

GRIGORY GRABOVOY
The Teaching about God
Centralization of the management area
10.02.2005

Hello again
the topic of my seminar today
This is my Teaching about God
Centralization of the management area

in this topic i show
how does scope of control ^{mean}
and any area of management
which you are engaged in
center ^{for example} in the control space
where centering means this approach to the center

because when a person controls
precisely from the point of view of the control center
then it turns out that here goes
more intensive management
than for ^{example} on peripheral optics ^{yes}

that is why the concept of "centralization"
means in this case
it is precisely the centering, ^{as it were}, in the control system itself

i.e. a person can, ^{for example}, think on the periphery
^{Well}, some kind of external control needs to be done
but this ^{means} its intensity will be
^{as if} it could be less effective
if it's ^{like} the management itself
goes to the information area
which is a little further than let's say ^{yes}
as for this particular person
structure of the center of the world

and here centralization is also meant
that the person is letting down the management
to a certain center
in fact, if you introduce a control goal
to the center of the world on information
then the goal is achieved in any case

here is where the level comes in

when past events are future and current
they are starting to integrate
in one for example there is a point of optical luminescence

i.e. the projection of all times of systems there
is projected
into one central area
this is the first level of centralization
areas of management

there is also the creation of properties
namely the properties of the central region
peripheral level of control

for example, you are in charge in some area
somewhere for example here and on the outskirts
so I'm showing this place directly

if the center is here, yes, specifically the finger
where practically here is the glow here
the end of the finger immediately starts to glow
central level of control

here for example the peripheral level

we can formalize the peripheral level
in that we kind of translate the property of the center
to any peripheral system
it turns out that any private system yes

and it turns out that the area has properties
central control
i.e. it happens faster
in your Perception
but your Perception
translates to the central region
and it also results in more active management

so there is in this case
just like God does, yes
centers all phenomena in relation to Himself
this is the action of centralization
when all phenomena of Reality
converge as if into a single center

and if you imagine
well, there are some buildings there, yes

like some kind of cubic square systems
some spheres, for example , angles , well, trees, yes
some objects of information
They have different geometric systems

and here with centralization
all these systems are reduced as if
into a single dynamic center

i.e. we need to keep in mind here
well , it reminds me of something like that
like a constricting funnel yes Means
well, unlike, like, let's say there's some kind of whirlwind there
and objects are not destroyed
but they should be pulled together as if Yes
into a single center like a kind of mosaic

that every phenomenon
each geometric element
it corresponds to a specific place

and so if the phenomena are different
then pull the system
and the phenomena are obviously different
in the World
Only a person can pull it off

because a person is in his own control system
it is located outside, actually, like this
dynamic geometric objects
i.e. those that have dynamic development in space
and centralization is dynamics

a person gets into
into a structure with your body
it is the manifestation of statics in this World
i.e. he has supervisory authority
like a control function

and here there is a very important point
when we center this area, as it were, yes
centering area
they still folded it into some kind of surface, yes
or we'll call it there for example, like this
like a mosaic and some kind of control there

all this came together into one axis

there is some leaf of a tree there
in the appendix there to the part of the land there
there For example there are pens, etc.
and all the space is occupied yes

and now we have a certain spheroidal system
where all phenomena converged
and in geometry, for example, they converged Yes
i.e. we created some element

so if we start
this element should be considered in management
then we will almost instantly
but we see the speed of the true transition
we move to the molecular, there is the atomic level

i.e. this is when we center
all phenomena of Reality
simply by geometric principle
we see how the Macrosystem is there, the Macrosphere
goes to the Micro level
i.e. we see the path of transition

and then when we take this route of this path
we see
we see what and how God does for this
i.e. how He perceives the structure
from the inside
and He is from the inside
this centered sphere yes
all the phenomena of Reality, so to speak
He sees the same way as a human.

