

GRIGORY GRABOVOY
The Teaching of Salvation and Grammatical Development
Method of disseminating Reality
with the Physical Body of the One God
03.06.2003

Hello again

The topic of today's seminar is implementation and dissemination
my Teaching on Salvation and Harmonious Development
Method of disseminating Reality
with the Physical Body of the One God

This method is about
that management consists
it is precisely in the dissemination of physical Reality
for some specific purposes

if we consider the World
like the world that surrounds us
Well For example there at the current moment in time
then at this current moment in time
all the phenomena of the World are concentrated
in our impulse there is a vision of the goal

i.e. each World [...]

there in that look _{yes} that's who you looked at
almost the entire concentration of the World is already located

so when we talk
about the Physical Body of the One God
it is also considered natural
human physical body
which promotes or also develops Reality
as well as, for example, the Physical Body of the One God

but if we consider
that the Physical Body of the One God
develops Reality practically everywhere and immediately
with one action
then a person develops locally as well

i.e. here is the principle of _{personal} freedom
principle of human personality
that he has at the same time

and local actions

that's what it is by the way

a certain element well there are some differences , yes
although in the image and likeness here you can find
in fact and coincidences
because locally it's the whole world again
i.e. at any point we have practically the entire World

and therefore when we consider human action
from the point of view of, for example, exactly well let's say actions
by analogy with the action of the Physical
The physical Body of the One God

then here we can consider the following analogy
for the One God
any action

Means well, yes , among other things
thinking
there is Spiritual
action of the Soul
this action is exactly the same as physical

because from God's point of view
Soul
physical Reality yes
some kind of informational Reality
and in general any event is basically the same thing

so it turns out that when we say
about an action similar to well as if in reverse yes
from man to God
then this action is it
action of the human Soul
but located inside the physical
precisely inside the physical body

and when we talk we talk about that
what is inside on a physical level
this is action
then we mean that it is located
inside there any physical object yes let's assume
then a person can mentally imagine
what could he be up to there?
inside a physical object
Well there inside the tree the thought can work

how to extend the idea to a tree
but if the thought of making a tree is in your imagination
it turns out that they exist in the space of the tree
from the point of view of the One God
but also in man as the source of action

then it turns out to be the spread of Reality, for example Yes
could be from a person
from the inner world of a person
located in the physical body of a person

and at the same time the distribution can be
in general, into a completely different Reality

if we need to create for example
microparticle in space
and the one that is, in general,
Well, you can't say that it exists.
exactly for example now yes at the current time

then we can create it, for example
in my imagination yes
in the control impulse
but to say for sure that it was created or not, for example Yes
we can if the Physical Body of the One God
did the same thing

because we can only judge by analogy
our physical body is like the initiator of yes
some actions

we can say yes, that the Spirit works
but if we do not take into account the physical body
then the system is not complete yes

that's why it turns out
that the Physical Body of the One God
this is an attribute of confirmation of that
what did you do right in the distant Reality

i.e. it would seem that in general there is some logic to it
the development turns out to be paradoxical in general, yes
logical phase of Thinking
what we say about the Physical Body of the One God
but in reality we are describing more of a distant Reality
in terms of the accuracy of its description

and when we see
that the Physical Body of the One God
does exactly the same
we can definitely say yes we created this microparticle
somewhere out there in space

another question is why we created it
maybe this microparticle is needed
to regulate the issue through it
For example there are resurrections

because when we talk about resurrection
or about the general resurrection
then this information affects, generally speaking, the whole Reality

if we are talking about resurrection
like , for example, about a certain one-time element, well there being
where everyone was resurrected in a second and that's it
or about some slow process
that first the first are resurrected
then there may be even a lot of them, even millions
but this is done consistently

then from the point of view of the Physical Body of the One God
this process is generally speaking one
and here the unity lies more in the moral aspect

The Physical Body of the One God is Eternal
so for Him in principle this process
he is completely natural
and it seems to exist already because of this
that His Physical Body exists

if we consider that here is a moral principle
this is the principle of organization yes
Physical Body of the One God
that concept for example well "morals" yes
Physical Body of the One God
pay attention
namely the morality of the Physical Body of the One God

then the principle of organization is that
that He Himself is Eternal and His morality is hence Eternal yes
so that's why the morality of Eternity
Well there is Eternal development creation it is clear
what is the morality of Eternity
this is what leads to Eternal development

that's why it turns out
that creation is Eternal harmonious development
this is morality, i.e. a moral principle and a moral code
Physical Body of the One God

and therefore it turns out that we are also considering
well, some kind of ideological concept of our development
as a moral principle
Physical Body of the One God

although the moral principle
it's more of an ideological, well, some kind of informational principle
according to logic
this is some kind of goal that needs to be met

