

GRIGORY GRABOVOY
The Teaching about God
01.07.2003

The topic of today's seminar
This is the Teaching of Grigori Grabovoi About God
and considering that this Teaching
is a structural section of the Teaching
then in relation to, *for example*, the Teachings of Grigori Grabovoi
About Salvation and Harmonious Development
in this case, control is carried out due to the fact that
what do you know
Action of God
you know its fundamental level
in relation to, *for example* , human Consciousness

and at the same time it is carried out
more general management
i.e. the management of the Norm is actually

because in the Teaching of Salvation and Harmonic Development
we are primarily considering
for example, preventing a possible global catastrophe
precisely as an act of Salvation
and from here we have, *generally speaking*, a control technology

in my Teaching about God
I consider first of all
understanding of God as a Person
understanding Actions of the Physical Body of God
and understanding how interaction occurs
for example, the Body of God is meant
Physical
Informational
God's souls *yes*
And
everything that corresponds *for example* the concept of " human "
for example the Spirit of God

and also what corresponds
it is precisely the specific concept of " God "
what is the difference
and how are the data levels
in the human consciousness
carry out management

almost the whole Reality

i.e. in this case we are dealing with that
what if we know how God works in the world ^{yes}
how does He interact
with elements of physical Reality ^{for example}

then we can
get control from here
just because we know

i.e. knowledge synchronizes ^{our} actions
we get precise control
just first of all from knowledge

although in control technology
precisely through knowledge of God
we can also use
specific methods specific methods technologies

and therefore first of all
here we need to pay attention
the fundamental meaning of the concept of God
from the point of view of human perception

and also the concept of God
from the point of view of how, generally speaking,
the surrounding world is developing
in relation to God

and so I would now consider
it is precisely the process of God's Action

i.e. when we consider the action
we can express
It is His Appearance to us

and that's why I'm considering it in this case
First of all, it is the Physical Body of God
and the One God who created everything
then His Spirit
then His Soul
and then this manifestation
in the form, ^{for example}, of the fact that God created man
manifestation in the form of what God created
specifically, ^{well}, some carriers ^{of} human development
for example ^{there is} planet Earth

or in the development of man in the future
these are some other carriers
other planets and civilizations, etc.

i.e. in this case we are talking about
that in my Teaching about God
we must first of all proceed from
from self-awareness of that
how we personally perceive God

that's why we must see God
precisely as a Personality Personality Acting
and from here it will be clear
what if there is for example some level of problems
let's assume some kind of disease

then this is also, among other things, that process
that God transmits knowledge yes
according to the Norm, for example, of life according to the Norm of health
He apparently counted on it
that a person will use this knowledge and be healthy

if a person did not use it
so there is a reason for something, yes, there is
in some area of information

and this reason is usually mutual
i.e. God distributes information
quite quickly all over the world
and it turns out that He is after all
giving free will to man there
He doesn't go into detail.

and in connection with this
this is the concept of "reciprocity"
it's just an act of God
designed for human progress
i.e. on human development

and therefore in this case
Here The Physical Body of the One God is manifested in that
that a person, well, being born, for example, in childhood
he is first of all aware of God
as a counter process
in relation to himself

i.e. God is that which gives him yes

For example gives the World opens the World ^{yes}
God is the first to open the World

i.e. who is the first to discover the World

the question is very simple, ^{let's say} for school education
it is clear that it is God who first reveals this

if at the moment of God's discovery
a person ^{as if} perceiving
Well, that's what he needs to do, ^{yes}.
when He reveals the world to him

at the same time he ^{will say} after some time
well, for example, it doesn't do something there
then a certain dissonance arises
and some, ^{let's say}, pathological conditions arise
from the point of view there not health standards

that's why it turns out
the first element of treatment is, ^{as it were}, actually treatment
from the point of view of knowledge of information about God or the Action of
God
is to consider
how He opens the World to you for the first time

that's when we come
to the concept of "discovering the World for the first time"
then first of all we see
that He created the Soul
therefore the Soul perceived the World for the first time

and when we consider the Soul
that is, a concept that comes from that
what ^{for example there} Human
just a simple analogy
physical body of a person

when a person slowly opens his eyes
he gradually sees
what he perceives in the World
and the world was also created by ^{God}
first knowledge
perceives with physical sight

so we ^{just} approximate
^{how} do we transfer

such action of the physical body
to understand God i.e. yes

in this case I am by the way I give a method for that
how to understand the action of God

then it turns out
The soul created by God
she also begins to perceive the World
Well, to some extent yes

and considering that well if a person opens his eyes
and first he sees, well first, what is closest to him

what happens when you create
Soul
sees the closest to the Soul
and the Creator is God
it means the Soul sees God

and when you start to analyze
and where does the Soul see God?
i.e. how does he look then ?

then it turns out that the first
the first thing the Soul sees
a reflection of your own personality
i.e. appearance

because the Soul first sees that when organizing
how, well , generally speaking, is it located
her future
in God's understanding

and when the Soul is thus
enters into a kind of dialect with God
then Consciousness is born

Consciousness is precisely born of God and the Soul

i.e. it turns out that the element of creation of the Soul
in this case, first of all, it is implied
as an element of mutual action initially

because
Consciousness already born by both God and the Soul

and it turns out that

this is the element of mutual action
this is the solution to the problem

i.e. it is enough to enter
as if to this point of information
in fact, in understanding this process
and in fact well, how about talking to God
but in this area of understanding

in this case in my Teaching about God
there is a concept of understanding
that working through understanding
we can solve problems
Well, not to abstract
to some specific control points
even on geometry

i.e. understanding this is an element of communication with God
and the element of knowing that He is there by His Will
predetermines or indicates there, for example

and in connection with the fact that I still give
applied to a greater extent in terms of the Teaching
action

i.e. here we must imply
that in every understanding
we can generally implement
from the point of view of the same tasks, yes
for example, preventing a possible global catastrophe there
well, yes, there is a cure
control
solution to some situation

then the situation is resolved here because
what do you know what your future looks like
In many ways you already know
if you know the Action of God

and when do you know it
then you meet a familiar environment
i.e. familiar in the sense that the environment is such for you
that you have already resolved the issue
and you just go to it to the solved system

well, that is, if for example, well, there is some goal, yes
and I am realizing this goal

then you can go
and for example, you won't get any Reality ^{there}
or can you get some other one altogether?
i.e. Reality is multivariant

and taking into account
that this knowledge is in the Soul of man
it is clear that here the Soul comes into contact with that
that God creates multivariance

and this is the creation of multivariance
speaks about that
what if we rise to God by his Essence
that's the attitude ^{there} towards you personally

