GRIGORY GRABOVOY
The Teaching about God
The creation of man
10.12.2003

Hello
The topic of today's seminar
this is my Teaching about God
The creation of man

in this structure of the Teaching
I am primarily considering that
that man lives in the World
which was originally created by God
as a structure of existence of human life manifestation

so when we talk about the creation of man
then we have to consider
that God created external Reality for that purpose
so that a person can function indefinitely

the concept of "functioning" includes
real life of the Soul
real control of a person from the Soul
and management as well
and the whole outside world

so in this case in this technology
precisely the applied aspect of management
is something we need to consider
how god created
any external element of the World is like this
so that this element is controlled
from the human side

and when the element is controlled
It is clear that a person can live forever

therefore in this structure
First of all, it should be highlighted that
that God created in every element of the World
some element of co-operation with God

i.e. this is not a direct understanding of management as such

for example, control by the will of only one person

and this is what every element of the World
co-operates with God as well
as man co-operates with God

in this regard it is quite clear here
that the allocation of the management structure
this is first of all a consideration of that
as an external element of the World
in relation to a person
external

i.e. external in relation
to the Consciousness of man
because even my own experiences , for example
a person can naturally perceive
as external Reality

and so when we look at
an element of this kind of control
then the structure of co-action
this is the all-manifested Soul of God
manifested
as in some external object yes
external information
and so it is in man himself

and this is the system of manifestation
this is the first element of the creation of man himself
including yourself
i.e. man also creates himself

and when we look at this structure
i.e. how does a person create himself then

it turns out that it creates when it is active
from the point of view of one's Consciousness
Consciousness given by God initially

and this is exactly where we see it
what is Consciousness originally given by God

hence
we can, for example , in our Consciousness
or in the fraction of your Consciousness
exactly that faction

which deals with, for example, Macromanagement
to highlight the structure of Consciousness
where is God
where God originally gave

then the question is
did a person take this Consciousness for example
because when he is born he already has
defined as if by a unified Consciousness

so here is the unification
it is the spread of one's Consciousness
towards Eternal development
this is essentially what God gave
Given by God from the point of view of Eternity

because God is Eternal
therefore His hand
this is the hand of Eternity
logically it is clear

when we consider such a design
within the framework of one's own Consciousness
it is clear that the creation of man was by God
it is a mutual process
first of all the process
connected between God and man
some external world

i.e. a person can see in the World
their own tasks or implement them
it turns out that here is the implementation of tasks
this is, first of all, a structure of deification in general
its Infinite level of development

i.e. when a person realizes creatively
your tasks
he does it basically like this
as God shows him initially at birth

and here it turns out that we can highlight
like several fragments
several legislative levels
on the creation of man by God

while considering these levels
you can restore your body

or you can do event management
and in such a way that there are no global catastrophes, for example

in this case the first control fragment
consists in the fact that
what is at the legislative level
on the essence of the structure of the world

it's clear that for God
creation of man
this is primarily an outgoing process
from a smaller size as if from a smaller level

because a person is in the Macroenvironment
physically meaning
physical creation of man
this is the creation of man first and foremost
from small size

i.e. in this case we see
that from a biological point of view it certainly looks like that
that for example when a person is
in a state developing from conception onwards
It is clear that it develops from a small size

but here I would like to consider
it is precisely the fundamental meaning of God's Thought

i.e. how does God make man understand
that although he is, for example, in the Macroverse, yes
in general, in mass equivalent
small in size
but it is the level that controls
including the whole world
based on your sensory level, for example

for in feelings towards God
in feelings, for example, Love for God
he is the whole world at once

because Love is the one constant
from man to God
and for example from God to man

then it turns out that we have
Macro level
i.e. the entire Universe, the all-manifestation of the World

exactly in that
what a person realizes
practically its own system of management in God's Thoughts
precisely at the Macro Level of Salvation
in general, logically, this is Macrolove

and when we see the control action
For example there is no person in this action
it turns out that everything he perceives
How is Macro? Well like the opposite action yes
to its initially small

I'm not saying that this is a micro level
this is precisely a small level in size
because the external world is huge in relation to man

hence the first rule of creation of man
means a small sized person
but rules the whole world

but that's what it is
the essence of internal organization
Physical Body of God
One God

it turns out that we have a structure of creation
by analogy
if we want for example
well, so that a person can reach Reality
with your mind, reason or spiritual development
in terms of precisely managing this Reality
or even distant Reality
then first of all it is necessary to consider
process of human action
to expand their capabilities
at Macro level

God, for example, in a physical body
in one place
all-manifest and achieves everything at once

by analogy with this it turns out
that the transition to the Macro level
i.e. giving continuity to the environment
i.e. a small person
gives itself Macro characteristics

then we get that in fact
this imparting of inseparable properties to the World
what is coming from God
This is the real system of human growth

i.e. I would like to consider here
human growth mechanism
after it is in its original form
in a small physically small
was created for example

and it turns out that the growth mechanism
is
It is the Epiphany that is actually Love

i.e. a loving person
having
Infinite level of interaction with the World
he is God's creation
and it develops through growth
as if into the outer Infinite World

what is the development of the human physical body
this is a physical extension
towards the Macrocosm from the micro level

well, that is, if we approach this process
for example, not in terms of just biological growth
because a person feeds and grows
namely the need for human growth
from God's point of view

