

GRIGORY GRABOVOY
Optical system control mechanism

I give technology that allows you to understand
why does it mean that you, first of all, may not consider it
the presence of the resurrected means that you at least feel his biofield

and secondly, how can we actually consider it?

i.e. control mechanism
that optics that optical system
which allows you to see it after all
in the optical environment of the resurrected
and actually resurrected

the thing is, as I said here
optical system it is arranged
on the signs of collective Reality

and the collective Reality is like this
which means it contains some knowledge
actually Well, knowledge concentrated at the level of thought

i.e. control element
in this case it is
as if a collective thought in Reality

and if there is no knowledge of resurrection
then even when you feel the biofield
but during resurrection, conditions may arise
when the resurrected one is already nearby
and there is a feeling of biofield
and the biofield means well, no further, if the biofield is very powerful
well up to 25 meters
Means the person is no further than 25 meters away
and as a rule from 3 to 5 means

it means the person is already near you
and even movie cameras can film
and the usual ones there are especially digital
with a special spectral output means
they show
that the resurrected man is nearby
and for example a relative doesn't see him

so that's why it happens
that the relative is , as it were, at the level
at the reagent level

as if on a supporting platform of collective Reality
which does not include this information

and it turns out
that the person is nearby in the room
and his Consciousness seems to cancel it
i.e., well , to put it simply, it artificially reproduces
non-existent environment

i.e. in reality
there is a resurrected man next to him
because the biofield does not obey these characteristics
and he thinks that it doesn't exist

so that's why it's a sign of a biofield
this actually says that
what should you then this optical system
disband means
where there is no knowledge of resurrection

because this knowledge about Salvation
your work will be important to everyone

so here is the first training
the first practical option to do it this way
so that the information would be controlled by you
this optical consists of the fact that

what are you considering
two some trees
for example one big one
another small
just starting to grow

and if here is a big tree that mainly grows
on the platform of collective Reality
where there is no knowledge of resurrection
technological knowledge, well, very advanced

then as soon as
you will see a small tree or a bush there
and enter the information
from the beginning of its growth
knowledge of resurrection

or many already have

here are the plants

which have recently started to grow, so

then you will see the difference in the optical range

here's the new one

where did you enter the information

or he had, well, it kind of starts to shine internally

i.e. the parameters that you have

for example in optical perception

from the point of view of collective Reality

they will not mean anything

here is this big tree for example

so it will be a small tree

firstly, as soon as you are from this position

well, to have some kind of inner glow , so to speak

some kind of spirituality

because that's what's really there

this is an element of Eternity of any object of information

and the second big tree

it can even change

in the contours of Perception

from different points of view

while the one that has this knowledge

it doesn't change in general

i.e. that's why

watch this training choose

in relation to , well, basically, any objects

to see how we control the optical range

i.e. how is Reality controlled

in the optical spectrum

having considered this Reality

as an element of thought means of such a plan

that in fact thought is like a weak optical system

well, relatively weak

i.e. visible with inner vision clairvoyance

but located closer to True Reality

it means it has different forms

and various principles of imposition

so as to manage
symmetome of collective Reality
you need to know the Truth of life

naturally the True Reality is there
where the Infinite can be the life of the physical body

because everything else
as a special case it is considered ^{yes}
more general systems

and here, having looked at, for example,
the fact of the resurrection of Jesus Christ
you can immediately know that this is True Reality
well, to which development is actually heading

and that's when you are in this Reality
^{here is an example} of the current one

then the fact of the resurrection of Jesus is
^{well, as if} at a great time distance
there, for example , 2000 years
and yet it is very close
because it is True, which means the Reality that exists everywhere

the same thing when you work
with True Reality
i.e. resurrection
this already means closer to True Reality

and there is the resurrected man
when you see it you ^{kind of} visually
your optical course it changes
it is actually carried out by you at a distance
which is called "beyond the horizon"
where in principle
the person is no longer visible with physical sight

