The Teaching of Salvation and Harmonious Development

**Spread of the Soul
into the Creator's Action Area**
04.03.2003

Implementation and distribution
Teachings on Salvation and Harmonious Development
Spread of the Soul
into the Creator's Action Area

Hello again
Today I start a seminar
which is called
Implementation and dissemination of my Teaching
about Salvation and harmonious development
and method
distribution of the Soul
into the Creator's Action Area

in this case is considered
the basic principle of the Soul
when the Soul exists
in the event area

i.e. generally speaking the Soul of a person
exists and develops
in the area of any event

and when it comes to
about distribution
into the Creator's Action Area
then first of all the question is considered
What
The Creator who created the Soul itself
It is also located at the same time
and in the event

i.e. it turns out
What
external control structure
She is primarily focused

in action
as the Creator
which is already in the future
i.e. a future event

for example if we consider
aspect of the future
or if the past
that means the past is also obtained

and also the second level
this is when the Soul actually spreads
when we want to consider the issue
precisely in terms of the spread of the event
then first of all it is necessary to work out
element of space of this event

i.e. where the event is located and where
The soul must spread
so that's when we talk
about spreading into a certain space
that very space of the Soul
and is this space

i.e. here it is generally speaking
looks like an axiom
That's why
What
in the Soul there are all the spaces of Reality

and when we leave
from the distribution level
then first of all we come to the level
when a person acts
with a minimum level
manifestations of their action

i.e. if we look
on life as it flows
that's visible
that life happens often
simply according to natural human laws

i.e. a person for example Well, I often wondered
why is the water flowing like that there
quietly for example Yes

waterfall loud

why are people around

well in some situations

this is naturalness

and here is a sign of naturalness

this is the presence of the Soul of the Creator

and when the Soul

spreads in humans

in the event

then this is a sign of naturalness

it applies to the event

i.e. distribution

this actually means for the Soul in essence

the main factual basis of the event

and therefore for every Soul

each event is actually unique

i.e. and for the event

it is the presence of the Soul

generally speaking, any person

well, actually there is no Soul there

these are peculiar nodal points

which form, generally speaking,

even events remote from the Soul

and that's when we start thinking about that

and if the event is, for example, very remote

then what is the influence here?

is a specific person there

who, for example, is not interested

in a specific event

Well let's say there is a farmer

somewhere in the United States

the rocket shouldn't explode there

with a nuclear warhead on Russian territory

i.e. what kind of communication systems exist here

if it concerns the USA

it's clear that the farmer is interested in this

but in principle

if the tractor is produced on the territory
there well, some European country
then this concerns the farmer rather conditionally

so here is the principle of combining events
or well, let's say, such relevant ones
which concern a specific person
or of little relevance
this is the principle
how God created social Reality
precisely in the Perception of the Soul

I introduced this term here
as Soul Perception
The soul perceives social Reality
as a system of many nestings of external events
example , when a farmer looks with his Soul
then for him these are equivalent events
What
tractor
What
there is a possible explosion of some kind of nuclear missile

and this principle of equivalence
it is extended to practically all phenomena of the World

if we want to suppose to get a cure
Well there from a complex disease
even if it's another person
then there is a simple principle
it is often enough to observe
or at least imagine for example
how does a plant leaf grow

and such a method
it allows the Soul to spread
in fact, even the person himself
on plant growth

because there is a spread
i.e. action
it means Perception is actually that
what is happening movement
and the plant grows normally, for example

then the same action

i.e. the principle of unification causes healing

and here is such a method of treatment
by the way it is very intense
with very complex structures in the body
and not only a person

it's enough to just take it and "hang" it ^{there}
well, conditionally in quotes information Norms
for example on a plant leaf

and a good plant
it will still grow

and it turns out
that this is the pushing through of one Norm
for the whole Reality
leads to healing

