

GRIGORY GRABOVOY
The doctrine of God and man
02.09.2003

Hello again

Today I present the structure of my Teaching as follows:
which is called the Teachings of Grigori Grabovoi
About God and Man

in this structure of the Teaching I designate first of all
the primary principle which consists generally speaking
in the next sentence

i.e. when God created man
and when the person's request was expressed
about the creation of it itself

if you put the question this way
then we are considering the following position here
generally speaking of the entire material and informational World
expressed primarily in the human body

i.e. the person is expressed
in its form, including yes
i.e. on a physical level in the body

then here is the question that was asked yes
originally before God
that a person asked to create it
it is expressed first of all
in the personal factors of the individual himself

i.e. this is how personality is structured
that man is first and foremost
is an expression of oneself in this regard

and when we want to get there for example
instant healing effect
or there is an instantaneous Norm of events
then first of all we come to the fact that
that a person is that personality
who initially turned to God

in order for God to create man means

in its entirety
where is personality
and the physical body
and Soul
and the Spirit
and Consciousness
and unity with God
within the framework of precisely Eternal development

so the main question
here is the structure of my Teaching
consists in the fact that
when exactly did the person formulate this request

because if we start from the beginning
from the principles of free will at any level of life
in general, here are the developments in the world
then this means that such a request should generally exist
in all elements of Reality

for God does not act by force
creates what wants to be created

so when we start from this level
we primarily consider
human personality
what does God-directed personality mean
i.e. God-like
and God-created personality

therefore a person has a level
where events exist before they happen
Well, for example, yes, with this person

the simplest social meaning of these events
this is something happening in society yes
somehow it happens
level of development of the world
in the sense that a person can be in one place
and a lot of events in other places

and here is the level that we come into contact with a person
i.e. a person watches the news, for example
and at the same time is himself

external level yes
level created initially
well, at a higher level, for example, the One God

in your Physical Body
and also created by people themselves

if we consider the principles
there is physical functioning of the World
then let's put the question to physicists
how are the two neighboring molecules arranged there ?
why don't they break apart yes

then the answer to this question
Well, maybe there are a lot of physical calculations there
or maybe just an understanding of personality
that they don't break
because there is some kind of power there, yes
it is expressed in some formula
for a physicist

for a sociologist
is , for example, the external world and some kind of social world

for a philosopher
this is another philosophical concept

therefore, each person's personality is expressed in its own way
regardless of the specifics there
some special directions

but here is the arrival of one person to another
is always expressed in terms of events

i.e. for one person to come to another
and asked a question at all
or even just chatted there
called on the phone
there must be an intermediate world
well, like the world of so to speak communications
the phone go , for example?
where are the systems of what exists there Earth included
systems there are air and power supply, etc.
if as we consider simply
system of single-action complexes

the same for God
when He put yes for example
in front of Himself
the question of the creation of man
all these systems already existed initially
but in the personality of a person

i.e. from God's point of view
a look at a person
it is first of all His own Personality

and then we understand that
why did God create in the Image and Likeness
human
because His Personality was simply reflected
in action in creation
that's why man originally
he is still extremely creative

for his personality is personified with God
and with the Personality of God

and when we see for example
well, for example, some deviations from creativity
for example aggression, anger, etc. destruction

then this is the discrepancy with the Personality
comes from that
that at the moment of creation of events
for example a person creates an event yes
he creates a car and drives it down the road

at this moment
human action is different from God's action
in something

if a person is in an environment
completely created by God
for example, the Earth, air, etc., the person himself, yes

then why does it arise at all?
difference from God's task
for example, Eternal Development there
or for example there is immortality from the beginning
from the level of creation of any level of matter

then the answer to this question
is here again
freedom of choice of the individual
i.e. he can choose knowledge
or maybe he considers that he personally is in this World
and the World is , well, well, under his level of control

and there he is moving around in the same car

but at the same time he doesn't feel any connection, for example
with God ^{yes}
with external nature ^{for example}
Wednesday
with other people