from the point of view of physical vision
you take it out as if beyond the horizon

and into this formed space
hits
optical element of collective Reality

i.e. that part of the wall of the room there
which should be empty
well, like in the trick with mirrors, yes
so a reflection is made and the magician hides
and there's like an empty space there

here is the same thing
so you actually have
the same design
simply formed
your own Consciousness

and if you go towards the magician yes
well there to the side for example
if this is a trick you can go there
and how are these mirrors placed there ?
and to those who organize
We need to remove the mirrors urgently
i.e. make it as it is yes

the same situation arises
if you move
towards where the resurrected one is
then the change happens immediately
well, like a space-time continuum

i.e. it instantly appears as if
the same but already i.e. you as in fact
what happens is that you check

i.e. there is a check
this means choosing a base yes
you have to test it on something

but if you are
on the platform of collective Reality
then you kind of take it
and extend this beam there
that's all

to put it simply
you build it in this place like this
which is generally acceptable to all

if you start checking
Well, how about going there and working?
then you may arise again

the same wall but it will already be physical, you understand

i.e. that is why we need to work not through checks

i.e. movements there physically and into the area

and by working through optics

i.e. signal conversion

to distort the optical beam

he came to you in the right form

then you will see the resurrected

Means and this will already be a new Reality there

well, which will already influence the collective further

and any knowledge is new, well, necessary

like any knowledge

they mean at the systemic level of their renewal

they become a common Reality

in this case the principle is the same

i.e. the more resurrected there are

the easier it will be to continue meeting with the resurrected

and that's why here

from the point of view of physical laws

considering, let's say, any element

as micro-oscillations some periodic oscillations

well, basically like wave processes

i.e. a quantum of light

is being translated

in the wave in general

then we can consider

any element as a body there

in any physical Reality

as a set of wave processes

and naturally it is a very controlled environment

just like a radio wave

can control the detector-receiver

then by any wave process

can be controlled through the element of Soul yes

and that's why it turns out

that everything, well, like the entire external material shell

it is a system of different waves

well having

either a greater or lesser concentration

and if we work in optics
and any wave can be transferred
in the optical range

then working in optics
well, actually, by sensory means
you can always influence Reality ^{yes}

therefore and therefore ^{in general}
and the past is controlled, and so is the future, etc.

because if you leave in motion
to True Reality
do you work with this optics?
you are actually working with the environment

which is higher than we see
in a manifested , material form
well, like more organized, more stable, etc.

and now the task is already
obtaining the form of impulse ^{and} the form of thought
is that
as soon as you saw i.e. felt the biofield
This means that it is located at a distance of ^{no} more than 25 meters
this is with very powerful fields, ^{so to speak}
which are sometimes simply needed for stability
and mostly 3-5 meters

you should look at that point
or mentally clairvoyance
or physical ^{and} vision
where does this signal come from

consider
where is it located ^{means yes}
and begin to assemble the form of collective Reality
to make it more relatable
to True Reality

i.e. you start
from any flat level
you make a sphere

i.e. for example, here is the door

as if it were spheroidal ^{yes}
turn it into a sphere

or from any ^{spheroidal} object
or not a flat object ^{yes}
you get two or three there, ^{well}, as many spheres as possible

i.e. you break up the space
into spherical components
and as soon as you break
in a thin already ^{well} as in a weak optical level
you begin to see the image as a rule

as soon as you start to see
you must then every sphere
tie up
as if a system of real development

^{well} it's the same as if it was a car
you need to give her a path, i.e., ^{steer} , to put it simply, ^{yes}

and can you know where to steer?
because where there is no destruction
This is the True Path of Development

you just take each sphere
you tie a certain element there
^{well}, with certain thought forms
connections there or purely technical ones

as soon as you tie them all up
you ^{will sort of} fold this Reality
and you will have a resurrected ^{well}
i.e. you will meet then