i.e. a person must use his body
to know the outside world
for this it must increase
for example to the level of an adult
to the same size

then it turns out
which we can quite easily trace
human interaction
originally created by God
with a person who, for example, grew up
and in general how to calculate
mechanism of human development
from God's point of view

i.e. how God creates man
as if in a continuous aspect of time
i.e. cause and effect

from here we can come to the following
why this or that event is necessary
for a person at some time

and here it is quite clear
what if we for example consider an event
sufficiently distant in time
then here we are dealing with more
precisely with the level of human interaction
with a large amount of seemingly fixed information

if we want to talk about the future
then it matters more here
the task of already growing the human Soul
and development in general
or structuring the human Soul
in the future process

but the future process
from the point of view of, as it were, volumetric masses
this is the formation of the whole Reality
but manifested at a specific point

i.e. in optics or in optical quantities
it's quite simple
any future event
this is a projection for example yes, all of them taken together
some events that happened

it turns out if we take an array of past events
and as if we focus on the point of future events
then we get that by interacting with the past
a person can shape events for himself

but it is natural that God gives the future
God giving as if an exclusive part of the future
i.e. that part of the future where only God exists

here you can highlight in your Consciousness
in your Spiritual Perception
such a management structure
such a structure of Reality

here you can see that there is development
in general, assistance
or even a commonwealth
in terms of solving problems
i.e. fellowship with God

but it is possible to be friends with God
if a person is well -disposed towards him
if he loves God
if it gives the possibility of a solution
of his own task
and at the same time solves it himself
as if God were only pointing
i.e. he is studying

and therefore the growth of a person
this is his training going again to God
i.e. God's self-development is the growth of man

when we look at the process like this
we see that the process of interaction, for example,
God and man
in terms of event implementation
this is a process where a person grows
Well, for example, we are considering
human growth as outgoing
from the level, let's assume, coming from the Soul

if we look at this level for example
as a level that is all-pervasive
it's quite visible
that the growth of a person comes from the Soul
this is growth in general going towards the Soul of God

i.e. again we are considering
growth going to a person for example
as a manifestation of the Spirit of God
in the form of a space of external events

it turns out that
spirituality of external space
this is a task of management in general
all external and internal space of a person

and when we look at this process
in application to oneself for example

then it can be seen quite clearly
that in order to, for example, restore your health
needs to be considered
Laws mean development of the person in fact
from God's point of view
i.e. exactly where it is
cause and effect control environment

I'm saying this specifically here
precisely about the cause-and-effect management environment
because there is a position
what for God
the level of a person is always generally equal

i.e. for God
create a human at any time
or create it initially
and then we assume discretely
as if simultaneously with the creation of the whole World
create
this process is generally unified

that's why I'm looking at this first of all
human concept in relation to God

i.e. how God perceives
precisely the human level of growth
as if a person were looking from God's point of view

and it turns out that a person needs it
precisely continuity

I want to show
what Spiritual characteristics of continuous growth
this is what drives a person
in relation to the Infinite
i.e. we assume that the Divine is present throughout the Universe

if we consider the whole external Infinity
how so as if a certain system of information
then in order to restore the physical body
for example, now you can really do it
the process of restoring the physical body
or to normalize events there

if we look at the outer space
events

in the whole outside world
let's consider
that which is from God

and for this we must generally consider the process
Well as if in the following way
what to consider
what is from God
we must see
your goal coming from God

i.e. when we see our goal
we can recognize
external signal coming from God

then the whole external Universe the whole external World
has a restorative effect on a person
i.e. a person gets more health
or just becomes healthy
and can normalize its events

it turns out that this is necessary
see it anyway
how does god create man
to see the line of its creation
in relation to future events, for example

i.e. if it is visible how God, for example, creates
human physical body
or how the Spirit shapes it
then it is clear that it will be immediately visible here
how the tasks are set
before the Spiritual development of man

i.e. in this case we are talking about
what you need to determine
its own kind of internal status
in relation to oneself

i.e. there is an external, generally logical status
and there is an internal one
where there is a certain point of support
every person in action

i.e. it is not a fixed point of support
this is the Divine fulcrum
because it is a fixed point

these are concrete actions
conditioned for example in the logic of Perception
or specific tasks that are being solved or solved

and from God's point of view
the tasks of Eternal development in general development they are as follows
that you must have a movable point of support
precisely on Divine action
i.e. something that is not initially defined

and when you start to find it
generally speaking, notice, record
in some control action
then you see that this is the fulcrum
it is absolutely effective
in terms of precisely performing a remote action
where God shapes the future

and this future becomes sustainable
if you introduce there the concept of, for example, Macrosalvation
i.e. Macrotasks
in relation to one's personality

these problems of course arise
at different times for different reasons
for example at the current time
it is a necessity
prevent a possible global catastrophe
or save the reactor from explosion

and at the same time when you, for example, do work
now in the control room
then understanding the access aspect as I said
human growth is and infinite access
from God's point of view