as soon as he enters into this feeling
there are such concepts as "contact with space" ^{yes}
or ^{for example} prayer
at the same time, harmonization occurs in him
at least in the Spiritual realm

but why does harmonization not always happen?
immediately ^{assume} in the physical sphere
and first and initially in the Spiritual

because the Spirit as an Infinite concept
still exists within the framework of any information

also for humans
the question was formulated in the Spiritual sphere
for the Physical Body of the One God

well, a question, a request , ^{yes}
why do i call it a question
because he is a man, he thinks
that he didn't get an answer right away
will it be created, ^{for example?}

and from here arose
logical phase of human development
that he asked a question
as if in a request for creation
there is always a question, ^{but} an implicit question

because, ^{well, for example,} there is a request
and will it be created?

that's why this is the version of the implicit question
and this option ^{actually gave rise to}
that in an explicit request
there is a question of follow-up ^{yes}

the next world turned out to be unpredictable in many ways ^{as if}
in a logical sense of understanding

although in the Spiritual plane the answer already existed
Spiritually God has already created man

because he is simply his own image
as if he had in his Perception

it turns out that the question was formulated
in the Spiritual realm of God
what does it mean for a person in Perception
Physical Body of God

i.e. the person saw himself from the very beginning
and only then was it created
and it turns out well in this case the question is then
than he saw yes

here the status of the Soul immediately arises

so when we talk about God and man
Soul
Spirit
physical body
Consciousness of God and Man
it's a single level [...] actually
Incarnations of God in Infinite Development
it is a person

and when we look at it in this context
how should it be applied in practice
the mechanism for this understanding of the World

here it is generally quite easy to see
at least in that
what if we consider
The spiritual realm of God
from the point of view of human perception
as the Physical Body of God

i.e. if a person is located
in the Spiritual realm of God
then he sees the physical body of man and God
simultaneously

i.e. the Physical Body of God is clearly visible to him
only through the Spiritual realm of God
and moreover, the One

it turns out that the mechanism is quite sufficient
Well, there is a clear mechanism for healing.
there from any virological diseases
any diseases that are there for example

there we assume a virological type
including some malignant processes
also develop at least a schematic model

so when we have
is a development model there
by virological type, well, some form of cancer , for example
well, let's assume there is an overlap of function graphs
shows that it's almost like a virus yes

we can solve a whole range of diseases
that we only put on everything
function of your Consciousness
into the Spiritual realm of God

and at the same time we see
for example, there is physical vision
or there by Spiritual vision
with the sight of the Soul
we see
The Physical Body of the One God

Spiritual compatibility
in Human Perception
these two spheres
leads to complete cleanliness
physical body of a person

and when we do it
for example, with this level of compatibility
then let's assume it is of virological nature
you can introduce a whole complex
there are situations, well, anomalies
let's assume there is a war virus and some destruction

in this way, social events can also be normalized

i.e. the applied mechanism of the Norm
in the study yes
in understanding the interaction process
God and man
in their joint development
leads to a significant and very strong
precisely at the pragmatic level
the implementation of physical events

and that's when I asked a question of this kind
what why do we see first anyway

realization in the Spiritual sphere
and later, for example, yes, we get
let's assume implementation at the physical level

then for God it is one and the same property yes
external and internal world
for Him Actions in the physical world
happen almost simultaneously
as in the Spiritual

from the point of view of well logic it is understandable
i.e. Consciousness allows us to understand
what does it really matter to God
or this is information
or any other movement in the physical world

but to master this property
and have, for example, an instant resolution to the situation
Well, for example, from the point of view
preventing a possible global catastrophe yes
the start sensor did not work
there is some kind of space program
and no missiles with nuclear warheads flew

for this it is necessary to obtain only on the whole
from the point of view of this practice
to be able to unite the spiritual and the physical

i.e. your personal impulse to influence
so that this phenomenon does not occur
self-launch or artificial launch
with the aim of starting a war yes

and so that it is reflected on a physical level in reality

because a person perceives
practically well, still a wide range of information
and the allocation of a single spectrum
that right now we need to work
to prevent this action from happening
this action often has to be instantaneous
comparable
with the Action of the One God