^{well} , after the meeting
there is already a renewal of collective Reality
^{Well}, it's very difficult
i.e. if you talk to him for more than an hour, ^{let's say}

then there is actually no longer any possibility
restore previous status
^{well}, this is the field level of the World, ^{yes}

the world can be viewed as
or electromagnetic
or other field oscillations, ^{well}, wave oscillations

i.e. in fact you accepted ^{yes} in the language of waves
you simply received the signal
and that's all
and he's already going nowhere, he's already not going ^{anywhere}
as soon as at least in one detector
at least you accept in the sole person
all this is already becoming common to everyone

i.e. this principle is also wave-like
it's enough just
one receiver to receive radio wave
this receiver can, in fact, transmit to others
there, ^{well}, so to speak, somewhere he will perceive and write
and all this will not go away

i.e. this principle is very important
i.e. if you develop it
you have an optical level
very seriously it will be ^{very} seriously reagent

i.e. your thought will control
this environment ^{is kind of} emulated

i.e. artificially reproduced
in your Consciousness

and further technologically
^{Well}, maybe it will be necessary
add one more element

here's how to tie these spheres
and form new optics
this will be as an independent work
because it could be a garter
or thoughts to the True Reality
where there is no destruction ^{at all}

either directly mechanically
i.e. directly by light spectra
take each element of this sphere
you are forming
in other words, you make it from each object
multifaceted object
and that's all
and you get a controlled environment

Of course it takes practice
because sometimes you often need to know very precisely
coordinates of each sphere
this is a special level of clairvoyance even
but nevertheless it can be developed and created

I'm showing
tissue organization mechanism
including, for example, the physical body of a person
even if a person
had a level of care i.e. biological death

i.e. we are also talking about resurrection
but in reality this principle
refers to all elements of Reality

initially when the Creator created Reality
then the question arose
from the point of view of the technology of knowledge
because the Creator made all Reality knowable
so that it would be on the path of His development

He laid down the principle of Self-recreation of Self-creation
so here is the principle of Self-recreation
this is an element extended into the future
or there in past events

recreate i.e. have before
and then create again yes

and the principle of creation is the original principle
covering a more general area
principle of self-recreation

i.e. self-creation self-recreation
logically these are two simultaneous principles
which reflect
like static
and the dynamics of Reality

and therefore the Creator is He
in a state created and recreated
By Himself

and this is the state
that's exactly what it says
what is the technological nature of Eternity

any element of information

and technological advancement
precisely from the point of view of the system of knowledge
"do the same" yes

and the concept of "do the same"
consists in the fact that
what when you ask the question
why is the Soul Eternal

then the answer to this question is that
that the Soul is self-reproducing
under any combination of events

and when for example we
as an action
we are asking the question
then that's exactly how we answer

i.e. initially it is Eternal yes
because the Creator created
for example Reality is originally Eternal
but it is technologically Eternal
and technologically Eternal
because it can create itself

to recreate itself in the same way
in the Image and Likeness of the Creator

in terms of information
not necessarily for example forms yes

and here is a semblance of action
i.e. development paths
creates the same level of development
and self-creation of the body

i.e. since the body is considered
and is really a part of the Soul
human physical body

then you can consider it here
process
as a system of horizontal connections

i.e. horizontal ones are meant

that the Soul is a consequence of information
consequence of the information area of the World

means physical body
is being considered
as a consequence of the information level of the World

i.e. to the information level of the World
enters

The soul is there, for example.

