

GRIGORY GRABOVOY
The Teaching about God
Creation of external Reality by the action of the Soul
04.08.2004

Hello again
the topic of today's seminar is my Teaching about God
Creation of external Reality by the action of the Soul

in this technology I consider the process
when God when He creates external Reality
He is looking at that process.
what He creates as Reality
which He perceives, for example, outside of Himself
and Reality as if an intermediate environment

i.e. there is , for example, the Physical Body of the One God
there is some external information
in the form of suppose there is a white glow
and there is already a kind of intermediate process
which says that there is an environment
which implies control
behind all these situations

here for God
from the point of view of a human organ, for example
here's a comparison
external control is the human brain
this is how a person perceives this situation
and the Infinitely Remote Section of his own Consciousness
and from his own Consciousness

i.e. there are three positions that regulate
this very sphere of control
i.e. external control
This is a multi-level reaction principle
for the same situation

i.e. if we consider the situation, let's assume
from different sides
then it turns out that we can consider it
let's assume this way
that some position should be considered
as a linear position yes
or from some point of view

but if we look at it from different sides
the same situation
it turns out that these positions are based on that
that there is some basis that allows us to consider
one and the same
as if from different sides

this is what is called some kind of basis
for God this is also His personal Action
i.e. God is in that situation all the time
what He creates
and intermediate systems
and the systems identified and manifested there

therefore external Reality is an organization
both at the same time
bodies
as well as external Reality

i.e. when a person perceives the external world
he perceives it as a moment of organization
the very concept of "Perception"
this is the organization of some process
let's say if you slowly look at the horizon
then first one section is perceived, then the next, and so on.
i.e. it is still an organization

and this analogy is based on the analogy of that
which exists with God
God also unfolds Reality, as it were.
but in the visual
or there in the human mental level
there is the same principle of the reversal of Reality

i.e., like a similar logical level
it is very simple
since God can unfold Reality
then a person perceives it in the same way
a process that is unfolding in some way
he can also create and build Reality as if

and for this you just need to determine
what is the external side of the event
i.e. where there is an external environment

and this is how a person determines
some internal border
what is external information
he can work the same way as God does

i.e. he can build a structure
based on a position of sorts of division
external environment and control environment

and that's when the management environment
for example, this is a certain internal environment
there in the physical body of a person
it turns out that we see that the management environment
this is what creates the physical body of a person

and therefore it turns out that logically
human body
it is impossible to somehow restructure or destroy it
if this environment is moved
for example, on the target pulse environment

well if you have a need to resist something
there are some harmful effects, etc.
then it turns out that it is enough
this is the monolithic level of creation of the human body

i.e. while the body is being created
it is a single monolith with the entire outside world
because up to the level of creating the body
there is only the external world, yes it turns out

and when this one
Well in general, a very large array of information
creates a body
then it turns out that it is enough
just move this array with Consciousness
into some zone or area of harmful action
and this action seems to disappear from Reality

i.e. you unfold the picture
which is favorable for you
well, in case of some external chemical systems
or if you are engaged in
even the process of resurrection
when the resurrection already takes place yes
only now the resurrection is over

this situation always arises
how to build the next Reality
for the man who was resurrected

i.e. your task
construct tasks for him as if external
well, those that are external to you
physical space

as well as external ones for him

i.e. it arises precisely in the case of the problem with resurrection
simultaneity of construction
as if two linear multidimensional spaces
for two persons

and therefore the process of resurrection
it definitely happens
in the future means the development of human civilization
because it is a process that is inherent
precisely to the process of God's Action

because God created one version of Reality
always creates for everyone Infinite time

i.e. it turns out that a person somehow gets into
into the development system
where does he live anyway

and from this it is clear therefore
that there will be a general resurrection
because there are these principles of mutual development
two external systems in particular

i.e. man is an external system in relation to God
but for him the world unfolds in the same way

it turns out that we
having for example in case of treatment of diseases
some complicated or heavy ones
we have in this case a very multi-reserve system
as soon as we begin to isolate external information
as a development system
continuous development of the human soul, for example
through his physical body

i.e. the Soul that builds the body builds so quickly

that is like a level of Consciousness in a discrete version or something
doesn't have time to notice
that the body is constantly being built anew
With soul
Well, the work is similar to the work of God

and then it turns out that when we start
such a status of the Soul to know
then for the Soul, in principle, it makes no difference
there may be such a process
that you can make an oxygen sphere in a vacuum

and calmly project and breathe, generally speaking, in a vacuum
but it's already natural to breathe

not just for example to function
due to some third laws
and also develop normally
just like in the conditions of the Earth, yes

