

GRIGORY GRABOVOY
The Teaching about God
God Consciousness
20.12.2003

Hello again
The topic of today's seminar
This is my Teaching about God
God Consciousness

when we consider
spectrum of God Consciousness
then first of all we can consider
human body status
in relation to God Consciousness

if we consider
the human body as a form of God's Consciousness

after all, God created Reality
gave shape
including the properties of one's Consciousness

then it turns out that personal characteristics of a person
his free will for example
expressed in that first of all
that he is able
as an element of God's Consciousness
express one's will in essence
as if the central status of Consciousness

i.e. a person can do it quite well
the same management structures
as and as if the central focus of God's Consciousness
from a human point of view

i.e. it can therefore regenerate
he can create
remote control systems
and actually has
the property of Eternal life
i.e. the property of immortality
in which the concept of "death" is excluded this system
from the already human Consciousness

if a person understands

that it works
inside the very Consciousness of God

and when you start to do management for example
from the level of God's Consciousness
then you should first consider
the connection between God and man

from the point of view of such a concept as Consciousness
for example human consciousness for example Yes
God Consciousness

and considering that for God
any Reality is manifested first of all in that
that He sees, in general, his own actions
as both a source of action

then for the focus of His Consciousness
for the Perception of God
action and source are one status
His own personality

i.e. He is like in general, as if from the point of view of the element of Consciousness
It's like he swallows this element or something
external control beam

in this case the concept is precisely "swallowing"
closer to the body
specifically to the physical body of a person

and at the same time when, for example, a person
Well, let's say he swallows water or some other element.
makes management in relation
for example to your physical body

then the control happens like this
that everything that is created by God
for example, from the point of view of the development of His Consciousness
this is an action expressed in general by the person himself

because a person perceives this action
i.e. for a person there is
the essence of this action
and it turns out that there let's say drinking a glass of water
he basically carries out the action
originally embedded in him

and at the same time we can consider

such a structure
what is this sip of water
, for example, quenching a person's thirst

but when we look at
for example, the process of thirst generation

it turns out that the human body
also functions in the direction
in general, in logical terms
in that direction
what is the concept of , for example, "human food" or "human drink"
this is a concept reproduced by God
to carry out the function of, in general, controlling Consciousness
from the point of view of God and man himself

here it turns out that we have
the point of unification of such concepts
as a concept
God Consciousness
and human consciousness
in terms of human action
and in terms of a person expressing his actions

i.e. the inner essence of a person
this is the personification
namely, in general, the elements of intersection
Consciousness of God and consciousness of man

and at the same time we as
namely the intersection elements
we have some element of mutual action
already conscious element

i.e. the person who drinks water there
he understands that this water is located
for example in some physical World

and the whole world at the same time
this is an object of control, for example
from the point of view of God Consciousness

and here he can go
to the conscious Actions of God
in its seemingly elementary action

i.e. when God Acts
in elementary systems of human development

and here he can see
presence of God Consciousness
For example there in the glass of water

at the same time when he considers
this position from the point of view of its development
he sees the face of God

i.e. one can see the face and physical appearance of God
if you can work
with the status of His Consciousness
in any elementary action and moreover in that
first of all in that action
which passes through
in general, yours as a physical entity
and so is the essence of your consciousness

i.e. it turns out the most
a close connection with God
and with elements of His Consciousness
in terms of joint actions
where it works
and the physical body
and your own consciousness

according to this principle you can get
strong enough
element of human body restoration
there are solutions for example control elements
set by both God and man
in process yes for example, the development of the world

and where there is unification
human body
with God Consciousness
maximally expressed
we have
quite a strong status as it were
personal management of a person

i.e. a person understands logically
that his strength is such that he can, for example,
prevent a nuclear explosion
even remotely for example there are warheads there
i.e. he can understand
your inner strength logically
i.e. at the level of simple consciousness

because the unification
forms of man as the status of God's Consciousness
and unification of purpose
in terms of, for example, Eternal Development
this is a level
realized first of all by God himself
for His own development

so the person kind of gets into it
in a fairly stable control phase
coming from God specifically

because the Consciousness of God is also
the logical path of God himself

and when we consider the logic of God
then in God's logic there are such concepts
like logic for example yes further action

or a concept as a private action
for example compatible
with Infinite level
all external and internal actions

