

GRIGORY GRABOVOY
The Teaching of Peace
03.10.2003

Hello
the topic of my seminar today
is my Teaching about the World
and in connection with this topic
personal management is necessary
first of all, on the structure of its own recovery

i.e. you should consider
external information of the World
as recovery information
and then you get harmony
from the structure of the organism's restoration

when working with this topic
according to the structure of my Teaching
If possible, try to work like this
so that people who are near you
or people who will be around you in the future
they could use this information
basically for myself, for my health
and so that the World around them would be joyful and rainbow-colored
and so that they can pass this information on to others

i.e. in my Teaching about the World
the first level of control is directed immediately
to the structure of recovery through your understanding

so when i'm going to manage today
through, well, maximum understanding
then you can get
the following system of Salvation in fact
well including the salvation of all
through the structure of human cognition
which is located near you
This is another method of using management
according to my Teaching about the World

so it means after this, let's say, introductory part
try to make the management for yourself right away

i.e. the task is very simple

there is a structure of the World

for example there is a concept of "The World Within Us" ^{yes}
and there is a concept of something like "the external world"

and go to the structure of the concept "The World Within Us"

when you move to this concept structure

The world is in front of you

and the way of knowing the World ^{means, for example, Love}

i.e. to know the World through Love

The outer world and the inner world

when you start to combine structure

The world is within us

and the outer world

you see yourself at the intersection

i.e. make this control

when you are personally on the structure

namely the external world

And

Inner world

i.e. The world is you yourself

man is the content of the world

when you start to consider yourself ^{for example}

as the structure of the World

then you see that all processes

that happen in you

this is interaction with the outside world

and management ^{in general} of the structures of the external World

thus, according to this technology

you can quite confidently, ^{for example,} heal yourself

i.e. to be cured with the help of , let's say, another person

basically you can

looking at some phenomenon of the World

get practically your own way

i.e. what to do next

i.e. how to know the future development of an event ^{for example}

and in connection with these, ^{in general,} management structures

I suggest we do it right now

^{in general,} according to this technology

management ^{assumes} all requests

which are set out ^{here} in the form of notes

there are requests that exist
just mentally in people
i.e. there are some future tasks

just take a concept that is quite familiar to everyone
"The world is within us"
while looking at the whole world
it is inside your physical body

for example for the Physical Body of the One God
your inner world
this is ^{basically} the entire outside world

i.e. for God
the whole world
inside Him

and if we proceed from this concept
then taking the structure of the World inside you
you immediately highlight the external structure of your body ^{yes}
Well for example skin

then when you go from the skin ^{for example} forward
you see that the outside world is very controllable

and do this ^{this} movement
just ^{like} a deep understanding
the meaning of this management

internal structure
the work of your organs
as if your internal state ^{yes}
state of mind
or the structure of the Spirit
and everything that is near you
you can benefit from it

i.e. here is the governing meaning
^{generally} embedded in the mechanism of cognition
here is the transition of light optics
"The world is within us"
into the structure of the external world

and the simplest optical technique
to make this management more ^{optimal}
it's like looking at a piece of your own skin

i.e. we can see it visually

for example, your own skin

and consider that this is, as it were, the beginning of the human world

i.e. the human body

and at the same time the whole outside world

it interacts somehow

with this body

Well, let's assume

the highest peak, for example, the World

and at the same time consider some external environment

is a universe galaxy there

it turns out that the external environment

it generally interacts with the Earth, for example, yes

on this peak

i.e. the entire external world

this is the first point of contact

human logic is structured in the same way

i.e. if we want

change Reality there, for example, external

i.e. manage events yes

or we want to make for example control

from your own health structure

i.e. we want to get well

then we must definitely

highlight

some point of contact

Let this piece of skin

this is the point of contact

then logically we come to the conclusion that

what is the first thought of a person

this is a point of contact

inner peace

The world created by God

i.e. the World of Thinking

that means exactly

with the structure of its own path

and in order for us to orient ourselves correctly , for example

well there in tomorrow

or there in the Infinite Future

it is enough to just do it this way

what is your own world
this is an intersection
The world of God, i.e. created by God for you
And
your own World
which you basically chose yourself
even before your organization

and when you come to this
for example, in my Teaching about the Spirit

it says there that the Infinite Spirit

it can form precisely local events
i.e. final events

it is not finite in the sense that it ends
oh well for example, it is visualized
let's say there's a table there's water there's a video camera
some external objects
these are some kind of formed events

if we consider a person, for example
then we see Endless events in general
for God as well

i.e. for the One God
Man is an infinite quantity

and when we look at relationships
God and man
then in principle we come to the fact that
that existed for God
there is only one option to create this relationship
this is the Infinite World

it turns out that the World is a way of interaction
God and man
well, at the logical phase of control, so to speak

when do you want to move
to the structure of one's own Thinking, for example
then you see that your Thinking
it's actually your own level
Well, in general, management of future events

but at the same time Thinking interacts
with the outside world

the rest is pretty simple

let's assume that in light optics this can be calculated

i.e. take, for example, your thought in optical expression
bring out some future events on the structure of your own
and at the same time you see
that your events are actually generally realized
as events Infinite

i.e., in essence, your management structure
it is an Infinite structure
expressions of God

when you want to make control for example

In general, Infinite

in the initial action

then you actually have to first of all
see

and what did God want to do here in the World in general?

not just specifically for you personally, for example
and in general this is what God wanted to do in the world
so that your life would be wonderful, for example
and you could in this World
to do something there
any free creative actions

i.e. it would seem that this is the first level
this is what God wants to do for everyone
but you are in this system
you sample your own behavior

because in the structure of my Teaching about the World
The main thing is that the person
in a multifaceted, let's say, yes, in a changing World
must make such management
what is he

Firstly, it acts according to God's instructions

i.e. actually acting means as a creator
and acting as the One God acts
in the development of this World