Consciousness

Spirit

and other concepts of information
all elements of external Reality

in this case
autonomous Soul
it is manifested as a continuation

i.e. if we autonomously put forward
area of personality
then we see
what is at the information level
there is something that organizes
in the form of information lines

and then the correct part, for example, physical
let's say there's a table, a chair, a pen
any object of Reality
what we see in the form of physical elements
it's actually on a micro level
This is an oscillatory system

and in principle it is a wave system in general

i.e. any solid system is a wave system
it's just that the waves there are structured differently
they are designed as discrete systems
having their own rigid statics of fixation
behind the neighboring system

if you take galaxies there
these are quite distant systems
and the closer ones, in principle, they are arranged similarly
at a unified level
but they are just compacted

so this is the functionality of the body
in relation to events
why did i say informative
from the point of view of the local personality system
exactly when you are considering
just a person
This is called autonomous information content

and also
generalized information content of the system
i.e. what creates the body
from the point of view of all processes in the World
Well , this is called the influence of the microcosm there, etc.

that's exactly what matters here
the principle of reflection of the inherent World
into any information system

i.e. all systems are similarly structured
in the Image and Likeness of the Creator
although it seemed there was a voice recorder, video camera, etc.
but in essence they are arranged similarly
at the information level
and even the same

and therefore we have
single matrix area
which is
the realm of the Creator

and this area
has a flow of information
well, sort of to myself
and therefore, i.e., inside it

not only does it create
is a matrix
but she is constantly
absorbs information into itself
i.e. we get a closed cycle

and here's the same principle
any connection is arranged
between open and closed system

if we have personality

then personality is like a canonical system
where does it come in
Soul
body
and at the same time
she draws it into herself
all information of external Reality
while closing
loop on itself

just like any other element of Reality

and that's when we have
such development of information
then we have that the combination of any two elements
gives birth to the third Reality

and the continuation means the physical body
in the form of, for example, informative Reality
there are his actions, his spiritual aspirations, etc.
well this particular person
is already giving birth to the next Reality

i.e. the following worlds
which act in reverse
to the common external Reality there
personalities
and become external Reality

i.e. everything
any thought you created

Well, I recorded a simple example there on a dictaphone
a certain amount of thoughts
it becomes external Reality
in relation to me already
although I did it
a second before that

this didn't happen yes

this is the principle of creating elements of Reality
it is also unified

If you have such a reality, for example
as a transition to the body area
then the task of your Perception

is
in Perception simply in your Perception
connect

informative part autonomous
what does local personality mean
the outer part

with the physical body system
that's all

it's the same as a system of communication wires there
with the system that gives birth to the physical body

if we are on the physical body
let's look at it from this point of view
then it's just a series of light streams
but which all the time organize cells for example yes

and the organizer of this is the Soul
i.e. the Soul is a way of organizing the World
for the Creator

and for example when the Soul exists
if we look there the Soul of Jesus
he appears simultaneously in all living beings

because it is high
in that area where his Soul is already in everyone

and that's why he said that there "I am in everyone" yes

Buddha had the same approach
i.e. he gave, for example, that
that one big Soul
branches out
for many Souls

and so when we talk about reincarnation yes
then in this case the transition
from one reincarnation to another he is like this
that we ultimately have a more developed system
more developed so to speak body

but with all that
it is possible, then, being in one body
be manifested in any reincarnation

if a person wants for example

and at the same time, for example, with the general resurrection
there is a combination of events happening there
that the whole World becomes multidimensional
and even reincarnated levels can also be resurrected

but at the same time the management will be carried out
with a higher reincarnation, perhaps?
i.e. well, with the final canonical one, or something reincarnation
which is already well Eternal so let's say yes

reincarnation
when man is already Eternal
and learned the system of Eternity
in its development

at the same time, he can get to know her earlier
but then still choose the path of reincarnation

or even not reincarnation exactly
and organizations from the point of view of that
that it starts to grow
like, well, like an ordinary little person

although he actually always has
full Consciousness of that person
just gaining experience
but does not reincarnate
in understanding the presence of biological death

he may no longer have biological death
he can still spread for some time
at another time
to assume that we gain a certain experience of interaction
the outside world
with you

here we are even talking about that
that the outside world is gaining experience
from interacting with it
as with the Eternal Element of the World
i.e. this is already a different task

and the result is an intersection of these tasks
gives birth to a single entity

what is in each level
the center is local

everyone perceives themselves
as a single person
although it is in the general system of connections

like Buddha
there are many Souls from the One Soul at once
Jesus has Him in everyone, etc.

