

GRIGORY GRABOVOY
The Doctrine of the Soul
05.08.2003

Hello again
The topic of today's seminar
This is the Teaching of Grigori Grabovoi about the Soul

This structure of the Teaching is based on the fact that
that when for example we consider
My teaching is about Salvation and harmonious development

then here the control element is
first of all the task of saving everyone
through technology and use
different controls
for example Soul Spirit Consciousness body etc.

at my specific structural level
The Doctrine of the Soul
I am primarily considering
work with your Soul
i.e. a person works with the Soul
while performing the same tasks, among other things
for example the task of Saving All
as well as the task of personal management

and when you are in management
through the structure of the Doctrine of the Soul
then first of all you consider
the principle of similarity based on the fact that
that the human Soul is built according to the same Laws
that is the Physical Body of the One God

when you consider as an axiom
this position
then you see that the Soul is already Eternal
that it is built according to the same Laws

therefore when we consider
So let's say the legislative level
in management
it turns out that under control conditions
we see first of all when we look at

it is the development of the Soul
then the legislative level is visible here
as the level of action itself
and in terms of management, that's exactly it
when we consider my Teaching about the Soul
then here first of all the level of management
is being considered
as a level of action simultaneous

i.e. there is basically no difference here
between
management
and action
so here we need to be careful in terms of
precisely as if transitional boundaries
there is one optical level working here

and in the conditions of this state
The laws of construction
Physical Body of the One God
are transformed
in the form of the Laws of Construction
Consciousness
Spirit
Souls
for example, the physical body of a person including

and therefore considering the legislative level
actions from the Soul
we can first of all consider
fairly simple elements in the practice of one's own
for example, there is treatment for an incurable disease
it is clear that the Eternal Soul is not subject to diseases there

then it turns out that when walking, for example
at an extrapolation level, so to speak
to the level of task correlation
we see that the Physical Body of the One God
it's also well there it's incorruptible it can't be destroyed

and it turns out
what is the physical body of a person
as a projection yes
Physical Body of the One God
on the Soul of man

here you need to be more careful with the wording

the wording is a control element in this case
it may also be indestructible

therefore in Consciousness
A person must find something simple for everything
the point of non-destruction from this position

if the disease is complex
let's assume it is complex
or there the situation is yes, it is quite complicated
in terms of necessity
simultaneous and comprehensive solution
there, for example, are many people

then it turns out that by analogy with that
how does the Physical Body of the One God
we can also act with the Soul

and when you listen to this lecture
from a management point of view
then access for example is yours and your Soul
in any situation
it is almost as instantaneous
what do you think about that?
that God also has access almost instantaneously yes
to any point in space-time

that's why the action is instantaneous here
from awareness of the moment of action

i.e. if you want to get the Truth or knowledge
more there in an adapted form and simple
but that doesn't mean it's not difficult
here may be simplicity but complex simplicity
then it turns out that you are acting by analogy

and if you translate it like this, similarly
for example management
to the level of how human Consciousness works then
then it turns out that Consciousness must work like this
that each element of Perception
this is the restoration of man

i.e. this is his life
this is his practically infinite development

and it comes from self-perception

a person must move
towards Infinite development

and according to my Teaching about Love
man walks first
by the level of development of Love

that's why it turns out
what is the next development
this is love
including self-love

and when you consider self love
then for many this process is quite abstract
i.e. there are a lot of people who are engaged in
for example in the sphere of Salvation
in the sphere of development of life activity, let's assume civilization yes
in personal activities

the question is often not asked
self love
as a question expressed in action

for example the following action
a man went to make some purchase in a store
but how, for example, will he express this action
if he buys, well, let's assume there's something third, yes
not for myself there and not for others
Well, he can buy, let's say, an integrated circuit board
very complicated

how to express love through this board
i.e. the more technogenic the World becomes
all the more so, it seems to be becoming more split or something
information on expressing self love

so here in the Soul
Love for yourself is the same as love for God
and in general, as to all taken together, so to speak, to the whole World at once
this Love is one and indivisible
The soul is the source of this Love

and there is any fee
any there let's assume the system of future management
there any cyborg system is a substructure
already known there starting point
this state of the Soul

when you already move to the next level, for example , yes
in knowledge in management
it turns out that it is enough to find
this point in the Soul
and you get almost instant access
in any space-time
through Love

