GRIGORY GRABOVOY
The Teaching of Salvation and Harmonious Development
Spreading the Physical Body of the Creator
21.05.2003

Hello
The topic of today's seminar
this is the introduction and dissemination of my Teaching
about Salvation and harmonious development
Method of Spreading the Physical Body of the Creator

this implies
that the Physical Body of the Creator
this is the Physical Body of the One God
and also the Body of the Creator of man
i.e. creating some kind of Reality
by management
for example, due to one's Consciousness
as well as some social logical actions
physical, etc.

before the topic starts
in the sense of precisely consuming the topic
as an applied tool in management
I would like to consider social phenomena
which now exist in Reality
and what needs to be done next month
meaning until the next seminar

the thing is that, as events in Iraq have shown,
the situation is generally speaking as follows
that based on the comparison of historical processes
when one of the countries comes out in defense
for example, processes of peacefulness
then here is the President of the Russian Federation
Vladimir Vladimirovich Putin spoke specifically
for there to be no war in Iraq

and in connection with this he presented
position of actual Salvation
connected with the fact that of course the processes of peacefulness
this is first of all

and so naturally a situation arose
when let's say so the other side
meaning the United States of America or the intelligence services there

provided that if some kind of coup occurs in the USA
for example a military coup
then the figure which well can be problematic yes
in the historical process
is a figure from their point of view
President of Russia

and that's why I suggest making the management first
related to the fact that to ensure means
personal security of the President of the Russian Federation
and also his re-election for the next term
in a position of, well, problem -free and mandatory re-election

the thing is that they exist
there are a lot of processes related to that
that this is naturally provided
by some other means and methods

but what I'm talking about
this is actually that information
which in general corresponds quite accurately
precisely the task of saving everyone
from a possible global catastrophe

i.e. in this case I declare this
because in order to avoid a global catastrophe
It is necessary that the President of the Russian Federation
Vladimir Vladimirovich Putin
was firstly in personal physical safety
and was also re-elected for another term
i.e. this is purely informational data
that need to be implemented

and on the topic of today's seminar
it is precisely the distribution of the Physical Body of the Creator
for management
First of all, it is necessary to work it out
in general, the digital series is best

to solve this problem
it is necessary to concentrate on the number series
and for about three days in a row after this seminar
this is 7412849

and when you will concentrate
Firstly, there is no military coup in the USA.
and secondly, this is what from the point of view
resource-rich country
President Putin must be safe

I also call on the citizens of the state Grigoriya
and volunteers to spread my Teachings
do this work according to your plans
which exist
well at the level of volunteers at the level of citizens
and naturally everyone who is engaged in the practice

from the point of view of the development of this process
for personal safety, so to speak
and development of information in the future
here I propose to do the following

There is such a concept now
as a "symptom complex similar to atypical pneumonia"
and it is desirable to make the following control

i.e. at the moment of the meeting
I now set this task periodically
although according to today's data
this means that the virus has generally slowed down in its development
and there is objective data
that it was on the decline

however, such a problem still exists
management will be done
the numerical series here is as follows
this is meant for next month
until about mid-June 2003

this is 813742648 we need to do management
preferably from 22.00 to 23.00 hours

to consider the subtext of this management
consider the connection with the topic of today's seminar
Here it is necessary to consider the following
well, like a composition of information levels
What
firstly, if we consider
Well, it would seem that these are unrelated phenomena
there's atypical pneumonia

Security of the President of the Russian Federation
then there is one type again connecting these phenomena
this is the safety of almost humanity

then this is the connecting system
comes from the level of the Creator

where the Creator as a man acting
Also
and the Creator having unity and all-manifestation
i.e. it is a single Body
namely the Physical Body of the One God

and when we consider the Physical Body
as a manifestation of the following status

for example, if we want to drink some water
take something with your hand
then we extend our hand there
and therefore the action is obtained

Here is the principle of operation in this case
it is aimed at that
what is according to God
the structure of the world
that the external world is also God's creation
we get
that all phenomena are connected as if to one point

here is this connecting point
this is the salvation of all again
when everything is developing perfectly normally for everyone
there is a normal sequence of events, etc.

if we participate
Well, in this generally peculiar
sometimes tough information situation
then here is our personal task
primarily directed to this management
in a personal way

and here is this personal way
shows
what is the Physical Body of the One God
in action in yours
in your personal action

and when you realize this you see
that the Physical Body of the One God
it's clear

when you see Him near you
then this Action is actually manifested
as a universal action

i.e. it would seem to be one Physical Body
but you know
that It is spread to all phenomena of the World

and when you start to think
over the mechanism of distribution
then you come back to the same thing
that you have this knowledge in your Soul

and this is where we come to the point
that knowledge in order to level the situation to the norm
related to the task itself, for example, yes
President of the Russian Federation
with the task actually well citizens of the state Grigoriya
volunteers to spread my Teachings
everyone who is there
in the task of precisely the security of development
and Eternal development
then these tasks are generally open
in the Soul as fairly clear systems
that exist near you

and here is this approach to you
this is the approach of the Physical Body of the One God
to you
i.e. when you see a person approaching you, for example
then you understand that he has
properties and some external ones

but besides that there is a certain Spiritual principle
well, like some kind of line of fire, yes
or is there a flame of the heart
the line that runs seems to be horizontal
into your heart

i.e. you will recognize Him differently
i.e. this one here
level of recognition of an approaching person
this is the level of God's presence

first of all in that place
where was He before the point of recognition

i.e. we are moving on to that
how God gives birth to, well, creates an event
and how we create
we can consider this event
how exactly the event where we participate is correct
i.e. we participate as needed for, for example, Eternal development

and this is this general approximation
to a single point
for example , Salvation of all, resurrection of all, etc.
this is where God set a single event for everyone
but with His Physical Body

and when you start to consider this
as your personal action
i.e. look at this information
With soul
In Spirit
Consciousness
or there physically
you see how the human heart is created
from this point of view
how it is created
i.e. how it grows
from this aggregate information

and it turns out that
that in principle the heart grows independently

and when we start, for example, to analyze
why in a number of diseases there are, let's say, those diseases
which are systemically linked
some are cured locally

then here it turns out
which is, by and large, of course
everyone is connected very tightly yes
with all external information

but if growth starts from the heart
then everything else is practically organized instantly
i.e. if we want to see
a person means one who creates events
then it actually seems to grow along with the event

at the desired control point

because it really is logical
from the Creator's point of view
where it is the same for Him
there, for example, microstructure and molecule atom
or, for example, for the Creator it is the same
any external event
then a person enters into the system of equality
in relation to the next event
i.e. a person is actually created together with the event

then it turns out
what is the essence of our personal actions

i.e. I now translate more into logic
control
when we see that the movement is our own
from one level to another
this is a movement that is truly Divine
i.e. God as the Creator

then we see
that the Physical Body exists as such
in a single level everywhere

i.e. this is the level of viewing yes
internal self-analysis
it leads to that
which you probably noticed as a child
that sometimes for you it is like the outside world
it has hardly changed
and you were watching from somewhere at the same point
to external events
well, some such configurations of Consciousness