Well, this is an example of management, so to speak.
i.e. there is no talk about the fact that, for example, it is necessary to practice
somewhere out there materialize in a vacuum
but if it is necessary then it is actually possible
but at the same time it is necessary to create a sphere of management
and then this sphere of management
it's all the same physical Reality

i.e. a person is placed in such conditions
through the natural senses
due to the natural organs of life there yes
at least take a breath
he is placed in the conditions that he is around himself
normalizes Reality as if for him

and this action is also the Action of God

i.e. God organized Himself in this way
that He develops Reality so
that Reality normalizes precisely itself
practically under God

because God can be anywhere
and in the human body it turns out that they arise
the area of God's residence

and that's when it comes to

about the treatment of, for example, a complex disease
or about some extreme health situations
then by highlighting the areas of God's realization, so
that Reality seems to adapt to God
can be cured very effectively
almost instantly, well, like right away
not even just there quickly
and is it possible to heal instantly like this
that the primary cause will not be visible
like these are diseases

i.e. the person becomes healthy
in the entire information system
and in the past there and in the future

This is a powerful prevention system
possible serious diseases there

i.e. if a person intuitively begins to understand
that he even has some small problems there
then it turns out that it is enough to reach the level
where the disease, for example, does not exist
from a logical point of view
to understand this level
we need to see where God is
when Reality develops under Him

logically simple
ask a question and identify this glow
at this point
move the Consciousness faction here
it turns out that you are profiling the disease
then already

this helps very often
Well there in general medical practice for example

further if you want to consider
the process of further development for example
well let's say in any information yes
then the information still needs to be considered
both external and internal

i.e. take any segment and consider it like this
that this segment can be studied
if there is any area to study
some kind of internal area there

and define some segment as an external area

and when do you start to analyze like that
you clearly come to that
what is the organization of your body
this is like the level of the Macroarray and the whole Reality
and your actions
this is a simultaneous process

i.e. you start to see
where God works with you

i.e. you begin to have very clear control
your behavior
in this case a person absolutely can
never make mistakes at all

neither in behavior there
nor in Perception
can always adjust his own Perception

i.e. for this it is enough just as I said
be able to connect the processes of God
and personal processes
by analogy
and according to the principle of movement towards the goal

i.e. if you need
for example, to restructure some harmful substance
at any distance
then you can just replace the space
no substance

or you can simply restructure the substance itself
make it harmless

and for example you can do it like this
so that the disease is inactive and disappears completely
entering , as it were, the area of prevention

and therefore the ability to build precisely management
from the point of view of external space and some
it is still the ability to clearly organize
your own position
i.e. your own place
where do you clearly define at all

how is your body well, in fact, it grows on information

for God it means to create a body
it is a process identical to creation
any information object in general

and God almost all the time
creates in real time
so you can on this process
look at it from this point of view

for this you can simply consider
where is the initial level of your information
i.e. consider
how is information distributed in general
around you

there further when you start
first signs of information understand

you see that the glow of many aspects of information
hits
into a certain system, so to speak, of the Universe first
i.e. not even to you first
and into the Universe

and then you begin to understand
what is the system of the Universe
this is generally a local case of your personality development

i.e. any Universe
any level of external Reality
this is a local level of personality

but that's understandable
Perception is a complex system.
and if we are within the framework of Perception
we see two objects
for example, a leaf of a plant and the whole world
then it turns out to be the whole Universe
this is already a smaller system than two objects

therefore, the selection of two elements
This is a fairly important management principle.
where is the external system
if it is built by the Soul, all the more so

then this is a system that is actually already yours
to a certain extent built
and it was built by you personally

