

GRIGORY GRABOVOY
The Teaching of Salvation and Harmonious Development
Methods of work of the Soul
for control through the Spiritual state
31.01. 2003

Methods of work of the Soul
for control through the Spiritual state

we are talking about the work of the Soul
perceived as a dynamic system
and the management is carried out
through it is precisely the state of the Spirit

therefore, to work on this seminar
it is necessary to have it right in front of you
bring out your specific tasks

for example, there is a table in front of you
and that means or some space
try in this space
fix in the form optical glow
some of their own specific tasks
that need to be resolved

and as precisely the level of universal Salvation
exactly the level where this Salvation is achieved
must be fixed in the form optical glow
consider the level
of your specific Soul

i.e. to consider what and to see in general
where is your soul
and how is your Soul in general this level seems to hold
i.e. this is the fixing state of the Soul

i.e. we first record the state of the Soul

to make a dynamic system
control system
we must first fix the state of the Soul

and here is the work of fixing the Soul

This is a special job
which is primarily based
in action

because when you consider
for example the action of the Soul
then you first have to be on something generally speaking
means to fix
namely the optical system of Perception in general
of this Soul

and this is the system of Perception
This is your personal task

i.e. today at today's seminar
as a reference point
is being considered
it is precisely the sphere of solving personal problems
where solving personal problems is natural
and the solution through the structure of universal Salvation
because the next action
everyone must be saved
at least there should be
elements for solution

therefore, as the existence of elements for the solution
here again the fixation of the Soul is considered
i.e. in the future the Soul creates an element for the solution

and then it is clear that we have control
which explains it quite simply
why at the current time
we have, let's assume, exactly these tasks

here before we do task management
we must identify generally speaking
why at the present time
that's exactly how the tasks are arranged

and this is like the next state of the Soul
the following fixed positions of the Soul
this is what indicates the reason for the current state

i.e. the reason for the current for the Soul
this is the future
I introduced such a concept as the future from the point of view of the Soul
and I introduced this concept into the optics of logical methods

through the tasks of solving your personal problems

and that's when we make a decision from the future
what it turns out is that this is the task of universal Salvation
it's actually already been solved
because in order to prepare generally speaking
at least an analysis of the cause
we must first decide through the future

therefore, as if it were a fixing point
through your Perception
in this element is that
that we have such
here is actually an element
that the Soul can organize
almost an event
through the structure of the next point of its location

then if we for example Well as if simply
let's expand and extrapolate this
on the phenomena of physical Reality
then it turns out that if we have
for example, the action of the Soul at some point
For example there is equipment diagnostics
healing a person
maybe at another point
or for example, solving a personal problem

then we get that the personal task
if we do something, it is also our personal task

but personal problems that we solve
as if in front of myself
this is what concerns us, for example
but if we do anything at all in management
then it still concerns us
although there may be a peripheral task there

i.e., for example, to make it so that in some region
well, there wasn't even a local catastrophe
if possible, if there is time to do this

it turns out that personal task of a personal plan
intersects with Eternal action yes
directed at some other state may be

so here I think it is necessary to consider

what is Spirit
state of the Spirit
in conditions when the Soul
doing specific actions
and the actions are completely explainable
from the point of view of action from the Soul

i.e. You can work with your soul
The soul can be oriented this way
so that there are fixed states of the Soul

so here is the Spirit that is comparable
with this action of the Soul
with this work of the Soul
he must also be the governing Spirit

i.e. the glow of the revealed, as it were, segment of the Spirit
fixed in optical phases state
it should be a management that regulates events
according to the tasks of universal Salvation

and here is my Teaching about Salvation and harmonious development
I introduce an element to transmit the knowledge of universal Salvation
exactly this element
that each level of Perception
for example Perception of the Soul
Perception of the Spirit
these levels they act on the same
actually a personal task

i.e. for the target task
and generally speaking along the line of feedback connections
highlights you personally
i.e. you see, for example, your physical body
walk through [...] concepts

but the physical body that is being organized
i.e. the physical body up to, for example, the level
organizations there in the next action

let's say in an hour
what does the physical body look like in general
in the current tense
if this is such a somewhat paradoxical question
put

it is clear that it can look the same

but you could be somewhere else
and other dynamics
maybe you changed the position of your hand

then it turns out that it is possible to say for sure
what does the physical body look like after an hour
if the task there is to connect a certain system
let's say we take a tangerine in our hand, for example
and put your hand on the table
and sit like this too yes
in an hour your physical body will look like this

but if we are talking about that
how to fix the Soul also rigidly
to ensure a completely manageable future
then here the element is precisely fixation
is the state of the Spirit that controls

i.e. here as a substrate actually well like the basics yes
in this case it is used
for event management
dynamic structure structure of the Spirit

if we consider the concept
dynamic properties of the Soul
then the Soul is actually a dynamic system
with Infinite speed
at any point
we can be as if
with infinite speed at any other point

if we take
and through the system of Soul Perception
precisely through the optics of the Soul
we enter , for example, at the point of this table there
somewhere near the table
then we are at the same time
anywhere else in the world
at the point of for example Thinking yes

i.e. it is a point of, as it were, omnipresence of one action

and it turns out that's why I started talking
about the fixing systems of the Soul
because that's what happens there
that the Soul is always fixed
where did i come to this now

