

GRIGORY GRABOVOY
The Teaching about God
Building a man with light
18.01.2005

Hello again
the topic of my seminar today
This is my Teaching about God
Building a man with light

in this topic i show
how through light transformation
build a human structure
in terms of the light itself, firstly
i.e., to put it simply, to obtain the color and light of a person
in the control space

and also further through management
be able to build
generally speaking, for example, the physical body of a person
it will be possible using this method

build a management structure in such a way
that you are the light of your own activity for example
you can also build

i.e., in fact, every next level of light
let's assume he is the manager
in relation to the previous
and vice versa the previous level
he is practically the same
level of mutual control, as it were

i.e. light still has control
often with such isomorphic properties
i.e. the control is quite universal
from one level to another for example

in this case, if we assume that we have control
let's say Infinite type
i.e. this is what it means if you look at the problem like this
what does Infinite color or Infinite light mean yes Means

then the Infinite Light is still revealed
in the form of some local line

in management

it turns out that when we do management

let's assume in the Infinite Environment

then we get that the light which, for example, is in the Infinite environment

it is manifested by some kind of greater mass

which is fixed in the form of some local segment

and if we consider the comparison

here is every element of Reality

can be compared with the Action of God

Infinite God

is projected

for example, in the final physical body of a person, yes

having a specific "final" in mind

"finite" in terms of size

means specific geometric shapes

and at the same time the contact between God and man

gives birth to color and light again

i.e. well, like some kind of spark

Well, if you just ask the question

where does primary light come from anyway?

how is it initially perceived?

it is precisely contact

God and man

i.e. the Thoughts of God and the physical body of man yes

The Actions of God and the Reality of God itself

and the physical body of a person

gives birth to creates like a kind of spark this light

and it is precisely in the understanding of man

the very Reality of God

this is the space of Thinking

which contains the original light

and this is this primordial light

he is actually located

as if in a closed circuit of sorts

in a person

and this contour actually saturates a person

from the inside

i.e. if you ask yourself , for example , the thought
how is the thought itself, here is the action itself Thinking
how do these systems exist in the control space
i.e. how does thought move at all?
where is it located for example

it is possible to perceive a thought in principle
in the form of a sphere there in the form of light
but to consider the driving mechanisms
why does thought move
why does it move in the information space

then here you can
it is precisely this primordial light that is to be revealed
and shine with this light
on yourself for example there or on another person
and in this way it is possible to build the physical body of a person

if we shine as if with the reverse side of this light
i.e. the light inside is the primordial light
but behind the shell of some kind of Thinking
there is another light
but here is the one that you actually made
due to the fact that you looked beyond the shell yes
then here we get exactly the light of your Soul

and here you can see it very clearly
Light of the Soul
i.e. the light of the Soul having , for example there
some kind of bluish shades in this case
it intersects with the primordial
for example, with silver light
and here it has such bluish shades
inside there is a shade of dark blue and bluish
this is the transition level
i.e. color that gives birth to form

i.e. when we move on
for example, directly into the color of the Soul
then we see what happens here
here is the form of thought the form of thought itself
it is primary, in fact, like the embryo of a person

i.e. the thought is born in the same way
how exactly does a human embryo begin to develop
and it turns out that the process of Thinking itself
is subject to the same process in fact

as the birth of a person in essence
right from the very beginning yes him
from the beginning of its organization

and it turns out that we can
similar levels of management
compare
for example at a certain level of Thinking

it means what happens to a person for example
and what will be the thought as in the future

i.e. we can arrange
along this axis of human development, actually from the embryo
some thought at the beginning
and see what happens next
for this we must look as if on a person in general developing from this point

i.e. we must somehow equalize any points of information
for example, a human embryo
thought
all this is a single development system

and here we get exactly this True Light
which applies to all people
The Light of Universal Divine Love
where love is the physical body

i.e. it is possible to single out such a segment
and inside the body directly in the tissue system
where is love
and this is the physical body of God and man

