

GRIGORY GRABOVOY
The Teaching of Eternal Life
04.08.2003

Hello again
The topic of today's seminar
The Teaching of Grigori Grabovoi about Eternal Life

in this topic I talk about that
how the technology of Eternal Life
spread
for almost any series of events

in this case the events are implied to be those
what are you doing management
both from the point of view
technologies of your health
and from the management point of view
by generally speaking almost instant access
to any point in space-time

and also in this way you consider the process
what are you looking at Reality
as a Reality that is simultaneously
and here
and at any other point

i.e. acting here you simultaneously
spread your control
to any point in space-time

therefore the concept of Eternity
here it means
quite a personal character in management

because for the individual
Eternity is realized in the Spiritual plane.
as an act of personality
Here
and widespread
on all information objects

and when I talked about technology
means to manage your health

then first of all I meant
that the concept of "health" also includes, naturally
event sequence management
as distant event systems
as well as structures of approximate Reality

and in this regard, when we do management
according to my already Teaching about Eternal Life
we also consider the spectrum of events
actually forms
every next step of life
every next element of life
in combination with all the phenomena of practical life
and also all phenomena
from the point of view of the Infinite development of life

therefore this Teaching this structure of the Teaching
this is target management
aimed at ensuring
parameters of Eternal life

i.e. this is a real creation system
external control
real structure of interaction
personalities
with the ^{actual} control system
as their personal tasks
and ^{let's say the tasks} of the external world

so first of all
here I consider in this structure of the Teaching
I am considering the section of personal relations
to management

i.e. you see management as your own goal

i.e. the main thing at this level is
formulate your goal in this way
so that you have manager access
to every point in space-time
due to the fact that you are a personal goal
you are forming
in interaction
with all external Reality
which also exists Eternally

and in connection with this the concept of Eternal life
Here we consider first of all

How's life?
in the development of any information object
towards Eternity

that's why it's so simple, for example
Well, it would seem that in everyday understanding the process
as a treatment for the disease

in this case it is a process
aimed at understanding interaction
your personality
with the entire external environment
as well as the internal system of your development

and thus
This reasoning must be considered
in your control
that you interact as if expanding
from itself the whole space of events

and it also turns out that you are expanding time too
i.e. you give time
practically event-driven aspect in management

and in connection with this in my Teaching about Eternal Life
I am looking at Macroplast
here is what concerns the level of Salvation of all
as the level of development of the time interval
in action

i.e. each element of time
personal time of a person
carries the element of Eternal development

and from the point of view of the spirituality of this phenomenon
for example if we consider
The Physical Body of the One God
here the concept of "time" is compressed for Him
to the level of space
which exists outside of time

The Physical Body of the One God
exists outside of time

so it turns out that time management
this is an ultra-high concentration of matter
for example, physical matter
Spiritual

and in general, for example, management
we can say that it is the management of the Soul
this property characterizes the state of the Soul

there is such a condition
which is called the management of the Soul
and this is a sign of Eternity

i.e. any control of the Soul
this is the Eternal characteristic

therefore the applied aspect of this
Well, it is precisely this management that is contained in that
what do you mean you are considering management
as an action of Eternity
and what's more, such an action that is directed
towards you

when you look
precisely in the logical phase of Consciousness
that this action is an action
well, as if it were extended to all phenomena of the World

then you see that if we look at
there is a distant object of Reality
let's assume there is a star or some distant event there
or an event that you remember
i.e. put them in one row
then you get
the outer contour of one's own body

i.e. specifically taking a different principle of events
and extending this principle to himself
you see that the outer contour of your body
this is something that is inextricably linked
with those phenomena
on which, for example, you, well, basically put
let's assume some kind of control system
they bet on them

and this control system is like this
what do you see what phenomena
are quite inextricably linked with you

i.e. the meaning of this control is that
that you practically do not share
myself
and all outer space

i.e. you do it like this
that almost all outer space
it kind of grows from you
is some distant star ^{there}
she instantly appears here
at ^{the junction} of your body and the star itself

and when you start to enter
into this control space
then you see that any series of phenomena
^{for example, concerning you as well}
there are some diseases there

this is something you can easily withdraw
beyond the limits of precisely this kind of close contact
with Eternity ^{so to speak}

i.e. if you are in very close contact
with Eternity ^{yes}
with Eternal development
then naturally some element
which reduces this level