Well, in childhood this happens quite often
and why does childhood time drag on longer
because it is like a Physical Body
in the True Divine understanding of the One God
it is more stable
in terms of self -contemplation of self-awareness
more natural systems of knowledge dissemination

so when we transfer
this is the current worldview
then we see

what is your physical body in principle
at another point it already exists

i.e. if you are analyzing some event
ahead of yourself
you buy something, for example , in a store
or you will save there
nuclear reactor so that it doesn't explode there
let's assume at Kursk NPP yes
in some time
in three years a minor malfunction will lead to that
that in 10 years another nuclear power plant would be an option
will not be realized in terms of explosion

i.e. well, such a long chain of events
then you still see yourself
firstly, near, for example, the Kursk Nuclear Power Plant

i.e. you perceive yourself somehow

so there is one specific Law
Self-perception is always conducted
in the form of your physical body

and if you, for example, are fixated
from the point of view of Perception
for some action
it turns out that you are already there in the information
near this nuclear power plant, for example

and here is the totality of the work that you carry out
it leads to you becoming convinced that
what if you did a lot of very work
then why not do it
as if all the work for achievements
the obligation of Salvation

here is the concept of "all"
on the information there is some point yes
some kind of acceleration system there is significant

so this is the acceleration system
there is an appeal to God
and when you contact
to the Physical Body of the One God
i.e. as if you are looking at Him
then the spread of His Physical Body

this is what is for the Physical Body of God
what is happening for example in our world
in any system at all
this is also his internal environment

i.e. the Body means that one of the properties of the Body is arranged this way
what does all the events mean that are external
for Him
are events including as if Thinking

i.e. The body is arranged
and from information events
and from physical events

and when you come to this
then you see
that it is a very powerful self-regeneration mechanism
i.e. the recovery mechanism
which in fact, in general, in essence, it is like this
that in this mechanism you can practically recover
only due to that
that you know the point of unity
with the Physical Body of the One God
in terms of the Action of this Body

and when you, for example , consider this mechanism
as a process
well, like further development of the World
then you see
that the creation of the next event
This is also self-construction

i.e. self-realization in this event
quite natural
what are you building there yourself ?
see your physical essence
there is physical matter there

and then it turns out
that your body height should be exactly this
physical body
from the point of view of the neutral level of management
from the point of view of the One God
as well as the Physical Body of the One God

because otherwise it will no longer be accurate to construct events

and to achieve precisely universal Salvation
precision is needed

that's why it turns out
that you must first choose an approach point yes
it turns out to be to yourself
to your physical body
at the level of Consciousness
in the level of your Thinking

if you see events in front of you
well, along the horizon, just from the physical body
in front of you
then the Physical Body of the One God is located
at the moment of primary action
behind you
at the moment of achievement
in front of you
and you see
well, like a bent 8
where the information flows

i.e. the Physical Body of the One God
also has the property of mobility
you see that the organization of your body
and His Body
this is the principle of the World Order

i.e. everything is arranged this way
that it is co-organized
with a certain center, a single center

so if we consider
and so it is
The Physical Body means the One God
as the center of the world
it turns out that the processes of the World Order

i.e. Its manifestation
for example, in the form of a human physical body
just in the World among people

this is a task that speaks about that
what is it for a person
perceive His Manifestation
and see His Action
this is a task again from the One God

i.e. you must see yourself
in interaction with the Physical Body of the One God
how the interaction is still personal

i.e. it is clear that many people see things differently
for example, yes , the same person
and often you can see it from different points of view
and as a rule, one point of view does not work here
because in the same place
there can't be two people's eyes there, let's say
or the same type of Thinking

hence the view
on the Physical Body of the One God is always different
and this very difference and complete freedom of will
and the full expression of the will of any individual
this is what creates the external
in relation to the Physical Body
Wednesday

This is a very important Law of Development
namely the Eternal development of man
more precisely in the evolutionary version
where does it say
what is the external environment
it is also a product of your primary actions
where are you located, well, at some point

and so when you are
at the control point from yourself
that is the Physical Body of the One God
is located almost in the same place
where are you

the only question is
just to realize it
i.e. to see with the inner eye

and when you see Him with your inner eye
you are actually reborn
together with the event and together with Him
i.e. together with His Physical Body

that's why there is a spread
His Physical Body
and your action

this is a single action

but logically it can't be otherwise
One Creator
i.e. the One God He naturally participates
in all events

i.e. it's just a logical background
what I just said
this is all about the Spiritual status of management
where the Spirit is development
and the Physical Body of the One God
and your Physical Body in action

I introduce such a definition of the Spirit from this position
and when you see primacy
namely the Physical Body of the One God
then here it turns out
what originally
The spiritual level is predetermined by the Divine
that there is more than just the physical environment

and it is clear that the Spirit is not a physical environment
only in logical understanding

but from a management point of view
if we want exclusively on a Spiritual basis
create some kind of organ
then we can see
what is Spirit
as a physical environment in your physical body

and so if we set the task like this
well, for example, as a tissue regeneration task
then we see
that the Spirit can organize the liver almost instantly

i.e. it can be located for example
in the form of , well, in some local manifestation
in the form of a human liver
when the growth of a person is already an event
where as I said
a person grows with the event

Well, how can you compare it like that?
in terms of design, for example, it is closer
there is a rigid plant system

when there are some nutritional systems around
a plant grows in some environment

and there is only one event there
it grows at one point

if we complicate the system of the World
i.e. we go into the system
from our logical point of view
into some other spatial systems
then it turns out that the growth of the event
defined simply by that
that unlike the plant there yes
animals they move

but if we look at the stone
then it cannot be said that this is a less complex system
because the stone has other properties

here is a sign of another property, unusualness, yes
For example, he doesn't eat there
in an abstract sense
as if he doesn't need any social conditions
then here another difference of the system speaks about that
that this system is ambiguous
and this is the sign of equality of systems

i.e. it is impossible to say
that one of the systems is higher
some one below

and in connection with this here
according to my Teaching on Salvation and harmonious development
I show that the transfer of knowledge
can be practically
well, either for beginners or for the very enlightened
for advanced students
from a single impulse and equally to everyone

because the system of differences leads to that
that everyone learns exactly this way
as needed for the Salvation of all

and when we see
that the regulation of events is your personal business
you understand that any phenomena of Reality
practically very deeply embedded

into your Soul
which is present yes present
at the moment of manifestation of the Physical Body of God

i.e. when you see the Physical Body
Well, mentally it's one thing
but here is the presence of the Soul
near the Physical Body of God
this is an action that is correlated again
with the Action of His Physical Body
where is His Soul this is interaction
with your Soul
in terms of creation
of your physical body