you can highlight very clearly
your control actions
on the construction of this external system
i.e. the ability to identify an external system in information
it is always the ability to manage the system

and that's why when we
for example, we somehow objectify
some kind of control impulse
we always set a task
but the task is still an external system

and when do we begin to understand at all
where does the task come from
here even is the treatment
well, just any other person
helping another person
help for example even to yourself

or is it just management?
some external situation

after all, all these processes come from somewhere
they actually grow out of your body
just as they are realized from God
all other systems
so there are growth points
where your body begins to realize
virtually all external systems
i.e. he kind of grows them

and therefore
for example, there is such a collective Law in management
that as soon as there is a large enough number of people
even if only at the regional level
understands that it is necessary to develop towards Eternal development
as God showed yes
With its own Eternal level
then they start regionally
it's much easier to solve problems
there in treatment are questions of management or resurrection , etc.

i.e. the collective Consciousness is built in this way
that some process is installed
even regionally established
I'm not even talking about a specific person
already has the property of spreading

and in connection with this we get such a process
what when we do for example management
going from us there and into some external space, for example
then it turns out
Firstly, we ourselves form the space

but when we start to think
and how do we actually form space?
then it turns out that we see
absolute control over this space
to yourself
it is enough to just initialize

Well like a certain level of intelligence or something there is a highly intellectual plan there

i.e. to reach the level of intellectual Thinking
where intelligence is at the same time
and sound
it is both an action
and thought

this is the concentration of intelligence, let's say
if we vary these concepts
then we get what we can
spontaneously vary the level there
as if intellectual intervention

i.e. there is a level of direct control
this is also a certain level of intelligence, so to speak, yes

but there is a level of solving some problems
Well for example, just ordinary mathematical ones, some other ones
and it's like some kind of artificial action
well, there is some semblance of action there
where some kind of control is required
by quantity or something means neighboring events

i.e. as if external events are internal
i.e. the action where it has to be applied
an algorithm for some calculations there, etc.

i.e. that's what I mean here
what do i mean by intelligence
the level is somewhat more external, so to speak
created by you

i.e. there is intelligence created by you, your own
and there is , as it were, intelligence where there is an intersection
Actions of God
and yours

in general, where God shows you and you see
what is your action

i.e. action from the point of view
as if your level of Perception of God yes

this is how it turns out there is a personal Perception of God
and at the same time it is your action

then here it turns out
there is the so-called intelligence of the body's action
i.e. this is when the body begins to form
levels of management
it turns out that there is a certain intellectual function
i.e. the thinking body, so to speak, the giving body
next life
next development

and from this point of view, by the way, here is the birth of a child
this is also an action of the human body

well and in logical terms
and in the information

and it turns out that when we trace
docking of external intelligence as it were
you created your own yes
and there is no intelligence in the body
intelligence as if of the external environment
then we get the following control

you can at the logical level
at the level of Consciousness
build a very dynamic structure
which will manage quite effectively
in fact, as if by your tasks
manage without much effort on your part
in dynamics

but here we have such a moment
that this management is sufficiently manifested
i.e. if you manage a large number of systems
then the systems are simpler, as it turns out, well, let's say, to detect yes
due to external information
and it turns out that there are more external events then

because the principle is the implementation of events
this is speed for example
are there any other systems

and when do you work
as if multidimensional or multiple systems
then it turns out that such an event is easier to detect

on the one hand, it's still an advantage
there may be some help from the external environment
and on the other hand, the resistance also increases