then you already have that option
which in this case He created
as individual for you

you start to see
that the space is distributed quite individually
although everyone sees, ^{well, often} the same thing
but nevertheless, your personal path
it is illuminated by a completely different light

and you may have often noticed
what if you go ^{for example there} in the evening
already some kind of darkening option ^{yes}
when the sun is already ^{setting}
and here come the reflected shadows
then you can see the glow of exactly ^{your} path

i.e. this glow usually comes somewhere on the left side
^{well} from the heart's side
and it has, ^{well,} a different intensity, a different type
this is a glow
these are the elements of the creation of this World
this is what God gives specifically to you

and when the question arises about that
why so many people
^{and speaking} of which, we have there hard tables specific streets
they practically do not change ^{over} time

however, in this case
perception of each
there's nothing specific there table of the street of some process

this is it
what God originally put into the Soul of man
as an action
His Personal Perception

it turns out that perception is embedded in advance
there is already something there that is contained in the future

and that's why it turns out
what is the concept of "healing from diseases"
this is in this case in this technology
just to be able to somehow get around it , actually, or something
level of possible non-norm

and this bypass is very specific
unstandardized part
it is in a specific place
and in a specific space

if you know it
then you just don't go into this space , yeah
at least by Thinking
it doesn't have to be there physically

if you don't come here with your Thinking
you have this kind of negative structure
not implemented

the principle of such space
it is absolutely clearly visible right away
why did this space arise
what kind of pressure or influence exists there

this is the principle of development by the way
well, almost absolute clairvoyance
i.e. you can almost certainly
see the source of the formation of the cause

and when you see this reason, well
often it is completely unimportant
it could just be someone's thought

and when this thought finally comes out
to the level of understanding
i.e. you understand the source of this information
the information immediately becomes
well the one you need

i.e. you understand
what is the negative reason
not a problematic thing for your future
there is some kind of negative system there
Generally speaking, you know this for sure
that it is not being implemented

and this is the exact knowledge
this is that
how does the human physical body work

i.e. the physical body of a person
built by God so
what is there
absolutely precise coordinate of favorable development

and after all the Physical Body of the One God
it always has the exact and most optimal ^{yes}
characteristics in development

i.e. he is there, for example , well, let's say it this way
The Physical Body of the One God
naturally he tries ^{not} to get sick there
in every possible way some events will develop favorably ^{there}

but we have to take it into account
that the Physical Body of the One God
also found in regular
well, like human development systems

yes, if there is a threat of destruction of a person somewhere
well, let 's say in third world countries, ^{yes}
from either diseases or some wars
that is the Physical Body of the One God
also perceives this in relation to Himself
i.e. His task is to teach

but once It is one
the same as in humans
it is One Physical Body

then it turns out
He can teach by passing on knowledge
i.e. the analogy is absolutely complete

one One Physical Body of the One God

Well, maybe of course I can go there to give lectures ^{yes} by region
but ^{then} only a part will be ^{trained}
exactly the one who just now saw the ^{Physical} Body

therefore the phenomenon of the Physical Body
to people
^{well} in the True understanding of Salvation
in the True understanding of precisely the Eternal development

because God is evolving Eternally
because He knows
what will happen in the next level of development

and it turns out
that the transfer of knowledge is precisely from the Physical Body

that's why the meaning of creation
physical body of a person
another thing is that
so that the knowledge of God
were transmitted correctly and developed Infinitely

as well as the Physical Body of God
i.e. I just logically brought it to this
that the necessity of creating man
By God
consists in the fact that
so that ^{well} Reality generally speaking to make such
which God originally intended

i.e. if we consider ^{it}
what kind of Reality did God originally intend
He is Eternal
He must have the Reality of Eternal
i.e. Ever-evolving

how is it from a human point of view
how to prove that Reality develops, ^{for example,} Eternally

for this you need ^{to} have a precedent, ^{yes}
i.e. for this you need to have, ^{well,} a diagnostic system
We also need to have a system for the development of Reality
to talk about Reality at all

therefore, the person is represented here in this case
having the same levels of Perception
like God

he can

Well, of course the difference is that
that God is aware of everything at once
A person can, as it were, locally identify that
what exactly is given to him
this is what makes a person unique

then it turns out
that the creation of man
for God it is His own development

i.e. He is God, generally speaking
Push
a person is not separated by essence

and that is why He is
True and Human

He gives him practically the same knowledge.
basically the same possibilities
in terms of , well, at least Eternal development
let it be individual but Eternal

and if the only difference is that
that God can immediately realize everything and build everything

then at least he is a developing person
he can definitely build it himself

and it turns out that he can build it himself
then logically it corresponds
precisely to the tasks of God
because he's kind of on his own level
it's actually basically identical , like, yeah
as far as possible development
according to the possibility of developing Eternity
and civilizations, for example, and Mira

so it turns out that human development
his further aspirations in general
it is
and the task
and in general the original level of God
as if in understanding, well, there is the development of the World of humanity in
general, yes

Well, if we proceed from that
what, well, does a person understand God?

he thinks that God

Well, let's say I gave some analogies there, for example

where does it say that it can be understood by analogy with a person yes

the man opens his eyes

and also the Soul perceives the first element of the World

This is an analogy with the human eyes.

if we develop the analogy

then we can sort of get the opposite

i.e. how from this process

restore vision, for example

and also if we say

that a person works with such a tool as understanding

then God has the appropriate instrument

which is identified

with the concept of "understanding a person"

so here is in God's understanding

pledged

that man is an integral part of the World

and therefore

The world is so rigidly fixed on man

Human thinking

changes very specifically

there, for example, are completely remote

the systems there are optical intramolecular

i.e. if a person thinks

well, suppose the person in front of him thinks yes

outside the physical body

molecular processes slow down and are recorded in our country

a man looks outside himself

we see a hard level of Reality there

if a person did did

well, it's like a special management does it

and begins to think inside the physical body

then in this way it is possible

activate external physical processes

i.e. well, let's say there's melting ice there

Well, if you think there for a long time and somehow concentrate

i.e. the influence of internal and external

gives an idea of that

that God who, for example, concentrates Thinking
inside the Physical Body
has a very dynamically developing world

also if we assume well there we think
more like inside myself
we have more variable
system in management

if we went out
into the space in front of you
We are already working more with a static system

if this knowledge
precisely from the point of view of knowledge about God
about the Action as if it were the Physical Body of God
implement in management
then it's pretty clear here
how to work then for the purpose of management

there is a management goal
something needs to be sped up, yes
then you have to think inside the physical body

if it is necessary, let's suppose, how to make some kind of static events, yes
then we must think outside
i.e. in some spatial environment
outside the physical body

i.e. analogy of connection
with the Physical Body of God
provides a specific management tool

and this is where we come to the concept of management
from a human point of view
management implies
that he has a physical body
and he must perform some actions