This is direct control in Real time

i.e. your normal state
this is what for example the plane won't explode there
carrying some dangerous weapon
or the nuclear power plant won't explode there
or for example there will be no leak in the dam yes

when we look at the governance structure
coming from you

from your normal, so to speak, physiological state
then we come to that
what is the concept of "physiological state"
may also include the concept
Spiritual growth
Spiritual action
i.e. the Spirit containing the body for example Yes
from the point of view of God's knowledge

and here we see that the form of a person
this is the normalizing level
almost any Reality
including the Reality going to God

i.e. if we want to ask the question
how can you help God at all
in its implementation for example there is a macro task
it turns out that it is enough to maintain your shape
i.e. to be Eternal

and when a person defines such tasks for himself
that's quite clear
that a person can contain his form
as if at a constant level of an already grown person
i.e. an adult, precisely an adult person
in order to standardize by its form
not only for example Well let's assume the people around us
or there to bring out the normalization of events

but we can see it quite well here
what is the norm of the human physical body
this is a divine plan and design at the same time
intent from the word "introduction of the mind"
i.e. the transfer of the mind to a person according to the given property of action

when we see such a management principle
then we are already fully aware of it
that God is quite reasonable
i.e. from the point of view of man in the concept of "reason"
i.e. consciously

not just like that , gave information
and let the person deal with it as he wants, yes
with this information
He gave this information to Eternity
initially laying down

in the primary birth of man
knowing that the person understands this information

and when we see this
what God gave knowing that people understand
then we understand God

we understand that God knows about possibilities
to make a person aware of almost all Reality
and therefore control Reality yes
in terms of precisely creative development

i.e. here I have already moved on to that
that human knowledge comes from form
this is a possibility of control
and initially knowledge existed for man

the question is where this knowledge is located, for example
specifically for you
or specifically for a certain situation

so here is the knowledge for the situation
may be in a situation

let's assume in due time
when there were a lot of decisions to make
some math problems
I saw the answer right away
i.e. in the problem and in the formulation of the problem
i.e. there specifically in a specific place of the task
a point is revealed
and this is knowledge there

or suppose at each point in space
you can select the creation point
in a geometric and, as it were, control system

therefore knowledge is initially the implementation
in general, according to the control system of the next event
this is knowledge that exists on its own, as it were
i.e. God initially created knowledge, everything works out

and when we want to understand
human organization
how god created man
i.e. how did He put the cells together, for example?
how He created the events of life

then it will be quite possible to see here
this is exactly the path I'm taking
that He folded it in this way
that knowledge of the next level of physical man
this is knowledge given originally by God

i.e. if we look at the situation, let's assume
how hemoglobin develops in the blood
then we see a certain trajectory of movement
for example, in the blood fraction

there you can see, for example, a spiral shape
always going there in anti let's say level
i.e. if the level of the vector is yes this is directed after that
how we put blood in a centrifuge in one direction
then hemoglobin necessarily moves to another

i.e. the meaning of this development is that
that there are functions that are initially embedded
into the structure of Macrodevelopment
i.e. resistance

when we move on to the growth structure of the organism
from non-level, for example, just resistance as such
because a centrifuge is an unnatural environment yes
but there may be a natural environment
and hemoglobin can generally tend in the same direction
let's assume against for example the gravity vector

i.e. although gravity is a natural environment
it turns out that hemoglobin exists
some kind of system of reactions in general
if we want to restore hemoglobin
or even create a healthy organism there
from knowledge of one level of movement
there are some molecules in the body
then we need to know first of all
this position means this molecule
in relation to the whole world

i.e. we must consider
how did god create this structure
not only because it is a body part there yes
even if it's a cell or a molecule

and what is included

as the level of behavior of a given molecule
i.e. why do we see some properties
how do we want to understand these properties

so this is the shape of a person
this is the unification of properties in the form

if we want to study the interaction
for example some organs
from the point of view of future human development
then it would be quite possible to do some kind of experiment there
focusing attention

on the right lung for example and on the heart
and thus highlighting the level of future events
we will see how skin is created , for example, from the inside
and how skin glow affects events

but if we, for example, simply light up
human limbs
or there head
and let's look at the body , for example
from the point of view of Divine Light
i.e. how God created and what we brought
then we won't see any difference

i.e. God in the body of a man
created one level of human reaction
on yourself
when a person looks at himself
he is both Divine and his own
can see in one spectrum at one level

and therefore
unification of vision is achieved towards oneself
this is the health norm
i.e. when we are Divine Light
in fact, we kind of spread it throughout the body
as my own light, in general
as your own health

so we can even do it like that
how to use training for that
to restore health
from a simple postulate

how to look at yourself from the outside

precisely by the close fraction of Consciousness
as if the main wave of Consciousness
and try to see the Light of God
at the same time so
so that in a more distant faction of Consciousness
it would be one phenomenon
i.e. one Light

a person uses such training, for example
in extreme situations
then he can clearly be saved
even in some difficult situations
for example, this may prevent a nuclear power plant from exploding
only because a person has mastered this action
as a result, the nuclear power plant may not explode

therefore there are certain consequences
human actions

and when we look at
for example, rational human activity
aimed at overcoming some elements of development
Well as if negative and the person himself

then it turns out that in the future
the man has answers to all questions
how to overcome the system
well, maybe negative man-made development
and in general the answer is in the problem itself

and when we start using this mechanism
then we see that the selection of the response system
again forms the shape of the human body
but already close to the shape of the Body
and moreover the Physical Body of the One God

i.e. we see that the creation of man
follows a similar principle

i.e. God creates the human body
just by creating a system of answers
in Your Physical Body

