GRIGORY GRABOVOY
The Teaching about God
Creating the Matter of the Future
19.06.2004

Hello again
the topic of my seminar today
this is my Teaching about God
Creating the Matter of the Future

In this topic we are considering that question
that when it comes to future events
then in this case for the person's personality
This includes the creation of the matter of the future

i.e. when a person can
not just for example due to impulse or technological yes
management level
build events
or for example through the past or through the current time

but in this case there is such a gap
that specific information of the future
which is generally speaking
in a specific area
and in a specific space
means in relation to a person
this information this matter
also has the usual properties yes
let's say ordinary matter so let's say
well in a formal sense
and this matter, generally speaking, can be created simply

so when we talk about this approach to management
it turns out that it is enough to just feel everything
element of the future for example
on your physical body
For example there at the level of human skin junction yes
and information
and we get that the element of the future
this is that Reality
which is simultaneously Infinite in properties
because here is the situation, generally speaking
that future that did not come true
has necessarily the Infinite property of action

here is an unrealized element
has a level of Infinite manifestations
for your Consciousness

and here we have properties
similar to the structure of the human Soul
because in the Soul of man
also every element of the action of the Soul
this is an Infinite action
for example for the Spirit of man

when we consider how in this case
God is at work
it turns out that God gives a future for himself
generally speaking within the structure of His Personality
i.e. God is aware of the future
how to say so current present
Well, in human perception it turns out that way
that man perceives God in constant motion

Well , he really does look at the outside world.
for any control system
on the Action of God precisely in movement

and it turns out that he definitely sees
well some movement

it turns out that the future
this is always a dynamic component of human Consciousness

here I immediately moved on
to the structure of human Consciousness
through external, so to speak, control

and it turns out that in order to reproduce, for example, Yes
yourself in the future
it is enough to build such a matter of the future
which will be similar
matter of action of the Soul of man

because there is a human soul
and there is still action yes
and there is, generally speaking, a matter of action

and it turns out that it's the same as some kind of road
along which the action takes place
and this is the matter of action
it is a kind of unifying substance

where the past is almost so distant
from the Consciousness of man
that the past is displaced from the level of Perception
and for example only the future is perceived yes

after all, in order to have information
to develop clear gradations of the future
you need to not just look at the calendar, for example, yes
to represent somehow
if we are talking about the presentation mechanism
namely, to really work with the information of the future
because here with blocks of information
like spheres there
some glowing control levels

so there is still a question here
namely the allocation of information of the future
from the sphere of Perception

it turns out that in order to cure, for example ,
for example instantly yes to a person
in some difficult situations
it is enough to make the fraction of the future such
so that within any faction of the past
there was , as it were, the root of the future

i.e. in fact it resembles that
that when a plant is planted it grows well
then into the soil for example, you can plant seeds
but from the point of view of the future
for the plant
soil is the past yes
after all, the seeds were actually planted in the soil of the past

same here
to get a favorable development of events
you need to be able to make blocks of the past like this
so that the glow of the future would come from them
i.e. to be able to highlight in any design
structure of the presence of the future

then we get not just a form of the future
but we also have Spiritual management of the future
i.e. we can say
that the Spirit who is omnipresent
The spirit of man
he intersects with the Spirit of God
where God creates the future

i.e. he comes into contact with the future and becomes himself
Human

i.e. there is a future of other people
but in this case, contact
with your own future yes
with its own position in some place
it is practically a creation of oneself

i.e. a person can then organize
its own structure
being in the current time
it is enough to clearly identify the factions of the past there For example yes current
you can even single him out as a real one

because the concept of "real"
here in this case the word itself
it implies both the future and the past
well, it 's just real
for Perception the real is that
what is generally perceived

and it turns out that this is the current time
it differs from time to time, however, in terms of that
that time can be some real process
well, although it is current, that is, time
but it also includes fractions of the future past, etc.
what Consciousness perceives

and it turns out that here you still need to be able to
work with words in this technology

this is where the first spectrum of that arises
that work with words
the word has a fundamental meaning