and yet with all this it is clear that this is a body
but you don't have to select a segment, for example Yes
but is it possible to move a little bit away from this level?
and see a healthy physical body

i.e. where there is love between God and man
unite into a harmonious light
a little further from this level
there is a healthy physical body
but it is precisely the Infinite physical body
is at the contact level
this universal love, so to speak
with the person himself in his understanding

i.e. we get there
to the root of Thinking to the root of thought

and that's when we start to think this way
then we can see the mechanism of development of Thinking
i.e. we have some idea about the forecast phase, yes For example
or we perceived some event

at the same time, it is necessary to understand
that Perception is not always Thinking

and can be perceived
some level of management
it is possible to perceive the real environment with clairvoyance
but at the same time, Thinking is, as it were, a product of activity
This is actually light control

i.e. when a person thinks
he should conduct it
a certain kind of manipulation in his Consciousness
within the limits of one's will
in order to gain control
with this segment of light

and it turns out that when he starts doing management
with this segment of light
that's exactly it
which is, as it were, a product of Thinking
then we can see the mechanism of interaction of thoughts
firstly among themselves
and then we can see
how is the physical body connected to Thinking

i.e. here is precisely the construction of the physical body
where it is said that the very concept of "construction"
it's like building a structure and building a cellular system
but that's exactly what it takes to build
i.e. to be able to take some elementary level there
and connect it to the next level
and precisely to build

so construction is still a systemic process
and therefore it is necessary to use it to the maximum extent possible here
the apparatus of Thinking first of all

i.e. we must, by identifying the interaction,
Thinking and information

build body

but Thinking is a product of the body, so to speak
it is inextricably linked with the body, among other things
i.e. there are essentially no breaking points
between Thinking and body
God's point of view, for example, no
there is a completely monolithic level here

because God has
thought is man
i.e. God thinks and at the same time He creates Himself

He himself is also a product of his own Thinking.
from this point of view

i.e. universal light, dynamic light
acquires a stable form then
when love in its pure form is introduced there
i.e. universal love, love for everything at once , so to speak

and this universal love
i.e. well, some kind of universal all-acting Means
it is precisely the property of even love
and this universal all-acting love
she starts to flourish, as it were
i.e. it starts to create the following colors

i.e. the introduced action is such as love
organizes a certain environment, the surface of so to speak control
and this surface is located [...]
precisely in a state of , as it were, primary, i.e. , infinite life

for example, if you look at Perception
into very separate systems and try to understand
what is there in the Infinite Distance

that is , the perception of some movement
i.e. some distant life yes Means
and therefore it turns out that this distant life
like the one that does n't differentiate
in the form of specific appearances there

in fact, this is the phenomenon of let's say Perception
here is this information
is

the most powerful mechanism for healing humans
because as soon as a person perceives
that everything that is maximally distant is life
then God who is there and far and near
it means always life
life coincides with the structure of God
i.e. life is Eternal ^{yes} because God is Eternal
i.e. we close this structure
where life is inside God

i.e. it is also protected as the life of God
i.e. it is Eternal with you

and it turns out that here is this very system of closure
this is Thinking but already God's

i.e. God's Thinking is natural life in Eternity
it is worth God to accept you
and you are Reality
from God's point of view
for Him, thought and Reality are the same thing
then you are Eternal

i.e. there is such a transition
where the body is no different from the Mind

that's what it's all about in this case
I Here it is precisely this concentration of control
brought
i.e. there is such a light, it has certain properties
I'm showing it specifically
it is at a certain distance
here it is important to look at a specific place

the thing is that I always show
geometric place
basically, this action is also a certain action ^{Yes}
in the distance
but in this case, this specific place
where directly coming from this place
that's exactly the color and light light of life
he organizes the way
in fact, a person can see
Light of God
i.e. how God goes to him
How is He at all transfers knowledge to him

and when, for example , you begin to see this structure
then the origin of life itself , for example, is there on the planet
in understanding there nature yes
in the understanding of such a Macromanifestation
this is the level that allows you to actually see
that everything that is in nature
also built
according to a certain similar algorithm