and seeing the answer, the person sees it turns out
Light of the Physical Body of the One God
or the Light of his Soul
which is the universal Light

when we consider this process
in relation to oneself, for example
we see that the fulfillment of God's tasks
of all, our own task
related to the search for its location
in terms of action towards us

i.e. we must consider
personal factor of one's action

here is the identification of the personal factor
in the Infinite level of information
that's actually true
quite a serious and special task

i.e. to determine the structure of your personality
in the conditions of macro interaction

after all, God created the whole world practically unified
i.e., in general, even universal
from the point of view of various processes in this World

a person when considering
all information
he can see quite a lot
or there is an infinite number of phenomena
and find the structure of your personality
i.e. find and identify your task
this is a special path

i.e. this is, in general, a fairly strong concentration
as if internal energy
or personal characteristics of volitional
human

therefore, identification at the volitional level
as if their tasks
this is something that God practically creates
in the form of a certain spectrum of events

I specifically said "some"
because it's different
the same or similar spectrum in general
man creates himself

and when we consider

how exactly did god create man
from the point of view of problem solving
He gave him a task practically
find your own solution
basically the same answer
i.e. some other way

why are all people different and have different bodies
because a person has freedom of choice
and the right to choose, for example, one path or another

when a person receives from God
the path of development of Consciousness yes
of his own creation
then a person has only one option left
be able to do the same

i.e. it should then work out
be able to create your own structure
I mean
physical body suppose yes first of all

you can create a sensory level
Well, which person has already learned to create in many ways

you can create, let's say, an emotional level
or level of intelligent control
which comes more from the person

but when, for example , we move towards God
in terms of approximation, for example, yes, in Eternal Development

then it is clear that it exists in Infinity
some level
which man does not create
by his own willpower

this is the level of development of the human Spirit
in relation to God
i.e. how does a person help God

and it is clear that God actually gives him that
what should he do
in relation to Spiritual development

i.e. this level is absolutely clear
in general, the criteria are as follows

what in the Spiritual plane
God always gives on his own
in relation to the personality of a person

if in the physical plane
Well, many actions are quite clear
that are connected precisely with God-pleasing development
this is creation non-destruction

and in the Spiritual sense it is clear
that it is the same direction
but on the Spiritual level it is clear
that which comes from God
this is what really differentiates
such as there is optics Divine optics of God

i.e. how can we even suppose in optics
recognize God's action towards us

a man walks down the street
or performs some action
what is the criterion for the correctness of this action
in relation to, for example, the development of Macrocivilization

i.e. generally speaking what should he do here
to suppose to save
from a possible global catastrophe
or there locally someone or yourself

here the criterion is
Well, intelligence is some kind of internal tasks

so here are the Macrotasks
which a person has before humanity
it is like a certain tuning fork
associated with the presence of God
in his personal tasks

i.e. the spectrum defining the Macrotasks
this is the presence of God in action
this is exactly the moving point that speaks about that
that as soon as we learn
to create in action
then we no longer depend on anyone

we can fully create Infinite time
we can do it quite well

for example, your own personal tasks of creation
and at the same time, for example, not take them, for example
from the level of some rigidly fixed yes
strictly criterial

hence
doing good is freedom
i.e. real, genuine freedom

accomplishment of creation
this is complete freedom
unlike, for example, some others
well, negative, maybe destructive actions
where they are formed quite rigidly
as if fragments of the absence of future events

i.e. the future is in destructive actions
it shrinks and turns into its original point
a point that exists
up to human height
before the start of its organization
basically before the creation of man

and it turns out that we can quite determine
then criteria means yes to the creation of man
as structures of Infinite growth
emanating from the physical body as well

and considering the possibility
Infinite development of man
in your physical body
we come to that
what's in the Infinite level of events
one small physical body of a person
in relation to the entire external world
it is quite possible to be in all points in general

i.e. it may well be
what is the physical body of a person
in Infinite Time
this means he will visit various Metagalaxies , etc.

this level is quite unique in logic
it gives a very powerful tool
and the mechanism of self-regeneration of self-knowledge

i.e. imagine that there is a logical problem

all manifestations of the human physical body

i.e. for a person, including the physical body
this means the possibility of well For example there
be more present
anywhere in the world

let them be in Infinite time
technologies through which one can see
in general, an opportunity
and in general it is really possible to implement
possibility of human presence
anywhere in the world
Well, in general, a purely ideal task, so to speak

so here in Infinite time
this ideal task can of course be realized
with the Infinite Life of Man

from here it follows
that the Physical Body of the One God
ordinary human physical body
quite means it is
and maybe even it should be, generally speaking
ordinary physical body

so that a person understands
that He has basically the same human path

when a person understands on awareness
he understands that he certainly can't be
move to any point in space

but to make one's development Eternal
in terms of management, for example
by the Infinite level of development
it's within his power

i.e. Spiritual level of management
in this case it is translated
at the level of human reaction
to God's task

i.e. a person doesn't necessarily have to, as I said
move
it is enough to do this work Spiritually

so here is Spiritual movement
Spiritual presence
as if he were here yes
Human
this is the level of God's creation
that means in my general Perception

i.e. man creates God in Perception
and this Perception shapes him

and when a person, for example, creates God
Well let's assume there turning to Him with prayers
in action
then he asks
or does it help in implementing the action yes
to some other person

so in this structure of my Teaching
dissemination of knowledge
this is an appeal to God
in terms of self-construction in general
in terms of knowing how it is built

then it turns out
that he generally transmits knowledge almost instantly
he can actually convey knowledge in this way
that by building some part of a cell or an organ there
or curing the disease
and showing this path

but the path from God is the construction of man
this is a universal way
and it turns out that he immediately transmits knowledge
to all
because he knows how God built it

therefore using this system
you can teach people very quickly
For example there self-healing self-regenerating

when we talk about processes such as resurrection
then it is clear that there will be a resurrection of everyone
because the recovery process
resurrection process
it's a single impulse
and if we look at it from God's point of view
then it is immediately understandable to everyone

and therefore it is a systemic process

we can also look at the process
let's assume system recovery
for any disease, etc.