because when it comes to
about creating information about the future

in this case we also create words as well

because the matter of the future
it is still, first of all, matter
both present and past
because it is often built on previous processes

and in this regard, what is clearly divided
for example, the present and current time
from the future time

it is not always such a generally specific design
in the human consciousness
i.e. a person often, so to speak, highlights this process
it can't be hard, that's for sure
because even in general it is often a philosophical question
what is the future design
from the point of view of current time

well, it's clear the next second is the future, yes
but nevertheless, it is possible to catch this gradation in the information
during the next second
this is actually a special task
if I even move my hand there , I make a movement with my finger
and still I have to remember first
what was there a second ago
the finger was somewhere here then it moves
i.e. it is a whole construction of Thinking

so that in one control impulse
to highlight strictly and clearly yes
because we work with precise quantities, including
and in the creation of the matter of the future
we are talking about that
that we must make the exact value also specific
for human Consciousness

i.e. a person must be able to clearly
find yourself first in the construction of the future
because it is essentially the fulcrum of construction
after all, the point is that he first builds himself
i.e. it determines that level
where exactly is it located , for example, yes
i.e. we are talking about the fact that it turns out that a person
building the information of the future
he is forced to build, generally speaking
your own design first

because then he begins to see
what's going on around here
because when we talk about the matter of the future
then Thinking, generally speaking, merges with the action of the Soul

i.e. Thinking of the Soul
and Thinking is obtained by a person as a whole and as an individual
it's often the same process

Soul
here it turns out that the Soul is precisely manifested
the process of action of the Soul's Thinking

in relation to human Thinking
in general as a whole as individuals

and it turns out that
although the future is a fairly discrete process
i.e. the future is such that in many places some possible yes
there are many possible actions happening
it turns out that one action
it is not yet finally determined
it can happen, for example
but you can move it, for example, yes

and here it turns out that the interaction is arranged in the same way
The spirit of man
and the Soul of man

The spirit is multi-component and has an infinite form of development.
and Infinite status at any point
from the point of view of external Perception
and God and man
in the first degree, generally speaking, God

God perceives the Spirit of man as an Infinite substance
because the properties of God
from the point of view of the Spirit of God
in relation to action
the same as in humans

it turns out that on a spiritual basis
the person is very close
or sometimes it matches exactly
The image and movement of God
here in the development of information

and here it turns out that when in this way
we are considering the processes of interaction between Spirit and Soul
then we see that the human body
is built from the Infinite level of interaction
Spirit and Soul
but from God's point of view

i.e. we perceive ourselves because God sees us

and it turns out that it's like this
for example, to instantly heal
make instant control
It is enough just to look at the facts
through the Perception of God, i.e.

and Perception of God
this is a mandatory content of the future process
because God is Eternal
naturally there are all future processes

it turns out
that this is precisely the union with God
in His Vision so to speak
in His Worldview as a Human
this is the first level of management
from the point of view of creating the matter of the future

there is also a Spiritual plane here
and the presence of God's Action
for example, in complex human conditions, yes
or when it comes to that
what does it mean to prevent
some problematic condition of a person
here it turns out that the matter of the future
this is a structure that, for example,
well, or let's say such a development of events exists yes

and it is necessary from this future
this event is almost like a conclusion
as I said, a clear gradation of the future
where is the past exactly the past
it is in another area of information
i.e. outside the sphere of control , as it were, from the human body
i.e. the past is as if displaced outside the body

and here we come to that
that the body turns out to be located
outside of the time factor in essence
for Consciousness and God and man

and here we see that design
that it is precisely here that we see similar properties
these are precisely the bodies of man and God

when the body is located
precisely at a spatial level, so to speak
then it turns out that the concept of "disease" yes
where there are some causal reasons for development
to stop the disease and be healthy
enough then in the cause-and-effect system
simply by highlighting this axis of development of events
take and insert a fraction of the future
but already normal

