

GRIGORY GRABOVOY
The Teaching of Salvation and Harmonious Development
Method of cooperation with the Soul of God
19. 03. 2003

Hello
today on the topic of implementation and dissemination
his Teaching on Salvation and harmonious development
I explain
Method of cooperation with the Soul of God

taking into account that the materials of the seminars
are created at the very moment
which is happening right now

then here is the first urgent problem
existing from the point of view of prevention
namely a possible global catastrophe
is precisely the task of preventing war in Iraq

in connection with which I once again visited the site
this is the one called grigori.ru
gave control information
related to this problem
and this management is precisely in that
that you need to concentrate on numbers

at the same time, from the point of view of assistance
i.e. the relationship of , for example, a number with a word
here a method is used which is based on that
what if we start to say a number for example
then from the point of view of the transition of a number into a word
and control through words
the same principle applies
that the beginning of a number can generally be correlated
with the action of the word
i.e. a certain unified principle

initially when we talk about that
that the word is active
which was originally created by God
and what are we talking about
that the word is created for action

we combine this word with the number itself
then from the point of view of the Soul of God
we see that the Soul of man
learns about the world through comparison

and this level of knowledge is compared
it leads to this here
that when we consider, for example, the situation
existing right now in the real world
from the current point of view let's say problems

then the concentration that I gave
can be considered
precisely by the concentration of interaction
numbers as such
and words that can be obtained , for example , from this number

this concentration is 7 4 1
at the same time it is possible to perceive
in convex more is better in terms of circumference
view

and this concentration is such
what is the embedded meaning of this concentration
preventing war in Iraq and saving

keep in mind that the fact is to prevent
for example the first actions of the war in Iraq

and considering that here it is exactly 7 4 1
then if we consider the number 7
from the point of view of a kind of relationship with the word
then "seven" for example exists in the Russian language
some kind of unfinished word let's say "everything" yes
"v" "s" "e" when "e" becomes "yo"
those. upper letter border

if we consider
the principle of growth of letters yes in Perception
then the two dots on top are the growth and development of the letter "e"

let's assume we look at it this way
that "all" is what it is now
you can add for example "everything"
"everything" and "all" are generally comparable concepts
if we develop the number 7
then in general there is still a sense in personal schemes, for example

if you remove the soft sign

then it turns out that we are from the point of view of the number 7
and the words that I just quoted
we do management aimed at that
that we are recording this Reality
in relation to
as of now yes

today's moment for example is "everything"
we also relate it to everyone
if we add, for example, only one letter, just "v"

and when we do concentration
you can say the concentration in a number, for example 7 4 1
then "in" naturally arises

and when in this case we look further
then we get that the combined fixing factor
this is the Norm "everything" as the Norm is perceived

if one person is in the Norm
and the number is related to all
then the norm can be extended

i.e. the distribution of the Norm is the number 4
if "h" is developed further
then this can be translated again from the letter "e" to the letter "ë"
we come to the word "even"
i.e. a second increase in information arises

if we proceed from the level of God's Action
then God who created everything
even is what's next yes
God the Unifier and the One Creator
gives the next level
as if developing oneself
principle of creation

further we follow that
that the number 1 is unity
i.e. coming to a single point for example to a single World

when we consider
development of this number series
then we get
the system of autonomy of action of this series

provided that it is
when we come to this level 1
he becomes this exchange of information
well, in the form of , for example, an autonomously existing sphere
which works just because
that human consciousness
moves into the management structure
to the external physical Reality

This number series, by the way, also works in this case
for example, if there is a very strong pathological process
Well let's say I applied it in cases
if fast-moving processes of malignant types

in this case the system is also quite powerful
it is the regeneration of this numerical construction

and when we consider already
more predictive management phase
then here from the point of view
Well as if the fundamental systems of the universe
need to consider Well How still, if possible
the true reason for the existing precedents Yes
from the point of view of this possible war in Iraq

because the situation here is like this
what is this for example, citizens of the state Grigoriya
First of all, I recommended
work precisely according to concentration
and also to volunteers for disseminating my Teachings
and in general to everyone who wants to
to prevent this situation

because in the principle we are talking about
what's in the forecast if it develops
exactly, well how as if a stormy catastrophic situation
for example with a local war
then we are of course talking about the fact that around 2005
Russia as an opposing country may be involved
in fact, from the point of view of well, availability
global weapons systems, for example , the USA

and considering that development
some local incident
between for example Russia and the USA
This is actually not a very difficult task

in the context of the escalation of local conflict there

then we are talking about what is in control in this case
it is necessary to make management
to this conflict
first of all, it didn't happen

because if we proceed
from the level of, well, sort of confrontation between leading systems
then in this case it is natural
systems for example USA
maybe we're still talking about that
that at the moment such tasks are not there

Of course it is beneficial that if for example something happens
well, some kind of system of confrontations
using strategic nuclear weapons
between Russia and the USA

then of course, in the opinion of, for example, US experts
it may not reach the US territories already there
but at the same time Russia's status will naturally be diminished
because if they start military action
and it doesn't seem to lead to victory
it turns out to be like in the old understanding, even before the nuclear world
then the status of the country is somehow diminished

in this regard, these are precisely the tasks of leadership, yes
of some one power
must of course be compensated
the actions of each individual person
connected precisely with that
that he can, for example, personally influence
for example, according to my management technology
or perform there like people perform in the world now
against a seemingly local war

but from the point of view of citizens in general
for example the state of Grigoriya
the goal there is generally to Save according to my Teaching
including everyone
i.e. we are talking about each specific person
on the territory of Iraq or there an American soldier, etc.

therefore management must take into account
the essence of the situation that actually exists now
when leadership of one power is possible

and at the same time this leadership
Naturally, the world community does not want to allow this
because under the condition of global nuclear weapons
leadership is generally not acceptable, well in its direct form

and therefore the management in this case
I think it should be
it is precisely in such a deep factor of accounting
precisely taking into account the situation

and if we look at the deep roots
why does it even exist in america
well, except for the reasons that were said
there is this situation
on the development of this tension

Well let's assume there
yes there is a concept such as a crisis of overproduction yes for example
The sales of products are such that well It's like there's nowhere to sell it
those countries that are under control require reporting, etc.

i.e. there are some internal reasons
because of which the country is kind of forced to lead
in general, the function of a leader or something

and at the same time I consider the most optimal form
make management when country
well even if it's any, it doesn't have to be the USA
leads in terms of provision
real life of every person in general
and not necessarily only this country

so i will introduce the control again
this is what providing just a really normal life
at least a specific person of any kind

i.e. we have come back to the essence
to one person who needs to be saved

and therefore when we work already
from the point of view of the method of cooperation with the Soul of the
Creator
then what we are talking about here is that
that the Creator is precisely the One God
then we see that man was originally created
basically everything revolves around him

i.e. the situation that I am now considering
what is the situation at the moment
because basically there are a few hours left
before the expiration of the ultimatum presented by the US to Iraq
reasons for introduction: possible military actions

then it turns out that there is an ultimatum as such, ^{yes}
here is the beginning of the action of some combat
this includes a specific person
^{well} there for a small child
on the territory there, ^{let's say} Iraq
if this is a terrorist attack then this is US territory ^{yes}

and the manager's task
provide specific personal protection
to almost everyone, regardless of territorial level

and plus besides it exists now
a situation with some form of pneumonia-like
where the synthesized system is used
which already unites structures
and the animal world
and a person
and it affects , ^{for example} , the respiratory organs

i.e. investigative systems arise
which can be considered as a system
which are ^{actually} related
around stressed systems
this may arise simply for informational purposes

so the next level of management
This is control through peripheral systems
i.e. management of the investigative system
which may arise around hot spots there

in this regard it is necessary to log in
already at the second level of management
if we proceed from the level of that
that the Creator creates among other things
and the One God the Creator creates
next level as equivalent level

then we are equivalence
precisely by the possibility of Salvation
then the equivalence is as follows
what is the next level

it is quite problematic accordingly

i.e. this is basically the situation

we can see now

let's assume the virological nature of the situation is that
that this could be an adequate level

