirit took and raised

then it turns out
to go to the external structure
we need to use the action of the Spirit

so here is the structuring of the Soul in this case
consists in the fact that
that you act through movement
i.e. you change your point of view simply by moving
due to the movement of the logical phase of Consciousness

because that's what I'm talking about
if you look closely
then by the way this is visible quite clearly
For example , I say that I see these spheres very clearly

if you digitalize with a video camera for example
these areas these technologies
That's exactly what they actually look like

so try to proceed from that here
that action is in Reality
it must be absolutely accurate

again I return to precision

for example, aircraft diagnostics
here's the one flying now , let's say in the area of Sheremetyevo-1
for example IL-76 yes it really is flying there now

then we do this diagnostics
we basically do
inside this sphere
but the sphere is fixed
where do I get the diagnostics done then?
so that the plane is critical and the plane
so that he doesn't have problems
I do it in the property of precisely the movement of the Spirit
i.e. here in dynamics

and dynamics it gives precise knowledge

Here I did the diagnostics
the knowledge already exists
how did i get knowledge
the question arises

where is the Action of the Soul in this case

so this is the Action of the Soul initially
I talked about this earlier
that it is originally like this
that there is always knowledge containing actions
i.e. you always know
and knowledge is there from the beginning
also in the form of static

so when you act
you see
how the Soul organizes the external structure
how the Soul organizes external events

and therefore all external events
are also structurally related
with the Soul as such
originally directed
example, that you have to do the management
by management objective

and also for that
that the Soul always has a task within itself
as if in statics to keep the World in a harmonious state
i.e. so that there is no destruction

so that you can take the next step for example
for the planet to exist, etc.

so here is the imposition of, for example, action
i.e. when you start to act
in terms of management, that's it
that you work with your Soul

action imposition
for static work and with Soul
realizes the logical phase of Consciousness

well, that is, if well , in everyday or logical understanding
if there is an action regarding statics
you can always say that this is an action
not inaction

those. some movement

and here is the action in relation
to static level
gives precisely the fixing logical phase of Consciousness
i.e. what we specifically identify

and when I was talking about aircraft diagnostics
the identification took place in the logical phase
and I wasn't looking at the plane
and addressed the audience
and even to those who will have these materials later
consider working from videotape or texts

i.e. therefore the control task
in this case it consisted of
so that there would be co-operation and your action

and when you concentrated
in principle there really is
Here is the problem that existed in the plane
she lost concentration

i.e. it was enough for me to say that the plane
but I told you that I diagnosed the plane earlier
and before this always coincided
and that's why let's focus
and I will tell you where the defect is
I didn't talk about that

then it turns out
that joint concentration instantly resolves the issue
i.e. the future in this plane becomes sustainable
it doesn't break

so when we talk
about the structuring of the Soul
there is action
and we structure the Soul, including our own
and we also structure it with the Soul
Spirit and Consciousness

where is the action
this is well as if the interaction of these systems
and there is also co-operation, i.e. external action
action of active stakeholders
the actions of those who are already doing it
but maybe doesn't focus on it

so having concentrated
having singled out the sprouts as if of pure action
aimed at universal Salvation
we can do exactly that
according to my Teaching on Salvation and harmonious development
to allocate such a management structure
which would always be effective

here I use the word "act"
to act or to take action
and came to the word effective
i.e. it always works
this system

therefore, the goal is in the precision of control
the main goal is
achieve system effectiveness
First of all, it is necessary
and always achieve the goal of universal Salvation

so from here
when we already move on
to what I said
work in the prognostic phase
First of all, it is necessary to highlight
that prognostics is the construction of Reality

and based on this

we can make this construction like this
which now it is like plasticine, soft
i.e. it varies
after all, I said about the plane
tracking a fragment of already future events

and when this variable system exists
we need to approach it in the best possible way

i.e. when you make a forecast
you are always yours
Well as if by moving your Consciousness
to the prognostic phase
if the phase is in the Spirit area
you are constantly improving the structure

if the phase is prognostic
i.e. the real system of events
is located in the Soul area
then you actually improve the statics
already known events

i.e. the Soul knows future events
Spirit is a dynamic system in this case

so when you work through Consciousness
i.e. I just go and say
What
Consciousness in this case
this is the first tool

then Soul and Spirit are systems
which seem to be building
your space of action

that's why here
when will you practice now
i.e. to build the structure of future events
and now I will give the structure of future events
for the next three months first

i.e. it will be accordingly
since it is now December 2002
accordingly, that means add three months
and it turns out that we first work with this interval

then there will be such a technology

what I will give next means another two month interval
it will be five months

you then work on your own for another two months
and then it means firstly, as if in the next
Well next time I'll tell you
how can I work on the other part
I will say it this way
that now I will give part of the control
i.e. for example how to work a year ahead yes
or let's say ten years in management

then if we consider
Well let's assume a billion years yes
then technologically you are just here
should pay attention
that technologically there is no fundamental difference
what kind of information array are you working with

you put it in the management plan
the same task all the time
universal salvation
i.e. proceed from a concentrated point
of your logical Consciousness

and precisely in the area of universal Salvation
i.e. you see that universal Salvation
as the main concentrate in management
in this case, the concentration of Consciousness on optics
and here precision matters

i.e. this is the concept of precise control
including that it is expressed in
that we find very stable areas of management
which prognostic phase
make it just as stable

i.e. you made a forecast, you made a control
it should be exactly like this
in a positive sense
or negative structures
we must definitely be able to do it by that time
disband necessarily disband
in the area of precisely that, in order to prevent
such as a global catastrophe

so now i propose

start practicing right away

i.e. you must first of all
consider ^{means} the period plus three months
and accordingly this period
divide into three parts

the first more approximate month
until the eighteenth of January ^{for example}
it doesn't matter ^{what} the number is
just plus a month from the current time
if ^{for example} to work on technology from any time
then accordingly at the time where you work
add three months

next month
this is the logical phase of Consciousness

i.e. you work primarily with logic
and assign control information
through the logical phase of Consciousness

from the first month
before the start of the third
exists
Well as if it were a kind of voltaic arc

i.e. if we want to move with Consciousness
^{for example} from today's date
immediately on the third month, ^{for example}
then a parallel path arises

if we want to continue working consistently
then we put precisely the Spiritual component
the second month let it be the Spiritual structure

by the way in the system of the device of Consciousness
there is only the Spiritual system
in the second iteration

and the third iteration is already the Soul
there, in principle, it doesn't matter how much
one month or millions of years

because the Soul
this is what is everywhere ^{yes}
including in the external Reality in all

is it so unusual to understand or something?
even Eternity or Infinity
optical understanding of the Soul
Now I gave
it's really unusual by the way, it's a different color
the color of the general brightness
Well, if you look further
there you can clearly see that the brightness is universal

i.e. color and light passes through
to any point of Reality
not just light but also color