He takes it upon himself, basically.
the mission is actually the same
i.e. he must interact with the World
as God showed him

by building this World

Well, for example, a tree grows and there are apples there, right?
or there are some pears or fruits there
then it is clear to a person that he can eat them, for example, yes
when they are ripe

i.e. it is clear that God created, for example
well, some specific control systems or something

i.e. for example if you do
future management system
then you get your action

and when you, for example, receive in your action
the whole outside world
then you see what we are dealing with
first of all with a system of self-government

and now I'm basically proposing
make a self-government system

i.e. if you take for example
their own events there yes
and express them
like the internal structure of your body for example
then you will see that the self-government system
this is what you can
due to the actual function of the organism
receive as an action

i.e. I am now offering you
more in the aspect of healing
make management
according to the structure of self-healing of the organism

for this take all your events
enter
into the internal structure of the body
including health events
and try to concentrate
your physical body in this way
so that all the phenomena of the World
turned out to be
inside your body

start working
I will work with you

i.e. you try to do the best management quickly
i.e. without delaying the management to the level of that
that some problems, for example, can be solved in the future

i.e. try to make the control in such a way
so that you can get the result
still, as soon as possible
I will manage with you

just try to work more on information
I sometimes speak quickly on purpose
so that the volume of information is simply large

The main thing
solve your own problems
through the structure of Macrosalvation

then when solving these problems
try to solve them realistically
i.e. what is there and your own organism
and how can a person recover yes

in case of any problems
i.e. how can this problem be identified at all ?
in the body

Well, let's assume there are simple characteristics
identifying the problem
let's assume a person there can cough
he may have a runny nose , for example
or he may have it there
some internal pain sensations yes

if there are obvious problems
then they are visible in terms of that
that a person perceives them
let's assume these problems

does not perceive these problems
then he still has to solve them

after all, the organism
from the point of view of his Eternal existence
must develop forever

and so when you enter control
as if into myself and into my physical body
try to make sure that you

obvious for example systems yes
shifted to some one area

here's what exactly hurts you, for example , if
then you should kind of push it forward
to the area of painful sensations

i.e. the area of painful sensations
should shine through inside you

and any other area that is unknown to you
but it also needs to be taken under control
you will have to anyway
this area
introduce into the physical body

because the main level of management
and Event Norms
is that
that you enter the system
as a certain i.e. known yes
for example, there is a cough or some other symptoms

you introduce this system as if
in yourself
it's clear that there is a cough at some level of organs, yes
if there is any pain
it's clear where they are

if there is no pain let's assume yes
and in general the person is healthy
then the management is
it is precisely in the allocation of the external phase
i.e. what events await this person ahead
i.e. how healthy should he be ?
in their future actions , generally speaking

this way we can make it much easier
let's assume the left side of the body
to put it simply
left hand
left leg yes
left half of the body
not including head
this is the management of external events
that you don't know about
i.e. you just logically set this control

and the right side
for example, you know about it
about some problems there, their own or others

and the connection of this boundary line
like, left and right side
make your own whole body

pay attention that when you do
such a whole body
you are actually forming
as the external Reality of the World
that's how you form
your inner level

start working now from the beginning yes
i.e. start working with your own body

and at the same time try to understand differently
for example, understand on a Spiritual level

i.e. if you, for example, well, there is a level of words
it seems fast
anyway then work on the Spiritual level

because it seems to be a certain speed
it will be needed anyway

so from the management point of view
which you do for example yourself
for myself
select some external control object

take for example
let's assume any object in the world yes
for example it will be a cat or a dog yes
some external object of control of the animal world

and try to make this control object like this
get through it means
information about the entire external Reality

the technology is very simple
you only need to do everything
find out all the information
about the whole outside world for example
through well let's assume there's a cat or a dog
or through a tree

what needs to be done for this

First of all you must
the easiest thing is to know everything at once

then the question arises
what is it for then?
here it is, this external control object

but let's consider this analogy
as God does
for example He makes the outer world
but at the same time He still knows everything

then the question arises
Why does He do such things, for example?

therefore the answer lies in that
that we must first of all take action

why do the action
in order to have, for example, Eternal development

also as the Eternal God
having an Eternal Physical Body
It develops by itself forever.

therefore the World which He created
he is also Eternal

and at the same time when you, for example, well, you heal yourself, yes
or treat someone else
then you should basically know
that the whole world
it is very flexible, i.e. very controllable
very dynamic system
which was originally given by God for that
to have Eternal development

when you understand this way
then you basically the whole external Reality
make it mobile enough

then the next level of training
is as follows

you take it by analogy of action

find through any object of Reality
all information about the World
and enter this information into yourself
again into myself
as if along a trajectory through an external object

in general, the most important thing in principle in this technology
that you do not touch the object

i.e. you, for example, pass on information, yes, in fact
not through a cat, not through a dog, not through a tree, for example
and you just come into contact with this information
in general, quite carefully, i.e. a little bit

and here is the reflected signal
contains all the information of the World

Logically it's clear
that any reflected signal
contains all the information of the World

but for example now if I put
and now I'm doing it for real

i.e. I put information about health restoration
everyone sitting in the hall

then in principle I am first of all
for example, I bet on myself
if more it is an element of treatment yes
from some diseases

but I am putting information
generally speaking from the other side of the world
first of all on you
i.e. on another person in general

and the concept of "order" will be absent here
a person who, let's say, restores someone
Well, he actually always does it
at the same time for everyone

and this is the main level of development of the World
it consists of the following
that everything that is being done
in terms of, for example, health restoration
in terms of managing Reality
this is always done for everyone

and so if you do
to know the World as a whole
then you will still get to know him one way or another
and you will know immediately

the question arises
than you know

why do you know about the world for example yes
all you need to know
and what does God give you, for example?
or what does the person who is nearby give

then the answer is in that
that your Soul is designed that way
that this information is in it
but it is in the developing Soul

i.e. development of one's own Soul
structuring towards development
this is the knowledge that you receive
in order to be cured, for example
in order to do for example Salvation
there from a nuclear explosion yes

let's solve a specific problem
for example April of the following year 2004

an airplane is flying and on board this airplane
For example, there are nuclear weapons , yes, he transports them.
how to make it not fall
this plane
and there was no explosion

in principle, well, it would seem that it is far enough there
April 2004
and in principle now this does not specifically concern people
but to highlight this faction of events
and make sure that this plane doesn't crash

for this it is enough to take
the same image of some external World there
let's say yes cats trees dogs some kind of dust
or remember how it is described in a microscope
for example , there are cells or molecules

and through this system

go to the plane structure
just go out and fix it

i.e. one level of the current World is enough
remember now
and reschedule the event
in fact, on the structure of the future
and you will get that the plane does not fall

this same technique
you can use it for that
so that the plane you are personally flying on does not crash

i.e. it is enough to highlight
some kind of management structure in the current time
and link a future event to this structure

this can be generally directed
on all airline planes on that day
so they won't fall yes

another question is how much in terms of management
for example, you would have access to
Well in general, should I do some control ?
for how many planes
can you do control yes

here the next question arises
if you are doing for example
well, solving my own problems
you have your own personal events
and you want them to develop favorably

then the status of the Eternal development of all
this should be the primary status

i.e. you should actually do it this way
what do you want
so that no information object is destroyed
and for this you will still have to personal events
actually make it like Infinite
because the World is Infinite in essence

and when will you learn
make your personal events endless
you will get that you are in harmony
and your inner world yes
it corresponds to the external Infinite World

after all, the Creator created Reality this way
what is the inner world
it must match
The endless development of the external world

in the world, in principle, everything is harmonious
it's logically clear

and if we want to understand
how does a tree grow, let's say, well, basically that's it
how it grows from the Creator

