

GRIGORY GRABOVOY
The Doctrine of Space
06.11.2003

Hello again
the topic of today's seminar
is my Teaching about the Cosmos

in this structure of the Teaching
I would like to consider first of all
that position of human Consciousness
which determines
the option of precisely the presence
in for example Perception of for example God
Lands

where a person looks at
outer space
as a structure of the presence of the Divine

i.e. here in the first place
the option is being considered
when a person looks at
external, for example, outer space
as a space co-present with God
One and only God

and any elements that are created
let's assume in this space
these are elements that God implements for example Yes
beyond human sight

and so when we look at
well, for example, the position of equality of all information objects
it turns out that a person also looks
must be present
in the processes of Divine action yes

it turns out that here there is precisely co-presence
it is first and foremost the human body
i.e. what is happening generally speaking
inside the human body

i.e. its elements of Thinking

his imagery of thinking
his actions in specific cases

it turns out that Space in this case
begins to influence affairs
through, in general, assistance with that
what does God do One God
in the structure of cosmic Reality

when do we begin to understand this situation
then any of our actions
First of all, it is determined by that
what we act on is in the structure
fairly specific fairly specific tasks
where our action is connected generally speaking
with the entire system of the Macrocosm

when we consider
it is precisely the question of the co-presence of the Creator
in this system

and then a purely practical element
is the accounting as if
external parameters of outer space
in their personal actions

for this, for example there you can consider it technologically
your Thinking
as an internal projection of the Cosmos
for example, into the physical body

i.e. if we consider the structure of thought
so what does this have to do with it
what is the thought that knows
i.e. a thought that perceives, for example yes other thoughts
and Thinking happens
in this interconnected form

then the element of Perception is that
that through Thinking we can build
let's assume your internal organ

Thinking is the construction of an organ
because Space is also this in general
like a workshop for the construction of matter yes
including the Earth
from the point of view of a kind of autonomous system

if you ask yourself the question
how is it built
any planetary system
then it is clear that there is some amount of matter
within such a concept as Space
and this matter forms some material systems

the same thing if we reflect
your Thinking from the Cosmos
and at the same time from God
We can build our organs with Thinking
with ordinary Thinking

it means that for that
let's assume to build a human larynx
reproduction system
words for example
as one of the particular consequences of the work of the larynx
is the reproduction of the word

then here it turns out
that we can quite well talk about that
that the larynx itself, for example
First of all, it is generally arranged in such a way
that any Thinking
any Thinking
connected with the larynx itself
because some thought structures
go into the word
in the word giving action and giving direction

we can also say that the Word of God
this is the understanding of the external and internal Cosmos
in interconnection
for example in the physical body of a person

for example God said "the body of man"
and then it turns out
that two Cosmoses united yes
outer space
And
The Cosmos of Human Thinking
well or there for example, the cosmological level of human thinking

then it turns out that the body is manifested here
as a unification at the same time synthesis
containing
The will of God

the will of outer space for example yes
the will of the internal manifestations of the person himself
and all this is manifested in concrete
in general, small human actions

for example, a person can go to the store
can drink water

and here we get the manifested ones
such macro- and in general microsystems
global systems of the Spiritual plane
and for example systems of a purely household level

it turns out that the household level
well, what is included in the definition, for example
implementation of a number of events
this is a level that is essentially how it is built
that the concentration of space, so to speak, of outer space
here it is implemented as an integral part
interacting
for the purpose of the person himself

if we want to implement for example
some elementary action
well from the point of view of the possibility of implementation
for example a fishing trip

then it turns out that firstly
from the point of view of knowledge about the Cosmos and about Eternal
development
for example, fish cannot be destroyed
then it turns out to be a fishing trip
tolerates quite a lot of structures
in a person's understanding of his actions
in relation to the Macrocosm

because in the Macrocosm
by the way, it's quite easy to admit
what is a non-destruct system
and everyone perceives them quite visually

i.e. there are permanently located
at a certain distance
moon planets stars
and nothing is destroyed between them