I just do it because of the logical connections

let's find fixing positions
and then we will create these positions
work of the Soul
governing state of the Spirit
and control already goes through the Spiritual basis

but if you think about it
what how is the management carried out then
it turns out that control is carried out
in general it's not that difficult
it happens naturally

because the Soul is like a supporting level
if she has a strict position, for example
for example, well for example at the optical level

it is clear that any investigative systems
this is no longer the main action

after all, we must proceed from the fact that
that the Soul being here in some state
always must save

i.e. in fact, this is a training of learning
even with the slightest movements there are Souls in optics

or for example when the Soul moves
towards some development

for example how to create a civilization
which would develop infinitely
in completely different worlds there
but nevertheless it would not self-destruct
provided there is an infinite development option

it turns out that you can do it here
achieve this control
in the event that we any action of the Soul
let's do it well as if infinitely creative

it turns out that
so that this action is constructive
Well how would you do this if for example there are
nuclear fission reactions
i.e. there is a possibility of a nuclear explosion there, etc.

chemical meteorological threats

it turns out the Soul must resist
simultaneously

and here is the counteraction element
so that it doesn't come true
there is a system of existing threats
and then it would be minimized
or should be excluded altogether
and she will be excluded

we must proceed from this
that here is the action of the Spirit as an infinite system
which is expressed by movement
this is what is well as if an intermediate link
between the state of the Soul
precisely by fixed values
actually Souls
you can look at it in the form of a digital expression
and what happens in physical Reality
i.e. Spirit as a connecting link

The spirit that has knowledge
as from the Creator as for example from the structure
organizing this Spirit there already in the investigative system
from the Soul
but the Spirit is simultaneously organized by the Creator

therefore it turns out that we come
to the element of simultaneity

if we consider
for example, some kind of technological system
there is a car
man created the machine
and at the same time man was created by the Creator

therefore the action of the Creator is in that
that yes man learned to make a machine
but the Creator actually organizes the World
molecular level in general
why doesn't the car fly apart
i.e. the action of the Creator yes

and it works in any action
exists

as an act of the Creator
and the action of a system being developed

and that's when we develop the Soul
in terms of the concept of "development"
This is actually a fairly fundamentally important concept
Be careful here

development of the Soul
this is essentially a colossally strong level
in terms of well as if overcoming information

because the density of information in the World
these are often static systems
and here is the development
this is a radical change in the established structures

and when we talk about the development of the Soul
for example, this is not quantity, no longer the development of Consciousness
because Consciousness is an investigative system

and we work through Consciousness
therefore the development of the Soul is actually
Well as if in essence an increase in volume yes
or let's say in mass terms there is optical mass
just the masses even

and when in due time we consider
well there let's say if in a lecture plan
consider the option
actions of the Soul
works by Soul
then we can talk about known concepts
that "The Soul knows it"
development of the Soul is what really develops the Soul

then it turns out
how to teach a Soul that already knows everything
i.e. in the Soul there is all knowledge
so what is the concept of "development"

and here you can approach it firstly simply mechanically
precisely in the expression of optical control

what if we take and consider
next state
then this is the development from this place to this place

and here is the concept of "development"
that's what really pushes it
how does it even move
one structure to another
or one is saved we put another

so this is a kind of mechanism
Well, well like a rotating element of information
this is also a state of the Spirit

i.e. in this case we are considering
state of the Spirit on optics
as a system that develops the Soul
maybe just developmental
in terms of location
well some kind of mechanism

i.e. how do we work with the Soul in general?

it is clear that the Soul is infinite
and then such a level arises
If it is infinite, where is it moving?
and what moves it anyway

and here the question also has a very simple answer
The Spirit differentiates the position of the Soul
i.e. the dynamic system Spirit ^{yes}
which moves which is infinite
constantly connects
element of physical Reality
or is it connected with the Creator, as I said
The Spirit is also reproduced by the Creator
at the same moment in time

this element he reveals
where is the Soul now
where is the optical line of the Soul now

i.e. well if you look at it this way
let's assume there is a ray of light and if steam
then the steam dynamics of the steam is doing
if there is no steam then the beam of light is not visible
although it still exists

the same thing exists
objective Laws in Consciousness

which speak of a distributed level of optics
which characterizes the Soul

and here is this distributed level
it is also characterized by certain properties

now we have to apply these properties
in order to from a number of concepts
here are quite a few complicated ones by the way
consider
that development is real development
not in a mechanical sense, but simply

why i introduced the concept of "mechanical understanding"
just if we are talking about optics
it's just like a mechanical movement of the beam

and in general if we talk about development as such
then you can see that the Soul has developed so much
so that any event is normal

i.e. it is obtained at the level of events
what we I notice for example Well, you can get action there
in the structure of some mechanical property such as a nuclear power plant yes
and it's so good to know in order to prevent an explosion, for example Yes

but you can take this same level well as if information
which characterizes the next level of fixation of the Soul
namely the optical level
just take it and move it to this level and that's it

then it is not necessary to study for ten years
i.e. the meaning of this management is adequate
for physical Reality

and if we look why then the signal to the heart
who says there "yes, we have to work hard
and you need to study a lot
for example, to prevent something from happening"
and how with such an elementary action
we achieve the same thing

so if we look at it from the point of view of the Creator
then for the Creator any action
firstly equalized
every event has a well as if equal rights
there in the next development

and in connection with this, mechanical actions
as well as intellectual actions
they are equal

i.e. you can study for a long time
or you can just make mechanical control
just knowing where the control phase is

then it turns out that the actions are equal
in terms of well as if achieving a goal
and also that all people
in a certain way they recreate themselves, including
besides the fact that they, for example, Well let's say they think
that there is some automatic principle
their next development

then we take
a very large number of complex concepts yes
and we bring it to the level of our particular task
problems simply put

and that means we take a large number of complex elements
let's assume we take a lot of technologies of some management
all this is simply introduced into the sphere
and put the task inside
then the more technologies you know
the faster your internal problem is solved