Well ^{let's assume} we are dealing with that
that we need to remove the virus ^{there}
or some disease from the body

then it's enough to enter
^{as if} in the vibrational level of this state
and any other phenomena are displaced

because in Eternal development
it turns out there shouldn't be any room for diseases there
which bring the organism ^{there let's assume} to exhaustion
or some more problematic conditions

therefore interaction
with the system of Eternal development
it is also, first of all, a technology
which acts immediately
as soon as you started working

so from the point of view of this section
my Teaching about Eternal Life
control starts instantly
from the moment of still ^{generally} pre-controlling action

i.e. you can just log in as if in Spiritual resonance
with the technology of this level
and you get control
immediately directed towards Eternal development

when we consider
as a supporting structure, i.e. a platform
on which Eternity is located
the structure of Love
Love for the World
God's Love for the World
to the development of the World

we see that Eternity
actually concentrated Love
expressed as if by all elements of Reality

i.e. if all elements of Reality
their goal of Eternal development will be multiplied , as it were
on the general, well, sort of ideological goal of Eternal development
all at once
then we get that Eternity is a concentration

well, that is, it looks a bit formalized
but really

if we assume we move on to simple concepts there
such as "weight" "density" "concentration"
then it turns out that logically it is very easy to consider
in the logic diagram

as soon as we cross over
from the logical scheme to the Spiritual
then we see that Love is also Eternal
i.e. we see the level of Eternity
aimed at Love for every person

i.e. Creator-God One God
He created Himself like this
that His expression of Love
to every person
this is the Eternal expression
He doesn't make any one-time movements at all.
i.e. God always makes exactly that design
which exists forever

because He is outside of time
and in fact He can be located outside of space

then He moves on to the Spiritual aspect of management

therefore the Soul of man
in the section specifically in my Teaching about Eternal Life
This is the control system located
like out of space
and beyond time

i.e. we have practically the level
which characterizes the entire system
as a system, well, in general it's ideal
in the target aspect it is finished
in the target for a given person
why personality is more personified with the Soul

but from the point of view of Eternal development
the task of the Soul
make the goal coincide
with the way the One God does
i.e. Eternal God
He has both a Physical Body and Eternal Development

that's why it turns out
that in order to manage events
in this section and in this structure of my Teaching

I show that well the simplest
and elementary events in life
which a person has

here it is , for example
let's assume in a normal system
there are some optical connections there
he is looking at something and doing something

and any element of this process
must be the one
that every action guides a person
and actually gives him technology
Eternal development of Eternal life

when we look at the process
well, purely subjectively , for example
let's assume a person makes some movements
he considers it as a person
some management processes
then nothing stops him from being Eternal

i.e. a person in no way implies
that he is there as an entity and as a person
this is the final phenomenon
i.e. in principle, this is not inherent in a person

and when you consider
and is this supposedly included in the same
well let's assume there is an object, an animal, a dog, a tree
then it is clear that this is not there either

because the tree is growing
the fact of the tree says that it grows
there is no information that the tree is not growing now

and in this aspect
present time
this is a sign of manifested Eternity
in relation to objects
which are expressed in a given tense

i.e. at this time one can only say
what if there is a dry branch somewhere nearby
then theoretically this tree can develop
let's assume that the branch will dry up

but this is an extrapolation of human thinking
based on some previous facts

if we do this
that we will consider the position well there Thinking in this way
that we do not think in this area
and we think
in the area of the Physical Body of the One God

then it turns out that this tree
it can be undestroyed and grow forever

the same applies
in relation to a person
to any information object

if we transfer such a technology of Thinking
for example, there is a bomb there
let's say a bomb that can explode
then as soon as we place
data technologies of Thinking
then in the area of functionality of this bomb
and extend to Eternal development

then in Eternal development

Well, let's assume such an information object
which is supposed to explode
but it might not explode
i.e. not every bomb explodes

and when we kind of spread this moment

let's assume any kind of aggressive source
there is a source of radioactivity, let's assume, yes
then the element of standardization occurs almost immediately
as soon as you transfer into the structure of Eternity

i.e. in Eternal development what

what is Eternal Development for a bomb

Well, it's just metal , let's say, with some kind of explosive stock there.
there in some thousands of years
it's just being restructured
even under good storage conditions
this system is simply , well, not functional
from the point of view of the explosion

i.e. placing an aggressive object

into the system of Eternal development
we get a normalized system

if we want to suppose consider
radioactive source

which, for example, is shining with radiation very strongly there
then from the point of view of Eternal development
it stops shining