and when you start to act
this action happens really instantly
then you see
to prevent, for example, a possible global catastrophe

it is often very easy for a person
action
natural
and the force is taken as if it were powerful and adequate
i.e. absolutely precisely

at that moment when some personal action
well, which is not related to the Macro task
some technological efforts need to be spent on it
in order to solve it yes this question

so here is where the difference lies
that events of a person's personality
well, aimed at a specific task
primarily aimed at
including the study of Reality yes
to study the properties of the Laws
human interaction systems
as if with a rarefied phase of Reality
where there is no Macrotask of God initially

and then God gives him the right to choose yes
the choice exists to a fairly serious degree
what are we doing more of
some private tasks
the more options there are for solving the problem

but in the task of saving everyone
from a possible global catastrophe
there is basically no choice there, well, practically there really isn't any
there everyone will be saved in any case

God is indestructible
this means that a person cannot be fundamentally destroyed

and from this it follows
why for example there are the same cases of resurrection there
which were in the historical past yes
happening now
often the cases are instantaneous
well, it's like there's just one person here
here he kind of appears
and it was as if he had never disappeared
i.e. there is no element of transformation

and here, well, the same, well, for example, the picture of the resurrection of
Lazarus, yes
Jesus when the body was already there

in the stage of biological decomposition
he came out there were no signs

it turns out that this is the transformation system
it happens exactly from that perspective
where man is united with God
and he becomes God-like
i.e. it is indistinguishable
in terms of the status of reaction to the outside world

then it turns out that for him it is no longer there
decomposition processes
for example, yes, some processes, even diseases in general

and it turns out that in order to canonically
Well, there we develop a system of future events
because it is done precisely from God's point of view
and God who is present
precisely located in its Unified Physical Body

then the principle of combination is very important here
with the Action of God
with God's tasks
but essentially with God himself

i.e. when a person feels himself
an inseparable part of the One God

and here is the answer to the question
when the person asked this question
because it hasn't been created yet

and then they will turn out to be who, well, sort of
what component of your personality
he asked this question

and here is the component of personality
God himself appears

therefore God is original
had the personality of a human
in yourself yes
this is its integral component
which is projected into the Universe
well let's say it gave birth to a lot of phenomena and events there
and these events essentially developed
precisely as God's desire for man

i.e. He wanted to show
that any phenomenon can be developed
to the level of Godlikeness
i.e. to the level of Oneself

if you think about psychology
Physical Body of the One God
why did he do that

then psychology is enough
from a human point of view it is understandable

there is one God
naturally he wants to implement the situation this way
to show that he can do it
the concept of "omnipotence" is clearly understandable to Him
He understands and knows it.

another question is what He wants to show in practice
that the Reality created by Him
there is a created man
he is the same
and then he will not be alone yes

the task of God's loneliness for example
this task is, in many ways, not even philosophical
because for human Consciousness
God
One God
then the question arises in human Consciousness
and it turns out that he is alone
how can I make sure he isn't lonely?

then He must make it so that people are equal
at least in Eternal Development

and here it turns out
what is this from the point of view of human psychology
this task of loneliness yes
solution to the problem of the Creator's loneliness
and including the Physical Body of the One God

it turns out that we have
on a spiritual basis
An infinite system where there is no time

i.e. the question asked for example now
he is quite in the Spirit

in the Spiritual sphere
immediately falls into the sphere of the past
where it has not yet been asked

i.e. logically Consciousness is structured like this
that it is very strong
develops a management system
as if in plus Infinity and in minus Infinity
and merges again into the personality of a person

i.e. in essence time does not exist for a person
if we take a human cell for example
and measure the time interval
we mark the time there
and that means to note the connection of some events
over time
there yes with the physical body of a person

then take for example the inner cell
because the cell perceives
just the state of the body in essence
and only man perceives through sight
some external events

i.e. internal systems may not perceive time
i.e. they are built in the same way as, for example, God's cell

and if we find such a cell in ourselves
then we can get better almost immediately