i.e. how not to get lost , for example , in some unfamiliar
well, the system there or in a vector system or in some area
i.e. vector or are some landmarks known yes
if the landmarks are unknown
then how can you not get lost

i.e. here we must follow the same principle by analogy
here is fetal development yes man
there is a development of Thinking

and as I said , there are similar laws

then to move for example right there
or in some direction
here you can simply put it in the form of Thinking
management objective
for example, you need to get to a specific place

and when, for example , you want to get to this place
then it turns out that in principle
you can put the thought
just form that place, let 's say so
where do you want to go

and then the path to this place
this is the structure that is developing
also at the same level
for example, as a human fetus

In principle, you can go according to the level of development there
to any other structure
For example there you can see this
it could be a purely hypothetical example
or comparative
how a tree develops

but the tree develops according to other systems

you see only the external system of Reality

OR is there heaven there

how clouds move

and to move myself

You have to see how a person develops

and if we can say

how does the human fetus develop

when exactly such a favorable development

it's always clear to everyone

here is the canonical level of development

and here it turns out that in order to understand

how to move at all, understand Here Yes

how to move to the right place correctly

we need to project

here is this information object

as if where are we heading

means in your Thinking

and set a kind of coordinate system

i.e. they must be reflected in Thinking

terrain segments

And that's why i'm in this lecture

exactly building a person

I'm showing as if a comparative construction

i.e. there is an external Reality

and there is actually such a thing

as if the light level of human perception

i.e. a person is perceived

in the form of a directly primary level of Perception

i.e. primary light

and then he begins to build himself

Here so to reveal the primary light

you need to set the Perception functions correctly

why is Perception needed at all

to navigate

but Perception means

well, like the first property Yes

perceive something

react to something

i.e. the first level of orientation

but Perception is also a product of Thinking

i.e. this is the action of the Soul

and the Perception of God is Reality itself

so here is the connection

Perceptions of Man and Perceptions of God

it is like a universal action similar to that

what is human thinking

as if universal Thinking, you could say so yes

all elements of Reality

i.e. well, if I speak figuratively

in fact, just every element of Reality

has some element

which in humans is called Thinking

and that's when we make the properties of Thinking systemic

i.e. we start using them

for example there is progress on the terrain

or in order for example with the help of thought

take and regenerate the body

for thought and Reality are for God one and the same

we can find such a point

where is this also implemented here

but then the light of Thinking the light of Thinking

should be the same as the body light

the task for Perception is simple

in Perception in the control phase of Perception

this means that the area of the light of the body and the light of Thinking are distinguished

and one that should be practically similar

i.e. the area is the same

the intensity of this light yes

same location

in the space of Perception

i.e. everything should be the same in fact

but then the easiest option

take and see with Thinking again

image of a person

and how to find myself in this image, yes, as if myself

but to receive the Divine light
you must see the Light of God
i.e. bringing oneself closer to God is achieved
then the Light of God becomes more intense

and then it turns out we see
where in the Mind and in the body there is the same light
but if we found some point
and a person must be perceived as a whole
then we need to get action
in some organ there yes
to some place
just at least for health improvement, even preventive
there is no need to create fabric there

then here it turns out that you need to know
at what point does this light act
it is the connected light
and how it relates to any specific system
if this is regeneration, restoration of some tissue

or where it concerns the whole organism

and here is the difference between a local private action
when this light touches
one system of one organ or one cell
and general action

when it concerns the whole body
this difference shows that path
when God shows a man
how to develop
precisely into Infinity
but due to the finite magnitude of the finite movement there
there for example, some final thought
where there is some end to thought

i.e. a person's thought is finite only then
when God gives Infinite development
some axiom arises

that's how it turns out
here it is clear what happens then
resurrected in Infinite development there are always
i.e. it is enough to remember the person

and the person is already resurrected in a certain space
and we only get a total of just
the main thing is to get space here

i.e. the space of Thinking must correspond
space of Reality

then here we go
on the space of precisely universal Reality
that's why we need a complete and total resurrection
recovery of any information object
precisely of the creative type

because it is precisely the Action of God that takes place here
creation of physical space and such
which is under human control

i.e. you can, for example, spend a long time managing it
maybe even there the time is close to Infinite time
but when the control is only external
i.e. a person, for example, as a technologist has developed and is able to manage
all processes of Reality

