

GRIGORY GRABOVOY
The Teaching about God
Creation of the body by the Soul
11.19.2004

Hello again
the topic of my seminar today
this is my Teaching about God
Creation of the body by the Soul

in this topic I am considering management
when the Soul of a person creates a physical body
in this case, external conditions, so to speak, can be different
for a person
when for example Well, it exists
there is a powerful informational pressure there, yes
external Reality

maybe so
that the body is physically healthy enough
or just healthy
but nevertheless for that
so that in real life events
not have as much external pressure
any events as if well, including a negative plan
you can use this technology to create a body

in this case, the body is understood as
as the physical body of a person in the first place
in this technology
but the Soul can also create
and any external body
in relation to a person
i.e. including external space, for example air, etc.

and in this regard when it comes to
about creation in the technological sense
human body
then here we need to consider
these are the ubiquitous connecting links
which exist in the form
instantaneous optical manifestations

for example, the creation of some organ in a person
may lead to that

that due to the concept
and systems of general external relations

is created simultaneously
some element of the external world

as if external Reality

Well For example there is the light of a distant star there
section of this world ^{yes}
perceived by a specific person

i.e. the connections there are very subtle
and sometimes even quite conditional
because what is created inside a person
often has a subtle internal manifestation

and let's assume when we talk about concepts
there is a "subtle world"
or some subtle aspects of Perception
then this often means
the structure of the emerging internal tissue of a person
in real time

i.e. if we set the task like this
look
how does God the Creator create in real time
human
then it is clear that the process of His Thinking is going on
as if inside the human body
in this case the outer contour
It holds as a structure of its own development
or as a reflection let's say
Physical level of your Brain to Infinity
the result is a human body
such a formula

based on this when we consider
for example, the structure of the creation of any organ means
then we need to consider
the next level of knowledge, so to speak, in this aspect
what when we need
for example, to create some organ or element of the body
then we must consider the position
after all, words again

i.e. if for example the word is reproduced
in the structure of creation
then we can understand

that has the same hardness as the catch
in the management structure
that the physical body is in Infinite development

i.e. where is the action of the physical body
for example in the Spiritual aspect
shows Infinity

i.e. if we, for example, Well there several times yes
we take and repeat the same action
for example I say "that is" several times
then the same physical body
this is an aspect of repetition of a certain level of Reality yes

and in connection with this it turns out
that the body reproduces another
in general, somewhat different
Spiritual fraction of future development

and it turns out that this level is like the next Spirit
this is well the Spiritual word yes or there the Spiritual covenant
converted again into a word of the current tense
Well there for example, this is an external object, yes, some

Thus
when the Soul creates the physical body
there are elements present here
as a direct, as if mechanical creation
as God does
He thinks and Reality is created.

there are also elements of Spiritual development here
in fact, words and through words
and if we want to make a canon of the body
as if in the chaotic space of Reality, so to speak Yes
if I may say so
in general about space in general

although here one can say
what is from God
almost any space has meaning and purpose
both in the initial and final action

those. concept of "chaos"
it can only be a single Perception there

any person for example or an object of information

and when we see
that the creation of the body
this process is still endless
because all information is Infinite
then the position is quite clearly visible

what exactly are Infinite Systems
create, in fact, as if
well, exactly visualized in Infinite space
body
the dense body and the physical body of a person

and here it turns out that the word
it's like a kind of cut
in creating a body for the Soul
i.e. the Soul controls the body
in a word
and then we get Infinite development

in this case for what purpose for example yes, a man needs a word
and what is the difference, for example, from the point of view of that
what is there, let's say, animals do not possess
some large set of words or sounds
and people have

and it turns out that this is exactly the difference
in self-creation it turns out
the more words
all the more so revealed
the structure of the Infinite level of development

but at the same time
one word is already Infinity
a word spoken, for example, at some initial time
gives Infinite time

but for this we need to identify
the structure of the beginning of time
and here it turns out
that the structure of the beginning for example there are creations in their Perception
and the structure of the Soul
this is what protects the body

