

GRIGORY GRABOVOY
The Teaching about God
Action of Eternal Reality
08.09.2004

Hello again
The topic of my seminar today
this is my Teaching about God
Action of Eternal Reality

in this topic i show
in what way when you act independently for example
and find some element of control, let's say
like this control
generally speaking it becomes Eternal first of all yes
those. your action in Eternity

and also here is the main context
this is the level
what when you act
you can see in any Reality
element of the Eternal component

then it is enough to make a sample with this component
then your event is manageable
precisely in the direction of Eternal development
i.e. it is favorable at least

and also contains
and elements of external control, for example
where the information of the action algorithm is generally stored

because the action of external Reality
where Reality is precisely expressed
as a component of Eternity
so here this element is definitely going
from the Action of God

here is the manifestation of the Eternity of Reality
this is contact
namely Reality with the Action of God

and it turns out that when you, for example, set a task
some specific one that requires a solution

then it is enough to consider here
for any range of tasks
how to select an element like this
so that he first becomes Eternal

i.e. you are actually organizing the construction of Eternity
where you are eternal

For example, the external components of the World are eternal.
towards you
and you also highlight
this is precisely the action of external Reality
where the element of action is Eternal

i.e. in fact you work
as in the coordinate of the formation of Eternity
from itself ^{actually} i.e. from itself
but you also connect at the management level
immediately with the dynamic element of Eternity
coming from God

and it turns out that you see then
as God gives you
^{actually} recognize the element of Eternity in your development

i.e. the recognition element is very simple
the action of Eternity from you
and the counter structure of Eternity

i.e. the vectoriality of action is everywhere Eternity
vector coming from you Eternal
and to you he is also Eternal in fact
Well, in a simplified version

and in this case any system of Eternity
it is a multidimensional system
so it turns out that you have
the opportunity to see yourself
For example there in the Infinite Future Development
if you are actually ^{like} an element of Eternity
i.e. the vector coming towards you
make it manageable
and create such conditions
that the light coming to you
it is also the light coming from you

but as if in the element of light coming to you

i.e. you are not taking your own vector
and you take as if the vector is external
and equalize it in properties

by an effort of will

i.e. you make a vector going backwards
take a segment for example
here is a vector coming to you
and just draw something in the other direction
it has the same properties yes
by an effort of will

as soon as you start doing it
you see that your body has the same vectoriality

i.e. the body is designed so that the light coming from God
he is also the light that goes to God

i.e. your Soul
actually reacts to Reality in this way
what do you see
as the properties of your body
means according to Infinite development
actually as if they give birth to create
namely the level of Eternity
but already outside of you, i.e. somewhere else, yes
for example in the subject there in action

and it turns out that when you see such a design, yes
she can be somewhat like that in general
in general it can be a bit complicated
i.e. the weighting functions of a given optical design
are big enough
because in each element there is like external optics
of this design
there is your whole physical body

i.e. you see that your physical body
information means
so very [...] well in general as if it were n't just such a level of reserve yes
and not just a level where it is reserved
let's assume an element of external light
light of God
or the light coming from you

but your body also reserves
actually own reproduction functions
from the adjacent element

i.e. an element of action, for example , a cell
example, at the neighboring level

this is an element
where a cell gives the element of Eternity to a neighboring cell

i.e. it turns out that we have here
very much so in general well a simple picture
or what about the reproduction of the body
inside the visible Spiritual structure

i.e. you perceive the Spirit
as a factual development of the physical body
and here it is clear that the transition to the Spiritual level
it is
in the presence of a static and Eternal physical body
this is actually also the development of the body

i.e. your own Spirit
you can see
as development of your physical body

this is actually colossally important
management level
because then it turns out
what can you see
the construction of one's own Spirit
based on the physical body

i.e. without carrying out, let's assume, searches
somewhere in a separate control structure
or without doing anything at all
optical level of perception
but just looking at everything
the structure of your own body

and then it turns out
if you can Spiritual basis of your own personality
thus perceive
then you will see that from the Eternal Spirit, for example, yes
as well as a consequence

vector going to God
there is your Eternal physical body

and it turns out that the body is also a path to God
i.e. vector in terms of optics
the body is also a vectoriality with properties
as I said, the light coming from God
this is also the light that goes to God
but already from you