i.e. the Soul is actually a conductor of Love
and of the level that you receive
conductor
First of all, instant access level
just like God does
secondly, acting on physical matter

i.e. God He can
how to act on physical matter yes
so it can be in the form of an Eternal physical body
to appear somewhere
Well to pass there in the form of a human physical body

then it turns out that this passage
in the form of a human physical body
this is the development of human consciousness
according to the same principle

i.e. if a person sees
that there is an indestructible body of the physical level
i.e. the Physical Body, for example, of the One God
passes by somewhere and buys something in a store
it turns out that by analogy a person understands
that this substance exists here
and he understands this at the level of the Spirit

in this case, according to my Teaching about the Soul
this means that the Spirit appears in the form of a substance
acting and creating at the same time

i.e. if the Physical Body of the One God
somehow affects Reality
and acts , for example, through the Soul of a person yes
through one's own Soul
then the Soul of man acts through the Spirit
in this case

and when we get such an expression as if linear

that the Soul through the Spirit
acts on physical Reality
we get a fairly specific control mechanism
defined in the form of implementation
namely the physical body of a person

because the effect on physical Reality
has a reverse wave
if you affected the plant
and the plant somehow improved or grew there
or did you heal a person for example yes
and somehow improved the events

then you get it back
almost the same or more

and this kind of mechanics and distribution, as it were
from the point of view of some weight elements and functional ones
or, let's say, volumes of information
it can even be calculated very clearly
according to the structure of the development of the Soul

i.e. the Soul is a fairly precise manifested concept
in the human consciousness

this is what gives precision to human consciousness
so in this case it is quite clear
what is in human consciousness
Precision is given by the Soul

if we consider
the structure of the development of the Soul
then we see that the concept of, for example, "accuracy"
in this case it is a concept
which carries well as if an element
as external yes
there may be different Worlds there, different controls

so that in these Worlds
how to have a precise element
in its essence in its personality
we must first of all necessarily imply
that accuracy is that characteristic
which is present in us

otherwise we can walk for quite a long time
by the Infinite level of information

and how exactly can I determine this, for example?
position in management

so here in my Teaching about the Soul
it is absolutely possible to do this control
just finding everything
projection of the Soul onto Consciousness

and when we start to analyze here
here it allows to conduct an analysis in general
just simple logic really

because human consciousness
that which defines, as it were, behavioral systems yes
situations in the World, etc.

from the point of view of the Physical Body of the One God
His Consciousness is the whole Reality
manifested unmanifested
physical for example or informative

it turns out that human consciousness
manifested
for example in the Action of God in this case

when you see the Action of God as an element of Consciousness
then you see that your Consciousness
may as well be Infinite
as is the Soul of man

i.e. you come to the conclusion logically
what by analogy
a projection component of the Soul
this is still the Soul

and it turns out that you highlight
spectrum of linear i.e. precise correct Consciousness
in your Soul

and then you see the sources of growth of Consciousness
how does the Soul create Consciousness?

and also by analogy the Physical Body of the One God
creates any Reality
you see by what Laws
your Consciousness is developing

and the Soul has absolutely all knowledge about future development

so when you see
how Consciousness grows
you know exactly where it grows
what will you perceive

and by the way as a practice
you can use such an element
that following the lines of growth of Consciousness
you will see the future development of your Consciousness in general

i.e. you can see how it develops
and from God's point of view
He created a man who can adapt.
to any Reality at all
therefore the possibilities to develop Consciousness are Infinite
as well as the state in which the Soul is located

and considering that for the Soul this is a state
whose platform is the Spirit
here is the omnipresent Spirit including the Spirit of God

then for Consciousness this is development
that's why the world is arranged this way
what are stationary ^{ones}
fundamental sources of Reality ^{yes}
Soul ^{for example}
The Physical Body of the One God
and Consciousness
or ^{is there} the Spirit of God
these are elements that can develop

i.e. the Spirit of God can be developed
The spirit can be brought in
God's Spirit can be brought in

and when you perform prayer
you see that God is He
how omnipresent
so he definitely only talks to you ^{yes}

this is the transition element
accuracy
and a comprehensive system , as it were
i.e. such comprehensive knowledge

which you have almost definitely
you see that He solves all your questions
can decide and decides

but when you turn to Him
to God
then you see that He gives you knowledge, i.e. development

and by analogy with this we see development
of his own physical body

i.e. I came to the physical body of a person
through a fairly multi-tiered level of control , so to speak
which at this point
expresses the beginning of the construction of the body

therefore the body
this is a very multi-component, as it were, informative construction
in terms of universal Reality

and from the point of view of the Physical Body of the One God
there is still development here, just like that
it is precisely the difference in Perception