By the way, I personally conducted the experiments

well, not even experiments, but practical actions there
for cleaning aircraft after radiation exposure

by that means practically brought it to a normal level

means a source of radioactive radiation

laboratory source

just by a simple translation of the substrate
into the structure of Eternity

i.e. it is the layer that is taken that is Eternity

information is cut out as if from a form

is invested

and instantly radiation

it almost reaches the background level

this way you can protect yourself

from the point of view of what
or there are other people there , or there is cleansing
some equipment, planes, seas, etc., territories
just by introducing into the structure of Eternal development
any aggressive level

and from the point of view of God, precisely the One God
in Eternity there is only creative development

therefore, creative development
This is the norm, generally speaking
the simplest logical norm of all development

because Eternity
anyway, I even gave an example of a bomb
it's still kind of like, well , let's say it rusts there, yeah

and so when we look at
Well let's assume there is a technology to protect against terrorist attacks
from the point of view of the logical system of counteraction

then here first of all we need to consider
projection onto the layers of Eternity

Here's how to make sure there is no terrorist attack

enough screen of Eternity
which is formed by your heart
and it is formed very simply
take the heart rhythm as if listening yes
and you take it, which means that you actually make such a rhythm
that the heart rhythm is translated from the glow
to the level of the Soul
namely the deep state of the Soul
where there is Eternity originally given by God the Creator

it's technologically very simple
just the sound of the heart that you hear
precisely by inner hearing, i.e. not even physical
as if by the hearing of the Soul to a greater extent

then you see that there is a projection here
those. screen is created
which is very quickly extrapolated
as if into the outer sphere
i.e. the person begins to emit light

from the point of view of my section

Teachings about Eternal Life
you see
that man is the source of light
coming from him
Well like a lens system

i.e. as soon as you start to see
these manifestations of light
then you project events
on this simple light
and you see what needs to be done to prevent a terrorist attack

those. let's assume there
make some specific movements there
i.e. to communicate some information
or is it best to act on the source
creating other levels of tasks for them , well, creative ones, yes
and the terrorist attack stops

after all, it happens quite often in life
that's just a change of events
change of thinking or there situation yes
leads to the fact that it is not carried out
as if a negative event

another question is that there will be no terrorist attacks at all
and not only those who threaten there, yes
of the whole civilization
then all people must work for this
because it only costs one person
how not to shine this light from within yourself
space is created, an event is created
inside of which
maybe the situation there is, well, kind of unfavorable

so here is the problem
compulsory education for all
that's exactly what technologies are
act as the One God does

because generally speaking it develops in essence
human body
including the whole world
this is the task of managing, generally speaking, any event

i.e. if we need and we need
so that all events are favorable
for a person

then it turns out that everyone should learn

and from the point of view of the technology of Eternity
we have practically
a very versatile training system

for example, well, a specific case from my practice
This is a cure for stage four cancer
when part of the lung was not visualized
those. Well, I was just struck by metastases

from the point of view of replacing this level of light
Well, these are metastases after all
fairly dense bulk mass

and when it came to replacing this mass
for example on normal fabric
Well, it can't be cut out surgically , actually
because there was metastasis
besides the lungs in the bronchi there, etc.

and output it, for example, in some other way
except for the element that is natural for humans
there is no possibility here

here is the replacement technology
such a big enough
there almost half of the lung was affected by metastases
I produced for example the following applied
control element