for this the question arises how to find this cell yes
and we can, in general, as if having found God's cell, yes
in your physical body
it's not easy to recover, for example, personally
but also to solve the issue there
that there is no possible global catastrophe

and this search for this cell
this is again a question on the same exact thing
well, it's like an option for development
i.e. in fact, it can practically even be
you could say it this way here, more accurately
what will happen exactly for the implementation of management
it will be more accurate

what is the person asking the question here
to myself
Thus

and how did he even express his request to God?
about his own creation
if we move to the cellular level

because for a person there always exists
the principle of freedom of choice yes
let's say, take a person, well, basically, any person
and say "God created and that's it" yes
or there "run some program for example
"implement something there"

basically if a person is very freedom-loving
he can say wonder
and in general, did the person himself agree, for example, yes
to the element of original creation

It is natural that God left the answer to this or that question so
that it was a free choice of man naturally
God always gives complete freedom of action

and when a person asks a question, for example , to himself
from the point of view of, well, its cellular structure

then the answer to this question is
in the Spiritual sphere
the existence of God himself
who decides this issue for him yes
like this is a person's faith
i.e. Spiritual knowledge of man
when a person gives
it's precisely the level of development that is higher
well, in general, to those around
due to their own knowledge

i.e. he gains knowledge for that
to benefit society for example yes
or in some personal matter

when we solve this issue for example in this way
that for example a person has a task there
be healthy there or recover yes
solve the creative tasks of society

then there is no answer to this question
when he asked a question-request to God
about his own creation
a person is still somehow in one link
it becomes disadvantaged

i.e. he may not ask this question in principle
but then he will still feel it
some kind of oppressive situation
how is that possible? well, it's not mechanical after all. compound
created and that's all
and forced to carry out the same will
is some program there

so this question exists somewhere

when we start to go down , well, at the level of physiology, yes
to the decision where in general
where is the material place of this question
in a person

then we come then
well at least to the atomic level
here is an atom, this is a concentration
and question and answer at this level

if we enter for example into an atom there
or to earlier structures
and we begin to consider
connection for example between God and man
then this connection is that
that a certain level of transition occurs
where the microsystem instantly turns into a Macrosystem

and this level is the personality of a person
who already has the answer to this question

i.e. why does a person often simply know many questions
and knows that something must happen yes

i.e. here is the answer to this question for a person
this is his next knowledge
well, for example, there is controlling clairvoyance in this case
It can be interpreted this way, but this is a special case
controlling clairvoyance

what we're really talking about is
that he is in direct contact with God there

it turns out that the exit to the micro level is yes
there in atomicity
we come into direct contact with God
because in principle it is logical and clear

God is organizing this microstructure at this moment.

therefore the person contacts, for example , seeing yes
what is being done

so knowledge is also the answer to this question

and here I just don't define the place
where in knowledge does a person answer this question

knowledge is created to answer
including for this
to the question of the Universe
to the question of the original organization of man

if man were a mechanical structure there
there obeying some kind of forced will yes
then he would not have had the level of aspiration
to Infinite knowledge

therefore when we want to answer the question
to this question from the point of view of logic
we can say
what is the element of the original question
there was human knowledge about that
that such a request can be formulated to God

so it turns out that knowledge existed yes
before the organization of man
but human knowledge

and so if we consider the option of, for example, knowledge
how do they interact, for example, with a person's personality
it turns out that they essentially possess knowledge
property of unity
in terms of, for example, creative development

when we, for example, according to this structure of my Teaching
We are considering a system for distributing my technologies
then here the action of God is personified in that
that a person understands this action
and from understanding comes instant dissemination
still to everyone

it's enough for one to understand correctly
knowledge is instantly transmitted to everyone

so it turns out we are from the beginning

Well, some person ^{who} had this knowledge
but this man turns out to be God himself
i.e. initially the first man
who recreated himself
this is God

therefore we are already moving to the level
Well, ^{how} come it's still on the same level?
where is the self-created God
created exactly this form of his own
as a human form

and then the question arises
why did he create it if he ^{could} develop it further
this system of understanding
why exactly from this perspective ^{yes}
therefore he saw a favorable ^{yes}
Eternal development of people