Well, it's clear the more massive the structure is
the more resistance

so that the massiveness of this structure
was again not an obstacle yes
to make the event happen
It's just necessary that this whole mass of events
as if multidimensional control
just passed into the body

i.e. to make it simple, as if at the level of the Spirit
control system or something output

what you take and through Spiritual Management
transfer the system to the physical body
and external control system
becomes your physical body
at the moment for example there is your development

so you can by analogy with that
How God builds a complex system
build your own body

while understanding that God is building
every second your body
well, actually, in fact, it's like anew

i.e. for H it is really the same
any process is absolutely equivalent
that the continuous processes of life
that there are some discrete ones there
there is a drop of rain and there is a hundred-year-old oak tree For example

for him the process of organizing one drop
and the discrete process of tree organization
in every time
it's the same process
for He holds all the phenomena of Reality, yes
under His control

it happens when you start
enter this system
that is absolutely clear and absolutely understandable
what is essentially for the human body
after all, there are essentially no harmful substances
some kind of harmful effects
some harmful conditions even

because it is enough to understand
the essence of the primary organization of man
at this moment
having highlighted
namely the external management structure
and then the person will be healthy all the time

but if you don't have time there or somewhere
or is this process somewhere
Well for example, it is not fully implemented somehow
that a disease occurs there
or some events that need to be improved even more, for example

so from God's point of view
for God, after all, according to the logic of things
all events should at least be good
for the Perception of God

He is the creator of the world
should somehow be able to determine any event
precisely as an event, well, at least striving for the Norm
or at least always improving
towards Norma

so that's how it turns out
human aspiration and God's position
in this case it's the same thing

i.e. for God
Soul of God
this is the development of the Spirit of man into the realm of events

i.e. it is enough just to
that God will look at the event with his Soul ^{yes}
and the event gets better
for a person this is the development of the Spirit, a dynamic system

i.e. the most dynamic status
which exists in the World
this is a man for God

i.e. God perceives man
as a very fast dynamic system
unlike what He
other systems are perceived as static
even an animal perceives it as a slow element
there it is more discrete ^{yes}
from the point of view of human perception

and when the animal already crosses over
for example, on the level of assistance to a person
there let's assume treatment of people ^{there}
or participation in the processes of resurrection of people ^{yes}

it would seem that he is still a human being
more highly organized level
for an animal
but the animal can also participate
in helping ^{there} to meet with the resurrected
well, as a search level, ^{yes}
the dog can determine
where is the resurrected one

and understand that this is truly resurrected

i.e. when differentiation of such a level
then it turns out that dogs can heal
or there
not necessarily dogs
any animals

and here we get a combination of all levels of Reality
in the system of external control
when the Soul begins to build
the external structure of the World

i.e. any construction of the external environment
First of all, it determines the level of the Soul

because where is the soul of man originally located
this is a fairly specific question
but not always precisely defined
especially ^{there} in childhood
Children often have such questions

so that's where we come to
what ^{does it mean} we start to visualize on optics
to highlight the optical system of the Soul
as soon as we set the task
namely external information

then we see where God organized it
our Soul
i.e. ^{well} i.e. your Soul personally

i.e. you see your own Soul in its pure form
and since from the point of view of Eternal development
the body is a part of the Soul
then you see the information level first
i.e. you see the place where your Soul is located
where the Soul merges with the body
where is the soul
precisely with the physical ^{yes}
where the Soul organizes the body
and gradually come to the level
where the Soul is no different from the body

and that's when you come to the level
where the Soul is no different from the body
then it turns out you come
precisely to the usual level of people's Consciousness

where all processes are exactly like this
because the Soul and body are a single system

this is how the world works
because Soul and body

it is precisely a single, inseparable system
and that's why the world is arranged this way

so the passing car
has this specific number
to the ^{right} place
and you are in this place

i.e. it can be calculated very clearly
from the point of view of the continuity of processes
body and soul
why does everything happen like this in the world
and calculate it at the level
generally speaking, as let's say intellectual logic

i.e. not just a viewing level ^{yes}
and the level of logic

that's exactly what I'm getting at
how is normal human logic formed
which provides
and there are elements of clairvoyance ^{there}
and elements of Spiritual vision

because you can just see
as with physical vision ^{yes}
understand and know everything
and it seems ^{like it's just a linear process}

and on the other hand, to achieve
simple such a linear system
need a very complex area of the outer world
translate
into one's own physical body
i.e., in fact, to self-organize from that
what is the outside world

and when we look at the management process
as god did it
then it turns out that for God it was enough to organize
at least one external element
then he is everything he already is

and when we ask the question further
and how did he technically organize this element then?