and when you see this mechanism
Well , for example, when listening to an audio recording
of this seminar
then you see that following this mechanism
allows you to create Reality like this
which you laid down in the primary Thinking

i.e. for example in primary Thinking
by the level of Salvation of all
we need everyone to be resurrected
but since such an idea was realized
so it is

because thought exists
only as a composition
namely, hard event phenomena

and when you see
development of this thought into the future
then you come to that
what are you building yourself
in relation to this information

i.e. you come to that
what is your next self-construction
it is just an adaptation
to the next control

i.e., unlike the system
here I saw a plant, a stone and an animal
your personal level
your personal perception

precisely according to the level and likeness of God
One God
this is what you are looking at
as my own initiative

that's what I'm getting at
what is initiative
how to understand it how to personify it with your personality

i.e. in the collective Consciousness
there are a lot of controls
and that's what your personality is
when well from the point of view of the One God
Physical Body of the One God
almost everyone is like Him

and therefore the identification of personal characteristics
this is the main thing in the process
Well, when is the collective Consciousness
is a powerful controlling factor

i.e. the allocation of one's own personality
this is a special task in this case
because when you look
on the Physical Body of the One God
you understand that in principle everything is arranged
essentially the same
and control of all
element is a simple task
i.e. you can control molecules, restore health, etc.
Macro events

and when this sameness
as if it starts to translate
from the point of view of Divine Perception
i.e. unification of all phenomena of Reality
the main thing is to find your own personality
at a specific point in the event

and when you are at this point of the event
find yourself
then you can find yourself
only by your physical body

pay attention
This is a very strict axiomatic Law
i.e. you just perceive yourself and search

exclusively in the form of a physical body

at the same time it is possible for self- diagnosis
introduce some parallel systems
let's assume the question is yes

i.e. you discovered yourself
in the total volume of unified information
and then getting closer to oneself
it's just that, as it turns out
logical look at yourself
i.e. you kind of look
through the eyes of the logic of your Consciousness
on yourself

and as soon as you fix yourself
you see
that the World has already been created

i.e. it turns out that the creation of the World
from the point of view of the One Body of Physical God
this is self-determination in this World

and when we set the task
then the One God also set before Himself
the task of Eternal development
Self-created

and the One essence arises
which personifies precisely that collective Consciousness
which is already naturally capable
so, well, to resist any configuration of events
any combination of events
various related for example
with possible development into Infinity
some planetary systems

when we know that we have the same functions
the same possibilities
that the Physical Body of the One God

we understand then
that any event is a subsystem
i.e. it is controllable

and when we come to this understanding
even if only at one point yes

from the point of view of growing there
there is your heart
or there is a liver, etc.
then we see that the control in this case
this value is practically constant
well, that is, it is given forever for the Soul of a person
and the dynamic value for the Spirit

so here is the connection
constant and dynamic component
gives such a value
as a physical body in your Perception
your own physical body

and it turns out that you are heading towards an event
Well, if you look at it from the outside and write it down
video camera
any having the opportunity
see past and future events
at least there in the interval of plus or minus two or three days

then your movement is that
what is the impulse of self-construction
you set yourself, well, basically, the task of organizing
your cellular level
there in a second, there in a day, there in a month
organize events and move

then it turns out that movement
led by the One God
this is not a dependent movement
you do it yourself

you can look at yourself
Yes, the One God gave the task
but He gave complete freedom
self-construction self-organization
showing that you are a complete manifestation of your will yes

i.e. you build yourself
why is man designed absolutely independently
because he always builds himself
if he, for example, depended on it
from some logical connections very strictly
then such a number of events
People of course wouldn't have it

there are a lot of events here
development of civilization
this is the principle of independence after all

when do you come to this principle
through the personal plan
you come to that
that you must understand others

and here is the concept of another
this is of course in the connection task
with the Physical Body of the One God
differs from your personal actions

because you can do one thing
and man is completely free
which one near you he can do differently
in terms of what he perceives differently
The Physical Body of the One God

so that in the collective Consciousness
these actions were united
the task is precisely to save everyone
is a task that accumulates
your own actions
i.e. it brings them into unity of action
practically in joint actions

and when you see it
then you see that your joint action
well, for example, there on the salvation of all
there, for example, is a concentration on numbers
this is also an action
together with the Physical Body of the One God

i.e. here is the co-action
a sense of camaraderie
sense of co-operation
it's solely because of that
what do you know what is the Physical Body of the One God
which does exactly the same thing

i.e. His Thinking
His control system
it is aimed precisely at this

and here it turns out
that collective management coincides
under God's control
after all, he who originally created life
He naturally created all the conditions
so that life is infinite

and it turns out that when you see this
then you see in the first level
you see only on joint collective management

why I give according to my Teaching
about Salvation and harmonious development
exactly the task
dissemination of knowledge as quickly as possible
about universal Salvation about technologies
about prevention technologies
possible global catastrophe

because collective management
This is the first primary level of connection.
with the Physical Body of the One God
through the joint work of all

when everyone understands
why the other and how the other does it
well maybe "how"
this is if the digital rows are the same
that's understandable

but what is meant is
"how" in terms of what he understands
what to do
understands personal responsibility there
he understands that it depends on him
so that there is no possible global catastrophe
even from one person

when this action happens
then we are
in a very calm, balanced environment
after all, God of course has a phase of absolute calm
He is absolutely confident in His actions.
He knows what will happen
for He created all future events

that's when we do the same
then the question arises
and that depends on us

once the event is created
He created it through us.
through our phase of Consciousness

then our difference
from His Action
in practice it is often like this
what is our action
it's the same thing
what is His Action

i.e. the actions are no different

and when you come to this
then there is the restoration of the organ there
there after stage 4 cancer
or there is a human body
for example resurrection
this action will be enough then
harmonious, understandable and simple
because it's your own action
no different
from the Action of the Physical Body of the One God

and why in this case
I also cited this case
well , for example, there are resurrections or restorations
for example, there is some organ there
because there is a similar system there too
in relation to the Physical Body of the One God

i.e. in essence we are talking about
so that well how to reconstruct events
preliminary laid down
at the Physical Body of the One God
Well, that's what we're talking about
what needs to be agreed upon in this case
with the One God
Well, let's agree mentally, yes , or physically

and say that there was such a person
there is a need to restore such and such an organ

and here it turns on
social contact system
that's what people are used to saying
it's social to call on the phone, etc.

in this case or is it a mental system
or is it some other one
then we through the thought system
through the control system
in this case we can use the mechanism
as if the agreements were just that

because the One God naturally has
systems of own actions
and He can do it

at the same time, well, how would you have to learn yes

then if something is urgent
i.e. we can always take urgent action
if we have interaction data
with the Physical Body of the One God

and when we cross over
to the action of the Creator of Personality
i.e. when a person acts himself
for example, let's say on behalf of myself
or on behalf of the collective level of management there
to solve the problems of universal Salvation there

then here we understand
what is the sign of control
which is in each of you
and this feature is embedded in that
that self-organization is yours
and your actions
this is already your control

i.e. you are in the principles of self-creation
have already realized themselves somehow
then this is a sign of control
from the point of view of future events
shows
that you build future events often practically
well, it's not like it's related at all
with past events