Well, first of all, there are some of my own there
which means they should be normal
based on the fact that there is the Physical Body of God
should have normal actions
Well, as normal as possible
a person should strive for this yes

i.e. here the Norm is based on the fact that a person

Well, the concept of "preventing a possible global catastrophe" here is a natural and harmonious system
she enters into what is clear
that the One Physical Body of God cannot be destroyed
there is basically a global catastrophe there
there is no talk of such a thing there
as a process that is precisely possible
for the Physical Body of the One God

for the Physical Body of the One God
no catastrophe at all is possible
in principle

but when He, for example, considers
that some person may be affected
well, either by illness or some other process, yes
which needs to be restored specifically

then God does the same
i.e. He gives knowledge
coming from His Physical Body
from His Spirit yes
from His Soul

and that's why it turns out
what do we have in general the concept For example Spirit of God
it's like the concept of knowledge transfer

i.e. if we for example, well, we want
transfer knowledge suppose almost instantly
then we must think first of all
and here's how spiritualized the object of action is there
i.e. where is the Spirit of God here

and the Spirit of God is different
this is not the Spirit of man

and if we want to see
The action of the Spirit of God
then we have to see
where is Infinity

and where is the element well, as if you haven't actually been created yet
Realities

i.e. to see
in the elements of Reality

there looking at some element of Reality
see the part where it has not yet been created

because the Spirit is the Creator of Reality
from the point of view of understanding a person

and when we consider
Spirit as the Creator of Reality
at God's
then we see
that the physical body of a person is one
transmits to the physical body of a person
well, any other person if you consider it

that is, a certain mechanism
transfer of information and knowledge
just from physical bodies

and when we ^{say} yes
and if the physical body of one person
is located there in the same room
or very far from another

then with God and man
there is a mechanism of continuous communication
regardless of the premises

and when we consider the issue
and where is it located in a person?

well, that is, this is the characteristic
which God and man have

then here it turns out
that this characteristic is in the heart rhythm

that's when there is a heart rhythm
a person can do it
or well, don't perceive it
specifically there is his beating
but he understands
that his heart is working
Well, for example, a healthy heart is considered to work silently.

so here is the absence of noise
this is the presence of God
here near the heart

and when you look at it closer
then you see that the Physical Body of God
almost in certain places
identical to the human physical body
in terms of absolute normalization
well, like self-healing, so to speak, of the human body

i.e. this is when we consider
body angle
from the point of view of self-healing
we see how it works
and we understand how it works
Physical Body of God

and when we start looking further
how does the soul of god work
Here you pay attention
what I said for example about many concepts
well connected with God now for example today
but for example , he only started talking about the Soul now

so the Soul of God is to a greater extent that
what determines the future
from the point of view of human perception
that's why we talk about it later

and when we begin to understand
how to talk about God
we can enter into dialogue with Him
Well, for example, a mental dialogue
or in the action dialogue

so here is the action dialogue
this is what decides
generally speaking, any questions from any person

i.e. if you
synchronize with the Action of God
according to your original task
what was shown to you initially
at the moment of your creation, for example
then you will see what you chose before your creation

and here we come exactly
to the fundamental point
that each each individual yes each person

before its creation
already understands and defines
for yourself personally

and it's concentrated there
Where
Soul
Spirit
and the Physical Body of God
intersected at one point
i.e. the information comes from there

and here the question arises
what if we have a connection for example
well, sort of with this level
then by analogy the question also arises to God yes
then where is this level for Him
where He knew before His creation about the future process
that's where He knew then

so here is this analogy of knowledge
this is the brain
this is specifically the physical tissue of the brain
which corresponds to the physical tissue of a person

i.e. from the brain's point of view
we found that this is an identical Reality
which is concentrated, well, in the material plane, I guess

and when we start to look at it, well
management process further
it turns out that physical matter is physical matter
Well, for example, there is the brain of God
or the Physical Body of God
they when we think about it
what was at the moment of decision making
so already was the Physical Body

i.e. we come to the conclusion that
what originally
absolutely healthy
absolutely well there was already an Eternal and physical body

therefore, a person chooses
as if before the moment of its creation
before its creation
chooses his path

already having a physical body

and why does this happen?

because the whole external world is there

External Reality

all this also always exists

and so when we speak

about the projection of physical Reality

we receive precisely the Body of God

i.e. logically it is very clear

all Reality gives in projection the Physical Body of God

hence

Physical Body of God

since it is always there

that is, always the physical body of a person

and if we start to think

what and how do we need for example

Well, here we have to find out

exactly, exactly the structure, i.e. the mechanism

how does a person make decisions

before creation yes for example well before creating your Soul

I am not talking about the mechanism of creation of the Soul now

I'm talking about that

that a person makes decisions

what does he want to do

even before

from God's point of view

Even before its creation He gives it free rein

and this will is in the future

where it has already been created

i.e. for God and man

so the dialogue is like this

that it has no temporal aspect

and from the point of view of the Spirit

it is practically

well if you consider

for example in relation to the physical body of a person

then here

The soul practically organizes the Spirit

The Soul of God organizes the Spirit

i.e. it turns out that there is if we consider the Spirit
as some manifestations of physical Reality ^{there}
Spirit of God
then organization
i.e. structure internal structure
this is the Soul and its action of the Soul
the action of the Soul

by analogy we can say
that any element of the World ^{is} built in such a way
what is the Spirit of God
and there is the Soul of God
in any element of the World

but the Physical Body
it is also a manifestation of God
^{as if Well, in physical Reality, yes.}
that any element of the World ^{is} built in such a way
what is the Spirit of God
and there is the Soul of God
in any element of the World

so this is the manifestation, this is what it is
how do they function
internal organs of the Physical Body of God

i.e. any element of Reality
we correlate
with some internal organ
Physical Body of God

and when you start to think about ^{it}
over this process
and decide it ^{as if} for yourself
^{Well, let's take a simple example}
you are somewhere relaxing, ^{let's say in} some clearing
go fishing or just have fun there
suddenly in front of you it became rigidly fixed
some leaf ^{yes}

pay attention here
every person has it from time to time
that some element of Reality
^{as if it is revealed, for example, well, as if it floats up, yes}

so this is the element of Reality

and he shows it
you start watching
how is this related to the Physical Body of God

because in the human mind
we still have an understanding of that
that everything was created by God
including physical Reality

and from the point of view
if we consider the question
namely the Physical Body of the One God
then like in the process of creation
some organ of God was involved in this leaflet

how he participated

i.e. if we can say by analogy
what about the man there, well, he's drinking water and his hand is moving
there somehow the gastrointestinal tract works yes
urinary system, etc.