if we want to protect the body

well, at the level of physical development
then we must look into that structure
which exists
for the next time of creation of the Soul
and goes into Infinity

i.e. it is a kind of ray or something similar to the lotus level
is there some kind of level in the shape of a flower
even more similar to a rocket there
flying into Infinity
from the point of view of Spiritual knowledge

and located near you
from the point of view of knowledge of the Soul

i.e. in this case
Spirit and Soul
create a primary material image
therefore, to obtain a physical body
we must
well again, either directly create
by direct control from the Soul
well just take and create a specific organ yes

glow of the soul
a specific body creates there for example the level of this organ
although this organ is there for example, absolutely healthy

nevertheless, it is possible to use this technology
to strengthen the control system
and for the actual absolutization of the control system
in its action

after all, a person who is capable of creating
your body with your Soul
it is practically independent of external systems

just like the Physical Body of the One God
God creates all Reality
including His Physical Body
and it turns out that He is unavailable, for example Yes
for some kind of defeat there, etc.

and it turns out that if a person learns
in the same way or approximately the same way
create a physical body
then any information system is obtained

it is already an investigation
in relation to this person

and if the flow of information there is even very large
or is he aggressive there
then above the creation system
anyway, nothing happens in principle
is it in the ideology of the Infinite Plan ?

For example there is Spiritual development
and the Infinite Plan of Physical Development, etc.

because at any moment
a person can recreate himself
and that's all

then it turns out whatever it is
information flow
it will not cause any harm to a person
at least it won't cause any harm

but with this level of management
Of course it can be strengthened
task management resource
and in each case the creation of the body
this is the oriented creation of the body

i.e. the body becomes multifaceted , yes

Well let's assume there in Buddhism there let's assume there is an option
Buddha has six arms

i.e. we are talking about the development of the body in the following system
of action

i.e. you can do one action there with one hand
two by two, etc.
but still six, well at least there are six actions , yes

it turns out that although this is an informational level , so to speak
but it is manifested precisely at the levels of the body

if we consider the principles there , such as chakras
some manifestations of systemic levels
these are the levels of development of the body yes
into the system of external Reality

and it turns out that when we speak
about the creation of the body
and we say that the Soul creates the body

and we need to control this process
in terms of the mandatory creation
then we must first of all highlight
any system in the body
well, material, i.e., for example , a cell , some organ, etc.

and determine this organ
as a structure of action
why do we need to create a body ^{there}
in principle, when ^{well} for a person everything is fine there, ^{yes} For example

and if there is some extreme situation
we can do
or Macromanagement through Macrosalvation
^{kind of} logically ^{yes}
and at the same time the body as an investigative system
on the Spiritual level it is a protected system

but then it turns out to be an investigative system

and therefore the structure depends on Consciousness, ^{as it were}
located in the management of the faction of Consciousness
but at the same time it is still an investigative level

and if we need to make a body
absolute level primary
then we must be able to remove it from the body ^{there}
any negative level of the material plane ^{yes}
if it is harmful there
bring any level useful ^{suppose air means}

why do i keep saying this
such ^{as} more general concepts ^{yes}
I don't say there is a specific organ ^{there}
because the specifics are coming together
when you know
external and internal system
what does it work for ^{yes}
from the point of view of the Soul Spirit of Consciousness

and when you start to figure it out
in the mechanisms of these connections
then you see how a physical body is formed around
i.e. if you want to understand
and generally build a physical cell
you need to know where the Soul intersects

with Consciousness
with God's tasks
with personal tasks of the Soul
and enter into the circle of these tasks, so to speak
enter into a structure of intuitive or inner understanding

the concept of "intuition" in this case is action
Well as if oriented towards precision in Infinity
i.e. intuition manifested in that
that at a certain level this is still a precise action

and when you start to see this deep meaning
you see that the body is being organized