i.e. to determine his own ^{well what is} the presence
anywhere
He had to somehow
organize an external system
This means He created His Soul first

i.e. the Soul organizing the external system
First of all, the external aspect is perceived
as a level of self-visualization

i.e. the Soul looks through another phenomenon
on yourself

and the world is created
he is absolutely inseparable in nothing ^{yes}
i.e. there is no beginning
there is no end
because this is actually the vision of the Soul of God
directed at itself

i.e. the following principle is revealed here
what are the tasks of the World
these are the tasks of the Soul of God

and when you start to see it by analogy
then you see that your Soul
also organizes the outer world
your Soul also participates in all external events

and therefore there are areas
where is your Soul absolutely , exactly, ^{or what let's say so}
inseparably practically indistinguishable
connects with the Soul of God

i.e. if you look very closely
the border is visible somewhere
and if from afar
then it's ^{like} one optical level

There are of course some hard structural things as differences
but these are things, they are events
where are you participating
and God is involved

i.e. the event you created
determines the status of your Soul

Well, logically, in the material world it is so, yes
in socially manifested systems
that they determine events
the leveling of the Soul in the social aspect

i.e. the social level is also connected
with the state of the Soul
with the action of the Soul

but when you start to understand
how are other people's souls created
at least ^{there} you know the principles of their creation
from the point of view of their tasks, goals, objectives of Eternal development
then you can help very effectively
to all people at once
enough ^{for example} there are only a few people ^{there}
be able to perceive
as a level that they have external tasks
as external information
and then you already know how to do further Macro management

i.e. if you want to do Macrocontrol
in this technology
It is very easy to identify the following Law mechanism
and even a specific technology right away

which is exactly what is happening here
technology and law are the same thing
what does identification ^{mean} management ^{yes}
at least in relation to several people
allows you to perform Macrosalvation
i.e. the next one ^{is like a capture} ^{yes}
next level of information

Well, this is exactly the kind of saving action
defined by that
that you only need to identify a few external tasks
Well, let's say several people

but when we go further it turns out
Save everyone
these are tasks not only ^{for a few people}
and generally speaking everyone
everyone must be saved

and let them be external
you can take and set the task yourself

if a person doesn't know what can happen

there are some nuclear weapons there

For example is there a person there or was he just born

or it is located in a remote region

where there is no press at all yes

some remote tribes for example even

then you set the task for him yourself

here's how to set a task for a person

and man is completely free

here you need to log in again

to the level of management as God does

i.e. you actually solve your problem

and here it turns out

that God always solves His own problems

when He sets tasks before you

and here is when you start to understand

how He puts it and how you decide

then you get concentrated control

and at such a level that you are already solving God's problems

i.e. you are exiting

on the exact line of Perception and control

and now the entire external environment becomes narrower

at your own level

and then when the external environment becomes your level

you understand that you are right here

precisely in the harmonious level of management

as if in a harmonious area

or there in the sphere of management

where there is harmony, but it is already your natural one

coming from your concentrated management

directed at any Reality

and it turns out that when you already understand

that it is really directed at any Reality

and not just there in the nearest region and near you

then you see that God does the same thing

it also does it easily for example yes

and you start to see that technologically

all external Reality is knowable

i.e. you see that there are answers to those questions

which you ask
and the answers are in specific places
clearly and tied
to your dynamic body so let's say yes
in all Reality

i.e. to your body which God is constantly building
and which now, for example, in certain aspects
can you build i.e. how to reproduce the body

when you are mentally thinking about something
You often look at yourself
or some position there
from your body's point of view

for example, you came to a store or you are going somewhere
You somehow determine your place
in this event
in the system of Thinking
and even if you think about something in the store yes
or about some action
then you are somewhere anyway

pay attention here
what when you talk about a store
it is always a place approximately in the center of the sphere of your Thinking
if you are talking about remote actions
there somewhere you went there for example, just on the road to rest
then you are always there
on the lower base of the sphere of Thinking
it is your physical body

i.e. the physical body in Perception
has strict Laws of Movement
depending on what you think

if you study the systems of movement
we can see how thought weaves organs

and when do you begin to understand this construction
then it is enough to simply be able to observe
behind the thought as if from outside
and you can simply restore organs on your entire body