Well there's a kind of big magnifying glass effect
when one seemingly unrelated element
it starts to work ^{in general}
on the control system
is no specific person ^{there}

so based on this law it turns out
What
when we are engaged in the distribution of the Soul
i.e. a virtually silent, all-accessible system
from the point of view of an outside observer
then we can get any resource
in terms of health improvement
in terms of management
only due to that
that we are actually making this resource like this
that ^{well, there, as if} by the lever optical principle
^{sort of} get this resource there
due to the system of small levers

i.e. we make a small lever
by equalization
and by that
that the concept of distribution does not include the concept
^{there are like noise} effects in Reality

because the Soul is spreading

she is like that
what the Creator has already put into the Soul
the structure of the next development

i.e. in the Soul there already exists that level
what does it mean in the next level
The soul already contains absolutely accurate information
for example about an event, and about any event

so when we talk about solvability
we are talking about that at all
that we are just getting started
to perceive again with some element of the Soul
that the Soul is already here
there seems to be a developed Soul
she is here

and here is a sign of development
is that you are just
with your own Soul
you start watching
to attend another event

and here it turns out
that when we talk about a part of the Soul
which is widespread
or there about a part of the Soul
which for example perceives yes
then we already come to the One Creator

i.e. to the One God
which defines and regulates
all these processes

i.e. the path to God
here lies specifically in the mechanism of achievement
through distribution technology

it turns out that the path to God
and do as the One Creator does
this is an achievement of precisely management
achieving universal Salvation

through one single element
The soul is a single element in the Personality

and therefore taking into account
that all the rest can be considered
as investigative
then the action of a single element is obtained
always leads to the One Creator

and if we think further
then the technology of the One Creator
i.e. the One God
she is visible here in that
that the Soul spreads generally speaking there
where God already exists
God who created
It already exists there.

hence the concept of distribution
in this case it looks like
as a connection in fact with the task of God
i.e. the task of the One Creator

when you look at this Reality generally speaking
Well, you start to open it.
from the point of view of the so-called primary logical elements
then the primary logical element is that
what is visible to the physical eyes

this is where it's important
this is the discrete transition
make it very fast and easy

i.e. well, well let's assume in the era of atheism
all Reality there is as if mechanically perceived
it was considered
what is she like there, as if created by nature

but if we consider
fixed Reality
as a primary element
then it's very easy to explain here
why this control
like "atheism" which is not supported there
this is the system of precisely external and Divine control
why does it have exactly this structure
more material research systems

i.e. research apparatus

why is it more focused on material systems

because it just works there
logical phase of Consciousness
which perceives
like this primary element
all fixed Reality

but if we want to assume
develop perception
to the level of the supporting structure
i.e. well, ask a question then
and what is the basis of matter
from the point of view of well there, as if that state, let's say
what was before the material level

then here there are like atheistic criteria
they don't give for example yes exact characteristics of the answer

so when we say exactly
about the presence of the One God
we say this first of all
not from the point of view of there atheism
or there is a non-atheistic understanding
we speak
from the point of view of technology now

and here is the technology of Salvation
she talks about that
What
One God
He is
in terms of that
What
He is everywhere

that's when we look at
this concept is clear
that the spread of the Soul of personality
on the conceptual system of the world
it is such that we can get
almost the entire control mechanism
from the primary action

generally from the primary action
that's exactly it

which exists in the personality
as the very first act

so here is the very first action
a personal creation
creation of the Soul of man ^{there}
contains the entire mechanism of the next development
and why so
that this mechanism is completely obvious

if ^{for example} you contact
to the memory of the child born ^{there}
then the newborn is always absolutely clear
sees the future
and knows absolutely clearly
all the specifics of its development
just for some time, ^{for example}
he can't put it into words

i.e. if ^{we assume} to make an element
Well ^{there is something} extrapolative ^{there}
towards health restoration
then the Norm is precisely the criterion of knowledge

so in order to restore a person completely
from the Creator's tasks
precisely through Eternal Life and into infinity
quite near the child actually
select the Norm element

and as soon as we select an element
it is precisely this universal Norm
then it is clear that the child will always be healthy
based on that time
where this element is highlighted

and if you want to use this recovery method
^{for example} in the current time
then it is enough just this sphere of that time
dedicated segment
just shine brighter

and it turns out that recovery
coming from the knowledge received from the Creator
this is the restoration
which can be restored

there as if in memory to restore in action

i.e. everything that is given by the Creator
at the level of creative management
it doesn't go away

and in connection with this the following mechanism
it is the ability to make management more general
i.e. one thing can be restored
another matter can be from contact with information
exactly the one that relates to management information
get a full range of control