The Physical Body of the One God It exists and that's all
seems like a person shouldn't build it there
and in principle he may not build

but if he starts building like this
how the Physical body of the One God functions
so build the world and the surrounding world
then the world is folded around him
development circumstances
that his body becomes Eternal

here in my Teaching about the Soul
and here I will say more precisely about the Soul of man in this part
we are talking about that
that the construction of the external world
i.e. the construction of events of the World
creates precisely the line of development
i.e., in fact, as if the fate of a person

and when you look at Reality
precisely with eyes open
from the point of view of open from the Soul
then you see that all external objects of Reality

well there are animals and let's assume plants some ideas
intangible material objects
they have a source that is comparable and comparable
with Soul
you can name what is there, let's say yes, the soul of the animal is there, etc.

but when you start looking closely
how does the Soul of animals react in general, for example ?
for some situation

then you can understand exactly
how does he react
it is precisely in the equilibrium processes of the World
if you see how the animal's Consciousness develops

i.e. here is the Consciousness of an animal
which holds, as it were, the entire structure of the World
in development
and also in the same way as in a single point
any element of information
holds the whole outer world
that's exactly according to the structure of the Teaching about the Soul

then here you can go out
along the boundaries of animal consciousness development
but already from the development of the World
be more careful here
for a person
the development of Consciousness comes from the Soul

when you want to understand
how does the outer element of the world look yes
and control the element
naturally as does the Physical Body of the One God
you should watch
how the World shapes the development of Consciousness
animal, plant, etc.

and when you see this this difference
do you understand what the difference is?
between God and man

and when you see it like that you can go down that path
along which God Himself and His Physical Body walks

then you can develop
the structure of the Soul

i.e. you can influence the structure of your Soul

This is fundamental knowledge , generally speaking
because it influences the structure of the Soul
there yours or another person's
this is what God does definitely
there are things where it does the job
only exclusively God Himself

when you do this for example
just like God does
then you enter the structure and into that World, so to speak
into the fundamental system of the universe in general
and then you can influence
on any molecule there
for any Macrosystem
just because you perceive this system
as you wish

here is the area of desire, here is sensual desire
matches
with scope and implementation of action

so sometimes there is well let's say this is a sign
in Perception
that when you want to perceive, for example, some process
and they really wanted it
then this can be realized
this is what happens in the Soul of a person

and when you, for example, want to set your action
for example, the act of resurrecting a person
as a management goal
then in this case you can implement it for yourself

because he is the same person in his Soul
as the Physical Body of the One God
and the Physical Body of the One God creates Reality

therefore, according to my Teaching about the Soul
it is enough to develop the Soul
to the level of Reality realization
towards Norma
towards the Physical Body of the One God
and people will be resurrected

i.e. it turns out that here is the control action
it's just the action of aspiration
to the Physical Body of the One God
or physical desire
or the aspirations of the Soul
here the principles are equal

and here's what the equation will say
equivalence of these principles
this is the space for the development of your Spirit

i.e. I introduced such a concept
as the development of the Spirit in information
or in the space of the Soul

and here we see
that two neighboring elements of your Soul
although it is a single whole and inseparable
this is what contains the Spirit among itself

when a person performs prayer
and turns directly to God
he considers first of all
as a sort of optical element of the message
Spiritual characteristics

for the Soul is already with God
The soul is always near God
in essence the creation of the physical body
i.e. there is a space where this always happens
and people are not inseparable, for example, from the Creator
just as each of your cells is inseparable in essence
there with some other cell

when you move on to analogy and construction
structure of the physical body
then you see that for example the restoration of the body
let's assume there is an organ or the restoration of a person in general
this is an outgoing action
from every cell of your body
and according to the exact same Laws
how the Physical Body of the One God develops

i.e. the Physical Body of the One God, and such
which looks like a human being, for example

simply put, if we consider

development situation
from one cell for example to another information
how do cells interact with each other