this is very important
what if all phenomena of Reality
to transfer and center into such a sphere
in relation to a certain central Light yes
then the Light is emitted from within
and shines on the surface of the sphere
because the sphere itself exists

i.e. this is where this arises
Well no matter how complex the dependent phenomenon may be
not because it is difficult to comprehend there
and because it is precisely this that is complex, as it were, in technology
by itself

it's very easy to understand
there is such a collected sphere
from as if pieces of some matter
in general, all the matter of the World , so to speak Yes
and the Light shines inside

and here we begin to see the difference
between
With light
and material level
not in terms of there being a fundamental difference
because any system can be broken too
on lighting systems

namely, that we perceive materially yes
and what is Light
i.e. why is this part material for us
and the other is Light

i.e. if you think about it like this
why don't we look at the whole picture right away
For example there is a micromolecular level
and some light level
and there for example, the material level yes
God's point of view
for Him all phenomena are the same Reality

then it turns out to perceive a person
He must, as it were, recreate Himself.
in the human consciousness
He must clearly be a human being.
it works for everyone

and based on this
even if it is a luminous phenomenon
then the presence of God is there
For example there is the action of God
with some kind of light effect
here it turns out that a person perceives

for example, this inner surface of the sphere
just like God perceives it
since God perceives as a man at this moment
it is clear that the Perception of God gives birth to this Light

i.e. we clearly differentiate here
that here the Perception of God is present

here God perceives

and here it turns out, unlike that
what God does there, gives, etc.
so here we see that He perceives

and it is clear that God perceives
but there is such a point of view
what does it mean when god perceives
some elements of Reality
He well as if having perceived something, he does something further
there it gives, then for example good
or there he realizes desires
or, on the contrary, some new technologies of cognition

so here it turns out
that the very structure of Perception
like a light coming
on the inner surface of this sphere
collected from all the phenomena of Reality
and for God he creates these elements of Reality

i.e. by and large
what a person perceives is what he creates

then the question arises
well, by analogy with how God does it
what is meant in this case

then the question arises
what then anyway
to the primary element of Perception

i.e. for God as
what He perceived
then it turns out He created it

what about the primary element
to the primary element
it's the man himself again
i.e. the physical body of a person

and therefore
so that all phenomena of Reality
save as if in a rigid system
By the way, this is a very powerful coordinate control system
because when you add up

all phenomena of Reality in one center
those. center ^{yes} actually
pull into one center

Well, with an effort of will you take it there and start to pull it

then here it is very clearly defined
prognostic picture of any element
and very specific connections are established between them
for example, the same tree leaf can be clearly seen
right down to the time to the place, etc.
where does it start ^{there for example, turn yellow} ^{yes}
or vice versa, it becomes greener ^{there, etc.}

so that's what it turns out to be
Well, it 's greener ^{there} , at first it's light green
then it gets saturated and becomes greener
i.e. time ^{and different time}
different ^{as if} some kind of Reality

and we see
as around this Reality
objects of the external environment are growing

i.e. by and large
right here is this very picture of the World
very clearly visible
around every phenomenon of Reality
the whole structure of the World is growing
and it's very easy to figure it out here

then it turns out that we can
having some one object of Reality
Well For example there is a human physical body
it is very easy to follow all the development systems
around this physical body
of all Reality in general

and so God has
Well in general a very simple action
God can act
in all systems of Reality

and in principle He acts
i.e. He creates, ^{as it were,} all systems of Reality
^{as if he chooses them simultaneously.}
for a person from the point of view of human logic
and at the same time all the phenomena of Reality

He creates
and in fact it moves with its own Consciousness
in many directions yes

then this nuance arises
and where is a person supposed to choose?
what is his personal path
in a person
the system seems to be spinning in one direction yes
in his personal

and it turns out that when there are a lot of people, yes
phase of collective consciousness
then it is expressed by actions
i.e. the more people
the more pronounced
task actions and goals
and in general, the True mission of God
in relation to a person

because then many phenomena arise
for each individual
but as if it were an individual phenomenon
every person
it is unique for him there is something new

and at the same time it is his own world
which is exactly the same
that there are all the phenomena of Reality
what is his personal perception
it's like everything is the same for God
therefore it is the same for a person

i.e. therefore the conclusion is completely simple
a person perceives
there is only one world of its own
one path he takes
just as he perceives
the way of all other people yes

so it turns out to be a person
your way
equates to the path of all others
in general, all people taken together even so
although he perceives each individual in the same way

i.e. it turns out

that a person has this system built in too
Well, actually, management
by the equivalence of any element of Reality

and this is where it comes in
just a certain, absolutely clear concept
precisely with the equivalence of its deep
or let's say the controlling understanding