Well as if there were possible global consequences yes
because the type is not clear enough
from the point of view of orthodox medicine

therefore we need to make management
in order to give a level of knowledge

i.e. the next level

this is a level that requires more knowledge
and the further you get the situation out of the crisis, as it were
the more knowledge is required
the combined knowledge of people

it's easier to take and apply the knowledge initially
i.e. not to allow the situation to happen

so although there is not much time left
you need to do the following

go out

to the level of concentration of human knowledge

This level is located

above the Earth's North Pole

in the first iteration in Consciousness

somewhere, let's say, at a distance of 25 kilometers from the surface

just look at the silver sphere, so to speak

and how to unpack it

knowledge to use to prevent the situation

let it be historical knowledge

to prevent a catastrophe from happening

Next we develop the technology of access to ourselves

Now if we talk about the Soul of the Creator

then in the Soul of the Creator of the One God, moreover

there is as an external system

which is equivalent to internal

here is the principle of equivalence

therefore you have something in you that you can do
make yourself and your personal management

Well, there is the principle of God there
moral level of management

so that's when we use what you have inside
this is control coming, for example, from the heart and from the Soul
control created by the Soul

so you can do it without paying attention
on the creation element
how does the Soul create this level of control?
just to reach the level of desire for realization
assistance with the Soul of the Creator
i.e. do it both there and here

seeing the center of concentration of knowledge, for example
which can prevent
possible global catastrophe
from the Iraqi problem now for example at the North Pole

find near your physical body
level that could characterize
well, an identical system
i.e. your personal knowledge

well let's assume there is a sphere with a radius of 5 centimeters near the heart
from the chest, for example, 14 centimeters [...]
i.e. the total length is obtained
19 centimeters of this kind of segment

i.e. if we make the management completely specific
and at the same time we use a term like "segment"
for example some figure
then we move on to the next concept of the Soul of God

specific systems
contain the Infinite Control System

and therefore we understand
this is the status of the Soul of God
we will be able to make a transition near us
to the level of physical Reality

Well let's assume to stop
rapidly progressing malignant process
enough in the terminal phase
this is the level of transition
means a deeper entry into this sphere

into his own sphere
i.e. the depth of one's own construction

but it's already logically clear
at the logical control level
the deeper we go
in the information there, for example, of your Soul and yourself
the closer we are to God
since He is the original Creator
i.e. we see Him closer
and we see more precisely His level of control

so it was originally close
the closest, so to speak, proximity of control
it is included in the assistance for the purpose

naturally the Creator does not need any war
and if we proceed from this
then our action must be unambiguous
there can be no war
all the more so let's assume for the citizens of the state Grigoriya
any conflict any level of destruction
is unacceptable even without talking about wars
well including volunteers, for example, to spread my Teachings

so it turns out that the task is personal
be able to do the management
actually at the level of assistance
where assistance is
and the task
and including the understanding of assistance
this is how the deep meaning of unity with God actually

those. action according to God's task
this is the level of unity
level of belief in one's own actions

and that's when you move on already
to the level of faith in one's own actions
that's enough as I always teach
even one
who can prevent a possible global catastrophe
a person who understood this and came to this

but also if we unite
or we push the next ones to act in the same way
then pay attention

that for example political systems of regulation there
or national often
may not be effective at all
in the conditions of especially absolutization of destruction systems
such as global systems

then it turns out that it is a personal level of management
it can be the only main one
and it must be based on that, among other things
on faith in achieving actions

therefore, the formation of faith is something that is given from above
why religious system
is built on the elements of faith
because faith is the fastest way to control
achieving management information

including the method
which means it does not output the logical phase
analytical management base
to constantly go through options
This is actually an option and it is being implemented

so in this case we are talking about
that when we do such management
By the way, I specifically increase the speed of conversation
to keep exactly the control phase
at the highest level of Perception

so that it is clear to us
that it costs a lot of work
and we will definitely do it
i.e. it all depends on the amount of work
done exactly the work that each one did

another question is what if we do management
and let's say this Well, someone acts quickly.
someone for example slowly
then the next strategic one arises
the principle of organization of Reality from the One God

it consists of
that every person must act
generally speaking, the same in terms of the degree of creation

this principle is that
what everyone generally has

same initial characteristics
allowing him to do this

therefore when we talk about that
that the war in Iraq must be stopped
generally speaking, this means being able to do
one including a person

precisely "including"
because the total number is ^{yes}
for example, if we proceed from the inverse levels of control
in this case

number turning into word
or a word turning into a number
that is also what is meant in that specific
for example there 7 4 1 in that exactly 7 4 1 this number
or there is a numerical series that can be called a number again

so that's when we use the word "including"
as a word implying the absence of number
Well for example, "including" we carry out some action
we may often not talk about a number as such

then in this case "including"
where do you mean a specific number
we mean that it can be used
from the same phraseological level of conversation, generally speaking
completely different type of management

or we see a specific number
or we say "including" where ^{generally speaking} we exclude
the element itself from the control
we say "yes there is a control element
but he is one of them"
we don't talk about it

so here is this action
this is action
where is the Soul of the One God and the Soul of man
grow at the same time
towards event management

I just verbally showed exactly that row
where this growth occurs simultaneously
i.e. there is no difference

because the combined effect it is
as strictly defined
and also undefined in general
i.e. the multidimensionality of a single action

the explanation is quite simple by the way
I have just given the logical one

so if we move to that level
how logic goes to control, for example
there well let's assume with our own body
you need to restore
your own body for example
from the point of view of the following events

then considering the situation that you
Well for example, they are not sick in any way
but at the same time a situation is possible
which can lead
to some problematic options
type of global conflict
then it still affects every person anyway

that's why i say it
that preventing a possible global catastrophe
it's still a personal matter for everyone, in essence

and from the point of view of predictive events
this is an action that is applying the method
is precisely co-development in this case
with the Soul of the One God and Creator
where the creator, by the way, can also be a person

then we get
to prevent the next event
Well for example, there is like an elevator between Russia and the USA
in the future, for example in 2005
we need to consider
your personal coordinates at that time

i.e. well the principle is very simple
consider yourself personally at that time
and around yourself you put the pole of Norm
and the Norm pole excludes the presence of conflict

and therefore here it is
and it is precisely the element of cooperation with the Soul of the Creator

consists in seeing oneself

if you ask yourself the question

how God built Himself

for example, in the form of a physical human body initially

then He had to see Himself first

because how to build if there is no specific model

it turns out that seeing yourself ahead

this is an element of God's Action

vision ahead

This is an element that a person can easily study.