i.e. for human logic
this is a plan for Macrothinking in general
this is logically the level of Macrosalvation
expressed by the person himself
in relation to, for example , its action

it turns out that
when we talk about Macrosalvation
this is the logic of God's Thinking

i.e. the Consciousness of God manifested
as an example of a personal action
in relation to a person

i.e. God's Consciousness is such
in relation to a person
that God gave man the opportunity to understand
this status of Consciousness

and when we have this system
let's start analyzing
in terms of , for example, the Infinite Development of Man
then first of all it is necessary

consider the status of a person's ability
fully recover for example Yes

during the Infinite Life
situations naturally arise
when a person should be able to
recover completely

so he has to do it
including logically
if from the point of view of God's logic
this is Macromanifestation
i.e. Macrosalvation for man

then it turns out that the status is universal restoration
well, in the case, for example, when we are considering
already more distant processes
when society develops infinitely
and in the Infinite Future

here a person can recover
by what he knows
what is universal restoration

if we are talking about the initial status
i.e. people are just starting out
be able to, for example yes live forever
then we are talking about that
what a person should be able to do
to restore oneself practically
depending on the overall situational level

when the situation
can practically be born
as a structure from the Consciousness of God
and in general the structure of the manifestation of the Soul of God
in relation to His own Consciousness

but in this phrase it is important to consider
in general, the connection of the Soul of God as a carrier of Consciousness

i.e. naturally the Soul is present in the Consciousness of God
but the Soul as an Infinite concept
is the carrier in this case
as if by some kind of environment
in which is located exactly for example there
active faction of God Consciousness

and it is in this environment , for example
there is a realization that
that man and God meet
at the level of ^{there} equality of action

i.e. a person acting
in relation to, for example, a glass of water
or some subject of control

and God who created
this element ^{yes}
in Human Perception

they have equal effect
in relation to the object itself, for example

i.e. in the Consciousness of God and man
there is a status when the action is generally equalized

and when we Endless development environment
for example, we perceive it as, in general,
equal position
for both God and man

i.e. for God Eternal development
actually has the same status
as for a person

then we get unity of action
in relation to the target

and when we are here directly
we consider the attitude towards the goal
then it turns out that in principle
here it has a place to be, let's say
status including, for example, such a plan
as a sound form of control over Reality
coming from ^{for example} the fact that you hear the sound ^{yes}

i.e. you can transform the sound
into the structure of its own management

for example, a sound coming towards you
it's not the same sound that you make
For example there with your Soul

or which you reproduce
for example in your mind

if you want all sounds
which you reproduce with Consciousness
Well, at the level of Thinking, ^{yes}
were reproduced in physical Reality
then Reality must be exactly like this

but Reality is different

so when you want to make control
all you need is just
output sound form
or ^{there is} the form of light of Infinite development
as the center ^{of its} management

and in relation to this center
do management
for example, including the mantra principle
well, that is, with some sounds or abbreviations of sounds
or by transforming sounds

when you start to see
this structure of light-sound interaction
then you see that the recovery process
it's ^{basically} a process of establishing a connection
meanwhile
what do you see
and that
what is realized from your Perception ^{yes}
from your vision

and then you see
what is sound form control
fairly simple controls

i.e. it is enough to translate it ^{as if} into the inner ear
some image or just hear
we then have complete
the integral form of man

pay attention here
that man can be formed from sound

because initially, ^{for example, yes} the sound of the word
could also form a person

and it turns out that when we
^{let's assume} we set the task at a single-target level

act as God acts
in the status of his Consciousness

then we can see it quite well here
what to create well for example yourself in action
create another person
in Infinite Action
this is the status of habitual systems of Perception

i.e. we practically
we are constantly re-creating ourselves somewhere
in certain systems there is development

and it turns out that the usual status contains
system of word organization for example
the system of organization of matter and its own
system of organization
Well let's assume some distant development status

and the most important system
this is an opportunity in all these statuses
bring real help there to Makromir
i.e. the given world must be preserved and developed

because if this action is not done
then the status of a person himself
has no basis in its development

and if for God there is absolute space
such as the Soul of God
which contains the Consciousness of God

that for a person
this is the status of the organization of the World by itself
what about such a status
where the World is organized according to the light of God