I just took an element
from that information
what is Eternal development
this particular person
how it looks in information

from the point of view of Eternal development
the structure is being transformed
well, for example, this process
but slowly it unwinds like a thread

and when you see this process
to just pull out the thread
than to cut off a piece of the lung there

and it turns out that it is enough
pull as if by the end of a thread

just an element with logical control
and the replacement occurs immediately

i.e. there in a fairly fast time
substitution for a normal lung occurred

at the same time I showed you
what is the entry point as if in the treatment of the disease yes
you extrapolate, i.e. consider
The eternal process of development
when you look at it
then you see that the management process
he's not that big

because from the point of view of Eternity
each cell is very small

and from the point of view of Eternal development
a person in general
human body mass
this is a very small mass

i.e. it is enough then it is enough
just on the optical level
make a movement with thought
and the person is cured

and because I just took and stretched the mass
for Infinite Time
to Eternal development

and it turns out that
Well, it would seem like a simple technological system
but when we look

the outside world structured, for example, yes
we take the screen and as if going to the outside world
and we look at the outside world
this is also a system
for example, some optical control elements

then navigate this
quite multi-valued optics
gives a very simple level
this is the Physical Body of the One God
and the Body that is Eternal
and in general can move around quite freely
there in the form of a human physical body

then all forms of the Body
this is what the interaction of events means
aimed at Eternity

i.e. the shape of the human body
it is an interaction of events
aimed at Eternity

so when you with your form
interact
with a system of, well, dynamic development
future processes
or your processes
then you get a very intense
and generally always available with you
control system

the main thing is to recognize
for example how would you interact
with all the events
how your body simply controls events
if, for example, you don't put any intellectual effort into it

it turns out that from this form of Eternity
you see that interaction is happening constantly

and a combination of bodies and a person
i.e., for example, many physical bodies of a human being
gives birth to the next level of Eternity
higher quality level
where is it created
next space next time

and for example, if we consider such a situation
that there are many people in the big hall

then if it means the mass and matter of this hall
let's say isolate
then the more people we bring here, as it were,
the more we see
levels of creation, well, like primary creation
molecules such as oxygen
primary creation of matter

i.e. it turns out that the increase
increase
namely, for example, the physical body of a person

what is in accordance with the likeness of the Body of God

then we see that matter control is happening
from the point of view of the development of matter

that's why there is no such concept
that "the limitation exists supposedly means it is possible
in small areas
there could be problems with the number of people there"
in fact, such a thing does not exist
the more people
the more elements will be given
for the next development

and how, for example, will this be given
for this it is necessary to at least develop the current territories
i.e. to master from the point of view of logic and development
therefore when
namely creative development

and when we look at the process
to the Infinite Future
then here is exactly the next one
well, more like a similar level to a breakthrough in development
next level
it can in no way be realized
only with some special technologies
and only by certain people
and even then, the level of dependence is the same
from previous development

i.e. a separate person
It's like he can't get very far anyway
there is a history of information that says that
that it depends on the previous level
did he come from, yes

and then it turns out that the next development
it still happens
when the first level is worked out , yes

in the technology of Eternity there is a concept
"working out each element of the event"
what am I talking about now
including social events

this means normal living conditions
this is the principle of Love in all phenomena of life

this is the understanding of that
how does the Physical Body of the One God
how the world as a whole is structured
from the point of view of his awareness as a person
just personality as a person

i.e. when we consider all these elements
together
we get almost
Instant Norm Control

i.e. everything that happens we think is normal
but after all
well I mean when something normal happens

but this is also management
i.e. it is a relationship between different systems

then if you think about it
why is this happening normally
because it is like a normalized manifestation of Eternity
at this point
this is the level of joint management
which you perceive as the norm

i.e. one still needs to be able to perceive the norm

and therefore from the point of view of Eternity
to balance the management
from the point of view of psychology, etc.

you must see
how do you perceive Norma
i.e. to go towards the Norm

here I introduce a special level of control
which I haven't talked about before
because I do and create every seminar
exactly at the time of the seminar

that's why now for the first time I'm speaking
that there is a level of counter control
in relation to your own management

i.e. you enter the point as if it were a vector point
look where your control optics are acting
and create a counter vector flow

i.e. it is actually you who act at one point
as if from both sides
and at the same time your control
it definitely works on you

i.e. you definitely get it
as if a reflected optical signal

but the One God created the World in this way
every element of Reality
he reaches Him
He sees what is happening to him.
to see you need to know and control ^{yes}
you need to have a consequence in motion on you

i.e. practically from the point of view
this is precisely the section of my Teaching about Eternal Life
we must see that our signal sent
comes back almost immediately

i.e. the time of sending
and time of receipt
this is ^{basically} one point of information

when we look
this point of information
this is the creation of the primary impulse
i.e. we ourselves