and very specifically use it for that

so that the control is transferred rigidly enough

to the level of physical Reality

there is a phase

when control must be transferred very harshly

Well, let's say I had cases

when it was necessary to build up, for example

boards material systems precisely in technical levels

so that there are no plane crashes there

in the process they burned out

i.e. they are not there, they need to be increased very quickly

and at this level

the simplest element of such control

is simply just

access to the structure of one's own body

i.e. when you see your own body

then concentration on the body

from the point of view of external observation

gives Norma for example on the plane

method of transition to physical Reality

this is your own body

and when you do management for example in this case

then the same principle can be applied

for example, consider yourself

and not hypothetically from the point of view of that

maybe in 2005 you will be there

and specifically looking at myself

Let's assume specifically in 2005

better closer to the end of the year

It is already clear that the period of time has expired

then you can build around yourself
this is the pole of the Norm
which will be characterized by the fact that
that the Norma will start to operate now

and as a kind of well, as a general option
close like dominoes and put it vertically
they all start to fall apart
then here you need to sprinkle them the other way around
to yourself
i.e. restructure the information so
to resolve the situation there
i.e. to make Norma in 2005
Get Norma Now

and as a response signal
This is a signal to send to Iraq

however, this is not a matter of speaking in general
only specifically about Iraq
but so that they are not destroyed
well, and American soldiers or other people, etc.

so when it comes to the absence of conflict
then the absence of conflict is just the usual norm
i.e. complete absence of conflict

and then comes the task of removing the essence
generally speaking, any level of tension
i.e. any task is like some kind of precedent
which needs to be solved radically in essence

and so if we start
extrapolate information into the future
then by action with the Creator
with the assistance of the Soul of the Creator, the One God
we can see
that every next action
after all, it is prepared technologically, so to speak
by means of additional funds
freedom is more prepared for that
so that there would be more creation

For example Well, a simple example
if there are no means of communication there yes

there are phones there
so that we can say cancel some action
we need to communicate somehow

if there is a phone
therefore you can call
to negotiate in some country
and there won't be, for example , even a local catastrophe there

i.e. each subsequent action
need to find the characteristics of benefit in development

and based on this, this man-made system
technocratic system of development
you can sort of turn it inside out and apply it
towards the fact that this is a more useful level
in order to decide
the existing system of conflict

if we proceed from this
then we come to a certain fundamental Law
co-development with the Soul of the Creator
and cooperation precisely with the Soul of the Creator

and this Law consists of this
what do you have every next action
as much more positive than the previous one
from the point of view of the primary level of management

then it turns out if you are there
Well for example, output the pulse to the current
what you need to prevent war in iraq
and it is somewhere near you this light impulse

then the next level can be significantly larger
it can it can diverge into specific technologies
let's assume that everyone who can participate is there
in such a conflict
and so that they, for example, still do not participate

and further unification of people, for example
why exactly according to my Teaching
about Salvation and harmonious development
disseminated information
this includes [...] dissemination of information
target absolutely precise

you can take it and it's absolutely accurate
give coordinates to a specific person
what should he do now
if he is deeply aware of it
the conflict can be immediately restructured

after all, the task of the Creator of the One God is to do so
so that humanity can independently solve problems
well , internal regulation

after all, there is a logic given to people that says that
that it's quite normal to live
this is the most common sense behavior

so this is like this conflict base
Of course there is an opinion that some kind of threat exists there, etc.

but the point is that
what do we suppose Well, comparing such a simple factor
what if we have
Well, there is such a problem in the world
that theoretically Iraq could attack the US, for example

but the US has a strong enough
a system of generally speaking territorial protection
and think that he can deliver problematic blows
I think this is generally not correct
from the point of view that it will be a forceful strike

Well, that's theoretically if that's the situation
extrapolation may arise as if
as some possible development
then it turns out that the US manages to defend itself
well even according to the probability model

but since we are working after all
not from their point of view of probabilistic systems
and from the point of view of precise control
then in the information such a thing generally does not occur

i.e. there is no such information
so that Iraq would take, for example , there he would attack first
ever on US territory

so it turns out that we need to proceed from that
what is the motive in general in management

if there is no such information
and the action takes place
then what is the essence of this action

well, I gave one level for example
where there are economic reasons
there are some reasons for leadership yes
and for example some territory of the country

but here the situation is still the same
that there are external arrays of information
in relation to this kind of thing as if to the system
as the development of humanity

then these external arrays of information
they can naturally influence
what is an influencing system

if we look at that level
for example, a person who thinks
he can influence
it means some situation
or there by physical means
either by controlling it from your Consciousness

then it turns out that the external system
created by the One Creator that influences yes
but it does not affect the correct degree of control, for example
i.e. where there is destruction of destruction

the external system needs adjustment
as a rule, a way of controlling an external system
this is generally speaking training
i.e. bringing in the knowledge that you have
into an area that is generally considered external
to the event area

in this case, the event area
is the end of the war in Iraq

therefore, based on this
we get what in order to get
including personal management
i.e. to simultaneously perform the self-healing action
the action of restoring others

because every manager

it acts simultaneously
and by means of a restorative level
for example, **YOURS** yes
if there is a need to recover

then this is the control system
it consists of the following
what to do action
the recovery level must be maintained
in action

and at the same time the recovery level
contains Norma
i.e. well, your Norm, for example, physical, social, eventful, etc.

and this Norma
transferred to the external sign of control
well, actually , it teaches
that uninformed segment or something
it works so that this is what happens for example in the World

i.e. since in this case we are simply considering
what kind of control system is it in principle
for information
as an abstract form of management
well, there is some diversity there, switching of these threads, yes
or there are spherical systems
it doesn't matter what they look like

why the movement of these information systems
leads to such social events, for example
which are now emerging in the form of tense systems

that's why I propose to make such control now
together with everyone

First of all, make management according to your tasks
i.e. to make the Norma pole
and this pole of the Norm
spread to an uninformed system
including the Macrosystem

so that these Macrosystems would be , as it were, trained
and so they worked
so that this doesn't happen after all
global conflict in perspective

so you start working now
I will work with you

if possible, make another concentration
again on a kind of rhythmic reagent
and look when you do concentration
where control is strengthened

i.e., you can, for example, concentrate more
even on 4 there or here who chooses what

choose one number from this series
then you will see that here it is individual
i.e. everyone chooses their own number
but the combined effect is the same
I just see it now at the level of even action
that it is one

i.e. if we have any login at all
at least through one element through one number
for example, every other number
the action is targeted, it turns out to be united

and this is another one of the principles
Soul God organizations

where it means a variety of inputs but with a single goal
in a single goal the maximum expression of unity is obtained

and this principle of management is that
what if many people act
here on this uninformed area
which for example Well let's say we can put it like this
what is the control area of information
doesn't know how to normalize the system at all
how to prevent this war in Iraq

for this, to inform
Well let's say it's possible to go down the management level
to specific people
it takes a long time to convince at the information level
or there social actions
what can be done this way or that way

but the state is a fairly autonomous system
it is difficult to enter the system from outside on a social level
not all diplomats can resolve some affects

so the situation is that
to do an action when it is natural
will be for those who participate in this conflict
that there is no need to come to a global catastrophe, for example