Light coming from the Infinite level to man

but in general a person should understand
and differentiate this light
absolutely clearly as
Light coming from God

so it means the Light coming from God
he always comes first
and the Light coming from the Infinite development
to a person

from the point of view of human consciousness

in this case

I just brought it all together as if
optical sense of Perception in management

it turns out

that when you see the Infinite Light
you are recovering

Eternal development is Infinite light

so when you do management

coming to you for example

from God

in the form of this True Light

then you can create your body
in dynamics in motion

pay attention

if you solve some problems for example

even if they are complicated

where there is a task, for example, on Macrosaving

and you start setting the task of

what is necessary for example to rest

in order to recover there

then often the rest itself

it does not carry the same degree of restoration

and even on the contrary

it can cause an imbalance somewhere there yes

therefore the concept of "recovery" is the same work

and if you, for example, start to put

the task of Macrosalvation

then a simple logical problem arises

if you for example develop forever

and Eternal development is that Reality

which is generally feasible

simply by the number of practical actions

for self-regeneration, for example, self-government

external management

then it turns out

that this is for example a process

from the point of view of your development

this is a process of constant action

you should set the task of rest

how to remove the control system from control

in fact, as if yes, external light

what is rest in everyday understanding

this is for example there is nothing to do there for a while

perhaps this is how the everyday phase of Consciousness is arranged there

then here it turns out

what if you do nothing

we have a fixed status of objects

here is God's rest in God's Consciousness

is expressed in the fixed status of objects

and when you see the fixed structure of matter

this is one of the levels of God's development

Consciousness of God

so naturally it is clear for logic

what in Infinite development

we have an infinite amount

objects and the outside world

and it turns out that when

for example , God fixed the level

and the physical World was created

i.e. God's Consciousness worked like this

what does it mean for a person

this is a semblance of rest , for example

in Human Thinking

then from the point of view of general criteria of development

The world that was created in the rest phase

This is the World is quite simple to manage

and in general having the status of Eternal development

in fact, because it is manifested in Infinite forms

in a state for example yes rest of God Consciousness

naturally simpler in Infinite development

than the World that God has

as if in the inner level of His Consciousness

where there is, as it were, a more powerful impulse

in order to create the visible World

you need to have more powerful energy in essence
to reproduce something
is visually manifested

it turns out that this more powerful World
this is human consciousness
from the point of view of that
that this is the center of human consciousness

and you can see it from here
what is the center of human consciousness
also reproduces elements of Reality

from here you can
go into the structure of the subject
there we can restore from a distance, let's say there is a radio wave

at one time I did a number of works
filtered radio waves there in aviation matters
so that there is no noise

it is quite possible to stop
some specific radio wave
i.e. there is a wave but there is no sound, for example , etc.

and it turns out that when we talk about
about the structure of Salvation
it is possible to go out into any essence of the subject
through this structure of Consciousness
for example, to grow an organ

but there is one aspect here
in this technology
when you grow an organ
you are building it up
at this point of God's Consciousness

because this technology
concerns exclusively the Consciousness of God

then it turns out
that an organ could in principle grow in this place

but the task is again the own function of Consciousness
impart a property to an organ
for example, to be inside the body
move with him

because for the Consciousness of God
organ grown yes for example anywhere
this is an organ that also exists Eternally

and therefore we need to be more careful here
with regeneration technologies
i.e. they need to be installed immediately
from the point of view of future events

i.e. you need to see future events very clearly
how does the development of this organ occur , for example?
in relation to the physical body of a person

and here you can see it quite well
in general, there is a fairly direct connection with that
how God in general so you can say self-restores
through the function of one's own Consciousness

if we consider
for example the Physical Body of the One God
that's for Him
Consciousness is also the Physical Body
i.e. part of the Physical Body

so when
Well for example, we recall various such options
what kind of conversations are there when questions are asked in childhood
For example where the Soul is in the body

Well, everyone has probably encountered this
with some versions of these questions

it is clear that the Soul is there
in fact, in that structure of God's Consciousness
which is manifested as an expression of the human body
in relation to God Consciousness
to the Perception of God
from the point of view of one's Consciousness
and to the Perception of a person