i.e. what a person looks like
as well as the information principle
although the moral principle clearly coincides
human
with behavioral structure
if he fulfills these moral principles

then it turns out that we have, for example,
Well there is an element of resurrection that exists
as an element of the future or an element of the current
as something that is essentially for human perception
generally speaking, it doesn't matter how one of them will be resurrected
then millions, then a billion, yes
or maybe all at once yes
after the first ones are resurrected, let's assume

but man always perceives
that there is always first there is always first

that's why the resurrection process is aimed at that
that even the single resurrection of Lazarus there
or already when Jesus was resurrected and became Eternal
Here
and other cases for example well, those described in history and civilizations

although they are isolated, they are very clearly remembered by civilization
they are like Well, they are cherished by a certain level of information
are taught as
although they are one-off, we see that their generalization
and even one-time use
this is the way to God

the path precisely to the Physical Body of the One God
path at the level of information Thinking
path at level well as if thoughts and man
including purity of thoughts

and or if we look at the word "purity"
as pure
Well, to love purely, i.e. Truth and purity of development

i.e. if we consider the word as a moving word
then we see that the movement of this word, for example,
this is what God creates the word
which can move Reality

Well, that's also a word
for example I cited as "ambitious" level yes

and therefore the driving word is our speech
this is what moves us into the future

Well, it's elementary there creation
some structural systems of social systems
when we can design
at the level of social technological systems
we still use words there, yes
graphics are some means of expression

so this is the movement
if you connect
with the image of the Physical Body of the One God
then we see very clearly
where it is processed by Him or where it was projected onto Him
this information is the free will of man

because first of all we must find
namely, the freedom of will of every individual in general

and that's when we talk
it is about the dissemination of Reality
Means yes, together with the Physical Body of the One God
it is here that we find the answer to that
that free will is the next Reality
which right now at the moment it is not recorded
Well For example there is the future and the next Reality

if you ask yourself this question , it's quite simple
Well, that's just awesome why is the world arranged like this

what is for example there is the future and the past there or the present
just ask yourself such an abstract question
clean well for example in a mathematical description
raise the question of Peace
and that means raising the question of the existence of these processes
as necessary

then it turns out that the future is that
what gives freedom of choice
and to step from the past into the future
then we must make the past complicated

i.e. to make the past such that it changes
towards the Eternal Free Democratic Development
well, that is, improving laws , living conditions, etc.

it turns out that all the elements of development
are connected precisely
with the allocation of freedom as if in human action

if a person has let's say
well, some kind of defects , diseases, etc.
it turns out that it is precisely the concept of freedom
this is standardization
i.e. precisely the return to the Image
Physical Body of the One God
where Image is Norm

i.e. we come to what we get
that the Image is the Norm

if we see
The Physical Body of the One God is correct
and in order to see Him we need to know how He thinks
how internal organs are arranged
how does he interact with information in general
how his body interacts with information

then we know then
what is the path of standardization
it's just about acting according to logic
on principle [...] well at least on principle

and then it turns out that here we get
in general, knowledge is already because
what we see is simply elementary
with eyes

or we see with our eyes
or there Spiritual knowledge

and then many processes

Well let's assume if we take the process of tissue regeneration yes
well then it is considered tissue regeneration
for example, some species have it there are living organisms there
but it arose from the point of view
the feasibility of regeneration for a given species

but if we consider
The Physical Body of the One God
then in the Physical Body
and there is a projection of this process

and it turns out that regeneration, i.e. tissue normalization
this is something we can convert
per person

it turns out the mechanism is quite simple
regeneration and growth of organs in general
from this position
we just keep track of everything
optical signal
well tissue regeneration
Let's assume that reptiles have tissue regeneration

from God's point of view
each object of information
generally has equal essence
i.e. from the point of view of the idea of the Infinity of the World
any object there atom yes human animal plant stone there
anything at all
has a certain principle of equality
from the point of view of equality and simultaneity
organizations from the One God

it turns out that for Him
tissue regeneration in a reptile
same control
as is regeneration in humans in general

and it turns out that for certain reasons a person
there is no regeneration even though the person
Well there it controls yes
more more social systems
more information in the World

and here it turns out that the regeneration process
can be translated to a person
just by taking away the general image
well some other one
which was the source of regeneration
i.e. to receive, as it were, pure knowledge

and then this option is exactly in general
well, let 's say, knowledge conversion, yes
if a reptile regenerates tissue
Well, there she grows up
Well, basically it just regenerates
it doesn't grow initially
Well as if let's say in a different form yes
it is only standardized
and we still need to translate it into the Norm for a person

and it turns out that the principle of standardization of this fabric
i.e. the principle of translation
getting this pure well let's say Divine knowledge
this is what we see as a reflection
some kind of regeneration process
on the Physical Body of the One God