To do this, first of all, it is necessary to identify
the very essence of a given person
at the level of general connections
and when
Well for example, there is some person involved in management
try to help him in social management

understand where this uninformed area of information is
this one is the one that influences the Macrosystem
in general, for example, events on Earth

i.e. if we proceed from that
that this Macro might not be that big
and let's assume it consists of what is on the leaf of the plant
there is some cell that is not adapted, yes
for example to the World in the level of development of humanity there

then it could be something from this cell
there is a kind of restorative impulse

so it turns out that it is, well, stable
malignant disease
then one cell in general
begins to restructure the body

in this case, this is the Macro- uninformed area
it may be material but with a small cell there
one plant

that is why it is precisely according to my Teaching
about Salvation and harmonious development
the dissemination of knowledge must go
in all spheres of life in general
including areas that, for example, are not related
with human life

when this particular factor is taken into account
then we don't miss out on it anymore, well there
maybe some kind of vacuum structure
somewhere in a very remote area
or some planet or some action in general

in the information space

as soon as we set the task of accounting for any action
in the entire space of Reality
including information there physical actions
we are coming again
to the method of Action of the Soul of the One God
where the method is knowledge of everything

i.e. that's when you exactly proceed from that
what you need to know to make precise control
then this level of omniscience is the rule
a deeper appeal to one's own Soul
Well, basically these are methods of personality

so by analogy with this
because if we reason
exactly as I am showing now
that the Soul of the One God
It turns out that it was created by the One God himself
just like the Soul of man
for man is created in body in the Image and Likeness
but also with the Soul

that's why it turns out
what could be the principle of thinking inverse
how to reach God's greater potential
in terms of creativity, ^{yes}
how to understand His knowledge

so this is when we turn to our Soul
then He can also go deep into the Soul of God

and therefore it is necessary to work out such a distance
where is the depth of God's Soul anyway

if we say yes
for example, we can take a deep look
own Soul
i.e. how to know , for example, the depth of the Soul
there is such a term there the depth of a person's soul ^{yes}
a man of deep Soul

it turns out that the depth of the Soul of the One Creator
should also exist simply by analogy

i.e. the principle of analogy is very convenient

and he basically talks about that
what if we study well how the action of ourselves actually
what can we do
then by analogy we can simply receive information
already from the One Creator

therefore the meaning of the One Creator is obtained
maybe also the one that is the One God
who created everything
and there is a Single Creator at the level of information

for example, here Well, take vegetation.
there is some information there that creates vegetation and so on.

i.e. here we are talking about the Creator
as an information level of management
where the concept of the One God stands above all concepts
which are like substructures further

so when we use this term here
that movement is precisely into the depths of the Soul of God the One Creator
this is co-creation i.e. it is necessary to co-create

Well, God is the Creator, including the One Creator
and so we are not downplaying it here
it is the meaning of the One God
if we say that there is a Single Creator
some macro array of information

in terms of social elements
for example on a material level
this is creation
some social technology of development of society yes

then as the united Creator
it turns out in the future
"united" is actually humanity there
which lives at a given social level of development
a specific nation, nationality, etc.

so it turns out that we can talk about that
that the movement to the depths of the Soul into the depths
and at the same time disunited

i.e. multivariance, complete freedom of the individual
development according to some special social conditions
but at the same time unity

in terms of some goal
so this is Macro-creativity

i.e. exclusively creation
own Eternal
for example, harmonious development, etc.

i.e. the goal has been developed well as if by itself
how does the instrument of movement work

in this case I am considering the goal of development
goal as a tool of knowledge
in fact the Soul of the One God

so when we move on for example
to the Spirit of the One God then
why next
because the Soul is the primary level
Well, it was precisely the Soul that God initially created everything with
then the Spirit is like in a person and a consequence of the Soul
then we have to move on, well, it 's logical

the element that created
i.e. I am moving to the logic of control, meaning a person
he is of course closer than the investigative element

therefore moving towards the Spirit of God the One God
we receive the event already in a detailed form

for God who originally is
level of all events
here with further development
It starts to get detailed.
so the Spirit of God is the development of events

and when we see that the Spirit
It can be extremely creative.
then this is the difference
where there is an informed system
and the task of man to know
of this system

this difference lies precisely in this
that the entire external array is so called
uninformed control array
it's just that
that's true well let's say the depth of the human soul

which is capable of re-informing the array

so that's what I came to
that generally speaking in the True depth of a person
there is always a resource there is always an opportunity
change the situation

so it turns out that this is how I came to this
by the way, it's logical now
I used it mostly
unified logic
with the Action of the One God
and with the Action of the Creator of the One, for example
in the area of Macro Events

for example social society
The creator in this case acts
The One Creator is people
who created such a society

it turns out that the unity of people
as the One Creator there
this is the way when everyone moves together
to the Laws
precisely according to the creative Laws of Eternal Development
harmonious development
and at the same time everyone is at this level
generally understands the essence of management

i.e. he can do it himself
he can restore himself he can teach someone
he can do the whole complex
Well as if social management events
there to do the Health Standard, etc.

and therefore according to my Teaching
about Salvation and harmonious development
the most effective method in general
for the dissemination of technology
is a personal action
personal achievement of results
personal participation

and at the same time well for example right now there
citizens of the state Grigoriya
Well , they are collecting signatures, which are directed like this
so that there is no war in Iraq

opposition to war

then this is social action

it is included in the order of well, in general, the tasks of these citizens

it turns out that when the tasks of the state, for example , Grigoriya
tasks to act exclusively creatively
and any conflict must be done this way
so that it would be better if it did not exist
or counteract

then such a level arises

that within the framework of the so-called state system
or there within the framework of my Teaching
about Salvation and harmonious development

here the action can be directed

only for exclusively creation

creation

i.e. it is generally like a driving mechanism

when the action is very clearly outlined

and it generally has a specific formulation

then this is the mechanism that moves

that's why this movement

i.e. for example, in order to restore a person

it is necessary to make an element of the supposed proper motion

this movement could be

it is precisely the movement of clear understanding

i.e. a clear system of formulations of action

I specifically bring here the technologies of the Teaching

there are tasks of the state for example Grigoriya

because it is important to work out here

at level

Well sometimes a large amount is enough

there are supposedly lecture materials

or your personal work in the seminar

it means to develop completely specific ones

aspects of management

which are completely clear and concise

so here is the next method of assistance

with the Soul of the One God

this is the identification of specific completed

and in general clear forms
in prognostication
in management
in self-healing for example
in solving personal problems

and here it turns out that the decision is your own personal one
maybe even well as if such a task
which is constantly spinning around in the hustle and bustle there
but you don't pay attention to it
This is generally speaking a task from the One God, a significant task

because if you have not solved at least one problem
which is yours
well or on a personal level
or on the physical
or on the information
then you can't say that you are
somehow, in a harmonious situation
by the level of management

i.e. you can of course be in harmony
in a restful environment
or in conditions where you are busy with other tasks
and then you don't have time to just think
about some secondary task systems

but in essence you should be able to solve it
any task

and therefore the next level
this is systematic
and identifying the task
and the solution to this problem

that's why i say practice as much as possible
for example, for a seemingly private task, yes
here is according to my Teaching on Salvation and harmonious development
but at the same time you constantly introduce the Norm for everyone

so here the solution to personal problems
this is still the attainability of the system level
and we must definitely proceed from this
from system level reachability

because if we consider now
Well, that's exactly what's really happening in the world right now

for example, diplomatic systems do not solve

at the moment, that's exactly the point
the possibility of preventing war in Iraq
they, among others, have already exhausted themselves
social systems

therefore it turns out that there is only one option left
exact solution
this is your personal Spiritual level of control

and when you realize that often in this type of technology
This is the only technology that is possible at all.

but it happened there quite often
to shift the event
if these are space navigation systems
or software packages
which can shift there
Well, let's assume the system there is the beginning of military operations
from the side there are missiles of global destruction
into space
then one can influence only through the Spirit
there is no other way

or profile the situation ahead
specific case
just from the air protocols that were published
bird hit seven days after forecast
into the engine

if the pilots didn't know how then
an expert commission was established
that it's just a bird
then there would be consequences that would be quite significant

it all depends on the level of knowledge and reactivity
there was a pretty hard hit by the bird
that the engine was removed it was simply broken

and therefore it turns out that
Well, how can you know logically?
that in seven days the bird will fall
there are no signs, it's an external system

and so you still need to strive to know something very specific
Anyone interested can read this protocol

three-volume work "Management Practice - the Path to Salvation"
in the first volume this case

and if, for example, we consider this system

from the point of view of how in general

How can you even see this bird ?