Well for example, for my own other task
maybe it's an economic task or an event-related one
there is some kind of construction there

so this is exactly the contact system
which means in a universal sense
it works as a generally event-driven Norma
she allows according to my Teaching
About Salvation and Harmonious Development
transfer knowledge almost instantly and universally
from any actual result you get there
exactly a positive result
in the field of management

that's why I keep calling
work and practice whenever possible
very specific in its tasks
through the technologies of universal Salvation
because your personal result
this is what practically allows already
first of all, fix the level
that means Reality of action
i.e. after all, the Creator
It is manifested in actions.
in some specific elements

and the second one can be very simple
be aimed at dissemination
if we consider generally speaking
the essence of the Creator
Yes, One God for all
then the main point is in terms of motorized action
is found in its manifested form as a rule
there is like a collective entity there

works more in the manifested

i.e. these are some physical elements
everyone knows that a glass has a certain shape
is more bird ^{there}
some one form, etc.

but when the Spiritual essence
must be united
i.e. the essence of the Salvation of all
it should be perceived by everyone
just the same
then there is a phrase ^{there}
for example : technology of saving all

i.e. we can say it in words
take legalize
and collective ^{there} for example, mentally pronounce

then do it like this
so that the management goal we set
Save everyone
and prevent a possible global catastrophe
would affect physical development

i.e. materially manifested systems
you can do it here
if we can do the same as the Soul develops
make in Reality
pre-action element

i.e. the Soul already exists
hence the concept of distribution
this is actually a transition to the next level
where it already is

and that's when we start talking
about the next action
then this next level
it looks like a pre-action

and if you do the management in this way
and put this phrase
Salvation of all
or is it at all
just as information

before every physical action
then it is clear that information begins to influence
to a specific physical action
because the information is already perceived more broadly
it is perceived by people in many different ways

and that's why it turns out
what is a specific physical body
it's already starting to hit the mark in general
under the influence generally speaking
just information, i.e. the spoken word

and in connection with this it turns out
that just by saying a specific word
you can kind of create something there
well, a kind of development system
each manifested level

and when we talk about that
and where does the word come from?
who speaks the word of Truth

that's clear
that the True Word is spoken by the One God
so it works out
that the One God can speak

and when we, for example, in terms of development level
well, there is actually some kind of logical phase there , yes
we have left the fixed level
we come to the conclusion that
how is there one God at all
should respond for example

and for this purpose
Well for example, just take a person
for him to say something
He must either find it himself
or He needs to be told
Well for example, address by name yes

and it turns out
what can we do on our part
from the point of view of the distribution of the Soul
to expose means to the One God
Well, maybe everyone has their own way

it is precisely in phrases to put the speech like this
to contact

but this appeal exists
cooperation with the One God

i.e. after all, your action
this is already what was created by Him

that's why it turns out
that the principle of personal freedom
personal action
personal independence
it will consist of
what we need to achieve, generally speaking, is Eternity
i.e. Eternal development

then it turns out
what do we have well there, it seems, the conditions are equal or something
equal development systems
which is what was laid down by the One Creator

i.e. here it turns out
that Eternity is the direction of expression of freedom
and when we come
to the level of complete freedom
then all the problems are solved for sure

firstly because
what about the Eternal number of years
even if you pose the problem logically
Surely all the problems can be solved

but the only question
what for some amount
a number of the following tasks are running up

but when they decide
it turns out there is a kind of cyclicity there
for time control

and that's why in mine
The Teachings of Salvation and Harmonious Development
there is access to the past time

because

with a large number of events
the concept of past tense and future tense
these will be very increasingly related concepts

i.e. this is who is doing it
my technology of Salvation and harmonious development
Well there it seems to be quite long
they are already starting to notice over time
that it is only worth doing there
it may even be some aspect of past events
and the connection with the impact on the future is very clearly visible

i.e. it is enough to make control
by past aspects
and the influence on the future begins
i.e. the connection is quite dense and direct

and in the conditions of Eternal development
here are the events of personality
could develop so much
what does past future element mean
he generally speaking it kind of disappears there
it is precisely in this perception of the Soul
more than on a physical level

and the state of Eternity arises
which characterizes that
that the Eternal physical body
can be infinite, generally speaking
spread develop Soul
which actually created this body

the body is created by the Soul and the Creator

and in connection with this it turns out
what is the Eternal body
always allows you to master
well, even logically more than, for example, the Soul
which was there
as in the system of reincarnation in the body
then it develops somewhere

much more efficiently and knowingly
that the Soul is still everywhere
just develop together with the physical body
then it turns out that development will be universal

so here is the next principle of development
namely, general development
this is what it means to simply have an Eternal Soul
that's how it's designed
that it gives general development

i.e. it gives universal knowledge
and therefore when I, for example, in my own way
The Teaching of Salvation and Harmonious Development
I give the technology of transmission
precisely distribution
often, for example, in the hall
I give at the highest possible level
development
to that very person
who masters here correctly