when there is Light for example Yes
then an equivalent phenomenon to this
is that for example in some place
there is no light
for example a material object
through which light does not pass

hence
for the equivalence of the phenomena of Reality
unification of the properties of Reality
this existence of dense matter arose there, yes

and when do we start
well, from the point of view of social processes there
reason, transfer analogy
on some social processes
i.e. there is some movement
there is some action

and what is equivalent

from a logical point of view
equal value target for a person
has the whole sequence of actions
i.e. here is a linear task, the execution of the task means
i.e. the execution of this task is equivalent

but for God
for whom the beginning and the execution are the same thing, yes
the task of revealing the World
as if in a spatial-temporal dimension
is to transfer knowledge

those. God in principle
He writes a separate story, as it were .
scenario of perfect control
he also writes separately, yes , you could say that
creates a goal setting

because He creates everything
Well as if on a clean slate always yes
and for Him
what to create goal fulfillment
what to create there a statement of purpose
it's basically the same job

and it turns out that here it already arises
then the next element
this is exactly the centering
this very original Light-containing
for example the principle of God's Action
i.e. creation of all elements

it's the same as a person sitting
if we act by analogy
and he comes up with a goal for himself
he himself does it

and when you for example come to this as
Well, basically that's how it often happens
so when you come
to this level of management
do you understand where you are
and what you have now
you basically once upon a time quite a long time ago
we've already prescribed this to ourselves, basically

and when you start to understand
where did you write this down for yourself and why?
a third level appears, as it were
in general initially
and why exactly like this, for example ?

i.e. the original Light of this event

and here is this Light that I described
centered Light of creation
the whole system of the whole Reality
he begins to acquire
completely individual properties

i.e. you begin to understand
which is basically true
this applies to you personally
although the Light is universal

i.e. it is clear that Light is simply universal
but you see the Light from it
which is actually common to all
you see him as just yours

Thus
God speaks to everyone through Light
this is a method of address method of Action yes

and projection
on any element of Reality
this is the creation of elements of Reality in aggregate
i.e. a person sees
as if from the inner surface of the sphere
some element
he sees that this element exists somewhere
and it turns out that based on this it means
we have the following event status so to speak

a man who sees
your own way
other people's path
and external Reality
he is already in control
just like for example there in certain systems
God controls, well, multiple levels , yes

the only difference is that
that God controls Himself completely yes
Your own system of Self-Recreation exactly

a person must guarantee then
in order to get even closer
to the Light and to the Action of God
that he is basically in control of himself

i.e. the question is only about everything
the difference from God in this case is only in that
what should he be a man then
how to understand and know yourself better
and that's all

and the more he himself
understands and knows and has more control
the less differences it has
from the Action of God
and in control of the Macro level

and in general for all systems of Reality

after all, this projection sphere, let's say, yes
it contains not only some objects there, but also large leaves
it contains molecules and any microsystem there

and it turns out
that a person comes to his personality
in terms of the light level of primary implementation
i.e. he begins to understand the Light
begins to understand his Consciousness yes
begins to understand the Light of his own Consciousness

i.e. in principle he begins to understand
any Light any optics
and this is actually the most powerful clairvoyance
and if
well or there Spiritual vision so to speak

when you even look at the path of Light
from the internal system of this sphere
to the inner surface
where there are already material objects yes
well, that is, there is a sphere
around we made a model like this
that all objects around are material
and inside shines the Light
which is actually generated
in essence, the same sphere
if we want to study the system autonomously

and then it turns out
that's what we just looked at
The Action of God within the Sphere
that movement of Light
to the inner surface of the sphere
this is the most powerful level of human healing

because in this case
his movement well as if from the point of view of Consciousness
this is synchronization with the entire system of Reality
and the whole system of Reality
it is clearly oriented towards Eternal development

it means the person recovers quickly yes
as soon as it starts moving
at least synchronously

at least seeing this Light is enough for him
he is already recovering

i.e. in this case
The action of God is manifested precisely in the universal
there fast including private knowledge

and in complex processes
the more he moves through this World
the faster it recovers
here you need to be able to keep the length of the path

and when approaching
into some element of Reality
it's better to get closer to yourself
this will be a technology for healing

but from the point of view of Macrosalvation
here any action is already Macrosalvation
because you are in the realm of Macro Management

i.e. here is obviously Macrosalvation
conditioned by your point of view
your external position

and then it turns out that when you want to understand
some kind of structure deep down there
in the original sense, or what for you?
here you need to understand the internal connections of the system

i.e. in what way
one element
connected
with another
Well For example there is one continent there yes
one coordinate system
a conventional value invented by people, etc., etc.