and we just use this reflection
in order to translate to a person

then the regeneration mechanism is very simple
in general, well, it 's like a restoration to the norm
well, into the usual Norma , I guess
namely any human organ

there external internal
this is just a translation
in fact, information regeneration
not necessarily only in reptiles
in general, in any type and in any kind
where is regeneration

if we take water, let's say Yes
a drop dripped a wave passed
and the water was restored
also in general in an abstract sense
this is a type of regeneration recovery yes
water surface

i.e. and for the One God
it's the same thing again
this projection is always in the same place

and when
True, from what point of view, *yes*, we are still looking

it turns out that we should see
where is it projected for the One God
this event
and this event is projected
approximately in the area *of well there is* the mediastinum of the stomach

and everyone can feel some warmth
this is when the recovery process begins
many people feel the first pulse of warmth
exactly in the area *well more more* stomach
or there is a little higher precisely the primary impulse
where the Spirit works
this is where the Spirit receives the first impulse

i.e. you
and from the point of view of the form's operation, *yes*
it's very simple
the signal is transferred to a level somewhere in the stomach
there is a mediastinum
then from here it is simply reflected onto that organ
which regenerates but already in humans

so we are an evolutionary level of development *yes*
we take it upon ourselves
after all, it is evolution
if we can regenerate *yes* tissue

and if we can regenerate
well, it's not like he's there himself
some if you take *there* and prick your finger with a needle
then the finger will heal

it is regeneration after all
can't say
that we are, *as it were*, radically evolving in this regard
but if *we assume* there is a lot to restore *there*
that's unusual , *yes*
then this already relates to the subject of evolution

and it turns out that the evolutionary parameter

it also needs to be controlled for that
to ensure Eternal, precisely Infinite development

because the first principle is the preservation of the body's shape
why can the body always be restored
because the form is a canonical system

and when we consider
historical development of man
there are very few signs that it has changed at all
exactly homo sapiens

and when we ^{kind of} look at
why such a static form
provided that the species at all during this time
not enough, well, ^{they} haven't changed

then the shape is preserved
also one of the canons of the organization
Physical Body of the One God

and by likeness we look
and where is that structure actually held?
which is ^{as if} in itself
is restored ^{there is} restored by itself

so here is the structure in the Physical Body of the One God
which has information specifically ^{about} canon
^{Well as if} some kind of matrix of the Norm ^{and} the human body
she is located
firstly vertically
this is first of all this is ^{well} let's say the brain
then ^{comes} the spine
First of all, it is the spinal cord

i.e. it is brain tissue i.e.
then comes after the brain tissue
bone tissue is coming
and already around the bone tissue it is organized, ^{generally speaking}
muscular ^{well} there is other fabric ^{there too yes}
^{Well as if} which could be classified ^{as} a soft tissue

so it turns out that the root system
is located ^{in general} ^{Well as if} most deeply
behind dense bone tissue

root system of primary organization

at the level of the Spirit

I have highlighted it now
how god organizes
Physical Body of God
it is precisely organized at the level of the Spirit
primary level of management

so here's what happens next if we look at it
sign of the Soul
then the sign of the Soul here passes into soft tissue

i.e. if we take the forearm of the left hand
and we want to regenerate yes
or there on the right, well it doesn't matter

and at the same time we want to work
Well, there is a deeper mechanism there
there originally there
Primarily deep is
level Soul yes

then here we see
that the projection is of a deeper level
already passes to the liver, for example
i.e. into soft, into soft fabric in general

I'm just saying hard and soft for now
so that later I clearly understand the level
to highlight
how do they interact at all
hard and soft phase

how do the earth and sky interact , for example
i.e. earth - air
earth - water

why from the fact that there is water and earth
there is life and there is vegetation

liquid phase
solid phase yes

soft phase
hard phase

and when we begin to understand
like this simple truth
after all, we perceive it so simply
there is a hard phase Earth
there is a soft phase or there is an air phase

it turns out that breathing is a method of regulation
hard phase and there For example there well amorphous yes
breathe air
but they can perceive it
water
land
but at the same time they can perceive in general
and air
simultaneously

i.e. there is a level
which is a simultaneous level

so from the point of view of the device
Physical Body of the One God
the simultaneous level is Consciousness
Well, what corresponds to human Consciousness

and when you look
Well as a substructure of Consciousness
as a principle of self-knowledge of the Soul yes
as consciousness awareness of the Spirit

it turns out that in principle he cannot be a human being
Well there for example abnormal
i.e. he is a human being from the very beginning
from the level of God
he is always normal
the only question is
how much does he perceive external Reality
what system of external Reality
it's as if he's being thrown off course by something

if we refer it to the level of non-Norm then
that some events there, for example, are sharply negative
then generally speaking from this point of view
there shouldn't even be any negative events