and this is the birth of your physical body
in terms of biological birth there
in terms of the birth of the body by God, yes
creations of God
these concepts mean they become uniform

i.e. you see that your birth
this is the action of God, the creation of God

i.e. you start to see
what exactly is the action of Eternity
for the Eternal God acts
so it creates an element of equality in birth
and that God created you

although it is clear that there is
for example, yes, biological parents of children
however when you start
this vectoriality yes
so the equal sign is peculiar
put in the Action of God
and in action it means a man created by God
then it turns out that we can see
that the whole picture of the world
in fact, it is very precisely controlled
your Spiritual knowledge

i.e. you can see
what is the element of action
is your knowledge but spiritual knowledge

and at the same time you see that this Spiritual knowledge
translates into actual knowledge of the body
i.e. your body is knowing
you don't need to, for example, go out

into some information structure
it takes a long time to find something there
it is enough just to be aware of your body

i.e. the body that carries all the information

for example the Physical Body of the One God
has this ability
and even what is near the body
has the same functions

i.e. the Eternal Action of the Physical Body
gives birth to and creates external Reality
which has the same functions
namely Eternity

i.e. it is actually like a transfer
well, how is the crystallization process
transfer to the next level
properties of the primary quantity and Infinite and
in a single, as it were, monoform

and it turns out that when you start to see
such a design in management
then for example healing
for example, yes, from stage four cancer of another person
in general, just a cure
this is action
where do you enter the structure of Eternity
in any element of the physical space near you
and just enter everything correctly so let's say yes
initially

Look with the Spirit
It is precisely Spiritual vision that is clearly developed in this case
how does the process of grasping this optics occur
it looks like crystal growth again

and you begin to develop optics
from a level close to you, for example
towards the person who needs it
or cure
or do you need to make an Event Plan Norm

and you see further
that this Norm may have functions
a clear exit into the past
because there is basically no vectoriality there, as I said, yes

that you are going in the current time
in such a construction it is precisely the actions of Eternity

you are actually taking the element of Eternity
in any event
and Eternity is still an Infinite quantity
there in Infinite development even on logic
you still get it
Infinite value of any quantity

i.e. if you see a vector
then in Infinite development
it will still be a variety

actually transferring control
Well as if in a hard, very hard basis

it's the same as well, for example, there is quartz, yes
and it's as if it starts to move apart
it's like some kind of crack appears
in quartz glass
or in hard rock
and this crack is unique
i.e. it is a process as if actually the opposite
the creation of a crystal and
but this is still not the destruction of the crystal

it is not a mechanical action of breaking it down
the crack went and ended up somewhere

this is an action on a different crystal structure
the property of the crystal is such
what if there is a crystal it can crack right

and that's when human memory arises
i.e. the structure of development
how memory works in essence
here is Macrosalvation in action
in the action of Eternity
this is the structure
where there is a kind of rigid crystallization of information
and there is for example Well, Infinite forms, yes.
which are perceived at the level of, for example, there
well, some separate volumes of actions

and so that a person's memory would be stable

in Infinite Development

so it had , for example, a structure like this
that it is enough to remember Norma, for example
and you would immediately come to Norma

that's the property ^{yes}
hard memory
ability to remember the norm
and therefore bring it back to normal

how does god do it
he ^{just} thinks and that's what happens, ^{so to speak}
Well, in such a positive aspect, precisely

and it turns out that when you
you work in such a tough system
then search for this path ^{yes}
where does this ^{kind} of crystalline level go?
where ^{well} how should this construction stop ^{yes}
to get the result you

this is actually the development of your ^{Soul}
precisely in the area of Spiritual self-awareness

i.e. you realize the Spirit not just ^{there} personally yourself
for the Spirit you are already understandable ^{in general} first of all
namely awareness
from the point of view ^{of} the reaction of the external structure to you
i.e. how is information from the outside world at all ?
perceives you as a whole
all over the world