Well, if you think about it
how God perceives man
then for example if well this design
to transfer means
well formally, it's like an optical view, yes
express in the form of some spheres
and set the task
filling this sphere with events

for example, a person needs to regenerate organs
or restore yourself to Infinite Development

then it turns out
that God perceives the World so comprehensively
what for God
man is Eternal from the beginning

i.e. it naturally has
mechanisms of one's own Eternal development
This is quite natural for God

so it's worth it only
to enter the structure of God's Consciousness
and see the same thing ^{yes}
through the eyes of a person it turns out
Human perception
and translate into human Consciousness

we have ^{basically}
it would seem simple enough
but ^{as if it were} automatically acting
mechanism of human development

what is basically there now
among people at the current ^{for example yes} 2003
as of December 20, 2003
that people mostly perceive structure
as a system of natural development
namely the structure of your body

but in fact we can completely move on
on the body's external control system
if we go out to ourselves it turns out
but from the point of view of this Light of God
coming to man from Infinity

and man differentiates
gets its own light
i.e. it self-regenerates

when do you cross over
to the structure of self-regeneration
from ^{for example} from the Teaching of the structure of God's Consciousness
you see that the process of self-regeneration
it's still common
quite a tense specific process

related to the fact that it ^{means} there was an opportunity
still grow ^{as if} a specific event
for your specific actions

i.e. if we proceed from that
that there is no action ^{yes} For example there are no words
there are no events expressed in actions, let 's say
or you are
well in the structure of that Reality
that in order to ^{develop it} , ^{yes}
Well let's assume we consider the version of that Reality
Means for example, which needs to be developed to Infinity

a tree is growing and the tree needs to be developed
to Infinity ^{yes}
so that the tree develops infinitely

then it turns out
what if we talk about this event for a long time
the tree can in principle develop

you can put it
"We need it to develop to Infinity"

but then Infinite repetition
leads to that
what we really ^{mean} is we contribute to this
but then we must be Infinitely Evolving

and this is one of the mechanisms
^{as if} of a causal level of development

i.e. God set the task of Infinite development
to a specific object of information
It develops itself forever
because He has such a task

and this level of, ^{as it were}, stretching of control
this is a level aimed at that
that when a person sets the task of Eternal development
then he begins ^{to stretch out} ^{with his physical body}
precisely those going into Infinite development
in relation to this task

it turns out that we can do it
construct , ^{for example}, a non-existent word
we can quite easily build any organ
or ^{let's assume} regenerate

almost any fabric
if we want to do it from the start
there is more from the structure after all
this structure is bigger than it
refers to the structure of the united Consciousness

i.e. Consciousness that contains
all elements of external Reality
Consciousness that contains ^{means} element
Well For example there is its own Reality
element of God Awareness

and then it turns out that in this context
prevails often
Consciousness of External Reality

and the Consciousness of external Reality
this is an element
which is external
and in relation to the Consciousness of God
and in relation to human Consciousness

then it turns out
the very wording of the words ^{yes , for example}
reproduction of the word
i.e. how to create a word in this system

This is a system of regulation first of all

i.e. if you create the word Norms
in relation to a person
for some disease, ^{for example}
then the disease is cured

and the main thing here
how can I put this word Norma somewhere

let's assume we can say quite well
what is the word Norma
there is treatment for osteochondrosis, ^{for example}
can be placed near the spine

and the cure for osteochondrosis
for example, you can place it near ^{the means}
let's assume any of the joints of the right leg

i.e. as soon as we fix two states
then the path from treatment to cure

this is the way of man yes
we see the light
going between two phrases
like light passing through a person
this is a human action

then it turns out
what we have is a healing process
as a process of Perception of just Light
from these two phrases in general

and thus
we can build the next word
that a person is cured of osteochondrosis
performs some actions

i.e. words arise in him
which he needs for that
so that he well how would he carry out his activities
even if he is for example well, some complicated one
carries out activities

i.e. for example, to create words
that could save
with some complex technologies
for example, you need to diagnose
some complex technical object
and you don't know the wording

then just enlighten yourself with this Light
for example, behind the back is the initial level of the target
i.e. diagnostics of the object

then as if on the right is
let's assume the system is well as if external information
what does the object represent , let's say, yes
what is this object

and before you is already action
diagnostics performed
or saving any technical object

then it turns out the Light is going through you
he absorbs all the information
well, which corresponds to, for example, the level
as if means in which there is information about the object