Here we need to pay attention
that the color is very strictly maintained
because the linear structure of the Soul
this is that the color is maintained without distortion

then we can say for sure
that the event is already closer to absolute
i.e. it is necessarily realized in a positive color

and then build, for example, three blocks
the sphere that was in front of you
maybe you'll add something else there
in personal plans

take it and kind of ride it
on these three blocks
just take it in front of you
as if you were rolling out a ball

because that is what the Soul is
we have still recorded a month
what is the management of the Soul

and as I said
about structuring precisely by the Soul
Spirit and Consciousness
Consciousness is closest to you

then structuring is precisely in that
what is the structural form
well the concept of "structure"
in this case it may just be a form
for example, here is one plane, some second one

what does structure mean
in a simplified sense
it is some kind of distinctive property

in a simpler sense
we don't care what understanding
for example, let's choose something simpler
this is a great form

the first two blocks are final
the block that relates to the Soul
it has a finite form
perceived as Infinite

i.e. in logic we put it as final
but Perception sees it
as an Infinite quantity

and by the way, this is the principle of the organization of the Soul
organizes exactly a healthy body

i.e. if, for example, in this position
be found
just listen to these phrases several times
then you see
how does the regeneration of the physical body proceed
and not only yours
but also where the light of your Thinking reaches

and since you work
through universal Salvation
then for everyone too

the question arises then
how everyone gets what they deserve

so here is the Infinite status of the Soul
he gives each one a specific final action

and based on this action
begins to unfold before us
world of events

i.e. now we are entering
into the world of the following events
Well let's say there is something in front of me

there we suppose the same glass yes

for example, there is information right away
the closest color

then the main task is universal Salvation
where are you currently the most active participants
because I create this information in general
This seminar is the first
again, precisely in the plan of universal Salvation

right now

for example, I didn't prepare there, I didn't write out a plan
What matters most to me is the most important thing
concentration of universal Salvation
at the moment

and now I see where the maximum concentration is
this is how I put words
i.e., in general, it's very simple by the way

so tell

it's also really simple
here is how to transmit such information
the main thing is just to concentrate
on the task of universal Salvation
and that's all

then everything is quite calm, no problems
you tell it calmly
and just put the words according to the task
you do the same task all the time

and that's why I started today's seminar by the way
exactly in this calm version
in terms of the fact that the task was initially set
this is the peace of the universal Salvation

so here is the word "calm"
if you lift it up
in the form of the scope of your tasks yes
above these three layers
let's lift this word calm
we personify i.e. we do
that your problem is solved
this is a fragment of calm

i.e. the sphere hangs above
the layers are in front of you
and we just start to observe
to highlight this sphere
on the structure of the next month of the future
plus one month etc. yes
the third month is the Soul
which forms this month

then we see
that events are starting to build
within these systems
and in a well-known manner at first
how I started to proceed from my personal Perception
on a physical level

but you may not necessarily proceed from this
you can simply set a prognostic task
and solve it
for example, scientific problems are solved more as if
not in terms of approximate level
but on the contrary, they are more resolved
Well as if in the area of the space of Thinking
i.e. in a distant phase

because that's where it comes from
where the Infinite Soul is
and by the way, this is where you can see it
how the space of Thinking is formed

Infinite Soul
creates structures specific
form of thought
thoughts realize events

you wonder
why does a person specifically go somewhere specifically
can be considered
a very rigid system of relationships
that he acts quite deliberately
in any system of action

and operates according to very clear Laws
these are the ones we will build on now
in fact the following events
and each one first has his own

and now we have actually started to build
I didn't specifically focus on this
because you're already building anyway
one way or another

and that's why I came to this now
well, through a sequence of certain phrases
that to build technologically
i.e. to set future events
to management status
and at the same time ensure the status of universal Salvation
we still need to get to the specifics

first in this case
in a global sense after all
for example , in the newspaper "Variant Upravleniye - Prognoz" in the Fund's
newspaper
I give exactly that
that through the structure of universal Salvation
I show it somewhere specifically
emphasis on certain specific points
which actually operate in local senses
further on
according to specific events of people
and each person

so we need to focus on that
what are your actions
they act anyway
that you act on optimization improvement of events
in fact, every person

because the status is improved
must be manifested everywhere
with absolute free will
every person

i.e. you shouldn't, for example Well, let's set prerogatives
there is only one thing that is your personal task
here it is important to be able to find your way
precisely in general freedom

and since this technology is built exactly like this
it will still be different and will not happen
so work calmly

when you already start to see

how the Spirit descends on events
that's what I came to
that in the optical phase I begin to show
what is going on is exactly what is visible
and how does it go down, how does the descent go like this
this is exactly the descent that looks like the descent of the Spirit
to the logical phase of the event to the phase of Consciousness

and the principle of actual spiritualization arises
i.e. you actually spiritualize events
i.e. you give them Spiritual characteristics

when you spiritualize
you see that control becomes easier
more dynamic
i.e. the next month system
becomes more manageable
i.e. it becomes mobile

in the first case
these were tough
there may even be undetected systems
but initially upon detection
you always have to strive
to the best detection factors

look at your future events
through the structure of Macroregulation
Well, in this case you can look at that
so that there would be no explosion in the center of New York
somewhere around January 4, 2003

we can only do it on one control
i.e. they took and recorded the explosion
well, they dispersed
made the management that it does not exist
so we did it and now it's gone

by the way, by the way
there are pre-event factors
i.e. if you do for example
well, the task of monitoring agent systems
then they can say that yes, for example, there was preparation, etc.