i.e. the technology is very simple
Well as if some thread is taken
and is inserted into the beam of development of past events and everything
information about the disease is interrupted
the person in this faction is already healthy

and it turns out that in order to build
For example well let's say human health yes
then it turns out that it needs to be built completely
i.e. in total

because it needs to be taken into account
external management structure
in relation to a person
take into account external events
in general, there is a colossal number of logical factors

and so that logic still shows precise control
to obtain, for example, a general resurrection
we need everyone to be alive in the future
i.e. as if the structure of the past yes
the biological decay option it disappeared actually yes
from the field of information
and in a radical way it seemed to disappear forever
as if it didn't exist at all, essentially

and this is the Action of God

and when you start to see
that in radical systems there are cures
generally speaking, a comparable one is required
not exactly the same but comparable action

that the information is of a destructive type, for example
it practically disappears
from the level of information as such, generally speaking

then it turns out that we can see it here
the following Law of the actual development of the construction of the matter of the future

that the matter of the future is being built
on a completely new management basis
there is something completely different, completely new
control light that is created
only due to the personality of man and the Personality of God

and at the same time the next element of light
it is always the presence of the next person

that's what we want to consider here
do people increase in number
precisely from the point of view of this process
then it turns out that this Law is absolutely clear
to know exactly who will be born
floor future destiny etc.
it is enough to consider only this Law
interaction between man and God
from the point of view of the construction of future matter

then it turns out that it is always possible for a person to give birth
and a person can, for example, there Yes
reproduce people
give birth Infinite time in essence
because the future for God is still infinite

and when we look at this process
and the process of birth is generally speaking a standardization

because why is it important now
precisely to preserve the biological level
just the usual development of people yes

because well, there are some replacement methods
cyborg again systems there cloning etc.
but there are processes of interaction with God
they turn out to be more distant
into a logical control parameter

but the natural level is precisely Infinite development
originally created by God
it turns out that in this case it is already starting to work
only in that case
if it's really normal
how does the biological path of human development go
increase in numbers

it turns out that the biological path itself
constructions actually yes future events of people
so that people have infinite life
this is the level of development that results
should be highlighted
into the status of a future process
but in the current time in the social concept

i.e. it is clear that the future civilization is developing
when there is childbirth for example Yes
such a simple logical argument

but here besides logic there is also the Law of God
God did it this way, created it, therefore it should be this way, yes

so it turns out that in social status
allocation of the fraction of the future
this is generally speaking the birth of children
this is the development of civilization
this is the development of all species in general, in fact, there are animals and plants
generally speaking, the development of the world

based on this we see an expansion yes
structures of the external world
as structures of manifestation of the future Action of God

i.e. if you look, there is a vacuum, for example Yes
are there any external galaxies
then we can see very clearly
where God acts

this is the border between for example vacuum yes
between some element of the physical body
and the Reality perceived by you
i.e. the boundary of Perception
something that you touch as if in your Perception

because when you perceive the starry sky
the sphere of your Consciousness
it actually touches
with the sphere of external Reality
i.e. what difference does it make to you where you are

you can touch Consciousness
with any level of Reality in general
with any system

and it turns out that there is contact
this is influence
this is action
i.e. expansion

any impulse of Consciousness is an expansion
you kind of push the world further
because any contact
it is the light coming from you

and it turns out that you with your light
you are still constantly building the outer world
and by the way internal yes at the same time then already

and it turns out that any human organ at any level
it is constantly recreated by man personally, and by man

and when God considers
how a person creates himself and all external Reality
it turns out that God gives him all the technology firstly
because it was originally given
in the Soul of a person

and for many people with the development of the management structure
this system already exists in the Spiritual levels of management

when does it go further?
to the level of Consciousness
when the logic of Perception is such
that a person already builds on logic

it turns out that it has its own Eternal development
just because he does any actions
there is a future
the future from the point of view of matter there
formation of matter
always clearly defined

i.e. a person finds himself in a kind of linear communication system
well, in a sort of mechanical representation
ideas of the most yes
i.e. there is an event, a consequence, a good one
there is an event
the consequence is necessarily good

and that's when a person gets into such a linear system
then it turns out that it is exactly there
and there is the main concentration of matter of the future
precisely as such
i.e., let's say exactly that matter
which generally speaking does not need to be built
it exists because it is given by God
the matter of God so to speak
but it is precisely the matter of the future
where all events are favorable
and many people are often there in prayer
in an appeal, for example, directly to God
can feel that they are standing up
on this sustainable platform for its future development