and you receive it on your Consciousness

by simply light
specific words

i.e. you can create words
through the light of an external object
due to the dynamics of action
between the goal and the overall solution of this goal

it turns out that when you start
in general, here is what to do
from the level of word creation

then it turns out that the Consciousness of God
is present here
as an element of unification in fact
at the level of , as it were, the original light impulses
all phenomena of the World in the external environment

and then it becomes clear to you
where to control the external environment

those. after all, it's a question of creation
controls in the external environment
it is still a process of control

when a person is at the level
when he for example there is forced to create
elements of Reality
in Infinite Development

then it turns out it turns out that his own Consciousness
quite clear in general and very correct
connects with Consciousness
not only God for example
in terms of the Perception of God
but also with the Consciousness of any other Reality

and that's when a person begins to differentiate
Consciousness of any other Reality
he becomes completely independent
and then the words become themselves
i.e. words organize themselves

and the Consciousness of God acts in the same way by analogy
Infinite Number of Realities
creates that word and that control
which is realized in the True plan
i.e. real control

then you start to see
that the creation of, for example, one's own organism
this is often an account of its various states
or at least a reaction
on some specific body systems

for example, you concentrated your attention
on elements of simple physical
and you see that from this a word is born
that takes you further

leading word

there is a certain meaning to the word here
which means that it is embedded in the meaning of the word
not just as if the word originally existed
but the word is the leading word

because the initial impulse
it naturally contains
all elements of the following control

God who created the world
He immediately pawned everything
the system of future development of the World

so here is the key word
a word leading into the distance
or leading to the Light of Eternal development
to the Light of Eternal Life
this is a word created by you

and there is a main element in this
development of God Consciousness
namely development in relation to you

that coming from Infinity
Light of God
which is transformed into a word
and the word is also light, also information

then it becomes an instrument of action
to shape further events

i.e. if you want
create your physical body for example anew
through for example there are millions of years there yes

you decided to upgrade

Well, it 's a purely theoretical task or even a practical one.

then you will have to create it initially

the entire level of its own management

from the point of view of conscious elements

i.e. from the point of view of that

how it is done at the level of God Consciousness

because Consciousness

it is still a controlled element

by God himself

although the Soul of God is naturally also completely

controlled element by God himself

but the Soul of God is Infinite

and its knowledge is a special path

but the path needs to be developed

well at least on the status of one's own Consciousness

or better yet, on the status of God's Consciousness

then it turns out

that the presence of God's Consciousness

for example in your own Consciousness

this is the level of your own development

in relation to oneself

i.e. as soon as you identify

more status of God Consciousness

the more you are reserved, so to speak

in the status of, in general, Eternal Development

and it turns out that it is possible to build

for example, the own status of Eternal Development

in general it is possible by this way

very clear differentiation of management objectives

in the structure of God's Consciousness

here in this structure of my Teaching

the possibility, for example, of infinitely spreading knowledge

it is contained here in that

that you can knowledge well any in general yes

to bring to the status of the Consciousness of God

and this knowledge

will immediately become universal

but already logically realized

i.e. this knowledge will be manifested in things
for the statics of God's Consciousness
this is the external physical world as well

and when do you start
invest in a management system
there at the micro level at the molecular level

then the person taking this glass of water
or there eating an apple
or touching the table for example
in which
at the molecular level for example
this knowledge is embedded through the Consciousness of God

then he gets this knowledge
because Light is still universal

True Light
he still passes
through the structure of any matter

and it turns out
what self-creation
this is the level initially
that you must be able to create yourself
even under those conditions
when there are no original systems for self-creation

i.e. a person should be able to, generally speaking
can be created in any system and in any environment

and it turns out
what exists here
the need for a transformation mechanism

i.e. if a person has
Well let's say healthy let's assume physical body
absolutely, precisely in the understanding of absolute health
although basically one can say
about practical health

so if the body is absolutely healthy
approaches vacuum for example yes
then in a vacuum it begins to be realized
oxygen environment

because absolute health

this is an approach to the Body of God
and God creates oxygen
He creates with his Consciousness
the whole external world in general
for the implementation of their for example
physical levels of development

and it turns out that
I mean in this case
physical development level
this is the Physical Body of the One God
realizing different statuses in different Worlds , for example