Well, in this case it can be translated to a person
understand what he thinks about you ^{there, for example, yes , etc.}
in case it doesn't ^{work out} ^{there}
for the levels of some ethical standards ^{there, etc.}

i.e. it turns out that you can quite clearly recognize
^{for example, some negative action}
Possibility of negative thinking ^{yes}
let's assume ^{in relation to you}
the ability to see the structure of future events
from the point of view of prevention, ^{yes}
Well let's assume ^{to hold some event} ^{there}
so that there is no ^{such thing as} it's done ^{there}
well, some kind of disaster or terrorist attack

those. ability to trace
as if the distant crystals of these systems ^{yes}
Crystal Systems of Eternity
give a concrete path to creation

i.e. there is a very tough position there
which allows a person to still recognize the system
and go along it ^{as if} omitting some rough information
well, which are ineffective or not needed

i.e. the path is absolutely clear
Well for example, imagine ice, ^{yes}
and there are some branches ^{there}
Well like cracks, ^{yes}, or actually cracks in the ice

but basically there is a crack in the ice
if the ice is thick it is not ice destruction
this is often a property due to deformation
different freezing processes ^{yes}
if these are natural conditions ^{for example}

it turns out you can go
along these ^{seemingly} bright lines

line ^{and} light
i.e. to see only the light, namely the Eternal light

and it turns out that you actually achieve
well, a certain level of worldview
what when you go
along such ribs ^{as if} the rigidity of this World
where exactly is Eternal development

then firstly you are stable
i.e. let's take the same ^{ice} that cracked somewhere
so if it cracked
there is some kind of action there at most

Well, dynamics
often this is the manifestation of the greatest forces of deformation
there is some kind of system in operation ^{there}

the same thing by analogy here
if you go that way
which is the most rigid most definite
then you ^{end} up with the Infinite Future
well at least in the first iteration

in the very distant future
the same system
absolutely rigid and clearly defined
as you have now
at the current time

i.e. you can perceive your future
almost as easy and simple
how do you perceive yourself

when do you go out
to the natural level of such Perception
then it turns out that your natural state
gives accurate prognosis
a precise system of actions
where you can get out fairly accurately
to the level of self-government, *so to speak*
due to the fact that you will not react somewhere
you will simply bypass something
somewhere you will transform

i.e. you start to go out
more economical in actions, *so to speak*
level
that it is not necessary to just create
all the time control

and it is often enough to know
what is this well-known construction
why touch her
Well, there is a good road, why rebuild it again ?

and it turns out that when you, *for example* , go out
to the level of Macromanagement Macrosalvation
then this is exactly the action of Macrosalvation
i.e. Spiritual action for the purpose of Salvation of all
forms what the path that is *in front of you*
he starts *as if means to actually shrink*
and be removed at the same time
from you
where you see your static action

i.e. where your action is Eternal

how can one even take and determine
some future events, *yes, your positive ones, for example*

but in general it is always necessary to determine
positive events by the way mean good ones, i.e.
because there are many ways
what's the point of ^{having} some extra problems for yourself
It's better to immediately go to a positive event
here is the same design

and that means when you start going out there
then this is a tough event
at the beginning has the status of Infinite Eternity

i.e., both the Infinite system and at the same time the Eternal
i.e. Infinity is action
Eternity is static

and you can see it from here
that your event is originally located ^{there}
out of time
outside of space ^{actually}
you perceive the event itself in essence
i.e. as if entirely

it's absolutely clear to you
^{let's say} where this is happening
you see yourself very clearly
^{well} in some specific place
do you even know where
but at the same time you're not just looking at the walls ^{somewhere there}
or somehow perceive

^{as if} peripheral systems of events
is a room ^{there}
namely, look at the Eternal essence within you

in fact, you are actually looking ^{at} yourself in the future
but look at a certain point inside
^{well} somewhere in the area of the heart which is Eternal

and when you perceive yourself like that
it right away ^{for example, your speech}
do you see any specific events?
and you see that this event is starting to approach

i.e. the path begins to shrink in a peculiar way
^{well,} which goes from the event to you
^{actually} formed from you in the future ^{yes}
the road to you now

when you are in this time

and at the same time the next beam comes from here

as if a vector to the future

which goes as if into the Infinite future

but if you go further along it

then it wraps up and turns into

into your physical body

i.e. your physical body is there

in the structure of future events

this is the structure, in fact, in general

which organizes events

if you really think about it

who is building these events there ?