Generally speaking, as a rule, a person first feels
the stability of the entire civilization
then somewhere he finds himself
there at the level of Spiritual insight

because here is the level of universality
it is clearly identified
the future is always universal

and therefore, based on this, by the way, it is clear
that everyone will be resurrected anyway

so when we build further
i.e. we are entering the Spiritual path of building the matter of the future
i.e. we go beyond the logic of Perception
then it turns out we see very clearly
that the coming light the coming ray the coming so let's say life yes
as you create life

life created by you
the light of life comes from you
it goes beyond logic but then it forms logic

i.e. it turns out that we can very clearly
here somehow highlight the structure of such management
when the future for example coming from you yes
let's say you create the future
and the future turns out to actually come from you

i.e. we have such a control system here
that all the information of the future
which, for example, comes to you from God, yes let's assume
this is that level of management
when the future is coming from you
and the future coming from God
i.e. any kind of events in your Reality
which are emerging around you
and which can for example well be manifested
like events for example just current time yes

i.e. any event has
the property of a positive consequence
it happens for some reason

and here is the highlight in this event
exactly the consequences well in general, of any nature
there is sound, color, and in the form of Thinking, etc.
you see the conversation between God and man very clearly then

i.e. here is the selection of the essence of two vectors, so to speak
to you
and from you
and the selection of contact here yes
in conditions of completely different manifestations of the World
you see just my personal conversation
God and man
that is, in the conditions of a huge, let's say, multidimensional World
only and possibly real
from the point of view of the development of future events
to receive means Well, let's say more precise
a more concrete conversation with God
i.e. the more events in the World
the more accurately a person speaks with God
development of the World into an Infinite system of connections
this is the precision of one person and God

i.e. in this case
it turns out that to understand some aspects yes
this is exactly where some non-linear systems of connections are created
i.e. I said that there are just linear ones where everything is clear
everything is very completely smooth and there are no problems

and these are precisely nonlinear systems
such as sudden and discrete somehow
as if the processes do not correspond to logic, yes
this is precisely a manifestation of the multidimensionality of future processes
i.e. matter is constructed like this
that all future processes
they are necessarily manifested as processes of action

and therefore from this point of view
any process works
Well how could it be considered chaotic there
some galaxy some action of people
some action of social systems there yes
generally speaking, just material objects
or there is an immaterial World
in essence, this is precisely a human possibility
even more precisely in the future
have direct contact with God
and get specific, more precise knowledge

and although knowledge is initially always accurate
in essence the Soul always knows exactly
what God gives to the Soul

the only question here is
what is revealed here is precisely the technological mechanism
i.e. the ability to take into account, for example yes in the system of connections
those connections that are defined for example
Well as if by such external sudden or chaotic processes some stars around the galaxy
and so on.
and the ability to improve your own life
under the conditions of these systems
This is still contact with God

where is God who created everything
He shows the way to a specific person

and it turns out that it is a specific person
provided that the Law of creation of matter of the future is still
this is an increase in matter
to create something