from here it is quite possible to see
the next status in general of the development of the World

i.e. the World was created to develop Eternally
that's understandable
if this is taken as an axiom , for example
precisely the human axiom

but the next aspect of the development of the World
this is the approach of the World in relation to man

for example we should consider here
such a process
when God perceives the World
then for Him there is no distance
for His Physical Body

what is there
that is located here
He is all-manifested
therefore it turns out that man is created this way
that he also has mechanisms of manifestation
i.e. in general, all control yes

full development of personality
this is complete control over external Reality
on the creative aspects of being

hence it turns out that when we want
make the control, for example , coming from us
or we want to make management
let us assume that what is coming to us from God's side
we must first consider
your personal path
in relation to God
in relation to His Physical Body

and then it will be clear
that he who built us
the one who built the physical body of man

or his Spiritual structure of development
can show the way with his personal participation
with his personal presence

therefore a person can fully perceive
The Physical Body of the One God
what does this mean
when exactly the Physical Body of the One God
and God is present, let's say so
in the physical body of a person
shows his personal level
what can be done and what needs to be done yes
for example, Jesus resurrected Lazarus there, etc.

when we mean consider
the process of God's development
in relation to a person
It is clear that God created man like this
so that a person is actually
in general, I had the opportunity to interact
with other people

i.e. the system, so to speak, of communication

and when we generally consider that
what is around us in the form of a technogenic path of development
precisely as the development of human communication skills

then here it is quite clear
laws of the following development
For example there are Internet technologies

for God it means the closest element of the World
on the Internet
this can be enlarged image
or have access to any environment

It is clear that for technical systems
it is also a system of instant movement, etc.

i.e. it turns out that we can quite recognize
structure of future events
and logically this is the main action
in relation to God

i.e. a person can accurately determine
God

and find Him for yourself at least
that means if he knows his future for sure
but he must find God for everyone

i.e. when people see God
from the point of view of general development
then we can easily be saved quite quickly
if everyone sees the desires and actions of God
in relation to for example yes to Eternal development

but God always acts
only in this direction
for He is Eternal
and He shows only the Eternal way
He has no opportunity, for example, to show something else
because He is in this system

i.e. He could of course act differently
let's assume there in action change the structure of the word yes
or act on behalf of any entity
and act instantly or slowly

but God chose consciously
creative action

pay attention here
I just pointed it out here
a fairly accurate description
in what specific place is it visible
here in the human consciousness

i.e. if we assume from ourselves
look from the right side
visible means the information system is where it is visible
that God Himself personally chose
creative path of development
i.e. it is His personal decision

because when we consider
freedom of development
it turns out that in relation to God
this freedom is also manifested

i.e. He has, for example, the physical body of a human
can choose any path
but He chose only one path forever
creation and Macrocreation

and following by analogy with God
it is quite possible to choose the same path
moreover, there is no other way in principle
in Infinite Development there is simply no

and when you consider the option
for example identifications
those. search for God option
for yourself and for everyone
the difference here is that
that when you find for yourself
you still find something for everyone

and find for yourself
it means to determine the path of Eternity
i.e. to become Eternal there for example, to recover
be able to normalize events
prevent macro-disasters, etc.

i.e. any system in general of Spiritual development
I will specifically use the word Spiritual here
because the Spirit is an Infinite quantity
therefore any action is Infinite

spiritualization
i.e. obtaining the next Spiritual status
this is what you have in the form of your own action
i.e., for example , acting on one's own behalf
you act for everyone

i.e. the action does not necessarily have to be
for example, some general or shown to everyone
there may be an internal action
aimed only at solving
exclusively your tasks

moreover, your personal action
this is the main action
God gave everyone a personal i.e. action
aimed at solving your issues
for everyone
it is some kind of mystery yes
where you decide for everyone

this is precisely a mystery
i.e. what is hidden in you

after all, you, for example, are not specifically there
physically help often
or not by any specific actions
but hidden in you is a mystery

why for example for example prayers
and performed especially in church
this is a mystery
for you still go out to everyone in your prayers
giving for example yes, joy of life to those around you

when you suppose to act
well let's say in social status
acting let's assume in management
you also perform the sacrament
and it does not necessarily have to be announced

i.e. declared systems
only those that you want to announce

when it becomes clear
it is clear that God also wanted to announce, for example
only what he considered necessary
and there is a certain mystery in relation to man
and with God

and it turns out that not all events are God's
can be recognized immediately

from here it follows
to recognize an internal event
Well , this is by analogy with a person, for example.
when you've known a person for a long time
and can you tell me what it might be addressed to
his gaze
or his desires
then it is clear that he can be helped somehow