if the principles of interactions of relationships are leveled
there at least even on the level of hard soft there phase

air phase amorphous

i.e., in general, in general, simple things that

For example there in eastern medicine they are traced quite clearly
at least in some local manifestations
and very often provide a systemic level of control
there for health

but very simple components are taken
so that's what i said
if we look at these components again
and spread it
on the Physical Body of the One God
then we will see that any process can be restored
it is possible there or very quickly there by sending to the past
and already by the time of working with information from the past
the next second Norma is already there

i.e. how to do it
so that the future is fixed and stable
we need to work with information from the past
restore the entire block to the past
then the local system
having worked there maybe quite a long time
the next second we suddenly , as if instantly
we get Norma yes

but if the norm is generally such
are you looking at in Perception
what can happen
some process
and you align it for example Yes
it turns out that you often get the Norm
because you already aligned you knew before
and you did

if the process is already recorded
how, how negative
and it needs to be restored
then it is possible through a lot of work with the past
restore for example in the next second
as after starting work

but then will those around you get it?
Well there is Peace and humanity
knowledge
if this is a millisecond of the whole process

than even the word it is ^{there} yes it takes a few seconds

it turns out that the action has a duration
it is a training system in essence
because there are no impossible systems in management here
you can do everything instantly

naturally the One God He could do
all processes are very instantaneous there self-healing
but then where is the training

therefore, the faster a person learns
the more people study
the faster we get it actually
system
namely, rapid, almost sometimes instantaneous development
or instant learning instant control

but then the question arises if someone didn't learn something
^{For example there} even if it's a little bit
then it turns out that this is one person
can in principle hold ^{yes}
the collective level of Consciousness until then
until he learns
either explicitly or implicitly

Well ^{for example,} managers who are perfect
perfect in remote data transmission
They haven't even taught me remotely yet

general management process
there to the side ^{yes For example}
well, a quick solution to social conflicts ^{there}
there are no local disasters there
Well, it is precisely in catastrophic ones ^{that there are generally} more phenomena
not even disasters as such, ^{but} identified ones
catastrophic plan
i.e. in the forecast these phenomena
well, they wouldn't be exactly catastrophic

then what matters here is basically exactly that
that everyone should work roughly equally collectively
and in principle quite quickly, in general ^{yes}
to resolve the issue

that is why I propose as a concrete practice
just make control

right now literally one second
management will take place

i.e. fast collective management
so that all processes yes
for example the future
there is a past
current
were also common
Well there in normal in the Infinite future
as the Physical Body of the One God does

the process must go so i said a second yes
he's already passed
i.e. while I said a second
the management process has passed
then I kind of added a speech

here is also the Physical Body of the One God
makes the next Reality
as if simultaneously showing with words
that Reality can be described
at the expense of Consciousness

but then God must first perceive
all elements of Reality
on your Consciousness
see how a person perceives it
and give already in human Perception

then it turns out if the question
how does God perceive the word
what is the Word of God

then it turns out that the word of God must have yes
melody sound
and the treatment should be the same towards Him
i.e. i.e. precisely directed towards God for action
and the Word of God is action
specific realized for example positively realized

God always realizes only in a positive way

so for example directed
Well there is a prayer there or there is a number series
something aimed at positive management
this is what is analogous to the word of God

coming from God from a human point of view
which means it controls Reality

why is it there well prayers
they have a duration of a certain yes
but maybe the Word of God is instant

i.e. for example we want to make instant control
so that everyone would be saved at once
then it turns out that instantaneity
if it is aimed at the Salvation of all
then this is also the Word of God
sometimes even without a word as such
physical for example yes Thinking

the concept of "Thinking" "thought"
this also comes from God
in terms of for example there was some kind of verbal conversation
at the management level

so, well , for example , according to my Teaching
about Salvation and harmonious development
I show that if we combine
word and action
i.e. if Thinking coincides with action
or the word immediately leads to action
then we can get
virtually infinite level of information transfer

then we can do the next action
always obviously stable
i.e. the future will always be sustainable
will always be creative
and always every action will be most powerful
directed
precisely to fulfill the Will of God so let's say
in terms of the next level of the World
where the world expands to the next level

so here is the spread of Peace to the next level
this is what implies mutual
mutual hearing
i.e. God hears man
man hears God

and if God always hears a person
and that's how it is

then it turns out that the only question is
so that man can hear God
what does he show him

and it turns out that here the concept of "hearing"
again by analogy yes we judge exactly this type
that well , there is some kind of , let's say, external situation
there is a systemic external environment
which we must understand

but it can be complicated
and we can understand for example
converting through your Perception

but God is easy to understand
because God He gives a simple way to understand

if the investigative system
it may be that you have to think for a long time
to understand and apply it correctly
like driving some kind of complex machine
or exploit it there
this must first be perceived
how does she perceive Reality
how does she know objects
control system yes
at least the steering wheel
not to mention a more complex system there
like in programming for example
make management
this is actually a series of program blocks, etc.