in general, how can we proceed from this here?

what could have been done yes

who to save for example

's say I come myself and people and birds

according to the task of the Creator of the One God

Generally speaking, we need to save the bird too

and it turns out that the next level arises here

here is an understanding of the universe

from the level of the Soul of the One God

all elements are created equal

Well, let's assume there are conflicts there

for example, there in Chechnya, yes, there are elements that correlate

for some reason

precisely with the concept of the Muslim world

here it turns out that a person is independent

Naturally, initially he is equal and according to the constitution

but here you have to understand

what if we are dealing with a local conflict

let's assume there are conflicts happening in Chechnya

then we are talking about that

that here equal people are in such conditions

and therefore if we proceed from that

that people are in their

and how to proceed further, for example

a system of reasoning in terms of management yes

from the level of equality

then further means further for example elements

much animal life there

in general, under Norma conditions

then it turns out that the next level of development

is the co-development of the external world

for example, there is the animal world, the plant world

together with a person

i.e. the intellectual level means a person
is obtained during human development
it should be such that knowledge is transmitted
elements of actually external Reality
i.e. birds, for example, animals, plants, etc.
all elements of the external world must be developed
absolutely the same as a person
co-evolves with the One God
these systems must also evolve

so in this case the control element
it was of course necessary to convey
it is precisely the possibility of adjustments , yes
in flight conditions

but nevertheless a question arose here
that's what birds are as if they actually didn't have time to master it
this information
the bird still got into the plane

That's why
By the way, this was the only case
when in my practice
as if some kind of living creature
hit the trajectory of movement

and here it turned out that way
True, there were further conversations later
is this a bird?
why is there such serious damage to the engine, etc.

but nevertheless it was considered that it was a bird

so, well, even if, for example, there is an opinion
what well no matter what it was, they still consider it
that the bird could get in
maybe, well , let it even be a stone, conditionally

that means
Well, there were elements that I was talking about.
that it is still a bird perhaps

so it turns out that even if there is
possible situation
it still needs to be restructured
i.e. it is still desirable that the bird does not get hit

but it turns out she must master the knowledge

so, with equality, the distribution of information
just in the World
The Creator creates a level playing field
for everyone in fact

and therefore, in general, a person can
to know the Soul of the Creator
by analogy with His next Action

because the Creator gives equal Actions
then analyzing this situation with the bird
we can say
that as the Creator gives knowledge at all
a bird for example
i.e. having looked

how to make it so that a bird, for example, can be brought out
from the management level and give
how to get from this
element suppose there is self-healing
i.e. how a person should solve his own issues

i.e. how the event should
around this person to form
so that he could actually take into account
some situational things
related to elements of the plant world, let's say
namely the animal world

why do I still focus on this
on the world, let's say, plant animal
because in case of military action

well , the task is , for example, if military actions begin
then naturally animals might suffer there, yes
flora

and now to go out
through the structure of understanding information
flora
or an animal there
This is one of the levels of management

because no one has

your own status of resistance in the World
to avoid being destroyed

if we need to take this level into account and work with it
it turns out that the level of work is that
that it is possible to reach the level of knowledge transfer ^{yes}
in co-development with the Human Development Norm
and get ^{a kind of} formal entrance
further development

i.e. we can gain control
there, ^{for example,} from the same plant leaf

and this sheet was if restructured
it turns out that we actually restored it

i.e. an element of informatization, ^{generally speaking}
is simply a restorative impulse

give him Norma, he'll ^{just kind of} come to life
and we have the fact that, ^{for example,} there is no element of restructuring
precisely in the global sense

so now I have brought it to that
that the task of the Creator of the One God, moreover
is the accuracy
is to take into account any factor
and what is there is clarity of forms
this is manifested, ^{for example,} on the physical level
World

and that's when we want to see
as the Creator creates and created
physical Reality
^{well,} as if through the eyes of the Creator

because you often have to work with your eyes
originally created
^{Well} ^{for example,} to build an organ in a person
if it has been restructured, ^{let's say} by metastases
this must be done as the One God does
this technology turns out to be very simple
if that's what you do

Generally speaking, there is no other way in principle
if we are talking about global pathologies
but even with minimal pathologies

it's better to act this way

so it turns out that when you want to watch
and why was the World created exactly like this

i.e. why

Well, there is , for example yes there are people
there are some elements of Reality of physical Reality
event systems

then we can consider the following control element
here is the clarity of the revealed forms
task of following
and the next development
including there is a person
how well these are the minimum characteristics of a person

i.e. it turns out that man is created
from the tasks of development of the One God

and when we want
let's look through the eyes of the One God
then the person is seen first and foremost

and social means all sorts of elements
that are happening in the world
these are actually elements of the next development
i.e. elements that enable a person
develop correctly

therefore any element
contains elements of proper human development
from the point of view of the primary impulse of the Creator

and the whole technology is very simple
you just go to everything as simply as to God
well then moving towards means of its creation
human
and he gets the whole volume of information

that's why I often still use it
this is the level of the One God
God the Creator
because this is a personal factor
Actions of the One God
it gives just a colossal one in general
It is He who gives accurate knowledge
according to the essence of the development of the situation

because if we proceed
from the level of supernatural ^{yes}
where there are already materially manifested systems
then we get into the local system

i.e. a person can think for a very long time
about myself about the physical body
but in fact, he will come out anyway
on the structure of the one who created it
so it's better to proceed straight away
from the structure that created it
and if possible look through it

why do i say "structures"
there is a structure that is manifested
the action of information ⁱⁿ human perception

and there is One God
which creates at all
and this area of Perception

therefore the transition to the One God
this is the next level after all
the level where the Soul sees how it is organized
i.e. what are its tasks in general?
this is the meaning of one's own Soul

as soon as a person understands it
he can recover instantly
if he has any health problems

and the definition of meaning is obtained
in a seemingly local action
this is an action that is essentially Divine
i.e. God's action aimed at the co-development of man

and therefore when this action is transferred
to the next level of Reality
^{for example,} there is no need for there to be a war in Iraq
then the action may well achieve the result
from one level of transmission only

i.e. here is a person according to my Teaching
about Salvation and harmonious development
we need to spread knowledge as quickly as possible

after all, there may be people who are
well, just at that border where their transmission level is
instantly resolves the issue
and at the same time disseminates the knowledge gained

after all, under the conditions of existence
global system of destruction of terrorists, etc.
after all, in reality, it doesn't happen
some disasters in the world

i.e. this principle works quite effectively
this is the level of development of the One God
that people actually personally hold
situation at the Norm level

so let's just take a closer look
what does each specific person do
this is what he is doing now

it is clear that everyone essentially does not need war
but he does something technologically
he well let's say he goes to the store
does some social work
and around it constantly revolves information of alignment

this is the situation
where is this information exactly from the Creator

i.e. the following method is actually
or submethod of management structure
assistance with the Soul of the Creator
it is to see where it works for each person
these are the peculiar lines of the Creator that operate
namely the One God
where they are manifested

i.e. each person has a system of norms
which exists for him from the One God

so, for example, to normalize your body
there to bring him back to normal
we can do everything to make our body healthy
if only we see
this system of norms from the One God
He is the one who initially created all the event lines.
made them normal anyway
and even from the point of view of Eternal development