Well, that is, of course there are methods or systems there
when a person
remembers something or for example does something
remembering taking into account past events

but from the point of view of future technologies
what happens in the future is always more important to you
optimization of future processes

so that's when we come to this
in the current tense
then the past looks like this
that your organs and your physical systems
your thoughts and feelings are that
that the past is accumulated in them
and all the past

if you look at it from this point of view
then the accumulation of the past
happens in every personality
absolutely, in general, completely

i.e. every person is
the bearer of all past events

and then we get the following configuration
that the more we develop forward
the more events seem to enter
through the Spiritual level of control
in every person

and with Infinite development
a person begins to accommodate
Infinite number of events

then it turns out that
Well, if we consider , for example , the evolutionary law
genetic level of development
well, it 's even been researched
at the level of, so to speak, material systems

then here it turns out
that for the One God
namely His Physical Body
the content of the information is as follows
that each element of information
both incoming and outgoing

has infinite magnitude

i.e. if we come to this at least on one cell
then the cell becomes Eternal
and around her the body is already indestructible

i.e. it turns out that
Well, things are going well there
they're going well there, yes, things are going well in terms of security there

when we talk about security for example
there is the leader of the country
then in this case let's assume the Russian Federation
then here it is quite often to create something nearby
some or a particle
even having the functions of Infinite development
there is no air in the cells
the person is safe

this is from the point of view of a specific security technology
because by direct control methods
Absolute security is achievable
by no other physical methods
it is naturally unattainable

and that's why it turns out
that in order to ensure
it means that there is real security of the individual there
we need to think through
here is the system of interaction in events

when you organize your own security
own health

i.e. you develop and create yourself together with the event
that's why i suggest now
apply such control
based on methodology and ideological level

i.e. look at yourself
how you and the event are created
at some point in your events
and solve problems
from the point of view of the tasks I set
and your personal tasks
I will work with you

when you practice such methodology
be more careful
from the point of view of again determining one's status

i.e. start with yourself
at least from my intuitive level
where the Soul is manifested as your personal characteristic
in all places related to events

i.e. this is a specific methodology that I said in words

i.e. you see that point in the human body
for example, there is a heart or a spine
or there is some area of skin
or you will recognize some of your thoughts
and around this you should see
that all events are normal

Moreover, you must see with your Soul
that all events are absolutely normal

i.e. I have now given you a control system
which in essence is precisely related to that
what you have to work when you manage
with every object of Reality
well, completely in a real environment

for example, about today's seminar
I recommended writing down as much as possible
to record the situation later

and from a training point of view
for example, if I gave the last seminar
digital concentrations for specific tasks
for example, stop the war in Iraq

and well, when it came to that
that there was a minimization of casualties there, etc.

then we are talking about the digital series
which you used for example
Well, for example, if you consider
so simple in general
picture of conformity
when a person enters a church and prays
there are own configurations of the form
then it is forbidden to film there, etc.

i.e. these are individual manifestations

and here is the digital series that you used
this is your own personal level
and therefore, well, recording this is not desirable
to ask you there
well for example do you want to see how you are manifested
in the form of personal management

here, on the contrary, we are talking about that
what when you write in this seminar
and repeatedly consider
you can see
where for example is the Physical Body of the One God
and how do you view Him from your position
and how do you take this knowledge from Him personally?

i.e. it's quite simple
knowledge to take personally yes
for example, did you notice at school
what if the teacher starts to think something
knowledge comes to you that well, as if from him simply
you don't ask anything about any subject
i.e. some knowledge from his physical body

please note that knowledge comes because
that you perceive his physical body
and it happens without words there without questions

the same now when you make a recording for example
and compare it with concentration technology
in rows where it was desirable to minimize the recording
or not do it there at all
exactly at the time of the seminar
then the task is as follows

if you don't make a record and then make a record
and watch it many times
there, for example, listen
then the technology of assimilation and management
should be the same

i.e. that you listened once and did the control
What
you can listen there multiple times
or listen there for example for months
but the control from the first time should be no less

the efficiency should be generally the same
at every level of management

i.e. the task is precisely the task of Saving everyone
consists in the fact that
what is listened to even once or you study further
your words for example
precisely according to the technologies of my Teaching
about Salvation and harmonious development
there must be such as you say
and people are saved immediately

because they just heard you in the first place
secondly, because just listening is enough
have knowledge

and that's when we come to the comparison
of these two technologies
well, like a one-time Perception
and Perception of multiple
that's how it happens in life

in life, well, there a person passes on some knowledge
what is meant is
from the physical body, for example, of a person
he transmits knowledge
and then you still communicate with him

i.e. you perceive the whole picture at once
about him or there from him
this is how you communicate later
can perceive multiple times
but the attitude towards him is original
Well, it's installed, maybe it can be changed somehow

but in essence, only one thing doesn't change
that you know for sure that you saw him
and you know him there, for example, yes, you talked

this is perception yes
vision Perception well there as if on a physical level
this is something that exists as a single-valued constant

i.e. nothing more can be said here
Yes, we saw this man.

and it turns out that at the management level

this is the constant
this is what the third one exists
i.e. it exists
namely the Physical Body of the One God
which speaks about that
that in general there is some kind of interaction going on here , yes

i.e. if there are tasks of the third as purely logical tasks
i.e. the One God who created all Reality
naturally life develops towards Infinity
then they exist physically as well

i.e. you need to see it here
what do we have
a very simple system in fact Reality
in the sense that the task at hand is logical
always manifested physically in something

and this is a physical manifestation
in fact it is like this
what is this really
that physically it can be said
for example there is the One God

and when you hear this, for example
well, not even in the form of Thinking
and in the form of the fact that some person there said something yes
then you see the line of God in social events

and when you see it
Do you understand why, for example, God directs
some political events
in one direction or another there are social events

here is a vision of God's Action
when He is all-manifest
and is also located in the Unified Physical Body
and the ability means, well, in Consciousness to perceive
as a single value
this is what we always talk to God about

i.e. at the level of communication
at the level of , well , communication
With soul
In Spirit
Consciousness
this is the internal conversation he talks about

that the birth of the word

this is what it was originally

i.e. the whole conversation had to take place
if there is yes the mechanism of the word
here is the definition of the word as a control value
from the point of view of conversation
with the Physical Body of God
shows that, well, generally speaking, words consist of
from which two vector components are obtained

i.e. the vector going away from you
and the vector coming from God
i.e. the word is divided , for example , into two parts
or some one part is highlighted