i.e. by analogy with God
how to create a Reality for him somewhere yes
create something that will add to his personality
a certain structure or even physically heal
i.e. in something somewhere using such a term
how to create it for example there is a situation

so it turns out that if we have

let's assume control comes from you
in relation to another person
we can do it well as if to guess about that
that there is some mystery of another person
and it was discovered here and there

but in relation to God
then first you need to know Him
i.e. only then can we go down this path

what other way is there
Well let's assume there is a path of information, etc.
but the thing is that God created everyone independent
and if a person doesn't want to
Almost no one has access to it
except God

and so it turns out that we have here
there is only one possible development option, yes
to understanding
some True and motives of God's Action
when we want to save someone in action
and for everyone at once

this action is universal for everyone
for it is God's act

when you start this action
consider
as an action, for example, one's own
then you see the presence of God next to you
i.e. where was God with you here
this is clearly and distinctly visible

It is clear that God is always with you
from the point of view of well as if logic and Peace
but when God is personally manifested and when He is here
you can see it with your own eyes

when you see it with your own eyes
you are doing what, generally speaking,
then what can God do about this task?

if for example you are doing some kind of task in general
Well let's assume very quickly
or you want to make it like this it's slower there
consciously regulate the speed of solving the problem

then you enter the structure
where is your human right
your human influence

for for God everything can happen almost instantly
He can perceive everywhere and at once.
He is everywhere
for Him there is no concept, let's say "fast" or "slow" yes
from a certain point of view of human knowledge

when you start to enter into a human level, so to speak
it is clear that the main tasks
you should do the best at once
i.e. acting sincerely sincerely
and in general straight

and sincerity and directness
very clearly and unambiguously manifested
precisely in Macrosalvation

and that's why when I talk about it
how god created man
from the point of view of human Consciousness

it's clear here
that it is precisely through the sincerity and directness of a person
in Macrosalvation
there the person is always in that exact perspective
that he sees, among other things, the mystery of God
in relation to himself
he understands His personal appeal
this is the sacrament
God's appeal to man

and when do you start to see it?
your questions often seem to resolve themselves
i.e. from the presence of God

you are here well as if you yourself are not doing anything
but not all issues should be resolved
through some tension
through some for example there is some kind of enhanced action there

therefore as a management
I suggest we make the next level now
I will work with you

your personal tasks
but solve them naturally
through the presence of God
i.e. God is here and you can solve it through Macrosalvation
i.e. just do Macrosave
and your problems will be solved

I work with you

when you solve current problems, for example
it is not necessary to solve them, for example urgently, yes
but you can solve them for others
those. please note
there is a technique for solving your problems for others

it is not necessary to go out
on the structure of one's own personality
after all, you often solve problems for God, for example, yes
tasks there of creation or for example there is Eternal development

so that's when all the people solve problems
for God
for His purposes in the plan of Eternal development
then they decide for themselves

in optics it is very clear
if you solve your problems for someone
reflected light hits you
and you get a solution to your problems

it turns out that you always have
one only way of acting in relation to another
i.e. helping another helping a loved one

for example if we consider
structure of human development
then love for a loved one is the only one
the path to the realization of Peace
that's exactly how it is in Infinite development

because Love is the exact coordinate
and there is the way of God
the path already taken by God

so when we look at
the structure of Love
in relation to the World, for example

This is a system of control given by God

for in every subject
in every element of Reality
action directed from Love to God
this is the right action
and creative action

i.e. it is only worth considering
where is the Love of God
from any subject of information
from any element of the World
and we see, generally speaking, essentially the whole world

when you consider
Well, it would seem that these are quite abstract objects of the World
for example, a stone, a tree, or an animal
let there be sky there for example Yes
seemingly completely different concepts

then you just need to bring out the level of a person
to show the human form
show his status his importance there
for God
all these phenomena are aligned in that environment
in which we are now

i.e. well, it looks like some kind of kaleidoscope
there are a number of restructured possibly scattered
this is how you can imagine the events
and a person only needs to appear
everything takes on exactly that form
which exists now

and that's why it turns out
that the whole structure of the World
this is what is around a person
i.e. the person is already a managerial level

if of course we consider that
that every element of Reality
also interacts with any other element
and as if control points
are also on this element

but take some stone
you can come and take this stone

and the control system will move

of course, you can also consider it in general
any other action
the difference between a person and a human being is that
that man understands where God is

when you see this difference structure
then the difference is exactly the same
roughly speaking, you could say that
still to a large extent

but exactly the same
according to the structure of Spiritual knowledge according to the structure of the Spirit
as a man going to God
but nevertheless God is God
i.e. He gives, in general, His own path
but at the same time He creates all Reality

then any other element of Reality
he is in relation to a person
is on the same level

other elements generally speaking should develop
towards human development
i.e. to be co -directed

and it turns out that in this case
a person has the ability to influence
on any element

i.e. even if there were some violations
gravitational parameters
some planet let's say there it flies towards the Earth
then it is possible through the form of a person
take control and lock the planet
i.e. how to strengthen the position of gravity

i.e. a person is logically capable of doing this
in general, it's elementary, even at the training level

what I said can be done at the level of training
by putting some management structures in place
there on For example well just in front of you
and making control from
from a very, let 's say, small physical size

to the big

when you do the same thing for example
in relation to the restoration of organs, let's say
it is clear that the restoration of an organ, for example ,
in case of some illness
This is also a restoration
at the cellular level

i.e. you do this work practically all the time
i.e. you have such systems in your body
which allow you to completely reconstruct
some life processes
build events of the future

and this is how the identification turns out
i.e. recognition of these processes in general
this is the level that is directly
it is absolutely clearly closely connected with that
how god created you

i.e. when you see it
you see the rightness from a human point of view
for the creation of God is made by God
this is the correct reaction to Infinite development