i.e. we kind of, well in general, in the end we extrapolate
and we see that the whole organism is working

i.e. when a person drinks, the whole body works
we kind of feel it further
more by the Spirit of God

Now, pay attention, I translated the concept into that
where we see, feel and know
where is the Spirit of God

by the way, here it is more precisely "we know"
because we drank a glass of water
yes we felt it
what's there, for example, water moves through the esophagus
in the stomach it is less noticeable there, etc. yes
if it's warm there, well, there's body temperature

but then we understand
that the whole organism is involved
because it's inside the body, right?
we are aware of something

this is the realization that is it
in optical terms it is very clearly visible by the way

this is a very specific optics
which denotes the Spirit of God

i.e. the Spirit that creates, well, among other things
your physical body
because your physical body
also creates the Soul of God

and when do you start thinking
and where do you create then?

i.e. well, the person is there again
as an autonomous system
independent
human physical body

there he is walking somewhere down the street
and he also creates himself

so here is the creation of man
self-creation
it's that he is at a certain level
constantly watching
on the Physical Body of the One God

and that's when we want to , for example, differentiate
do we even need this all the time?
just concentrate on Him, yes
on the Physical Body of the One God

it may be enough to perceive
from the leaf His manifestation
and then again we are basically as if we see Him, yes

that's why many people often take a rest
because, well, they were there to relax in nature, for example
and it turns out that here
this regeneration, yes, as it were
by nature

it means from some elements of rest
that is how it is manifested
that a person somewhere captures this
access to the Physical Body of the One God

then he understands how it works

therefore, understanding this is self-regeneration

and when we see it
it turns out that we are collecting ourselves
because we are in real time
one way or another we have access to this information
and in this we collect ourselves

i.e. an element of human self-assembly
this is contact with the Physical Body of the One God

Well, in principle it's understandable if there
Well, someone is working there with a plane
then you can look and also work
if you look with your physical sight

and in general, any of your cells look exactly the same
and generally speaking it does the same

therefore we can say
that there is a certain level of Perception yes
each cell
each cell has its own tasks

if you by analogy
Well, let's look at the process more deeply.
then you will see that here
we have to a greater extent exactly this factor
that each cell has
well, it's like the same path
from the point of view that you as a cell carrier
and in many ways the creator
you eat
you basically support life

then by analogy you can consider your own body
i.e. to consider very and elementarily
seeing the Light of God
about that very level that I mentioned at the beginning
when you walk and see your personal light yes

then when you look
the light of each of your cells is already determined by you
then you can
then regulate its cellular composition
just light optics
as if periodically moving , well, like, the optics there to the right and left

they are actually these primary systems
they are very simple
it's just a vertical, well, sort of petal-type light
which resembles a part of a petal

and by force of will
he is very susceptible to volitional influence
and we can kind of regulate
there are internal systems

so here is the logic
why are internal systems so susceptible to influence
because you are free to do whatever you want
you can go out to one place or another

so this is the action of human freedom
this is what God regulates and it is very simple
It is not difficult for God to regulate human activity

Please note that the analogy is very simple
by an effort of will you can very easily
adjust the cellular light

God is also very simple
regulates the actions of any person
not because He, well, something makes Him
because there is a common goal, there is a goal, well, for what purpose

here is every cell or organ
he has something in his forehead for something
this level is for the sake of something in a person

also for the sake of something a specific action of a person
i.e. a person
in principle, although God regulates
but he is free in every element
make the decision yourself anyway

and if we regulate our cells for example
as action cells
i.e. in principle, the cells are still to a greater extent
they work at the level of internal processes
mutually correlating, as it were
or they organize some kind of body, etc.

then we can here
in relation to the concept of organs yes

consider the action of society there
if God considers it from His position
then here is the action of society
the action of some external processes
are no geographical ones, even some situational ones
the concept of "weather", etc.

so if you want to control the weather
then look at what element in the general system
you and god
what is the weather in this case

not from the point of view of that
that there is a wind blowing there for example or it is raining
it's just the weather
as such as a volume of information

Well, take it from mathematics, yes
if you break it down into three volume sectors
there is one God
there you are
and there is some external situation
which is called weather
that's what it is

Why is this situation even necessary ?
looks like this
in relation to the two elements of Reality
you and god

in what God has determined for you
there well there for the Infinite and living
some place
and why in this place
Infinite level of development
has, well, let's assume, some elements
that an avalanche could come down from the mountains there
how to influence the possibility of Infinite development

if an avalanche covers a person
then he will have some problematic further exits yes
from this avalanche
i.e. why does this happen?

why is there originally an Infinite for a person to live
falls into the conditions of some, for example
Well, let's say it's possible that there will be catastrophic events, yes.

and that's when you start thinking like that
then you understand
that here it is enough to look at God
in terms of His organization
Here

because it's very simple
if you see how it is organized here
you see the path and the Eternal development at once
It is also organized by Vechka.

i.e. it turns out to prevent
there an avalanche or some kind of disaster
or just live normally
enough in this at this point
consider the level of God's organization
how is He manifested here at all, for example

Well of course manifestation is possible there yes
Endless time to study
but you as the acting level of Reality
you are the person who decides all the issues , generally speaking
and in an extremely constructive way
you can consider the question first of all of this type

if you have such an element as weather
that's the easiest option
use it to look at
Action Manifestation and Fundamental Meaning
God is exactly in this place yes

so when you look like that
then the simplest element
well let it be there let's assume some wind yes
look at the device there
well understand that there is some kind of molecule yes
from the point of view of physics so acquired knowledge

but if we abstract from the acquired knowledge
then the wind is just what blows on the physical body
it just feels like well specifically that one
what people perceive as a breath of wind

then it turns out
God yes sent the wind God sent the wind
where did He send him from?

i.e. if we, for example, let's abstract again
from the concept of " physical knowledge "
then we will see what is this physical knowledge
should have been created
to understand the structure of the wind

i.e. a person tries to understand
anyway, in some way of its own
he also examines under a microscope
there, for example, the air is the same for example there etc.
trying to understand the structure of the organization there wind for example yes

but when a person understands
he sees the external Reality correctly
there are mountains there and there is a wind rose, let's assume
if or there is a fan
then the person as if you see some external system
and God gives from the beginning
Well, that is, well, God sent the wind

and that's when we start to think
and where did He send from?