and it turns out that the verbal level of transmission
this is what is regulating
here are the words the concept of "interaction through words"
this is what God determines the movement
and with your presence
and as if delegating there, for example, the sound form

i.e. His manifestation is in fact
it could be like that
delegated something to someone
gave some kind of power of attorney
another person performs

it turns out that we can say
that the spread of the Physical Body of the One God
this is an action that goes over
from the internal level
from an internal need, for example , communication

and when we have this communication
as a system, for example, let's assume, of its own management
then there is nothing here in general in this regard
such as problematic

because of its own management
this is what is aimed first of all
on yourself
i.e. you see management as your management
your management directed at yourself

and when you do that
then you see that this is the manifestation of the One God
this is, in general, a manifestation
which you have from outside
i.e. from an external event

and when you see that the external event can be anything
then your own Consciousness
may be as if immersed in his own thoughts
and at the same time some external events occur
that you react to

and it turns out that this is the internal level
which well you think about something and somehow manage
and some external events occur
which you must perceive
as a reaction system
you get that you are engaged in self-construction
then when you work at least in two parameters
i.e. an external event
and your Thinking
external event
and your Thinking

here you see that there is some kind of undefined phase
which says that when you do this
in fact, you are building some specific organ
near which it necessarily arises
your entire physical body

pay attention here
that when a person sleeps he does not feel himself
but at the same time if he, well, no matter how often he doesn't feel himself
as if exactly at the level of the Unified Physical Body there
he sees some dreams there for example

and if there is some rustling there or he was woken up
then this level immediately gives self-awareness

i.e. and here too, first of all, sleep
what would it look like in this case
how to separate these levels
level of Thinking
and the level of well , relaxation and rest
where a person is most located
as if in the inner world of management
and the rustling is like an external event

i.e. here is division and sleep
where there are phenomena there are divine ones in the form of images, for example
and there are often some kind of predictive dreams there
then here the exit is precisely in the manifestation of God
Well, in such an environment, in general, like a dream
here from the point of view of the mechanism
well, exactly like mechanics or mechanization
You can even use this term
development of your Consciousness

i.e. you can bring the development mechanism to that
that you can regulate your sleep
see here well there is nothing unusual
a man is resting

but when you move on to the product of Thinking
then you see that it's a dream
this is the external organization of a person
i.e. during sleep a person is to a greater extent
organized by external systems

well , that's understandable, yes, when, for example , a comparison with that
that when he sleeps he is more in
as if in a fixed position
then external systems become more controlling

i.e. approximation in this case
Physical Body of the One God
it becomes the next one
that the closer the Physical Body
to you
during sleep for example
the more distant
from the level of logical Perception of Consciousness
well, like some kind of dialectical law
more related to the optics of Perception

indeed, the closer He gets
if you are sleeping
then in your Consciousness it is distant yes

so when you want to self-tune
on the Physical Body of the One God
already in a dream
then you should see Him as if internally

Well, for example , at the level of the Body, yes
this is somewhere in the intestinal area

i.e. there is some level of light control
which is related to that
that you see in a dream almost those events
where there is also sleep organization

i.e. if you look at it
Well, watch your sleep carefully
then here comes the same vision of the organization of sleep
but the vision is in the form of your physical body
i.e. you tie the dream to your physical body

as a rule, people say I had a dream
Well, it may be quite rare
Of course you can say that
what was there that I took at the moment of sleep and looked at there was another dream

then you have to be very generally here
a sensory developed person to see this
but this way you can develop sensory skills
Well, clairvoyance is brought to that point
what do other people dream about there
but still you saw with your Perception

then it turns out that you can do management
to the level of that
that it is like a personal parameter yes
occurs at the moment of rest at the moment of sleep

if you say what does it mean yes personally I went there for example
or there a person did some action
then the following element appears here
what can a person go if he decides to go there
but these are some external matters
i.e. social factor

in a dream you generally individualize yourself more
it turns out that sleep is a phenomenon of, let's say, individualization
is intended for that
so that from the point of view of the task itself
spreading the One Body
for example, the Physical Body of the One God
sleep is an action aimed at producing
contours of individual characteristics

i.e. you are in one place
For example, you relax there, etc.
then spreading this static yes as if phenomenon
to external Reality
the next element appears
that at the time of sleep he should be safe
The world must not be destroyed, etc.

some work still happens during sleep

i.e. this is the work
this is your natural development
normal development into the future structure
and when are you future event
like, well, you do it together with sleep

it turns out that fixation means future events
she is like that
what you kind of mark in the space of events
some environment
which is more or less stationary
then it is easier for you to build the following events

and it turns out that when you from this point of view
approach distribution specifically
of your physical body for the future
some configuration of events
then it means that the dream here has an important meaning

since it turns out that the marking mechanism
as if he were such
that he goes through a dream, for example
so that's basically what happens here
that the Physical Body of the One God
also by analogy should have some
in general, fixing systems around themselves

because now I'm already moving on to that
what if a person has it
so by analogy there is
at the Physical Body of the One God

so these are the systems
which correspond
well, some kind of fixing systems
it's not necessarily a dream

a person can go somewhere, for example , to a cafe
think something over or stop to think about something
or think something through in business yes
some fixing systems

then here for the Physical Body of the One God
this is action
this is the realization of a person's goal
through the task of universal Salvation

pay attention here
that God comes to man
through collective
everywhere through collective joint actions

i.e. He sets the task of Salvation
in front of everyone initially
Well, logically it is
He is, well, sort of at that height of His
where He set a task for everyone

and then the implementation of each specific person
this is what is recorded
its action was recorded

after all, He is God in relation to other, well, levels
also needs fixing
in accordance with the actions of others for example
His goals

and therefore it turns out that the analogy
well, like a person's sleep
this is a realized human action
and note that when you implemented the action
some kind of rest comes, something like sleep , yes

i.e. some relaxation, you calm down in front of him
the action is completed you have calmed down in your Soul
Please note that you have calmed down in general
in four places at once
Soul
Spirit
your physical body
and the Physical Body of the One God

i.e. that is where the contact takes place

with the Physical Body of the One God
this is exactly the kind of personal contact
and this is the peace of mind
this is what corresponds to a person's dream
i.e. One God at this point
He fixed himself for that
so that there will be the next event

and if you look at the future
it grows exactly like that
where there is a constant chain of implementations
and when you see for example the implementation
well let's say the future process
as a process, well, actually, of regulation
some situation yes
or is it the other way around, the situation is normal
do you plan to use it for example for recreation

then it turns out that
well, so that there are no accidents at the nuclear power plant
in general, not necessarily on any specific one
or there was nothing dangerous there at all
for a person
there was an explosion at some chemical plant

then here is the signal normalization level
as if the level of the Norm
this is a manifestation there
in this place
Physical Body of the One God

and logically what does the situation look like?
People are created by God
they do specific things there

i.e. it turns out that God sets a task for them
He somehow puts it in the form of some kind of instructions, yes
according to production technology
but if we go beyond the instructions
as if from the other side
then we see His Face

i.e. well, go to some instruction
there are technical operating conditions
and try to see
The Face of the Physical Body of the One God
i.e. the Face of the Creator

and when you see the Face of the Creator for example
you see that Norma is already in that
that this is a manifestation of Him
i.e. this book for example
this is that He is manifested in a non-physical way
and by human action

and this is where the combination happens
actions of the human creator
and the Physical Body of the One God

here it turns out that joint actions
these look like acts of Salvation again
i.e. so that there wouldn't be any kind of explosion

i.e. so that it would be
systemic, for example, harmonious development
and it turns out that Eternal development is essentially
this is the creation of those systems
when the Face of God and His Physical Body are all manifested
in any human action
there in books in mechanisms in machines
in some events, etc.