I mean here of course
from the point of view of Infinite development
because everyone has the right to have, for example,
Well there is a different point of view
but as I said Eternal God
nevertheless created the Infinite level of development

when we look at Infinity
then first of all of course they arise
questions of our own Soul as an Infinite structure

i.e. education or formation
Soul structures
aimed at precisely Eternal development
and this means again the same principles of "thou shalt not kill"
general creative principles, etc.

when you look at the structure
identified precisely with the Soul of man
then you see that for recovery
for example, your physical body

you need to consider first of all
your own status as if of personal will
that's why you do some action
from the point of view
of your Soul
and the Soul of God

when you put the question like that
then the Soul of God becomes immediately visible

here, pay attention, there is an element in this World
in management you can call it that
although this is more of a general Macro-management
realized by you
that your Soul as soon as it asks the question
she immediately sees the Soul of God

and moreover taking into account
that the Soul of God has the property
presence of the Physical Body of God
in the area where you see the Soul of God
you can fully reveal the Physical Body
i.e. to see the Physical Body of God

and then you see Reality
the whole Reality yes
in personified human quality

so God created man
He created it so that one person
personified all Reality
i.e. all communication systems

and a person really living like this on Earth
this says that
that at least civilization is not destroyed
i.e. people did not create a macrosystem of destruction, etc.

i.e. we can quite well talk about that
that you have to be very careful
to any person
there somehow it is possible to protect it as much as possible
there to store all his classical foundations
which allowed him to live a long time

For example there are fundamental religious directions
somehow develop and contribute to it

so that a person is in his niche
it is precisely the niche of habitual living , or what
was such that it was not destroyed
at least because
that there is already an environment that allows people to live there normally

another question
what if many have learned self-regeneration there
and are able to self-recover
but then there is a problem here again
if at least one has not learned
anyway, the tasks of civilization are the same

i.e. God created an equal World for everyone
therefore one of the criteria of creation means the World
it's from God after all
this is a person equal to another
i.e. a person who also strives for God
it can be different
but it must be equal to the other
i.e. he should be able to do the same

i.e. that is why I am setting the task
namely training in all direct control technologies
i.e. everyone has the right to be saved
i.e. not to be blown up there together with the planet, let 's assume Yes
has the right means to be healthy, etc.

so here based on
Well It's like legal or something. Norms
from the point of view of the creation of man by God
we can very well study the process of creation

for example , when I do some management there
associated with solving some critical situations
then here, as a rule, there are generally options for choice
there is no particular personal factor in general

i.e. there is some critical situation
It is necessary to make management
and be sure to do so
so that especially in the Macro sense so that there is no yes
some kind of global destruction

there is a criterion here when there is no such concept
how can you "choose" to do or not to do
a person must do this

i.e. he basically does this all the time

another question is whether it can be technologically enhanced
or somehow , for example, do it like this
so that in general in the future there would be an opportunity
how to formalize this technologically
or in the form of some kind of methodology
to transmit more of this kind of level
well, concentrated knowledge, perhaps?
when here is concentrated knowledge
are given to other people

but God created everyone on an equal level
once manifested knowledge
it becomes universal
as soon as this knowledge
achieved precisely Macrosalvation

and when you realize this
you see that God also created man
equal to Macrosalvation
in fact, the Action of God

i.e. He gave the same systems of Salvation
which He has Himself
there is complete identification here
God and man

i.e. there is in the creation of man
level
where God is perfectly identified

It's absolutely clear in logic
what this place should be

there, where man was created
Well like some kind of platform yes
where did it start its growth
maybe even a platform
somewhat more connected with the mind of the person himself
who builds
or for example a person who builds Reality

then this given this platform
it's like a form of intelligence
this is the Eternal development embedded in technologies

i.e. if you want to get
technology for example Eternal development
then it is enough to consider
properties of your own mind
solve some problems

i.e. it is enough to analyze
what do you do in some cases
how to do it yourself
and by means of external control, as it were
but control such as God does
who created you

i.e. precisely to move to this point of view
you will see that your mind decides practically
any tasks in Macrosalvation
the main thing is to find this structure and somehow fix it

it should be a structure first and foremost
here is the first identifying feature
it should be simple enough
or how to even say extremely simple

i.e. the first principle of recognition of that
that you are on the right path
from the point of view of such diagnostics
it's very simple from a diagnostic point of view
from the heart

the second level is very well as if a complex system
from the point of view of if God does it
God always does in the all-manifest system
therefore it is extremely difficult
in relation to yes
to your one-time action

and it turns out that when you combine
in the Spirit
as simple as it may seem , the action is diagnostic
with Macro level
you get identification again
at the level of the Soul
Spirit
Consciousness
you get the Macro complex human body
namely the physical body

i.e. it means the possibility of simple knowledge
physical body
and the Actions of God
in relation to the physical body
this is your own path
on Spiritual knowledge of your body

when do you start well in general, to work with such a tool
it's practically like a diagnostic tool
because more management happens
at the level of the Soul
i.e. the growth of the Soul
structuring your Soul

and when you see
that you can structure your own Soul
precisely in Infinite Development
then it becomes quite accessible here
the instrument with which God created you