Let's imagine a simple picture
there is the Physical Body of God
God took a tree in his hand
and we want to understand
if we exclude
the concept of "oxygen", for example, and "soil", etc.
in this case how will the tree grow

and when we ask the question
We answer it very simply
what if we take the other hand, the left one for example
and we put a person on this hand

then their comparison
that there is a man and there is a tree
we understand that a tree, for example,
grows in relation to a person
understanding occurs at the level of the Soul

pay attention
what if there is also a tree on the left side yes
understanding can be
only at the level of the reaction of the human Spirit

that's where the difference lies
that understanding is at the level of the Soul
comes when we look at the human body
body existing from God

and if we consider
let's assume well the principle let's assume there is quantum mechanics
there is a left-hand drive and control level
i.e. God is revealed as left-handed

and if we assume we are considering

level of growth of matter
at the level of management, let's say
then it turns out that the level of, let's say, the left hand, yes
level close to the heart

and as I said this is the level
which generally shares the structure
on all phenomena of the World
i.e. those that are not defined

we agreed on this
what is the left side
these are the relevant events
to all external elements of Reality

and it turns out that if you need to recover
let's say from some disease
then you fix it on the right side
as if in a known information system
but it's still on the left side anyway
any unknown quantities are on the left side

i.e. God is the Creator of all systems
because He introduced it among other things
the concept of "unknown quantity"

if all quantities were known
it would be known
where is the location of God
and then the world would basically close up
in terms of , well, like, a logical level of information closure
and the world cannot close

and therefore by analogy with this
so that there would be Eternal development of the World
a person must essentially create phenomena in such a way
for which it is created
it is precisely the level of the next development

i.e. any phenomenon
shouldn't it have a finality or something?
in the phase of its disclosure

Well, let's assume the person recovered.
Now I'm putting the control on recovery
i.e. there is a quick recovery
but at the same time recovery

it's still one small chance
for let's assume yes the structure of Eternal development

we can talk about that
that we are actually doing something
when people learn to manage in reality

i.e. they have a real structure
allowing them, for example, first of all
self-heal

well, for example, by mastering self-regeneration technology there
then manage events
be able to teach others

if we are talking about that
that a person, well, let's assume there, yes, can have
some symptomatic systems of improvement then
or even complete health
then in general this is only one step towards that
to have Eternal development after all

in the concept of Eternal development
the entire external surrounding world exists

it turns out that a person in principle
he is inseparable from the outside world

i.e. if he wants to
and in general such a task exists from the Creator
develop forever
then it becomes one with the whole World
i.e. with all the information of the World

and he is at this level
docks
with the Physical Body of the One God

Now let's take a look
and where does it connect?
precisely with the Physical Body of the One God

we considered the option

that a person stands on his left hand for example yes
means the Physical Body of the One God
and looked at the relationship, for example, with a tree

but if we consider just a person

then we see that it is his height
here he is standing on his left hand
comes from contact
human legs
human heels
touch, for example, the palm of God's hand

and if we look at this process
well, let's assume there is such a common term there
"My soul sank into my heels" and the man was afraid of something

it turns out that the subject itself is like fear
This is an element that is actually harmless to humans.
when a man stands on the hand of God

because God
closest to a person
this is his Creator

if the Soul sinks into the heels
it's clear, because it's from the palm of God
it means it goes into a person
Well for example through the heels yes

and it turns out that the concept of "fear"
in principle, it does not exist in the world
when God is connected i.e. united
with a person
at least at one point
at least with your heels

and if we find
for example, the structure of one's own development in that
that we are in contact with God somewhere
at least with an elbow once
then it becomes clear that man is already indestructible
i.e. he basically has no problems
he has nothing to fear

but God created man like that
that for example the first man appeared yes
then people are born
God is always there
participates in all processes

and continuous transmission level
cellular level
i.e. in the cell contact always exists

and any person who was just conceived there
then was born
he already had contact with God
from the primary level of human organization

therefore if we start with logic
search for this level
we begin to think correctly

pay attention here
that the correct thought is the level
actually the one I was talking about
level of human organization
from its initial level of creation by God

and you feel it with your whole body, yes
the body inside seems to be stretched out
towards God

and when you see these communication structures
you get the right Thinking

i.e. in the World it is quite important
have the right Thinking
to navigate the world correctly

This is one of the technologies of correct Thinking

but it is correct Thinking
This is generally speaking normal health

if you are busy
and you, for example, don't have time to devote
some action to one's own health
well, sort of continuous, yes
then you will at least go
on the structure of correct then Thinking
"correct"
from the point of view of interaction with the World
in the structure of Eternal development

as soon as you
for example, from the magnitude of Eternal development
let's say you get distracted somehow
you start to move on immediately
to the peripheral

as if investigative control systems
and Thinking does not become concentrated

i.e. one of the characteristics of correct Thinking
this is concentrated Thinking

at the same time I am now speaking simply
about Thinking as such

i.e. I'm not talking about that
what a person does right
either he thinks in terms of form or in terms of goals
right or wrong

I speak
in principle correct thinking
from the point of view of the technology of contact with the Creator
i.e. precisely with the One God
exactly with That
who originally created man specifically

if we consider the interaction we assume
for example, well, plants and God
then it turns out that the structure is well correlated
with the concept of "correct or accurate Thinking" for a person
for a plant it will be
in fact, the development of the human body
i.e. his normal life

Please note that all plants
located
let's say in a cultivated area and near a person
they grow in general according to the Laws, well, which
then a person
according to which a person allows to collect there
so he harvests for other people or collects it himself

i.e. cultivated plants
directed at a person
or any others there create oxygen mainly, etc.