and for this you still need to understand
as it turns out, the program itself is a virtual thing
how does she react to Reality at all

then here is the conversion system
or what about human perceptions
before God
these are his actions
human action

and when a person is directed towards absolute creativity
so that it would be , for example, as God said, yes
Eternal life
and make certain movements towards this

that's the way
what comes to him in the form of specific actions
this is what he hears from God
i.e. hearing God is initially ideological
to act correctly yes
moral code for example there is the savior of civilization

and when i use it
this is the principle of morality from a person
which is docked
with the morality of God
then the concept of "hearing" is, in general, actually
all the same, well, the membranes of the physical body, yes
namely the eardrums
means the organ of hearing in the general sense
where do we enter the brain body
at the Physical Body of the One God
and then the conversation with Him will be very clear
when you speak simply as a human being

and then the question arises
if you speak in words
how common are words well there
but what if for example you say I
because the logic is such that if logic considers
that there is the Physical Body of the One God
somewhere further away
suddenly the words don't get through exactly the words

they pray in church for example
or say something in words
then it extends to the level of images
but you can speak with thoughts right away
near the Physical Body of the One God

so it turns out that thoughts are
from the point of view of their logical necessity
these are systems of communication in general
on communication with the Physical Body of the One God

because if we consider
Well there is the Spiritual level of God, yes, he is present everywhere
then why localize the word

then you could just Spiritually there
think and see the situation just ahead
there was no need to put thoughts into words

the necessity of Thinking
from the point of view of this method, in that
to communicate with the Physical
precisely with the Physical Body of the One God

i.e. it turns out that there are a lot of principles and methods
and generally speaking situational systems
in the human consciousness
built so that there is contact
with the Physical Body of the One God

i.e. here you can see
what are the mechanisms of human reactions in general
normalized response mechanisms
when a person is the Norm of the World
when he reacts normally
on the system for example Mira
and the Norm is Infinite Development

then here is precisely the principle of Thinking
i.e. the use of Thinking as a contact system

and then it turns out that all you need is just
to communicate
with the Physical Body of the One God
in general, a certain path, or something like an optical light path
show in your Consciousness

and when you communicate
with the Eternal Body of the One God
you know exactly what you are communicating with exactly
i.e. when there is a Physical Body you have one coordinate

and if we communicate, for example , at the level of Spiritual systems
then in general it is necessary to control many levels
how is the signal going
where does it disperse, for example, in optics ?
how god perceives signal

another question
that God perceives it anyway
any signal
but it is often typical for a person
convey the signal specifically

and here in our well-known technogenic civilization

It is very important to learn to speak
precisely with the Physical Body of the One God
because this contact
this is indestructibility
in fact the person himself

and no man-made system
no investigative system
will no longer pose a problem
for a person
if he is at least telepathic
then it will translate the thought
to the Physical Body of the One God

because it arises
Well how does a crystalline system work
if somewhere you touched at least in thought yes
some channel appeared
then the Eternal Body gives Eternity to the source itself
for example to a person

if such a person is going
well in some difficult situation
there well let's assume some, let's say, emergency situation
then you can just go into telepathy
precisely on the Physical Body of the One God yes
something happens that doesn't destroy the machine
a person, for example, does n't get there Yes
in some unpleasant situations

so it turns out that this is generally possible
extrapolate further
and tightly tying itself to the ground
i.e. if there is contact with the World
on the Physical Body of the One God
and save the world
this is a specific method of colossal power
which says that any system there is a galaxy
how to make sure there is no collapse of the universe

just to fix in Perception that
what we like is the air there is the universe
everything that is necessary for life
and there is Infinite development
and go out in telepathy
on the Physical Body of the One God
and fix this state

and as much as possible it's well how to fix
until developmental stability is acquired

i.e. it turns out that we are guaranteed to be protected
technologies of your Consciousness
from some kind of external huge comet
or from something even internal
even from some global explosions
there are some kind of nuclear weapons there
if we have
this is the level of connection
where is the direct connection, it is that you are also Eternal
as soon as you come into direct contact with him

and this technology is precisely the transfer of knowledge
so connected well as your actual knowledge
How do you show it?
that you have a certain level of knowledge
there is a telepathic sphere that contacts
with a certain level of the Physical Body of the One God

then contact
the first contact should be made
from the palm of the right hand
i.e. you mentally place the sphere
in Physical well Physical just as if you transfer to God
mentally this sphere
exactly in the right hand

that's when you put it, the question arises
What kind of content are you putting in anyway?