It is necessary to increase it and increase it significantly

i.e. if in the current time
there to create some matter of a linear plan, let's say
it is
well, some matter is simply taken and it is created
and the proportions are very specific
in the current tense
a piece of matter taken from the past
it creates in the current time
Well, actually, the same volume of matter
Well, how is a building built with bricks ?
taken building material
it is used in the same proportions

in the future to create at least one molecule
need to spend there For example there are tons of mass there in fact
firstly, multivariant systems
secondly, there is also chaos, as if some so-called chaos

but in essence God is all-manifest
in any phenomenon of the World
precisely in its action
and just shows the access paths

and it turns out that when a person already comes into contact with Him
he gets his personal path of Infinite development
i.e. he received contact with God
sees that the World is Infinite
then he becomes happy in essence

after all Infinite development Infinite amount of choice yes
gives real happiness to a person

and here is the matter of the future
must necessarily contain in the Spiritual plane
The infinity of human development
in any direction, well, naturally, creative

i.e. it turns out that we
well, to exclude the destructive part of development there
we often can not promote

what you shouldn't do there is bad
there, restructure something there, etc.
but it's enough to just take
and the structure can simply be removed from control

from collective management

and the more people do it
the less chance there is for destruction to occur

i.e. if all people clearly know the digital series there
so that it is not there yes nuclear explosion
for example at the current moment there

1 7 4 8 4

the specific series by the way is just a number
which brings out the possibility of an explosion
beyond the physical Reality even informative

enough to concentrate on more people
and maybe even to one who came out
into the future management system
more well as if correctly and quickly
All
there is no explosion
there, no matter what happens around
no matter what anyone tries to do, yes
buttons do not release, etc.

i.e. it turns out that the control system is, in general, the future
that's essentially what it is
what should we know well this knowledge is such
what is clear is that this series can be used
but here is a guarantee that this series, yes, which is said here
it will always work for any person
these guarantees consist of the fact that there is no explosion
well, no, it 's not

but the action should be like this
so that not by concentrating on some row constantly yes
keep control

namely, to solve the issue radically
so that there would be no sources of destruction, yes
these nuclear bombs there and so on.

then it turns out that here the question is about building the future
this is a mandatory level of radical solution to the issue in essence

we have a sustainable future

if we don't have it in civilization yes
global destruction systems

in the conditions of reproduction of these systems
it turns out that in order to build
at least one brick of the future
we must constantly do this
on all development plans
so that there are no global destruction systems
because the system data
It turns out they are simply restructuring
make the matter itself unstable

i.e. how can you build there For example yes, a house on the water
which means that it constantly rises there in waves

i.e. in principle it turns out like this here
that approximately the same design goes for control
and it is expressed in that
to build sustainable matter for the future
we must, first of all,
it turns out that again we come to the same problem
First of all, it's already possible to make the management
that there is no macro-destruction
but control still comes from the current time again

i.e. it turns out to be to build the future
we must
precisely the matter of the future
we should practically make such management
when, for example, a person is in the future
First of all, it's you yourself
must have favorable conditions for development
again we fall into the same system
and the need to build favorable events
it works out for yourself
and build around yourself
development of a kind of external control structure
because in this case
it turns out that favorable events
for a person this is generally speaking the basis
in the construction of the matter of the future

Well, let's say you can build it and take some material
and to build it simply from the point of view of physical material and to build
some kind of structure from it
and there is a certain Law there

so here we get a favorable development of personality
and it is precisely the Eternal development of man
in the physical body
this is the basis
to build a sustainable future

firstly, because it is clear from the logic
that when you build at the level of Infinite development
personality
then the light of the personality itself
i.e. it turns out that you yourself
addressed to you so brightly
that you yourself are from the future or there in the future
help in the construction of the whole outer world

and secondly, here it is also of great importance
that the light of your knowledge
when this one well like some kind of bridge yes
some corridor of glow
between you here and you in the future
this corridor is so bright
that you get very intensive control in general
from the point of view
management and such quality
a man who turned to God correctly
and received accurate information
he will be able to go into this corridor into this glow
bring you precise knowledge
that's how brightly you shine
the more accurately you receive knowledge
by the way from other people

and so in the construction of the matter of the future
you create the light that unites
and you
and people
and God bless you

i.e. you see the manifestation of personal action
absolutely clear
you see how people help you effectively
and you see what exactly God does for you
from the point of view of future development, and the Eternal

i.e. in this matter one can very clearly distinguish

here is a specific path for you
this is what you should do
there drink a glass of water for example and at some time
and then your Eternal development will be ensured