then here we can consider the following principle

from the Physical Body of the One God
some kind of light, for example, glow comes out
which according to some Laws
hits some object

and the subject given
it is organized by the same God
that's how he turns out to be controlled by God
as if in the future tense yes

for God it turns out that
moment of creation
moment of next control
this is one action
and between these actions there is only light

here is the light of real knowledge
the light of knowledge of all people
all the elements of the World about what is happening in general
or self-awareness

and this element of self-awareness
this is in fact
human cellular level

i.e. each cell is essentially
by level for example Actions of God
she is at the level of constant self-awareness

i.e. the intellectual level of the cell is obtained
there are no atoms or molecules of humans at all
this level is actually very high intellectually

if we look at this level
how does level mean comparable
with the Action of the Physical Body of God
then the Laws are quite clearly visible
as a specific cell
interacts with a specific element of Reality
with the neighboring cell
with organ

for example with some external structure
in relation to the human body

and when do you start to analyze like that
you see that generally speaking any cell is regenerable
because she has direct contact with God

and when you go out already
to the level of this contact
then you see that with God it is completely indestructible
and this data is in your Spirit

you begin to transform this Spirit
to extrapolate and project onto Consciousness
and you get a dynamic system of development of Consciousness
in your Soul

i.e. what I have been talking about up to this point
this is a static structure
you see how the lines of Consciousness develop
on a kind of platform and at the level of the Soul

and a dynamic system
these are like moving blocks, so to speak
light information
which have complex functions
they are like a non-linear system already

and when you begin to further develop your Consciousness
or consider the management level
from the point of view of adaptation
here's how to avoid a global catastrophe
having knowledge about the Soul

it works out quite well here
take a static linear function
develop to the level of dynamics
and consider precisely the manifestation of Love
from the action of your Consciousness

for the manifestation of God's Action is Love

and when you are as it would seem
in such a simple logical scheme you tie all this together
you get that you can develop Consciousness to that level
when you are truly indestructible
you can heal any other person there

you can do event management

and if the nuance is like this

then why for example there we will say knowledge of this type as if yes

It would seem simple to develop and do

they often do not lead to that quickly

that a person is instantly cured there

or prevents any disaster there

because God gave

each one has essentially the same task, yes

all over the world

development of the world

the same Soul in terms of tasks

there is only one task: a person must be able to live forever

and he must know this knowledge there how to do it

so if someone hasn't learned

you can prevent disasters

at least global ones for sure

with technology there let's say direct control there

according to my Teaching

but in order to reach the tasks of the individual

need to get access to the person

this is how it turns out in my Teaching about the Soul

what to cure a person

First of all, his Soul needs to want it

i.e. there is a principle of free will

and the Soul must want

if we look at the process ideologically

that the Eternal Physical Body of the One God

gives Eternal development

it turns out that the Soul must still want

somewhere in the future or in the past

i.e. there is an element of desire

so this is this element of desire

this is the birth of a person

a person even before physical birth

never comes to earth

without the desire initially expressed by him personally

and here is an expression of personal desire
and the expression of that
that God created the Soul of man among other things
rests on the task of developing the World

i.e. the individual makes a decision
it still turns out to be up to the element
as if a creation visible to man

here it is very thin
more subtle structures occur
because the Soul is a subtle structure
it is a complex structure

before the element of creation exists
the world of the Spirit of man
not some kind of spirits
and the Spirit of man who must be born

this world is what God perceives
The Physical Body of the One God
perceives the Spiritual aspect of man

The spirit is first of all an element of the Perception of the future
because where there is no past there is yes
future
real
we get practically the same level of management
which is characteristic of the everyday level of the cell

for example for a cell if so let's say there is a person there
think through the situation
then the concept of the future of the past there and so on of the present
it is the same neutral concept
as well as for God who builds all Reality
because the cell is also located as if inside the system

so is the Spirit
located in the Infinite aspect of interaction
for example with other elements of the development of Reality
for example, people have already been created, and some part of people

and that means the Spirit of these people
interacts with the Spirit of that person
which is not yet born, as if not even created

and it turns out that why from a person, for example, yes
they are often hidden there
or the person may not think about it
how the human soul is created
because it's God's prerogative
He created everything

and the distance of this parameter
because a person doesn't think about it, maybe often
over simple truths
Well, even according to the specifics of the activity, yes
for example, he is an atheist or he is very busy