Ideally, of course, you need to have this
and by the way, you can learn this quite quickly and relatively quickly

but how can we guarantee that
that this Reality itself, yes, the so-called external one
that it is generally stable
and that nothing at all will happen to her as such
there with the system of organization of the World itself

so here is precisely the important element
in general, the most important, so to speak
is
level of correspondence of Thinking to Reality
i.e. thought and Reality are one and the same

and at the level of constructing a person with light
This can even be done using a technological method

i.e., for example, to let light through in the form of something like microphotons
there are some corpuscles of some particles
between the skin and muscles, inject into each cell
and here is their projection part
shows the way to God
through a human organ

i.e. how does Consciousness and the organ interact?

reverse action

if the way to God is known through the organ
through the projection of all these photons of light systems
then the way back is quite specific here

and it turns out it is possible through Consciousness
restore your organ any
not only yours
because you can imagine

Well let's say any other level

and it will turn out that the light of your Thinking there
already building for example there is another person there yes
creates organs there
creates Reality

and here is the difference

for example in the construction of a person and in the creation
consists in the fact that

that creation is often an instantaneous process
the construction still implies the presence

Well, it's like a person intuitively understands
that there is some next step
some basic systems to build

although to create too but God creates instantly creates
that is why the concept of "construction" implies
the ability to build a kind of interaction system

as if I were building and the word "according to the line" yes
those. I'm building some harmonious system of knowledge
if systemic knowledge is distributed at this level

i.e. there is an external World

are there weight characteristics

there is air, oxygen, food, etc.

and according to this system there is no system of knowledge
take and build the system of the person himself
then it turns out that you can always build a person

i.e. you can through light management actions

do management this way

that a person can be built by you

as if in any segment actually due to lighting systems

and as I said often it is just Thinking
but the thinking turns out to be correct

i.e. if you need the thought to work as a lever , for example Yes
and the surface of Thinking
should gradually become clear
and then to build some kind of organ
at some distance as if in information yes
or to improve your health there
you just need this lever
find control point
and as if the point of such centralized control
when this certain layer, this certain petal, let's say
which in general exists
a certain level of the surface of Thinking actually

i.e. we begin to visualize the thought
i.e. the thought of feeling yes let's say
the idea of seeing as a system of one's own body by the way

and when we begin to see thought
as a system of one's own body
i.e. the body is indistinguishable from thought
then we clearly find this point
i.e. it is located on its own
it's enough to concentrate on it
and the construction of an organ or cell begins
due to direct conduction, so to speak

here is a very interesting control element
when we conduct the light signal
don't lose

i.e. not a single impulse that influences
and then in the control space it happens
as if the signal starts to spread
to all points of the world

and this is still a discrete action

in this case we work
as if on one surface
it really works that way

i.e. this surface is like this
what if for example Well, imagine comparing it this way
there is a mushroom yes

there is a surface - a mushroom cap
here I am working on the surface of the mushroom
in some sort of superficial way
precisely without going deep there drawing a line yes
for example with a finger
we cause some kind of reaction in the fungus

but in principle from the point of view of the fungus's reaction
like a monolithic system
We don't seem to be taking any action
for example, we just stroke the mushroom cap

but from a human point of view
it's like a contact
with an element of the outer world
but man perceives
what if it's a mushroom then something is happening
either he feels it or he doesn't feel it there, for example Yes

from a logical point of view
perhaps he is considered not to feel anything particularly
from the point of view of Divine logic
namely the spaces of interaction
of all Reality
with you
it has the same level of action
into the universal Reality
as if at the moment
how could it affect Reality like that
that Reality will reflect his action, let's say
as a fairly multifactorial