when we look further from here
then we see that from this point of view
enter into the structure of the physical body of one's own
and examine each cell
consider in a stationary version
i.e. without rushing
from the point of view that no one is forcing ^{us}
do it quickly
we can look at it pretty quickly
generally speaking, all the connections in the body

i.e. the body then becomes understandable and laconic
i.e. our view
i.e. we see one point
but we understand everything
around
what's around
as if we just understand

obtained in the technologies of Eternity
there is a space of correct awareness of Reality
taking into account all the interrelations

for example, I'm looking at this
there is a plane flying there yes
for example, he might fall
I'm looking at the reason
this concerns a specific person

at the same time I need to make sure that it doesn't fall

I'm considering both positions at once
i.e. the space of understanding
in the structure of Eternity
space of understanding
it seems to absolutely exist or to be formed

and for example, according to their specific practices
according to Salvation, let's assume, well, in general, multi-link systems, yes
an airplane is a multi-link system
where is the dispatcher passenger for example
possibly stuffed with some stuff there
problematic flight devices, etc.

and if for example it is necessary to prevent
well, for example, a terrorist attack or do something like this
so that some unit doesn't work
or does it mean to do it the other way around so that everything works
then it turns out
only one comprehensive solution is possible, i.e.

and it turns out that this solution should include
only one option and saving a specific plane
or there is a satellite, etc.
or just a person

then the only element of this control
all that remains is extrapolation
i.e. the development of the situation towards Eternal development

because in this case
we see a clear side
in the conditions, well, just in mathematical language
it turns out to be a combination of all events

when we consider

all possible combinations of an event
we only get one
which should now be undertaken

Well, for example, call the air traffic controller
who will give the correct command to the crew yes

or some other remote solution
i.e. increase the level there is a reserve level of events
a specific person on board

then it works
by means of reflected optical signals
and for example, the plane arrives safely

i.e. in this case
namely the spread to Eternal development
gives a practically unambiguous level
in your actions

i.e. you know correctly
because you are reacting to the Eternal construct
in this world

and when you want to understand
but how do you choose, make a selection?
of this Eternal construction
where is it anyway

then first of all pay attention
on yourself
on your stereotype of thinking
and you will see that your Thinking
mainly concentrated
near your physical body

quite rarely there by an effort of will
a person can in principle think
somewhere in another system there in some galaxy
but he also represents Thinking
anyway, practically next to me

he can of course push out Thinking
there in some galaxy
but he comes back at the same time

this is the return
it's like some kind of

periodic vibration of Eternity
Eternity
the further we move away
the closer we get to ourselves

just do a purely practical experiment
you will see
what if you start for example
to move the thought very far away
there is pressure on your physical body

well, just as a management there
there is no such Salvation even
take it and start pushing
some dangerous particle there , some unnecessary isotope
in some part of there building of any
start pushing information very far
somewhere in the Universe

the more you push out
the more you see the glow coming at you
and it turns out
but generally speaking it is a harmless glow in essence
but you still see that it shines on you yes
you end up with an extra channel of information
i.e. an extra source is shining on you

but in general, in essence, only God can look after you

i.e. essentially no one is allowed
if you don't want to of course yes
there performing on stage there etc. so that someone would look at you
only God can watch by and large
you have the right not to allow the rest
monitoring, control, etc.

and when you, for example, make this type of control
moving some microparticle very far away
even if it is harmful
and it turns out to be tracking
to violate this principle somewhere

so the problem is
cope with the situation
at the point of its existence

and for this you need not distance yourself
and be able to direct your thinking so

so that Thinking converts
this point in the norm

There is a very simple way to do this
he is just different
i.e. to direct all efforts of the outside world
your personal
to Norma

and from the point of view of the technology of Eternity
it looks very simple

take the external system of space
any
the same distant star
or just some galaxy there yes

conduct an optical beam
to the point of well, as if to which you control
and conduct it away from you

if there is a control point
well, some kind of wide range of events
then you want to expand
you want it in the form of one luminous point
use

and build a system
well, like some kind of angle , let's say
where in the corner are the events

but the point of management is that
what are controlled events
you can't drive yourself into a corner either
i.e. each element of information is free

i.e. controlling a person
you can't dictate terms yes
even if he is aggressive, he needs to be given conditions
so that he could develop another system of events somewhere