and it turns out that this is constant contact
i.e. the fixation point, for example, yes, in the form of a dream
or there in the form of actions completed by God
your completed actions

this is what you constantly
You see it all the time, which means you perceive it.
His actions are correct

and your events are then not overshadowed in any way
i.e. you can actually do the management
the one you need
and it turns out that it is also needed by the One God

i.e. it turns out that harmony still has
and the nature of harmony with God
including the Physical Body of the One God
because He created His own Body
It transmits knowledge and you must be harmonious.
in relation to His tasks

i.e. the task of harmony does not consist naturally

only in personal harmony there
or in harmony even of the system of collective Consciousness
which needs to be developed
but harmony with the Physical Body of the One God
this is a different type of harmony
this is where your heart is already built in events
built to last

that's what I said, we need to build
there is also a point where it has already been built
for an Eternal number of years

and when you mean well if you use such a term
as "an eternal number of years"
are built in every iteration

and when you for example make control in this level
then you find a point in the heart
where there is an absolutely Eternal construction of its existence
at any point of the event

and from the point of view of Infinite levels of events
a person can be in every place in infinite time yes
then it turns out that it is really logical
there is nothing special here

i.e. it comes from a person like this
that a person simply finds a mechanism
and Eternally evolving

and from God it comes like this
that He did it in one place

He did it generally speaking
at My Place
and when He made Himself
then everyone has it

that's why according to my Teaching
about Salvation and harmonious development
made by you well there inside yourself yes
self-healing or somewhere in your events
which naturally concerns the events of all
should be transmitted precisely according to this principle
just what did you do
this was passed on to everyone

I'm showing you a specific transmission channel now
it exists as a level of unity
and the level where the tasks are the same

well, it seems to be quite warm
such a pleasant attitude of the One God
where do you see
Well, what ? Well , he 's kind of in that state.
which can be called a state of, well, sort of, Norm, yes
or the state that He is pleased there
here is the concept of "satisfied" yes
admitted to freedom
to freedom
i.e. up to the will of God, including

and therefore when you see this Will
manifested there in your Eternal Heart
then you see what you logically already see

what about the rest of it
well, there, in general , well, the whole organism is also Eternal

i.e. logic grows from a single center
logic is what gives
Well, in general, often a significant part of progress
or there, for example, the evolutionary development of humanity

is this actually a mechanism or a consequence
including the mechanism and consequence of growth
from a single level
for example, because if the heart is eternal
then the whole organism is also Eternal

so here is the logic
this is the logic of the One God

i.e. when you see
at least one element of His manifestation
then you see
that the One God has the properties
which are very easy to remember

for example what I said
it's actually very easy to remember
because you just saw
what does he have
that's how you looked at Him and saw

i.e. one of the control mechanisms
is to look at the One God
and generally speaking do the same
at the information level look there yes
level of physical actions

and when you learn this way already
then a certain nuance arises
for example if you look at a person
who skates
even if you look for a very long time
anyway, well, you have to practice, yeah

i.e. there is an element here that
what is there for the universal Salvation
there someone extended a hand to someone and the other was saved
it's done simply
for some details if you want to ride
on skates or, for example, figure skating
then you will have to study

here is the element of study
it concerns precisely the element of complete free will
where to shake hands is also complete freedom

Well, that's just who you are
i.e. you will always lend a hand and save
that's who you are

that's why here
as if it were an element of your personal salvation
it's built into the way you're designed

and this device is also freedom of will
but God is in you

and when you see
this level is like a mixing intersection

or even like the flow of this
in optics it looks like leakage

i.e. this is how the will of God is manifested in you
exactly what is naturally in you
His will, well, there is a Divine system
well which means that the world is not destroyed

that he will have mandatory Eternal development, etc.

i.e. when you see that level and your personal level
then you see that any actions will be normal
i.e. this is what the vision of this element shows
that you are confident in yourself
yes you can worry there
you can maybe somewhere naturally worry
but in essence you are always calm

after all, the One God is still essentially calm
at the level of what He knows
absolutely all events
and knows that you can handle them
there in the Norm of precisely universal Salvation

that's why it turns out
this is the universal Salvation
this level of Norm
this is the physical body
the fixing element here is
again the human physical body is healthy and normal

if there is an external environment
Well, for example, in a dream there is an external environment
in relation to a person

then here it turns out
that a person already is
the determining level of the external environment
i.e. the human physical body gives the Norm of calmness
because the physical body exists
and it may well be absolutely healthy there yes
be safe, etc.

and so that, for example, there would n't be a coup in the US
which could lead to some problems yes
world-class security
so that this military coup does not happen
to be fixed often enough
in the position of the Norms for the USA

i.e. the person is simply fixed
that from the point of view of the Physical Body of the One God
Norm is just Thinking

He fixed himself in this position.

and there is a Norma happening there
if collectively fixed
or even through the numerical series there is concentration
then the norm happens faster

then it turns out that it is prevention
from the point of view of the security of citizens of the world
consists in the fact that
that the Norm applies to everyone
from the One as if by action
where you enter the position of the Action of the One God

and when you consider this position as personal
then it becomes clear to you
why are you absolutely clear and why
at the time you answered this way and not otherwise

and you see how the other side
who asked you something there
if she was worried or concerned or something
in action to you by all the phenomena of the World
so that they are normal

i.e. pay attention when you act
how exactly does the One God work
in Your Physical Body
through Thinking
then you see that the other person is very seriously concerned about it
what is happening in the whole world

i.e. you see this line of the Soul
what for example in other positions
well or it's difficult to see
or can we only consider it logically?