i.e. for example if well there is a healthy organ or some cell there
absolutely everything is great with you

then you can simply increase the amount of control
like this type that you are at the expense of good health
just increase the control speed

that's why it turns out
that when a person is, well, practically healthy, so to speak
he controls the entire structure of the World quite stably

i.e. why, for example, don't nuclear wars happen there?
although many processes are complex
there are technical problems
because there are people who just
Well, they are practically healthy.
they have a good personal development status
and no accident can happen there

i.e. chance is excluded
because there is external control
from people

if we consider a period, well, some external one
there are some planets there, there is an assumption
Well, at the beginning there were some processes there.
for example, the formation of planets
where it is considered as if
that people may have appeared later on planet Earth

then look at the system as a whole
and you will see that from the human body
from the body of even one person
and the whole structure of the planets was built
including for example the Earth yes

and when you look further
you will see
that after all it is a kind of information center of a person
this is Earth after all

i.e. you will see that the person
which is located, for example there on the surface of the Earth
there is Eternal Time, he lives there Eternally
he defines it very clearly
location of all planets

i.e. the task is very simple

see how the Eternal Man lives
on the surface of the Earth
and look at it from the point of view of that
how the Soul could or builds there
or how it could be built
the design of its development
and we are talking about a person as such
not even about anyone in particular

but this is sort of an average level of management
it shows that this person

he walks along specific routes on planet Earth
he builds the external world in a very concrete way
according to certain very clear Laws

and it turns out that the entire outside world
why is it so rigidly built according to logic and correctly
because there are Laws that are called
The laws of distribution, so to speak, of information
around the human body
and around the Body of God

and these Laws are built precisely on that
that there are certain Laws principles
organization of the external environment
and the organization of this environment
for example Soul

Of course we can consider it
the process of organizing the external environment by the Spirit
but then this process will look exactly like this
from the point of view of the Spiritual aspect of management
and it turns out that multidimensional systems arise there
but they are already different

because one action is the action of the Soul
and one system

the actions of the Spirit are also systematic
but then the geometric connections are different
in optics

and it turns out that when we want to understand
where is the Spirit located on optics
for example, a person wants to develop management

look

where does the faction of Consciousness work, for example ?

what is called Consciousness ^{yes} in optics

where then does the Spirit work

where does the human soul work, for example?

he must then very clearly define

how the Spirit builds

how the Soul builds

and then ^{as if} by handwriting ^{and} construction

participation is very clearly visible

Souls

Spirit

Well ^{as if} any of the objects of information ^{yes}

and therefore, based on this

possible by final action

i.e. by external action

from the level of the Soul to clearly see

the entire structure of the Spirit

and it's ^{actually} quite simple

but then you can solve the inverse problem

through the Spirit to determine then already

action of the Soul of the personal Soul

and here the path is very simple

you first enter the realm of the Spirit's optics

and from there you already know the route

you practically take and return again to the Soul

Thus

and God He creates matter

i.e. what comes from Him also comes to Him

and it turns out that we can see

how matter is constructed in principle

there is ^{cellular} matter

social matter ^{yes}

matter of Thinking

and from here it is very easy to make an analysis

^{as if} some kind of multi-faceted analysis

or the analysis ^{is as if} multi-symmetrical

so that the elements of analysis are immediately

emerged as systems of symmetry

to different systems of the World

i.e. the analysis is more effective
if at the level of correct understanding of the situation
you instantly transmit information
as if through symmetrical channels
i.e. by analogy

and that is why God created man
by analogy and in His own image and likeness
in the image of His development
according to the image of His Action
because these are precisely symmetrical systems
allow you to instantly get information at any point

i.e. there is a certain Law that binds people
where is the person who has experience knowledge
instantly transmits knowledge to everyone

with this technology it is enough for just about everything
to give knowledge precisely on Macrosalvation
For example there are several people there and that's it
which you perceive as if immediately
right now
in the first control impulse
there may be completely different people
you can only find them later on information