and it turns out
what if we have here
the concept is, for example, like this
as a "virtually healthy body"
that is necessary to create something
at least get it right on the controls
to a completely healthy body

if we want to transfer the body there For example
into some element of Reality
through the body's transformation system
let's assume there are elements of teleportation
with the required amount of oxygen
and with the required space in this place
even in a vacuum yes

then here it turns out
what we should do first of all
maintain human status
Here

i.e. we can't, as it were
convert the body somewhere into a vacuum
what if there is some element there
it won't work yes

we must be absolutely sure
what's in a vacuum
in general in the Infinite development of man
any element is the same as here

i.e. the movements practically mean
physically it does not happen for a person

i.e. it forms the action

forms this action
here near you

but it can be manifested for example
at any point in the vacuum if he wants
then it can of course be manifested there

but then the fixation point
Means as if an absolute Norm
this is Norma here
i.e. where it is located

it works the same way
The Physical Body of the One God
and it works the same way in general
a distant faction of God Consciousness

i.e. each subsequent element of the World
for Him it is an element
existing simultaneously in two points

those. beginning of birth
this is the point of stability of the birth system
i.e. the point of , for example, God's Consciousness

and at the same time the next point
where the element is manifested

and it turns out that the birth of two elements
it's always diversity
this is the intersection of the elements of Light
and that means again the entire external Infinite World

i.e. in this case too
if you ask the question
why is the world so infinite
and so many phenomena in the World

then from the point of view of God's Consciousness it is understandable
that the birth of two elements is already Infinity

and well For example there is in physics
the concept of "source" "drain" yes
i.e. there are certain actions that give dynamics
well, well, actually there let's assume the process is exactly paired yes

when you see processes like this
as a man and a woman, i.e. paired processes

you can see it here
that God's Consciousness is a structure
separation of elements
still on paired processes

i.e. Consciousness is always present
as a paired level of Reality

and therefore when a person perceives
let's say on a more subtle level
your next Reality system

then he sees that, for example, the creation of a word
create next action
this is the level of a kind of external pair
in relation to him to a person

i.e. he must find
what is his own action
to create your own development

and it turns out that in relation to him
his own action
this is actually basically the essence
some meaning given by God and by himself

i.e. we can find
its own development structure
if we want to understand
what affects us
from the point of view of the couple

not even in the direct sense
another person there yes
namely in relation to
for example, to the goal of the next or next action
what is a pair

then we see
in general, its own manifestation
but precisely in that Infinite environment
where you are needed most

i.e. pay attention to this
when you for example you get very tired there
or do you want to recover
and want to understand the reason
why do you for example yes we are tired

or for example another option
you don't get tired
but logically you understand that you should be tired
why don't you get tired

then you can find the structure
this so-called
paired action

i.e. actions occurring simultaneously
in a light version together with you
here in all this Reality

and this action is the nodal point
where the person is actually located
optical level so let's say concentration
of the entire outer world

i.e. at this level a person is visible
as a level practically
exceptionally high light intensity

and in terms of light level it is approaching
already to the Light of God's Consciousness

and here as soon as
he begins to find his own way
in this world yes
he sees that this path is really like that
what he has to create
any next action

i.e. as soon as a person enters the Light of God
then it practically hits
under intense light
as if into an equivalent environment

Here's an example of saying the following word
or perform the following action
it's practically the same
what to create all these phenomena
for example a word or action

and it turns out that a person begins to realize himself
as a level that generally transmits knowledge
i.e. he must pass it on to someone
already as if the action was reproduced back

Well like a level for example there is a physical body of a person

and it turns out
what is the physical body of a person
this is a conscious need of the person himself

in this design

and when we begin to see
this conscious need
This is the only way it can develop
in general, personality to Infinity

when a person is generally here
level of a second system
creates independently
in the form of his physical body

and when a person understands this
it is clear that it can influence a person
generally speaking, it is practically impossible
from the point of view of some kind of harmful effect
or external unauthorized
by the man of influence himself

because the initial level
creation of elements of the person himself
elements of human development for example
this is the level of the person himself first of all
but located in the structure of God's Consciousness

but also the physical body of a person
can be seen as a form of God Consciousness
as I said at the beginning

and it turns out that we have it all
level of connection yes God Consciousness
because for God
and physical level
this is also an element of His Consciousness