I got rid of aggression there , yes
found some elements
so for this to happen
create social conditions around it, etc.
psychological ones can be treated even

and when you already create an event

then it turns out
that this angular optical combination is like
it is expressed in that
that the event should scroll very freely
i.e. to be as externally on the outer side of the corner
and in the internal

and when you start to collect this corner
Well how can it be compressed
in the form of an optical beam

i.e. the outside world
and the inner world is obtained

then in the projection you see
your own body
and the signals that come from your body

so you can study
in relation to what event
what body level to activate

the technology as I said is very simple
all you do is work on yourself
in this technology

you don't need to influence anyone
there is no need to force anyone
you just need to see it
source of light near the body
and it's easy to activate

well, for example, there is a sphere near the knee of the right leg, yes
so that there is no such thing there, for example
well, some kind of global catastrophe even
in the long term, for example, in three years, yes

you take this sphere
just look at everything, for example, she is like this
that it just needs to be saturated with glow

take it and saturate it with glow
simple elementary personal glow
you are also the source of Eternity
source of Eternal Glow

for God created you from the beginning Eternal
He creates everything Eternal

it turns out that you are acting according to the will of God, ^{yes}
doing so

and when you already do this management

Well as if Infinite

i.e. for example an infinite number of times

i.e. you can logically consider the situation this way

what information do you enter there?

so that it exists an infinite number of times

by force of will

just enter it once

then it turns out that you are introducing into your action

act of Eternity

it turns out that when you, ^{for example,} enter

an act of Eternity by an effort of will

you do the same as the One God does

just situationally, ^{as if} technologically, you do the same

and here is your will and the Will of God

they match

i.e. God created everything in the direction of Eternal development

and you do the same

another question is that there are such elements

like temporary rain ^{and} leaves falling there, etc.

but for the One God

each element of time is equivalent

i.e. for Him the concept of the next development

it's the same concept

as a concept that has been ^{there for well} a hundred years, a thousand years, etc.

^{yes}

billions of years ago

and it turns out that from this point of view

for the One God

there is only time for development

from the point of view of how a person understands time

i.e. the time of movement

time of change

object

forms of information

and when from this point of view

we are considering the element of Eternity

then here first of all there must be a person of course
which can control the form

A person can, for example, develop a quarry ^{there}
can plant trees
it already turns out logically
It's better for a person to be right away
towards Eternal development according to God's tasks
because it has more control systems

and this is how God created man
because without the Will of God
no action elements occur
or there are creatures

then a person can create something like himself
knowing this system ^{coming} from God
then he can resurrect
find where in the Soul is the knowledge about the resurrection
in what place of the Soul

seeing your Soul from this depth of knowledge ^{so let's say yes}
he sees how to make another person Eternal

and when you start working in this technology
then I gave an example like this: there is a hall
which, for example, is controlled ^{there}
from the point of view of physical aspects, ^{yes}
air there, ^{let's say}

but when you come to that
what a person can create himself
then he can already show it
Always
everywhere
and outside any hall

he can create matter himself
he himself can materialize and create matter ^{there}
^{there, for example,} to build up tissues ^{and} some lost ones, etc.

and when you move to this control system
then you see that the external light is coming towards you
this is the light of actions
light containing knowledge
light containing information
and containing light in essence
^{in general,} not only physical knowledge

and essentially not only physical knowledge
and the light that you see
as if the all-manifest light of all events

i.e. in one element of light
in fact there are all events

and when you for example want to restore your vision yes
or through vision it is possible to restore the body
there is such a technology
you can just about anything
to see this light inside in the Soul
i.e. to look
and where is this light in the Soul?

yes there is an external one perceived by sight
light
but you will see it in the Soul
the same

once you see that it is the same
you will see exactly the Divine glow
i.e. where God himself shines

when you see it
you see that this is Eternity as if multiplied
on space and on events

i.e. I am already Eternity yes
took beyond the boundaries of space and events

just like God
It is outside of events and spaces.
means in the Image and Likeness
any element of Reality can be found
outside of space and outside of events
including Eternity

but then it turns out that you have
the most powerful in fact
technology for managing the entire Reality
just taking control over everything
outside of events
and for example outside of space outside of time yes

then we have a very simple entity here
The soul is located exactly in this place
in the same place where it is located

and the Physical Body of the One God

therefore the Soul is there
where is the Physical Body of the One God
in that space and that time

i.e. it is a different space, a different time
characteristics of this space
this is the essence of Eternity
in each element of the action