i.e. everyone has one
and technologies and elements of Eternal development
you just have to devote time to it

as a rule, everything often consists of the following
what is needed is just for everything
make time

and just in the hustle and bustle there or a person knows how to work
somewhere
he doesn't think about it, he doesn't do it

it turns out that it is a control in this case
is simply a matter of concentration
just pay attention to it and that's all

why i give my management system
as a concentration system
or as a system simply means well, fixation of attention

because you just need to record it somewhere
the correct control occurs immediately
only if it is only "correctly fixed"

often the control system there is built there
well, no way let's assume matching technologies
or there is a set of a certain level
numbers
words
some phrases sentences

and often we say that there is a piece of a sentence
I often looked all the time to see that even the offer was selected
somewhere in the middle it is
this is a management element

i.e. we must strive to ensure that every symbol in general
it would have been better to have a control symbol
and this turns out to be arbitrary speech
but said in an informative way in the right place
at the point of concentration

and that's when the necessary actions happen
synchronously with these peculiar lines areas
Actions and manifestations of the One God
we see that the problem is then solved very quickly

and everyone who sees their tasks
he also sees the tasks of others and at the same time helps
all levels
its ^{well} creative ^{so} let's say constructions
from the Creator

and so here is the revelation
this level of creative construction
i.e. where you definitely help
where you definitely create
where you are able to solve virtually any situation
towards Norma

this is a special procedure, ^{generally speaking}
aimed at unity with the One Creator

i.e. I said here that there is a level of unity
which is manifested, ^{for example,} in the verbal phase
and is there a procedure when unity exists
your inner action
where you specifically strive to be united
with the One God

then it turns out
that this level of special aspiration
what is manifested in social events
in growth ^{well} some problems solving problems
some intellectual and creative realizations

you already have this level
as a level of personal action

so here is the level of personal action
originally given by the One God
as a level of complete freedom

that's why the person is
constantly makes decisions it turns out

and that's where the line of God is located
it is given equivalent
God gave everything as one
i.e. everything is at an equal level of Perception

so it turns out that this system requires that
that a person must make a decision

and act in accordance with that
what the One God gave for Eternal development

so here is your personal action
must be precise must be precisely directed

so here is the identification of this system
it is first of all the understanding of the essence of your actions
and plus the fact that this essence must be realized

i.e. here is the level of implementation
why i am according to my system
It is precisely according to my system that I am definitely speaking about
Salvation
what is the system level
still getting the implemented actions

if the action is control
and for example, implementation is delayed
it turns out that we need to find a complex of reasons
which would be related to that
why is this happening

and so that the situation of realization is maximally
didn't move
this area should be close to the body

here is the area of social events
the information should be close to the body

so that the implementation takes place instantly
often this area just needs to be
so well how to move closer to yourself
so that they can see
what is being organized from this area
your body

i.e. in general it is seen like this
that as soon as you move this optics towards yourself
you come to your body
i.e., as if the level where the body is actually born
on information

human physical body
on information
is born here

and here you can see that it is located
as if in a state of constant development
i.e. in the state of Eternity

and when you see this segment
then any element of Reality
let's assume there is a possible disease there
or some social event
it's just for the whole
a piece of information in the Eternal structure

you can just take it and remove it
and put it in some direction

i.e. action
specifically to find your personal solution
in management
this is an action actually on
according to standardization or normalization
of that factor of cooperation with the Soul of the Creator
what is the Soul of God the Creator
which constantly promotes
and there is your personal desire

and this combination is what a person is

it turns out that a person
as a single manifestation of the Eternal
Eternity of Eternal Development

here we see that according to this technology
namely, cooperation with the Soul of the One God
so it turns out that if we have a person
in such a status
and that's how it is, I'm just showing it now
what does it look like

then we get any non-standardized systems
these are systems that generally speaking arise
as a rule or where there is no level of knowledge
Well let's assume that there is no such type at all
bases for destructive systems

or because of the knowledge that is gained
for example, to prevent some kind of disaster
to prevent some problematic situation
this knowledge is not structured systematically

i.e. they can be equal there

let's assume one-time actions

but there is precisely no system

which would necessarily lead to that

that the actions are restructured

so let's do it now

I think we need to direct our joint efforts towards that

so that the action is sure to get through

to the level of preventing a possible war in Iraq

i.e. everyone's action must reach this level

I understand that there is resistance from social systems

but nevertheless, in reality, this action is very necessary

to all parties, and to Iraq for example , and to America, etc.

so to enhance the effect

you need to go through such a system

as I said about Russia

then go through the structure of , well, these three countries

and take into account

well , for the US, let's say Western European countries

they do not pose a problem in terms of world leadership

so it should be clearly stated here

some social gradations

what is going on in the world anyway

well, in my own way

I gave one of the characteristics

so here it turns out

what should we do

own principle of self-healing

own Norm

we want the norm

we must come to the point that our own Norm

should be like this

that she must be protected

i.e. with what, by the way, specifically to each of you sitting here

it is necessary that some military actions somehow concern you

you don't need this

It's just that you are the kind of people who don't want this, for example

Well, it's a simple postulate

then it turns out as if these actions were spread
for example further
who will then watch this video seminar for example
we can do
universal control system
the spread is so instantaneous i.e. so fast
that you act simultaneously with the Soul of the One God

i.e. from yourself, from you, the light goes so fast
that it is not distinguishable
well, actually at the level of remote Consciousness
it is one light because it is the light of the One God

with this light close all your events
i.e. bring them back to normal
and so that there are no wars
i.e. make the control like this
I will do it together with you

and then in social terms
if we consider the level of management
then who else but a specific person can solve a specific situation

i.e. if we look at
just by ordinary logical look
a specific person or a specific president there
he makes some decisions

and that's why in logic it turns out that way
a person solves a situation

if we proceed from that
what one person decides
then here is the Action of God
cooperation with the One God consists in the fact that
what now that's when

Well for example, yes, several hours are set there
before the possibility of military action
everyone is interested in them not happening

we do extrapolation
well for all the events of the world
to use this practice, which is aimed at
to prevent a possible disaster in the future
then here is how God teaches
i.e. how the Soul of God teaches through the Spiritual presence

here is the level of Spiritual presence
it consists in the fact that the personified God
i.e. the Personality of God , yes, God, for example , who has it there
human physical body

here it turns out that the manifestation of His tasks and His thoughts
it is in each of us
here is the single concept of God where He is manifested
in promoting the Infinite Life of Man

and following these lines of knowledge
and can you see that the Spiritual presence
This is also the Spirit of man

i.e. here is the creation of the Spirit of man
at the level of Spiritual presence
where where does God create the Spirit
The spirit of man

He is on the next level.
namely the Spiritual presence
and God
and a person
in control action

after all, at one time when I somehow put it
it is precisely the task of acting with the Soul
and receive action by the Spirit of man
but the Soul also creates its own Spirit

action means the Spirit is obtained
that's where the point is where it is simultaneously created
and or let's say the area is simultaneously created
and therefore the Spirit of God the One Creator
and the Spirit of man

The spirit of man where he creates

so this is the specific area where this happens

and this is the area that I just talked about

if in this area we mean some event
i.e. we output here
then into the described area
then the event begins to become normalized
due to the co-presence of two actually