i.e. if we want to see
how is the management carried out
for example from a person to a plant yes
then we see
what from plant to man
First of all we see
the level of assistance in human development is going

and thus our own position for example
i.e. when we consider the phenomenon of the World
from the point of view of its Infinite development
we must understand
what is this phenomenon
needs our help first of all
i.e. we must protect the environment
i.e. to create the development of the plant world
and these systems should also help us

i.e. the simplest element of treatment
are you considering
the structure of the development of man and God
simultaneously
in relation to the plant

i.e. for example man and God
solve some common problem
for example, environmental safety of the area
there are not only plants there

and with all this
you are considering the next level
that plants have the same structure
Infinite development
as for example the Physical Body of the One God

then you see
that a person is already in the Norm only because
that the plant is also aimed at Eternal development

therefore the logical conclusion is very simple
as soon as we
any object of information
first of all, well, that object that is considered alive, yes
from the point of view of human logic
we direct development into the Infinite Channel
then the person himself turns out to be
at the level of Infinite development

therefore in the World
one of the fundamental Laws of the World
everything is arranged like this
that the more elements
having Eternal development
especially since it seems to be in an Eternal environment
the man himself is located

and it turns out that if you
all elements of the World were created by the Eternal
then man is naturally Eternal

i.e. the difference in this case
God and man in that
that God is originally Eternal always
and man is Eternal when the whole structure is Eternal

so make the following control
take all the phenomena of the World
which, for example, exist in your Perception
or in general all external phenomena
and try to do so
so that all the phenomena of the World
were actually aimed at solving your problems

try to work this way
so that the phenomena of the World are understandable to you externally
how the external phenomena of the World
react with you

try to understand the process
any process must be understandable

in general in my Teaching about the World
there is such a principle there
that any external information
must be announced
i.e. there cannot be, for example, information as if from nowhere

when you are busy with the whole world
then you control all the information in the world

and most importantly try to work productively
those. all phenomena of the World
solve your problem

you must see
that you work productively with results
Now

if in the management of the phenomena of the World
For example, we do not record the exact result
then the control becomes unstable

the result should be clear

try to come now
to the structure of understanding the result
i.e. what do you mean by result

You see, I am slowly approaching the result.
precisely to the realization of the result

first comes management and results
you are not distracted, i.e. you achieve results
and understanding the result comes later

understanding
what is included in general besides your management
what else is included in the result

why is the world arranged this way
that first there is the phenomenon of the World
then it develops
and some investigative actions are taking place

just act by analogy
First the World i.e. first the result
and then you look further
the structure of understanding the World
i.e. understanding the result

the process is very simple
by analogy you just have to work

now that you are already going through such levels
such as the level of understanding of the result
it turns out that you are in the system of understanding
highlight the contact level
which God Himself gave you initially
by interaction with the World by its
in general, in terms of structure
namely the True understanding of the World

what is the world
from God's point of view
how God wants you to see the world
as He wants
this is that level

Now I have shown exactly this level
you just look at this level
it becomes immediately clear

Why for example, this or that action yes

for example some

Well, for example, there is an unhealthy state of the body in some way
why are some actions distorted

i.e. the world becomes transparent

achieve transparency of the world

once you reach the transparency of the World

you begin to see the effect and the cause

i.e. you start to see

which is basically okay for example one of the postulates

there are no consequences or causes

there is only God acting

at this time

in this place

and your task

to assist i.e. to participate by searching

actually located

complete freedom of one's own personality

when you find yourself in this place

you get harmonious and comprehensive management

which by the way immediately becomes useful

for the whole world

i.e. everyone starts to have your creative experience

here in my Teaching about the World

just when you are co-operating with God

you get it right away and for everyone

and at the same time, for example, any kind of tough situations

some confrontations are happening in the world

let's assume, let's assume there is a variant of the Chechen problem

the option there is Afghanistan, etc. or Iraq

in fact, all people should live

it doesn't matter there, but from their territorial location

or let us assume the political structure of the organization

Well, it's not them, well, logically speaking, who are to blame for that

that they ended up in this place

and why in relation to them

some kind of repressive system must be used

i.e. how to make people live yes

regardless
from political, social, religious and other circumstances

when you start asking the question this way
then it turns out that the Creator is God alone
created for example yes the world
for human development
He meant first of all
that you should have the right to free decision in general

i.e. you should freely choose
that there are no wars
i.e. you should freely choose
that there is no destruction system

when you choose it freely
then it is clear that you choose it freely
every person chooses this freely in their Soul

what is meant is the concept of "choice in action" in action
and when you choose this action
then everything becomes normal

but under a different political system
under different socio-economic systems of governance, for example
how to express human freedom of action

it turns out to be the only way
the ability to influence events, for example , directly from oneself
being at home let's say yes

and when you come to that
that one of the forms of management
this is influence, for example, personal
but after that of course it is desirable
how did you decide on the purpose of influence
and made the management
you did you expressed a free action
as does, for example, the One God

but at the same time you must
I think it's important to make sure that
what do you do management right
from the point of view of, for example , that
that you are in some
Well, in general, it could be very small things
were convinced
that the management is really correct

i.e., for example, achieving some small personal goal

if we are talking about health, for example
so this is health restoration
if you think that your health needs to be improved
then you have to correct it yes

if you think that for example your health
it is not necessary to restore at the moment
but it's yours
your will

but in the future, when a person masters technology
I think he should still try
spend time on yourself as much as possible
besides the fact that he saves and helps others there
whenever possible, be sure to draw attention to yourself

so in the structure of those, well, rescuers, let's say
those who save
it often happens very often
that a person is engaged in the external world
i.e. so that there are no global catastrophes there
or even local
people

and at the same time, he generally takes care of himself
only in general, well, in some such situations
when well it's kind of necessary already for sure yes for example

so this is the structure of the world
that's essentially how it's designed
Physical level of God
i.e. the Physical Body of the One God
arranged at the level of reactivity only in that case
if God somehow hits the mark
as if in non-equilibrium control systems or something

as such as such in general as if
in a completely nonequilibrium system
or even in relative terms
He can't be there.
God
It may be in an unequal system.
only in the system
so when He puts this nonequilibrium system
as a control system

i.e. He creates it consciously

and note that many human diseases
they are because the person himself seems to be forcing
he sees that he can, for example, get sick there
or get into some situation
but he knows it and goes

i.e. he understands it
he knows it
but believes that some problems will arise
they are not serious

but if you think about it
what let's suppose, well, if for example we think about it
over nature there origin let's assume there wars yes
it is often some underestimated action
could lead to military action there, for example

but here we are talking about the individual as such
It is important for the individual to highlight the structure
when the action which
for example, a person does it for himself
this action is needed first of all by him
for example, if he doesn't need this action
he must refuse this action yes
by freedom of choice

and when you are
between there is a choice well decisions
you can choose an action you can not choose
then the question arises
and where is the presence of God
One God for example in your choice

i.e. where exactly God points
and where for example well so He for example does not indicate yes

because according to logic
God is there and here
He created
all external Reality and internal

it turns out that choice is movement
this is precisely the structure, well, as if instability , yes
structure requiring further development
and at the same time by analogy with that
as the One God does

and try now in the technology of choice
in the technology of choice
solve problems primarily related to your health
i.e. by simply choosing a solution
and then external control

