

GRIGORY GRABOVOY
The Teaching about God
Development of Soul abilities
15.08.2004

Hello again
the topic of my seminar today
this is my Teaching about God
Development of Soul abilities

In this topic we are considering
such a control structure
that when we consider the Soul
as an Infinite and Eternal construction
actually from God's point of view
The soul always has all the parameters initially
i.e. the concept of "development", for example, of certain abilities
or methods of control from the Soul

after all, the concept of "ability"
This is also a method of control
from the Soul

all these concepts are actually included
into an autonomous system such
what does the action of the Soul in Infinity mean
or the action of the Soul within the framework of some local system

therefore in this topic of management
First of all, we need to consider that process
when God doing let's assume some kind of management
He does it after all.
My soul is like this
that control is implemented
as in Infinite Phase
and for example in the structure of Eternal development
God himself

i.e. in the Infinite phase for all
and at that level where God develops Eternally
from the point of view of, as it were, external observers
Well, from a human point of view, for example
any element of information
and generally speaking for God himself in essence

that's when we talk about it
then that's exactly the question

what is God essentially
i.e. how does He perceive Himself at all ?
in this process

This is the principle that needs to be understood
to develop precisely the Soul's abilities in management
and at the same time you need to look at everything
How God Feels the Creation of Reality

because when we talk about creation
for example the next level of Reality
then from God's point of view
this is also an action of the Soul

but God has such a Soul
that the concept of "mode of action" yes well some abilities
this is also an already known quantity

i.e. the difference from a human being is that
what is this action for a person
i.e. the development of abilities as such, yes
and for God abilities are a way of acting

and therefore when we talk about the method
this is what He initially shows to man anyway
what is the basis of this method, for example?

and it turns out that if we want
for example, into some kind of control system
let's assume there are different health systems there
there are different training systems yes
contribute
level of Infinite development
then we have to see
how is the method itself
under which God realizes the action
originally built by God himself

i.e. for God
the further we develop this idea
in the knowledge of His Action
the closer we come to that
that everything is known to God

and the closer we bring this value
the more famous it becomes
this is the very value

i.e. the action reaches the level
generally speaking, mechanical optical action
known quantity
when approaching optically
becomes even more famous
because she was just closer

and based on this
it turns out that the dense human body, for example,
this is the concentration of knowledge

and when we start looking
how is this knowledge distributed yes
in the control system
in the information system
then it turns out that we see
the actions of the human Soul in this way
what does the Soul mean it acts
firstly, by analogy with the Soul of God
i.e. builds all the intermediate information
but it is precisely the concept of "development of the abilities of the Soul"
Well as if in the general understanding, yes, for example, the Soul of a person
if the reaction of some object of information
and that's exactly it
it is precisely the degree of reaction towards Eternal development
what is meant is the development of abilities in this case

then this phrase implies that
what a person controls
as a state of the Soul
i.e. where is the Soul at the moment?

and in this case we are considering that process
what can be considered development of abilities
only in that case
when is the Soul located at all
inside the physical body
from the point of view of optical luminescence

i.e. the Soul must be clearly identified
as a continuous optical structure

with body
but located specifically inside the body

so when it comes to Eternal development
then any next action of the Soul
i.e. it is enough to see the Soul as if from the outside
in some place
or think about something

and then as soon as a person sees
where is the Soul and where is the action
then he already has the next element of life

the concept of "Eternal development" is based on the fact that
to sort of recognize
your Soul actually yes in the next time

and when we start talking
specifically about the abilities of the following , for example
more developed ones there
On the one side
anyway the Soul is already infinitely developed
but on the other hand, this is precisely the optical action
i.e. emanating from the Soul into the outer World
this is an action that God does

and the only difference is that
that man was originally created
God and the Soul of God
he sees at the same time
as the status of the original creation
i.e. the status of your Macrotasks
and which he can then actually also take under control

meaning the tasks of the Soul
i.e. well, it is clear that there is a task of Macrosalvation
and here is the personal task of the Soul

then from the point of view of this technology
you can actually restructure
earlier global tasks

i.e. personality always has
some fundamental tasks
why is there such a concept
there for example, "karma and action" there "reincarnation" etc.
i.e. there is a range of tasks that the Soul solves

within the framework of the current situation ^{there}
let's assume, within the framework of the general tasks of the Universe

and it turns out that these tasks are very massive
i.e. they have a very high concentration
at the point of creation of man in general