For example there for the next million years
well, i.e. to do some specific action at a specific time

and that's when you clearly define this exact path
that in a specific action yes
at a specific time
you can still have your own level yes
as if of its own development
i.e. you clearly define
that from this very nodal moment for example Yes
the whole future depends
the whole system of development of civilization

then you come to the structure
and to the essence of one's birth in essence
i.e. God created you, generally speaking, for that purpose
so that the truth initially the personality still asks God for creation
but nevertheless you initially choose
so it turns out that you do it yourself
the task of saving everyone
because otherwise the future is not built, generally speaking

logically it's clear
that a person interacts
with all elements of information
so it must somehow have a mechanism
which allows him to control these elements
somehow it's just the Soul of a person
knowing from God from the beginning

then the task of logical development
so that this is in every school
it was possible to count as from a textbook there in the form of text yes
this knowledge

here the task is to
that you have such a status so to speak yes development
when the text itself
here is the construction of the word
the construction of the word is exactly like this
which carries precisely the light of future events
this is actually such an action
when you can quite given word for example Yes

Well there, having imposed on the information of the future

for example there is a light of the future
you take a word that has not yet been defined
by quality and by properties
i.e. you know that this is a word, yes , there are initial outlines of letters

how was the word created in the first place
why exactly these contours in different languages
if you ask yourself this question
then you can see that this is a system
generally speaking, personality impositions
connected with the region and the structure of development of society

and in the structure of word creation
essentially in the structure of the creation of the word
we can see the whole history of civilization
both the past and, generally speaking, the future

and the configuration of the word is obtained
addition of a word i.e. in the advancement of a word
the development of the word precisely into Infinity
i.e. the properties of the word where the word develops into Infinity
this is, generally speaking, the level of the essence of building the future
through the level of verbal projection

i.e. it turns out that you can ultimately
create those words that build an infinite future

i.e. in this case this system is quite simple
it seems like the light of the future is projected
to a preliminary level of Perception
i.e. to the first level
as if the first level of Consciousness as if in a wave of Perception

and it turns out that Consciousness
in this case it works
as a primary sphere of Perception
Firstly, you see that you are building your Consciousness in the future on your own
and here you can build the structure you need

i.e. in principle any adapted
to any system design
wherever you are, generally speaking, yes
in any society, generally speaking, in any system

but there is another way
you can see
that you can generally be wherever you want
if for example you make control
it is possible to saturate a vacuum with oxygen
and project then and in that place
where there are conditions for life

i.e. a person is not limited
in general, it works out here
at some random level or something
or is he not limited to the fact that he is supposedly located here
and this is some random variable
there are favorable conditions on Earth
in essence, a person has the right and opportunity to live wherever he wants

and the analogy here is clear
that he can create favorable conditions
in general, at any point yes

why is it located specifically on Earth
and here, for example, is a projection of the entire external World
in this case she goes
as Human Perception
for example, looking at the external system of connections
there are some stars, galaxies, etc.

because this is where the action comes into play
this is exactly where this Law of Macro-Creation comes in
when the outer galaxies
they also contribute to the formation of the future
and the proportions are very clearly defined by the way

i.e. specifically each substance of the galaxy
in relation to a specific person
always occupies its specific place

and that's when a person realizes his clear
well well as if it is on the control axis and when
well this glass of water yes
drunk at the right time and in the right amount

and then this area of control
gives him True real knowledge
but already coming from God personally

and from the fact that he is aware of the manifestation of God
in the universal Reality

i.e. he sees clearly
that he is an independent person
that he can manage quite well
any element of Reality
but the question only turns out yes
in choosing the element of Reality
what to manage at all
well, it's clear that everything is fine there yes, galaxies rotate, etc.