except that it is clear that they are on their own

in many ways yes as if they were adding up

but if we want to understand

precision in control

of this control structure

then we should see

what is your body doing there

in this future design

and that's when you start

at the information level, of course, this is meant

your physical body in this case

when you start watching

what does the body do

then you begin to recognize movements very clearly

connection of your body movements

with events now and in the future

and in the future again the body yes

if you look from afar

then it's as if it goes to Infinity

beam

but by the way, you can see exactly how the beam goes to Infinity

from events to the future

and if you start to approach in Consciousness

you see the body and the beam as if curling up

then this approach affects you

you see that no matter how you act
you enter into the structure of your physical body
but look at it as if from the inside yes
by way of Spiritual vision
by the light of his Spirit

and it turns out
that in every element of the Spirit
there is your body
and this is already knowledge of God

God gives knowledge, among other things
and about a healthy physical body
means at any point of information
as if direct knowledge which is actually personified by that
that you reserve the opportunity for yourself
first of all, the following knowledge

and here that element also arises
what do you actually see
does god create reality for you
exactly the one you need

i.e. you see that God is close to you
so close
what do you want to build an event yes
and He also builds your body
and you build it yourself too
at the expense of a future event

i.e. it turns out
enough in the structure of Eternity
in the action of Eternity as God does
simulate one event

and there is in front of you
as the road there is, so is the road to you

i.e. it is a mutually regulated system
and it turns out that there are no problems in fact
in constructing the desired event

and then it turns out that in this case you
must adhere to only one principle in fact
this is sustainability
in a position of mutual exchange

information about the future and current time

and that's when you start to see
that the exchange is happening correctly

then you see that the channel of this exchange
in fact, this is the structure of Eternity
in any element of Reality
the structure of Eternity in any action

and so when you start
this structure well as if trying to understand
this is how it works
how it transforms information
then here we can come to the same thing again
that your body is an instrument for exploration
i.e. this is, in general, an object of knowledge
at the same time you experience actions with your physical body

then it turns out
that there really are no incurable diseases
i.e. it turns out you can make a body
Well as if flexible in information

because the exploration of the outer Infinite World
and when we know for sure that this body exists
and tool
this is the level of so to speak management
who is able to perceive all external information
then it must have an infinite amount
as if there was any information at all
contain in oneself

i.e. we through the system of knowledge of the physical body
we take and get an autonomous system
which is called the "physical body"
but possessing Infinite information

but since the physical body has
Endless information
naturally the body has information
for example self-healing
information about the Norms of Events for yourself , etc.

and it turns out that when we start
for example, these processes accumulate

well in my knowledge
there for example, to go to the management structure
how to apply this at all
given knowledge

it turns out that we have enough here
in general, a simple way to manage
enough inside the physical body
find the processes that are fastest in optics
This means there are more exchange processes and more information

and enter the structure of such a fast exchange
that we see the structure of Eternity
i.e. Eternal glow, for example, of the Eternal World
Let's assume eternal there are cells there
or your whole body in general, but already Eternal

and when you start to go deeper
i.e. in this case you are the Spirit
can you find this point in the body for example yes
but when you start to enter this point even deeper
you see that the Spirit is forming
it is your physical body that is so fast
that you don't seem to grasp the logic
the process of formation as such

i.e. the Spirit also creates a physical body, but very quickly

and considering that the Spirit does this
this means he has the property of Eternity
those. action of the Spirit
Reality is such as Spirit
in terms of precisely the universal Reality
what does it mean the Spirit actually does the work
at this level

The soul is also natural and in a certain way
builds your physical body
and in general the body is just a part of the Soul
there are often no breaks at all

i.e. so that visually well how to determine
in information
just where the body information is located
and where is the Soul information
well, in terms of, for example, a non-physical body

then you need to tune in to the area
where there is no such difference

then you will see your body
as an extension of one's own Soul

that's when it comes to the Spirit
then it turns out that the Spirit builds like this
what's in the dynamics in its super-fast dynamics
this is exactly where this component of Eternity is located

i.e. the Spirit organizes itself, as it were
and due to very high speeds
creates this component of Eternity
i.e. the Spirit can create a component of Eternity in any place

while the Soul can of course also
and the Soul, generally speaking, is already in this static state
i.e. we can say that the Soul is in the action of Eternity
it could be
so consider
that the Soul is in the action of Eternity
this is a higher state of Spirit
more developed for the given place

and it turns out that in order to create the World
for example, at the right point, the right action
must be there
the work of the Spirit in creating the body
i.e. it turns out there is no physical body
and the Soul as a structure but as if fixing
simultaneously taking action