and at the same time it is visible
what other listeners
they can't master it wrong

i.e. they will develop because
that one who has developed to his given level
but others also need to be given basic knowledge
by the way, everyone else will get exactly that
on the same level

and here it turns out that knowledge
this is a universal absolutely level of distribution
it turns out knowledge
Well for example from one person to another

and in this education system it is important
that the word spoken
for example, for, let's say, one action
can be expressed immediately
multi-level action
according to the tasks of all

and here is the word
which God says so let's say
this word is the same
One God he says
it can be just one word
about all phenomena

after all, we can say here
that everyone can simply see
these words are different

so if we want to see
why did different languages appear there yes
in different territories
that's how the words are seen

if we for example some there mountainous areas
Well, let's just project it
into the element of Consciousness
and we'll see from there
what do words look like
the words of the One God
then the words look completely different

so the combination of these words creates that
that at a certain level of Perception
starts to be more active
it is the process of Thinking
have more influence on Reality

and over time that's when
the technogenic system will continue to develop
when will there be more events yes
more people

and in the long term we are talking about
about infinite development
the thought process becomes a more stable system
more influential
than for example
elements of the physical world

and then it turns out
what is this action that you are now learning to do
there near the things
fill for example the verbal phase
Well Let's assume there is a dictaphone

I can take and fill the structure
so that the voice recorder works there
during the seminar
and for example there was enough there
here yes for example electricity

I can do this several times
I can
which translates several times ^{there}
just talk through the situation
here mentally at high speed

i.e. it is not necessary here
even construct a sentence

it is not necessary to work with numbers in principle
^{there} you can view all the rows

it's enough to tune in
that such and such a row is control
and take one number ^{there}
or ^{there are} several numbers
this is management
sometimes an infinite series

i.e. when I give digital series
I often give projections of infinite series
they are actually not so obvious everywhere
but in some ^{cases, let's say,} diseases
I only give projection figures

and it turns out
that when a person perceives
he really is
works with an infinite level of information

and since it works
what are the problems with infinity?

he can naturally choose for himself that
what exactly does he need in endless variations

and when we look at the level
^{there seems to be} a next step
further action
then here is the spread
that's exactly how the methodology works
as a methodology of action
consists in the fact that
that at a common level
based on endless possibilities

there must always be a norm
and in the Soul this Norm exists

I showed you now
where is this Norma
at the level of the state of the Soul
at the level of the distribution of the Soul

because the task is precisely distribution
it is actually the main task
in the sense that if a person sees
how the Soul spreads
in some event
then he is absolutely one with God
i.e. with the One Creator

Now I showed you the technology, that means
that the Soul of a person can clearly
and see in all aspects
One Creator
it's natural

but when your own Soul
at least a segment
a person begins to observe
from a segment of one's own Soul
it turns out that's it
looks through the eyes of the Creator creating

and therefore there exists
and there is an exact vision
exactly like that
as the One Creator sees it

i.e. precision mechanism
embedded precisely in the subject there, as it were, the basis of management
action of one Soul
from different positions
and it shows
that we act together with the Creator

and when the action goes on together with the Creator
then the principle of personal will
it is contained precisely in that
so that a person can get a result

i.e. in fact, in general
The Creator created Reality this way
that every person has the right to receive
your creative result
generally speaking, regardless
it may even be often because of that
what is the result ^{there}
Well ^{there}, as if he is personally important ^{there}
for him

i.e. he can get some kind of
small result
let's assume a person has a desire
buy chewing gum ^{there}
he goes and buys ^{yes}
it would seem that this might not concern him at all
in essence

but this is a very important aspect of Reality
if a person has the opportunity
express control actually ^{well}
i.e. to achieve a result in any element
in general in any
then he naturally achieves the result
including in the task of Macrosalvation

i.e. an element of personal freedom
here is equal
in a universal sense to achieve
to the obligatory achievement of Macrosalvation

so that's when we talk
about the mechanism of the distribution of the Soul
to the control area
to the events area
then here Macrosalvation looks like
as an element of that
what if the Soul has spread
to the events area
^{well}, which the Creator created
from this very level
i.e. ^{there}, as if from this ^{point of view}
literally along this path
then it is clear that the Creator showed ^{yes}

i.e. it turns out

what does it mean Soul did the same thing correctly

and that's when the synchronicity is high
i.e. when there are no differences
between