and so it turns out that a person then begins to form
at this moment
when it gets on the central control axis
he begins to form independently
your own events

i.e. a person forms events in almost the same way
as God shows him
because he begins to see himself and the whole outside world
i.e. he is like a person creating the World
then he begins to create events for himself

of course it matters here then
professionalism turns out to be like any skill, yes
it means the concept of "one's own action"
why is it done

besides everything else, there are of course
current events of some kind
that need to be addressed

but I spoke specifically about key fundamental events
in a person's life
where often it is not an event as such
and this is exactly how I explained it
rod control axis

it turns out that in this case
the person is clearly located
and in the present tense
and at the same time in the future
here is a very important transition
The spiritual system in this case
comes out

It is practically outside of time
as if in a timeless system of control is obtained
and here is a very important transition in logic
you still need to see it at the level of Perception
when verbal control slows down
immediately generates a mass of information energy

for example, I can say it more slowly, for example Yes
outside of time for example
i.e. I kind of lengthen the phrase
I'm starting to build it somehow differently
and a mass of information begins to bud

i.e. the simultaneous presence of a person
and in the current time
and in the future
creates matter for construction
again, still a future process

but God is also built that way
He is simultaneously in the future and in the present.

i.e. it turns out that the construction of a control system
for example, for some kind of massive urgent action
instant action
this is the simultaneity of the presence of personality
as on the control rod axis
also consequences
presence on this axis
it is a simultaneous presence in the future

logically and so clearly to clearly manage the future
it's completely clear to anyone
who logically analyzes this situation
which is clear, no problem of course
he controls the future because he is there
how else to control

in physical terms it's just a person who came
for a specific object, for example , a construction site, he gave instructions
but when it comes to the future
then he should also walk like that

Here you can calculate very clearly

how much energy and resources are needed in general
to build a specific situation in the future
by analogy with the current time or with the past

i.e., for example, to take off and fly there on a plane
give directions to a certain place yes
this is one type of work
you can just call this place and give instructions
you can compare the type and types of work , let's say , by the resources expended

so, to save everyone with one action
and to do and clearly ensure Infinite development
you need to create your own light
which generally speaking contains all the resources of action

i.e. this is exactly the real future
this is precisely the real matter of the future
but created by you

the light that contains all combinations of events

and it turns out that in this case
you don't need to count on graph paper there
how long did the plane fly there
or how much did you spend on a call of some level
to give instructions and not to fly on a plane
how not to negotiate in person

it is enough to illuminate this light

after all, an airplane is often also a system
requiring additional control diagnostics yes
will the phone work or not
and your personal management is your personal life
your personal light is always with you

and it is enough to highlight it to everyone
i.e. to convey , let us say, the joy of Eternal life to everyone
and you get the same action but without calling the phone

i.e. this action takes place there
this is the management of future events
but on a personal level

i.e. transfer to personal management
this is the level of analysis

i.e. logic is there, well like an average system
as an intermediate in mechanical understanding
between future events
between the matter of the future
and you personally yes
i.e. it turns out that you create the logic yourself
in yourself

i.e. it can be improved
it turns out logical thinking
just just on the whole topic
that you take information from the future
in a mechanical sense, here is a block of future events
and you take it closer to yourself, well as if you are pressing yes

and it turns out that logic is forced to concentrate

then it turns out that you have a control mechanism
with your Consciousness and state
simply due to light-optical quantities

i.e. you don't have to study any subject there for a long time
take the information right here in front of you
Well, they just brought it closer mechanically

I always gave such techniques to pilots
There they studied English for three days
which can be found there for example, study for months

and that means you have a complete control mechanism
take control, for example , on yourself
and that's all

i.e. it turns out that elementary knowledge is yes
access to information about future events
and often the pilots had this question
what was urgently needed there
because it was about airplanes
they were forced to also apply the personal factor
and they often sped up
to some very compressed limits
literally there for example there were cases
when there and in a day and a half they studied a whole flight course
these are very complex quantities
and it turns out

and people who didn't know English at all often

and here it turns out that the element is precisely the control
this compression of information
i.e. actually the settings of the logical phase of control
to the level there yes, task acceptance
and here the level is such
after all, pilots are a responsible level of work
he must understand the language correctly
because he is responsible for people
and their criterion of responsibility is extremely high

and it turns out he is still forced to secure it for himself
real event
i.e. not just mechanically study it
for a while yes for example, passing an exam
but in general it is really possible to know the language

it turns out that here is the docking mechanism
Well , I gave a specific example from practice
where I trained pilots specifically
according to a similar technology, let's say, of compression elements
but in essence it is
no problem, you can use any system