those. structure of space
this is also the knowledge of the non-destructive system

and when a person, for example, begins his development
let's assume to the side there is fishing there
i.e. he starts preparing some accessories
and if he fishes there and releases fish
as is customary in some farms, it means artificial type

then in principle the road develops much faster for him
and external parameters, combination of planets, etc.
become more optimal
to its action because it does not destroy

if he goes for example for a fishing option
like fishing
then he overcomes the resistance of the Macrocosm
where the combinations of planets may not be right

and it turns out that there are days
when a person seems to be already in a baited place
generally speaking, it doesn't catch fish

i.e. in this case they act
elements of the protective functions of the Macrocosm
and internal level
when a person allows
the presence of equilibrium i.e. peace-loving
precisely the peaceful state of the whole Reality

and it turns out like this, using the example of fishing
You can explore this one quite well
in general, a subtle process of human interaction
in action
in relation to its goal
and outer space

it turns out based on this
we can influence the combinations of planetary action
if we act peacefully

i.e. for example there are astrological elements of Reality
there are some other communication systems, let's assume there are druids and so
on.
but if we act peacefully
act in a socially constructive manner
then these systems can be influenced

because that's what I started with
that the planets are exactly located

that means in a way that is favorable to a person
if he's not going to destroy the fish
and for example, release her there after he caught her
or maybe just observe yes
through there camera lens

i.e. the situation here is related
with our personal events
she's about the same
Generally speaking, of course, not one to one
because in ordinary events
not only participate for example yes fish and man
but there are also other combinations of some situations involved

but the thing is that when we talk
" let's assume fish is involved"
We can also consider it there
process of participation of the Macrocosm
and therefore there may be some implicit
participation of all people

well the principle of connection with any area of information

it turns out that even in a vacuum
when we make a movement, for example
in relation to
to the level of our next development, let's say
i.e. we overcome by the Spirit
let's assume a vacuum space
then we can thus give birth to matter here

here is the simplest control
related to the concept of Space

Spiritual optics are being output
on the level of achievement there from one star to another
or from bodies, for example, to the Milky Way
and back-reflected concentration
output into the structure suppose there is an organ there
which needs to be restored yes
or cells that need to be restored

very simple technological mechanism
related to that
that the movement of the Spirit
gives birth to concrete matter

it turns out the same way

that the space of Spiritual development of the Creator
which set certain distances yes
some scope
this is matter

i.e. visual scope
i.e. here is the visual Macrosystem
it is concentrated but normalized matter

why were temples often built large
so that they would standardize, for example Yes
local health of a specific person
which is small
well in relation to the physical size of the temple

the same principle is at work here
external free space
this is a normalized one having a canonical
in relation to the Creator
the path of development of a specific person

so here is the canonism of human development
it is a combination of his personal goals
a combination of certain physical quantities
that surround this person
and at the same time when a person
can still recognize them
in terms of its Eternal development

here is the element of knowledge
This is the harmony that a person feels
at the moment of presence
for example in this place at this time

and when he understands
that he is present here because
which means not only because of that
that there are some circumstances
or the planets just aligned somehow
or somehow the action of the Cosmos goes
or his internal resources means they talk about it
that he should be present here
or at this time

but also because God sees his presence
and he can come into living contact with God
exactly when he wants

when does he begin to understand this
then any other systems

Well in general even aggressive

in relation to, for example, the manifestation of God
type

is an atheistic plan there
become peace-loving

i.e. the awareness of the living God

awareness of living Eternity

located in general visually

as if in the sphere of information

inside the information of the living God

and at the same time outside of Him

this is a system of global peace

i.e. the global level of equivalence

in terms of the harmony of development of this personality

when he feels it

this feeling is enough for him

to know that life is Eternal

and he develops knowledge

so knowledge is an element of universal harmony

including private knowledge of a specific person

and if, for example, he tries to use knowledge there

in an aggressive development scenario there

then such knowledge has, in general, a finite nature

from the point of view of development logic

to aggressive manifestation

as soon as an aggressive manifestation occurred

further knowledge is not needed yes

i.e. they were, for example, implemented into an aggressive system

it turns out that from the point of view of such Macroprocesses

limited knowledge structure

is not an organic system in general

in relation to the Macrosystem

because any Macrosystem

has an Infinite development function

therefore knowledge of a non-aggressive type

are precisely harmonious

in relation to

to the entire external surrounding world

and then it turns out he sees God
when he is not aggressive
and uses knowledge non-aggressively
I mean man