for example, by the action of the Creator of the One God
and the action of the Soul
then it turns out
that Reality which is indestructible
from the point of view
and Souls and naturally
from the point of view of the Creator of the One God

it turns out that the indestructible Reality
it's very intense
well somewhere in the aspect even somewhere
so joyful for everyone around
assistance
where Reality is indestructible

so any element of Reality
is born from here

and it turns out that well there is Microreality yes
for example atom molecule
you could say they are so ordinary there
you can't break a molecule with a hammer then

and it turns out
that here is the option of indestructibility
this is that area
where is the Creator and the Soul of man
and that means the whole personality
act in sync
simultaneously and correctly

so here in the tasks of Saving everyone
it is precisely the correctness of the action
this is the main coordinate
which generally speaking
implements the next element of the future

i.e. a person must necessarily act correctly
and what to do
there is no way to even say
there for example, by intuition

he must act quite accurately

in this regard, the accuracy of action
here in the controls in this case
she is provided with that here
that it is enough just to enter into a resonance of action there
with the One Creator in essence

so here is the resonance
in this case he is in that
that from one element to another
The soul spreads
through the Spirit

and that's when the Spirit is the element of control
then the Spirit sees quite clearly
what does the Soul actually look like
at the level of Spiritual Perception

i.e. the investigative system

just like the Creator
sees for example Well let's say the Soul of a person
the Spirit also perceives
in fact, the Soul perceives
Spirit

and in general there is a lot
again a sign system
and the Spirit perceives the Soul in almost the same way

i.e. if you look at the Spirit through the Soul
in optics
there is a reflection of the Soul there
goes on the optical phase of the Spirit

i.e. well, there is like a white steam system
looks like concentrated steam
and infinitely dense

i.e. it looks like steam
and upon contact it is a very dense substance
there it is stronger than stone , etc.

and it is precisely in Perception
this is when the stone diagnostics

and diagnostics of this substance
I mix and compare on purpose
these elements

because knowing this characteristic
it is enough to tune into this phase
and a person can do anything at all
just get cured or achieve Norm
if he sees the reflection of his Soul in the Spirit

because in essence if so
then a person sees
The norm of your Spiritual state
for the Soul creates the Spirit
more already investigative system Spirit

and from here if we look from the Spirit
on your Soul
then this is a smooth system
it is completely linear
The Spirit is perceived by the Soul
like a very calm linear
in terms of there being some kind of prolongation
that's where the future is
and it is precisely the concept of distribution
visible in static

i.e. if you look through the Spirit
it would seem that it is just a linear line of the Soul, yes
there seems to be some kind of bend there

but if you look with the Spirit
then you can see the constant spread
i.e. a constant spread is visible
movement actually
even more precisely
or that it is spreading
and so on into infinity
endlessly
in every event

if we through the Spirit
let's go to a specific event
where did the Soul spread anyway
then it is clear that the event is starting to build here

i.e. we get into that area
where the Creator builds the event

and when we get into this area
practically from my Consciousness
i.e. being here
we actually get this type of control
that any event can be constructed
and it's not that difficult
there it seems to work out using this technique
the main thing is to know the way

and now we will do it together
next control
then we will reach the element of Consciousness
corresponding to the Soul
and through the realm of the Spirit
we will take control of those events
which you specifically need

and the control takes place here
therefore tune in to that
so that there is a precise exit trajectory
Soul - Spirit - Event

and start managing
and I will work with you
everyone is working on their own event
through the Macrosalvation system

when you work on your events
try to concentrate
that's exactly what happened after all
there is like an average statistical
what the information is about voltage

i.e. try to defuse the information a little
because as i said
in the technologies of Soul distribution
It is desirable that the background level
was quite calm

so if possible
it means when you work through technologies
output related
through , for example, the structure of the Soul and Spirit

be more careful here
because the connection is precisely with the work of the Creator
this is a very high concentration

so here you always have to try
special do management
there is something volitional there
and to go to the level quite calmly

because that's what we're talking about
what we do management
which should be understandable to those around in fact

because that's exactly it
principle of knowledge dissemination
about the state of the Soul
about the action of the Soul
about the action of the Creator
this is the principle when people are still
who, for example, don't even do it for a long time
or are just starting to get involved with technology for the first time
they should understand right away
what are we talking about

and therefore the controls should be simple enough
and there it was as if deconcentrated

due to this
when we consider exactly
this is precisely the task of spreading the Soul
as the following task
behind the distribution element

i.e. you have a management goal
is some event there

you start spreading the Soul
already technologically yes in this event
and her presence
this is your Norm