logically it can be imagined something like this
if you take some movement
and consider that we assume this movement
final for example yes
then from the point of view of Eternity
to give it, as it were, the properties of Eternity

then here are the properties of Eternity they are widespread
in the concept of "ideological action" in this case there
The One God makes everything Eternal
and we know this
we do exactly the same yes
ideology i.e. what drives people
what moves from the point of view of Eternal development

it turns out
that the ideology we create is the goals we create
this is what corresponds to the structure of Eternity
at final action

i.e. the person took one step
but if he did it in the direction of Eternal development
it means he gave the properties of Eternity
i.e. a person can assign properties with his mind

God gave it to him for that
so that he could create this space around himself
the ability to think exactly like this
the One God speaks and shows and teaches

so when we do
Well as if we are trying to understand the extrapolation
that in what way some one or another phenomenon of Reality
for example the space of Eternity
where is the Physical Body of the One God
comparable to ours

then we can quite say
what is this
our development our thinking our future
which we can control

and when we raise the question of management
well, for example, as absolute
i.e. for example, everyone controls
and everything is going well for everyone

then this is what is in the projection
when a person is fine now
something specific and some situation
this is a projection of this state

there is , well, in the future that information
that everyone can manage
from the point of view of the Norm of the Event
they are Eternal, they all develop creatively
for example, everyone is happy and healthy

this is the space that shines
and when it shines
Now it's Norma
each specific individual person

because even logically
if there is no generalized Norm in the future
then the reverse glow
from the point of view of the technology of Eternity
it doesn't exist

from the point of view of the technology of Eternity
there is always only a relationship
Macro level
having , as it were, the level of absolute Norm
and your personal level of management or behavior there

so when you come in
Well, there's some big supermarket there.
you need to find something in large quantities
and quickly find and receive the required event

or you need to get out of some situation
there we suppose a problem and restore health
in general in situations of seemingly problematic systems
somewhere to get the right solution

just go to everything right away
from the level of the Soul
here is a deep state of the Soul
where is there even just Norma
there can be no negative events there

this level is formed by that
that there is radiation as if going into Eternity
coming from the left side of the body
it's somewhere around here, the spleen , pancreas and heart

here comes the angular control system
This system needs to be entered as if to dock
Well , it's like in outer space
there the satellite is docking
to dock with a system where there is absolute Norm
from the point of view of Eternal development

Well, how did I describe such a luminous space?
where processes all processes are Eternal

then you get that this is an external situation
like she works for you
i.e. it works out the control system in the norm
already because you connected correctly , so to speak

after all, it is enough to have the right knowledge
not necessarily
or there is the right road yes
It is not necessary to know where this road is at all
Well, what kind of soil is there ? The microcomposition of the soil
it is not necessary to know
it's enough to just know that this road is the right one

and then it turns out that in this technology
which means which I just reported
what is this technology called
The Teaching of Grigori Grabovoi about Eternal Life

at this level you can simply
as if by means of connections yes
to the single source of Eternal development
including through direct contact it is obtained
with the Physical Body of the One God

you can have Norma in peace
only by finding the correct connection
based on logical reasoning

Spiritual level of aspiration
and the works and actions of the Soul

i.e. from the point of view of the technology of Eternity
everything is very clearly delineated here

action of the Soul
this is a very specific level of your personality
means Spiritual aspiration
it is completely clear and has space
where it doesn't go
for example the structure of the action of the Soul

and the logical level is expressed here
as a unifying level
i.e. it is located
as in the level of Soul action
and in the level of aspiration

so here it turns out
that Love is a manifestation of God
Here

i.e. Love is
that God loves everything
and He shows it
He shows by His Action
i.e. God's Love

we see in this case
Love of God

and logically it is understandable
that when we openly see with our own eyes
Love of God
people often see the light
i.e. diseases such as vision, etc. are cured.