for example , you come to this logically
it turns out that for that, for example
to perform the healing management
or is there some kind of situational control?
not needed under almost any circumstances
here put the element of separation of the system

i.e. no need to put
information sharing element
because we come
to the unification of the Creator's actions
in a living human body

here in the living human body
The Creator acts in a completely unified manner
i.e. any human impulse
this is unified
i.e. the same action of the Creator
for example to universal life
including to the life of this person

and therefore knowledge turns out to be inseparable here

and inseparable knowledge
this is the knowledge of the Creator God the One

hence
non-aggressive leading to creation to Eternal life
knowledge
this is the knowledge of God himself
transmitted one way or another to a person
or with birth
or there in the cellular system
or there in his actions

and it turns out
that any human cellular function, for example,
his actions are concrete
very synchronized
in terms of God's idea of Eternal development
this peaceful knowledge
knowledge of life

knowledge of the presence of God
and knowledge of His living, for example, yes manifestations

precisely in terms of a living personality
in terms of comprehensiveness, for example, yes, informative
but also a living personality

when the Physical Body of the One God for example
this is already the deepest status of knowledge

while the previous status
this is His Life

First the Life of God is visible
and then the Image of God itself arises

it turns out
Life is the primary level
before creating the form

it is logically clear what we have first of all
Life factor
and then we talk about it
what's there let's assume Life has some form
well even if we consider water there

that means the environment that contains Life yes
and inside this water
there are different types of animals

it turns out that we can talk about that
that this is precisely the structure of Life
similar to how we approach
to Perception
Physical Body of the One God
we see that life is built quite multifactorially
in terms of its forms

and here is the crystallization of the form itself
this is the occupation of the object itself that bears the form
in this structure it becomes clear

because for example Macrocosm
which projects all its signals
for example, there in the physical body of a person
and from a person comes the development of the structure
for example, to external systems

then here you can see that Space
naturally it also projects all signals ^{yes}
to any other information object
but he projects differently
through the investigative work of the One God

i.e. if the central level of work
this is the human body
then the investigative level
this is what allows ^{to be formed}
to another information object
^{for example there} through a vacuum
the physical body of the Moon ^{or Mars , etc.} appears .

you can follow it here
a very specific trajectory of the work of the Cosmos

why is that when we consider
elements of outer space
an internal order of action is being established, ^{as it were}

because in relation to the external Macrocosm
which in principle is quite a long time
static

and the collective Consciousness has accumulated knowledge
what ^{does it mean} outer space ^{seems to be} practically unchanged
we have a very fixed system
in relation to the Spirit of man to his development
which regulates, ^{as it were,} connections
actions
and fixed systems

i.e. a person gets used to it
that there is a certain order of things
which is completely tough
^{well or there} which allows
and use
like for ^{example} in navigation ^{yes} they used it
ancient ones ^{for example there there} the North Star, etc.

i.e. if we consider these positions
as the position of the Spirit of man
then it turns out that the Spirit developed an external system
for fixation
^{well,} some of my internal material actions
and he developed it precisely with the Macro-level plan

to have means it turns out logically
as if an algorithm of specific actions
allowing a person
live and develop favorably
a very large array of external information is needed
and of an optical type
as if some kind of Macrospace
which regulates human action

if you think about it, it would be like
in the physical nature of this action yes
from the point of view of, for example, Consciousness
then here it turns out that we get
in general as if the situation of the following type
that the mass of the outer space has a certain
a certain level of action
on the specific matter of man