i.e. the Soul has an external property
Well as if external control and reception
some work of information

and if the Soul begins to accept
your own actions
then how would it be that the Soul is located yes
where is the fulcrum of this fragment yes
information or Soul

and the Soul is a monolith
body and soul

but when we give the functions of supervision
some controlling ^{level}
then we have to place this level somewhere

so this is the level
where the Soul of God passes into the Soul of man

that's when, ^{for example,} the Soul of a person
begins ^{to sort of} stick together in this element
with God
then it turns out there are functions going
from an inseparable connection with God

and when, ^{for example,} an enlightened person
in an inseparable connection with God
sees some of his own tasks ^{yes}
on the Spiritual level they are perceived
how often are simple solutions
or those that need to be changed ^{yes}
action tasks come from somewhere
or how to make the technology exactly
so that there is no macro-destruction
for a specific person

how does he even participate in this to the fullest extent
he must see
your own specific path
precisely even in the task of Saving everyone
but specifically, personally, my own exact one

not some often this is an abstract action
and in technology where exactly do you need to understand
where in Reality there is a structure of Eternity
in any event
then it turns out there must be an absolutely precise path

and in this regard we must see
what is the Soul as it turns out in this technology
may well be in alignment with God
whenever you want it
in a straight line ^{yes}

and then it turns out that she is Eternal
so continuation
the physical body is also Eternal
but moreover, the Soul does not make mistakes

because the body in this case

Well, it's clear that this is not just a continuation of the Soul, ^{yes}
in your Perception

but at the same time the level of knowledge of God ^{yes}

God knows through you it turns out or ^{there} together with you

but here too there is a very important point in all of this

that a person does not need to be destroyed

because it is in the system

where is Eternal development

i.e. the contact of the Soul of man and the Soul of God

where the Soul perceives the human body

but the body is such that the light comes from the Soul

i.e. the vector coming towards you

it is also the light coming from the body

i.e. the Soul transmits the properties of Eternity

body

in this technology

and so we came to this

that your own Soul

creates your own Eternal body

in this technology this is revealed due to the fact that

what exactly is the vectoriality of the propagation of light

identical

i.e. we have on Consciousness ^{as if}

well, maybe on any cellular Consciousness, etc.

it means , in fact, the Perception of some external event

and as soon as we come to the essence

then everything is the same here

well, just like God

in the structure of the entity

there is a unity of God's Action for all

and it turns out that we get

a very harmonious design and we can see it

that man is very harmonious by creation

i.e. if all light system levels are closed

which you perceived ^{yes}

you will get yourself

i.e. and in fact you can build yourself in this way
at the level of harmony
and what's more you
at the level of the Spirit
of your Consciousness
watch your Soul glow
how does it work and how does it build
your own body

i.e. you can have
the structure of the Soul is obtained within oneself
while seeing everything around you
This is actually a powerful controlling level of clairvoyance

i.e. it is enough to understand this construction in yourself
and you sit quietly and watch
for any information object
because the light coming from you
from the information object

Well how would it even happen here that first action
that the Soul is moving into a super-fast structure
i.e. it begins to acquire the properties of the Spirit
when moving towards you

but this is clearly not the structure of the Spirit
there is a different design
speed
i.e. it moves and doesn't move at the same time

i.e. if there is a vector
how to make it so that the vector does not have
properties of vectorality

for this you need to do what means
that how to slow down the function of movement so much
that from one point of view
It seems like you started moving
from another point of view there is no movement
then there is no vector and no movement
a vector is a certain directed movement

and in this case if you Consciousness
very well as if you were moving away far

from this process
then Consciousness begins to control
more and more this process

i.e. the more information you can accommodate
into the fraction of your Perception of Consciousness
the more controlled the process

and it turns out that you can do such management
which is like a training option
to be able means
Well, training is such a relative concept of course
in this case we are talking about specific events in the world

but nevertheless this action is systematically organized
maybe again
i.e. you can organize the action as many times as you want
how much do you want

and it turns out that you are organizing this action
according to the systemic Macrocontrol
for the action of the Soul of the Spirit
there is even some other faction of Consciousness there
you come to that
what are you starting to see
your body as it is
at the level of your own Perception