i.e. He chose the only possible form
from the whole combination of events in essence
once He was not mistaken
so, ^{well}, it would seem like it would be elementary to do

and therefore ^{the} next question arises
why exactly this form
^{so}, for example, there is the shape of a person, the shape of the Earth, ^{yes}
or some molecular compounds
is the optimal ^{form}
from the point of view ^{of, for example, the} One God
and the Physical Body of the One God

and because human consciousness is structured this way
that it is continuously connected with the Consciousness of God

there is a level in human Consciousness
which is constantly connected with the Consciousness of God
in fact it is God Consciousness
but the initial level of creation of God Himself

here is the answer to the question
why in knowledge a person already had ^{well} knowledge
that this request exists ^{yes}
after all, the fact of existence is already
some information

if we want to formulate something
then we can formulate only that

that exists at least as a thought

and if we proceed from that
what does it mean this system is developing
only by the Will of God
for example there is Human Thinking

then it turns out that this is space
must first be created
then the idea should be realized

and so that I could move away
from such limitations of logical thinking
God showed that the Soul of man is Infinite
i.e. the Soul contains all the elements of both questions and answers
and in the Soul all the answers are actually contained
to the questions posed there, in general
questions asked or questions not asked

another answer to this question
from the point of view of logic even the Soul
that the Soul contains everything that a person, for example, cannot
to understand logically
but at the level of the Soul
a person solves all these issues

otherwise the balance of the world would be disturbed here
and even there, for example, the processes of gravity
might not have happened to the same extent
how does it happen for example yes now

based on this process we can say
what is the Soul of man
well, like some kind of legislative level of this World
defines some external events related to that
what if we assume that gravity needs to be reduced there, yes
is a teleportation effect there
to really reduce the weight of some cargo there
which stands on the scales

the easiest option
it's to take and exit the level
from the optical level of the human Soul
it has its own nature
so after studying you can determine
individually for each
what does this glow look like

and get in touch, well, with the Soul
i.e. with the level of internal Consciousness
with the fundamental structure of an object of some kind
which is standing on the scales

as soon as a person entered this system
then here it turns out that we have
very simple level of connections

what we can assume is that we can simply sound nature yes
how to model a sound system
just with your voice , for example, yes

and changing the structure of the voice
well, for example, even so that a person can mentally speak
slightly different vocal structure
i.e. you can mentally speak in different tones , for example

and introducing a structure different from the usual one
he can lift the object in this way
i.e. reduce weight

if we, for example , begin to study these Laws
well from the point of view of getting it out there
some malignant cell from the body

the simplest element
create for the immune system, for example, a level of that
that the immune system identifies this cell more quickly
consists in the fact that
that you just attach others to everything
well, including weight characteristics
this cell

and as if you are lighting it up
in front of your own immune system
and immediately there is recognition of destruction
of this cell

i.e. the mechanism from the point of view of yes
precisely the structures of my Teaching about God and man
leads to that
what we can do at the level of the Soul
identify and, as it were, implement the treatment structure
Well, it's not necessarily just treatment.
it can be management of any event
resurrection

if we are talking about resurrection
then the vibration level, for example , there are sound parameters
it may be connected with the opposite
that the sound needs to be set
not inside the system but there
and above the system
and then there happens, for example, a resurrection there
at this point

if we are talking about
well, at a point or there is an area of information
which is exactly what it is
producing some action

then we come to God again
and to the One God
and moreover having a Single Physical Body
because the Source is one