and then you decide
who were these people
and once you learn to give knowledge in this way
as if in the very first impulse yes
without distributing there without differentiating
so which of these people is there for example it could be
even well, it is necessary it's faster to do it there
precisely in the first impulse
it is necessary to maintain the equality of control

and once you do this
then it turns out you do it for everyone at once
because your Soul always chooses that
what's in the first impulse
you definitely do it by the way as a rule
you are doing it right
i.e. there is no analytical level, yes
there is simply a wave of Salvation coming from your body

and on the other hand you can see very clearly here
as if in the first plan of management
that the Soul chooses first those
who needs help first

i.e. the mechanism of Salvation is very clearly laid down
into the Soul of every person
Saving another

but when you start to analyze again
look at your own Soul from the outside
then it turns out that in essence
this is the mechanism
self-regeneration
self-healing including

because you can be on the information
one of those people
well, to which you sent the impulse

and then it will turn out that you will be able to trace
Well as if their own tasks
through external observation
Well, of course you can know your tasks
you can put them there or solve it somehow
but you can also just diagnose them

for example, just take it and look at it
What are your tasks for the next day, let's say ?

so it's logically clear what
but for example here you can see that
exactly that point
where the Soul has a level
namely, complete freedom of human action

i.e. you come to the point
where is your Soul
that it gives you such information
what how do you define tasks for the future
that's how they will be added up

and here you come to that
that complete freedom of man
when addressing, then, well, to your Soul

this is an action originally laid down by God

i.e. any analysis is directed
on the structure of one's own Soul
this is always the level of the primary survey

i.e. in fact, you don't ask yourself the question

i.e. you are at rest

i.e. external scanning of information

for example Souls of their own tasks

it is always your personal action

at every moment of time

that's how God set it

that by external action well as if or what?

Of course you can define the task

can you do a diagnostic

look ahead of yourself

all this is clear, it can be done

but when you set tasks in principle, as if

and turn deeply to yourself

then you come back to the initial impulse

then you see clearly

the point of construction of your body

in this impulse

i.e. you start to see very clearly

how do you build your body using the work of Consciousness

and you begin to see how the body is being built

through problem solving

by posing a question

through problem solving

i.e. Eternal development is all the time

solution of specific problems

and then you start to understand

for the Eternal development of the system precisely

what should be the construction tasks

external information

there internal

information reproduction, let's say, of the information itself, etc.

i.e. find those levels that allow you
define very clearly
what should you do for example next time yes
without straining my will, as it were
i.e. what should you do?
and what are your affairs there for example, with this action
will be resolved naturally

i.e. there is precisely a level here
when external control
becomes a natural level
your own behavior

and then it turns out that you very clearly come to that
that your free will of actions
it is never violated by anyone at all

and when you start to learn this process
then you see that this is the action
it's just overconcentration
of your own Consciousness

and in principle it works out here
that this very superconcentration
she is practically like that
that you will be able to see yourself

For example there in the distant future
or there in the Infinite Future

i.e. the more concentratedly you look at yourself
then the clearer your own system of Perception
myself

i.e. you start to reach levels
where is all the external information that you perceive
this is data concerning you
this is information about you

and then it turns out
that indeed all external Reality
is formed around you

i.e. superconcentration is you with your information
and the external Reality is what develops
or from you

or is trying to help you
as if it is developing in your direction yes

and this system, well , it's a bit similar again
on the line of crystalline development
or there on some line , well, closer, for example there
to the development of cotton fabric
here some fabric begins to emerge
around your information

or you can often see it
as a semblance of the development of a certain material environment
where there are a lot of communication systems

and when you see this position
in relation to oneself
then you begin to understand
that the other person
he is quite capable of perceiving, generally speaking, any knowledge
because there is no fundamental difference

and on the one hand if you know
what is Macrosalvation
naturally the other person is always
this technology can be learned

i.e. in this system
when you start to analyze external Reality
precisely from the point of view of creation by the Soul

you see that any external Reality
this is a knowable level
this is the level that actually comes from you

and if you need
you can set the property quite well
that the person who is there let's say in the outside world
will always master the technology there for example Eternal development

i.e. here are very simple Laws of Transitions
as if of the same level of knowledge
for example, to knowledge of a different plan

and it turns out
that when you start to analyze this system
as for example yes system of action

here the criteria for action are very clearly defined

i.e. the criterion is very simple

to do the job right

this is how God shows to do it

we just need to transfer knowledge more intensively

for example situational

in this case we are talking about the knowledge of Macrosalvation

where the element is something that cannot be allowed

for example, there would at least be a global nuclear catastrophe

well, this type, chemical, bacteriological, etc.