Well, that is, of course, any person knows
what body
can look in the mirror, etc.

but in this case you have a body
which is visible due to your
in fact, already developed to the level of management
namely Spiritual vision
it is precisely the vision with the body
vision can be done by the Soul yes
Well, in Spirit

i.e. here you can see the level of topics
well which one do you choose

i.e. if you go

to the level of viewing by the Spirit
then your body information about your body
it could just be a glowing point in the information yes
and everything is known
are you healthy
you have optimal good future events
and there are no problems, yes

but in this case you see on optics
just one point
and you understand what I'm talking about

if you look with your Soul
you see all the events absolutely everything down to the details
i.e. it can be seen there so accurately
that in principle, well of course in that case
which concern you first of all
tightly and close to you there
that the design becomes so clear and obvious
what in general you begin to see
that future events are precisely favorable
they are even more rigidly formed than the current ones

and then it turns out that you have enough
how to grab onto this bridge yes
i.e. the task of Eternal development
just in this case
consists in the fact that
that future harsh events
the light coming from them
must definitely concern you now
and that's all

then the question arises
at what point yes
in any in principle

you should see a glow
well, which warms you up all the time , yeah
light these are some of those like photons
which means that they are generally ordinary, and photons
which, in principle, are exactly what is coming to you

but then you can translate
this so-called photon level

into ordinary light
and see
that any light
any action
any optical system
everything you perceive
brings you Eternal Life
i.e. everything is favorable, you don't need to worry
you come to some system in some place
everything is going well for you
because that's how you understand the world
you know that he is exactly like that _{yes}

you have no problems you are protected
any external system is the light of Eternity

and no matter what you encounter on your way
it brings you a favorable level of development

and it turns out that _{well} of course as I said
we need to do counter management too
but nevertheless in this case
you have a very powerful system _{of sorts of} blocking
any pre-negative systems

and it turns out that due to this
you _{kind of} introduce the vector of Eternity
do not allow the negative system to form
because you have a generator actually
with an infinite number of options

but since you blocked in front
some kind _{of} system was defined that you needed
then you don't have to go through it for long
you just need to connect this generator
to view future events
and that's all

and you have any negative _{level} of events possible
_{seems to be} disbanding quickly
due to the fact that there is energy here
_{Well,} this glow is different
this is Infinite
or a value already created by you

in this way you create the same
Infinite magnitude

but through logical actions through understanding

and that's when you have exact knowledge
then this value it really becomes
already clearly Infinite
for you

and you see that your body's reserves are also Infinite
i.e. you see the power of your own body
where the body has properties
Infinite development
Endless life
in complete harmony
with Soul
with the Spirit yes
with Consciousness
and at this point and at Infinity
i.e. you closed it
future line of events and current
All

this is the light that comes out
coming from you
and to you
and you will already see the Action of God
you are already beginning to consciously and accurately perform tasks
which God places before you

i.e. you are going the right way, that means yes
you have the right path
and then you start thinking
how can I then help others more effectively ?

i.e. the level of Thinking is the level of access
it starts to be, well, let's say, so diverse, yes
very dynamic harmonious connections arise
it becomes easy for you to work in this case yes
a flexible system starts in work in action

and it turns out that the most important thing here is
that all communication systems are working properly
well, like a well-tuned instrument , so to speak, yes, musical
when the melody flows exactly right Endlessly
and in this case it's very pure
Means well let's say some kind of model comparison

in fact it is you

you are in harmony with the exact Eternal development
and it turns out that you just set yourself up

i.e. it is clear that it is only a tool
but you are also an actor
and what's more, you choose your own form

so that's when you start thinking about that
why such a form
then it is clear that this is exactly the form
human form yes
the shape of the human body is that level
which allows you to really implement
exactly this harmony
i.e. the quintessence of harmony is in the structure
in general in shape first of all
human body

and you begin to actually reveal this quintessence
even if first there through the structure of Eternity yes

i.e. to have an entrance into the human body at all
in general from the point of view of knowledge
it is possible only through the structure of Eternity

you can pass
through the structure of the Eternal lines of development
there is nothing else
then first of all you won't cause any harm
in any case it means
and then you will understand what is happening in the body
and how in general if it is necessary there
make a health management if necessary
if the physical body is completely healthy
then look at the tasks of the Soul
help the Soul of man already yes

i.e. here too we see an opportunity
implementation of assistance
To the soul of man
To the spirit of man
i.e. well there is such a thing as raising the Spirit, yes Means

in this case it is enough to go through
through the physical body
and the Spirit can be raised

by simply initiating the glow

i.e. well, take for example and make it more vertical
in relation to the body
by direct, as it were, optical control

and then a person develops a reserve
he stops hurting there
or have some diseases, such as the following, etc.