so when we talk
about the development of the abilities of the Soul
then here is an important level of development
is the ability to influence

on their own ^{tasks}
that you set for yourself
^{for example} during the creation period
or even before the beginning of the creation of the Soul itself

i.e. you say it turns out with that word
which God speaks

and when you start to see it
then it turns out to be very simple
generally constructive in management
like a system

when there are some private tasks ^{yes}
in a person
the usual ones that arise there in real time
from a human point of view
they may be more important ^{there} somehow

and to optimize this process
these are ^{like} macrotasks
and the tasks of the person himself in the current time
often you need to be able to vary these Macro levels
the person himself
^{as if} Macro unification of its information
the tasks of his Soul

it turns out that this can be done
generally speaking, only by the Soul itself
i.e. development is obtained
the ability of the Soul to self-regulate
although I say that such ability exists initially

in this case we are talking about
that we have this ^{function} of Consciousness, ^{yes}

from the point of view of the Soul
we activate to the level of that
that the Macrosystems are starting to move

i.e. well, a simple example
a man walks along the road
he needs to do some act of salvation
For example there to save the nuclear power plant from explosion yes
at the same time the Soul sets those tasks
which always allow you to Save the World

i.e. the Soul naturally does not limit
human action as if in principle

but there is such a moment here
what if this moment for example suppose Macro Salvation
Is it possible to somehow move it away?
i.e. you know that there won't be an explosion, yes
there is time for diagnostics, etc.
there for the transmission of information

then this is where such a moment arises
that the realization of the earlier tasks of the Soul
as a rule these are tasks as I said
already during the organization
they can somehow modify
your action information

i.e. your events may be there or delayed
which you want to get faster yes
or is it somehow modified?
there for example by form by content often
i.e. you need to do, for example, a specific action
and then some details arise, etc.

then here's how to get it
precision of actions ultimately
we will still have to regulate this Macrostructure

and then you should develop
level of your Soul
to the level of actual self-organization

i.e. to see how God is in general
organized His Soul from the beginning
i.e. For example, he looked at the neighboring segment there , yes

by organizing your Soul
and each subsequent segment

Well as if pre-capturing
and gave the properties of this design such
what does it mean His Soul was controlled all the time

i.e. it turns out that if we are here, we won't be able to
consider such a process

as a process, well, sort of Well, it's chaotic.

Well For example there if the process is something like that
if you look at the waves, there are some raging waves there
the process well there is some chaos there yes

and this is this process

there is some kind of rage or something from external information
can be recognized very easily
the systematic nature of this process

when we see the process of organizing the Soul of God

i.e. this process is like this

that we are precisely on the process of the action of these waves

or what? yes information

from the point of view of an outside observer

or [...] the waves are raging

this kind of raging chaos of sorts

we will be able to take control very clearly

if we see how each neighboring element of the Soul

organizes each next one

those. this system is like this

what does it mean that we can consider the elements of interaction

where one element organizes another yes

but at the same time we can look at that level

where we see specifically the Soul of God

i.e. we see God himself when we see

that the process of organization is like this

that you actually through the so-called

well maybe for an outside observer

chaos so called yes

you see

how does God create this system of action

and why is this system so different

i.e. the next level is always difference

i.e. God creates the external world like this
that it allows you to actually organize management
through the system of differences

and in connection with this it turns out that the difference
this is for example there is the next level of human realization
next level of action

so that's how to see God
through all systems of action
not only there through some chaos there
but also through some standard systems
there are trees, soil and horizons
and see God all the time
with the inner eye, yes, with the Soul

you need to develop the ability of the Soul
recognize in some chaos
in some seemingly random events
it is the Form of the actual Action of God

i.e. His Single Form
this is something that is always visible
and this is exactly how He works

and here [...]
It is precisely in such actions that we can actually say so
on the Action Face
i.e. as if the Face of Action yes
we can see the structure very clearly
where there is systemicity at any level
i.e. then it turns out that exact knowledge of the future is yes
guided clairvoyance

this is the level that allows
in fact, we have to solve those problems
which in general Well, they can't be solved
if you can't manage
exactly any system of the World
including the system of organizing one's own Soul
original
when you set Macrotasks for yourself

if at the time of installation of these Macrotasks
when the Soul, for example, considers a future picture
and starts in some cases
let's assume to somehow react functionally