i.e. you are in the Soul
you contain the norm

then it turns out
what comes next after this event

this is what is created
you and the One Creator

i.e. you create together initially like this
that the One Creator still contains ^{yes}
all creations
but your personal freedom lies in this
what are you doing right

that's when you do it exactly
then it turns out that you are already maximally free

and here it turns out
that's one thing
reach your event
Well Let's assume we take control
do on target
there make ^{for example} the goal Macrosalvation
preventing a possible global catastrophe
ensuring Eternal harmonious development

you take this goal
and you move towards it
spreading the Soul into this event
the Soul has already spread there
by logical control
speaks about that
that ^{yes} you have achieved Macrosalvation

i.e. there is no global catastrophe
the technology definitely already exists
namely the Eternal infinite development

but the question arises
what when is all this
what is the next step for a particular individual

i.e. the personality must, ^{for example},
solve some of your own problems
however, the achievement must be real
i.e. everyone should have this technology
everyone must ^{therefore} be provided with Eternal development

and therefore this is ^{generally the case}
a whole one ^{like that} in the procedure
Well there seems to be a standardized line emerging

where is the algorithm
i.e. the sequence of actions must be precise

and here is this algorithm
it is very clearly formed
in the next action for the result

here is the distribution of the Soul to the next action
contains an algorithm
how to move towards this result

i.e. if there is
Well there is a problem solving the problem
For example there is a cure for some disease yes
even if it's complicated

the next iteration in motion
is just a little bit further
spread the Soul
just further
there, as if even in physical space
from the physical body of a person

i.e. if you are in control
through the spread of the Soul
then first of all you actually control
near the physical body of course

but you control in the space of the Soul
this is another space

and when does it spread further?
then you are on a physical level
there you seem to move away a little
from the physical body to the next point
Well, maybe it's actually two millimeters away

but here is already the complete algorithm
what to do next
for example for the universal Salvation

Here is the next algorithm
is currently specifically in that
that I already give the development algorithm
words of one
in other words

i.e. it is visible
so I just take and look at this point
and you can see what to do next

I don't need it at all
let's assume Well, **USE** it
some other area of information
because I know this mechanism
and I give the next level

so that's what the next level is
that one Word
it starts to transform there, yes
spread in the form of certain rays
already going to the mental level
there as if at the level of Perception

and he organizes this level
one Word
together with the Creator, the One God
and together with the Creator
another person for example
Well, maybe the Creator

for example in this case
if there is some fruit growing on the plant
then some kind of fruit is created

another question
that maybe the fruit was just growing
or maybe it was planted by a person, yes, this plant

and here an element arises
what is at the level of this action
here is complicity
i.e. the understanding of other elements of Reality is such
that other elements of Reality
become very clear

because
they are generally located
in the same system there is, as it were, equality

i.e. if we consider the principle
it happen in an event ?
some influence of another system

let's assume we'll take an animal there
which is located on the street
and there it is let's say a dog
it could be a regular dog
but maybe it represents some kind of danger
if she is aggressive for example

then the following element appears:
here is the man who rules
he generally sees
some aspect of Reality in front of you
in terms of management objectives

but here is the presence of some other element
bush plant
dog
is a drop of rain there yes For example
as in this case
The Creator is revealed here

i.e. how to see in a drop , for example
the action of the One God
that's why there is a drop in this place
or why for example the dog is not aggressive yes

and that's when we start to look at this and go deeper
i.e. in the situation of analysis
then with the right analysis
with a correct understanding of the Creator's actions
why does this action happen at all
We have everything standardized

i.e. health is standardized
the event is normalized
i.e. one of the control elements
is the principle of awareness of the causes of the phenomenon

and this is the awareness of the reasons
this is what it means to act like this
how the Creator works
One God, moreover

i.e. if we realize exactly
then in principle we get
at the level of distribution of the Soul

we are where we are

i.e. well, the principle of God, yes
He is always there when there is dynamics.
He has already created
and the element of His movement is that
that He is just a mere
for a certain level of Your own
just fixes

i.e. and therefore it turns out
what is it for the Soul when we are
where we are
we primarily consider
we are specifically considering the system of action
exactly the same action
how does god work

but if we want to see
and in general where does God act
this is the space in which He operates

then He acts in the space of the Soul
He was the one who created it in the first place.
including the space of the Soul

therefore we can proceed from this process
understand right away
what if we act
it is precisely inside the Soul that is actually yes
in the space of the Soul
then we always act correctly
from the point of view
here are the tasks of absolute creation
from the point of view of the tasks of Eternal development