then there is a principle of identity
Well, there is a human physical body
corresponds and is largely identical
To the Physical Body of the One God

then it turns out
that where it is, for example, absolutely identical
then as God sent
and the man there made a fan and studied the process
that means He sent from man
it turns out
what is sent from the person who is here
and it was actually sent specifically for him

and it turns out that when you start
thus analyze the system of Reality
then it turns out
what do you have
in the Physical Body of the One God
well, almost a kind of lighthouse
which is not necessary to see exactly there
tune into the Physical Body of the One God
and search there all the time

this also takes some time

and it is enough in this case

Well, if there is a possibility in the future, ^{yes}

contact exit

into the informational Physical Body of the One God

or is it really ^{and} physically ^{there}

then that's good

but if you want to act almost instantly

then you must see that in every phenomenon

It is manifested

from the Physical Body

there is Reality

and it turns out that it is also from your ^{physical} body

it turns out that any element of Reality

this is how you practically perceive

means His Action

simultaneously manifesting itself independently

Here

then the question arises to think about

^{need} this wind here anyway?

Well, an avalanche is clearly not needed

i.e. not a single person in principle is really from God

not interested in being covered by avalanche

or he got into some kind of disaster

and that's when you start to analyze

well, like the structure of Consciousness that leads to this ^{there}

it turns out that there are reasons that ^{mean}

well, one way or another

at the time you may not have paid attention there

to some system

or they thought that it ^{was} not for education, ^{yes}

so here is the universal reason

which covers any system ^{there}

and provides a total education

and allows you not to mix up your thoughts

there, let's assume they are incorrect , ^{yes}

with thoughts, ^{for example, of} the Physical Body of the One God

this universal system is education for others

i.e. as soon as you give

the light of knowledge about God Well, there about Salvation
about how to live in general, well there Forever
not to be destroyed
or at least just normal

this is the concept of "not being destroyed"
already leads to that
what then may not be and warrior

if a person understands God exactly like this, for example
then it can't be destroyed
then there is no reason for war to be organized

then the person will not be there, let's assume he is convicted there
or somewhere in a closed system
well there with the restriction of freedom
withdrawn
if he understands for example
that God is absolutely free and manifested
as an absolutely free Person

then it turns out that well, in fact, he then
does not commit any problematic yes
or simply no legal system at all
has no complaints about him
because he understands
as generally speaking the Physical Body of the One God
why is it free

and when we already arrive
to these elements of understanding
then again returning to the weather and to that breath of wind
we see
what is our action our pressure
and there is His

and here is the intersection of this
this is the wind

and when we start this wind
Well, let's assume we need there to be no wind, yes
then we can basically control external Reality
well any physical information
knowing that His Action is directed towards us
first of all, well, in the implementation of His tasks
exactly there well Eternal development yes
Eternal physical body

i.e. there are more canonical tasks

when will we start to think
and where are the canonical tasks, well, at some everyday level

there The Physical Body of the One God
It eats there and sleeps, etc., i.e., it feeds there.
the same, well, basically, development systems have

and that's why it turns out
what we have to think about here is
Why then God shows
that His Physical Body is the same
Why

i.e. if His Action
Well, it's possible after all get knowledge there yes, a person has
Well, the teacher took it and taught it.
some textbook
you just read it yourself
but some author wrote it, some person, yes

then here is the Knowledge that gives
The Physical Body of the One God
this is the Knowledge that is aimed primarily at that
that you see exactly the True situation
i.e. the True essence from the point of view of Macrodevelopment
Macrodevelopments
in any element of the World
which you perceive
let it be a book , a tree, a road , etc.

and here you come to the level
where do you see
what is the road for example yes there
some ways of building development, etc.
they are practically in Perception
it turns out that they are sort of on a Spiritual level, yes
you see how your Spirit creates them too

one
and you can really see it

i.e. the optics of your Spirit
becomes so high and so bright
what do you see as
what buildings they are well as if hanging in the space of the Spirit
that they are not just somehow fixed there

gravity acts on them

and you see the True reason for the construction

why are they like this

well, this mechanism is generally useful

may allow to facilitate there

and in general there act on cargo

i.e. and significantly facilitate

such a mechanism of understanding

i.e. you shine with the Spirit

on some big building

and you see how it is in the World in this place

how it seems to be constantly being built

i.e. you see

that any element of Reality

it is constantly being recreated

and you come to that

that the Soul of God is constantly recreating

His Physical Body

logically from His Spiritual Action

and when you start to understand this, you see that

what problems do you have then?

your Soul can always

recreate your physical body yes

you just need to find an analogy for everything

how can I apply this knowledge to myself?

if you pay attention then

that the whole universe yes

the whole galaxy

well or there is star space

which is everything that surrounds you

it's just for the whole

your inner world

i.e. I am now showing the transition path

into the inner world

you see that this is just your inner world

you understand

what, well there's some other star there

is she even here?

i.e. it is achievable inside your body

and you see
how all outer space folds
and your body is realized
you see yourself because the world is like that

and when you start moving
i.e. make the first move
the soil in front of you seems to grow

i.e. each next step
this is the next element of Reality

when you come to such an understanding of the World
do you understand why God can live everywhere
i.e. He doesn't care whether there is oxygen there or not
well, i.e. He always ends up in Wednesday
where there is always a secure system
there is always oxygen
there is always Earth there ^{yes}
there are always ^{well} food products

there is a pretty simple saying ^{there}
that "there will be a day ^{and} there will be food" ^{yes those.}

and in order for it to be "day" what needs to be done
^{but} for God it is a day
it 's still ^{there}

and that's when we look at God
we understand that "there will be a day"
so naturally "there will be food"

so ^{well} it works out in this context
we have such a development
that we create food ourselves
how else can we be sure ^{yes}
that she is in the future

and when we come to this
then we see that the body is so reactive
we are already arriving logically
system in general in the world
that he can create any Reality at all
^{as if} for myself

and here there is a very deep intersection

with what I said
what is the path given by God

and here it is, I showed it now
what is the path that a person makes himself
he chooses it and does it

so here is the element of complete freedom
i.e. absolutely mobile system
well there a person as a system , for example in Reality
this is the coincidence of the path of God and the path of man

i.e. when a person does the right thing on his own
and the path that God gives him
it matches

then a person has absolutely unlimited freedom
i.e. he can instantly regenerate, yes
to be cured there
simply the most powerful ones there some problems disappear there
well which he sees as the most powerful
they then cease to exist for him
once and there are no problems, it is normal