keep in mind
that we are now working with real events
but nevertheless this explosion does not occur

so having unfixed one task
i.e. there is no explosion
we get complete freedom of action
within a month
i.e. with mandatory positive status

the goal of management is obtained
it's at the same time
and mechanism

and here, by the way, pay attention
Soul
Spirit
and Consciousness
it is a single structural environment

i.e. they unite
in a general volitional trait
at the level of somewhere even the action of the heart
and then there comes, for example, a kind of hard signal
which is recorded
the way is clear now we can go there
in fact, at least a million years
develop
at the level of one positive structure

i.e. if I can of course record it
i.e. correctly processed technologically
this optics for example is highlighted
and everyone knows for sure
how to manage there for the next million years now

therefore, by highlighting even one particular
precise level of control
we can make it permanent
Here we need to pay special attention to this

as I already said
that we work all the time in a common plan
and if we work in general terms
then one particular task
can always be common

i.e. the thought expressed
at the level of Salvation of all
it could be like this

that she can act simply Infinitely
or there are billions of years
or maybe if you need
then you can make the control there
only in the current second

so the higher you go in management
that will pay attention to you
act longer, have a prolonged effect, etc.

so, having risen higher simply in conversation
I already showed you
the next level of the Spiritual plane

i.e. from here by the way
I'm saying it's already clear
that the Spiritual Spiritual layer is actually
Well let's assume this as some kind of
with jagged, let's say, uneven edges
cube
not even a cube is closer, but a parallelepiped
cube is in the first Perception of more rigid forms

and here it is, amorphous
well, let's say similar to the level
something more like a soft Perception
when you perceive form
and you can change it

i.e. you wanted to make it a sphere there
brought it closer to you and you get a sphere
moved away again the cubic form

and that's when you do the management
then the control in this case is as follows
what's next
the further you move away from yourself
from the logical phase of Consciousness
the more precise your actions become

i.e. ask the question
solve your personal problem
which will be in two months

pay attention
I keep talking about my personal task
because i already said

that you work through the structure of universal Salvation
because this is the main principle of my Teaching
we have to work through this

I don't really talk about this in terms of technology
this is already a known quantity

so when you do
solution of a particular problem
rise even higher

and here is where you rise even higher
Well , what do you mean you can move along the body?
by the way, from the heart up
at the level of Perception

and when you rise higher
you see already that the next third month
It is already built in a way that is favorable to you

so, returning from the third month to the second
look at the second month
from the point of view of again what was not there
some possible global catastrophic events

look at the city, for example, let's say
if we take the territory in general, for example there is a globe
or take all external Reality simply all external
and then transfer to management
only for one city

Well, what's the difference?
you control the optics
what difference does it make to you where the events take place
in terms of the Norm

took the whole spectrum that we noticed
focused on one point
at one point they took and defocused

you are the manager

and therefore first do look at the globe
then look at the whole Reality
these points pulled together
there you can even tighten non-linear optics
in terms of this, it's not like in physical Consciousness

this is the optics that is subject to control

The principle of nonlinearity does not even apply here
most likely the principle of controlled optics is applicable
completely unusual
for ordinary physical laws
controlled
in terms of each movement of a photon, for example , even

that's why we made a projection
first to one point
and now we each worked personally
over identifying that place
which needs it
so that through this place
once you have restructured
negative factor of events
all global catastrophes definitely do not happen

everyone finds their own personal place

so we started working
keep in mind that
that you are solving your personal problem
remember this all the time

and started working
I will work with you

Please pay attention while working
what when you work on a personal task
the concentration in your Soul the higher
concentration of perception
the more accurately you solve the problem

this way you move on
to see your own Soul
This is already the third month
i.e. you see its tasks

and when you see the tasks of the Soul
and your own which are in action
you are at the level of Spirit
you can solve the management issue much faster

i.e. after all, the Soul was created by the Creator
have their own tasks

so when you decide
their current private tasks
developed in the logical phase
that is what is done by the Soul
you can quite combine
as if in a general light impulse
ability to manage impulses
in one goal

acting only one or something choosing the component
and acting only at the level

Well let's assume Well there is inner peace

i.e. it is enough to work out in this case
the structure of just inner peace
and you can fully engage in management
just translating thoughts
in terms of implementation even of the structure of events
for example in the spectrum of universal Salvation

Well, such a long phrase is expressed in that
that you just need to do any task
to be able to lead to the task means universal Salvation

that's why I said it specifically
there, for example, is one long phrase
and then he took it and said in short
it would seem to be the same action
but a second later the controls are completely different

the first went through the structure of the Soul and Spirit
the second only through logic

and why for example through
when control comes through the Soul and Spirit
then it turns out longer and logically even more accurate

because often the management of the Soul
must be absolutely accurate

Well, if you think about it
what part of speech are you speaking
at the logical phase of Consciousness
and what part of the Soul

what is in your speech
a sign of the presence of your Soul

Well as if to a greater extent or simply Souls

after all, we proceed from the fact that
that you are a complex person
You can work with any system you want
in the area of your Perception

we work through Perception

so please pay attention
what when you work
at the level of prolonged events
so that everything will be fine in the future

you fixate more
distant level as if from oneself yes
impose on the internal level

and the signal comes more from a distant level
the part where the Soul works
but the signal comes back to your Soul

and it turns out that at the level of action
you get
optical seemingly simple action
you just get your own physical body
and plus tasks
there are yours as individuals
tasks of society, etc.

the integration of these tasks allows
i.e. the unification of tasks in terms of management objectives
accomplishment of the goal
allows us to develop a unique mechanism
well, it might look more like a sine wave
when you swim, for example, underwater and with fins
develop a mechanical movement similar to this one
mechanism
which allows you to enter
in the structure of the third month
precisely into the structure of the Soul

in terms of that
that the Soul has already created events
the most favorable
like for everyone
and for you too

and pay attention
when the work goes Souls
there is no difference, generally speaking

that's why there is the Eternal Universal Creator
created each individual
because there is a level where there is no difference
between personal and general
but at the same time, each one is absolutely individual
this is just more individual

i.e. the closer a person is to the Creator
the more individual it is
in this regard

and when you approach
It's already getting closer to me
although it would seem so You are moving away with your consciousness

then this is the principle
the further you move with Consciousness
for example we looked at the plane in control
it would seem that the distant action is there, tens of kilometers away
but at the same time here in reality
the logical phase of Consciousness itself
she concentrates closer
if we look closer
the logical phase is already further
towards the Soul

the optics immediately slide there
optical beam
beam projection

it turns out the more we try to cover
structure
the closer we get
to the physical body

so if we proceed logically
just from those observations
which we have now analyzed
it turns out that the body
physical body
this is the concentration of all phenomena in general

and then it's absolutely clear
that yes you can take to enter the cage
see any phenomenon