or there is a compression element going on there

then a person in the future
this is such a peculiar feeling
from what it means exactly was the reaction of the Soul
well, the one that is needed in the future
Well as if to the level when it is necessary, for example, to organize
its linear system

well, that is, when there is no compression element, yes
Soul spaces

then the compression can arise from that
that a person enters
into a real control system
and there are, well, still forces of destruction there

it turns out that this is how it can be done
precisely to remove the elements of impact
on the Soul of man

i.e. the principle is very clearly demonstrated here
what when we say

about the elements of influence
on the Soul of man
it's clear from the start
on the Soul, generally speaking, really, except for God
no one can act at all ever

the only question is what is the Soul
selects or recognizes some system and accepts it

so here is the impact
this is an element of producing a kind of unique quality
differentiation of a certain event by the Soul

and here is the development of the ability of the Soul
in differentiation of events
this is an element that allows a person
see your future first
and at the same time create this future
i.e. creation and fixation are one element

so if you go deeper then this is God
further specifically personally God
and in the Perception of not only one person

but God is precisely in the Perception of virtually all
without exception, by the way, God Himself too
i.e. God also sees Himself

when do you start

Well, it is precisely in information that He sees Himself

when you start logging in further
then you see your own path
like the way from a child, for example, yes
then comes growing up
and at a certain level
when a person is still a child
you begin to understand
that growth is also development
i.e. the growth of the human physical body
this is logically also the development of his abilities, yes

then, observing a simple analogy, as it were

in general, there is no such mechanistic principle

you can follow it very clearly

Laws of development of the abilities of the Soul

i.e. there may even be identification

and not necessarily such a clear concept as "development"

so in general the methodology of action is very simple

consider your own growth yes

your own development

for this you need to select that state

for example, being in childhood

your body was in that state

that the body and the Soul are one and the same

such conditions happen periodically

Well, cyclicity happens sometimes

there at 12 years old it happens once every 3 years
depending on the situation, etc.

i.e. when from God's point of view

Soul and body are one

although in a linear sense

the body is a part of the Soul

but when is it the same thing

i.e. there is no difference as it were

and when this, well, some kind of difference
i.e. even the personality in this word is different

and this system is like this
that the personality is actually one
just like there is One God

then it turns out that these glare yes
different personality systems
this is precisely the difference between optical shades
in management
here are revealed as systems of self-development of the Soul
in terms of action

i.e. God, He always exists from the beginning
and His Action
manifested for Himself
as the Action of the following persons in essence

and when you, for example, start to ask yourself a question
why is civilization organized this way
then it is clear what the next action is
God allows us to , so to speak, objectify ourselves
processes of Eternal development
what is external surveillance
there is , for example , observation of people
God himself

and His participation
therefore it often consists of
that He just gives
from the point of view of an external observer
some separate control systems
well, i.e. it corrects some optics somewhere
such a small one, as it were, yes
and the whole world has the following there
there are a billion years of development there

i.e. for God it can only be a single action
as if in the root system of events
and that's all

and it turns out that we have a similar picture here
in the development of the child
there are some strokes of the Soul's action

i.e. the Soul actually begins to realize the whole World
at some point

and this Consciousness is on a certain part of the body
always saved

the truth happens in different parts of the body

this is how this construction is revealed

that's why when they ask a person there

"And where is the Soul, for example ?" yes

a person he can often feel especially in childhood

some local areas of the body

and therefore when we talk about it, for example,

how to apply this at all yes

this concept or this technology so to speak

then it is possible from these areas as if the body

so it's like such an analysis into the past yes

go to the structure where it is going

this is the formation of the impulses of the Soul

where the Soul merges with the body

and then it's completely clear

what to change the Macroposition of the Soul

it's often quite simple

it is enough to pass on Perception

as if through, let 's say, a child's gaze, yes

through childhood information

consider the principles of Infinity

i.e. log in to your personal organization

For example there for 3 years yes Well for example there before conception

and see how this system works

where you haven't been organized yet

as if from the point of view of collective Consciousness

and the system of the future

how are they connected at all by what connections

because from God's point of view

you still always exist

i.e. and having found your coordinate system

i.e. where you are in this information system

in short, where are you with God

and then you begin to understand

that your personality is united with God
in His Action
just like the Infinite World is arranged there, for example

i.e. you begin to learn the Laws of the World naturally
without straining and knowledge is already yours personally
and then the Soul develops into the path of your development