and let's assume if we are considering
suppose even the Internet space yes
and the structure of human thinking
within this space

it turns out that for that
for example, to do some action on
as if aimed at implementation
here is the stated impulse in this space

let's assume there is some goal
and there is a certain task

and as if within the framework of this goal
and this task
recorded in general cleanly
well, some kind of formal value in the form of words

then what part of the Cosmos
applies to this level
already reproduced by the Thinking of man
text

here you can calculate quite accurately
how effectively can we consider for example
let's assume the distribution of this text
if we direct it correctly
elements of outer space
on this text

i.e. management consists of
what we highlight
in the structure of the visualized, for example, there by physical vision
spaces
some part of the starry sky, let's say
and we concentrate with Consciousness
on this text

the text begins to be realized more intensively
if we know the Laws of interaction
this text for example Yes
with the ultimate goal of Macrosalvation, let's assume

to save everyone
it is necessary to interact
with God alone

therefore the purpose of management
is
lead to the One God
this structure
looking at outer space
how exactly is the Action of God and man
from the point of view of the spiritual development of man

i.e. connect the Spirit of man
and at the same time consider the Action of God

in this case
if for example the action is not complicated
not through the system reproduced yes
in the Internet space
and let's assume we can act
in relation to just oneself
to your goals and objectives

then everything is the same here
just unlike the Internet space
we will introduce ourselves then
in relation to the target action
and thus we achieve the Norm of the Event

but for God
The norm of human life
this is one of the goals of God himself

when a person lives normally

and he doesn't have it

For example there are some extreme negative events there
for God creates a happy life
in a healthy body
and in the Eternal Body

hence the normalization of events
This is also God's task at the same time

so it turns out that we
when we strive to do it
and with improvement of events for everyone
we carry out as a task for everyone
but God's task
as well as your own

therefore my management
from the point of view of event regulation
according to the section of the Doctrine of the Cosmos
this is an action that immediately unites
and the task of God and man
i.e. it is a harmonious action

and this level of external harmony
it turns out that it shows
that he is not only there in this section of the Teaching
and in any other section

standardization action
through Salvation of all
it is always a God-pleasing action
included in the task of the One God
where there is, then there is precisely the One Body of the Physical God

therefore this is the Body
can very easily transfer the control structure
to others

if we consider for example
according to what laws does it function, for example?
The Physical Body of the One God on Earth
then we get
that these Laws are reflected very simply
in Human Thinking
means containing a spiritual and mental component
i.e. precisely the human component

when a person can act humanely

determine for example the location
is no other information object there
but at the same time contact with, for example , the One God

i.e. in this case
human action must be indistinguishable yes
from the Action of God, for example

then man and God
It turns out that they are acting again
in the goal for example there is knowledge

i.e. if a person needs to develop clairvoyance
then it should not differ from that
does God perceive this event
in the goal there for example Macroorganization of space

but the easiest way to learn this is
it's just something to consider
as such the Macrospace itself
principles of its construction
for example, at this time yes
in front of this person

and then we actually get
the structure of the implementation of this Macrospace
in the final action of man

and here the transition to the microworld occurs
the concept of "final action"
this is what is meant
right there let's say I ran my hand
action completed
and the next action is already another action
the concept of "finiteness" is an intermediate action
I entered it here

and when we consider, for example,
the structure of outer space
as a structure of intermediate actions
some systems
then it turns out that having value
and the Infinity of Development
somewhere these actions must accumulate

i.e. there must be information about that somewhere
it means that these actions happened
in a single integral personality yes

or reproduced them there for example, the One God
or they were reproduced by a person

then it turns out that all actions
c-accumulated as a specific substance
this is a microcosm

i.e. transition to the microworld
it's like an archiving or supercompacting system
actually external systems of actions
and external manifestations, for example, physical Reality

i.e. compaction of the substance
physical matter
this is a necessary component for that
so that there is a certain order
in the structure of the development of the Infinite, for example