well, that is, in principle, a mushroom can be harmful, poisonous or not, yes
even this is already a manifestation of his actions
i.e. comparable action it also affects a person

and it turns out that when you see
this is such an action well for example a mushroom
it doesn't matter any element can have
comparable action

then you see that a person overcomes Reality
thanks to some kind of inner light
to this Divine light
which determines its movement in space
here are multifactorial systems that are essentially equivalent

i.e. I showed it using the example of a mushroom
that it is still an equivalent level
from a management point of view
may affect management
influence a person's condition

and it turns out that when

Well for example , if a person eats it
then it means it's not a very good mushroom
then it will affect your well-being, etc.

so that nothing affects a person's well-being
so that he is ^{there} Always developing regardless of situations ^{yes}
external ^{there} internal
this is precisely the Divine light
i.e. the construction of a kind of light image of a person
and one that is not subject to external influence
i.e. light that cannot be shaded

here in this lecture there is the main technology in this
so that this light that you build in Thinking
matched your physical body
state of the Soul
state of Spirit ^{yes}
Consciousness
movement of Consciousness

and it turns out that the construction
this is actually the Eternal Light
which has complete freedom of movement
Well pushing apart some layers of control, for example
and at the same time it interacts
with some elements, for example , Thinking
and those
which are, as it were, inert elements of Thinking
i.e. the light that is revealed closer ^{as if} to the physical body

i.e. if, for ^{example}, you ask the question
what is between Perception and the physical body
i.e. Perception is a kind of information environment
and the physical body
and here is the matter between

then it turns out that there is one here
really between these elements
certain matter

precisely as the root matter of the space of Thinking

from the point of view of light control
there are quite a few of these as if inert
but very dense systems mean
in comparison, for example, with information as such
and this is the very depth of the World
from the beginning of the organization of the World generally speaking

i.e. any thought has a root
system of organization of the whole world
but really, any thought comes from
from the primary Thought of God
and God created the World

i.e. it works in any thought
there is a primary level

and then a situation arises
and what is the difference in thought then
i.e. how to make it so that it is embedded in the thought
for example some information

matter of the same type
the beginning of the organization the center is as if one
and here he is
well, some kind of matrix, yes
and from there
Well, no, not in the sense that there is some kind of technical matrix there
just some kind of center
and it is from this level that the development of Thinking begins

so it turned out that if you know for example Well, let's put it this way
weight so to speak yes all the world in the element of Perception
and select this matrix
then you can use a root point
then it is possible through the movement of thought
i.e. just take and track the thought

see how the meaning of Thinking is embedded in thought
i.e. into the matter of Thinking

and then you will see
how do you personally participate in the creation of Thinking
i.e. personally, precisely by your personality

and by that personality which, generally speaking, already exists
in the form of a physical body
i.e. a personality that is Eternal
and Eternal in the physical body

and it turns out when you start to see it
that's very clear
how your thought is formed
because in humans it is formed naturally
but he always sees himself
It's not like someone put the idea into his head
he thinks independently

and it turns out that
well, to think , to take this matter
So you have to get it from somewhere, right?
from some Infinite environment

but when he sets a task for himself
do not depend on anyone and think independently
then it turns out that he can only take this environment from himself
so who has it?
in oneself the Eternal
i.e. it is very simple and logically clear

and if so, then he must see himself as the Eternal
i.e. independent Thinking is like this
that it uses as a beacon
it is precisely the image of oneself that is obtained, but Eternal

but if the image is as if long to initiate yes
strengthen, etc.
then it will acquire the properties of Reality

as God does
that Thinking becomes Reality
and His element is actually very simple
Endless world
primary element for example Thinking yes
let's say first light
he touches
with the Infinite World, the Infinite Light
and begins to reflect multiple times
and acquires the property of Reality

i.e. so that the element is obtained
just two elements are enough

Infinite external environment
and some impulse
All
this impulse becomes Reality

and as if from
Well, I said that quite briefly.
maybe in general, in essence, on the light elements
that's how it is