after all, the Soul can develop in different ways
For example there to study external knowledge yes
and when it comes to
about the harmonious path of your development
then this is the way of God
for God develops only in His own way

and when you start working like that
then any design becomes surmountable
i.e. your action is the original action
even to your organization

then it turns out that at this moment you
you can move it with one impulse
there it's like simple
well, in the form of , for example, a glowing cylinder there
just hemispheres, for example, even spheres
or just light
shift exactly this Macro- or what regulation
and its own

because it often takes more time
to somehow, so to speak, modify it
or somehow take control
own tasks

because any external tasks
they can be very simple yes
but from God's point of view
for Him it is as easy as any external task
i.e. for God it is all the same

i.e. God, in principle, seems to lack
this is a task in itself
He organized himself and what difference does it make to him?
that He will change his earliest tasks
or He will introduce new ones here and there

they are completely similar
from the point of view of management for God

but for a person there is
choosing a linear plan
to do as God does
he must be able to Macroconstructions
instantly means Well in general, take control
take control there
maybe there is a remote system there
approximate
and be able to equalize
current action
and the action actually which is well there
there for centuries, millennia, etc.

and as soon as he has this system of equalization
begins to learn
then here is the way already
in this case we are talking about
about the way the Soul acts
it means it will be such that the abilities themselves
to action for example there with Soul
can develop their own Soul Spirit
i.e. there is introduced such a concept as "Spirit but already Soul"

and when you start to learn this level
then it is clear that this is the system
controls almost any system
your so-called strategic earlier connections

and it is worth only this Spiritual basis of the Soul
bring into control
then it is certain that any control is implemented
By the way, this is a powerful mechanism for healing people

because you just have to enter this system
It is clear that health can always be restored

this is by the way generally speaking
a powerful tool for solving any problems
the only thing
if some tasks seem unimportant to you
then there is no point in touching on it
this Macroconstruction of one's own Soul

and therefore there is development

internal abilities of the Soul

i.e. recognition system

when the Spirit of the Soul or ^{there} further you can continue ^{yes}

there we assume the body of the Soul the physical body of the Soul

and then it is clear that your physical body

own action, ^{in general}

i.e. you reproduced the body yourself

and it turns out that your action is like this

that you can easily make such control, ^{for example}

that processes which ^{for example} are not defined

as if from the point of view of information ^{yes}

processes where ^{there is no word}

where information is missing

Well as if the initial level of the development of the World in general

and this level from God's point of view

he also has equal status in fact

so that these processes were

in society, ^{as it were,} objectified ^{yes}

so that there would also be words there, ^{for example}

so that it would be there too

a certain system of life development

then it turns out that the simplest status

^{means} to make it so that the image ^{of} a knowledgeable person

was located

in the early level system of development of the World

and when do you start

in general, even the image of a person as such, ^{yes}

to bring out into this system of the initial development of the World

then you see that the solution to this problem

in fact, it's not just a solution to your problem, ^{yes}

but also the solution to that issue

that in an earlier state

The world had

Well as if so let's say there are fewer connections ^{there , yes}

and it turns out that from God's point of view

The world is always one and united

and it turns out that for a person

these are ^{what we'll say}

systems with fewer connections
they are like this
that your task is still to be able to equalize
as if from the point of view of their actions
this system where there is less number of connections
i.e. an earlier, as it were, World in development
and the current World

and when you start to understand this system
that the development of the World is a contact
well, like, technologically more advanced systems
or there are less developed ones , yes

you can see it here
how does god create anyway
different elements of the world

i.e. you can enter that structure
that God is always trying
as if a less developed system of the World
make it actually more developed

if this is the system
starts well how to resist there or not want there, etc.
then the following problem arises
after all, God originally created the World
and He knows all its properties yes

then we get these less developed systems
this is a property of learning for all people

and for now for example well at least one person
does not know how to manage the whole Reality
from the point of view of the person himself
then it turns out that the World has something after all
the characteristics are not completely stable there
for everyone

the task of management is to
something that a person perceives
then it is he who should enter
into a full control system

management including the past
if there are any global Macrotasks

so it turns out that we are talking about that
that he must realize these personal Macrotasks
and make it possible to control any system there

and therefore it turns out that here is controllability yes
full controllability
system
information
this is real
actually a necessary value
It is precisely from the point of view of technology that there is Eternal
development