i.e. knowledge that arises

they arise

as knowledge is generally quite linear

i.e. it is absolutely clear

what needs to be done

also in this case when treating the disease

for example the entire external system

it is perceived as information

and the properties of information must be studied to such an extent

as if fundamentally and radically

for the external system to work on its own

and restored health

for example, the person you are dealing with

or let it be you yourself

on information

i.e. it means self-restoration and self-healing

and you can see

that depending on touch

your control systems

there are volitional optical impulses

how this self-organization system is formed

and you begin to understand

that the Self-creation of God

this is actually not such a process in essence

how shall we say difficult to understand

from the point of view of human Consciousness

i.e. Self-recreation is a process of self-regulation

where was god originally

i.e. as if He comes out at a different time, but on logic

and this is a timeless process

but when we translate it into the logic of time
it turns out that time is the development of space
expansion in this case
we only have to want to build, for example
linear system of events
as space begins to expand

and in this way we can
through some kind of conditional ^{special} models
simply due to the fact that Thinking has
function of space expansion
see
where was God before His level of Self-Organization

as soon as you start
perceive this point of glow
then you see that the level is beginner
even before the initial glow level
to the level of organization of your Soul
this is the level you control

i.e. even before your Soul was created
external information was controlled by you

and when you start watching
and how was it controlled then?
then come again
to the physical body
to the Spirit
to Consciousness
i.e., first of all, it is often perceived
namely the physical body
but some fraction of Consciousness may be perceived first
then the physical body, etc.

i.e. you see your own personality again

the personality is obtained at any given moment in time
controls the system around itself
before even the beginning of the organization of the Soul itself

and it turns out that this is the process
that's what it consists of
that personality is created means it is Eternal

so is God created
He was always in control of himself from the beginning.

and when we start with human logic
to go out on this
it is clear that any object of information
there for example, the animal world has, generally speaking, somewhere
with the same properties

and when do these properties exist
it is clear that man has Eternal development
any object of information
can have Eternal creative development

because there are areas that are
beyond the level of manifestation of the objects themselves, so to speak

and when these areas begin to be perceived
then a very simple order arises here
as if regulating the situation

it is enough to enter the area
seeing that this area is governing
you can do the management quite well
further on myself
and adjust any of your processes
including the process for example there is self-organization

and since, well , having considered the process in the following way
that since God has the ability
always influence any system yes
including the process of one's own Self-Organization
He still endures this World.
it is in this very design
and it develops

then the question arises
why shouldn't God take it there?
and quickly, for example , fundamentally, as if the system

somehow transform it very qualitatively
so that there are no problems

and because the task of Self-Organization
this is the task of developing everyone
by the status of God
i.e. as God shows

as God indicates Yes

and it turns out that this is the task of Self-Organization
this is again a systemic task
based on what already exists

Well, these are the logical transitions that indicate that
that God Self-organized precisely for this purpose
so that the world would be tough
it's just his personal choice
exactly like this
It was He who built the World this way

and when you start to see it
you see that all external control systems
these are the ones that are built by your Soul
this is the level that God gave you for that
so that you can have
precisely the Eternal

i.e. to come back to God yes
be the way you are
even if only in the dynamics of development
God
i.e. precisely the Eternal

then it is clear that you are Eternal
Eternal action
you always make management effective
as soon as you see the structure of Eternity
precisely in the fundamental understanding
namely the structure
where is the organization of any event
leads to you
and you are the Eternal

then it turns out
that management is always carried out effectively
on one level or another yes
but you can always bring it
to that Reality
which you want to organize

there is physical
informational, etc.

This concludes today's seminar.

Thank you very much for your attention