and I'm saying that you see, generally speaking, with your whole body, as it were
i.e. you see with your whole being

but if you see with your whole body
then you have a normal body
i.e. healthy
a body having a favorable level of events

and it turns out that the concept of "seeing" means with the physical body
and if we ask the question

and how, for example, of the Physical Body of God
so, well, he sees it there, yes
let's assume in terms of the clairvoyant option
then for Him from the point of view of logic
as if everything is the same

then here it turns out
that vision is precisely with the physical body
this is the construction of events
from your physical body including

and it turns out that when you make a control system
for example, according to my methods
well, due to the development mechanisms there
Consciousness
Thinking
then this is where your physical body works
precisely from the point of unity of all actions
in terms of universal Salvation

i.e., in general, this is fixed in logic
as an action from the Physical Body of the One God
even if He is not near you

and when you see His manifestations, for example
well, it happens that in some there
let's assume extreme situations
someone says over there
as if a person took it and threw it somewhere
somewhere there he pulled out the savior, etc.
i.e. people see Him really quite well many
has been there in extreme situations, for example

so it turns out that there was no
data from extreme situations
It is better to see the Physical Body
in general, in a normal calm state

then it turns out that actions mean visions yes
actions of manifestation
they are aimed at that
that this vision must be completely real

i.e. the Physical Body of the One God
should be considered
well , either clairvoyantly or on a physical level
exactly real

because we always say
about processes that are completely real
and not, for example, only about the processes of Thinking

or for example there, well there, in the so-called "subtle" planes
or control only by Consciousness

so when you start asking the question
exactly like that
then you see what is on your physical body
there are points
where you just kind of came into contact with Him
i.e. with the One God
precisely with His Physical Body

if you remember there
how does the fetus develop, for example, in the prenatal period
then the level of contact in terms of growth
originally designated by the One God
it happens almost constantly at first
until the outline is defined exactly according to the shape of a person

then a level of freedom emerges
and the contact begins one-time
i.e. it turns out that
to get into continuous contact
need to consider
and where is God manifested in the plan of nature
in terms of, for example, external elements of Reality

so here it turns out is the perspective of each event
he is in relation to you
completely free first of all
but in general it is individualized

here is a sign of individualization of the event
when every phenomenon is perceived by you in this way
as a phenomenon located towards you
This sign indicates that
that God is developing events in relation to you
because in fact you want

because if you enter into an individual characteristic
then you have considered this event somewhere in one way or another
so you've already looked at everything a long time ago
when were you created

at the primary level of creation of the Soul
there, as a rule, everything is already visible

i.e. you get the level of Infinite development
in the single impulse of the One God
who created you

it turns out that all external events
This is a level of optimization, in general, or something
level of co-development with everyone together

i.e. everyone should have
Well, the level of education is the same there .
everyone should be able to save themselves and everyone else, etc.

and when you see
that all external Reality
this is the level of , well, knowledge in fact
i.e. you see that the level of items
he has exactly that side
that knowledge is contained in the properties of these objects

let's say you need to light a match there
or lift some stone or go to the store
do you encounter such properties of objects
by form
by content
by action
not to mention any collective social actions

and when you see
Well, this path of knowledge
you see
how, generally speaking, does the One God walk before you, for example
or there He is walking somewhere nearby yes
but you see His physical gait
He goes leaving traces, physical traces.

i.e. He just sort of passes by
in front of you

and therefore if we consider
these are the traces of the action
as His manifestations
in the form of including tasks for you
then there is how the fire of this match burns yes
it is possible to determine the properties of the entire surrounding world

while I was at it I lit a match there

i.e. every event
tie up
with the outside world
and then we get that there is One God
He's actually right there

true well maybe there yes
He's somewhere behind the wall of that other room.
but puts events in front of you

but this is a conventional designation yes
the wall was also built by Him for something
why isn't it cleaned up yes
and you would look directly at Him
at any time

The question here is that
what you owe yourself
which means you are capable of it yourself
i.e. you are able to create and do things yourself
well there is that wall yes
or lay bricks with your hands
or there by Consciousness, etc.

i.e. it turns out that we have our own development
in general, according to the tasks as coming from the One God
but also to each is given according to his abilities naturally

that's why it turns out
that the more you develop these capabilities
the more you save everyone
and have the opportunity to do so
the more so, generally speaking
and you are also asked to do the same

therefore, as a management task
let's do the following
so having considered the Physical God
i.e. that is, the One Body of the Physical God
near or somewhere where you can

Well, whatever works best for you
look at Him

and make sure that your joint actions

i.e. His
and yours as a creator
were like this
that at each level of management
you can do more
they ask more of you
then you can do even more

as if constantly increasing the speed of control
solve your problems again
and the tasks of Saving All
at the same time

the meaning of this control
to a greater extent of course for that
that you are constantly increasing the speed of control
practically well looking at the Physical Body of the One God
as if understanding the next level

and the further
the faster you work
I will work with you
please let's start working

Please note that at this level of work
you increase the speed more
this is what you started now when you work
because the more you increase the speed
the more it starts
this is the level of enlightenment of information
and you practically come to yourself

i.e. you see yourself
in the form of a completely free personality
and at the same time this level is also like this
what do you actually have, well , basically
your own personality
where do you understand yourself as Soul

i.e. as a complete system
which is completely under your control
i.e. your Soul
task body, etc.

i.e. the more you increase the speed
and accept responsibility
you solve it

i.e. you save everyone
the more you control the situation on a personal level

and this is the principle of complete freedom
and by the way the principle of rest
i.e. the person is resting
when he took the situation as if at the management level
under control

and when, for example , you set the task of rest
like, for example, the task of simple management
then the implementation of management at the maximum level
this is rest

i.e. it turns out that you can relax like this, for example
and if we consider the conformity of this
the tasks of the One God

then we see that when the question is there
The Physical Body of the One God as a term
which may well be in need of that
that you have to work on it
to implement this methodology
as much as possible there quickly wider deeper

then it is the Physical Body
There is nothing unusual about the One God
because you exist
and it is arranged in exactly the same way

and in this regard you have known Him for a long time
in essence of its own construction

so here is the recognition of its principles and work
Physical Body
through self-diagnosis
through self - improvement
through self-awareness
this is the principle of the development of the Spirit
as if inside oneself, inside the physical body

and when I said
what are the properties of the Physical Body of the One God
where is the infinite amount of information
implemented in the form of all events

then we see that the Spirit is also

contains all events
but inside your physical body

and it turns out that the Spirit
this is really something that is everywhere
because inside the Spirit
all events of Reality are located
by analogy with the Physical Body of the One God

then it turns out
what if the Physical Body of the One God
all events are located
well, like in a universal environment
where is the Spirit
His soul yes
Physical Body
it is one from the point of view of our Perception
well there are human perceptions for example
or Perceptions of any other system
flora and fauna

it turns out that if we take the concept
"perceptions of some kind of metagalaxy there"
there is also a certain element there, yes
external matter somehow reacts to the system

so in order to create this external matter
through Perception
you just need to embrace it spiritually
i.e. to realize spiritually

and when you see with physical sight
then Spiritual awareness together with logic
growing logical light yes
from for example the One Heart of the Physical God
this is the level of actually controlling clairvoyance
which allows you to control the system
at some level of your Perception

it is not necessary to look there
for example, to some star in the metagalaxy
and it is precisely this that is to be controlled