I will work with you

while working, try to go as deep as possible
solve the problems of the people around you
either here or somewhere else

take a deeper look at them
and solve them
decide exactly

i.e. we need to take the solution level
i.e., in principle, a certain level of responsibility
for the decision
i.e. as soon as you start to decide
you have to solve them sooner or later yes
It's better to solve them earlier

so try to do it
theme of time concentration

choice of solution
this is a system of development dynamics
and direct this information to the solution
to the decision

By the way, this technology is quite complicated
but it is very effective
due to the level of electability
i.e. the level of practical uncertainty
solve the control system

Are you familiar with this condition?
that as often as the internal well as if some instability
in the election decisions
leads quickly to the right decision

and this instability
must be specially formed
because only sustainable systems
then where is the opportunity for development?

it turns out that we ourselves are laying the foundation for the possibility of development

through "a system of sorts of instability" in quotes

at the same time there is a real level of the Soul
which is absolutely stable
but participates in this process
and there is a logical phase of instability formation

and instability
this is basically a system of objectifying a solution

i.e. for example if you have
several possible solutions
then objectively it lasts longer
the stable phase is the most objective
the most accurate , as it were

at the same time I speak all the time
you work on it all the time

Right now it's management that's going on
to solve your problems
by simply adding dynamics

i.e. your Soul actually comes out
to the level of logical thinking

Please note this is a very special action
when the Soul comes out
to the level of logical thinking

By the way, this is the first time I'm showing this technology
precisely as a fundamental technology

and now try
so that your Soul thinks the same way
how do you set the logical phase of control

i.e. to think with the Soul also so that it
having contact
with the whole external and internal world
solved your problems
which you have as current tasks
because the Soul often solves earlier problems

In fact, this is the work of the Soul

just a technology of working with the Soul for that
to solve your problems
and through the Macrocontrol system
all over the world

this training will be quite long
i.e. during the next ^{lecture} part
the task I set
decision making and management
you decide constantly
your tasks may just change

for example, you solved one and now you are solving the next one
you solved one, you solve the next one

but something similar to a brainstorming ^{option yes}
there is such a term when there is a chain of some tasks
and they are constantly being solved one after another
in terms of management

but in contrast to brainstorming
in this case you work with the Soul

don't forget this on logic don't forget

optical line of the Soul
start to see
this is a mobile very mobile phase

i.e. the level of control of the Soul grows from the body
it looks like optics
where at each control point
Infinite quantity

i.e. on the one hand
it seems like it's like an optical block that's finite
it is absolutely clearly visible on the optics

even with external, ^{so to speak,} digital control
and on the other hand, every point is Infinite

i.e. for the Soul logic is Infinite

Be extremely careful here
at this control point

because it works out
that when we perceive

some static object
logically
there is a table there, let's say
any object of information
then for the Soul it is an Infinite quantity

what I told you about in today's seminar
what to give Infinite properties
any thing is necessary

it means when logic connects with the Soul
we do it

the question arises how do we do this
God shows
where does he show
how does he show it to us

Well, for example , you have some problems there
Well, not serious in terms of health
you don't want to solve them
i.e. well you don't think they are serious
and then God does it

where does he do yes
Well He gave you
body
for example life yes
future events
and gave Peace

this is how problems are solved in the world
God solves your problems in the world

when the degree is already complex
i.e. a person is forced to react
and it is impossible not to react to him
he has some kind of complex disease, for example

then it turns out he solves his own problems
in the World

treats himself, for example
or someone else is treating him, etc.

and it turns out that there is a choice
between the decisive person
are problems there

but not related to health yes

and the choice between a person

let's assume that your health problems are decisive

it consists of the following

what does he see the world

as a World to be governed

i.e. the first yes

which needs to be managed and helped more

and the other is forced to do something for himself first

and then make it different

i.e. here is the disease

it is still a reduction in the amount of control

in relation to the entire external world, as it were

he is forced to take care of himself more

from this point of view it turns out to be inappropriate

have some complex diseases

that means in terms of precisely the harmony of development

that's exactly how the Eternal development of the World

because the Eternal World must be controlled

in essence, from the point of view of all the same

a practically healthy person

but maybe there are some nuances there

that a person can do something

minor illnesses

don't pay attention

it's his choice

but on the other hand

it is desirable to be practically healthy

then it turns out that practical health

this is the level of development of the World

i.e. God set a task for man

so that he could come

to the system of practical health

and it turns out that this is the mobile phase

which you are currently doing

this is the level of practical health

level of practical health
when a person, for example, has normal health
or more or less they don't burden him there
some minor problems there
he controls the external environment
and the external environment is also almost normal

so now I am at the level of Spiritual knowledge
actually passed on the information
that when a person is practically healthy
this means the outside world is normal too

and when the outside world is normal
it turns out that a person gets more for that
to be factually healthy

we are entering a phase of management stability
Now lock the control

all your tasks that you solved
must be recorded
at the point of stability
i.e. well, to put it simply, get well soon

get well here first
at this point
start getting better
at the point of stability
you don't have to choose a solution
you have one solution

you need to get well
get well

who is not sick and will not be sick
we need to do management related to that
that there are no diseases in the future

in the concept of "recovery"
I put in a healthy outer world

hence
if there is an ecological situation somewhere
not normal
make the management so that it is in the norm

if there is somewhere
let's assume there are wars and some conflicts there

make sure they don't exist
i.e. create a favorable environment for everyone
life
at all levels
everyone finds their own area