and when you see that the human mind
For example there he comes up with coordinate systems
some ways of moving
i.e. well, development is starting to happen
any new super-new technologies

then here you can see that in this system
the next sphere is already visible
what will happen in general

how this mosaic of the world will be centered
the next moment there
a second
month
year
a million years ahead

and the difference between the current yes like a mosaic, so to speak
current design
And

For example there a million years ahead
only in that
what can we see
The act of God and man

i.e. we can see
how is human free will
implements his personal designs there

i.e. The light that I showed
initially going
on all phenomena of the World in fact Yes
and located in them
why am i saying
it seems to reproduce itself in reality

and the Light coming to man is already in Infinite development
this is that level
when a person has actually in essence something
already next well as if the Light of life actually
i.e. it already has the following development
which is called the Light of Life

i.e. developing Light is already life
any development is already life

and thus it is visible
how human life is created

and when do you start to see
how human life is created
in the form of well, what does it even have to do with optical
here I show with my hand
this is specifically in this place
so optical axis
it is silver, even golden in color

and when you start to see
what is life ^{yes}
in your Perception
then you control life

and when do you start to understand this
accordingly you ^{can't} live forever
because management is ^{there} real life

that's why I showed it here
that is what centering ^{means , i.e. the Source of Light}
from the center ^{as if yes of} all phenomena
to show that the center of all phenomena
as soon as we leave
from this concept further in development
this is life

i.e. in fact I am showing
the structure of development from life itself

^{Means Well,} everything can be attributed
to the phenomena of life development ^{there}
in this case i mean human life

and that's when we start
this is the phenomenon
^{Well how to} center
understand
determine

then in the center of all phenomena of Reality
human life is located
because God is also a man
and He created life ^{for Himself}

and when do you start
watch this control
i.e. to make management

above the level of development of life there
need to come out sometime next Wednesday ^{yes}

but God always comes out only into life

and it turns out that for Him
centering the system ^{yes}

in this case also in the fact that
well if there is some kind of environment there, air
you can go out there into a denser one or vice versa yes Means

but supervision
as if external control over some environment
sometimes suggests
the presence of other environmental properties

for example, to control the air
we need to get to a solid phase there
or in some other gas yes
Well as if the properties are different

but in man, by analogy with God
he can go out
into the structure of only the next system
which also relates to the life system

i.e. God can only come into life
that's why He has a different way out
i.e. It's like it 's working all the time
in the same environment

and it turns out that this environment is actually there
she is practically like that
what does it mean that he moves there in some special way, yes
God is created in his Consciousness

i.e. no matter how He moves
although it is understandable
He created all the phenomena of Reality.
but if from the point of view of human logic
It has to move somehow.
along some kind of special route
to be constantly present
in the same area
and still manage to control it, yes

it's the same as if there is
well some kind of space satellite
which means it requires control

due to the movement of people inside
there is an autonomous system

then they can in principle

due to the displacement of some internal
somehow influence the satellite itself ^{yes}
so either there is a spaceship ^{there}
somehow controlled from within
but this control will be quite local

so how to manage this ship as a whole, ^{yes}
some external control is needed

so here is the transition to external management
which is again in the structure of life
and does not go beyond life
this is the structure of the dynamics of God's development
actually in the Consciousness of people

i.e. a person perceives the structure
Well in general it turns out to be quite centered
i.e. it turns out that it has ^{some kind of} control
what exactly is the center of Consciousness ?
there is the light optics of Consciousness of his man
it spreads
almost simultaneously
to all structures of Reality

i.e. if a person looks
on myself ^{there} from the inside ^{yes}
then he succeeds
that it is precisely optical, ^{as it were}
level of realization of light
just as God acts
it is such that in principle a person gives
all the time this same type of glow
on all structures of their ^{so-called} material systems