and it turns out that we have
for the resurrection of any person at all
we have all the possibilities

it is possible to resurrect everyone at the same time
and at the same time all the reincarnated ones will be really the same
but when will anyone contact them?
for example you want to see someone specifically
in front of you will be exactly that one

i.e. it's the same as taking light
and the Soul is One
having many developments
intersecting with other Souls means
will have just that manifestation
which is needed at the moment

and thus the movement goes on
towards the Creator
i.e. after all, in the Creator everything is in the center in the One
in the Creator
He is everything
from the Creator's point of view

and that's when we talk about this kind of unity
i.e. moving towards the Creator
from the point of view of the system of knowledge
then we have
just the system of developed and Eternal Peace

in which each process is Eternal
in short, the Eternal development of each individual
in any reincarnation period

and that is why Jesus also spoke about it
that Life is one

from the point of view of the independence of each line
any manifestation of life

or the development of any element of Reality

i.e. this is quite secret knowledge about Reality
and that's why it's always clear
what about the moment, for example, well
when the collective Consciousness perceived
biological decay
there is always a life line of this person yes

and you can always do it in an elementary way
Well like some kind of lantern organizing there
on a physical level this life
just translate into your Reality
how to highlight your area of information
and that's all

and it turns out that these optical systems
they organize then
the same person

and there are two options
or the one who means already lives in this time
agrees to have this past information in the story
or does not agree

but then everything is reconstructed
to the point that, for example, this format is set
that there was no death

and then it turns out that the World
he has such a True nature
which the Creator laid down

it just needs to be looked at
and to consider it, you just need to take into account the connections
both in the dynamics of development and in statics

those. static system
for example time passes there
there is something like dynamic
should not give rise to distortions

and for this you need to have a goal
unity with the Creator

the goal of movement towards the Creator
according to His ideology according to His Laws

and the goal
see the True picture of the World

which in principle is visible from the very design

having spread there, for example, the view of Infinity
it is clear that many systems are Eternal
in relation to
to small elements of time even

but we are talking in general
about universal Eternity
from the point of view of the True intentions of the Creator

so if we look
we have logical perception yes

and if we look at the Creator's plan
we see that He is Eternal
and must necessarily create everything Eternal

and this is His task
and therefore by combining the first level
logical i.e. own knowledge
with that
what is Spiritual knowledge
or is it already inherent in all of them

you have a very specific technology
constructions of physical matter
and any means there

and at the same time the concept of "life" in this case
this is an extension of the information status
to the level of its manifestation, as it were
in a dense body in dense connections and that's all

i.e. from the point of view of logic
resurrection is just a matter of fact
return of that knowledge to the Soul
which form this physical body
in real time
for example, there is his movement, development, etc.

i.e. from the point of view of this
well, the absolute level of Perception, I guess
The world doesn't change at all according to logic.

there is a system there
Well, in the autonomous region, so to speak

rigid link system
and either it is manifested
in the form of a physical body ^{yes}
or for certain reasons
this manifestation, well, it kind of starts to have
some problems

suppose in a certain past time
this man lives ^{yes}
and some restructuring systems
arising from external relations
For example, they give this concept
as "biological death"

so that's when you come in
into the World system
where all elements are Eternal
no element can destroy the other

and with this ideology you already see
a completely sustainable development system
and you see a completely clear path
it gives you a very specific technology

when do you work
you must have a starting point
in every element of his work
point
where is this element Eternal

i.e. in principle, where is it created from?
if you act dynamically

I once made this discovery in mathematics
showed areas through geometric systems
that in any element
there is a point of creation of this element
in general in any
where is it created from

and based on this point
you can always return
well, in fact, knowledge is where it was changed
due to a number of circumstances there are dynamics
well, sort of intermediate development

because in fact the development is not eternal
this is an intermediate path of the system

and when do you go out
to the level of Eternity
then you are just like Jesus
came out and became indestructible

then you achieve for example
already well full restoration of its events
where desire is reality

now desire becomes reality

and why is desire Reality

because in the Eternal development of information
your desire as information
is always implemented as a system
do you understand?