and so I brought it to that
that everyone has their own World
in which he works

i.e. your Soul
works in the structure of this World
which is yours personally

i.e. you work in your system

and no matter what anyone says around
you still do management first of all
which concerns you
originally by order of the One God

i.e. except for the One God
In principle, you have no tasks ahead of you
in essence, it is precisely the Eternal Development
I still didn't put it

other tasks you set yourself
are some external tasks there

but it is best to consider
structure for managing the structure of the World
according to my Teaching
precisely the tasks set by God
and the One God having a Physical Body

i.e. basically the same as you
having the same attributes of an ordinary person

i.e. when you consider it
it becomes easier for you to know the Action of God
in the same structure as you do

now the method of analogy
you just performed a certain control
where it is clear enough
that you, for example, for example, got healthy there and helped others

look how god does it

the same person

God is naturally a man

initially even yes man

He knows the most about a person

as God does

and it's immediately clear what needs to be finished, as it were, yes

it's immediately clear

and I got to this point using logic

but if you concentrate

you will see that the controls are very tightly connected there

In Spirit

With soul

there the action of Love is absolutely clear

aimed at everyone

at once on all at a single point of action

Love is shown there to everyone at once.

and it is clear that well, this is the basis of the World

Love given by God to everyone initially

She is personally present in everyone

as the structure of its action

i.e. Love can heal

it is possible to make some specific decision

completely free

the main thing is freedom of decision

and here it turns out that a person

having freedom of decision

he begins to think creatively

he starts without any heuristic option

or there is analysis or brainstorming of the so-called

already live harmoniously

in a natural system

and to see correctly and to develop correctly

i.e. he becomes like he was at birth, yes

God gave life to the child

but the child still develops correctly from the start

say that the child is developing incorrectly

here's one that can't be there, for example

well, how about doing some personal actions

like an adult

in principle it is impossible

because I exclude it of course
there are some pathologies in the system
and here is just a child who is still in diapers
it can't develop on its own, it's wrong and logical
he always develops correctly

but at the same time he does not participate
in collective discussions of some process, etc.

therefore a person has a period of life
when he does everything right in general

the question arises
how does he do it

for example, just a child
which we assume was just conceived there
began to develop, etc.
and then how to say it
that it kind of produces some kind of effect
according to one's own development

by analogy with that
that there is the Physical Body of the One God
The One God always does the right thing

we can say that the child has a level of control
which allows him to determine his place
in this system yes
in this environment
i.e. here is its location in general
his entourage there, etc.

and when you look at this process
then you see that the control comes from the child
which would seem to be wrapped in sawdust there
and it seems like he can't do anything special
besides eating and sleeping there for example

then its management
this is what is happening around him
i.e. well, for example, the correct actions of the parents there
some maybe those that still require it
that parents should finish their studies and learn something
or there is some kind of environment, etc.

so it turns out that the child is already in control

that it is in certain conditions

and man also controls that
that he is in conditions created by God
initially

after all, everything external was also created by God

God succeeds
from God who created the structure
naturally there was a technology for creating
as if the correct forms of correct reactions

and here it turns out that we are basically coming to the same conclusion
that God created the world so
that a person can be in it correctly
i.e. to manage correctly in fact

i.e., he can, for example, reach that structure
that for example there are no wars and no destruction
he should just at this moment
to realize oneself as if so correctly
that he is internally this World
takes you to this level

i.e. he seems to be bringing out his own World, yes
interior
but it turns out that it is transformed
the outside world

well, even in my practice, for example
and in the practice of my students
I know that the solution to the problem
often consists of
that he is a man who must simply find
as an internal fundamental way
or how to get into it
well, like when solving a difficult problem

well or maybe it won't even be hard
namely, when solving a problem
here is the exact resolution structure
this is the developing Soul

this is a very important concept
such as "evolving Soul"
because God originally created the Soul
having all the knowledge in essence

and when is there a concept of " developing Soul"
this is already, in principle, the work of God in general

but the work of God that is recorded
i.e. perceived by Consciousness
logical level of Consciousness

and this is of colossal importance
it means you are doing work that is indestructible

and with all this
you can then naturally recover there, for example, yes
just the amount of time there
something simple let's assume a disease
or even some small troubles
less time

complex
just more time
and that's all but nothing more

therefore, any structure can be restored
let's assume that we do a resurrection
restore some destroyed structure
resolve the regional conflict there
to make it so that in principle there would be no wars , let's say
but this requires collective participation
i.e. it is not just the awareness of one person that is needed

after all, God gave freedom to everyone
and everyone should strive for this

but that they strive for this
they must have technology
People
because if you don't have the technology
then what can they do in principle ?
without technology
a person in principle is basically
Well, first of all, he doesn't know what to do.
and in general you can't even ask him

i.e. God gave him knowledge initially
which are in the Soul
but for him to implement it
he must be logical
understand this

hear and accept

i.e. to understand that it is so
I need to make sure that the control works
for example, yes, there at any distance

if he increased one cell on his finger
he can guess logically
what does it mean naturally it works at any distance
what's the difference yeah

but to be logically sure
he must do two or three remote actions

let's assume even I when
I did diagnostics of aircraft there
there were many protocols
diagnostics for example in the field
diagnostics by aircraft number
diagnostics of a flying aircraft

i.e. nevertheless, they were all absolutely identical
correct diagnostic results
but to make sure that the systems are different
I did this work anyway

i.e. different systems, distant or close
as if perceived equally

also in the World
The world is not essentially distant from you.
who cares
some number
it's the same information
the plane is also information

your Perception is basically a unified environment

it turns out to be a single point of information
i.e. if you have
for example only one level of information
then this level it can be
namely general information

i.e. the whole world
can be one light level
your Perception

that's why I, for example, don't make a distinction
between let's assume that you are doing this
some big problem
or small
or the problem of the World
or a problem with a person there

for a person, generally speaking, everything is the same
as well as for the One God
any phenomenon has equal status

when do you come
to this level of understanding of the World
you see
Well, first of all, then the Soul becomes lighter

because the world
as if fairly evenly
and quite calmly, as it were
around begins to develop

and secondly you see that your Soul
this is also the level
which you basically do on your own
you can actually develop

because the level of development of the Soul
this is absolutely not the level of knowledge for example

knowledge in principle is generally speaking something completely different
knowledge can be accumulated there books there etc.