i.e. he is essentially always ^{like} constantly
somewhere inside there is a glow
well, by analogy with that
how the outside world works
's how humans are made

and therefore
all phenomena of Reality
are projected
on the physical body of a person
by analogy

those. here is the conversion

transition through the structure of continuous life
so it turned out to be a man himself

it means the form of a person and his actions
this is, in essence, the Light of continuous life

and through Consciousness
when a person perceived it correctly, i.e. logically
such as there I showed
a certain logical model
and any person can have some model of their own there
consider in this aspect

in this case I proposed a model
which works precisely in the Macrosalvation plan
that's why this model structure
it is focused on Macrosalvation
i.e. I still center on concepts, yes, in this case

and this allows you to do management
which actually means
having many areas of centralization
including, as it were, an inner light yes
going to the internal organs of the system means

already accumulate control area
from the point of view of prognostic remote events
Thus
what do you mean if you control
Well For example there is such a meaning there
what if you do a lot of centralizations
in many areas
concentrate energy yes
concentrate information
because the more we concentrate information
topic management will be more efficient

if we center
peripheral system
central
we will show how the Light of life passes
through for example Infinite Development
we increase as if actually as if
weight control yes in the optics of the future
and then the management in any case
this is precisely the management of the process
will definitely be implemented

i.e. it turns out that
so that it will definitely happen
implementation according to management objectives
we need a phenomenon called realization
i.e. embodiment in management i.e. realization of the goal
so that the optics of this process
was equal
setting task

just like God does ^{yes}
What he puts in and what he does is the same thing.

and so that there is equality
criterion of equality
life is here again

i.e. a person must
create life actually ^{yes}
in the structure of a future event

i.e. what is happening here
centering the system
in relation to a person
here it is in the center
it has some properties of a function
he is alive
and can live forever
well, i.e. eternally alive from the beginning
but at the same time he can also master it, ^{so to speak}

and it turns out
that when further development systems
here is a conversion, some kind of transformation
through the structure of life
moves further into management

then here we get exactly education
i.e. the development of life systems in the future
this is the level that in any case
implements your management

logically it's clear again
because a man lives forever
he will achieve it anyway
some specific goal there
or all purposes

i.e. logically it is again
i.e. we are moving on
from the light level
from the Spiritual Administration
back to logic
in this case

and I show
that the logical model is quite closed
i.e. it provides a comparable level of control

i.e. it was not necessary to reason for a long time
if you think about it logically, it would have worked out that way
what yes to have precise control
you need to have infinite life

but in this case I showed
through the level that God he can't there as if
Well, fall out
into some space outside of life
and start managing
because wherever He fell out
He will have life everywhere

i.e. any of His states can be called life
precisely in human understanding
in the physical body

and it turns out that He somehow manages
do management all the time
through the structure of Life

because
from the point of view of seemingly antagonistic concepts
if you need to manage
some such environment as life
there must be a kind of third state
God doesn't have this state
He has Life everywhere

and that's when we've already studied
systems of these transitions
it turned out that it was
it is the physical body of a person
which projects onto itself all the phenomena of Reality

therefore if you
from this inner Light ^{yes}
as if you start to look at yourself
it turns out that this internal light
shows how the phenomenon of Reality is generally structured

i.e. it is enough for you
trace the beginning of the inner Light
in yourself
and how does it even touch
with your body

it's better to watch
as if not from inside ^{there}
something to look out for
how does it start to arise there
and many enlightened people ^{there}
the glow from outside begins to be visible ^{yes}
and what does this say?
what they start to show others

i.e. they have education at such a level
what they start to show others
but this is ^{kind of} an optional element
nevertheless, this certain nymph there
if a person ^{there} wants to organize it, he can
for the educational system

to organize such a system ^{of} knowledge
but then in principle he should of course try to teach
others
although he can also show it himself ^{yes}
nymphs can be speculative
maybe ^{there is} just a regular light, etc.