and that's why
in one cell just

and that's why it turns out
what if for example movement well your thought
the movement that you do
and what should it be
exactly, well, as I told you , for example
similar well there on the movement of a dolphin for example yes
exactly in the water

if he
then you move from mechanical action
which is obtained from the analysis
for example, you fix the optics
which moves in a sinusoidal pattern
and this optical as a segment
it turns out that it gets into the structure of your Soul
but as soon as it gets into the structure of the Soul
you already know everything there

the best events are immediately visible
and in principle there is no need to even tighten it up

i.e. they are very good, they suit you
they are most beneficial for you
and this is at the first level

a little later there in a moment
as soon as the Spiritual phase begins to flow
variability is already beginning

i.e. some optical changes begin
i.e. events begin to change somehow
and in the logical phase you start to think at all
and here's what you were doing here
and in general what did you see yes

i.e. all the best has already been
you start with the analysis
influence it

and that's why initially

let's assume if we simply proceed from the task of following
as the Creator does

then originally the Creator
everything was created perfectly in fact

i.e. a little further, here we have moved a little further
in general everything is good, perfect
you just have to start working on management

and here by the way it is very clearly visible
why does it depend on each person
the next factor in the development of Reality
there is an immediate impact on optics
as a private one
and in general

and optics are specific
concrete thoughts
specific cases
specific health condition

and therefore here before moving on already
to the level of the Soul itself, in fact
because I was just talking about that
that we enter the state of the Soul
we enter the structure of the Soul

so here is the transition to the level of the Soul itself
this is what should be united in logic
i.e. closer to the layer which is next month

be able to unite
what's in the Soul
in fact we have almost
as a factor of universality
as well as the factor of a very specific private system

i.e. having examined the body
i.e. a specific cell as part of the Soul
we can see it quite well
that this particular cell
this is also a state of the Soul

and when we already proceed from this
then it is clear that the state of the Soul
This is also the Health Standard

so when we talk about recovery
i.e. about the recovery complex
in technologies of distribution and implementation
my Teaching on Salvation and Harmonious Development

that state
with which you spread the situation
this condition it is also influential

another question
which of course is an emotional state
there are different thoughts there
and here's how to highlight
well, some kind of special state or something
it turns out that there is some kind of limitation
that you need to enter a state
but this can't be done

therefore the question arises
what you need is just any state you need
if it is negative for you
that means they need to be managed
if positive improve
increase even more

and therefore the problem arises
that from any state
make precise control

so that's what is meant from any
but still standardized
i.e. you can't go to the level
when the state is well somehow it's lower
acceptable norm

there is a special context here
which, well, in fact, he basically educates
your management structure
and what does he have to do with it? in general, he brings up like this
what do you mean do management
at the level of formation
next next actually level
exactly according to the educational plan

i.e. the first level that is implemented

well, as some kind of preliminary or initial system
starts working on the next system, etc.
i.e. it is a very rigid cause-and-effect system

and when did you identify the cause and effect system
for example, in a seemingly chaotic level of events
from the point of view of everyday Consciousness

because the concept of "chaos" is not only in that
what is considered everyday Consciousness
that distant events there may be uncontrollable

but also in the fact that for everyday Consciousness, for example,
or even if not everyday
but for up to a certain level , it means something like that
by the factor of Perception of Consciousness
a certain structured Consciousness

so it would seem that everything there is external events
or there are an infinite number of them
this is what looks like chaotic movement

in fact, once you identify
the principle of the so-called educational nature of action
from you
and education is not only in that
that you act like this in front of yourself
that first you educate the structure
then in front of you

the concept of "education"
in this case it refers to both
that you are sort of cultivating the system in front of you
and also self-organize

then the question arises
so as not to make imprecise control
so that control is always precise
first you need to pass on the knowledge
to an external system
and the external system will then be adapted
i.e. it will not be, for example, uncontrollable

and knowledge is transmitted in exactly this way
what does the principle of complete freedom mean
always observed
i.e. if a person wants to, he will master it

another question
what if this knowledge is universal
namely, the universal Salvation
and must be mastered
then the transmission technique should be like this
that this person's free will
should be determined internally
i.e. by spiritual action

he must act with his Soul like this
as he basically always does
but it could be more collegial

and that's why it turns out
By the way, in my Teaching
about Salvation and harmonious development
in the Politics section
I'm just showing it there
certain methods of implementing political decisions
where it just means revealing

Well as if in a political, as if defined , consortium
such a grain of an inner man

where a person realizes himself
exactly as a person in this case
as a person
and through personality
the solution of political problems is already underway

because personality is originally Eternal
Generally speaking, she cannot allow an inaccurate decision
from the point of view of universal Salvation
because its structure is essentially such
from the Creator
personality structure

and when you look exactly like that
for example, on a political decision
it is clear that any decision is again aimed
to the personality of one
and according to the principle of universality
as i said there is space
where did i show it
where one and the common are united
i.e. one personality is united with almost everyone

then it turns out
that we have very precise technology
in such unpredictable for the ordinary
or as for a certain structure of Consciousness
process as a political process
seemingly unpredictable

so having highlighted the structure completely accurately
we come to that
what about the next two months
i.e. this will already be the fourth and fifth month
they are like this
that it is enough to simply calmly fixate
on them means for example, the task of implementation in a favorable direction
and the implementation takes place
from the logical phase of Consciousness

i.e. you are annoying with your logic
in general a remote system

and it turns out that logic is a structure of precision
Well, maybe in more frequent use
it means it realized distant events
you just have to go a certain way
in terms of building optical technology
here, for example , in front of me

I'm building in this case, actually
if on the optics in front of you
and according to the task for everyone
so that it can be conveyed to everyone

and it turns out that by building such
Well in general it turns out to be quite simple
in technological and optical terms
system
we are already coming to the structure of the Soul

i.e. to come to the structure of the Soul
to the Soul as such
We had to go even further through logic

and it turns out that this is the fourth fifth month
especially this is the fifth month from the current time
look through logic strictly through logic
again like in the first month
look

how should events be regulated there

and well for example let's take
concrete, it would seem, but small
maybe yes a private event
let's take the south of Moscow
This is my proposal
and let's consider it from the point of view of that
so that there is no possible global catastrophe
this is already the fifth month
about four days after it started

we take and do it like this
so that it doesn't happen
Well let's say even a small but micro-flood there
from burst pipes, etc.