logically it is clear that this is necessary
but this is also necessary from God's point of view

i.e. God, so to speak, specially created Eternal development
so that people can do everything
were able to control any Reality

it turns out to be Eternal Development
this is also the management of God
and He did it precisely for that reason
so that His ability may be transmitted
to people as fully as possible

at the same time, the whole world is like the person himself
this is what a person perceives and how he perceives
his personal world
and the world of another person
God's World
all these so to speak worlds from the point of view of Perception
as people separately
and the participants in this process themselves
as if inside my own world
a person can perceive Reality

these processes add up to Perception
already actually of this kind
what from the systems of Perception is reproduced again
a person is actually born

and that's when we want to understand
how is it organized in general
Soul of the next person

how does the birth process happen in the first place

then here this mechanism is just open

development of the ability of the human Soul

see the future for example

the next person and the child

this is an element of the creation of the human Soul

where the opinion of the person himself is already involved

and it turns out

each next Soul is always like this

that the opinion of all those Souls is taken into account, in fact

which already exist

and the element of the next development of the Soul is obtained

next yes already next

in fact, as if the abilities of the Soul

revealed as a result of Infinite Development

they are like this

that since there is a goal of Infinite development

then Infinity itself

this is a consequence of the work of Souls

here is the information of Infinity the information of Eternity

i.e. it turns out to be a product of the work of the Soul of a person

is Eternity

just like well For example there is a product

means the growth of trees and vegetation

is oxygen

and when does that mean in this case we start

for example, consider the process of further development of the Soul

then it turns out that the Eternal Soul reproduces all the time

before you the events of Eternity

logically and so it is clear

that the Eternal Soul of course it is located

as if on the Eternal platform yes

it means it is clear that any event is Eternal

you can develop forever

but to understand this technology

it turns out that we must definitely understand the system

that's why, for example, systems are not as developed

entry level world

sometimes they cross, for example there are developed

it somehow

there are systems of destruction after all
where the world is actually well let's say so

or not developed
or is there any attempt to bring it
into a chaotic, i.e. disjointed state
already systematically gained level yes
Well there any war etc. is destruction
this is a simplification of the system

and it turns out why, for example, these systems
let's say they reproduce anyway, yes
in some situations

i.e. the answer can be found here
Well, from the point of view of the struggle, let 's say so
information management
with such a phenomenon as it means
destruction at the macro level yes

here the very concept of "struggle" brings meaning
that this system should still benefit from this
and develop as if for the better
i.e. since it cannot be entered anywhere
and there is no real destruction

i.e. here it turns out we are looking
on the Soul of God
which exists forever
It reproduces itself in Eternal time yes
and here for the Soul of God
Eternity and action are the same thing

i.e. if for the human level
Eternity as I said can be considered
as the level of action of the Soul
and the product is Eternity
then for God this transition is
this is a person's personality, his internal characteristics

that's when we ask ourselves the question
what is personality anyway
from the point of view of God and man
and how does the personality look in general
in your own mind

where is it located in the information

the definition is not some kind of social personality
and personality in essence
personality as it is born

then it turns out that this is the task of the individual
it is to control the structures of all people's Souls
and at the same time the ability to see God as He is

that's when a person's personality is yes
sees God as He is
then all processes for others are standardized

this is the level of Macrosalvation of the personal plan
and such a relaxed level is natural

the main number of people
is located the main time
in such a state

it's calm well as if even a relaxed state
there are some incidents, etc.

and then it turns out that this is the natural state
this is Eternity as if distributed among all

Well , people reproduce Eternity, yes
and at the same time the fragments there are elements
distributed, well, let's say
as in some kind of social distribution system
between each

and that's when it's already going
the reverse element of the translation of events
here is a concentration of events
and it is on the platform of Eternity
then people each get their own event
and everyone gets their task

then here is the management of this fact
at the moment of creation of the Soul
why do i say that all information exists
before the creation of the Soul
The soul of man sees the future before creation

because it is created taking into account an already known design
Eternity, when reproduced , already exists.
i.e. it's understandable

i.e. a person if he is not yet on some path
but he knows that this road exists in this city
then he may not enter the city
but the road already exists

and it turns out that at a certain level
everyone perceives this early
it is not necessary to have a factual level
for this level to be perceived

the same with God
not necessarily for example as if to be manifested Infinitely
there anywhere
but it is enough to be manifested in one place
and then He too is everywhere