so that's why the task is like this
Well as if it were a system of recording Reality
in a philosophical sense here

when does Reality exist
when there is a task at all
if there is one
then it is possible to somehow unify current processes

if we, for example, start from this level
i.e. we look at Reality as if from the outside
from what exists here
and it perceives its task
then we can say that the world is not destroyed

and if for example
well, diagnostics, like self-control, yes
when the world is not destroyed

if we proceed from that
what if we can set a task
that the world will never be destroyed
if we work in this common ^{area}
in this regard

i.e. the fixation is mechanical after all, ^{yes}
fixing the state allows you to save the World

we can record the state of the Soul
with such destruction
and stew ^{as if} in your own this
in the sphere of Thinking
and it turns out that the World always exists
it's just that we can always set a task

in any case I can say there
what if I take it there and to Infinity
I set the task of Eternal development
therefore the World is definitely not destroyed
because I set this task

and we get that if we analyze
how do we set tasks ^{yes}
and what is in Reality
then there is a match in tasks
that's why there is always an answer
somewhere there complex equation
or is there always a level of positive decision
in any task

it's not just there
^{for example,} not from some kind of disunited chaos of space
in fact, these Laws are in Consciousness

Now we are analyzing these Laws
which allow us to take action on our own
get precise control

as you can see i keep everything together all the time
to personal action

and what personal action
there are tasks ^{yes}
let's think about where these problems came from
what systems of influence exist in general

for your tasks

for example, here is the scope of tasks
as if a sphere in itself

if you consider
what to solve the problem
you need to go somewhere down the street
and something can be said, maybe on the phone
or do some physical control actions
through direct control technologies
well, which you are currently mastering

then the question arises
for example external task
which fits together as if yes in other people's affairs
they must also be creative
they were born somehow

how at all if you know how to do it
absolute control
then this is what we get: external control
where did it come from in terms of your development

i.e. who are the other people there are other events
what is external Reality
in relation to the sphere, as it were
sphere of control
a sphere of tasks that is in itself

so here is the external Reality
this is also a spiritual state
if you remember this system like this
then first of all the external structure
perceived
at the level of sorts Well let's say there is a morning fast perception
as a certain spiritual state

i.e. external Reality is the state of the Spirit

i.e. the Spirit itself gives birth to external elements
if we expand the sphere within itself
i.e. we say "yes, all external phenomena
kind of create for ourselves
in some state"

so if we, for example, develop further

then for the Creator
which makes the system absolutely stable
and it is the Eternal development system

the concept of Eternity of the human body
is that a person can
define system as local

i.e. as I just said [...]
and into the general system
a person perceives information from the outside

and that's when differentiation begins
that there is some information in the World
and some seem to know for sure
that we can, for example, do some actions
take something there to write
we know this for sure

and at the same time precise action
and the action is as if well, supposedly not controlled
somewhere they overlap each other
at some level of Perception
at some level of Reality in general

if we distinguish in Perception
full level of Reality
and we start looking for the compression point
then we get a very simple thing
what do we see generally speaking
as from external Reality
the human body is organized

in this way
and your personal
so that the external environment
it is dynamic

i.e. it turns out that the connecting system
here is the level of mutual tasks
I just said logical tasks

i.e. since there are tasks
someone does something, tasks are set
there is a human body
there is an external Reality, etc.

and then the question arises
Who sets tasks and why?

if for example to answer this question
Well as if abstractly there
there is some service that is local there
sets some tasks
then this will of course be a private answer yes
it is within the framework of even geopolitical development

but there is always a level when you need to seek the Truth
answer from the Creator i.e. the True answer of Truth so let's say Yes

The truth that answers
but when Truth answers
it correctly ?
this is where the question arises then
which forms the very concept of Truth

when we talk about the Creator
then we are really talking about the Creator
who created everyone
i.e. about God

when we look
How God Shapes Reality
we see that there is a task
again we come to the same thing, by the way
that the task is again one of universal development
the task of universal Salvation, etc.

i.e. God's task is very clearly formulated
if we start to analyze
state of consciousness

For example , I say there My Teaching
about Salvation and harmonious development
wears if we start to detail let's assume yes
how to decrypt unpack
the word Salvation
we are talking about universal Salvation, etc.

if we talk about why, for example, I consider
Well let's say the task so what I'm saying is
I give such and such technologies for universal Salvation
that is why I say that this is my Teaching on universal Salvation
it's like this

for example, the Teaching of Salvation and Harmonious Development
this can be said
on the other hand, it is still universal Salvation

i.e. we mean that the technologies there are specifically mine
which I personally tested there
that they can be used
and you can learn
this is the level that allows you to see
what ^{well there} he expressed it, it would seem , in a simple word
Yes, we all need to be saved
it would seem that there is only one word: "to be saved"

but at the same time they imply
what is necessarily Eternal
there must be creative harmonious development there

i.e. all these structures are laid out quite clearly
in terms of the fact that they simply exist
as an objectified Reality
in general, this is precisely the task of universal Salvation

i.e. I'm already starting a question here
that they firstly exist simply by themselves
secondly, to make universal Salvation
then you exactly in a short time ^{yes}
in any case, everyone will be saved
we still need to put this in the form of ^{something like}
a task that comes from oneself

and that's when I see the information ^{well for example} words
in the information you can see the same
how ^{so for example,} any element of Reality

and the word also exists and by the way even more harshly
than ^{suppose} another element
it can be influenced ^{yes}
the word it has a closer connection to the Creator
structure

when ^{for example} a word that formulates [...] a sentence
starts implementing some control element
it turned out that the structure
primary structure of word perception
the primary structure is the state of the Spirit

i.e. when you perceive a word for the first time

and every first time he generally speaking mine
the principle of individual development from the Creator
that word has a specific meaning
or generally speaking, the maximum rigid structure

that's why children often think
that the transitional level of social development
is when he starts talking for example Yes
develop precisely
or something there you should start reading yourself
but the most important thing is to talk

so this is the conversational level
when can he reproduce
what he actually sees

if you predict the child in essence
he says a word that he knows
many children say words for example often
which well they heard somewhere
nevertheless, for example, they say

i.e. if we predict
Well, maybe they themselves don't attach any importance to it
however, if we analyze it initially
how does a word even exist in information
is being converted
why are there different languages