Well, in essence, the unified principles in the event are meant

after all, the event is that there must be a Norm
i.e. there shouldn't be, for example, a global catastrophe there
It would be better if there was no local disaster at all
and this is both the thoughts of the One God and the thoughts of man

and that's when we start working
in this area
then the job is that
to actually just do it in general well, constantly
i.e. to do the work practically without stopping

this is the sign of the achievability of the result
in what you have under control
some amount of information
you work with him all the time

if you look at what you are moving away from this volume
and you start to deal with another issue
then you are still working there at the level of the One God

so this is a sign of God's work
this is how to learn to work at all
an analogy is needed

i.e. if a person drives a car
to learn from this person
the other one should at least see
how does she even drive what is he doing there
what is holding the steering wheel or what is he doing there

i.e. here by analogy it is the same
you have to see it
where the One God works

and when you see it this way
that being distracted from the action on a task for example
well, for some of my own affairs, yes, in a logical sense

it's like you see it with your heart
how is the work going
you see what the One God does

then it is quite easy to study the mechanism

Well for example management

for example, preventing war in Iraq
if the information moves clockwise
well then let's assume there is a volume of information
the sphere is right here specifically, which means it is moving
This is Norma
but mind your own business
there start to restore yourself for example Yes
in another area somewhere nearby
she still moves

if you are distracted by recovery, well, for example, yourself Yes
or another person's situation altogether

you see that this volume is starting to rise
it really does rise
depending on what you do

then it turns out to be Norma
this is a more elevated state of the sphere
that's what the One Creator did
so you can perceive Him here

and then you can come to this place again
and in general already in a scientific form yes
i.e. your level of Perception
you are already trained you can know
you will come to the point where there is no such sphere
and where it is

and this is where the precision of control lies
why can you think in different places there
and management is a specific place

because management
precisely connected with all events
this is the One God

and it turns out that well, such a phrase
that the management is the One God
this is a phrase related to what is always necessary
control the situation

and in connection with this information
for example, preventing war in Iraq
it doesn't become somehow very complicated
with such an analysis

i.e. if you do it that way then
and you put it right in the area of assistance
Spirit of the One God
and your Spirit
this information Norms
so that there is no war in Iraq

plus make adjustments for the fact that you periodically
look at what the One God is doing
with this information
how does he regulate it further?

then you may well get superconcentration
which will be able to prevent

well, like a global catastrophe for example
even a local disaster
and specifically the war in Iraq

i.e. the main thing here is to convey after all
this is the control element
to the level of physical Reality ^{yes}
having specifically explained it to at least one soldier there
^{let's assume} the US army
that it is not in his interests
go to the level where ^{let's say} the US president
and bring out the control line
where there is simply a Norm acceptable to all
this is the Norm of the World

and leadership is meant by leadership
precisely towards global levels of development
where does everyone live in the world
Well, as true leadership is a common global world

that's why when you start making some of your arguments ^{yes}
at the level of the Soul here already to bring
you have a monologue
with the level of ^{actually} God
i.e. you are talking to God

and when you already start talking to Him
you see how He answers you
i.e. how does God create or give birth to words?
like this
you perceive the flow with words

and if you see this dialog element
and to see as I just showed it is not difficult in fact
then you can see everything at once
what do others think then
this difference is already in the fact that each one
your individual level of control

Well of course there is access ethics
i.e. only those thoughts that are directed
for example, on Salvation you can see quite
especially on Macrosalvation

then a very simple element arises
everyone is thinking in the same direction
how to make it so that save all

and if someone needs help
it's just your right action your right thought
already helping another
it's just that the light from this action gets here

and by the way this is not a matter of principle
maybe this is some billionth person
or there from ten billionths in the future even
you can already help him
from here

i.e. it turns out that the light of your Consciousness
the light of your correct Thinking
by simultaneous action
cooperation with the Soul of God
it gives truth almost everywhere
i.e. the True structure of Eternal development

and from here we can get
well, actually, it's like a fragment of Reality
which is normal
i.e. to build Reality to create Reality yes
creation of the world
here you create the real world at this point

because for example Well, a hundred years pass there, or one second there
because the next element is added up
from the total level of knowledge

and when your knowledge is accurate
then it turns out that you have a level of control from here

immediately there as if to the Infinite level yes
as the One God does

The one God comes out and acts at every point
simultaneously in the Infinite level

then here it turns out I showed
how can you come to that conclusion logically
that you act precisely as the One God
i.e. in this case I came to the logic
to this

I showed where logic comes from
where does it develop from

that's when i said about the point
where does a person grow from
then here I showed
where does logic grow from
Well, as a rule, it is connected with the level of the brain , for example .

then when you start to analyze
where does every element of a person come from?

then you can see
where is that point
well, a kind of point there of self-assembly, let's say, or assembly
generally characterizes the presence and growth
any element of a person
including its management level
and including the level of our own future development

i.e. each element is located somewhere inside
this is the area that is inside
the area that is inside
this is the presence of the One God
in fact, in the Soul of everyone

after all, we are addressing well for example there if by prayers yes
as if up
but in fact to some
to some static level of Presence
in the Soul

i.e. initially
this is the level at which the Soul was created
and it has the level of tasks of the One God

so we come to the tasks
as a system of practical self-development

i.e. we look at the tasks
that we actually set them up for ourselves
i.e. therefore we can be everywhere
we ourselves generally participated to one degree or another

and it turns out when we consider
The world is just like that
then here are the tasks set
which currently exist in the world
can be viewed from the point of view of as if
well, the reverse folding of the track and the information

i.e. look, this is why everyone is in front of themselves
generally speaking, I set such tasks
now do this

i.e. what was his participation in
in earlier structures of events
that he is now in this very task

and when you, when a person already sees , for example
what he did at least at the level of everyday actions
you see
what is the solution to the problem
often becomes completely clear and understandable

i.e. it becomes absolutely clear
for example, what can be done as quickly as possible now yes
so that there is no war in Iraq
i.e. this is simultaneously the level of clairvoyance opens
and such a collective one

another question is that it is rather a Spiritual vision
this is the level of simultaneous vision

i.e. it is clear to everyone that this should not be done
but nevertheless, events are happening, yes, some

i.e. it turns out that there is
some well as if detached
collective Thinking from the level of Reality

when we do it again by analogy

we go from the physical level
to the thought
well, as in the case of the same One God
that's what we see here
where does Thinking come from anyway
i.e. from where
and where in physical Reality
there is a region that characterizes
growth of thought

if, for example, we proceed from the fact that
that when you encounter
with some level of management with some task
the idea is clear, it is a necessity of management
but in the material substrate
where does it grow
we see how developed a person is outside

i.e. if you have thoughts, then they are somewhere else
i.e. how do you develop physical Reality

and when you already come from such well as if co-analogy yes
with external elements
then they begin to develop in the same way
how are you together with the One Creator

to assist
together with the One Creator
so it turns out in this principle
and simultaneously orient the entire external system
so that she too matches you

I mean there
elements of some external Reality
even if distant or close

however, people here are in a special category
people who understand everything in this case

that's all that's external
at least it's logically clear
that people can always be taught
there we will agree to tell
make large educational courses there, for example
they will learn sooner or later anyway

and here's how we suppose external systems

so that it is not too late or just on time
then it's better to teach how to inform everyone
there is microstructure micromatter
knowledge of assistance
again with the Soul of the One God
and still show by analogy
in relation to how you do it

i.e. when is it like that in principle
well, for example , if there were control technologies now
for example, there would be well let's say a lot of people
direct access
then Reality was already like that
what do we say when there are a billion people
this is already a significant part for the planet
events can no longer be structured
towards a kind of global destruction
they can no longer be changed
this is the principle of collective management

but it may be that one person is well trained
he will no longer allow global events to happen
but here
namely changes

but here it turns out
that when we talk about changes on a global scale
precisely from the point of view of destruction

then from a destructive order
that's right, by the way, everyone has strength
that everyone can do it

but when we say that there are global changes
even of a local type
well let's assume there are types of galaxies there yes
then here it turns out that this is a very element of self-healing

i.e. for you to recover
if you want to be cured
there, for example, let 's take this diagnosis
as for example pyelonephritis I give an example

then the recovery cycle here can be like this
throw there as if
well, is it an optical impulse ?