you just need to wish for resurrection there
from the point of view of the Eternity of the World
and everything that is born there
including thought means resurrection
there will still be a specific person

and it turns out that in this system
what are you just doing
when you speed up this process

just adjust
i.e. add control
that's all

and try in this one
such a diverse sphere
there approximately in the sphere
as a system of many connections

find a systematization of this kind for yourself
where do you calmly go with this information
calmly, step by step, construct a system there

there is no movement there
no development, well, it 's different there
or some changes in events
do not affect what you do

they don't have any influence initially
because access to certain systems
only you have
or there knowing my Teaching there are disciples

naturally I have access there and I help you
but creative help
and it can only be creative
in these areas of management
For example, you can't destroy anything there
otherwise there is simply no access there
she is always useful

but the task of the individual
do as the Creator does

so you have to do it yourself mostly

and who if you need some help
this needs to be understood
how is it going where and what is done
so that you , well , maybe don't do something
then it must be so
look what's been done then yes

i.e. you must be aware
all processes in general
and all connections
absolutely everything
even if something has been done for you there
you must understand what has been done

and with such a design of yours
the development will already be systemic
and yes the process of fulfilling desires

i.e. for example, there is the resurrection of a specific person
he should he should then be mandatory

Infinite Future
I explained that
why will it happen anyway

but from the point of view of that
that it should be faster
as a system
for example, preventing a possible global catastrophe
then you must manage the process
just move it here

it looks like it could be
to levels of comparison with those
what what you are the future here is the construction of the future
as if the distribution of future lighting

translate with the projective part
here
in your specific case

and as I explained
that everything can be created on the basis of light
and so it is

then distribution
even light levels
you can create specifically
and conditions information conditions
which provide this Reality

and basically when I say
about the creation of, for example, the Rescue system [...]

in this case
at the level of control systems
at the level of connections, for example
which, well, it 's not necessary to write them down
on paper
they are in the information space
exist
as completely rigid and isolated
and absolutely powerfully connected with all elements
system
which can constantly evolve
and is really developing by everyone
and because everyone participates in this system

your task
transmit information
which you will receive
into this system
for everyone

i.e. your experience should be transferable
by you deliberately

and then it turns out that you are short-circuiting
common ring here autonomous region

when your offline information
according to its purpose
connected to everyone
and pass this technology on to everyone

then in principle
you get this control
which gives here
the universality of your approach

then you get the result just faster

when universality
you reach future information faster
unlike my own, well, just private questions

and you will still have a task of course
information transfer
there is distribution and so on.

that's why this lecture needs to be given
it is precisely with this level of Perception
and listen
to know
while simultaneously passing on knowledge
to all
oh well about the processes there
how to make development eternal
that's all there is
all

and at the same time demonstrate technological advancement

i.e. how can this be explained at all, for example

when will you do this even more
you will shorten the time of the event

because when everyone understands
it is clear and as in a particular case
here do ^{yes}
the more the more understandable to everyone
the clearer it is how to get closer here

because you work
with collective Consciousness

and accordingly my book
where I wrote about collective Consciousness
what is important there is precisely that
that collective Consciousness
it is spread
on all
simultaneously
straightaway

but at the same time it is a manifestation
in the form of private Consciousness

i.e. your element of Perception
contains all the same
element of collective Consciousness

and when you spread it wider
doesn't matter
everything starts to have a return from this
in the form of a propagation impulse
a certain return
which is obtained simultaneously
and does it for you
here is a stable platform ^{or something}

in the Salvation system
in the control system