pay attention when you think about it
that means over some of your own problems
quite tightly but you feel some pressure
in the heart area
that you decide correctly
you actually see the creation of the body
due to Thinking where the Soul participates

in this case the Soul is an external structure
i.e. from the point of view of this technology
this is the creation of the body
where the Soul is as if from the external system of physical space
creates a body
but at the same time the Soul is always inside

i.e. Soul and body are one

from this point of view it turns out like this
for example, there is an absolute World
and in this World there is a man
Yes, there is , for example, air , some food products, etc.
but from God's point of view
what to create a food product
there the bread is grown in a seemingly ordinary way
through sowing , etc.
this bread it currently exists
as a system
still in the absolute space of God's Perception

For God, every element is equal
what is there a speck of dust on the field
what wheat etc.

and it turns out that there is a person here
from the point of view of what is
some absolute space
namely God
Actions of God
Perceptions of God first
he should act similarly
i.e. he must create himself
create external space
and at the same time rely on your own Soul

then it turns out that the Soul also relies on something
the construction of the Soul is based
to some point of the physical body, including

and this is of course not the concept of searching for the Soul in the body
and the concept of what is a "mutually supporting structure"
for example, the structure of , say , light internal pressure
towards the heart
why does the heart work at all
why do muscles contract yes
from the point of view of absolute space

and because the interaction of the Soul and the body
in the phase of building external Reality
where the body is also a part of the Soul
speaks precisely about the Divine way of self-recreation
in principle any object of Reality

because God created the element of Reality
He created the element initially like this
that often there may not be any significant differences yes
at least in the system of God's Thinking

why did God create at all
the physical body of a person for Himself
to actually take
full control over Himself

i.e. it means creating a kind of, say, control center
which is different means in relation
for example to the elements of external Reality
some control elements are identified
in general, from the point of view of a single center

and this control system is like this
that when you see for example
some distant elements of Reality
then these distant elements of Reality
for God
they are basically at the same distance, right?
from you

and it turns out that if God, for example, looks at people
walking and looking at the horizon
then for Him the elements of Reality are there in the distance
somewhere on the horizon
or does it mean elements of Reality
which are close to a person
for Him they are generally in the same area of Perception
they seem to be closed
God at this moment creates them Himself

i.e. it turns out that we see
such a management system
when in principle we have
a fairly precise mechanism of cognition
how to create a specific element of Reality
there including the physical body
at the same time appoint
the right time
the right place
any object of information
i.e. if we do it right
we create our own physical body correctly

therefore, to create correctly
some cell in the physical body yes
or even there for example there are organs there
or is there some element there at all
which needs to be functional
set its properties
we need it first at the platform level
do not separate the physical body from the Soul
i.e. Soul and body are a single level of control

and at the level of creation, for example, of the word yes
which is , as it were, a kind of external instrument
creating body shape by the way

here you can see very clearly how the sculpture was created
the word practically well as if creating a cut of the body

from the point of view of external contours

this is the difference between the outside world and the word ^{yes}
so for the human body it is that
that, for example, a person ^{there} perceives a word by ear
but he can also see it in the form of light optics

and the difference between the external world and man
for the Infinite Action of God
is again contained in the word
i.e. it's like a kind of sculptor's tool
which is exactly ^{how} the body ^{is} cut ^{out}

why are people different in this regard
i.e. not the same
because the word spoken in one place
that's a different word
although it is the same in meaning

God can also say one Word
but for Him this Word is the same everywhere
He perceives it as one Word
but different actions arise

and it turns out that God was able to create the whole world
literally, for example, the word "God"
i.e. one Word is enough
and the difference appears
because the Word begins to divide the World
on the structure of the external world and the internal ^{one}
and a man appears
and when we ^{for example} start this parameter
Well, use it as an analysis
what is the pragmatism ^{of} this situation?
^{there} personally for us

but everything is very simple and generally speaking specifically in that
what we have to do is just reach the level
where is the first element as I said
Once again, I am specifically talking about this
a state where the physical body is not separated from the Soul
here the given state is such
that you can, for example, not finish a word
i.e. do not pronounce it completely