Human consciousness is structured in this way in action
especially in the action of Salvation
that the visualization is exactly what we see
happens in Consciousness
at the level of , well , a single signal in general

if we see for example at this point
resurrection
this means that we see the Action of the One God after all
i.e. the effect of the fact that He has a Single Physical Body

and it turns out that any event
here, in fact, God is born anyway
i.e. a person's desire for some action
and some event happens
this event is still sent by God
i.e. it actually creates yes

therefore human action
it is a constant dialogue with God
in this in this context

and so that for example this dialogue was
well productive and optimal there
the following development goals
you need to be able to listen to God then

the question arises
than listen then

here we come again
to the same original question

when a person formulated a request
before God for example
about His own creation
he also sent out requests
some kind of sound element of Perception
there is physical for example the Essence of God

therefore the man knew
than God hears
even when it was not yet created, it turns out

i.e. the personality of a person is so developed
that it even covers structures
to one's own Consciousness

and the structures are absolutely precise

if you ask a person there now, for example
where is for example the ear of God yes

then well, the most enlightened people can be
can view the information
and find a comparable level

and whoever can develop there according to my techniques
that's where you'll find this system

so it turns out that a person's personality
it is so multi-reserve developed
that when it was already created
he naturally knows where everything is

i.e. just for the whole
as if it were a level of reference of human Consciousness
or there is the direction of human Consciousness
fraction transfers
even a single fraction of human Consciousness
into the system before it was created
allows you to get absolutely clear
the whole mechanism as God created even
the level of this question

i.e. and know the very basics
level of God's work

because when we see the initial level
i.e. here is a house being built
We understand it, brick by brick
if it is already built
then complex communications have to be thought through

if we look at the direct level it is clear yes
Soul level
The soul sees clearly
there the process of Thinking is often not involved
because everything is clear there right away

The soul therefore always looks
through the initial level
where God just started creating

and when we then consider the process
so where did the man say

then that means he was talking
He was naturally not mistaken when he said it
at the very beginning of creating virtually everything yes

when he spoke here
Well, I expressed a request
then it turned out that naturally God was her
I perceived it unambiguously

hence
the level of dialogue with God is the most basic
this is the level of creation
at the initial level of all matter, I guess
as God intended the whole world
and how He wants it to develop

i.e. here in principle it is already clear
at the basic level it is already clear
as God wants

and here, well, several things arise
a somewhat paradoxical situation
nothing seems to have been created yet in the complex
and here everything is already clear yes
where is this knowledge located
well, like, build some kind of house
anyway, at least drawings are needed

and if only the processes have begun

for example, applying the first line
there is no drawing yet ^{Yes}
but it is already clear to the person where this knowledge is located

so a person has such a spiritual structure
interactions
Spirit
Souls
and God
where the initial level is actually, ^{well, sort of}
this is what we need to correlate with the line ^{yes}
this line it actually is
the level where a person begins to divide
Soul level
God level
and the level of man as such
^{well, that is, what a person does here}
God creates everything, ^{for example}

i.e. here is the primary level of division
i.e. the primary ^{impulse} of a person
i.e. your impulse
a man makes his first impulse
division and differentiation of the object

it turns out that the first impulse
he does it himself
what is special about it, what does it do on its own
he is absolutely free and he can
^{Well, basically,} make it any way you want

^{means} that when we consider the elements
absolutely no creativity ^{there}
Eternal development of humanity
then the primary impulse is
absolute free will of man

first impulse of separation
but it contains the entire database
i.e. a person has the right to choose
practically having
the whole version ^{of} the events of the development of the World
it makes some one impulse of primary division

and from the first dashed line he already knows
that there is one second third or tenth house
or any event

i.e. the person is in that system
that he has absolutely all knowledge
and from God's point of view

and from them he chooses something specifically of his own

i.e. a person is always completely free
from God's point of view he is always free
it's just moving in the structure
as if it were a personal choice all the time

and why, for example, did God give such a mechanism?
to a person
why well For example Well, it would seem easier to do
some restrictions there
that there are just no diseases there
and that's all

but it turns out that then we are talking
oh well, sort of an autonomous system
and that's exactly how it is when God rules
but God needs someone who is equal

and then it turns out that here is the principle of equality
or the principle of no loneliness yes
This principle is precisely pleasing to God
i.e. people must Eternally and Infinitely develop

i.e. well, there are more births there
to develop some territories, etc., etc.
it's kind of logically clear, yes
why can't it be destroyed there
especially social systems
this is where they come from
well, all at once the laws of life of a person in society