towards some galaxy there
and receive a reflected impulse to the kidney area

then it turns out
that from an attempt to shift some kind of Macronorm
you get the norm
at this impulse you recover

and it turns out that the interaction
specifically with global systems
it consists of the following
what do you actually get
Macrosystem control mechanism
in general, for your own health, i.e. the norm

and so when you start to act
well, in fact, it's the way those around you act
i.e. seeing their common thoughts, for example, there on personal development
precisely from the level of the One God
i.e. the person may not tell you this
and you just see it
you see that system that level of depth of a person
where can he do this

then in further actions only direct
i.e. of course, let's say it this way, we can still strive
More and more people need to be there
this technology was taught, i.e., and mastered
i.e. they tried to make the technology directly accessible
according to my Teaching on Salvation and harmonious development
was moving to more and more people

but there is such a principle here
what if even one newbie heard at least once
there are a couple of words
he should be able to save at all

and that's when you have this principle
you are just starting to implement it
in terms of what 's next let's say actions
directed towards the Norm
then it turns out that this newbie
I heard this one there for the first time
he must be informed immediately

and it turns out that this is instant information
this is actually the principle that characterizes

in general, again, a method of assistance
with the Soul of the One God
instant awareness by God
gives immediately
in Salvation yes there are many enough cases
simply unique there, for example, in my practice
one of the cases I heard about
this was when there was a variant of testing a military aircraft
and the plane was simply cut off by the blow
the cabin flew by

and through a small window
through which a person simply cannot get through
the pilot climbed out with his parachute
this is how a specific practical case turns out
just actions in extreme situations

i.e. it turns out that the body is not a fixed element
Well, from the point of view of there if it is necessary to save yourself, yes
This pilot specifically saved himself
case Veremey famous test pilot

therefore, if, for example, we proceed from such practice
or specifically from the same Veremey Boris Ivanovich
there were cases when there was a very big hole in the fuselage
when in general a person is physically
the plane can't land

nevertheless, he calmly planted it
a fairly common system in flight practice
when there are no physical laws
in order for the situation to be realized
and the situation is normalized

what is said here is that
that a person actually compensates for his own strength
modeling well as if an abstract system
i.e. an autonomous system around this aircraft
how does everything move there then
earth gravity etc.
and for example a normal landing occurs

then when you instantly inform one newbie
and put information at the center of need
well, for example, preventing a possible global catastrophe
it may be so, well, of course, it is still complicated
right there on time

it could be even microseconds and instantly

but you can move it there and put it earlier
possible disasters
those. just move information
you have access
to any point in the given control system

and this newbie is quite capable of doing so
to prevent this from happening

so this is the method of cooperation with the Soul of the Creator
One God, moreover
is that you equalize the system
actually in knowledge
Do you have some kind of precise macro knowledge?
in-depth knowledge that some special
or technologically advanced knowledge in terms of management
you enter the equal sign

so here is the introduction of the equal sign
this is again the closeness to the Soul of the One Creator
for the Creator
all are equal to the One

it turns out that as soon as you get closer
and I showed how to do the approximation
this is to introduce an equal relationship

in this way you are passing on knowledge already
literally, well, maybe there are some like that in an implicit form
and [...] and in the obvious you can convey there to thousands and millions
in terms of the knowledge reaching you quickly
well, there are millions there in a short period of time even

i.e. therefore, according to my system of knowledge dissemination
on the Teaching of Salvation and Harmonious Development
here I show what needs to be spread
still on equal terms

that someone perceives even for the first time
he can potentially do as much
as well as someone who is technologically savvy yes

although of course the difference is often big
whoever knows technology, he just kind of takes it upon himself
this task and, as it were, raises the level

well , like a newbie

but he immediately raises it to his level
i.e. he is already clearly doing this

then of course the one who is the first time he masters it
maybe it is not necessarily located
in an extreme situation constantly
this newbie

gradually he develops some time
which allows him to obtain technology
well, finish studying , for example, listen to some video courses
or just actually learn
or just go to lectures, for example , etc.

i.e. it turns out that the level of assistance is precisely
with those who don't even participate in this initially, yes
for example the first time
it's the same level of assistance
with the Soul of the One God

for God is cooperating
He always gives the opportunity to escape.
even to those who are far from these principles
or does not know about them or is in a situation
when he needs immediate help

it's situational, as I once said
exists even to the point of unity
physical parameters of the body there
not to mention any situational systems

so it turns out that the meaning
in this particular case
as if a single management
single personality
from your personality
to management in action
according to the tasks of the One God
and in action as the One God does
is precisely personal management
your personal freedom yes
personality
free personality managing

the more you manage

the more you have
freedom of action of real
you are more free

and it turns out that this is the ratio
namely the Truth
Well, a person is always essentially free
but here it is meant from the point of view of attainability

complete freedom is a must achieve
any creative result
it turns out like this

and therefore complete freedom that is given to the individual
this is a necessary condition for the next development
civilizations of personality

and that's when you start to defend yourself , yes
the principle of personal independence freedom
generally speaking, it's your personal business
if it concerns you, well, there is some kind of problem
even if it's a local war
even if it concerns information

why should she touch you
i.e. you may well disagree with this
and on a personal level to manifest means control
which already hinders
and in the end there is no one for example
both to the war itself and especially when there is a global catastrophe

but at least in Reality in management
First of all, you need to do this
so that there is no possible global catastrophe naturally
and already in the plan when you have time left
you work on local systems

The main thing here, generally speaking, is this
from the point of view of management practice
According to my data, it's just a lot of work
that's what happens the more work
the more effectively the result is achieved

just a very specific Law here
more work and therefore more results
there are no other criteria, for example, I am I haven't met any in general
it all comes down to the amount of work

amount of work produced

so from the point of view of what I just said
and I also say that there are methods for that
that the work can be done
more efficient more optimal

Here

well using the same control system
i.e. it is not necessary to work according to the time
but here it is simply much more effective , so to speak
you can set different management goals

set a goal to work there more efficiently

that's why this is exactly the essence of the task
I once again urge you to work effectively
from the point of view of preventing war in Iraq and in the World

if possible, use various ones , including
universal control systems
and try to generalize to all future situations
for your personal management

i.e. to achieve implementation after all
personal, even minor, tasks

because when we have a task before us
mandatory management
we must also strive to achieve
and the implementation of personal tasks
to see that the control is systemic

the tasks can be different as I said yes
it could be a restoration of health
maybe there is a solution to some of your other situations

so by combining it means Well as if personal and general
and doing this Macrocontrol again
try to achieve the situation
that's exactly it, minimally in a short time

if possible

Well as if conditionally in some hours even minutes
to achieve that situation to be realized
what does it mean prevention occurs

this is such a global war

let it be better to do it this way
so if possible, make the management right away
so that there is not even a minimal possibility of a start
i.e. to draw a sharp line between the possibility of the beginning

while doing this do it like this
so that the control will fully affect you
This is your personal task
and you can't let that happen

this is when you move on to a personal task
then the control becomes as fast as possible
and as efficient as possible

This concludes today's seminar.

thank you for your attention