and a logically very simple element arises yes
Eternal Soul
if you take
and act within the Soul
then naturally everything becomes Eternal

and then the next element is obtained by self-regeneration
it's just to get into a state
when all controls
are in the space of the Soul

in space
where the Soul spreads
it can also spread
only in that space
where is it

but it is logically quite clear
some element of physical Reality
is located precisely in physical space
same here
The soul spreads
only in the space of the Soul

and moreover because
it was originally created by the One Creator
space
First of all, it has absolutely
universal characteristics for all

it's elementary to transfer knowledge ^{there}
they are all the same there

and when, ^{for example,} we are talking about that
how to show them
^{there} For example yes, let's light it up
needs to be done
spread and show action

so here is the transfer of knowledge
through achieving action
a specific action, ^{for example,} Salvation
this is the transfer of knowledge

that's why according to my Teaching
about Salvation and harmonious development
facts of salvation
This is a technology of knowledge transfer
and when analyzing the fact
you can see
what technology is actually being implemented

in connection with this, the spread of the Soul
of course it works ^{out there too}
absolute stability system
this is exactly the technology
it allows you to be

always in a stable phase

another question

why for example well there

we have to operate with other systems yes

so investigative actually means

and because the Soul

strives to do everything on the same level

so that everything is inseparable

i.e. Eternal Soul

Eternal body

Eternal Spirit

The Spirit is the instrument of the body and the Soul in this property.

and when we consider Consciousness

then we can speak with elements of Consciousness

being exactly

in the space of the Soul

then the words will be

so that they are understandable to everyone

often be arranged differently

than if you work

not through this control system

i.e. if you work through the logical phase

that's most of all

the output is first logically precise phrases

yes built

due to this

we do the most freely

when we act with the Soul

and so, well, yes it would seem to take all the time, yes

and act with the Soul

but the Soul is a unique system

which means it is given individually to each person

but on the level of spiritual plans yes

level of Spiritual knowledge

let's assume there is a Spiritual development plan

which characterizes the development of the Spiritual

there are civilizations of society or there are communities

there is development of the body, etc.

then these are areas of a collective plan
here is a unique individual Soul
must have mechanisms

Well there is like a collective manifestation there

and these are the mechanisms
they are manifested for example there in physical Reality
at some physical level
or are they manifested?
in some spiritual values

so if we look further
then spiritual values
contain the next level of development
i.e. where there is an algorithm

that's why it's always and well clear
that Spiritually advanced civilization
she is less aggressive
or not aggressive at all
if it is very developed

that's why it turns out
that here is the Spirit which as I said
determines the material level
it defines on a logical plane

because the main process
consists in the fact that
to achieve absolute invulnerability through logic
each member of the actual civilization of the World

so that's how it works here
what Spiritual development
which allows this to be done
this is the principle of the distribution of the Soul
to the area where the Spirit is already

also an invulnerable system
allowing for example Well there to develop like this
so that there are no wars
so that a person can live there forever, etc.

and when it comes specifically

to the physical body of a person
i.e. Spiritually developed system
already beginning to actually manifest itself in that
that man was not destructible

then the Soul comes to that
that's unity ^{yes}
bodies
Spirit
Souls
Consciousness
Well generally speaking, the total systems of personality
in Eternity
this is the personification of the Creator of Reality
this is the one He created
exactly for this
i.e. for Eternal development

i.e. then the concept in this case
"personification"
so it consists in that
what well there is like a "face" and "creations"

i.e. if we consider the creation of the Creator

then the Face of creation
The Eternal Element is given

i.e. Eternal Man
Eternal development
Eternal Spirit Soul etc.

so when i say "and so on"
Generally speaking, we are talking about
about all elements
including animals, plants, and some microelements

if here we start thinking
including macronutrients ^{there}
that everything is Eternal
then we really are
we see the developing human body
towards infinite Life