and it turns out that for example, a person would receive
namely the Eternal Reality and further
he must from the impulse of the next
i.e. for example, the impulse created the Eternal Reality
he should receive, as it were, an investigative element
and control with Consciousness

this is what Consciousness is needed for
active in humans
that the next impulse must be controlled

once again the next impulse
even more controllable
i.e. well, development of the mind, to put it simply, yes

by the way, this is quite enough in general
so methodological could there be a reception ?
for training the development of Perception
but there is no action in accordance with the mind
in relation to some element

this is how you need to build management
to develop the mind, simply put
not by reading a lot of books for example
although this is also a path, yes, it is quite intensive, it happens that way
but here it happens that it is not written in the books
and you need to do this yes

then it turns out that you should
how to prolong Thinking
prolong the thought
to the level of well as if "smart" state

Well how to take and make such a position
what did you perceive with your mind
i.e. you have highlighted the concept of "mind in the Soul"
Means translating for example into the structure of Perception

create Thinking

what is the sign of intelligence

Well, there is correct Thinking, yes.

adequate response

and you take and create your own Thinking in this way

i.e. transforming the matter of thought

due to external and internal light corrections

as if the whole personality

you create the mechanism of Thinking

but already in a controlled manner

and once you get there

into the structure of managing your Thinking

this is already the level of primary harmony

and the one that God laid down

for His thought

this is a very harmonious and harmonious Reality

and when you begin to perceive this light

then you see the light of Infinity

i.e. one thing is the root level yes

and you visualize the thought

but I show it all the time

management structure

but I still don't show clear boundaries of thought

I'm saying that here, for example, there is a sphere, yes

but the intersection is much more complex than this sphere

i.e. the internal intersections of Thinking are more complex than this

it is a certain dense and diverse environment

and at the same time it is a soft environment, as it were

this is an information environment

but it is not perceived as just informational

it has a certain density on Perception

some weight even

for example a simple task

I have an idea

go to the store to buy something there yes

weight characteristics any

if we take this thought mechanically

and pull out a piece of light
will this action be less
then in principle it turns out that it may or may not be yes

but if we set the task strictly and say
that everything is very connected
then even more so
rigid fixation

connections become universal
so as not to pull it out from there
the same thought still remains
i.e. thought is as if outside of matter , so

and it turns out that since it is outside of matter
then we have a very simple path to God
extra-material system before matter

so it turns out that the thought is actually Eternal
your own thought
which you yourself reproduced
It turns out that it has the properties of the Eternal

well, that is, it's the same as if you were reproducing
some system
some information
some light
but which generally speaking has
very specific properties
properties of Eternity in a certain position yes

for example, there are properties of matter
you can explore it like this
that we can find some property we need
or an amazing property for example

in this case it is the property of Eternity
which is very practical for us

when we implement this property, for example
i.e. we find a way through it to analyze another environment
because that's where the Eternal Environment is
through this environment
you can explore anything
This is a powerful device, a universal research device.

where there is any characteristic of Eternity

it means that
Eternal number of systems of methods of means
naturally we will find it in management

i.e. in the Eternal amount of time
it is impossible not to find the answer

and in order for this action to be like this
Well, don't drag it out over time, yeah
can be done mechanically
just take the structure of Eternity

here we have highlighted the property of Eternity in thought
took this segment
took it and with an effort of will squeezed it into a point
All
We don't need to look for anything, everything is there at this point

just got the light
those. space between
rigid, as if physical matter
and light
this is the action of Thinking
Dynamics of Thinking the dynamics of thought itself
Well as if some kind of plasticity of thought

and when you start working with Thinking
Well For example there, like with an expander, so to speak
the light there is stretching
light
then you can basically train
a certain level of Thinking
and thus compare
according to the characteristics, as if optical
with fabric structure

i.e. practically something in between
information matter and physical body
this value is easy to take
and for example replace the structure of the physical body
Well those that need to be regenerated
or those that need to be healed there

or it can be stretched as a model system
arrange events
and then just impose it on events
i.e. it is possible to strengthen them in this way