Well, it happens in many dialects ^{there}
there is no full expression of the word there are no full sounds

but at the same time people understand what we are talking about

this is why it is done

that's what's in the World

well let's say there is some kind of monolithic information system, yes

seminar for example

but at the same time the word is not spoken

for example, completely in audio form

as if perspective management

or is there current management

this word should work the same way

like any other word there is clearly shown

then it turns out that if a person thinks

this also affects yes

i.e. we are an indefinite system

Well For example there a person can say

how does he know how another thinks

but that means the other person's thoughts also influence, etc.

i.e. there is a mechanism that says that

that all systems are manifested unmanifested

always expressed in a clear final action

i.e. for God any action

this is a precise and final action

even if He is there let's assume management does

well let's say in phase there as if initial

from a human point of view

it may be an unfinished action

For example there a leaf somehow fluttered in the wind

but for a person further action

well any one for example it is poetry there

the other did not pay attention, etc.

and for God

this action is both initial and final

and it turns out that here is the limb itself

i.e. the division of the World into Perception

gives birth to the next element for the physical body

the physical body that creates the word

with your presence

in this place and at this time

and then it turns out that when another person
looks at one person
appears there, etc.

i.e. it can be seen that if throughout the history of civilization yes
as if well just build some kind of model
to arrange means to place people
in the structure of word creation
fundamentally new or existing ones
towards creation

it turns out that the whole system will very clearly record
how much space does a person need
how much time
and in principle this is a methodology generally speaking
namely the general resurrection of Eternal life
where exactly is the creative constructive word of the future
creates that structure
that the Soul clearly means manifested in the necessary system
and at the same time the physical body always exists
this Soul has it there

and when we consider, for example,
Well, such a concept as, for example there is "reincarnation"
or let's assume "elements by hereditary characteristics"
information transfer
then it turns out that it is precisely integration
that's exactly the unity
from the point of view of any action
for God
God is One, every action is one for Him

then God understands
what about reincarnation after all
there is an accumulation of information there, yes

at the next level
but all the following still exists
and the preceding

and it turns out that in this theory, for example, of reincarnation
here we can consider such a level
that the body is originally Eternal because
which firstly means there will be a general resurrection
through human intelligence

next levels i.e. next generations
carry the entire structure of the previous development
at the level of Perception

and then treatment for example from some diseases
it's just an alignment of information, as if universal connections
from the point of view of past development
but when the past already specifically influences the future

i.e. the past is as if in the future

and this is a very important concept
here's how to get for example in the information space
sphere

take a small element of the past
any square parallelepiped
and at high speed drop into the structure of the future
just take the following calendar date
or a thousand years ahead
dropped
and you saw that depending on the speed
the sphere will appear
either fast or slow
sphere of future events

it turns out your action leads to that
what are you starting to analyze
and here the analysis also creates a physical body

i.e. your action creates your own body

and when you start to see this structure
do you understand that
and this is generally quite obvious, by the way, elementary
in terms of control logic, exactly
that the Soul that creates the physical body
for Infinite Development

should always have
reverse action tool
from any element of Reality

i.e. we must actually have any form
highlight independently
from your system of perception

and make this system infinite in development

i.e. if , well, let's say, adapt
to a system of specific actions
then it turns out in a specific action
The soul must create
as a physical body, first of all
as a carrier of the next action
and every element of the action

then her job
the work of the Soul will be brought closer
to work the same way God does
but for Eternal development ^{yes}
and the Soul is busy at the same ^{time}
private development system including

and that's when we start thinking about that
and where does the Soul do it ^{for example there is} universal salvation

Well, first of all, in any action
it is still produced unconditionally
but here we can highlight
what exactly is universal Salvation
this is creation and inter- ^{as if} actually creation
here at the level of different Souls of people
that's exactly ^{what} mutual regulation is
i.e. even giving the following form ^{there yes}
social processes, such as fashion, etc.