I started with the fact that Space
this is one of the forms of a generally defined order
which means according to certain canons
allows you to create, for example,
certain systems of system management

and it turns out that this transition into the microworld
this is a manifestation of the static Cosmos
but in action
and at the same time through a person, for example

and when we consider such a position
it turns out that all external action
i.e. the entire external Macrocosm
practically manifested in human action
although it seems to be static
and therefore, from the point of view of analysis, it is manifested in the
microworld

and therefore a person
this is a connection
like a microcosm
and the macrocosm
in terms of Spiritual knowledge
in terms of physical knowledge
and in terms of the development of the structure of Reality

that which relates to the manifestation of True life
that which contains precisely the presence of the One God
at the moment you want it

and when you come to this
you see that your life is endless
because it already is
i.e. you see it as ordinary Reality
which in general, well, if that's the case
it is not in the structure of the analysis for example
i.e. it is evident in essence
because that's how it is

and that's when you come to this
then faith arises
which is your faith
precisely into the structure of harmonious Reality
because you see it

for example you can see the horizon
there Well, there's some field and wheat is growing.
you see it
but because you see
so you don't have the concept of "to believe" or "not to believe"
because that's how it is yes

this is what I'm talking about
it's exactly the same condition
when you see
and faith means what exists
it's more like other people's faith
who see you in this state
and you are here

and here is where there is a difference
between the control level
when you are in control yes
and the level of external control for example Yes
when others are watching you suppose

That's why I always try to focus on that
what a person would like to implement himself
control system
and achieved personal results

because then it is in the system of action
Well how it goes there , so to speak
there is a simulated car
he leads it himself
and he gets the result

at that moment when
if he is, for example, just a person watching from the side
then he can see billions there
or there is an infinite number of results
but if he didn't do it himself , for example
then he can of course gain experience yes
he can mean this somehow, as if to use
in the structure of one's own experience

but at the same time it turns out that it is still there
outside the control system
but works more as an analyst
through the system there and in between
as if an intermediate level of Consciousness
here are the fractions of analytical Consciousness

and the fraction of analytical Consciousness
this is, as it were, the internal boundary of Thinking
i.e. it is , as it were, a borderline area of Thinking
which is not part of the structure of the governing Reality

that's why i always advise
It is up to the individual to make personal management
i.e. to be in this system of Reality
which is quite simple
i.e. to be in the control system of Reality
allows you to make a combination
outer space
and the space of human presence in general

i.e. if we are here
and for example we can make control there
that we just imagine
that there is outer space around
then our place becomes very clearly defined

there are two levels
outer space
and for example we are here

if we set the task of finding ourselves
in the structure of some house
then first we analyze the mass of houses of countries there , etc., etc.

if we ask the question
locate
in relation to the Earth
then we get the Infinite status of our presence

because the earth is practically round ^{yes}
spheroidal
and find the structure of your presence
in relation to the Earth
here in the logical phase of Consciousness
it turns out this is a problem of finding
^{as if} control points in a spheroidal system
with equal structures of the sphere's surface

i.e. they are approximately the same
if we abstract of course
from the concept of "geographic coordinates", etc.

therefore for Consciousness
we are on the Infinite magnitude
provided that
i.e. on Earth as an Infinite quantity

and provided that outer space
this is the structure that defines the coordinate

and our movement on Earth
as a system of movement
is registered as a structure precisely coordinate

so in due time
here in the work "Applied structures of the creating area of information"
I entered this parameter
what is the move
this is also a coordinate that immediately determines the location

when we look at outer space
^{as in general} for a certain faction
more ^{like} a Spiritual phase of Consciousness
Infinite magnitude
and we define ourselves as being on an Infinite magnitude

it turns out that we have such a level
what is Infinite quantity
contains ^{means} for one level of Perception
seemingly finite value
and for the Spiritual Infinite
Earth

why for the Spirit
The Earth is an Infinite quantity

because the Spiritual level
Well, in fact, he knows no boundaries anywhere
if it fits with the final value
he kind of does it in his Perception
Infinite
The spirit knows
according to the parameters of their own development