we just do the management
we introduce concentrated optics there

in management it looks like this
what about that month yes pay attention
when you are already working together
this is already in the space of Thinking
you don't have to fix it
where do you work specifically
i.e. what month is it
where is it territorially

It says that this is the beginning of the fifth month
from the current time
plus four days
and you work

and so that the work does not present any problems
was realized precisely for the universal Salvation
and by the way, to solve your problems
you just make optics
so concentrated
so that the optics you work with
contained all private and general tasks
simultaneously

then it is clear that by adding
one positive action
you act positively everywhere

and that's when you already move on to yourself
you see that the implementation of your own tasks
i.e. the realization of the physical body
it's just to look at the line of events
simply in the form of a certain coordinate axis

and look here
in what month do you need to add it there
or to someone you know
or just find someone
and proceed and heal at any point
if he agrees

so if we are talking about that
to prevent a possible global catastrophe
then you can cure it without even asking

but by and large in the end
it's about gradually bringing it to fruition
knowledge, for example, about the complete self-healing system
knowledge of what you need to be able to do
make prolonged management
to all
this knowledge needs to be conveyed

the task here is this
that you start doing management in this way already
what if we go back to the fourth month
then you see
that the fourth month contains practically
in general, a specific event that has already been disbanded

but to fix it in Consciousness here people
see how the technology will spread
and correlate
for example improve speed up
distribution system

you can see for yourself
how did the disbanding of events take place
for example in the fourth month
and where exactly is this event

so take a closer look
each one individually
when you watch
notice that when you look the other way

i.e. from the fifth in this case you need to look the other way around
go out in the fifth month
with concentration of Consciousness
and start moving here

and here you see
that when I started building the fourth month
I didn't say
that we are building specifically the structure of the Soul
Before this I said that the Soul is so widespread
what could be there Infinite amount of time

i.e. in fact, I turned back time in this case
to the level of that
what in the fourth month
we can build at any level of Perception

and therefore, since any, i.e. including universal, ^{yes}
therefore we can build as the Creator does
and the Creator does so
that no problems are happening

and that's why I haven't revealed the structure here
generally speaking the one that would be
it is precisely necessary for construction

i.e. I do it like this here
that the structure is actually like this
that it has already been built by the Creator

i.e. you see how the Creator did it

in fact you see it all the time
and the task is just ^{yes}
do not deviate from the path

and when I talk about that
that the Eternal Man
^{Well,} Eternal development, harmonious development
this is what has already been done by the Creator
then all that remains is to obtain precise knowledge

and this is the knowledge that I am giving now
they can be distributed
either immediately or instantly
i.e. we took and decided now collectively
This is who is in the hall now

so at the current moment right now
and decided that yes, now let them find out
and that's all

Next comes the Light of the Creator
which completely gives well for example, general knowledge

then another question arises
Yes, we gathered in the hall
came voluntarily and decided
that we need to move towards Salvation
through the structure of direct access from your Consciousness

but the act of good will must come from others
after all, the Creator created everyone absolutely free
and decide collectively for everyone
it turns out that according to the Creator's order it is possible if He wants
i.e. He is involved in this

so it means knowing what the Creator means
it precisely calls for complete freedom of will
all
what can we do
just this decision
concentrate back into the sphere
for example let everyone get it
namely universal knowledge from the Creator
about universal salvation

concentrated into a sphere
and they took the sphere and opened it like this
that the path that the sphere passes through in the form of light
the sphere is in one place
she passes the path in the form of light
to your Soul
to the Soul of each
this is the path that everyone goes through
which builds this sphere for everyone
well, that is, mutual aspiration is achieved
between the sphere
while you are building
how do you act

and it turns out that we create
some kind of multi-variant option
in this reflection

that's how it turns out
what well so called chaos yes
external structure
why is the world so diverse
a certain space of the planet

and because from this point of view
on the Spiritual
already on the spiritual level
we see what is really happening
this is what unites everyone by their free will

i.e. the more multi-manifested the manifested World is
the more free we become

that's why there are many spaces
many systems of Realities
and by the way, from those data, for example
what we are talking about is suppose to be about the situation exactly
what can be created with your Consciousness
you can create matter

then just look at it
at the level of, for example, spectrographic analysis
by optical wave propagation
from living matter
and from, for example, the so-called
well let 's assume it's from silicon yes

then you can see that in spectrography
i.e. when we look at the spectrum
which, well, can be described functionally, let's say
and get the function in action
in practical action, and in a concrete one
for example, light reflected from silicon
reflected from DNA
or from the gene

and at the same time the reflected node
must fall on a specific plate

it turned out that in this way you can see
that generally speaking DNA is primary
i.e. what relates to the structure of the living level

i.e. the next action
this is an action that is, as it were, a consequence

i.e. it is part of the structure of DNA action
the living environment is primarily organized

and it turns out that well , what if we look
building material
for this silicon molecule
is the action of DNA

we simply select one fragment
and the piece of silicon is ready

i.e. it turns out
that Consciousness can initially build
well, in the task of prolonging the future
i.e. when there are very large time processes
there it turns out to be a kind of reverse twist

i.e. first the physical environment arises
and then it kind of develops on it
in a mechanical sense
life

then it turns out that there is a connection
these chaotic so-called processes
with the structure of the Soul
this is what implements
logical phase of Consciousness
in a specific action
in relation to each event

i.e. there is a point
in the logical phase of Consciousness
somewhere at the level of the heart
but located away from the physical body
outside of you
Means well located
in the Infinite level of Thinking
which projects absolutely accurately
and controls with absolute precision
virtually any level of events
and each event

and here as an independent training
find
from the generalized
I showed this point in the Spirit area
showed the logical point

existing in the realm of the Spirit

and I literally pointed my finger at it
here in this area

and it turns out
what if you develop logic so much
that passing through the Spiritual structure
you get an accurate solution
then it will be clear that yes, he is a spiritual person
he gets ^{there fast} for sure
but through a generalized system
through spiritualization
which does not fit into the strict framework ^{there}
^{for example} specific coordinates
how to describe spirituality

and that's why when I talk about it, ^{for example,}
that I describe the system through general concepts
then it is necessary here
to identify personally your own but precise

i.e. the task of management is to
so that in general terms
following only the task
in fact, universal Salvation
^{well} and eternal harmonious development
be able to perform precise actions all the time