and when you start to consider
process ^{for example there is a political one there}
in the action of the physical body
and the creation of the physical body by the Soul
then you see that politics
^{well, as an expression of some form of Thinking, for example}
are groups of people ^{there, so} they are directed
precisely in the struggle for power

so here everything comes down to this
that in the control system is already being built , ^{for example}
^{well, some kind of vertical, yes, social vertical}

when we start exactly these processes
^{there are} social political
transfer
into the interaction structure

again with the human body
it turns out that when a person just walks down the street
it would seem that yes, here he is, just walking along the sidewalk
there is a very powerful glow pressure on him
some social some other processes
and all these processes are trying
well, somehow interact with a person

and that's when he can create, for example
your physical body in real time
he can take for example to make control
and there just create at this moment yes
with a single impulse

then these processes are all
Firstly, they are manageable, that goes without saying
but they are kind of extendable
i.e. they are controlled , let's say, into some kind of Infinite development
i.e. a person is constantly in phase
practically active quite positive
for myself
and for those around
creative Macro- you could say creative
such action

where are some of its following elements yes
which he, for example, does not have time to do there
if there is a problem at some nuclear power plant
but he may not make it in time
he is busy with something and he is working on this particular problem

but its action must be laconic and final
just like God does
i.e. he should anyway
by the action of his physical body
be able to do so
there is no explosion at that nuclear power plant

then it turns out that his body develops into Infinity
i.e. the creation of the next element by the Soul
this is an action from the body
through for example the Soul of a person
to the same nuclear power plant
on a certain object of information
which can be problematic yes

and this is where the action begins

well have some kind of reverse wave
what does it mean when the body is already created by the Soul
then the next level
this is that the body is controlled by the Soul

i.e. the Soul is in the structure of external control
so and for example there inside the physical body yes
and is also a body
for the point of view for example there are groups of people there

if there are several people watching
on the physical body of a person
and they see that the body is just a part of the Soul
then one person can consider
the body as an independent structure

and it turns out that there is an internal
Well as if it were somewhat manifested as
more like a reverse law or a reverse point of view
as if an internal point of view

here's if you look inside a human organ
for example on social processes
element of Consciousness
then you get regeneration
i.e. restoration or healing of the organ
or if it's just a healthy organ, absolutely yes
then you get that the processes become calmer

the same thing if you look at it as if
from within the Infinite Development system
then for example there is technology to look at the event
for example through an organ
for this you need
Well, first of all, you need to know
what organ does a human have yes

for example there are no atlases
a person must make management of future events
and understand
what is inside his physical body
then he should make the control like this
which is optimal for the development of the future situation

i.e. in fact he must build yes
structure form of organs there
their communication functions

but then if you think about this process

For example there is a primary impulse
passes through the spine as if from behind
he's going forward
so he should kind of move himself forward, yes
the logic is this
then the impulse of the first control
to build the structure of the organ
must pass through the spine
as if some kind of rigid system

further if you think about this design
what connections exist there

For example there to build a connection between two neurons
maybe it will take a day for analysis

and what about the totality of such actions
like the whole human body
can be built

For example there, for example, by a one-time impulse of the Soul of a person

so here there is a very important element
if a person means he helps another
i.e. he makes some kind of impulse there to help
then this impulse
just the one that is passing
as if through the structure of other people
it already carries information about connections
but from God's point of view
i.e. help is a Divine action

then it turns out that when you start to see
this is the reverse impulse
i.e. Macrosalvation means Macrohelp
you get the whole system of connections
you don't need to analyze
like one neuron there
connected

For example there with human bone tissue

no need to see a specific organ
you just need to do a social action yes
ensuring the life of people
there is your personal life or there are cats dogs
in general, any animals, plants, etc.