why let's assume for example Well, if you consider it
any opinions on the movements of astronauts there
to other galaxies
then first of all the Spirit of man remains on Earth yes For example

or civilization grows there
at some specific point
planet for example yes place

because the Spiritual level makes Infinite
the status of its first material development

if man evolved on Earth
then the status of Infinity
pledged
in the form of Spiritual development
in Infinite status

it turns out that the spiritual form is yes
spiritualized Earth
human
this is also the Action of God
God wanted to spiritualize the Earth
as if in a general sense

and here the person, being on it, already spiritualizes it
in principle, he really does create
works of art culture
Immortal Eternals including

and it turns out that when we, for example,
we have such a structure in our Consciousness
when the final perceived by vision yes
or from outer space
from satellite
from a spaceship
is Infinite for the Spiritual level
real content of the process

then we see that any finite system

Well For example there is a visual end form

for example the shape of a person has an infinite structure in future development

i.e. we come to the conclusion that that our future development is truly infinite and we come to this, generally speaking, logically

once we came to this logically then it turns out that Space who sent yes in this case structure of Thinking I based my analysis on it namely outer space i.e. the outer Cosmos which is visible to the eyes

he played a leading role in the structure for example there is Infinite development of man

and it's logically clear a person understands what a large space is so it can be mastered in the case of Infinite development

for example, a person set a task there is a child in childhood that wants to master space so that he can solve this problem he must live forever then logically he can master this task

and this is our task gives birth generally speaking, and the technology of their implementation

Well there is a flight there into outer space yes extension after all, a problem of this nature arose in science what people who are recruiting a large amount of knowledge they should, for example, preferably , well, so that further continued to work in this area

i.e. the problem of increasing life This is also a problem of society the problem of technogenesis of society

it turns out that over time

increasing complexity of technical systems
should lead to that
that man will then be forced to live forever
to cope at all
with a growing system
technogenic, as it were, external control

if we for example so we set the task
cosmic and space
as an external, not even man-made system
which means puts in the process of Thinking
this is the Infinite development of man

implementation of even this level in the form of an algorithm
in the form of some Laws of consequences of properties

it turns out that when we put
the question of technogenesis of society
then such systems are quite possible
which can be controlled
at the level of logic by that person
which developed
there for example there for millions of years

but what if, for example, he disables system management
the system begins to be uncontrollable

also from the point of view of the Creator of the One God
the entire external system is always controlled
because God is Eternal

and then it turns out
any super complex system
She is subject to His control

and from here the next level arises
Spiritual plane level
means in the Perception of space

The spirit perceives space in this way
what it really is

not only for example naturally
in the optical range
but also for the elements of the optical level
realization of this space

if we want to understand

what is ^{behind} the visible level
what can be seen, ^{for example,} through a telescope

then it is enough to make a simple one ^{let's say so}
at the procedural technological level
a system for obtaining such knowledge

the optical structure of the Soul is necessary
output to a super-remote system
i.e. for the visual level of outer space

i.e. consider that information
which is located behind the visual level
beyond the optical level
this is the information of the Soul

i.e. Souls
Our soul shines from there
in the form of, ^{for example,} the glow of spheres

first visual level
i.e. the first wave of images from space
this is the Spiritual level

i.e. another optical
more silvery optics more diffuse sparse
more dynamic
this is the Spirit

i.e. the first wave
this is the element of Spirit

and it turns out that between the Soul and the Spirit
is located almost all the space
which you want ^{for example} scan there

so this is the best level
in this technology of development of clairvoyance of the manager
this is to set your task
as close to yourself as possible
and at the same time just for this task
look with your Consciousness

^{for example} you go to the store
you are doing some kind of production work
so put it after fixing
two components
Soul and Spirit at this level

set the task closer to yourself
i.e. closer to the physical body
but not entering the body
then you will see all the processes very clearly
in their linear relationship

i.e. for example a person came
to some one place
here right down to the seconds of time yes
another one came out, etc.