Well, if you think about it like this
then it is clear why a person

here is a specific place
and does some specific things
because if, for example, in the optical phase
take and make a glow
just like this how to solve the problem
Eternal
from any element surrounding a person

and do it like this for example
to illuminate at least ninety elements
then it will be completely clear
why man
here in a specific place
does a specific action

i.e. the world is so interconnected
that external elements in optical luminescence
provide complete information
it works the same way in principle
the same for example there is a controlling clairvoyance

i.e. it is enough to go out
into this area of understanding
and it's absolutely clear
what happens anywhere at all

because here the following principle works
namely the spread of the Soul
if it's clear in one place
and in one place it is visible
the action of the Soul together with the action of the Creator
then this generally applies to everything

principle of universality
from the Creator's point of view
any element of the World

therefore it is enough for you
perceive at least one signal
even if only on a physical level
look there
on some physical element
and to you generally speaking
everything should be clear at once

and when you get to that level
understanding of Reality

then it turns out
what then arises
Well, well there is a level of necessity of action
he was in that at all then
so that you have time
to apply this knowledge
so that there is differentiation of actions

i.e. choose some first action
then the second, etc.
and it turns out that here is the time factor in this situation
this is the presence of the Creator
One God, moreover

i.e. in this case
It is precisely in the element of time that that exists
what a person can see
already concretely, actually, well, practically, like with physical vision
One God

and when does he have a question?
and what's good is that the One God gave time to him
what to do next
as an algorithm for these actions

so here is the algorithm in this case
this is what is actually the path yes
through the realm of the One God
which He gave
this is still His area given by Him, yes
look at yourself, at your Soul, at your tasks
and the path will be clear

here is the "clear path"
this means it's already done

and when it is already clear
the next level hits
at the level there as if well, automated
some similar systems
what well there a person does not think
what does he do specifically often
in one place in another

so he may not think about it
because space is created

to move it
with such actions of preliminary clarity

and in general it's logically clear
what if a person doesn't know ^{there}
or doesn't understand some system
he tries not to develop in it ^{yes}
do not move in space there
which ^{for example} is uncontrollable

and that's why it's exactly
level of this type of clarity
this is what shapes your personal action

and therefore you get
you form it yourself
from the initial knowledge given by God

and therefore if we are an element of time
let us consider it precisely as the presence of God
that time in the understanding of the Soul
it is always there
because it is Eternal
namely, even logically reproduced time
is perceived here
as Eternal Time

and when you want to look here
for ^{example}, what is the Eternal Hour?

hour is the current system
she's in an hour
for example, some situation is expiring
but if you take it you get a fragment of the Soul
where is the time
and the hour is Eternal
you can see it here
that the exit to Eternity
in this system ^{yes}
inside the space of the Soul
it is very simple

let's say you need to solve a problem ^{there}
work on restoring, ^{for example}, tissue
by decision of some event ^{there}
let's assume it's 10 o'clock ^{there}

it is enough to enter at this hour
and the hour is found
beyond the hour is already Eternity

i.e. Eternal time
i.e. just for the sake of it
the technology here is like this
spread the Soul
from the element of space corresponding to the hour
into the element of Eternity

touch Eternity
for example at the point there is 10 o'clock
then you only need to work for an hour
you will get an effect equal to 10 hours

if you need
let's assume to work well there are 100 hours
and do the same
just leave in this hour
located in Eternity
go out into the time element
corresponding to 100 hours

and then you talk
with the One Creator
you just understand
how the world works

but here is understanding
this is a conversation
and when we speak
then often conversation personifies action yes

so here is the action with the Creator
action by personality
or is there a cumulative system
Soul
Spirit
Consciousness
personality means
talk
word

i.e. in fact

this is what is always oriented towards the Creator

that's why, for example, humanity is developing faster

well we know

that there are quite a lot of smart animals there

generally speaking there is a level of universality of mind

like all creatures

in certain situations they appear

almost the same

Well, according to my own gradations, of course, yes

in some of their own conditions

so here is the person

in what it can develop

in fact, the same as the One Creator

by level of knowledge and by speed

because firstly he can speak

i.e. he has the opportunity

perceive the word

and in the word it turns out

here as a mechanism for ultra-fast development

if we take this analogy

we will move the word

into the structure of the Eternity of the Soul

i.e. for example we took and moved

is a proposal there about that

what's there well specifically there Yes, everyone present is here

For example, in the hall they set a task

namely Eternal development

and each one for himself

took moved

some specific person

and translated into the structure of the Eternity of the Soul

then it turns out

what is the control element here

is that when for example the Soul begins

there as if to involve yes

word in Eternal structure

you get an event

this is precisely the element of the distribution of the Soul

through with love
in your task
you get the actual event

so make such control
formulate your task in words
and move it into the structure of the Eternal Soul

as soon as you move here
you will get control
which must necessarily happen
in a creative way

so do this management
move around
into the Eternal Soul

thank you for your attention

I'm finishing the seminar for today