i.e. precisely the desire for life
this is the primary level of construction of any organ

so that means you are putting life into the organ
It's clear logically, it's clear anyway

put your life on hold what do you want
for example, to perform some action
well, i.e. go somewhere yes
i.e. the goal gives birth to the meaning and intensity of construction

so the question is why go somewhere
Well, a person is born and grows up peacefully.
he gets the impression
that it is like a cause and effect process
the body grows by itself, it seems to develop as if

but when, for example, to switch again
from God's point of view
for which any element
this is the current level of Reality
what is this atom crystal lattice man there etc.
it turns out that the question still arises here
from the point of view of a person
located in absolute space
how to proceed further

then there is the next element
you can build your own organs
based on the manifestation of elements of external Reality

i.e. you just need to look at
elements of external Reality
Well as if elements concentrated, for example, in a system of spheres
there are trees, let's say mountains, etc. some landscapes
in the Infinite Development System
just translate them into the sphere system
translate them into the future
through the structure there is a look into the past yes
the technology that I showed today
as a system of rapid action

and here it is in front of you
some spheroidal information systems
they can be of different colors

need to recognize for example there are light tones
then the sphere becomes mobile
transition to light
this is mobility, i.e. yes, the development of life
and for example
well, that is, it may not be black, it may be some other tones

so, but still, color matters
let's assume brown is a fixed color

there is light blue
this is already a sharp mobility
in relation to brown , etc.
i.e. you can even see how they work

but light blue
this is already perceived as Infinity at first
when you move on to it
you start creating it
i.e. to form into a sphere

and then you start
all elements of external Reality
take and slowly bring closer to yourself

when you start to zoom in
you form organs

this is how the Soul works at the point of its primary creation
when she first saw that she was created

but let's go further for example
and the point where she still herself for example Well as if I hadn't considered it, yes
She still has to perceive herself as something

i.e. there is some, for example there
coordinate axis
initial creation time
but before the initial time
The soul must still perceive itself somehow.

by the system of general connections
There is always a connection between one phenomenon and another

and say that let's assume the Soul
at some point did not exist

it turns out that it is logically impossible
if it is created
her information always intersects
with all the past
as an optical communication system
it's very simple

then it is possible to treat any disease
it can be done quite simply
found in the past

just one concentric ^{one}
^{Well as if} or just an acceptor point
or a concentric point
it looks like a system of circles
or has some other name
you don't have to use words at all
to find it

that's when you already know how not to use words
this is already a fairly strong level of management
when you can create the next level with a word

i.e. for example there "everything will be fine" ^{yes}
and this word turns into action
it really becomes normal
level of development of the following events

and basically as soon as you move on
along this axis
^{Means well} actually creating life ^{yes}
or there are organs of life, so to speak
your own ^{there} or can you treat it intensively

you start to see
that is enough ^{for example} reserve
any in any organ to increase to Infinity
then the concentration of light in each cell
becomes immediately, well, practically Infinite
it's true that there is some level of accumulation

i.e. the cell is gaining and gaining
some amount of ^{information or energy,} so to speak
actually just light
and through some certain limit
then the cell constantly takes already
i.e. there is no cell filling, ^{for example there} with light

and this is already becoming very canonical
in this case a system has been created
which allows
through external light through external projections
through structure search there for example in the Infinite Past yes
find all connections within the physical body

and when you, for example, touch
to the physical body
or there considering internal systems
find all connections at once
through the logical phase of Consciousness

where the Soul is also an element of Consciousness

then you build organs and you understand what they are
i.e. you see them well For example there
as for example in a holographic picture
or it's just like in some atlas, for example

and it turns out that when you, for example, do some action , yes
Well there is touching of the body
you can through touch
through the structure of the physical level of cognition
understand
how are all your processes connected internally?