because when you come already
to the Physical Body of the One God
There is only one nuance here
what is in human perception
certain thought arises
that God creates all thoughts

it turns out that you invest that
that He has already given you i.e. He already knows yes
what do you need

i.e. it turns out that, well, a sphere is created somewhere, for example Yes
it has been passed on to you
you're just kind of rolling back

but in fact, to hit the target accurately
here in the Physical Body of the One God
that's exactly what needs to be excluded
that this is some kind of completely passive process
and you don't really need to do anything here

in fact you will hit the target exactly
when you see
own distribution
i.e. your path

God always keeps track first
absolute freedom of human will

and when you show
freedom of one's own movement
i.e. when you give
it is precisely this path of one's personality
then you definitely give it to Him in the right hand

here is the criterion of accuracy
your understanding of your personal freedom

you are created by the One God
but you are created absolutely free
so you can develop the system infinitely

principle of freedom
that is why a person can develop infinitely

if a person is somewhere well there will be no free
or he is pinched in something
it turns out that he can , well, like the system, you know there
even orthodox physics describes
if there is at least one stock somewhere, i.e. one fixation
then the system is still fixed

and it turns out that Infinite development
possible only on the principles of absolute complete freedom

but it gives a solution
complete freedom is the absolute norm
complete freedom means eternal development
then there is at this level
which leads to a mandatory Norm
to the mandatory norm

and you can use it as knowledge
I'm just showing it now by the way
a very specific technology

i.e. take the volume of information from here
how to enter the norm
into the physical body of a person
rationing will begin

and when you
and in a rather difficult situation
there internal external

and when we talk about the situation of rationing as such
well from the point of view of for example yes Eternal development
then we get the physical body of a person
in general, here's the one who was born and grew up and is growing
just a person in general
this is the absolute norm
which in essence does not go anywhere

here from the point of view of the Physical Body of the One God
all people are eternal always

He is like the Eternal always yes
Well as if just to abstract
take just the Eternity system as information
which
this system also has to somehow perceive yes
not to mention that when we talk about the concept of a system
this concept is already the word of God

to get closer to God
and generally see God in Reality
from the point of view of Thinking, yes let's say
not with the eyes but with the Thinking
then it turns out that we must see His Truth
from the point of view of not all the same
with as few investigative systems as possible

i.e. therefore it will turn out that for Him
convert image for example to that
that something seems to be falling apart somewhere
This is a special technology

so if for a person
well some systems of destruction

this is a certain level, what is he used to?

and convert
that the Eternal Physical Body of the One God
does this and that's why there is no destruction
this is also a certain conversion for a person
those. some knowledge
but knowledge is precisely complete

that's why well in various scriptures
that a certain spectrum of light ends at some point
the true light begins

and when we see for example Light
namely the Physical Body of the One God
then it is clear that there is the Perception of God
matches
with the Perception of a person going to Him and on His path
at least even if only for the beginning
for the purpose of joint action there

and this is this joint action
this is a spread
that's why I spoke about the future then
at today's seminar
then the future is distribution
into some other Reality
well, even if it's the next time or the next second

and this is conditional in the form of, for example, Yes
there is still a principle to consider time
as a conventional unit introduced by people

i.e. if we say that there is no clock
and we generally don't care about such a concept as "time"
something is still happening
then to regulate events
Well, for example, they entered the time

and it turns out that the next Reality
this is what develops in space yes
Well as if developing into the future

so this space is development into the future
for what for example Well, the One God having everything created space
so that the path of development lies on fixed systems
i.e. Consciousness to develop yes

on some spatial systems

and if we develop an infinite amount of time
then it's time
discrete time is what shines from Infinity
not from the point of view that it was invented by people, for example Yes
and time as such as a physical quantity

if we can take it there
some volume of water , some weight
we can say yes, this is concrete matter there
those. space is measurable
from the point of view of the human physical body

then time is measurable
only on distant Infinite systems
then it turns into a physical structure

but if we look further
it is very elementary logical how we reason
what we see is simple
as depending on time
somehow the physical world changes
i.e. time sort of regulates the system yes
as we approach we see the movement of space

and it turns out that space and time
these are systems that are quite strongly connected
with human Consciousness
and from the point of view of physical quantity
only very distant processes
give a high concentration of physical
namely the physical matter of time

and it turns out that a person actually
Well as if for control in order to spread
some Reality the following system
there is a very simple mechanism

all you need to do is take it
in physical volume time
and in Consciousness we can do it
especially since I already highlighted it
this fragment in Consciousness

and in the physical volume of time
just select the area that corresponds

practically Well as if to action
where Reality needs to be spread

and Reality can be spread
For example there in healing and restoration of health
creation of some kind of third-tenths worlds there
some particles of molecules, etc.