the transition can often be completely unnoticeable

then the person thinks that this is how it should be

and this is this concept of "that's how it should be"
that well , there could have been a problem, but there isn't one

if this is "how it should be"
this is what he conveys to everyone

you understand this understanding of Reality
well, it's kind of everyday, yes
it is actually an instant transfer of knowledge to everyone
i.e. the person practically instantly
passes on knowledge to everyone

i.e. God laid it down
well, as if in the ordinary understanding of Reality
almost instantaneous transfer of knowledge

and therefore any everyday action
This is a fairly serious system, very intensive.
mutual knowledge transfer system

why do people use it and try there to use
approximately the same
some systems of household plans

because the general household plan
gives, well, like, a line of , well, such informational tension
if there is the same washbasin, here they open
there is hot and cold water there

well maybe there in the UK
there are often separate cold and separate hot ones yes

and if a mixer
that collective Consciousness
transmits the most advanced knowledge
for example, according to the understanding of God, precisely the understanding
through the same mixer to any other person
because they work in a universal system
i.e. similarities

identical tables
a look at the table gives understanding
what God now gives to man as much as possible

i.e. any element of the World gives a way
the real and correct way

and therefore man in principle
he can't get lost in reality at all

logically he is always in any place
if he just has a physical body there
or he even closed his eyes and doesn't look at the physical body
he always has a way
because any element of Reality that he perceives
any element of Perception
this is what God gives in the form of the right path

another question is how to approach this yes
and maybe there is a glass of water standing
from one end of the table
maybe from another
there are different ways to approach it
this is the path that a person chooses for himself

when we come to this

we understand that the form that a person determines
well, the shape of the table , for example
it means that here the will of a person already has a form
make the table more convenient to take this water from there, etc.

and in connection with this it turns out that the everyday level
Well, there is human intervention at the everyday level
this is what makes the level more manageable
as if in statics yes

Well I said that Thinking is beside itself
i.e. outside the physical body
simply projected activated Thinking
and the optics are illuminated by Thinking
as if specifically outside the physical body
this is a more static world
managing more static processes

and it turns out that here we have this factor
as a factor that we seem to save on the sameness of things

well why are there, let's say, tables, yes, they are mostly flat
Well, you could have made a flat area
and all the time decorate it with some kind of hills
theoretically there is no limit to the flight of fantasy
but overall the tables are flat

and here is this concept of "savings"
this says that
that we make some things universal
we try to listen more to that
what does god show

and therefore we can find in every thing
from the sign of universality
accessibility for other people
what God shows here to everyone at once

i.e. well, let's assume that there are video cameras with different characteristics
but in principle they are intended to be there
record image sound yes
You all know that video cameras do this
there is a TV showing a picture

generalized knowledge gives just that
contact with God
through His Manifestation in the generalized Reality

there is a concept there of " states " some kind of social systems

and that's when we see
that any manifestation is the Action of God
directed, well, as if some kind of help to a person
there is His helping hand
directed specifically at a specific place

then we can say that people
there are situations there
what does he say there, "God helped"
and he saw this action, yes , God helped
i.e. let's assume a specific one there, there is often a physical hand
extended there to that man

i.e. at that moment when some person
he reached out and pulled it out
this means there is
Well, it's not necessarily how she physically looks , yes
maybe in the form of knowledge there

then this is that action which is of this type
that when God is in the social system
in the social system
i.e. as a person simply
then He sees generally speaking
first His view of Himself he is like this
what He sees simply
Infinite universal space
i.e. He doesn't have any kind of order of things

and when He perceives it as a man
he begins to introduce order
based on the coordinates of your own Physical Body

it turns out that a person can act similarly
he can introduce order
at some points in its development

i.e. for God
Well, when God is with man at the same time
it could be like this
there may also be single points

i.e. God who perceived the World in the form of a man
He starts it as if as a Person
starts to put where everything is

when he starts to arrange
well, like in my Consciousness, yes
then He finds a way and moves there in a certain direction

so for God
just the arrangement and Reality are the same thing

for a man the way
this is what he chooses as if a static Reality

so it turns out that Reality is static
Well, there are roads and cars, some addresses, etc.
this is something that was created by people
in order to implement
Well first of all The will of God
by intensive and endless development
and secondly, so that the person participates
in collective management
in the collective level of knowledge of God in fact
Its development

and it turns out that we have exactly this kind of civilization there
are exactly these houses there and some numbers and some roads
because we participate together in, for example, development

Well, I mean, you can logically abstract yourself and calculate
that a person could there, well, in the steppe
there are steppe peoples there, yes, at one time there were peoples

why did civilization go there according to the level of roads
well, that is, to understand that this seems more logical, yes
it's clear that civilization is spreading
in terms of, well, intensive development, I guess

so this is this intensive development
this is what God goes ahead

and that's when we see that He is walking ahead
we then clearly understand
that no machine is dangerous to humans
no disease is problematic for humans
he may not get sick at all
but in principle he can always recover

because as soon as we understand
that this is also the way of God

here is civilization , there are different cars , airplanes, etc.
well, simply put, the technogenic path of development
this is also the way of God

then we see
what does it mean well how to do it like this
so that the man-made path
never destroyed a man

you just have to go as simple as possible, the easiest option
just in the footsteps of God
stepping on the same tracks

and when you already see in this
Action of God
then it turns out to be any reasonable level of a person
he invented something there, man, for example, yes
some technology there some natural phenomenon
then God once gave it to him for some reason

and we can see that God
well, like some kind of operator there, manager, yes
which precisely connects as a kind of dispatcher
even there in local situations
begins to connect some phenomena

then you can see it here
why is one phenomenon located near another
or how to connect one there
Well, it would seem that this is a completely physical phenomenon, yes

they invented the laser beam there
and then they started using radiation

i.e. how God makes transitions between different phenomena
how does he connect them
and how He gives them a more common way yes

then here we can see by analogy with this
why does the person have exactly five fingers there
i.e. we can see why

because that's the world there
because there is a collective Consciousness
and because God goes before us yes

or there, let's say, naming five reasons

you can see five fingers
if we want to get light on all five fingers

so when we consider for example
what is going on
and which already to a certain extent yes
has cognized the World or knows it completely
It kind of glows above your head, there is a halo, yes
closed system

then the isolation goes further
into the shape of a human
and the form has for example five fingers after all

i.e. the development of the World into an external system gives discreteness
i.e. we see optically, well, there is a halo
which creates, let's say, a rounded head shape, yes
further there is a branching out into the outer world

i.e. the center of the sphere branches out into the outer World

when we see actions
in relation to the outside world
then it's clear that it's easier to work with your hand
it is more of a contact system

so when we look
by analogy with the Physical Body of the One God
then we see that the One God therefore
there must also be some level of socialization
well, contact with external Reality

when we translate this contact
to the physical body of a person
then we see that contact
in this case it was revealed
products of the activity of the human physical body
Well, a person eats and he excretes

and when we look at the power supply system
and the human excretory system
as contact with the external environment
as one of the forms of contact

it is clear that the external environment is organized by God
specifically for you to have this contact
perceived

in the form of well, absolutely the same by the way, often regular systems
i.e. there are specific food products
and somehow processed
i.e. there are certain technological cycles
then buildings are built

and this is this system of contact
is revealed in that
what if a person is self-aware
in this whole system
well in some specific place yes

here is a building being built, he took himself somewhere and realized
in a specific place

then it solves all the issues at once practically
here are their current ones

because he sees
where is God here
well there is the Physical Body of God
where is his soul
manifested as a contact system
to him personally to the person