and when we want to apply these laws
in conditions of global destruction
possible
then here there is already unity with God
this is a vital human need

i.e. he must be able to unite with Him in this way
so that what he does does not destroy him
i.e. a person
It is impossible to destroy God

and it turns out that this is this unity

connected well on a spiritual basis
is quite capable of preventing
let's assume there's a nuclear explosion there
or even the beginning of a nuclear reaction

if we are talking about mechanical methods
i.e. investigative systems
for example, a person creates some kind of device there
which stops the start of a nuclear reaction there

in principle yes, of course this can be done
but then you can stop, for example, one reaction, yes
one bomb or ten won't explode

how much does a resource depend on a simple technical system
technical system is the same thing
what God is creating at this moment

and it turns out that the only way out for humanity
really
it's just to be like that so strong
as well as the Spirit of God
which can well overcome
anyone there nuclear explosion
because this is also a manifestation
coming from the freedom of a given person's personality
freedom that God gave

and now he will manage this freedom
naturally this is the level of unification of humanity
in terms of Spirituality
correct spiritual development

Well, that's to restore it there
global nuclear there chemical bacteriological
have it often enough
well, as if it hadn't even started
knowledge for

and to stop I mean
I think I should use it here
only here exactly Spiritual knowledge
really stop
and in Eternal development

for example we yes we created people there
some kind of chemical weapon, bacteriological or nuclear, yes
but as far as we know the outside world for example

what guarantees that there are no such things, for example, yes
more powerful systems there [...] a very large comet
Comets clearly exist

then so that humanity will forever develop
only unity with the original Creator, i.e. God
and with the Creator

for example, there the creator of technologies yes
there by a person or a group of people
who create these technologies of Eternal Development
can actually prevent
that a comet falls there.
i.e. to really ensure Eternal development
otherwise there would be no other way out

because we can assume
that humanity is so developed there
that any system is taken under control yes
but these can only be assumptions

i.e. the only fact of proof
that this is really so
is the spiritual development of man
develop it
Souls
Spirit
Consciousness

and therefore the God-pleasing and God-like level
where identification is actually with God
gives the opportunity to really know
that it will be so
that humanity will evolve forever
and there will be no destruction of this Eternal development

therefore humanity
generally speaking from the point of view of Spiritual knowledge
there is of course only one way
this is the union of God

be similar
in terms of the action of Eternal development
To God
know the mechanisms of its actions
act like this
so that a person could
Well, should I hear and see God?

if you hear
this is the initial level of development
as I said where else
well information status of the outside world
it is not yet fully manifested

then see this whole future

to see with the eyes
there with Spiritual vision for example
with the sight of the Soul
then it's the other way around where everything has already been created

and it turns out that when we hear something like yes
the question asked in words I mean
i.e. the request was formulated with the word

here I meant that the word was originally
that's why if we consider
there we assume the concept of "request" yes
then for a person this request was formulated
therefore it was formulated with the word

he didn't just point at it with his fingers
that's how to build it there

and therefore the word turns out to contain
the entire element of information
i.e. any sound form contains yes
the entire volume of information
therefore it is clear that even if we give
entry level
the whole volume is there anyway

the word contains the answer
God gives an answer immediately
the person already has it

and in vision
i.e. precisely at the Infinite level of development
when a person wants, for example, to look into the future
and see there, for example, the whole volume of events

then we have exactly that
that we see our physical body
in this case when we look
precisely for all future events

we can see the body
like the body of an absolutely healthy person
and at the same time the Soul has
Well, a completely harmonious development

i.e. it turns out to be enough
that only a person can practically see
all events of the future
and through ^{let's say} the light of these events
look at yourself
he should be absolutely healthy at this moment
and have a completely harmonious Soul

i.e. it turns out that ^{he} chose
some logical status for oneself
because as i said
God gives all systems of events
and the person chooses

then a person at external viewing
always chooses a healthy physical body
and ^{for example there is} harmony of the Soul

and therefore this is a natural position of a person

i.e. completely natural
when a person is ^{well}
he is harmoniously developing there forever
it turns out that this is his personal choice

and it turns out to be a person's personal choice
these are the events that are Eternal
in this context

and ^{well,} this particular position
I took it more as a position of action
i.e. the person looked and I put it like this
what if there is a rumor
and if there is sound ^{yes}
where there is vision

so vision i.e. when we see ^{yes} consciously see
this is health
this is Eternal development