It would seem why not come to an agreement there
they would have unified the language there
there were some negotiations
at one time some standard unified language
create
I even remember how I studied at university
there were proposals in the form of reports there espero, I think it was called
create a language yes Means

nevertheless there were even symposia
but nevertheless, it was as if the language was firmly fixed
and the next setup is quite difficult to build
in the intellectual level of reproduction
for some reason it keeps getting fixed
at some level

but there is a language that was before yes
early geographic environment

which for example, it is not used now
let's assume there is Latin [...]

i.e. if we consider the statics of Reality like this
what is Reality is a certain contact system
for example language in general

then it is also manifested here
aggregate statics of fixed states
generally speaking in this case the people

i.e. people use words, for example
or some specific letters or language, for example

so it turns out that when you look at all
people who [...] more than just words

statistically this is an extremely rare statistic
but there are people who, for example, are closer there
uses more than some words
and the northern one says it's just like that
I say uniqueness here
as a rule it manifests itself [...]
in case of a possible, let's say, global catastrophe

then the manifestation of some one word begins
and here it turns out that the word
as a compensatory system

i.e. we have it actually turns out
to solve your problem
very very powerful system
powerful system

i.e. if there is a question if we can reproduce
let's assume even verbal information
we can do quite a lot of management
sometimes absolute in terms of solving the issue
because we work
on already rigid, as if fixed
already built systems

if we simply distinguish these systems in Reality
let's differentiate
Well for example there is a big forest
if you need a path somewhere
then we will go to that place

where do we need to go

and here is work on fixed systems
which are interconnected with dynamic systems
This is what we talked about at today's seminar
when you do work

it means actually recording the state of the Soul
and at certain geometric points

let's assume in front of us at some distance
in first place

for example, 25 centimeters is better there

then 25 centimeters again beam

and between these states

then there is an informed Spirit
who is informed because you can
the first part of the seminar that I told
more in the lecture plan

so this part of the seminar
use as information
which is a state of the Spirit
from a management point of view

and here are the control parameters
I often don't give everything as an element of action
well, to put it simply

if possible, take the state of the Spirit in this way
so that the control would be as follows

there is a vertical or maybe inclined level

it means the first one fixing the position of the Soul
the second one where the Soul actually organizes the event

i.e. the Soul organizes your events
which must be positive
and you work from this side
again with the Soul
but already with events that need to be corrected

i.e. it turns out that you are modeling
tasks actually
when your own events
on the one hand they are decided in the Soul
and the already solved values are summed up as follows

what are you supposed to work with at this point

i.e. in fact it turns out ^{that}
from one Soul
two actions

and here in one action, as it were
in one place
this is what is your problem
and what you
already a solved problem
and what is located
the bearer of all this is the Spirit

we must share
what is Spirit
what is action
and what kind of optics are there anyway
i.e. the Spirit is a mobile optical medium

so take all your problems
select the Spiritual sphere
and perceive the state
when the Soul has already solved the problem ^{yes}
and then the Spirit begins ^{as if} simply on everything
^{how to} develop the situation ^{further}

i.e. in fact we are talking about
that is the very concept of "substrate"
or there is a "base" on which the action takes place

i.e. the very state of the Spirit
this is what makes the next positive development
in your Perception
something that ^{kind of} positively develops you

if you work with words
i.e. you can just talk about it in this regard
what should be the norm of such and such an event
bring out between two beams
namely the Souls
where the Spirit is the basis, ^{as it were}, of a fixing system

and your tasks are solved precisely in the Spiritual sphere
i.e. the state of the Spirit in this case ^{is as if}
the mechanical state of your Perception
just spheres

so you will do such training now
take it then Well as if a state of the Soul
until the problem is solved
state of the Soul
after
i.e. including after
fix, i.e., as if rays

take them and put them together
and so that the vertical one let's say light
which fell
to your problems that you have now
and in the aggregate, as comprehensively as possible

i.e. after all, a person always decides questions on the merits
i.e. comprehensively, not just one next
as a rule there is one, so to speak, most important task

but if possible
highlight the essence of integrated management
what is possible in this sphere
highlight the main

and combine the two fixing levels of the Soul
put it vertically
as the Creator does, the flow of actually his own Soul
and let the solution of problems
will go in the Spiritual sphere

those. solution sphere itself
this is a solution through the Spiritual state

i.e. you know that this is a Spiritual state
but you may not differentiate the condition
you may just know

this is what clairvoyance is
you can know but it is not necessary to experience the effect
how to feel how a micro nuclear reaction works
it is not necessary at all, it is often impossible
convert as if into Perception
as if the cell sensed something there
this is generally not necessary in a practical sense

so if we need treatment please Yes
if it's just how the cell feels

Well, you can watch it
how does she feel but why

and that's why the question of action in general, why yes
action
try here you just kind of perceive
state
governing state of the Spirit
but at the same time, well, maybe you won't get a signal
how does this state feel in general

here is, keep in mind, clean , well , as it were let's put it this way
the science of management related to that
that we try to work in Perception
in this case we differentiate the signal
as a status signal

then we work with the state
well, in principle, some abstract work
through the optics of Perception

therefore you put it again
vertical levels of management
connect, for example, with the state of the Soul
it turns out to be a vertical column
connected level from the Soul side

and the task becomes the realm of the Spirit

the sphere is the reference point
for this beam
which is characterized
precisely at a combined level
fixing the task of the Soul

as soon as you get this sphere
let the action happen to solve your problem
specifically the one that exists now

you can add, for example, the tasks of the hall
tasks of universal salvation
who will watch further, for example this seminar, yes
in the form of a video or in the form of text, etc.