and the Soul which originally has
all knowledge is from God
its development
this is the structure of the actual Action of God
You can develop your Soul if God wants it
and He, for example, gives this development

and so that it is continuous and free
it turns out that the level is, well, actually, sort of self-development, yes
the level, in general, of the development of the Soul
towards Action
this is a pretty serious level
primarily for the human personality

because if a person has learned
develop your own Soul

this means he is in unity with God

with the Physical Body of the One God
he is especially healthy yes

the easiest way
if it means it goes here correctly
then naturally God has a Physical Body
it's always great in essence

in fact, he can, for example,
just like a person in principle
a person can master technology if he can
then God simply has this technology
he can restore his body
some management actions for example yes
physical body

it turns out that we have that status
that one of the technologies of interaction in the World
human
there is God and man
this is a level
when a person acts the same way
how it works
for example there is the Physical Body of the One God
and at the same time the person becomes healthy
because it works correctly

and how to act correctly
I have already told you a lot about this
secondly, this can be learned through the development of the Soul

and that's when the concept goes further
development of the Soul
you see that you have such a status
that your Spirit becomes Infinite
as at the point of action
and at the resting point

as soon as you reach this diagnostic value
come
it means your Soul is developing
therefore you are doing the right thing

why am i still introducing more in today's seminar
diagnostic systems in particular
because the world is infinite

and choose the right path
this is a kind of diagnostic system
which should exist in you

i.e. not by studying large criteria of external
yes, the world is endless
you won't waste endless time
to understand correctly
what to do and where to go

but you need to have an internal diagnostic system
which will guide you to the right action

and when you have this system
then you act
under any external circumstances
Right

and in my Teaching about the World
This is the main principle, generally speaking

and the fundamental Law is that
What

actions
with its own control and diagnostic system
based
on Action
Physical Body of the One God
Spirit of the One God ^{yes}
Souls of the One God
or His Consciousness
or other human- like systems
these are the correct actions
which develop the human soul itself

and when you further develop your Soul
on the structure of that
are no ^{local} conflicts
so that there are no diseases, ^{for example}
or some other small or large disasters
It would be even better if there were no troubles

then you get
something ^{like a field} of development of the Soul
which you have formed
it begins to influence the external world

if someone else does the same thing
there is an even greater influence

and it turns out that the World is then formed
through the structure ^{actually}
your own control
where you participate as an individual
but at the same time all others participate as individuals too
they don't bother you in any way

and in principle according to the interests of the One God
you don't even cross paths with them
because God puts before everyone
individual task

common task
this is only the development of the common World
make it Eternal
and how each person will make it Eternal
this is already ^{sort of} his personal task

and that's why I always say
that it is enough for one person to learn
just save the world
and then it is clear that the World will not be destroyed

and when ^{does that mean} everyone has already learned ^{yes}
and the World is not destroyed, in many ways it is a factor
that civilization exists and develops
this is the knowledge of people
who are able to implement this information

i.e. they know how to make it so that
that there are no global wars ^{of a nuclear nature, for example}
that there is no global chemical bacteriological destruction ^{there}
these are also the actions of the developing Soul of people

that's why it turns out
what God always gives
exactly that level of management
which actually brings a person
to the level of, ^{in general,} one's own realization

i.e. a person begins to implement control
based on that
that you are developing your Soul
into the structure of the external world

and you receive from the outside world that
which in general can only be obtained from that
that the world is exactly like this

i.e. here is God creating the World
got the same thing
and thereby formed His own Spirit
The spirit is the same as a person's

i.e. God has the same Spirit as man
where he made the management in the World
and received from the World what He wants

also a person
the only difference is that
that a person does this with his Soul

and it turns out to understand and synchronize
for example with the Action of God
we can do it here
absolutely unambiguous control
that man, for example, and God
act in the same direction

but if for God it is a Spiritual action
for a person this is the action of the Soul

but the Spirit is an Infinite quantity
therefore, by analogy, a person has it
in the action of the Spirit of God
The soul is also an infinite quantity

so it can from the point of view of human logic
develop infinitely

Now let's do this training
from the knowledge of the Infinite and the development of the Soul
precisely from the structure of knowledge
make the controls like this
so that you receive
level of implementation of own tasks
precisely from knowledge
that the development of the Soul is Infinite

knowledge is simple in principle it is known in general
but I showed it technologically
i.e. try to remember the technology there
there you will briefly recall

or at least ^{how to} quickly comprehend it
and try to do so
so that the action of the Soul
it came to the point that you
gained control over their own tasks
i.e. their positive decision

you will work now
I will work with you

Please note that
what I work
as individually ^{and with the task of each}
and so with the task, ^{for example,} of those who are in the hall
those who will study these materials in the future

i.e. there is continuity of action
in relation to
to everyone
and in relation to the whole World

try to catch it and do it yourself
for everyone
for myself
and for the whole world at once
in one impulse

find this point
in your Consciousness
in your Soul
find this point in the Action of God
look how God works in this case

when you work try to work independently
i.e. although we work together
but everyone works individually

i.e. independence is also an analogy
on working with the Physical Body of the One God
with the One God ^{as such}
in all ^{its} manifestations

after all, there is only one God, He works alone, ^{yes}
including one
therefore working in a team
keep an eye on things all the time
own management structure

the thing is that the resource of even one person
if possible, for example , Save the World
World governance
it must be that big
that in principle, in general, one person
must cope with the task of Saving the World

that's why I'm more individualizing
Of course, you can work in a team
but it is advisable to remember your controls

teamwork
we need to see what the team does then
because the main feature
precision and correctness of action
this is human independence

a person must be free and independent

when a person shows
their independence and freedom
in relation to the World

and at the same time the World is completely calm and manageable
that is the inner freedom of a person
his inner well-being
this is the well-being and the Norm of the World's development

everything is very simple here
the concepts are all quite simple
no need to complicate things
there are things in the world that are completely simple

in my Teaching about the World
there are structures that speak about that
what is external Reality
due to its simplicity it gives a very serious element of control
almost all the more complex elements of Reality

for example a simple task
some cyborg cyborgsystems are developing yes
some supercomputers, etc.
but the man is simple
must be able to manage this system

how can he learn
he can learn just by contemplating
there, for example , their nature

or a painting
or yourself
but not specifically there may be a body there
and just seeing it periodically there
that he is doing something with his hand

this should be enough
so that cyborg systems cannot destroy humans

simple systems can provide knowledge
allowing a person to develop forever
i.e. the mechanism of development can often be very simple
often it is ^{not} complicated

make management through a simple system
Now
It's just that your Soul works, it happens
just working is normal
i.e. make simple management for your tasks

these tasks they can often be like ^{this}
what does it seem like is it really that simple
try to do it simply
don't complicate things
simplify
simplify not because you are artificially simplifying
and because that's just how it is

i.e. this is not the work of Consciousness
^{as if} by special simplification ^{yes}
and see the phenomena with your own eyes
i.e. as it is
as God sees them