I can say that it feels like it's being rubberized or something

i.e. it is enough to know the material as if in management
he really does look like
how somewhat such a rubberized environment
after all, muscle is also elastic

i.e. in this case we are talking about
about more control from the muscles yes
to reach the tissue system
For example there is bone tissue there
then here it is already of fundamental importance
construction by reflected light

multiple reflection
due to the fact that bone tissue is rigid
in information
i.e. here we are already working more with light
but it is precisely light that builds more rigid matter

i.e. if, for example, there is clearly manifested light, for example
builds precisely more rigid matter
if in this case to build muscle
you can use some kind of intermediate environment there
i.e. it is not necessary to have bright light there

why do i keep talking
that one must use natural Perception
your own muscles for example yes fabrics

and therefore I kind of save the light resource for construction
because you need to work quite optimally

then for hard matter light is definitely needed

and it turns out that this criterion is quite strict, yes
according to the structure, let's say, of the characteristics
here I said construction
i.e. a certain system of certain characteristics and requirements
then in this orderly row
why is it necessary for there to be rigid matter
so that the light may be revealed

Well, from God's point of view, that's how it is
the light must be revealed
and from here hard matter arose

i.e. initially, as if in a philosophical sense
it is precisely light that exists
and its manifestation can be different
i.e. a person can be a manifestation of light

and it turns out that if we find such a property
and in principle we have already practically found it
in geometry as I have just shown

this is a specific geometry
this property of light is located specifically for example there
here near the person
from the heart, for example , 15 cm
any person aside from the chest

just a point
it may be located slightly differently somewhere

and I show here
but as soon as I get close to 15 centimeters
she starts to activate
well, that is, it starts to react and create
body structure

i.e. it turns out that as soon as a person finds
this point
he approaches her as if
well, from some small distance
then he has already built himself
in one light pulse

that's what God did, he built the whole world
one level of light
this means that light has the same continuous properties
as well as for example there is solid matter there yes

and if we consider space
and let's look at the relationship
between elements of space
then we can find
what between two adjacent areas for example
we have essentially the same Laws of interaction

i.e. there are certain things, let's say

Light Laws of Interaction
which do not change at all
not depending on the distance
neither depending on the object of information

i.e. the distance between elements
as if from the point of view of passing
here's an example there is a photon of light of a certain distance
always the same

this means that yes it is universal
in any action
God is always present
By your Action or personal presence

and it turns out that if we want to consider, for example,
Well for example, the general resurrection
i.e. when the general resurrection occurs
what does the earth look like yes For example

we can see very clearly
using the example of neighboring planets
that there are structured systems nearby
they generally mean
same in form , even in the volume of the Earth

i.e. the primary level of resurrection
Saturn with rings
next is jupiter

and when do we start to conduct such an analysis?
i.e. the universal resurrection is the volume of Jupiter

then we start to analyze
what if everything is so simple in nature
and any element of information for example
exists nearby
then it is clear what kind of social system
i.e. at the general resurrection
different social environments exist
but they exist there now too
and tribes
and there are systems where they live on [...] there are leaders of feudal systems

and in principle a technogenic civilization
is located in conditions where there are such systems nearby

if there is a general resurrection
nothing new will happen there
there are just all these systems
will simply adapt to that
that exists precisely at the technogenic level

i.e. the technogenic system will simply be the leading one
and that's all
and gradually pass on experience
in more sparse ^{there and} in terms of information
development systems
that's all

i.e. it turns out to be nothing new
we won't have it socially
there will simply be more space ^{yes}

and based on this it turns out
that when we have a management structure
i.e. it is shown here quite clearly
that in the general resurrection
the restoration of social systems is taking place
at the same level they were at

i.e. the past ^{just} takes and unfolds, ^{yes}
increases mass

and then it turns out that
^{Well,} this is a sign of Eternal life
so that by analogy a person can live, he needs what then
so that all the past works for
on a specific concentrated mass
i.e. all his past all his past events
recorded the body mass that is
^{Well there,} depending on the food, ^{yes} For example

and when a person sees it
then generally speaking if we talk about nutrition
then if we close the future events ^{, as it were}
on the structure of the past
then we get nutrition
it doesn't have to be that intense
or can a person do without ^{for example} a certain time
without physical nutrition
because it closes ^{the} system and has
God has
a single concentrated physical system ^{yes}