not because he can't do it
he just doesn't ask the question

what is the Spirit in essence
having an Infinite, well, sort of optical representation
generally informational
it is in the future too, which means

therefore man is not created yet
Soul not born by God
she already has contact with the future world

and for God this is the construction of His Physical Body

i.e. the Physical Body of God is built due to the fact that
that elements of information are not yet created
already exist and intersect
with future processes

and when you see such a level
then you see that a person is always conscious
chooses his path from God
i.e. well then the Eternal and the development of Eternal life

when you see it like that you
you can see basically any other person
what if he personally chose this path for himself from the very beginning
then he must live forever then
i.e., like a simple logical circuit

true to this scheme
Well, it's necessary to do a lot of additional actions
sometimes it may be a simple algorithm
sometimes complicated

if for example what I said is stated

Well, there in written words, yes

because I'm still a seminar, here's the topic of the lecture

I'm creating the lecture itself right now

and if you write it out later

and try in the form of axioms

then it won't be difficult actually

there will be a number of rules , axioms, for example, principles of methods

and that's all

and use such a system of evidence

giving him for example

Well, for a person who needs to be cured, yes.

this system

he read it

he set out on the path of life

and the Soul begins to heal the body it turns out

so this is the process of healing the body

this is the normalization of the World

just as God normalizes the World

for God there shouldn't be bodies of the sick in reality

or there are those who may have problems with life there

it turns out to be Norma

as God makes Norma

how does the plant grow yes

how animals grow

how the world is transformed

how does a person breathe at all

This is a technology of human self-healing

and when you start to look at it like that

then we can consider , for example,

such a process

what well let's assume we take the monetary phase there

development of social society

why do you need money here

if before the beginning of the development of all elements of information there

before the beginning and creation of man

there was a question about the primary level of information

where money is not needed

why does the distribution system now require money , etc.

and when you start to analyze
then you see that in order to save the World

Well, for example , with money, yes

i.e. having saved up , well, how to save money for Saving the World, for example, yes
set such a task

that is the purest way
precisely aimed at Salvation
this is the path that comes from the Soul of man
i.e. a person acting with the Soul
and as if investing in the financial system
for example, in the system there is access to information
he then has more tools

or if you put your Soul into the technology
then it turns out that technology is indestructible

i.e. any systems of interaction
there is money there
informational
so, well, money in terms of management
some information transfer processes yes
money as a transfer of information
as a flow and transfer of information

or there is technology as a system of information access
the plane arrived somewhere
the man sort of overcame the distance

when we look at the issues exactly like this
that for example we spiritualize
through the action of the Soul
then we get that the further
all the more so because the world will still be diverse
i.e. the more intersections there will be
some kind of informative technogenic etc.

therefore the world will still develop
in terms of maximum interaction

and the maximum interaction
this is what God practically gives to man
as Eternal development
i.e. the number of events accumulates for that
so that a person can live forever

and when you know the technology of working from the Soul
every event leads to exactly that
that you comprehend this essence

each subsequent event leads
to even greater understanding
namely the elements of Eternal development

and based on this, if we set the task like this
and generally reason in this way
what then how does a person, for example, consider
God ^{bless}
from the point of view of the Consciousness created by God

because it turns out to be a function of Consciousness
God determines it anyway

then here the principle of freedom again gives
will
still to a person as well

i.e. a person, ^{well}, thinking about it
how god created him
he first of all considers the element of all the same analogy
there for example is the Physical Body of the One God

It's quite simple ^{there}, logically simple
for example, ^{suppose}
what ^{about} the Eternal God
having there the Eternal Physical Body
naturally created a semblance
Well, let it be the Soul

but in reality it is really so
i.e. this assumption is what it turns out to be ^{and} the fulfillment
i.e. a real event

and why is it really so?
here is the criterion ^{of} this reality
that in a multi-faceted level of management , or something like that
make some kind of criterial conclusions, ^{for example}
need to do practice

i.e. ^{for example}, there is stage four cancer
it is cured when we think like this

and then we cure, ^{for example} , any person, ^{yes}

and then we ourselves, for example, do not get sick

and here is the criterion of this
true reasoning is that
that we are following the Will of God about, for example, Eternal development
we are normalizing both the external and internal worlds

and when we come to the concept of the inner world
then we see that the Soul actually illuminates
constantly body from the inside

for example, well, there are more questions in childhood
for example, I somehow took quite a long time
in general, that's what I was interested in
because for some reason I was asked as a child
where is the Soul
children just came up and asked
where is the Soul