thus we come to the conclusion that
what needs to be built sixth seventh month
where you already have a prepared device

at the same time I am now talking about that
that we work perfectly
with a specific level of Reality
I'm always working
only with a specific level of Reality
i.e. this is not ^{, for example,} just a variant of thoughts

as I said about the plane
diagnostics is really so ^{there}
or some element of Reality
he really is like that

i.e. you need to work with Reality
and not with the fact that we, ^{for example,} want to prepare

to work with Reality
then there is a completely different task here

and therefore, for example, you can study for a very long time
prepare to work with some element
but to learn how to work with this element
it takes either that much time or more
or often in fact often much less
often it is generally instantaneous
in understanding time
size

because if we work with Reality
we work according to the Creator's tasks
and then there are no special problems
We master what we need quickly

each person needs to decide
own question on self-government yes
for example Health norm
this needs to be done
either quickly or if it takes a long time
then why is this happening?
why do you need to analyze
always the same process
For what

i.e. answer these questions
if you answer them quickly
By the way, you can see for yourself
that you regenerate yourself quite quickly then

and when the question arises
how to make a person
having many different ones there for example stressful situations
some situations that require a solution
how to make it evolve forever

i.e. it turns out
I've always been healthy in my activities
moreover, the events should be like this
that they actually shouldn't
Well, somehow restructure it, yes
the physical matter of man

then it turns out that here is the answer to this question
is that it should be organic

i.e. with knowledge of the matter in fact
be able to combine all external signals
be able to differentiate them quickly
and be able to them at the logical phase of Consciousness
arrange it like this
to project the signal
coming from external events
got into the right physical structure, for example

i.e. well, it would seem to be a fairly complex task
there is one signal that needs to be studied
it could be a whole institute that could study
and the task of one person
be able to do all of this in a complex and master it

so the easiest option
in this problem
is an option again for the next action
for the universal salvation

and therefore, according to my Teaching
about Salvation and harmonious development
I am a sign of action and the action itself in general
I consider it precisely as a structure
dissemination of technologies Teachings
not only for example there at the level of people's perception

but also to the level of immediate action for Salvation
For example there is the flora and fauna
so that there are no even local disasters

i.e. it is actually management
Reality Management

and therefore having considered
just set the task
consider the eighth month
and not just to consider
and to look at it you will immediately understand
that it should be made immediately favorable
for everyone

first of all look
the further you move away
the more accurately you look at yourself
to your personal events

from the current time the eighth month
so try to highlight it
first revealing himself there

the principle of allocating the eighth month
you reveal yourself

when did you reveal yourself
then take a look
another question how to identify
it just means that this was an external question
in the form of information
so this means that you are considering this task
and there you find the point where you are

you start to unpack, as it were
events around you

no need to unpack yet
because in this case
revealing yourself
this is what ensures
a full range of positive events

i.e. you are there in any case
and so the revealing is actually this
for logic here it is not a difficult task

the logic that is in front of you
you are still there
so what does it mean to identify
it means just look at yourself yes

I can look at my finger for example
and that means I already know it clearly there
about the favorable level of events

a problem arises, for example there strengthen there
if you want to improve as much as necessary
and now in the eighth month
it is possible to improve events in principle
quite intensively

if you want to do predictive management
well in terms of Macrosystems
for example, let's assume large factories
or some kind of state complexes

you would like to work
through a more distant option
for example, after the eighth month, the ninth, etc. there

but at the same time choose
some more distant option
and working in that place means
well, which should be optimized , for example

and then if you look at the ninth month
from the current time
then you need to think about it
that for example, having considered biological processes there
pregnancy normally lasts nine months

then it turns out that this is the height of a person
from the point of view of interaction with external Reality
in terms of exiting the fetal state
it turns out that this level does exist somewhere yes
in the collective Consciousness
that there are, for example, nine months
human pregnancy

then the following problem arises
if at the collective level of Consciousness
is there any information
related to something for example biological
i.e. a normalized cycle

then this information is that
what is the counter
in relation to a person
i.e. a signal from the future
here to the heart

i.e. you see
that this is hard information
and one that concerns the person himself
aimed at its Eternal development
and it turns out that this is exactly what it looks like, yes

Well, if you just take it and ask yourself that
what we need to do is analyze this situation
here we were developing, moving month after month
and suddenly came to the conclusion that such a thing exists

hence
since we came here and received the signal
then this is what it means
sustainable future

in human perception there is always the birth of children
development here into Infinity
it is always a favorable structure
everything related to development with increase
Well, with the fact that people are starting to explore other worlds, for example
start in larger quantities
even in quantitative terms
be realized at least on planet Earth

This is actually very positive information
let's get her there
what if for example there are a lot of people
then the optical concentration is such
that it simply displaces due to the large number
all negative processes

i.e. nuclear weapons
already then global destruction and any weapon in general
does not exist
because really
what if we look at the process
that everyone actively participates in that
so that this does not happen
basically in fact
it will work out in social terms too

it turns out there are more people
it's always better

and now if we increase the glow
from this structure
already to us, i.e. in relation to the heart
we see that the Soul is built in the same way
how is a human being built

i.e. the Soul that we have considered
from this position as if in the ninth month
this is what it represents in the plan
these are like projections of internal Perception
represents a person

i.e. if we want to think about it

how the Soul mechanism works
then we must first look
what are the tasks of the Soul at the moment, for example ?
well, the tasks of universal salvation
so that there is no global catastrophe
this is actually the first task

and try now in the management
identify
that here having found this task
namely, universal Salvation
in the Soul
in a specific place of the Soul, moreover

find the implementation mechanism
in relation to its task again

i.e. as soon as you implement the task
then basically you will make the control Infinite

i.e. start working now
and at the same time when you work
try to do it this way
so that your personal task is realized
as much and as intensely as possible

i.e. try to do it this way
to increase the intensity of implementation
i.e. you are working on your personal task
and try
so that the task is completed faster

and I will work with you

in essence of current management
the task is
that using in fact a huge resource of the Soul
i.e. having the opportunity to observe the facts
For example there is self-healing
complete regeneration
remote control
diagnostic of some action of the Soul
for example, diagnostics of equipment
Salvation of some global systems
types of nuclear power plants

seeing such possibilities of the Soul

the task is still that
how are these ^{actually} power characteristics
be able to make it controllable
and be able to make it manageable
from the point of view of current logical tasks