i.e. if you suppose you start talking
about the action of the Soul
here is the conversation of the Soul
Soul speaks to Soul i.e. soulful conversation
or the Spiritual essence of action yes

then here is the Spiritual essence of action
it is precisely the element of Eternity that connects
body
Soul
and, in fact, the Spirit itself as such

i.e. here you can even see
the structure of one's own Spirit as such
in its pure form, like this

and it turns out that you begin to see
that it is actually a very stable, very powerful structure
having a mandatory level of event achievement

if you need to achieve an event it is necessary
highlight the structure of your own Spiritual action
as if Well, you could say it in its purest form
i.e. in fact, this is the optics of only your Spirit
and achieve

The Spirit has Infinite properties
by power factors by access
and even more so when you start to see
how the Spirit organizes itself
like that same multidimensional one
precisely as if of indefinite vectoriality
that in any vector there is the same glow
the glow of God

then you start to see
there may even be a reflection of levels

those who come from God
but from God it is real
this means that there is still an investigative system of Reality
there is a glow of optical external objects
They are also of course created by God
and in principle it is also possible through them
get to God
but it's already a long way

in this case i am talking
that you see the glow of God specifically

and when you start to see it
you see that God organized the world like this
so you can see
all control systems of this World

here is a child who is born into the world
he sees first
Generally speaking, all systems are completely open

and when you start well there let's say try
how can i see

how he perceives from the moment of birth
but his tasks are often different, yes
he must organize himself
must grow, etc.

he [...] exactly when a newborn baby
then the newborn still succeeds here
what exactly, just now, for example, he was recently born there
and here a level nevertheless arises
immediate solution to the problem
and he knowing this
a very large amount of this knowledge
spends on self-organization after all

on the one hand, yes, it seems like everything is clear
there are parents and there are no problems
but on the other hand
because that's exactly what works here
this is the basic principle
that man organizes the whole Reality, including

but the Eternal Man

here the element of human Eternity is clearly manifested
exactly at the moment of birth

then it turns out
which is actually visible on the optics
this is this ^{borderline} glow near the skin
in some places
if you look closely
then you can see it in the first 20-30 minutes
even at the level of physical vision
you just need to know what angle to look at

and then it turns out that when you
Well let's assume then you already see the manifestation of Eternity
manifestation of that
that a child, for example, does possess the properties of Eternity
then you see that in principle during life
you have these abilities, ^{generally speaking}, these elements
they only got bigger

i.e. there is always an increase in a person
i.e., a kind of power reserve
there is an improvement in the parameters of this process ^{yes}
more dynamism

i.e. experience is not only something you acquire
by the way ^{there well}, some kind of activity ^{there} and some kind of Perception

but this is a synchronous development of different systems
in this world

because these are different systems
they do sync after all
they don't just exist
often they ^{seem to be} mutually ^{as if} significant
in terms of overall development

and this system is ^{actually} communication, ^{so to speak}, yes
at the information level
this is also a manifestation of the physical level
and the manifestation of information

so here is the main level
is also
revealing the element of Eternity in action
but in collective action

i.e. if in this case I was talking more about that
that there are some elements in relation to a person
then the problem actually arises here
formation of the element of Eternity
through collective action

and any element of information
must actually participate in this

and it turns out that here then
very clearly and very dynamically manifested
very simple characteristic

in this element you can do it like this
so as not to include, for example, information about the disease

i.e. if we consider the action of a small digital series
any of
well, for example, in terms of health restoration and recovery
then often a series of only on all in this
in this aspect
as if he were introducing information to himself, actually
in terms of Macrosalvation
and there is no room for just illness
simply does not exist in the system of collective Consciousness

when a person contacts there several times
he is as if [...] personally in his Perception
this disease of some kind and puts it forward
i.e. replaces it for a start, for example, next to