I saw a specific local location
primary level as if there was a glow in the body
for example there in yours

but at the same time I tried not to answer the question so obviously
but he spoke quite softly
what we need to do is think about it
like, well, like, how can I even apply this knowledge ?
somehow I answered softly like this

and when does it mean to put it here
well for example the question now is yes

then in principle it's all the same, yes
although it would seem that we are talking about childhood
there is a certain age when children ask
the answer is clear, it will still be very well as if local

yes of course the Soul is manifested in man
i.e. it is found naturally and also in humans
and first of all in a single level, so to speak
in the physical body of a person
but so to speak so that it is located somewhere locally

can you see her
first access at first appearance
there is a glow in the heart area yes
here is the glow of your own Soul

when you get into the depths there is space
which is practically infinite

and this system of Perception is immediately yours
starts to react
that it is really very deep your Soul
it's bottomless there, it's just very deep

and that's when you start thinking like that
then you can also come into contact with God

God He also gives
first manifestation
and also there is an exit to Him
as an Infinite system of knowledge

and here it turns out
what is the personal aspect of communication with God

and in the Infinite system of interaction
there is always room
a specific action by mutual consent

i.e. for example you want to resurrect or heal
and God naturally wants this
it is initially clear since you were created

it turns out that there is only one way
you need to find the path that God really gives
in all elements of Reality

and here it turns out that knowledge about the creation of man
for example about the creation of the human Soul yes
as regions of space

This is knowledge that people can perceive.
for example in this way
what do we say if you show
this space
where the Soul is created
Perception well Perception of a person
then a person may not approach him
further as if by logical reasoning
because his logic is built here

and it turns out to show the mechanism of creation of the Soul

you need to develop your logic to such an extent
so that logic
Spirit and Soul were one

and this is the physical body of a person
only the physical body gathers ^{together}
there are such different concepts, different systems
so from the point of view of the creation of God by God

and when you see this Reality
it turns out that the physical body
must participate or be involved
in the process ^{well let's say} the universe
in the process ^{of} interaction of such levels
it means as Soul Spirit

and here it turns out
that you can act independently
knowing this means that ^{God} acts
The Physical Body of the One God
acts in the given circumstances

for this you need to understand
and here is the Physical Body of the One God
what ^{does it} consider as a given circumstance?
acts from His Physical Body
where the Body is the expression of unity

and that is why, according to my Teaching, I always show
that the Eternity of the physical body
this is very powerful often this is often
the only instrument of knowledge
which allows civilization to really be saved

because if we don't consider
element of Eternity of the physical body
as an element of Eternal development ^{there}
then we always come
to the concept of precisely "finite quantities"
behind which there is a rather uncertain system of development ^{yes}

and it turns out that the element is Eternity
it is manifested in this case
as an element of universality
i.e. the element of knowledge transferability, ^{for example}

i.e. knowledge, ^{generally speaking,} comes from God

it must necessarily be universal

and that's why when we, for example, it 's simple there
Well, we're walking somewhere along the streets
we eat something or somehow react to Reality
then we receive knowledge all the time
that passes through us
and transforms, generally speaking, the whole world in essence

and when we want to understand for example
and how in a specific action
this knowledge is manifested
this is where this knowledge is that allows
influence Reality right next to you specifically yes

just look closely and you will see
that they are specifically near you
and you can generally understand them very simply
you just need to tune in to them and understand

the main thing is to see them next to each other here yes
Nearby does not mean only near the physical body
next to it is where
Soul
Spirit
physical body
Consciousness
and God
work on a single level

here I have brought it now
Well, in general, to the culminating important thought
in this system of management in my Teaching about the Soul
what is at the level of the Soul
Spirit
Consciousness
human physical body
The soul of man
God
The Physical Body of the One God
can act simultaneously and synchronously

and it turns out that any element of the World
becomes exactly like this
how do you perceive it
i.e. unambiguous, rigid, fixed
there in some specific place

same time having complete free will

so, well, if this is some kind of object of the World

let's assume functional yes

for example, there is a voice recorder here

I can take it from there and move it to another place

but this is like a technical structure

which is defined to record sound there, for example, yes

if we are talking about a person

a person has complete freedom to do whatever he wants

Well, first of all, creatively, of course

and God in general must act exclusively creatively

when we consider the action

why are there non-creative actions there

there are wars there for example yes

it turns out that the Soul of a person

built in the Image and Likeness

it turns out to be the Physical Body of the One God

precisely built

The Physical Body of the One God is also

Well, it 's definitely arranged

as is the human physical body

and when we see these Laws

we see that the interaction between the elements

there is no physical body of a person

And

the outside world

are often also traumatic

a person can hit his leg , finger, etc. there.