i.e. solve these problems now, solve them harshly
i.e. purposefully
try to do your tasks based on this area

start solving and I will work with you

at the moment of decision try
tasks as if not to release
for the sphere of Spiritual Administration

the state of the Spirit is the solution to the problem
but this is also an unresolved issue
i.e. don't let her go down until she decides
i.e. it is inside the Spiritual sphere

and by the way, if for example, well, remember different places
not related to the Spiritual state
that is the Spiritual state or the state of the Spirit
it is
and tool
and the decision is binding yes
there for example, a good condition is a cure for a disease, yes
favorable condition, etc.

i.e. it is a fairly well-known term
in ordinary Perception
so try to work
with the collective level of Consciousness
where the Spiritual state is also the path to solution
because the Spiritual state is the path to solution

You seem to be working in a local area
but the path can be completely different

and when you look
And what
how is the route organized in general
in the form can be organized
some optical elements
emanating from the sphere of the Spirit

for example, here is the area where the issue is being resolved
in front of me
each question solves its own problem
I say you solve your problems

then remember, enter again
into the Spiritual sphere of decisions

and when we go out of the sphere again
because the path is different

we have not perceived the Spiritual state
we just say yes, this is the state of the Spirit
but what condition
that it is calm
or is it, on the contrary, some kind of joyful one?
or some other
I'm still talking
do not take this signal

so it just works with optics
actually forms the optics of Perception

and as soon as well you have already learned
to form such optics
you can work
with an infinite number of processes there
any other galaxy
you can be sure that you are working correctly
if you don't get the signal
at the level of differentiation
and you just work with optics, naturally you work

then you can have any state
there which one do you like yes
better well as if the calmest possible yes
even better there is joy
well, i.e. you can have such good conditions
and generally speaking, work with any one, including
with seemingly negative information
which can happen
anywhere in another galaxy, etc.

i.e. the ability to work quickly
it means the ability to work like that
when it is not fixed
for example information that is not defined
there is another galaxy there for example
but it's not clear what kind of grass is growing there, let's say

and if we start to figure it out
with this grass
then it kind of clings to the problem of external information
then you need to save the planet there from destruction
we won't differentiate
here is a specific new type of grass

you need to save first
then already [...] send

i.e. how to do it like this
so that information doesn't stick
not targeted plan
so that she well as if it did not stop the control speed

this technology is just right for that
to work as if with an abstract level of control
which is as if outside of you and which
actually very well controlled
because generally speaking it doesn't require it
special communications
with your kind of internal state

i.e. the internal state is one thing
other you can do other work

and that's when you start working like that
that is, this outer grown area
as if a solution
anyway some information

just from a mental level
we can't get it
generally speaking, until we accept it in our Soul, yes
as if deeply differentiating the information
path
we can't go inside the system
when she does not have a signal Spiritual level

but it turns out that the path grows because
what exactly did we take abstracted signal
then the path grows by itself in the control space

and this space is exactly what it is
development of the Soul
i.e. the growth of the Soul to the level of solution
Spread of the Soul

i.e. you see how the Soul begins to work
this is where your [...]
from this sphere
this beam grew

then placing it in this beam

any task at all
there even complete regeneration of the physical body
complete cure yes

just fixing in this beam
information
you get to what is the norm
Well as if at a level originally existing from the Creator
from the Creator
the physical body is healthy

therefore it turns out that you work
in fact Soul in fact Soul again
but through the state of the Spirit
Spirit of management by the purpose of management
but the work is going on again with the Soul

therefore you got the job Soul
as an investigative system
This is extremely important
because if you can get
investigative system
close to the original
and generally speaking in the form of the original

then you can be sure
that the original system will continue to be correct
Well how to develop from the point of view of the Creator

after all, the Creator is present
in any investigative system
and I am actually, well, like, simple and crystal
I showed how the investigative system has grown
just because you made an effort of will
she was given the state of Spirit
The spiritual state of the manager, moreover
go to the signal differentiation level

i.e. what did I do
Well, it just blocked the optical signal.
and got the exact solution

and it turns out that if we can, for example,
get an accurate solution by blocking the signal yes
then in this there exists such a diverse world
there are some galaxies of outer space

It is enough ^{as if} here when solving the issue
perceive only one projection
for example, on the visual projection

i.e. we see the sky
but we don't have to at this moment
constantly analyze
what's going on in these star worlds anyway

however, this is a precise control
because as I showed now
that signal that we don't need to decipher
we don't differentiate it ^{, so to speak}
we don't need him now
allows for absolutely precise control
due to the simple development of the Soul in the area of management

and moreover if we see it in optics
in fact, I brought you to what to show
and by the way, it's dangerous to show it of course
^{well,} how is it similar, not ^{like} lightning
the lightning itself exactly like that, ^{yes}
as if it develops in a zigzag pattern

just if we consider
physical processes in general
then they also often develop in fact in the range
according to a very specific Law

and ^{well for example,} it is clear that there are
some kind of electrical discharges, etc.
from the point of view of physical processes ^{there}

but if we proceed from
from the point of view of Reality management processes
then it turns out that these are the ones
^{well,} the so-called lightning discharges
occur according to the Law again investigative

i.e. where there is a discharge there is ^{something like} that
what was the cause at first
then it was a consequence
then the reason was revealed again