God can perceive everything equally
Moreover, He can perceive everything
as He wants
He can change sounds
He can change words
He can convey thoughts without speaking, for example yes in words

it turns out that when we mean
Well, we want to change the status of the word
then here it turns out
that we have a certain limitation
related to the fact that another person
the changed status may not be immediately understood yes

Well let's assume there is such data
what for example Well as if they were more like historical
what if for example it is written
some kind of well there is a forecast phase
in terms of let's assume predictions

it turns out that in the forecast phase
some other words are possible

for example Nostradamus wrote some words
which in general often did not even appear later
and they even had a different sound

what is the meaning of these words
there was a lot of thinking there at the time
but nevertheless there is such a status
that the forecast phase can be negotiated
or is it presented there
in words, in general, those that
do not have for example in the current time
well, some specific level of management or something

i.e. a person cannot perceive them logically
and in general he thinks that it is possible
it's just some kind of symbol, for example yes some description
some completely external object
or there is an entered symbol

so based on this
it is clear that the further you work with management
the less understandable the words may be

i.e. if you want to make management
there in the Infinite level
then Infinity gives birth to the Word
for there is the Light of God the Light of God's Consciousness

then it turns out
that you start to pronounce the word for example
in fact, you already know its meaning
and what's more, they are already beginning to understand you

i.e. you move on
to the level when everyone understands you
but you can not speak at all

if you start to pronounce the word
then often at the initial sound level
everyone already understands everything

then it turns out well as if to convey the word
to the level of logical pronunciation
this is a pure formality
but it exists in that case
when the other person does
doesn't know this technology yet

that's when god created the word
He gave his word precisely to the general

why for example yes, it is still desirable
try at least
make a word typical
i.e. similar to others
the same subject
to denote for example with one word yes

because then other people will understand
i.e. this element
it is originally laid down by God
as a system of understanding
the system of His own Consciousness

The Word as an Element of Fixation of the Consciousness of God
for Infinite development yes for example a person
This is also a mechanism of self-creation

i.e. we can create ourselves, for example
when we consider
next element of development
as a socially acceptable element

i.e. we can create
for example, the structure of one's own organism
when we clearly understand
what does it mean that there are such phenomena for example yes in reality
like a building, for example, just near which
your physical body will pass through

and a word that forms a certain situation
around you

and there is for example well, some other external attributes
exactly those where they are generally manifested
often very complex statuses of Reality
for example the physical world
God Consciousness
God himself yes
your own Consciousness

i.e. these external systems can be the opposite
they may be fundamental systems

and it turns out that we are first of all
we work as if with approximate systems
i.e. your physical body
words
and fundamental systems they are, as it were ,
in general, a carrier for our development

and it turns out that
it is precisely the deep level of management
where there are fundamental systems

then this is a level
where a person independently creates his own Reality
but as if the complex concept is slightly removed
from the practice of primary action

it turns out that the level of self-creation
this is the level that takes into account the current action
i.e. if you want to cure a person
giving a lecture, for example, in a hall
you can quite well take advantage of it
the next management tool

means to create a quick impulse of control
near yourself
i.e. to create such seemingly simple phenomena in management
there putting some words in the control

but at the same time complex phenomena
make it a platform for that
so that this room understands what you want to say
at a level including non-verbal

i.e. try to work

if we are talking about the hall
and dissemination of my technologies, for example
so that people understand on a non-verbal level

but if you are treating
then basically it's the same thing
a person enters a phase, then as if close to you
and in this phase there may be no disease at all

then it turns out
as soon as a person enters this phase
Well like in some kind of conditionally speaking such well as if
"vacuum" of course in quotes and in some kind of cap yes

then it turns out
where there are no sound forms, he becomes healthy

there is recovery due to the fact that
you bring a person into the structure
where there are no words about illness, for example

i.e. it turns out
management structure as if not verbal phase
this is also, in general, a special management structure

and so when you do management
for example from God Consciousness
try to manage
and in a word
and Consciousness
and generally speaking the whole external Reality
simultaneously

This concludes today's seminar.

thank you for your attention

try to conduct the seminar
Well as if even in terms of that
that you work on yourself independently

i.e., conducting, for example, this seminar
studying it
try to do it this way

that you work practically
with myself
i.e. as if through the Consciousness of God yes

try to understand Him