Well, this is reminiscent of a conversation between two individuals.
when you think deeply about a person
you see that well, the situation is brewing
then as such some deep penetrating level
and in Perception
then you start to react somehow
well, to normalize the situation, so to speak
To a greater extent, people are faced with this
when something needs to be normalized yes
or somewhere to think deeply there
about natural phenomena
about works of art about a painting for example

image of a painting
often has the same fundamental level
if it is made by a master and from century to century it does not age, yes
it becomes more relevant, i.e. it develops

this is the principle of development in the external system
also laid down as a manifestation system
as a contact system

and when you see God in dialogue
you may often not even notice
that you are set on one person
and have you been talking to God for a long time now?

i.e. you have been interacting with God for a long time now

and here is this manifestation
after all, God created it
so it turns out for some reason
You yourself chose the path to contact Him
or there with that and the other
or somehow not contact yes

when you start to see
that God is manifested here
and you see
that this is already God
then you see that He is helping you
and that's when you see that it helps
this optics is clearly shown

this is an action, i.e. this is generally speaking
it looks like a movement of God's hand
i.e. you see His physical hand
help is the hand of God

when you start from here to follow further
Be careful here
I showed the geometric place yes in understanding
It is precisely the geometric place in understanding
but the geometric place in the optics of understanding

and then you see His Physical Body
what is it doing now
not just the Physical Body
and you tune in to Him yes
what does it do anyway?
this is how it creates the world
how it creates for example Reality is in front of you

and so you understand
what when you are already working
with the Action of God
His Physical Body
His Soul

Spirit

then it becomes much easier for you

Well, you can, for example, watch for a very long time
how 's it going good there is a carpenter yes or some mechanic is working
and works well

Can for example, learn this in principle

but it is possible as if to enter into some kind of sparring
and work almost simultaneously

Well, when you already know how to do something, yes

arises

some kind of Spirit of co-creation there of rapid movement

then you don't think about it

you perceive it as if it were not because you first studied it

then they applied it to themselves

and because you are already in automatic mode

well, you just work synchronously

so this synchronicity is what

where your Soul is created

a place of understanding is created

where your Soul is created by God

precisely by the whole God

where all manifestations of all understandings of God are included

including the Physical Body of the One God

and when you find this point

you see that your body is actually

well, it kind of grows out of this place

the center of your physical body

is located here

when do you start to see it

you understand that in principle

sometimes very strong healing effect

often as if principled

This method can solve the problem, but it cannot be solved by other methods

often

so if you enter this place

and just kind of stay on it for a while

in understanding yes

you are practically healthy at this moment

what do you need next?

just prolong health and Norma
forward to the future

so is the Physical Body of the One God
He has Norma and always pushes her through
i.e. He works
It gives you the opportunity to understand
that the next element of Reality is still work
well often it seems like it's not always that tense there yes
but often tense

but here is this work
which you overcome
this is what he often is like , well, like a person
just overcomes on his own

and when He understands yes
what problems are there at this or that level
His understanding is that He has already decided

here is understanding for God
that He already sees that He has decided it

it turns out that His overcoming
this is what He teaches you

and when you see his training
it turns out that any overcoming
this is teaching others

and when we for example Well, we don't set a task
here's to overcome
for example, there is something that can be overcome at all
maybe this problem can be solved there without any problems at all

i.e. you can't set exactly those tasks
which are not set but as if
Well, they were not placed by God from His Physical Body, for example

but the task set by the Physical Body of the One God
from God, which includes the concept
God's souls yes
Spirit
His Actions
Consciousness
they are always like that, they don't actually cause problems to a person

i.e. God does not set tasks for man
which are problematic for a person

therefore it turns out that the Consciousness of God
this is what he conveys from, well, sort of
and to Him and God
and from God to man
transmits all the time as if
continuous level of knowledge

and it turns out
that human consciousness
and God Consciousness
they are crossed in a system where everything is favorable

and that's when you start
to bring out the sphere of one's Consciousness
into the sphere of favorable systems
then it turns out that we have
as if a completely favorable level
as if in Perception and in management precisely then
when we do generally speaking positive management

hence positive creative management
well let's assume there is a restoration of a person and his health
so here is some kind of Norm of events
this is where the Consciousness of God and man is
they are practically from the point of view of external perception
they can, well actually here's the action
they are inseparable

but at the level of dynamics, so to speak
they are one in general
at the level of, as it were, dynamic viewing of the external

well maybe more so when in general people are those
who are already doing a lot of work with this technology

they can see even in dynamics the difference in optics yes

there are optics there and they are not rigid
in the difference
i.e. optics are perceived only at the level of the Soul

Now I have highlighted the fundamental thing
there is an optical level
which can be differentiated only by the Soul

you just know

and this is the level

well, practically it is higher than the level of clairvoyance
this is the level of just direct knowledge

and when do you know so

you see how your well exactly path
how God gave your Soul knowledge
as He gave them
where are they even located
knowledge transfer process

and when you see it

do you understand
that initially, well, as if having this knowledge
first of all, you can transfer them quite freely
they are open

there is a kind of level of universalism

as soon as you understand how God gave you knowledge
you can already transfer them as a universal system
that's the peculiarity
precisely to understand and know God
in terms of exactly the correspondence
for example, yes to the Will of God, the tasks of God
what is your personal knowledge
when transmitted it becomes universal

i.e. in this case you

well for example if you are at this level of understanding
and you tell some story of yours, just any story
then you are transmitting universal knowledge about God

i.e. people start to see, well, basically

that in general in each case they see independently
but at the same time they see
your closest approach to God

how are you at max level

interact with Him at the highest possible level, as it were

i.e. it turns out that seeing how God transmits knowledge
this means actually teaching actually