God created, ^{for example,} many phenomena of Reality
naturally many things are seen as simple

look at the things He sees as simple
and why are they simple for Him

and by ^{analogy} with this
try to just select the controls this way
what you most ^{for example} simple things
take it ^{as if well,} in the arsenal of control through them

the easiest for God
it's to create everything at once ^{yes}
and that's all

there is a simple action there is no need to analyze it

so ^{as if} the structure of the instant ^{yes}
global governance
such a seemingly simple action
affects the interests of the entire world system

therefore simple action
this is not necessarily an elementary action

for the Soul
as for an equivalent ^{control} system
in relation to external objects
so by analogy with the human body, ^{for example}
with the Physical Body of the One God
any external information object
is of the same type

^{for example,} what to Save the World
what ^{is there} to cure even some small disease
what to do management by personal task
this is basically an action of the same order
for the Soul

so try to work
from the point of view of that
that your Soul it can handle
^{for example} with the task of Saving the World
you can handle other tasks
but there is no difference here

and try as much as possible
as intensely as possible
while working, constantly improve your health

^{for example,} I'll do this now
recovery right there in three seconds
recovery management ^{yes}
restorative to the body
and then comes the verbal part

connect
what i did by control ^{and} without words
connect with the verbal part

it means the following
what recovery
well, as an axiomatic sign

this is action
and external and internal too

i.e. external from the World
and your inner
because you perceived it
not that there is something internal to the organism
and the fact that you perceived it
in words
which I created before starting the recovery

i.e. all the same I kind of introduced a verbal structure yes

if you act, for example, not with words
before the action there were all the same
some words and actions

also the world can exist
as if by itself
but can exist in relation to
to some external internal phenomena

and so when you do here
for example some kind of control
try to make this management mean interconnected
not only with the system let 's assume your actions

but also try to make this management
was consciously known by others
i.e. try to use the knowledge you have
this knowledge would be transferable

i.e. as soon as you have this knowledge
really make it transferable
you will see further
that in principle there is no transferable knowledge
precisely of a creative nature
they generally do not exist

God created for the development of the World
certain phenomena yes
certain constructions of the World
He did it in a visual way, i.e. in a communicable way.
in terms of verbal description or control

and therefore any of your actions
by analogy with the Action of God
must be transferable

in phase of achievement
creative sense of management

and in general real management
as it does
namely the Physical Body of the One God
it is always creative
because achievement is built on that
what are you creating
i.e. you create the following system

you create
act as creators

now the control will be as follows

there is some kind of external information yes
towards you
start this external
let it be in the form of a vertical level of management
start this external information
just perceive it as a self-healing system
through level
that you are in that point of the world
what do you control
all levels of this information
information of the world

let all external information restore you

i.e. more of a healing level
tilt control

made a restoration
moved to the control level of another system
i.e. the outside world

other control systems do quickly
switched to the system of other people's tasks
then their own

as a rule in human thinking
tasks often arise because
that they concern other people

God created the world like this
that first of all He is concerned with the tasks of the World

for God is also the World itself

and when do you start

for example, see these problems and solve them

do you understand that from solving the problems of others

you get much more for yourself

for example, many can remember

what about giving someone a gift

a person gets more pleasure for himself

here is the management of the outside world

this is your personality

which unfolds and develops

towards the next knowledge

towards the fact that you are giving this knowledge

you have first of all for yourself

but for God

this is when you give knowledge

for example Eternal life Eternal development

systems of direct participation of direct management

you are doing this in fact according to God's instructions

i.e. for God

and therefore to myself

i.e. there is in principle

position just for example yes

and here I have highlighted the position

do it yourself

but for God

according to the task from God

and when you, for example, define this action

as an action, well, actually the main control action

do it this way

then even if you are there for example

Well, let's say that the technology has only just begun to be studied

and did not develop strict criteria yes

in orientation in technology there is such management there

for example, they didn't study it for a long time

then it is enough to do it this way

what are you doing according to God's instructions

you are still doing the right thing

you don't need it again
well, it means to tune in to that
that you should act in a very technological way
to study something for a long time
or study some complex sciences in this regard

you must have a control apparatus
which works very simply
as I just said
said very simply

it is enough to simply transmit the signal in optics
towards God
if you perceive Him from above yes

and if you are in front of yourself
or in the form of the Physical Body of a person
then specifically

and you see God's reaction

i.e. as He sees
He sees that you want to learn.
then you are doing the right thing

so when you already see further
next development
i.e. the next signal is yes

it turns out that God
who set the tasks for you
and gave you control

shows that the next control
it is still the acquisition of the following knowledge

and now do the following control
take just tune in to the following knowledge
and all the most necessary from the management
according to the structure of the World
translate to yourself for you

i.e. it turns out that you
you don't have to figure it out
in the structure of the following knowledge
you just need to tune in to it
what knowledge do you need

to perform the following events
and to highlight ^{this} light fraction
from the future
and direct this structure towards yourself

as soon as you directed this structure towards yourself
you have knowledge
from one's own action

knowledge from one's own action
this is the main fundamental knowledge
which the One God teaches
control of the entire external world
^{well} including the inner world

only this knowledge is desirable
apply
and use it as often as possible in this way
so that you can view it right away
the structure of transferring this knowledge
to other people

i.e. how this knowledge
are transmitted to other people

i.e. how ^{do} people get them?

when you start to see this structure
then it's completely clear
you already have that level of development
when you already understand the events
in the fundamental sense of this World

i.e. as soon as you follow
chain of knowledge transmission
i.e. the structure from one level to another
you work
in the fundamental system of the World

and then it turns out
that nothing else ^{is really} needed

those. knowledge must be transferred in order to
so that knowledge about the World is fundamental
and for you to work all the time
precisely at the fundamental level of the World

and not, ^{for example,} in peripheral systems

through which you can
or take a long time to achieve something or not achieve it

here at the fundamental level
you always achieve so
as it was originally planned by God

initially in the primary impulse
immediately realized by God

This concludes today's seminar.

Thank you very much for your very close attention