enough in your Perception
somewhere in the heart area to make control
or in any area of Thinking

i.e. it turns out that Thinking
this is the level of interconnection
actions
of your physical body
And
Actions of the One Body of the Physical One God

in this method Thinking
this is a level of some kind of communications

when you look at Thinking
as an element of interaction
then you see how well you resist-
well, like joint friction

i.e. if you, well , have been studying at school for a long time
with the same person and sit at the same desk
then often the same thoughts come quickly yes

this one
level of interaction of thought forms of the same type
was embedded in man in the form of a form

and so if you want
Well, get in touch there
with the Physical Body of the One God
in terms of there, it's like with another person

you can just take a look
your own form
and put it in the same size as you are
there neither decreasing nor increasing
your body
near the Physical Body of the One God

then you get knowledge
which correspond to the given moment
i.e. here is the principle of taking information
how to get information at all

if you put the question this way
then this is one of the methods that says that
that as soon as you do so
you see information
because the soil on which it happens
this is what opens up before you
near your body

if you enter
into some fixed system
where the information is clear and understandable
then it opens there
in general, closer to the elements of vegetation first
some images yes
for example , there, well, there, like a lotus in Nirvana
where is the system fixation
lotus yes plant fixed system

and here is the concept of "fixation" in this case
this is the Information Standard

when you see information
you should fix it normal right away

i.e. it is desirable to always be in control
put exactly Norma
namely the Norm in the perceived environment

and the simplest Norm
the Physical Body of the One God appears again

and if you do something like this for example
there are some actions to watch
where yes He has already paved the way then
it turns out that there are no special problems here
you just have to do it by observing

so it would seem that some such thing could be unusual
action angle
on the one hand, a simplified system

because well, it's enough to just do it by analogy there
everyone did something at one time or another
in the form of gymnastics
some kind of exercises, sports, etc.
it seems quite simple to do by analogy

but on the other hand, do it by analogy
it means not to make a mistake
there especially if we are talking about
about the Physical Body of the One God

and that's when we look at canon
from the point of view

exactly, well , it has a somewhat philosophical sound
then the exact level of control lies precisely in that
that our body is built exactly like that
as the Physical Body of the One God
of course when it interacts with Him
it does everything right
i.e. Eternal development is ensured
there is no possible global catastrophe , etc.

and here as a method of management
as a completely real environment
because the manifestation of the Physical Body of the One God
it turns out in general or maybe locally
or some greater or lesser degree
but everyone has it

i.e. everyone can find it for themselves
this area of His manifestation

and when you see well in physics yes
in your simply in your physical body
these phenomena
you can by analogy with one such cell
grow yourself completely

By the way, this is also a very powerful control mechanism
and well, how to grow yourself in events
i.e. create events together with yourself

and when do you cross over
already to this level of management
this is the level of building the World
you can build there
An infinite number of worlds , for example
some systems of control systems

and at the same time your pragmatic side
i.e. the social side
on the contrary, it will improve

i.e. it can be built somewhere in the metagalaxy
some kind of system
do management in information
and your side, well, there is social security
social
it will still improve
because you are building there correctly yes

in Thinking

here is the principle of construction
what is the level of Consciousness of Thinking
when working on some other environment
how to make your personal system
developed normally on a social level
i.e. well, there was normal health , yes
and the Norm of Events

and here it turns out
that the connection of the system at the level of understanding
as does the One God, for example, yes
in Your Physical Body
allows you to gain knowledge
well, in some kind of automated mode or something

i.e. well if you see
that there is a person nearby doing something
you already understand what he does
and there he goes across the bridge
You don't think about it, do you?
that you have to put your foot down first
from one part of the bridge to the other
You know
If he's walking, then you can walk across the bridge

i.e. many actions are completely automated
it turns out
i.e. this method allows you to work
almost not, well, as if thinking about it
about some maybe there
minimum levels of self-construction

and by the way, this is basically the answer
to a specific question related to that
what if we talk about that
that it seems like it would be very difficult to build something there

how to build micromatter there or the same bridge

but the Physical Body of the One God
already here or in front of you
It was just found
This means that He has already built this Reality

it turns out that He helps

God already has this
that you are going somewhere and are somewhere
already talking about it
that He helps with this
of course, if you went somewhere on an excursion
there were a lot of people there
this Reality already exists and has been there for billions of years
there are mountains there, for example, etc.

but the thing is that we are talking about that
that you personally build the whole Reality
at the moment

you perceive it now
it exists in your Perception
and exists objectively in the form of there yes
like billions of years of development
before that

but here is the Physical Body of the One God
can be demonstrated by that
what do you understand
what has he done for you here
i.e. how He did, for example , the events there

and try to understand
i.e. try to see
His previous actions
from the point of view of your original task

This is quite a complex design by the way
the tasks of the Soul to connect
with His Actions

why is he here teaching you this and that
or tells someone there that something needs to be done

you can see later
that there are people sent by Him
i.e. manifested from Him personally
Well, there are saints there, there are various manifestations

and you can see
how among people they are there near you
who is the messenger of God
towards you

and when you start to analyze
Well, let's look deeper into the situation in terms of personal management
you see that He is also manifested as a human being
who can be a person
helping there or acting

and it turns out that His Will is concentrated
as for example in you personally
and in all at once
i.e. for Him there is no division
that everyone must be saved
everyone must follow the path of Salvation

that's why it turns out
that the action of Salvation from the point of view of the One God
and located precisely in His Physical Body
this is an action aimed at Eternity
of each physical body
by analogy with Himself

and this is the action of Eternity
this is the correct perception of events
Eternal mountains there and Eternal Peace

or is there some kind of transforming World
it has a certain property
Well, let's say it 's a billion years , for example.
there were some mountains standing there
but that's a billion years
and if there are some tectonic movements
that means they change somehow

so from a human point of view
it must have the property
well, constant Eternal development
Well, at the age he wants
and it means it has more prolonged
i.e. more rigid, more universal properties
in relation to Reality
to the same mountain

therefore the outside world
in this case has the property
still, as if less in time
in relation to a person

and that means it was originally created by you

well some kind of situation
or created by the One God
Soul
she has already seen this situation
because there is a level there
after all, it is precisely the level of universal Salvation
manifested in that
that all the elements are, well, like, Reality, yes
all elements are like that
that you see them more transparently from the start
than you just think

you might think that they are a billion years old
and you there, well, there, for example, less than a hundred , yes
but nevertheless
from the point of view of Thinking
from the point of view of Perception
you actually have a deeper potential

and then these mountains become visible before you
as if they are folded in Perception
and then you through these mountains through all the phenomena
see His Face
see His One Body

which is actually in front of you

and when you see it
you are already becoming perfect
i.e. the principle of perfection is embedded here
in contact through the phenomena of Reality
Well, for example, in the way that I just described

This concludes today's seminar.

thank you for your attention