^{Well,} that's how it is in physical processes
there is a discharge there, for example
in the form of a zigzag ribbon

so if as I said
we are in the investigative cause in the investigative system ^{yes}
we get, for example, the Health Norm

it turns out that any investigative system
has absolute Norm
in terms of health, ^{let's say}
in terms of event management

and therefore it is possible to achieve that
so that the car ^{there} is safe for people ^{yes}
so that a person of any kind in principle of activity
was alive and well there
and at the same time, ^{generally speaking,} events can be normalized

because the original system
it also stores the target's information
i.e. for example, a person says "I"
or sets it as a goal
the goal needs to be normal
first the state is in contact
and generally fixed by the Soul

i.e. the original state is everywhere
just what problems does he have
maybe here [...]
i.e. the main thing is to find the structure of the Norm in Perception

and it turns out that the control in this case
that's what we have in this case
Well, we would call it movement
according to the Laws of the Creator, in fact
you just need to know these Laws of Consciousness development

and here I come to that
what I am saying about the Laws of development of Consciousness
well that's what it is
element containing ^{for example} Perception

what language do we communicate in
Well, we communicate from a ^{management} point of view.
in the language of Perception
everyone does something
somehow perceives information
This language is quite universal

for example, in language , let's say, there may be several in quotes

Perceptions

[...] Signal perception

the same subject

in general it is believed that we see the same

but if we differentiate

how do animals see there , for example?

then they often see the same thing but differently

different types of animals

well, different levels of the retina, etc.

i.e. their optical range is generally different

in people in general it is kind of universal

so here is the principle of universality

this is the following principle

more actually one can say so

high in the development hierarchy

more control system

and it turns out that if everything is the same, yes

at any level of Perception

then this is already something that is completely adequate

the Creator is in action

just the Creator

just a logical partition well that's simple

if we want to develop management

so that it would be effective and work everywhere

and the concept of efficiency for the universal Salvation

it must be absolutely effective

even in the first act

Well then, in my opinion, that 's exactly it

The Teaching of Salvation and Harmonious Development

the spread may even be [...]

if there is simply [...] the Teaching of, for example, Grigori Grabovoi

and there is technology embedded there

there are specific facts achieved there is a lot of things

then it turns out that it should work instantly

because there is information at all

or he heard it

or it goes implicitly

i.e. at the level let's assume there is management there without newspapers without anything

but it simply exists as information

as i said "there is a word"

and here is the finding there of the only true word ^{yes}
the only true way, ^{as it were,} of movement
this is a special system of development of the Soul
from the point of view of Spiritual development

Before this I talked about the development of the spread ^{there}
in optical-mechanical terms [...]
then this is exactly what we are talking about
Spiritual development

and so ^{well} let's assume for healing
often required ^{well} ^{as if} some forced systems
precisely on the Spiritual plane
i.e. the Spirit must ^{, as it were,} move forward sharply
^{as if} in a healthy state of the body

it turns out that the governing state of the Spirit
this is the target normalized state

i.e. we do it so that control occurs because
that the Spirit ^{seems to} occupy extremely quickly
next levels of Reality

and this speed that is connected with the Norma
it is determined by the fact that our goal
i.e. originally created by the Creator
this is a state that we additionally achieve

then the question arises why
that's when I set the task
why is that the point at all
if you look at the phenomena
from the point of view ^{there, well,} in general, here is the World
not even in a philosophical sense
nevertheless, all the time to make the applied meaning of the analysis

then this action is an action, ^{generally speaking}
^{well, in} some kind of training
learning action
The Creator created Reality
but here is the Spirit walking along the path of the Creator
he's practically ^{well} ^{in general} it turns out that he is learning
Realities of the Creator
learning how to act
in terms of development, ^{let's say} yes

correct development

it turns out that God originally laid down the task
i.e. the task there, for example, of Infinite development
even without the word for example there
I'm just telling you a word from mathematics
but there is simply a development task
Infinite development
which is from God from the Creator

because there is God
and is there a Creator who, for example, is the Creator of man
and there is a Creator
Creator of God

because man is also a creating man Creator
so here is God who created everything
meaning God the Creator
who laid the foundation for this structure

and when we say the word Creator
it is always implied
yes there is a Creator-God initially [...] He created everyone

and there is a Creator who knew the Laws
and starts to act like this
as God the One Creator
Then

Well, in principle, if understood correctly
it should turn out exactly the same
there, in principle, in practice it works out
that yes, it is possible to grow an organ that in principle
they dream that he [...] will restore a person, etc.

and it turns out that
and in general the destructive body there is completely destroyed
after biological death collect
I can't even assemble it there, I can just develop it
[...] events to man

it turns out that the actions here are, for example, like this
what if we look at the event
it could be [...] a nuclear power plant could explode
but it didn't explode yes

i.e. it turns out that it arises

dynamic system of Reality
i.e. Reality becomes like this
which becomes completely manageable
just because, for example, the Spirit
is in a state of desire for such a Reality

i.e. Reality that is always organized
Well more in a positive way , I guess
but at the same time the Spirit forms Reality

here you can go there Reality that turns out
they see it very clearly
that they have good designs there
there are positive events far away
which they were striving for
maybe in a few days

so if we choose such a principle
consider in terms of that
what is the social level of people
he often well there they don't give the layers that are there
somewhat automated
functions there further action
or professionalism
professional habit he suppose pilot
he must somehow perceive due to concentration
all this in Reality etc. yes

it's not about the profession
if we start thinking initially
then the child has it before birth
already have all the skills
all the elements of exactly this movement
where the path is the path of Truth
i.e. they see
how should one develop from the Creator?