but there is a certain one, ^{as it were}
Well, spiritual, maybe? so let's say nymphs ^{yes}
any person
there is this halo glow
i.e. well as if the glow of the Spirit
which is recognizable in his body, ^{so to speak} Yes
in its action

here in any action
there is some spiritual action
spirituality of man ^{yes}
this or that level of Spirit

means any action
implies a spiritual aspect
i.e. what is in the Spiritual status

and this is the Light that is happening
more like the Light of the Spiritual plane
Well, the Spiritual path can only be one
it covers all the phenomena of Reality

i.e. this is where the correspondence lies
as God does
God embraces it
Spiritually and physically

and a person has a Spiritual path
let's compare
with the physical level of God
Well kind of compensates yes
covering all phenomena there Realities of the physical type
including

and it turns out that this is enough
in general, a powerful model of centering the World
where is the person who is in the center
in this case already then Mira
when he for example this sphere
here are all the phenomena of Reality
perceives

and if we take and put a person
in the center of this sphere
then the Light will not change at all
which comes from this sphere

moreover, at a distance
here a person begins to move away from the center, as it were Yes
Push
where is the glow going
he perceives himself
i.e. return to oneself
there is only one development option here

and it turns out that he sees, for example yes man
begins to move away as if
the image of a person dissipates
but at the same time he starts

clearly fix oneself

pay attention here
so very peculiar
the level of control is obtained

i.e. it is enough to distance yourself
from any other person
you see yourself right away

and therefore, by and large
in this world exists
what well so let's say on information yes
another person
You

i.e. the person and you
and in the end you are a human too
in this system there
if very quickly as if this level
start working on it
this is the optics of Light of this man
like she sticks to you
you realize that you are this person

i.e. the realization that you are a human being
has not just the concept of "word" yes
and because of the information
which relates to a person
it kind of characterizes the community

i.e. you understand that you are a human being
that's exactly it, well, let's say it this way in general, or something
in the fundamental Divine understanding
because it means as a result of work
you kind of have it on you
the same information as that person
which is in the center of this Light

i.e. you work within yourself, it turns out
i.e. you are aware of the person as such
as soon as the impulse of Light hits you it means

and when you start to realize
Well as a person in general yes
as if in fundamental development
then it turns out that what difference does it make to you then

what to realize God
what to realize a person
God is also a man

it works for you in principle
there is no difference then
here in this technology

and realizing by analogy then God
you due to the fact that upon realization of God
so you have Infinite speed again
as if this is the transfer of information

you are actually aware of Him
here through the image of a person

i.e. you see that the Image of God
he really is like that
as if in a big in a deep sense
because He is realized
only through the image of a person

this is a very fine line
but it is very clearly visible in the controls
because here, as it were, in the future
it will be seen that through another route option
there are no real concepts here
God awareness

because here it seems to work out
what 's in the infinitely distant future
he is the same person as he is now
i.e. there is simply a general concept of a person

and it turns out that when you start to see
this is the level of transition
then it is clear why the awareness of God
must go through a person

because man is life
life is a person it turns out
this is how equality arises

and God is also a man
God's action is also
human actions etc.

i.e. the field begins to expand
where well let's say a certain conversion of concepts of different yes
leads to the fact that from the field of life
No one comes out anymore, that's why
that they simply cannot fall out of there in any way
even if they want to
but in this case such a thought cannot even exist

i.e. and therefore well For example there exists in civilization
such a level
so that a person can live there forever
and he had no desire to mean anything else there

then in this very design
namely the centralization of different systems
in terms of Eternal development
for Eternal development

such a dynamic enough arises
area in information
where any action any action
only expands life

i.e. a person wanted to do something
life has become even more powerful
near him
increased even more, etc.

as soon as you start coming
to such an understanding
basically further
you can instantly there for example, to restore
for example, the cardiovascular system
you can heal very quickly there
well some complicated heavy ones
which may have been called there up to this point
before learning such technology
incurable diseases , etc.

because
as soon as a person begins to see
that he is always in life
and there is no way to push him out of there
i.e. it is actually located
in the center of the universe
in the center of the world
where is life

this is basically what it is
all Reality is for man

it turns out that in this position
he falls into a very well-established point of view in general
which cannot be moved
no other phenomena of Reality
and he just lives forever and that's it

he realizes it
at a certain point
he clearly understands this, for example yes he feels he knows

but here's proof of that
that this is really so
need it well there it is practically clear
are some years of life , decades or centuries
but the question is
that a person at every moment
must clearly realize and understand
that he lives forever
even if he lived there for a billion years or ten billion

i.e. this stabilization of Consciousness
at the level of unambiguity of technology
i.e. the exact certainty of that
that in the future this will really be the case

i.e. the future, for example but it didn't happen
but man knows for sure that he lives forever
Well, he lived there for several billion years.
and the next second for example shall man live?
where are the guarantees when the future hasn't happened yet , for example

it turns out that the guarantee is
that he must control the future
just like for example there is real yes