and then he can use this place
to implement their own tasks there

and it turns out
that how people interact for example
this is how their future development turns out

so here is the element of staticity of this design
is precisely the universal Salvation
i.e. the action when every person is saved
everyone is given the harmony of Eternal development

and at the same time here is the platform of this Eternity
is like Eternity as such, strictly speaking, yes
in the ideology of man
and in principle the physical body of a person

but the Eternal is already ^{there} in Infinity

and it turns out that when we

^{Well}, we see this Infinity

then we see that we have formed

the elements of Infinity are already here on their own
by logical thinking

i.e. knowledge obtained logically

are transformed into knowledge of the physical plane

knowledge of real physical Eternity

in this control structure

but we started with just that

that we are ^{like} separate crystals ^{there}

dug out

^{there are} some elements, pieces of Eternity

then we came to Eternal development

which ^{generally depends on} us

and what's more, we can do it

by simply ordinary Thinking even

and when we start to move on ^{yes}

in this system

then it turns out here

that's why it's essential to improve your health

^{Well}, generally speaking, all people are better

but at least who do you want

at any opportunity ^{and} the first one that comes along

why is it necessary [...] to go specifically to Eternal development

or bring this management to a level, ^{let's say}, like this

that each element is Eternal development

because here already an intellectual problem arises

i.e. controlled by you and other people

control phase

where is the transmission of information exchange

this is Eternity

i.e. the action itself is already Eternity

this is already a design that actually carries within itself

level ^{well as if} a collective mind

this is one

but there are still some here
your personal level of control
which is realized in the conditions of all other people
in conditions of, well, interaction
any other amount of information

i.e. you can be confident here
that your personal action will be accomplished
what you need
positive for the whole world in this case
and in the case when you are
in any number of people there for example yes
in some action in a collective

I mean in any
those. exactly the task
for example, the general sphere of information
there are all people there
and you seem to be inside this sphere
and you already know for sure that your affairs will be realized

i.e. you don't get into any kind of conflict there
this is precisely a very powerful anti-conflict system

and you can for example
even by mechanical movement of this sphere
just disband the conflict
you don't need to be there generally speaking, it's not even worth coming to him
in this case

because it is an action
this is management
and the future
and management, generally speaking, of the past yes

and so when you do
management of the past i.e. past events
or control of the past
through for example the structure of the future
then you can also define this aspect

there is your earlier management
which can also be called "management of the past"
you did something in the past

then you can consider it in the current time
how did this management grow anyway ?
how is this crystal actually
in the space of information and time
developed
up to the present time

then it turns out that you can exclude the concept
"erroneous actions"
in their actions
i.e. you can basically align it
the previous system to the level of standardization
in the current tense
and the management of the past
i.e. what happened in the past
bring to the current task level

i.e. you take some canonical form yes
for example, you implement some kind of light
coming from you, let's say

well, in the form of visual elements
i.e. you are looking at some kind of construction or something
there is something on your table
can you imagine yes

i.e. in this case, by the way, it's even better to imagine
some object several times
and commit it to memory

and then see that with the vision of past events
when you can enter well into the structure of the past
or before some event
see the same object

i.e. you did it first
in general, a mentally logical action
by imagining some object
I can imagine a figure of a white bear there , let's say yes

and I can in principle
Well, anyone can imagine anything.

and then
like from the past
I would see this object

i.e. I ^{kind of} erase the vectoriality again

i.e. I want the same thing ^{but} where there is no time vector

as soon as I catch it

I have a powerful mechanism

namely, universal control

First of all, this comes from

vector coming from you

controls your own physical body

i.e. you

healthy and absolutely healthy

here you can set up the control right away

and this can be achieved

or just identify healthy

and SO ON

the vector coming from you also restores you ^{yes}

he organizes you, i.e., ^{he} makes you healthy

you will definitely achieve this

precisely harmonious status

implementation of a future event

or ^{there} all future events

in this practice it is therefore necessary

it is precisely to work in the system

exactly this kind of universal Reality

where there is self-awareness of this action

to put it simply

This is ^{generally speaking} a very natural control system

where is the management level

practically, ^{well}, it's not much different

simply because you are more

you are more comfortable

you are more harmonious

^{well}, in fact, you're just ^{kind of} doing an action

and you achieve it

This concludes today's seminar.

Thank you very much for your attention