Well, it may still sound like that to a certain extent.
as a comparison of phraseological ^{yes}
and level and level of action

i.e. and the effective level, so to speak

then here we see that if we take it as an axiom
that the whole material world
this is, well, a general manifestation of will
then in this manifestation of will
it turns out
and the Will of God is also united
with the will of man

i.e. it is enough to look from the outside ^{yes}
for everything
through all events
you will see yourself
but specifically yourself

here if all the events

if you don't take into account even one event
you can see some variable system
i.e. something , well, some other event
or just some part of the event

so it turns out that I keep asking the question
about ^{human} vision
equated, for example, to the sight of God

so now let's see
how the Physical Body of the One God sees
it is clear that the Physical Body of the One God
through all events
always sees a person
in a completely healthy state
and with harmony

i.e. the original vision of God
as a person
how God would like to perceive man
it's like this

hence the dialogue
namely man with God
consists in the fact that
to unite the vision of man
exactly ^{as if on} a trajectory according to the Law of God
and the natural vision of God

i.e. if a person there should ^{kind of} strain himself

i.e. he must insert it into the management plan
all events
i.e. to build a special administration
then for God it is natural

therefore the natural position of the World
when a person is healthy
has Eternal development
he is happy, everything is absolutely fine with him

and it turns out that this is the status of a person
this is what always creates a person
i.e. a person is designed this way

if you listen to yourself
then this position always exists in you

this is what God wants
i.e. natural normal healthy
Endless development there is happy yes
Well, in all good tones, it is a person
and it is clear that God naturally does not create bad things

hence
the ability to choose, for example, the right path
it means both hearing and seeing yes
but you still have to go and move there
to perform some actions

then all these, well, actual movements , yes
which are related to that
what actions you perform
this is interaction after all
with external Reality
there with the inner Reality

then you come to that
that you have a level
where the contact with God is very close
it's completely like contact on a physical level

and this is your original organization
where do you see that the physical body of a person for example yes
tightly contacts
with the Physical Body of God

and here, for example, the organization of a person takes place
including mutual organization

God and man
and this dense physical contact
this is also included
as one of the manifestations of the event plan
this is the whole external world

i.e. the more closely you contact, yes
with the Physical Body of God
in general, in principle, with the whole essence of God
then even more capacious and concentrated
events of the physical plane become
but at the same time they can, due to , like, strong contact , yes
may be distorted

i.e. too strong contact yes
too there strong will of a person
this is also a certain level of distortion
as if the optical phase of events as if here

and it turns out that when we look at events
due to the precision of contact
when everything is harmonious for a person, let's say it's simple and easy
and a person can, for example , compare himself to
precisely in terms of action at the level of Godlikeness

then it turns out there should be harmony here, yes
and the hearing of the Soul
and vision
and Perceptions
when harmony is that
what a person basically does right in his Soul

i.e. he does the right things
from the point of view
and God
and a person
and society
in general all natural phenomena

and this level of correctness, as if accuracy , in fact
this is the level of your personality
where is the person's personality
Well, she works on equal terms
with the Personality of God
in general, in fact , the matter of Eternal development

this is the level of , well, kind of, kind of equality
in terms of action at least

this is the level of accuracy
a level of precision that can be felt very clearly
have actually yes in oneself
as your internal level of development

and as a concrete practice for today's seminar
I suggest this level of accuracy
due to the technology of today's lecture
find it in yourself

this is the level of precision
this is the level of virtually absolute knowledge
i.e. the aspirations and realizations of the system of knowledge
and this is also the level of the Norm, generally speaking

i.e. by entering this level you can have
and the Health Standard
and the Norm of Events
virtually simultaneously

so i conclude the seminar for today

thank you for your attention