then well the question arises why it exists
For example yes some other elements
which do not fall within the sphere of desires
or there a person should do that
what is there to restore health

and here it arises generally speaking immediately by the way speaking
the way as a simple answer

pay attention here

the answer is immediately visible here
you just have to set the task
yes there is a structure from the Creator
Generally speaking, it is possible if you don't deviate from it
move calmly
have positive events
subject to the Macrodevelopment of the creative

but when it happens, for example, it's not like that
then there is an answer right away about what to do next
Well, generally speaking, there is always an answer

and that's when we do it for everyone at once
Well as if we are actually recovering more
in terms of what else the child has initially
those. before birth there or at any age
there is a level that is always the same

you can study there, you can grow there, for example
Well, in terms of a child growing up there
or some level of skills to gain

but there is always a level
and everyone has enough of it
by the way it's pretty clear to everyone where
where is this level
level by the way Spirit Spiritual state
or Spirit actually well Spirit and movement
Spirit in motion

this state is also poorly differentiated by the way

i.e. it is perceived only as a state
at the same time if you take it from there
deformation system
for example , why is this situation here?
she doesn't change at all
she is always in the same state

Well Let's say about myself, I can say this
what yes me for example there stood such a one
just polarize more
through aviation technology there through treatment

but let's assume from the level well let's say that
that there is some kind of special development
there is a level where it is always the same

I just don't talk about it anymore

at the same time due to the fact that I studied some sciences there
this level has not changed in any way

and so every person has
this level exists
and this level indicates that
that there is a universal plan defined yes
which corresponds to that
what can we perceive by this level yes
we can always judge about that
what needs to be done at this time

if such a level of universal communication exists
and he is
and we did at least one action, well, any
for example, we watched some movie there
then it turns out
there is all the technology for communication with the outside world

so this level is what says a lot
well, for a certain plan, people are different
it is perceived
but in many ways it speaks of the presence of the Creator
for example in a specific place yes

if a person, for example, starts
go to the presence of the Creator
in it in itself let's say so Yes
then he begins to see
as the Creator moves towards him
how does he even give way
how does this manifest itself

and here is the movement towards the Creator
when we talk
act as the Creator
this is actually a necessary movement
which is also like training
what is the right way anyway
from the point of view of the Laws of General Development
it could be like this
that with such movement
in general you can do completely free actions there
an infinite number of completely completely free ones there
seemingly not rigidly fixed actions

however, it will always move correctly
i.e. at a full level of internal or external freedom
but moving, let's say, with the heart and the Soul
moving according to the Creator's tasks
there is a task, for example, of universal Salvation
we always get the essence
specific precise action
in the next movement

i.e. on the one hand
the action is not limited by anything
on the other hand we are moving in the right direction
Well, it's a peculiar system
where time is most concentrated
that there is neither time nor action

this is exactly the state that denotes
that you are already close to contact with the Creator
's say during prayers there is
or during precise control
there if you need to get to the level
where you definitely achieve action

i.e. I am now talking about the fact that if you need to go out
there are such tasks that need to be completed
to the level where you definitely achieve control

and in connection with this this level
course , it can manifest itself differently for everyone
but if we are talking about, let's say , a disease
then the person must definitely be cured

and then this level turns out to be necessary

and by the way, it is a standard level
if the state does not change spiritually
can actually return the body to a healthy state

if this condition ever happens
came into contact with a healthy body
and by the way this was [...]
i.e. one cannot exclude the other

we get the Norm because it is a state
just remembering

then it is possible simply due to the state of the Norma
just recover just remember as if and that's all

i.e. and hence this lack of differentiation
when we do not differentiate the state
we just know that it exists
translates into the level of knowledge
although we can differentiate
we can perceive on a Spiritual level

and here is the level of knowledge
and the level of , for example, the Spiritual state
so this is what gives the opportunity
connect everything well as if concepts
on the projection of Consciousness

i.e. how Consciousness is formed
as a system of some kind of filter
communication system
control system
i.e. it is a rather complex quantity

and at such a size in general
as if at the static level of this management plan
we get that absolutely simple things
this is often the maximum concentration
the most manifested goals and movements
according to the Creator's task

this goal can be like for example there to be understated
not to mention moving consciously
from a person
from a simple series of events as soon as a person thinks
what does this solve for example yes

so identifying the goal is first of all, including
why does this event happen
if for example you move correctly

i.e. why did the course of events arise before you at all
there you see you are moving correctly
why did they arise

so therefore you must think
not only because there are some external connections
there in the Soul

but there is still much to think about
and how for the universal salvation
this event will solve

i.e. the task of universal Salvation
it turns out to be your personal task

how to solve this problem at all
but it turns out that if you solve this problem
without setting the task of universal Salvation at all, as it were
the task exists by itself
then the solution is this
decide for everyone anyway

i.e. there is such a principle
that any decision
it is always ^{generally} positive
at the level of general information
positive decision

so now you try to make management
when you see that any personal decision of yours
any action at all
it's always also something that you always decide
the task of universal Salvation

i.e. solve problems
well, actually with understanding this issue
I will work with you together