but when we want this not to happen

i.e. to set an exclusively unambiguous task

so that a person does not get injured or sick there

did not get into random situations, etc.

in such a somewhat idealized way

but from the point of view of the exact future development

This is a problem that must be solved

at least to begin with for some situations yes

there so that there would be no global destruction

so that, for example, incurable diseases can be cured there, etc.

and when you come to this
from the point of view of ^{the} level of the Soul
then it turns out that your Soul
this is a tool that develops the world
and at the same time it develops
from the point of view of the environment

because it's from God
The soul is given initially as a whole
having all the knowledge
your Soul develops ^{there}
only under external observation

and when you are ^{there} for example, a person went to school
he learned something there
it is believed that it is developing

and when you look at it, ^{well, as if} with your own eyes
and you see that development is only your Perception
and not the Perception of the Physical Body of the One God
then it is clear that you are the one making this development

after all, a person sees that
from your Soul
what is he personally doing in this world
and therefore you bring this development
to another person
for example, Peace

and therefore according to my Teaching about the Soul
by the action of the Soul
you definitely give practically your knowledge ^{yes}
to another person

and at the same time you perceive it
as well as his own knowledge ^{in general}
i.e. you are doing , generally speaking, by analogy with the Physical Body of God
i.e. giving to another
you give it to him as an independent system
his property ^{yes}

for example, well, in my technology, for example, there are treatments
it is stated that it is necessary to provide the apparatus of knowledge
which would allow to be cured
extrapolate knowledge to any other situations
Well, there's no need to get sick, just treat others.

here is the principle of transmission

why is it set up this way for me?

because, for example, according to my Teaching about the Soul

that's how the world works

that in any case I act like this

that knowledge is necessarily transmitted

at the moment of action

this is how the Physical Body of the One God operates

at the moment of action

a Reality object is created

and it is also developing

so there is no time in action there is no time

God is always with us

because He is constantly present

as if at this time

and here is our task

Well, I understand

enter into a synchronous level of interaction

with Him

why is it when performing prayer

many events for a person they improve

that here it is clear His, as it were, first of all, global systems

what does God want, well, precisely in the global sense

specifically from each one

it is clear that He wants Eternal development

so that there would be no destruction from wars

there was creation harmony

but locally, precisely locally, to each person

and then it turns out that you see

almost every person

just like, for example, he perceives

The Physical Body of the One God

but you see it in the Spirit

The all-seeing spirit

i.e. I have already crossed over

to the next qualitatively new level

that the Spirit coming from the development of the Soul is already all-seeing

it's just a question of

what how to catch a return signal

translate to Consciousness

there you see this person, he needs help with something
you help him for example yes
and you may not notice this

so, to translate into Consciousness

Generally speaking, you can do it like this
so that for example in a dream if you see some kind of dream yes
and there is a certain projection of different events
then in a dream it can be translated into Consciousness
only for example the projectionally good part

i.e. for example, you think
that this part is useful for you somehow yes
some of which you kind of screen
and make the content of the dream
useful for your future events

if there is no sleep then it's just Thinking

and here is this opportunity to recycle
as if information
in terms of positive management
Well as if nothing is thrown away and nothing is as if basically without touching
you just take it and go that way
which is the way of God

i.e. you follow in His footsteps, as it were.
Physical Body of the One God
where there are no problems, for example, no disasters , etc.

and the more accurately you step on these tracks
less problems you have

so if the supporting structure of this road
is Love
and it is, therefore, Love precisely systemic, so to speak, yes
it is the basis of these let's say yes traces
then you already see further
act of creation
how god created and creates you

and every element of this movement
brings you closer to the act of self-creation

and the more precisely you approach it, as it were

You Well, for example, it's healthier there
the more favorable the events are for you

it works for you
act of creation
And
act of action
current action
it's the same thing
Man is created by God
as if at the same time for all time
and as if at a real moment in the current time

i.e. well if we consider
the situation as if abstractly complex
Well, there are some molecules of the galaxy, etc.
then God is the one who moves all this, right?
creates a trajectory for each element

then every point of a person, every cell
this
is in an equivalent relationship
in relation to the act of creation