that is why I repeatedly draw attention to this
what are the tasks of your Soul as tasks of personality
may be considered by you
taken into account in the implementation plan
looking at your Soul
as an independent system, ^{yes}
in terms of world order

i.e. the Soul has the right there
regulate the management structure itself
and actually simultaneously decided
at the level of both internal agreement with the Soul
that's why spiritual harmony is important
there is such a principle
inner peace of mind
when you are in harmony with your Soul

we are at the level of this internal agreement
we can fully implement it
and the Eternal Body
and Infinite Development
and ^{generally speaking,} that civilization will develop like this
that gradually or sometimes immediately if necessary
people will master
it is the technology of working with the Soul that is actually

when the Soul is created by the Creator
for Eternal development
and Eternal life including the physical body
gives control of the Infinite type

i.e. Infinite
when next each element
is being reproduced
and the preceding element
he really is like that
that he shouldn't ^{in general, in essence}
to call for restructuring after all
^{for example in terms of that}
that some ^{diseases may} arise

i.e. this is an unregulated level of development
in fact and therefore
from the point of view of Infinite development

in the tasks of Infinite development
we must ask the real question
that's not what we're saying there, yes, it would be good to develop
but in this case I still say
that we work only with Reality

the task of Infinite development
therefore now is the time to start
have mechanisms, for example, of complete self-regeneration
at the current time

we need to do this now
so that multivariant systems of future events
were almost completely under control

so this is where it comes in
already an element of the tenth month
and by the way, here in the Consciousness of a person
there is such a principle as "in the bull's eye" i.e. exactly

so it turns out that this is the principle
about tenth let's say months
it consists of the following
what 10 yes 1 0
if we turn right
0 before 10
well in the numerological system of Consciousness

then the light coming from the number 0 for example
next 1 then 0
it's not really fixed, right?
Infinite Light
and because it goes from 0

but when he turns over here
for example 0 1 it would seem closer to itself yes

but we can't create a negative axis
we can't in this case
in Consciousness, as if numerological systems or something
optical phase of Consciousness
we don't create a negative line of events here
i.e. there is no movement here

in terms of reducing concentration, perhaps?

if we assume forward we develop
and we have some kind of resource that is used
i.e. looked at the optical element of light
we somehow looked somewhere
some coordinate systems
it would seem that some so-called energy was spent there
or they saw something in the optics
some movements are happening

we see and generally speaking we can say
what yes here because of this action
the optics became less luminous
the glow dissipated somewhere

so here in the tenth month
the glow is practically not recorded in the scattering
that it is constantly concentrated

pay attention
just watch the tenth month
from the current time
and it is clear that in the tenth month
we have a fixed glow

and in principle this is a fairly strong level
including knowledge
i.e. fixed initially

why by the way the system
that's exactly the basic knowledge , yes
Classes usually start in September

because if we take preparation
to the reception as if well, to the active development of knowledge
It's better to start in September

for example we start in the ninth month
some specific acceleration as if an entrance
as in the structure when we entered
into the structure of the Soul
in the Soul phase
a specific input is carried out
and we get in the tenth month
the most powerful impulse for knowledge
knowledge is stored there

let's assume according to the program for next year

so that's why well having analyzed this fact
it turns out that these monthly cycles
are still largely structured in this way
that there is taken into account a sort of standardized system
stable phase of events

if we move to the structure of analysis
i.e. well, we found it in the surrounding phenomena
any one sign that says that
that we are generally developing in a regulated manner
i.e. we know the Laws at certain levels
is it just common practice?

then it turns out that it is the eleventh month
By the way, this is already something we can change

why did i say the ninth month
in this case I said it was September

pay attention
that I started in December
then it turns out that the ninth month means
must be real
for us it's August
since i'm talking about december now

and it turns out that here I transferred control
to the usual logical phase of development of months

and that's when I transferred this phase of control
I did it so that where it was implemented
translation without words into the area of Thinking
I just sort of archived the entire system of knowledge
which was received today specifically

I took everything that was received and how I received the archive
due to a simple shear system of layers

it was precisely one level that moved to another
because it exists
and there are nine or ten months
the tenth month is october yes

but at the same time September is the opposite
in our system it is the opposite - the beginning of knowledge

that's why i've been saying since december
that we can lay down a very powerful
the system of technologies of Salvation
and harmonious development according to my Teaching
Thus
what we can already lay down now
then the system is well generally speaking of such a dynamic magnitude
as if coming from an inner desire
Save everyone
that no matter what
in relation to which month are we talking
generally abstracting from months
and spreading to Infinity
we can lay this system down now
and it is quite possible to see it as constantly active

just go out into this one
in this like emotionally controlling wave
state
this is the state of Reality

i.e. when you are in this state
there may be instant tissue regeneration there
very strong restorative processes
i.e. you are actually there
as a sign of complete freedom

those. your soul is free
you create
and then events become very precise

that's how it turns out
in fact, it's already been eleven months
I came back here already
but it's not far from here
i.e. I am practically on the border
with that month, the twelfth of which I speak

and here the principle of complete freedom is revealed

that your Soul management
your control from the Soul
specifically about the Soul, but for example there are holidays
that's why they celebrate New Year there
and therefore the management of the Soul
this is what happens even according to status

Well, this is a holiday, congratulations should come from the heart

and how do you look at this situation in this case?

Well, you're fast-forwarding a year.

everything is fine, for example

do management

and control comes from the Soul

for everyone

in this I have now fixed the point

what can we have

in fact so is Infinite Control

what difference does it make to us

Well, you can do it ten years or twenty-five years in advance.