[...] keep your tasks in mind if possible
when you work, don't let out

your task is to solve
We work to solve our problems
while seeing that every action
including the obligatory universal Salvation

logically it is clear
do the following action needs to be done
so that there is no global destruction
at the same time, if possible, you
determine where you solved the problem

if something throws you off, ^{for example}
then go back to where you solved the problem

once you have solved the problem
look at the feedback signal coming at you
look who is the conductor of this signal
reverse
just his task

and in fact we have come to the same conclusion
what if we use the seminar technology
Today
then any action that a person does
any management of a creative plan
it always happens at the same time
the task of universal salvation
according to my Teaching on Salvation and harmonious development

the main thing here is just to see
these are the optical signals
like corridor systems where they go
where is this optics distributed

optics can be expressed in words as I explained
or maybe we can assume that over time it will just be
you can just observe
see and that's it

then be located
in a certain light range
and in general it turns out that you do management simply because
what do you record as the state of light around
and that's all

then any of your actions are already within the framework
precisely the universal meaning

so here is the feedback signal that you have achieved
this is your Soul signal of your Soul
development of just the Soul
actually towards your physical body

here is a signal for example yes everything is achieved ok
in this place in front of you everything is achieved
there are no problems at all
and when you already catch the signal to yourself
First of all, you always look to the future.
as a rule

even if you look at the past

then the analysis takes place in the future anyway
so that you look correctly just

and it turns out that you catch the signal again
to your Soul

so here is the maximum number of signals
i.e. the maximum concentration of the Soul
from what you made
this is your physical body

it is clear that light, for example, is dense matter
this is the physical body
and this is a certain light state there [...]

if then we get an investigative system
because you did the right thing
got the glow on themselves
then it turns out you got yourself
well, the person himself, yes

i.e. personality your personality
this is already an expanded plan
in this case i mean
human physical body

and when you get yourself
from, in general, my own and set tasks
for example, they took what they started with and set a task
then no one forced you
you have your own tasks

set up started to solve
based on your own task
found the Distribution Law
Consciousness in the optical range

how does it work
Soul
Spirit
how is Consciousness built in general

then it turns out from solving problems
got our own dense
there or a healthy physical body
so that it was
Well as if more restored simply healthy

then you just have to, it works out
restore myself
all you need is a counter signal
how to correlate with volitional efforts yes
from the side of the dynamic Spirit
simply from the will

and when you get yourself
then it turns out that everything is inside you
having set the task
and having received my own normal body
Moreover, they solved the problem

then where does this technology come from?
i.e. where does the task come from?

Yes, you can immediately see that there is a direct beam
direct connection with the Creator
i.e. you see it as interaction with the Creator

i.e. why did I pay abstract attention
which does not need to be differentiated
how does the Creator differentiate who created all

be seen as a person
it can be in the form of well for example, the current one
i.e. well, the one who does it there for everyone
who created or develops Reality

then it turns out we know it
but we don't have to correlate it all the time
that's why the Creator is everywhere
and how often can one, for example, single out a Personality
or you can just do it knowing
what is he doing there anyway
in the form of technology

so that's when you are in Consciousness
you start to analyze in this way
then you get it in any even everyday action
there, for example, you don't set a goal , you just know the technology
in general actions that are not
as if it were a management task
they are already normal
I'm already reaching the background control level

then it turns out at any background level

you are still solving the Creator's problem
i.e. universal salvation

when you see this technologically, so that it somehow touches
so that this mechanism starts to function , yes
i.e. to work
in terms of training your own Consciousness
it turns out i.e. Perceptions

all you need is just
highlight your own task
as I said
next position of the physical body
there in an hour , for example, an hour passed

then the following body position is obtained
this is what generally records physics
as if an external-physical Reality
and plus to that additionally
this is what exists on the information plane

i.e. it turns out that we have management of this kind
so that we know for sure yes
what does the physical body look like in general
for example next time

you should see it perfectly clearly
Well let's say informative Reality in terms of that
how is informative Reality created in general

i.e. we must actually
Well in general to see
in what way for example Well, sound is created , yes

we must reach the level
when it comes to creating sound, for example
from the point of view of the optical expression, let's say
or how matter is created
from the point of view of optical expression
information

i.e. at that level
the sound turns out to be modulated
external environment

you can take it at any distance
play the word

in the audio range

if you know this Law
then it turns out that
namely, for example, in the form of information of Thinking

or for example in the form of information there as if initially
completely of the original plan
when all external control
this is well as if in fact that is who you are
all external control
this is your whole personality

and that's when you reach that level
i.e. go out
to the level of word organization
there is sound organization
to organize, as it were, all physical matter
and informative matter

then this is a whole personality
absolutely simple precise correct control

awareness of all levels of personality
there is at least one single knowledge memory
source of control

that's when you start to manage on this
then in principle management
it can be as fast as possible
as much as possible generally effective

and try to come yes
to such a familiar concept of personality
when you don't share
for example information
physical body
and at this level of understanding
make the control as fast as possible
there with Soul
In Spirit
or Consciousness
just because of the totality or something
integrity of self-perception

well, a kind of specific course in itself
and in a certain position

which gives this sound full control

I'm finishing the seminar for today

work more if possible
precisely with the task
from the natural state
and in the state of a whole personality
where there is preliminary
level of primary self-organization
[...] word

if you say the word
is it possible to organize a word
optical level
and not with vocal cords for example

then the effect is on the vocal cords
it's just development and optics
i.e. [...] develops according to the level
pre-installed by you
Optics of Reality

i.e. work according to the principle
that you create every action you take

and value is meant
exactly in this
control coordinate aspect

thank you for your attention
that's enough for today