For what
for example, you need to cure a person quickly, yes
information is taken where the event is missing, after all, yes
you have the right to choose the event already
negative event absent

take it and start squeezing it so that you feel it
that your body becomes
Well as if even you should feel it on a personal level
the effect is exactly that you are more rested
i.e. on the contrary, you get healthier from this, this is a criterion, yes
you should see it clearly
there is light coming from you
he's more well or something that makes those around you healthier

i.e. once you get healthy
this means that everyone is undergoing an element of healing
if you diagnose equipment there
that means there is less technology everywhere in general yes
there he gets into some problematic situations, etc.

and you get so close
so that the technology is already visible to the eye

this is what controlling clairvoyance is
this is actually a compression of space
to the level of one beam in essence

and for example any beam goes there, no matter where
Well, usually near the body, yes
and that's all
the information is simply unpacked
it's immediately clear what this event is all about

but the governing Spiritual vision
these are not guesses or conjectures
this is exact knowledge

in the same airplane theme
there for example, I even have such tasks
there are like one hundred and forty bundles
we need to find one specific one
i.e. call everyone
it's a few days of work there , yes For example

I show it specifically and it really is there

i.e. it turns out that the selection task
here from the well Infinite level of events

events for example
Well, let's say find the harness that is the problematic one
and at one time, by the way, such works were produced
Well, there were situations when they had complex connections there.
in complex technology
I had to find something urgently
because otherwise a different type of problem arises there
i.e. requires even more complex control
to compensate for the task

i.e. it turns out that
well, that is, here a person is often forced to do things quickly and accurately
because well well for example, so that there is no explosion at the nuclear power plant , etc. , etc.
i.e. a person is often forced to solve any problems
which are formed in front of him , well , due to various reasons

it turns out that it is precisely the formation of different reasons, yes

Well , that's generally speaking in general, a special question
why are such reasons formed around a person

Well, it's one thing that he chose himself there
for example, took a task
I installed it myself
myself for example yes it solves it

and that means Well, the majority are people in general
That's basically what they do

another question
that's why the task was initially set yes
By God
human
i.e. a question to God and to man, to his personality

then the question arises again
the formation of future matter, yes
matter of the future
in order to understand these issues in general and solve them

here we come to the same thing again
that will still have to be formed
all the same matter of the same future
but already from the point of view of the solution
we didn't just build some house there in the future
and it functions there
because we built it right yes

because there are still fundamental questions
in general, in principle, why are we doing this there
Why do we need to build a house here anyway?
i.e. maybe we want to relax there yes now
why build now, etc.

i.e. it turns out that this is the formation
Well, a house is of course a value given as an example
in fact, we are talking about events of any level

then a very simple control element arises
where it is stated quite clearly
what is it really
this is the interaction of God and man

to ensure precisely the Eternal Yes
the most favorable from the point of view of this development
it means exactly the level of, let's say, human realization, yes
Well, it turns out God too
because God is interested
He does this so that everything will be favorable.

and from the point of view of the solution
all questions
for all people
we come back to each individual person
in this control structure

hence
the basic law of the construction of the matter of the future
this is taking into account all the characteristics
first of all, to each individual
and from here onwards, building your own system

if somewhere in the personality something needs to be added
then often this is the task that is being formed
due to external events

so in this control system
you must highlight the personal characteristic
through the transfer of knowledge again, it is obtained for everyone
and from here build precisely universal governance
where you will definitely find
your exact Spiritual personal
Well as if it were a general path
of his knowledge
of its development
and your Eternal Life

This concludes today's seminar.

Thank you very much for your attention