Just make the controls like this now

look twenty five years ahead

and at the same time

just transfer the model controls there right away

which I have just told you

as soon as you transfer

forward control model

for example in twenty five years

it is clear that all the events that will take place next year

you need to highlight them and generally speaking

in terms of precisely preventing a possible global catastrophe

improve so that it doesn't exist

as in any case there will not be this global catastrophe

then you need to do it like this

so that you can highlight specific events

so it's better to do these events

through more remote areas

controlled

i.e. you enter

into a more distant structure in time

i.e. you are in greater contact

with, as it were, the original level of the Soul

because in the Soul created by the Creator

the concept of "time" as such is absent

for the Creator there is no time

and you just work through the structure

Well, that's the sound
or like some kind of piercing sound of precision ^{yes}
so you take it and transfer it here
and make management from anywhere
i.e. it is ^{like} the second, next level of control

and thus we can already move on to 2004
at the beginning there were already speeds
please note that they are increasing

as soon as you take control
on private and according to your own tasks
already in this case
where the task of universal Salvation is already included
you see that further on it is actually easier

it's just a technological question
so why in one size or another
well, do some long-term management

and if you have identified a spectrum of events there, ^{well}, yours personally
or for global security such
what do you need to highlight
^{for example}, enough time to standardize
some system in front of you in the future

then here of course we need to work more
i.e. why is it useful to work after all?
for the distant future
because somewhere if you find out
You actually have a lot of time
you can add every day
generally speaking, just a regular construction material
in order to align the event
^{well} the same applies by the way
to the elements of health restoration

if you are considering
that somewhere you need to do a restore
yourself ^{for example}
Let's start with ourselves now
look at least up to 2004 beginning

and look at some points
in front of you

where they exist in front of you

in some approximate month at least
there 2003 or 2004 beginning

see what you need
do it now
so that well For example recover there
and the point can be there
or just healthy yes
or there might be just one point

well, that is, it's not
and what we are talking about is that
that's why we need to add a little bit of optics there
to yourself and ahead
just to have the norm

if there is a current question yes
which needs to be restored
then in this case it is simply necessary
break it down into elements

and it's better to lay it out
in terms of self-healing
for example, an element exactly as I just said

first element
logical phase of Consciousness
where you set the task

the second element is the Spiritual plane

the third is the structure of the Soul

and highlighting the phase for example well possible or current
some kind of well For example there are diseases there
or maybe you just don't like it
some state

by distributing, for example, into three such levels
you can see it calmly
what Soul
you can structure your Spirit like this
and the logical phase of Consciousness
simply by moving the volume of the Soul

pay attention
This is a powerful restorative complex

just moving the layer
optical simply layer of the Soul
lifting it up a little
you create a very rigid structure of Spirit and logic
where you get the exact solution
correct actions
and solve the problem in principle
but mostly on our own

but in general the task is to solve
only by our own efforts
i.e. be able to completely regenerate
to be able to recover, for example, means
and be able to build events

that's why it turns out
what well for example, if we talk about that
that one individual person yes
he can learn a lot there
or it can be completely restored there
there For example Well, to have perfect control over the technique
for the purpose of universal Salvation

then as soon as it appears in front of him
a person who cannot own
kind of moral duty arises
and the glow still transfers
control phase

i.e. the task is to teach another

and therefore the more the other learns
the bigger it will be
by the way, the one who passed on the knowledge
will be more well does skill increase from this?
In fact

so when it comes to that
that when I spread my Teaching
about Salvation and harmonious development
through the so-called unconditional systems
when this happens anyway

optics is what shines
since it shines
then it turns out that it doesn't matter

someone who seemingly doesn't have the technology
there to the extent that there is another
more professionally proficient
he still receives the light of knowledge
the one who is more professional

i.e. it is always better to become more
i.e. to earn more using the technology of universal Salvation

that's why i think
that as a very specific task
try when you will implement for example
well, the same thing as preventing a disaster
or when you will do the implementation like this
what you need for example to concentrate the word
in order to implement

often word
must be so concentrated
so that it does not express
normalized structure of negative events
or, on the contrary, expressed it more harshly
normalized structure of a positive event

try to work with words
Well for example, you can say there
let's say "catastrophe prevention"
or you could say "eliminating the cause of the disaster there"
but look in what case
what better way to say it
i.e. and how to say generally speaking

and so take a look
why some words
may sound well maybe not quite accurate
as necessary
from the point of view there are norms
try hard
from such ordinary sound standards

try to put words if necessary
as is necessary for the universal Salvation
and try to do so
so that words are the control element

and basically if you pay attention
Well for example, writing out control type information

You can often see that some words
they are located

Well in general, not in the usual lexical sense, I suppose

and they are often found like this

what in general for example there grammar

even say let's say so the syntax and punctuation

there we can see

that in general words are often

have to be moved to other places

which are not logical from the point of view of the basics of the language

to translate into ordinary language norms

if you want to correct the sentence

under a sort of lexical grammatical basis

or even the syntax yes

then we need to make translation systems

i.e. to be able to translate

and if you write a New Year's card there

then the translation of the task, i.e. the state of the Soul

where the words may be generally arranged differently

into the logical phase of Consciousness

this is spiritualization

i.e. the Spirit that makes the text well- standardized

better of course to a greater extent

focus on standardized text

but that is not really necessary

but take a look anyway

how does spiritualization work

when you pass on knowledge

and for example even to those people

which well let's assume first time there

can perceive some material

this is also the principle of spiritualization

as if a certain level

what about conversion of text systems to speech systems

and if possible now

when did you listen to today's material?

I've been talking about specific tasks all along

work with private tasks yes

make quick task control

let's say also powerful control
immediately took and applied today's material
which you listened to

there is a sphere
put on top of the tasks
we did the optics again
glow from this sphere
and when will you be working?
Well for example, on an individual basis
or in groups

try to do it this way
so that here is the sphere of universal Salvation
which is an absolute factor
i.e. it always exists in the technologies of my Teaching
about Salvation and harmonious development
to observe it from above
at the level of the Soul, it is necessary
over all elements of his private management

i.e. this is a special task
at today's seminar levels
where, as if in the lecture part, I said my part
and you worked as a training seminar
on one's own

place the sphere in the Soul area
and look
that logic in this case is the same Soul
but you have highlighted the logical phase in it

and try to work like this all the time
to be with today's material
the one I showed
path to future events
you had a favorable calm

and I showed the technology
how can you, well, as I said, how to educate
future information elements
and then there are no conflict systems

and at the same time you can
Well generally speaking, as much as you need
there, for example, to recover

and as certain

Well or some favorable data for next year
try your best
or there were already years before 2004

try to work through the following
there for example there are twelve or fourteen months
from the point of view of this technology
and if possible, yes, decide
your questions are specific after all

and the task of universal Salvation is in that
what if you're there in fourteen months for example Yes
do you feel okay?
and you have normal events
therefore yes, the Earth is definitely not destroyed

i.e. keep in mind
what is behind your personal practice of each
the Salvation has already been actually realized
at least to that level
where do you mean yourself Well, you are in a favorable condition

so it's better of course
in general, it's just easy to work in the Infinite Future
and constantly do it
that your events are favorable

on this
I am today's seminar
I'm finishing

thank you for your attention