Well, of course you can teach with some words
and there you can train your cells

i.e. you can take them and teach them
so that they don't get sick there or recover there, for example

and when you already have
well, the full mechanism of knowledge there, for example, there is interaction
with the Physical Body of the One God
then you see the next element of Reality
which speaks about that
what is your physical body
at a certain level of the Soul of your own Soul
it's a pretty clear system

and for example you understand very clearly
what about the physical body
in general, you basically have no problems
i.e. there is a level
where it is absolutely clearly understood by the Soul

but when you interact
you are interacting with God
this is Reality

i.e. understanding determines Reality
at this point

and so when you start
element of Reality
output
on the structure, well, sort of understanding
then you just do what you saw, yes
realized practically
and you have this action carried out
Well, basically almost immediately

i.e. you just go there
what did you understand
and do what you think is normal Yes

i.e. therefore the output is like a household level
well, it's like an overflow of this everyday plan
Well, everything should be fine anyway
this is the outer overlap

and when you see
well, as if in an internal dialogue with God
then you are already interacting in this way

God
You
and external Reality
i.e. people are some elements of collective Consciousness

when you are already interacting
you can see clearly
optical optical separation level

external Reality
And
your personal Reality

where did you do it because you know God
do you know how it works

i.e. the level of your knowledge is a different perspective

i.e. you are practically in this optics
in general, you start to understand it like this
what well if you are walking through a clearing yes
somewhere there is some kind of light, let 's assume , yes
then here you can see
that where is the Light of God
in this clearing yes, the one you are going on
Here you begin to clearly distinguish

and if you For example Well, how would you like to approach this Light?
that depends on whether you are physically suitable
give you to this world

and if you understand
then you can navigate this field
i.e. Light that gives understanding

and therefore your Perception
it is formed by God exactly like this
what do you get through understanding

so understanding is what is accumulated from God
in the form of action
His Souls
Spirit
Physical Body
His Consciousness
this is the maximum manifestation of God Consciousness
your understanding

and when do you start

let's assume we understand quite accurately
then you are already entering into contact, so to speak
at the level of God's Consciousness here

i.e. you are all

And

God Consciousness

keep in mind that your personal

in this case it is shown

as a physical body

Soul

Spirit

Consciousness yes

all external phenomena, etc.

events

And

only one element of God Consciousness

hence God Consciousness

in their contact

defines

all your presence in this world

only one element of Consciousness

therefore a person has Consciousness

can also determine

all external Reality

only because he realized it

this Reality

With such a number of phenomena, God

It is enough for him to realize

and the phenomenon immediately falls into the right position

He creates them because He is aware of them.

hence

you can realize

as if the structure and the internal

external structure

i.e. the structure of the physical world

and then you get practically

well, what does all external management have to do with it

that awareness of some element

immediately brings his Norm to his control

i.e. to the standardization of this element

awareness is exactly like that
as I just said

where is God's Consciousness
this is all your manifestation
one element of Consciousness

as if His Consciousness just touches you yes

based on this, well, we can work it out
quite a serious methodology
i.e. there are a lot of working methods
there are principles of specific practice

Well, for example, a very simple element
if His Consciousness yes
touches
With
your level
and your whole Reality is a manifestation
the exact manifestation of God Consciousness

then from the point of view of methods it is very simple
method

as if you just take it into the sphere yes
all your events
and find
point of contact with the Consciousness of God
and all your events are standardized

It was very easy to find using logic
this is the first method yes as if it immediately starts in a heap

second method
take the target sphere
starting sphere yes
and since there must be one point of contact
just through a common point
well, like a small ball of God's Consciousness
took them and locked them
there is no need to look for anything
the goal was achieved, etc.

from the point of view of principles
immediately technology principles

a very large number of people are starting to appear

i.e. the principle

so the Consciousness of God is everything manifested

even if it is manifested at one point ^{yes}

logical

logical

Well that's the principle

second principle

that the Consciousness of God is also within the system

although the point of contact is from the outside

that's also clear

third principle

what is God Consciousness

it turns out to be personified.

your Consciousness

you are also in Perception God

Well , first of all, ^{yes}.

hence

the personification of ^{Consciousness}

i.e. the manifestation in your Reality is you personally , etc.

i.e. from this principle it follows

a very powerful system for restoring your body

for example, from the point of view of methodologies as such, ^{yes}

for example, a fundamental Law arises

he's next

What

God He is the all-manifested Reality

but realized precisely in your Perception

and also like this

that your physical body ^{seems to} know Him always

i.e. precisely the physical body

and the Soul certainly knows

and even knows from the beginning

well, that is, you can build quite fundamental levels

taking into account that before the organization the person already knows

and that he ^{sort of} chooses for ^{himself}

to your organization

This is basically a fundamental Law
means human development
from the point of view of knowledge about God

Thus
you can work out
well, there are quite a lot of technologies, principles, methods, yes
based on what you know, well, that's exactly it
fundamental things of principle

here you can do many applied methods
knowing and considering some position
namely God
It is His Actions
well or awareness of God as such
as such, simply in principle yes
somewhere deep inside myself there
somewhere in the depths of your Soul
look at Him from there yes
see His Actions there etc.

those. from here essentially
the level of fundamentalism is kind of yes
it is he who determines the level and actions

i.e. the more fundamental you are, the more precisely , well, the more personal
become more aware of God and see His Action
that way you simply solve your problems faster , generally speaking
and therefore everyone

because
God gives yes to everyone at once
this means that naturally there are no catastrophes, everything is fine, etc.

I now propose to do a training
based on what I said
then you just take it for everything
well, sort of for the entire management level, yes
the whole part that I just told
and considering that this is already the end
in fact, yes, here is the seminar today

just take it
the entire volume of information
and kind of light it up
well, all this information, as it were
as if next to you

and within yourself

i.e. solve two issues at once ^{yes}
in one action
those. ^{well,} solve it comprehensively

and it will simply be like training
and the final part of the seminar

so now go and work
and I will work with you

i.e. the entire volume of information
which you just heard today
take and illuminate
's cone-shaped ^{there}
near yourself, ^{for example}
and within yourself
and that's all

i.e. you translate it into a cone, ^{for example}
this amount of information
and you start to shine
simultaneously
inside and outside of yourself

if it is a cone in the outer part
inside it's just your glow
inside the body

so you work
and I will work with you

This is where I end today's seminar.
Thank you very much for your attention

the main thing is more practice, ^{yes}
here is today's seminar
I touched on quite fundamental principles
but it is advisable to practice a lot
precisely from the point of view of implementation
fundamental levels of management

Thanks a lot