i.e. what do the organs look like
and how can they be created technologically then?
not spending there for example there is no time for that
to consider for example
some external structure
but they just saw the organ
they just made a concentration there of will yes
the organ was created by all

i.e. elementary action
the real structure of Consciousness
which perceives the external world
creates in real time
your organ

as soon as you increase your Consciousness status
to the level
or there let's just say you're considering it
such a level of Consciousness

or functionally define your Consciousness this way
that your state is simultaneously a creation
and internal organs ^{yes}
and the outside world
then you see how God works quite clearly

in this case you see this
so ^{densely} and ^{clearly}
as we say ^{there} if we consider
that God is a plowman who plows ^{there all the time}
it is clearly visible
how does he do it, ^{well}, in the form of a man
then you can watch this picture and understand
Well, it's good that He has a plow ^{and so} does God
when you look at Him like that

but then what is this plow for you?

i.e. in this case you have considered
the structure of body creation
but for you it is your physical body
i.e. God has a separate instrument ^{yes}
for you it's the same thing

and when do you start
^{for example}, consider your physical body as
as a tool for achieving
^{there are} some elements of future development ^{there}
then it turns out that there is, ^{let's say}, some external information, ^{yes}
there is a certain personality system
which is always above
Well ^{as if} in the area of control over the physical body

and this is exactly what ^{Macromind} is
which is also your Mind
i.e. Macro-Thinking ^{and} Macro-level
OR ^{there} Well, the concept of, ^{let's say}, "Higher Reason" is introduced ^{there}
in this case it is what God thinks about you

and when you start to see ^{for example}
what does god think about you
you see that your Thinking
here is the structure of the correct solution to your problems
is no different from God's Thought towards you

so that you understand

Are you solving the problems correctly?
you need to see what God thinks about you

and it turns out to be counter
counter thought ^{yes} God
this is your way
^{Well}, logically it is
God's thought is the development of your events
so it turns out that the Thought of God is quite easy to determine

so the main thing is if we consider
the level of ^{let's say}, Infinite development
exactly as a level
from God's point of view
here is given the canonical level
and God always gives
namely the creative system of development

what's the difference then
you see the Thought of God
you know what he gives you
and why then, ^{for example}, do people have it?
some, ^{let's say}, non-canonized forms of development
why ^{well} he could take a man to go ^{there} on the way
which is the Thought of God

^{Well}, that's why
that firstly a person is free, he can do ^{yes}
go anywhere and do anything
but there is still a technological level here
a person still needs to know in general
where to step for the first time

i.e. how can one rise to the level of God's Thinking at all ?
it is precisely the element of the first step

so that's when the Soul of man was created
the person perceived
that's exactly how your own state
my own creation
what exactly is the first step element
^{well} from God's point of view
i.e. knowledge immediately embedded in the Soul of a person
By God

and that's why here, for example, when I asked the question
how does the Soul perceive itself in general
to the level of its first element of creation ^{yes}
then before the origin of coordinates in time

so this is the knowledge of God
and when you start to see that aspect
then it is clear that knowledge
this is already just an infinite quantity

and that's when you start walking
into the structure of the development of future events
then it's enough to just have
exact knowledge correct knowledge
and Infinite development is ensured

i.e. to see the next status of the job
Souls for the creation of the body
you need to see that this postulate axiom actually exists
that need to be passed through
and a postulate and an axiom, so to speak

for the Action of God
concepts can be combined
although they may be different

and then you see that the combination of any concepts
there is transformation and construction
next substance

i.e. you build as it goes
or as it turns out
or how it manifests itself in general
control system from your physical body

here I am, so to speak, for the first time actually
I introduce this angle
at least in the form of a control system
what is the control system
it's like an external independent system
i.e. it exists on its own
well, that is, there is, for example, such an option
what if we are at some level or there to action
we strive in the form of a preceding action
i.e. naming a small part of the action ^{yes}

for example you can say "to the tap" there
which is a kind of control panel
there Well, there's a construction crane at the construction site.
it means the person is moving
can say that this crane is approaching yes

you can use "k"
those. action of vector type "to"
or can you use static
the crane arrives by itself

but there is a certain point here
which in principle is this slowdown "to"
time from the sound said there yes
until the next word
this is what we can see
the whole structure of the creation of the World
it is in his complete Salvation
between one sound and another
there is all the technology to save the world