Physical Body

it turns out that if so
He gets his food from somewhere
where does he get it
This means he synthesizes events in this way.
what for example is the level of management from the past and the future
as if it were closed at the level of the goal
i.e. it turns out that God works
in the structure of target management

i.e. God needs there to be Eternal life
He does this all the time
It turns out that this is where he gets the means for Eternal development.
judging by this model

and it turns out that He then
than He has more worries
the less he needs, that means there is less food here
or is there time to rest

which means it turns out that He may not eat in principle
He just has a lot of worries
He may not eat at all if he wants to.

i.e. it turns out that if we proceed from this
that is exactly the physiological norm, the human norm
let's assume the disease is cured yes
it is simply a comparable number of cases in this case

it is logically clear that the disease is decreasing yes
he is forced to respond to the disease there
Human
recover, etc.
and if there are a lot of things to do, the disease does not materialize

that is why in the construction of a person it is precisely
an information exchange structure is also being built
here are the tasks of the human physical body, etc.

i.e. it turns out that logically a person
in principle, it can do so many things
how much should he get in general?
i.e. there is no limit on the number of cases in principle

he can manage to implement any of his systems there
management
any creative systems there

and it turns out that based on this yes
then he can do for example resurrection
he can do any task there, solve it, etc.

but for this you need these lighting systems
just arrange it correctly

after all, the construction of man
this is also the construction of the external world

i.e. the construction of how the external World is in general
for example, some building where a person lives
or where he walks there is some kind of relief system
how these systems interact with humans
how are they built anyway

here it is easiest to build from a person
i.e. the level coming from a person
should be like this
that man is the center of the system
this is a monolith
and physical
and informational
and light

and generally speaking any other level
which allows, in principle, to actually clearly understand
whatever happens whatever happens
no matter how a person perceives himself
he is always there
he is always alive
and here is the most important thing
that he must always have a physical body
and all other systems of Perception must be such that
so that he would develop some kind of absolute or something
self-perception system

for example, a person has been working with some technology for a long time
it is developing very strongly [...]
and what in the end how
how does he differentiate that he is saved yes
in the form of a complete person

here the world is very diverse
A and for example God is always God
He always has a canonical human body.
but He somehow holds it by force of will
this concentration
i.e. He clearly understands that the physical body
this is the Reality that will not change

That's why I say that they do exist
there in the Infinite Future
some kind of genetic systems, etc. , etc.
Now let 's assume there is cloning
new technologies for interaction between light and fabric, etc.

but here it turns out in such a World
A person must hold his body very clearly
at the management level

and so as soon as we come to that
that in a person somewhere in the region of the heart, so to speak
there is a very clear canonical center, as it were
that man is eternally alive
that it has a certain shape
that he can create control with this form

then we clearly understand
that as soon as we see the primary level
that man creates the first level of light
we understand
what is the canonical level of a person

i.e. a person creates with the light

and as soon as we begin to perceive this system
it all means we clearly see and understand
that a person can control
any event at all
since it creates light
he can influence any event

i.e. in this lecture I just showed
here at the level of seminar action
we need to get exactly this light

it's enough to get it

any system
it becomes manageable as if by itself
i.e. you are completely natural
as is usually the case with all people
develop according to the system of your own events
and that's all

it is very harmonious very [...]
human and at the same time divine governance
i.e. this is precisely the selection of light
Push
from its form
from the awareness of personality

namely man in general
in such an Infinite, boundless World

This is where I end today's seminar.

Thank you very much for your attention