I specifically brought it out
Well like, enough or something
in such a fast system of terminology
creation system
and in general, even somewhat discretely jumped onto it
because the task of creation
i.e. how God created man
this is a special aspect of knowledge

it is clear that there is a concept
Souls for example Yes
bodies
there are Consciousnesses
Spirit
and in general a lot of concepts

but here we will consider
First of all, the aspect of personality

because the physical body of a person
and the Physical Body of the One God
these are completely similar bodies
in general, the Physical Body of the One God
besides the possibilities of general management
and the possibilities of the One God
it is no different

that's why it turns out
that creation occurs almost in essence
from the point of view of the physical body
its own form

i.e. God recorded
Your own form
and this form acquired the appearance of Infinite development
in the form of a man

but God does not remove Himself from man
He thinks that man
it is essentially self-valuable, original and self-original

i.e. it cannot be said that He created it
and as if He, well as if he is in charge
by pressure
in fact it's not like that at all
God created us completely free
human development systems

i.e. a person can develop non-technogenically, for example
may not create nuclear bombs
but it can in principle also create

so when we proceed from that
that the creation of man
for God it is
the primary act of His own Will

then we see what it means for a person
this is an understanding of that
that God talks to him on equal terms, in fact
in terms of Eternal development

i.e. God does not shield it
and He doesn't say
what does it mean he should, for example, learn a lot
or his knowledge should be like this
that he must there learn the endless time

No, He is God telling him
that he can learn quickly
maybe even instantly
but it's just necessary
discover your own personality
in relation to the True tasks of God

i.e. to see this Light
he is quite a strong Light of God
it is generally as bright as possible

and when you see it
you see that he creates you

besides its own form
human form
after all, His form is also a creation
It creates the same and practically
With the Light of Your Own Soul
i.e. with Your own Light
with the Light that He creates Himself

therefore it turns out
that He creates at the same time
and myself and you

and when you look
on this structure of Reality
then you understand that the main level of Reality
this is the one that is specifically aimed at
on the structure of creation of man in general
this is a level of generally universal action

and moreover, this is a level of logic
Salvation actions
exactly that action
when a person sees that he is co-directed with God
and it is created at the same time

i.e. there is some Light at the level of optics
this is a golden glow
when you see it
you see how people are created in that Reality
they are created
in their affairs in their actions

i.e. for God from God's point of view
this is action
and from a human point of view, it is also an action
i.e. in the work and in the action of Eternal development
Eternal Life
in general, even in elementary action
but there is a level of understanding of this

directed specifically at a person
understanding
for God knows everything

it's quite clearly visible here
that man is created there
precisely by event-driven future action
i.e. as if practically an ideology of Eternal development
in relation to
to man and to God

i.e. the interaction of God and man
this is also a constructive-cognitive character
this means that a person can know
Action of God

and when you see the structure like this
as I have just shown
then you can see that you can even look
how god creates the world
How God Creates His Own Reality

and then it is clear that knowledge exists
not just watch
how god creates man
human point of view , for example

but you can take a look
how God creates Himself
from a human point of view

and comparison of these two levels
gives an even stronger level of knowledge
which leads to that
that you can see very clearly
how is a specific organ created in general

i.e. where does creation begin?
For example there is a liver
how does blood function
and why is man designed this way?
from the point of view of Infinite tasks

what is the status of Infinity
for example, human physical organs

when you consider this process

then it is quite clear that the place in the World
here is your knowledge
it is
your own level of Infinity

when you know this level of Infinity
then you become happy, in general, it 's joyful to live
you see that joy
this is an essential attribute of human status
i.e. human Consciousness

when you come to him
then you create through joy

when you learn to create through joy
it is clear that life takes on shades of Eternity

for joy is the manifestation of Eternity
but in a human understanding, so to speak
from God's side

when you see it
then it is clear what joy there can be
if there is destruction somewhere yes
it is clear that it needs to be liquidated
there may even be the slightest systems of destruction

what does it refer to
to the restoration of your own body
let's assume the restoration of other people

and as much as possible if possible
in general, the work needs to be done
in relation to Macrosalvation

i.e. to the possibility of doing Macrocontrol
for example through structure
let's assume our own awareness of Reality

Now you have realized Reality
as it should be
and Macromanagement happened
i.e. everyone is saved

when you do such an action
through a state of joy
through the state

for example, the target level of Eternal development
even if logical
it's clear that it's one hundred percent there in the next second
or there may be in the next century
won't be a nuclear power plant explosion there
and maybe in 50 years there won't even be a nuclear power plant

i.e. this is the management process
it is connected with the fact that your natural state
from understanding
your own level of creation
this is the level of the Divine path of development
the paths originally given to you by God

when you consider this path
you see
your personal path
and the way of God
towards the Infinite Plan of Development

and then you solve your problems
often quite simple and generally fast

This concludes today's seminar.

Thank you very much for your attention