and the ability to manage
you have it already set to the system level
because you made it Macro level
all external systems of space

i.e. Soul
that which is beyond the Perception of the physical yes
that which is beyond physical sight
events
for example you got into this event
i.e. came to a business meeting
but there are external connections
that exist outside of the given event
all connections of the world

the same action is done by the Soul

your physical actions
this is the Spirit that is manifested in the physical body
at the final level
precisely in the shape of the body

then it turns out that you built a structure
which is exactly close
and generally speaking in this case
it exactly matches that
how do you know exactly the One Body
And so what does it mean containing
all aspects physical Spiritual aspects Soul
namely the One Body of God

when you, for example, start comparing here
then it turns out that your action
in universal interconnection
Space
You
microsystem

this is the knowledge of God

i.e. there is knowledge of His Essence
and generally speaking the desire for Him
in terms of Eternal development

it turns out that in a logical way
I brought it about
that our every action
this is the knowledge of God
knowing Him means connection with us
knowledge of how God gives to us
and what does He offer us, for example?

if, for example, there is information of this kind
what God regulates yes
some positions in terms of space rigidity

then there is freedom of choice
because we can influence that
what is in such and such action
combination of planets as I said
may be favorable for us
because we are doing the right thing

and in this regard a person does not depend then
from position for example yes planets
from from a combination of some events
he can live forever
because it controls the planetary data system
but already on a different level

let them be firmly fixed
but it can go into the system for example external
i.e. outside the optical space

just like if we want
To go beyond the structure of the Soul with consciousness
which is at this level of management
located
beyond the optical level of Perception
then we will see
what does God do for our Consciousness
from the point of view of our Consciousness

here we can see God
very specifically, let 's say it to your face
and see

where He goes and what He does

when, for example, you already leave with Consciousness
to that level

as if outside of physical Reality

although there may well be a physical Reality there

then you understand that Consciousness has
its any even initial function
often Infinite property and Infinite development

because it is precisely in the structure of my Teaching about the Cosmos
it is clear that there is a phase of Consciousness
which absolutely does not need to be developed
She is originally Divinely developed

here is the level of radiance, for example, of the halo of saints, let's assume
also contains the phase immediately initially
Divinely developed Consciousness

that's what it was, yes, the department was there initially
saints

from those people for example

who didn't want to do it there

own development for example

so that people would be engaged in their own development
the level of action of the Consciousness of these people
placed in such a framework
that they still come to the level of fact
namely the Divine level of Consciousness in general
i.e. Divine can be the class of so to speak Consciousness
Divine manifestation of one's own Consciousness

i.e. they find that fragment of Consciousness
which they have from God
and which, generally speaking, then develop
absolutely not necessary

for example, a person looked at outer space

he sees this space

he already has this point of view yes

but he doesn't need to explain

what yes the space is so big

that you can't reach the star with your hand, etc.

He already has this Consciousness.

and it turns out that a person has

entrance to cosmic consciousness
exists originally by nature
from God
because he is simply a man of all things

but if we consider
for example Animal Perception
the animal also sees this structure
such as outer space

another question is how does the animal see yes
for example, let's consider how a wolf sees a predator there

then there is often an opinion that there are wolves there let's assume
howl at an outer space body
i.e. they actually raise their heads up
but do they perceive, for example, the Moon itself ? Yes
or do not perceive

this is a question that if you approach it clairvoyantly, for example
do an analysis
then yes they perceive
i.e. they perceive the external body

but the question is what is the differentiation of this object
they perceive it
how is the structure well let's assume there is a roll of some external body
and perhaps this roll will be too big
to possibly interfere with the wolf's life activity

i.e. if the Moon is increasing
you never know, what if it falls on them, for example?