and through the body
the optics are powerful enough, it kind of heats up
such a gentle Love of God
the person is cured
there could be very fast mass cures there
as soon as a person
in general, it is suitable in large quantities
to knowledge or something to this information
or just a lot of people
to individual knowledge

but to this information yes

why does it often happen that when there are a lot of people
more healing is underway
from one single correct knowledge

and when we see such technology in action
then we can completely create
own management mechanisms
which are primarily aimed at
so that our own bodies would be like this, for example
so that they will develop forever
i.e. they must be healthy

and in connection with this any phenomena
Well, of course, for everyone it is somehow connected with time
i.e. a person sometimes does not pay attention there
the time you need
although he has known for quite some time
that some kind of situation might happen

as a rule, all people know
at that level of the Soul
where the Soul touches Eternity
what could happen to them
but not all people just pay attention to it

and when you look at this situation
on yourself
then you see how your own thought is organized

For some people, thought screens are like projections
like, well, like, the space of the hemisphere of Eternity
this information is perceived
then he makes the right decision there yes
bypasses the situation or somehow influences it

and someone doesn't react
i.e. they are more flat systems
he kind of throws them back
these signals
or he sees them somewhere in his dreams

and so that your Thinking becomes
well, sort of diagnostic
i.e. so that at least you know what might happen
from the point of view of some
negative positive options

you would like to have a structure of your development
thus built
to the border of Thinking
was formed exactly like that
that you put it by force of will
the sphere of Eternity
the sphere onto which it is projected
your own event

after all it's an event
this is a fairly specific situation
specific glow in information
it is located in a specific place

and even when I give a number series
the number series also exists in a specific place
in the form of a glow

and when you do this
you start to develop, for example
let's assume there is a number series and it normalizes yes
control number series

then it's actually pretty simple
as if the information level of glow
like a corridor that allows
choose the only one there, for example, the correct solution

I see him and I tell him
what are you doing in this situation now

events have changed
It would be best for you to master
this number series
how does it work
and then further disseminate knowledge
as if by their actions

therefore having learned
and who knows how to do it
he spreads knowledge
because
well, as it turns out, with your own personal creative actions
because it is located
in the structure of the correct action of the decision

and at the same time can show it to others
that he did it without even words
for example, I did it in the information yes
God saw it
and he gave further to the following

here in the technologies of Eternity
God also gives the following

Of course he always gives
but in the technologies of Eternity it is very clearly visible
because the event that was done
aimed at Infinity
always comes to God

i.e. it is in any case
or for example sometimes people think
Well, he did something
when will it reach God for example
and what will be the solution yes

and here the solution can always be creative
because man is directed towards Eternity
does as God does
and through the Eternal number of years
it will reach God anyway

if people think
that He is there
some decision comes slowly, for example
although in reality God sees everything immediately and now
as I said
by the technologies of Eternity

just collective knowledge
it is concentrated in the Soul of God in this case

and when you want to understand here
what is the Soul of the One God
having a Physical single Body

then his Soul is practically
what the whole world perceives in this case
as World of Action
who interacts with Him of his own free will

here from the point of view of the Soul of God
this is the own will of the external world

why does god give everyone freedom
because in Eternal development one cannot give freedom, as it were
logically it's not even possible

i.e. a person must be free to come in person
to some opinion
because the Eternal combination of events
and there is an Eternal number of events

therefore if he does
some not free movements
then after some time he develops
Well like a temptation yes
to make some possibly negative events happen

that's why maybe they are positive for him
but others are negative yes
how to see that line
where they are positive for everyone
this is also the Action of God

when a person starts
move, for example, towards Eternal development
from this path
then he understands that in Eternal development
creation is the absolute level
where there is also Love that is in it
i.e. He is the source of Love

and when you start to see this situation
you see that recovery
for example there are fabrics
Event Norms
or let's assume there is event management there
so that there is no negative level of events

this is the level which first of all
originally given to you by the Creator
i.e. you see the original point
given to you immediately by the Creator

and in the understanding of Eternity
and in the technologies of development of Eternity

therefore, as an independent work
you will come to this system of self-understanding

because in the technologies of Eternity
Self-understanding occupies a large place

and when you see it
this glow immediately
according to my Teaching about Eternal Life
will spread to others
you will transfer knowledge from understanding simply

here is knowledge from understanding
have you often noticed that when you understand
knowledge is transmitted as if even implicitly

as a management
try to set very specific goals
and only on the material of today's seminar, for example
here is the current lecture
make the management very specific

then you take a look
as understanding knowledge about the level of Eternal development
gives immediate implementation

Well, there, for example, first of all
in terms of information
can give almost immediately
in the physical plane, etc.

This concludes today's seminar.

thank you for your attention