and therefore it turns out that in this case
even what you write will be
often if you develop Reality
this will have a structure for future development
your text etc.

and when you can even see it later on the information
that some things they even
Well there are none at the microelement level now
they are more related to the microelement systems of the future
and so on, but in the text they are already there , for example

and when you, for example, start working with this knowledge
well, as for itself, well as if to the level of self-organization
somewhere close even to evolutionary
in terms of the evolution of Infinite development
at the absolute Norm of the human body

The norm of the body is what has
The Physical Body of the One God

then you see that to understand the Physical Body of the One God
very simple in functional actions
because you are physically built the same way
there is essentially no difference

He created the physical body of man.
absolutely identical

and it turns out that the mechanism of understanding
in the Physical Body of the One God
it means it is translated from the human point of view into that
that in a person it is a device and functionality
his internal organs

and when you look at a person like that
then generally speaking the functionality there is the movement of blood
any level of functionality at all
internal organs of a person

this is what it shows
structure of interactions
structure of co-facilitation
with the Physical Body of the One God
structure of even simultaneous action
in the dissemination of Reality

Well, logically it is the same
Man functions because that is how God designed him
and he does something all the time, yes, he develops Reality somehow

and it turns out that I led to this
at the level of Spiritual logic right now
and then he brought it to a human level of logic

here in the Spiritual logic of the Physical Body of the One God
i.e. from the point of view of the Spirit of the Physical Body of the One God
as He has
what is physical Reality what is informative
what are thoughts there, there is a physical body
it's the same thing
for Him

that is the point of His self-organization
she is absolutely exactly the same
as well as the point of self-organization of a person
in local human expression

i.e. a person, well, he perceives himself locally until then
while he thinks that he is well like this is how the investigative system works
as soon as he starts thinking
that it should work the same way the Creator works
how does the One God work
it becomes, in general, a universal level
even for myself

then it turns out that he can already do the action
which is comparable
with the Action of the Physical Body of the One God
i.e. regeneration of organs
remote control
event management, etc.

i.e. it is as if it is part of a more technological system
just by changing my worldview , yes
changing the point of view that it is not a local system
and can interact

with external elements of Reality
at the expense of one's Consciousness

and that is why, according to my Teaching,
precisely about Salvation and harmonious development
I show as much detail as possible
event management system after all
where a person becomes convinced that he can do it
and then he understands that his actions
are practically spread to Infinity

what difference can you make control there
well somewhere there in any country in any city
make remote control
but what's the difference, can you make control in Infinity
just to convince, yes there there are billions of years there for example Yes
live and confirm it for example Yes
the only difference is in confirmation

so here is the identification system
what did you do right yes
Often you have to do Infinitely
so that Infinity is stable
somewhere so that some explosion doesn't happen there
in the same billions of years

then again identification works like this
as the Physical Body of the One God
i.e. you saw that the Physical Body of the One God
did the same yes God did the same as you
and he thought it was right
then it's right

i.e. for Infinite processes
the action of the Physical Body of the One God
it's often very well criterial
i.e. very good sometimes the only one
level of criteriality of accuracy of action

therefore the Physical Body of the One God
from the point of view of action
in the development of physical Reality
this is a very good level of knowledge
which generally speaking well, such
that the Physical Body generally speaking gives a specific path

for example, Jesus said that "I am the Way"

so He meant this too
that the Physical Body is also just a path
because this is the Body of the Son of God
and the Son already He possesses, well, naturally there
functions are basically the same
that is the Physical Body of the One God

and it turns out that it is precisely the physical body
Well, the path of logic is very simple
He is indestructible there, yes.
He was resurrected there and further He is already indestructible, etc.

without resurrection
It is also naturally indestructible from the start.
because He, for example, is Jesus the son of God

and when we look at this process
Well, from a practical point of view
after all, He was among them
it was Jesus who gave technologies determined by his actions

it turns out that the Physical Body of the One God
as a level that gives well knowledge yes
for some actions in the social environment

this level is focused on the correctness of events
Means well, which come from that
that events are happening
Well as if with God's help there with God's participation

here is the criterion of the Norm, the criterion of locality , yes
that here in Infinite time
the current is discrete

the criterion of accuracy is what to do as if
Well there with God's help or do as the Creator
do as there Yes God

and this is the level of criteria
it gives opportunity as well as time
regulates and receives in a certain way
discrete level
then in the accuracy of actions it is to see
how God acts generally speaking in Infinity
and to see this in general, to know is just a goal

and the goal is very specific

this is Infinite development
in general, all elements of Reality
including atom there yes For example well any microsystems
or even a system that has not been created
which may be created in the future

and it turns out that based on this
we can only have infinite development
Well in general, in essence, into Infinity, for example, into the breadth , as it were Yes

if we know that development is Infinite
it will be provided anyway
and in ideology
from the One God of the Physical Body that is so

it turns out that development is in breadth
creates the possibility of space and time for other systems

so it is clear that God created it
physical Reality is such
so that Reality would develop as if in breadth
in space yes
there in depth or far in time

but when I used the word "deep"
then maybe "deep into the past" too yes
the past is also a source
a certain level of development
so past experience can of course be used yes
there a hundred or there in general, as much as possible yes