Moreover, he must manage
not just there at some present moment
in the present he is alive
this means he must actually manage life

not some abstract phenomena of Reality
namely, life and one's own first of all
own life in the future
i.e. in Infinite development

Now this is basically clearer

i.e. it's already easier here, so to speak
because it highlights the structure of life
everything else is already the level of development of events yes

it turns out that there is enough for a person here
build all events
around your own life
on information

then something needs to be done
highlight life information life
and all phenomena of Reality
how to focus on your own life

logically it is clear
although it's not such a straightforward logic yes
and how about more analytical logic, so to speak

but nevertheless as soon as we
means everything that exists in the world
we start to output at the projection level
for life
then life itself ends up in the center of the Universe
then already

so our task is just that
Well how to start projecting correctly

i.e. choose a sequence choose tasks
For example there is the task of Macro-salvation
this is the task that always exists
and only through it
you can even at least start this work

i.e. you can know
but it is really possible to get into such management
it is possible only through Macrosave for example and so on.

so when life is also Macrosalvation
i.e. your personal life is the Salvation of all
if you make it faster than Eternal
then it turns out that you will save everyone faster

and it turns out that here
this is the level of transition, so to speak

management level let's say
Infinite region
from your personal life
this is already the level that if, for example, you track
well, some kind of fructations, some kind of tension systems
in the development of life
you can learn for example there is no rest
or somehow minimizing food there, etc.
in the long run there will still be people there
means to do management through the Thinking system

i.e. food
this will already be a different moment of management
which over time
people will have to create anyway
due to Thinking
these are the products, so to speak, absorptions, yes
which cause what is called nutrition

i.e. what's the difference
you can eat
and you can take and create control
this matter

then here it turns out
that the transition to a standard of living
i.e. there, for example, in the distant

maybe not very conveniently far away
it turns out logically
in the future when man creates an element of Reality
at home and inside
and he doesn't need it for example there is such a degree of nutrition there
or maybe he can live without food and water
be

and then it turns out
what does it start to mean
It is the person who begins to see
how do these systems work?
Well as if many conversions and Reality
where are these levels of centering
levels of different central elements
they start on their own
already in the future
when you find multiple properties
centralized, so to speak, information objects

What am I doing?
I'm just on everything
I take it and sort of increase the meaning
as if one level of management
i.e. I strengthen
I make it more central to Perception

if there are many such elements
find in Reality
then it turns out that you have essentially
such a level of management
what to help any other person there
there in some Infinite future of yours
already now current action
it is quite possible quite often even just yes

i.e. if for your Infinite future
it is enough to highlight
fragments of positive events
and bring the Light out of them
on yourself
then everything in between will be fine

You can help another person in the same way
you just have to work
in a different coordinate system, so to speak
somewhere nearby there Well, find something for each person
has its own control system

and if you for example manage
through great dynamics
i.e. well as if instantly thinking through some systems
i.e. you are trying to make the control fast there, etc.
then in principle the analogy here is the same

how fast can you work
this is how the management takes place
but nothing so special in terms of difference
no individual control
even if you work with a lot of people

just here
to help other people
you just need to find it
well how do you even start doing it
as if at the same time

and peripheral
and central control
and make it so that the properties
peripheral and central control
were the same ^{yes}

then it turns out what difference does it make to you
that you work with one person
what are you working on
there with millions of billions of people

because with the same properties
you give the same type of control
to all systems

i.e. all you have to do is
as many areas as possible
center
the brighter and more centralized
becomes
spreading your knowledge

that's what God needs
skill your all positive knowledge
direct it to the system of Macrosalvation

so that you too can achieve your goals
as quickly ^{and} accurately as possible
and generally speaking it is necessary
reached the goal
and other people quickly learned this from you

This is where I end today's seminar.

Thank you very much for your attention