God creates man
at every moment of time

and it turns out that if we consider this knowledge
how does he do it
then through the structure of one's own Soul
you can easily create your own body
create your own development

for this you just need to know
how God
i.e. on what like a rod axis or something
He enters information yes
how does he interact with you at all
sources

but God is completely open
It gives all the information for that
so that there is Eternal development

and when you start moving here
for example along this path
well, about which I just told you , for example

then you see
which is like the point of your creation
or area yes
or for example the essence of your creation
are you yourself
you your action
your physical body

i.e. you need to perceive the body and immediately understand
what did you do among other things
level of self-creation
this is your level, you set it for yourself

As you go up further you see
how does god do it yes
and God He does it simply in more diverse ways
He does it for everyone at once.

therefore going even further
you start doing
and at once to everyone and to myself
then you come to the usual Norm
which is not reflected in any way as an element of creation
i.e. this is a normal state for you

Here is the norm, when there is an element of self-creation
it's happening well as if without any problems
i.e. when you do it for example correctly yes
according to the knowledge of God

and it turns out that there are no deviations
from Norma
you should consider
the future trajectory of development there
future events
and make these events like this
so that you have your way
as the path you have already defined
which is already defined

so the path that has already been determined
it is in your Soul again
God has already given you this path.

so this is again an approximation
to the very Soul yes

it turns out to be a kind of sinusoidal rhythm
how does the heart work
you first go into external management
and then come back to yourself again

and this level is also the path of God
God develops harmoniously
just like there is a sinusoidal system, for example
work of the heart

and when you
well, what if we suppose to introduce a term there
"sinusoidal for example harmonic" yes let's put it this way
then we see that the management process
may actually be very accurate

i.e. it is enough to enter
let's assume the level
exactly, well, this sinusoidal series, yes
into your Consciousness
i.e. project into your Consciousness

then be able to, for example, this level
Well as if the projection level is actually
means to bring out into the structure of the Soul
Well, it would be possible to even enter a numerical series

that's why i often give a number series
which allows you to show
human healing level
namely the Soul of man

there is a very strict system of measures here, so to speak
The soul is a completely precise system of the World

and so we get control in this way
that we just enter into everything
from Consciousness
into the structure of the Soul
into the structure of the Soul's action
the tasks we need

and it turns out that we get for example there
there is a healthy and own body
we get
Well, if we work for a long time

then, for example, it is already closer to absolute health
we can get
if there are fewer people working there
more busy with other things
but he can still be there somehow
at least heal yourself yes

and when we come to such a concept
what if "the cell is healed"
or is there a person who is able to restore it
even if it's just one cell
then there are no restrictions
to fully recover

if he can restore himself by Thinking
i.e. practically an element of the development of the Soul
Thinking as an element of the development of the Soul
we are considering here
in terms of action
development in terms of action
and moreover, your personal actions
your personal development

then it turns out that this can be translated
on another person
i.e. all the principles are there
Remote Control Rescue
begin to acquire a very simple logical scheme

and when you move on to that
what do you get for example control
like for example the system of Thinking

i.e. Thinking is an isolated system
in this case
you can make very static structures in it
extend to Reality
and you will calmly get into any system of Reality

you see that when you look at
exactly your Soul yes
Soul of the Physical Body of the One God

or looking at
for example, any element of Reality
as a spiritual element
you may well get it

a perfectly precise control structure
but which has more levels of, as it were, further development
because it's not just management as such yes
this is the essence of the world
Truth of the World
where the Soul is free, calm and developed
as God's tasks there

and as an independent work
work through the following situation

make the Soul glow
aimed at
Spirit
Consciousness
physical body
it would be like a common optics yes
here you shine with your Soul
Spirit
Consciousness
your physical body
and the total optics would be directed
precisely on the Physical Body of God
on the One God

and you will see right away
what will you get
strong restorative harmonious effect
that's exactly the Eternal development

This concludes today's seminar.

thank you for your attention