You could say it's a hundred percent or even more
well, that is, the percentage ratio may be different
having received one hundred percent you receive
super fast not related to percentage
Spiritual development
i.e. this turns out to be a more concept

in the management process there is a concept
which is not fixed by logic

and it turns out that we have a picture
Well, from the point of view of understanding God, yes
the universe is exactly like this
that's why He really created
external Reality
so that the development would come from His growing Spirit

The growing spirit gives external Reality

and the result is Spiritual development
here gives external Reality

and growth

is there even a concept of "growth"
because if you ask a question
that the Physical Body of the One God is such
has all the functions absolutely
It would seem enough, yes
that one can only have a physical body
and all the questions are resolved

but the concept is that in God
everything is arranged initially Infinitely

therefore the primary impulse is self-creation for example
then everything else should be related
with primary impulse

well, as we say in elementary mathematics
if there is some action
then such an action has the right and can exist

but God gives absolute freedom
and that's why it turns out
what is the primary impulse of primary growth
must necessarily give the following development
this is how human logic works

Now I showed a classic mechanism
the work of human logic

and therefore a person can also know through logic
then of course only when he, I think, finally gets to know
with the Physical Body of the One God
with God
i.e. when he understands that there is a level of God
which actually gives
It is precisely the criteria that is the true picture of development

and when you look into Infinity
as in Infinity yes for example, your personal
then you see that Infinity is personal
in fact, it is only a kind of internal expression

your personality
i.e. your Spirit your Spiritual state
and it is Infinite
because you are aware of yourself as if well, in the near world , perhaps
with the Infinity of Eternity

i.e. if you move the light of Eternity closer to yourself
then it turns out that this is you, your personality

and it turns out that all these Infinite processes
are concentrated precisely in man
as in the personal level of action yes

i.e. it turns out that God is all these processes
which He originally created
Well, let's say he carried out a certain titanic work
and yet He created them absolutely
well, actually, there it goes straight to Infinity, etc.

it is expressed in man
in the sensual
at the local level
at the action level

and when we see
that every action is
in fact, the spread of Reality
any action
there is inner Thinking

distribution also
how Reality spreads
namely the Physical Body of the One God
then we will see that the Physical Body of the One God is at the level of
where the Soul of man is organized
is just beginning to be realized
Spirit as the next system
or as a system for example of the presence of God

when they are all merged together
it turns out that the person has
harmonious Eternal development at this point
and this point is already seen by you
because well there I said the words
you looked and worked

as soon as you see this point this area

and that's exactly the system that begins
which allows you to do the management already because
what do you know about this

then it's your personal will
it's just that you can have free will
some kind of creative type
and it is being implemented

i.e. this is the level when the will is realized
because you just know a certain level of knowledge
or you listened to it for example now
or did you have practice there later?

i.e. it turns out that often
knowledge heard only once
once received
gives absolute control

and therefore if you look at
Well there is one molecule
some kind of distant world there even yes
some microsystem
then this is also, in general, a concentration of knowledge , yes
some element of the World

and in the future if a person perceives
at least one element of Reality
he can perceive everything at once
i.e. he can perceive practically
well that 's all he needs for Infinite development
even in one element of Reality

and if there is even more element of Reality
if there are even more development paths
so naturally the system of Eternity
more and more yes is reserved
and it turns out that the wider the World, the
the more humanity develops yes
and the universe in general
the more stable is the Eternal development
Well there are civilizations of the World, etc.

that's based on this
I offer it as independent work
through precisely the expanding yes let's say the model of the world
so where does the expansion occur

from the Physical Body of the One God
and you, cooperating with Him, ^{may} understand
why does he do this

build specific personal management
according to their tasks
and be sure to show it
that any element of the next Reality
this is, ^{generally speaking,} Eternal Development

any element of the next Reality
he is actually the guarantor
and in fact, if we look at it in general terms
it is essentially a sign and objectification of that
that development is eternal

any leaf somewhere ^{on a tree}
some kind of microsystem
not to mention there about man, naturally, and man
and in general the whole world is that
which thereby proves that development is eternal

and when you do it like this
from the point of view of today's method

look at reality
then you will see that it is often manageable already because
that you see her

where you see it, there it is controlled
because it is necessary precisely for Eternal development

Today I am finishing the seminar on this

thank you for your attention