i.e. here there exists an aspect of such a Perception
and by means of vibration systems
they are really trying
so, well, there, especially uniting in flocks, yes
to move away the structure means to approach this body

it turns out that initially in animals
level set
mandatory management of the external system
any moreover

if a person understands
that a star won't just fall on him there
as if for animals
This is part of the instinctive control system

well, as if initially given

and here we get the level of the Divine

Well so let's say Consciousness of Eternal development
it exists

although it is an aggressive animal

how to make sure that the animal is not aggressive

For example there is often a dog's howl interrupted yes

it means because the structure means showing

Well, it's certain that this is not so

that for example some external system of a cosmic body

she won't fall on the wolf

or some misfortune will not happen there

then for this all that is needed is this

so that the dog is like

Well, in ancient times it was considered there in the form of all sorts of signs
that the dog should stop howling

as soon as the howl stops there let's assume there at the right time

example, within five seconds five minutes

then it is considered that means misfortune does not happen

more than five minutes

something needs to be done

so that, let's assume, it didn't happen

i.e. some additional actions

or analyze there

where could it come from, etc.

those. here is the interaction system

it turns out initially as if this

in the form of that level of the mind of Consciousness

so and what is that level

which immediately reacts yes through the animal world

distinguishes a person in that regard

that a person acts immediately with Thinking

originally the Divine level of man

exactly in the Image and Likeness

that a person can act with his own body

body

this is the presence of a person

his thoughts

in all phases

and not only in the phase there let's say Divinely given yes

initial level
in all structures of Consciousness

i.e. in fact a person can
it is possible to project a physical body
there saturated with oxygen
some structure
essentially into any structure of Reality
if he knows this technology

Well for example, if the principles of teleportation are known there
but for teleportation in principle it makes no difference
where does a person teleport
it turns out that in the element of teleportation
includes the strongest oxygen saturation
external space
as the first element of breathing

man reproduces himself
a large amount of oxygen
i.e. all functions are enabled there
autonomous human habitation in that environment
where he seems to teleport at the first moment

and another question
what if for example he teleported somewhere
it would seem that this is not the right place
and will there be enough space and vacuum oxygen there?
then there is another property in fact
in outer space
transition of vacuum to oxygen level

i.e. the vacuum begins to become oxygen
only from elements of teleportation property

if we throw
there is no easy way to get there spaceship
and we throw it away, let's say, by using
teleportation mechanism

i.e. the manifestation of a person in any environment, yes
teleportation mechanism according to the universal plan
this is a manifestation in any environment

then the Cosmos begins
build a movement structure

i.e. spaceship

then it can move almost continuously
let's assume discretely

what is the difference between discrete speech i.e. intermittent speech
from speech, for example, constant

the fact that the speech is intermittent
may contain in principle the same system of knowledge
but more discretely yes
those. the meaning of knowledge does not decrease from this

it turns out that God also created Reality
what discrete systems contain
same functions
the same properties
that and continuous systems

i.e. the vacuum contains the same functions and the same properties
which any system manifested on Earth contains
there are plants, animals, and people, for example

and the only difference with a person is that
that man is made and created
in the Image and Likeness of God

it turns out that we
studying outer space for example
we can say for sure
what if we consider for example
process for example Eternal development
as a process of interaction
with outer space
then in outer space almost completely
there is the whole arsenal of Infinite development

i.e. if we want for example
develop
his presence there with the spaceship there
or without a spaceship
somewhere
into some kind of spatial structure
then it is quite possible to proceed with the research
namely the level of presence of these elements
in Space
Well, it's like a legislative level

another applied level, for example, human development
well, like in a natural habitat

taking into account outer space
it is a constant harmonious combination
Space
awareness means presence in space
all objects of Reality
understanding what is behind the optical Reality
there is another Infinite phase
and she crosses over
into the structure of human thinking

if you think about it
if a person starts to think for example
that there is external space
there is some more space further on, etc., etc.
then over time he comes to that
that he begins to see how he thinks

i.e. when he leaves for that
that space is Infinite
he sees very clearly how he thinks

then it's very simple
can separate his Thinking
from the Thinking of another person

he can very well just
as if in general, structure your events
and connect them harmoniously
with any other events

i.e. it is a system of regulation
precision system in connections
and the system is, in general, completely precise control

This concludes today's seminar.

thank you for your attention