and when you start to see it
then it is clear that this is precisely technological
in fact, the whole level of knowledge
it is actually laid out in the structure

as for your actions yes
so are the Actions of God

i.e. there is a level
where is the Action of God in creating your Soul
this is a manifestation of your body
but in the Infinite level of development or something

i.e. what is knowledge for the Soul
how can the Soul even
pass on knowledge
although here is a logical postulate
that information is always connected
but there is a primary point of action

then it is clear that God had to create
some final actions
there is a movement of the hand, a movement of the body
so that this system of Infinite connections
to make it means to make it develop into Infinity yes

i.e. the final value is obtained
it's just a property
Well, Infinity is generally understandable
that this is a property of the Infinite system

but then the treatment of any disease
it's just for the whole
bringing the structure to True status
i.e., precisely the creation of the status of Infinity
for example organ

so the next element
creation of a human organ
under the action of the Soul
this means formation
i.e. the creation of precisely the area there inside the organ
and such
which is precisely the Infinite level of development

and for example well at the moment of control
I need to create some kind of organ
or some action yes
and then I start creating it
I have to fill this place
where is this organ located
as if it were a real material environment

then my question is where can I get the material yes
for this place
and then if I take matter
why does this matter immediately become
in the right place at the right time , so to speak, yes
and the required volume
and why does it start functioning right away
correct for example Yes

after all, the task of action
this is correct functioning

and God does the same
people have a synchronous correct
well, there's some kind of system of interaction between organs
well in case of diseases there
there may be some nuances that can be restored
by management there or treatment

but nevertheless this is what we are talking about
that's where the correct information comes from

so here is the correct information
very often it comes from the fact that there are other people
which have this function
and in fact at the primary level
here is the correctness, so to speak, this is any element of the external world
in relation to a person

i.e. if any element did not have this function
then naturally the human body
in absolute coordinate system
would not be so stable
not a single object in the information at all
would not be so stable

therefore between any objects of information
from the point of view of the Soul
in the space of the human Soul
exist
very specific connections and specific manifestations
i.e. the connections are very precise, in fact unambiguous
one air molecule ^{there}
interacting with the human body
in this place
can only interact in this way and not otherwise

and then it turns out that we
to change the management structure
to a better area or to a better level
we must distribute very clearly
where is the space of action
and where is the level that is given by the space
as if he is in charge ^{yes}

then it is clear that we should do it so quickly
to have time to change the structure of future management
that's basically it
this is the space of action
so that it is not torn apart
with control space

the same thing happens for the Soul of a person
and the human body
i.e. the action of the Soul is so fast
in relation to for example yes to the action of the physical body
that there is no breakup

and as soon as we start
the intensity of these connections should be increased to the maximum
i.e. to increase the exchange of information
between Soul and body

then it is clear that the Soul that has universal knowledge
which directly has
level of action from God
and created by God
naturally carries all the information about the organs

it is enough to just increase the exchange rate
exactly as if that exchange level or
well, how to simply increase the speed of metabolic processes
you can simply increase the exchange technology yes
by speed

as if at all at the moment in time
create different technologies
Means Well as if at the same moment
a lot of different technologies
which would increase the speed anyway

then it turns out that we don't need it there
it is there that you can create cell by cell
it is enough just to make an impulse of creation
and the organ was created

there is an impulse of creation
the body was created
currently under control
and in information
and really yes
when all information influences Reality

then it turns out that here is the accounting
namely external and internal connections
and the ability to, for example, make control of the Infinite yes
in the final act
and super-fast from the point of view of the Soul

allows you to create
namely the Eternal harmonious body
which works works Spiritually
which is not different in the Spiritual sense at all
from, let 's say, the natural level of development of the body

i.e. it is your body, you just control it

and in this way it is possible to build
a very powerful control system
which does not depend on external circumstances

This concludes today's seminar.

Thank you very much for your attention