i.e. here is the concept of a certain "emptiness" and the concept of "vacuum"
or the concept of , say, some kind of "third magnitude"
Well like where, like, it 's not clear at all
what's happening
where is what

this concept can be excluded
out of circulation out of use
just because
that there is a possibility to develop the ability of the Soul
to the knowledge of, as it were, third quantities
which are not clear now

because the Soul already contains this knowledge
and the only question is
that there is a return to this knowledge

i.e. there are no and cannot be places
which are generally incomprehensible
even just like that, even just like that, it's not even a little bit clear
not to mention that they are radically incomprehensible

and based on this
because your understanding allows it
to perceive any thing as an understandable thing

make any phenomenon understandable
then this situation arises
that your Perception is involved in the creation of these things
in my own understanding, in fact

i.e. participation of any person in any event
it's like a cross-section of his perception
any design of events

and it turns out that if a person participates there
in some Macro event
there is no typhoon somewhere yes

then it is enough to perceive the general information
For example there is a program on TV
but it is not necessary to see a typhoon

he may be somewhere in the future
but this connection is in the current time
and some kind of system
there is a segment of a TV show about some typhoon
such that it is enough to understand at a glance
what are you talking about
there in front of you, for example, is just a frame from some TV show
and internally you understand what you need to do
so that there is no typhoon

i.e. understanding often disorganizes
this typhoon hasn't even started yet
i.e. the main number of life processes
is based on the fact that standardization occurs because
that people understand and see what can happen
and they know how to disband it

and when do we start
for example, analyze this process
as a process of human action
as if it were a conscious action of people yes
it turns out that to understand the processes of Macrocommunication
it's often quite simple
here it is quite easy to follow
the return path is like a path to oneself
where do you start to see
next action
before the action was organized
by someone or at all it may have been organized

i.e. you begin to participate in the process harmoniously
you don't necessarily have to do it all over again
there to carry bricks and build houses yes
there are often ready-made designs
they can simply be folded

exactly like the element of Peace
why is it arranged as if it were manifested like this
in a massive way yes
the level of the planet or the level of action
because the folded elements of Consciousness are as if united
provide a kind of convenient structure for the development of life

and it turns out that
it is not necessary to do the same as God does

keeps everything going all the time
in the system of one's own Consciousness
and organizes yes in the current time
it is enough to use already known constructions
for a person

and here to be like God
a person begins to apply
intellectual resource own
to develop abilities like God's
but he is in different conditions

he is on the planet
where there are finite spatial elements
where there is as if well, some kind of mosaic that has already been put together

and it turns out to match your level of action
by the way, it is necessary to compare
to allow or create the next action

in such a system this is the task
as if even some kind of super task
changes not only of this Macromanagement
which exists in the Soul
and often this Macro task is good
The soul usually does not put
some kind of unsolvable or unnecessary problems

then you can log out here
where you can find exactly the Macro-supertasks of all Souls

any Reality at all ^{yes}
of all Reality
be able to output too
to the level of own management

this is exactly the real control center
where you can manage the entire world at once
and specifically from your Soul
having developed a simple ability
as if on a mechanical optical level

i.e. the optical level is extended
which is like Well, the core of the Soul , then
and in the body in general in any other place
you start to see
that the Soul is a very strong structure
what is this power structure
this is power

and that's when the element of power
you start to visualize
it turns out that the management of the outside world
these are basically like this as if lever-like
it's like some kind of level
similar to lifting some kind of weights

i.e. you can feel a wave of tension ^{there}
changes in the external world
and here's to change the design
needs to be done often
just a linear deflection of the system

i.e. here is the external wave
the whole outside world
all events are known to you
to change an event somewhere
you just need to make a bend

and here your Soul is resting against that structure
Well It's like a hemisphere, like a bow

rests on that design
what we have here is a system
how can we say such an action
what is this
and by the way it rests in the place where it needs to rest

in the optics of your Soul

i.e. it turns out to be a collective Consciousness
forms the uniqueness of the possibility of action

Well, for example, if you ask yourself a question
how they protected themselves from that in ancient times
so that an arrow shot from a bow For example
didn't hit the person there

they just did a kind of reverse system
Well as if in control
if you look at how people managed before, yes
how they manage now
Well there are some fast objects there
and considering that there is so-called chaos there
so it is still a system in essence

that's why God created
so-called chaotic processes
so that these elements would be elements
simply divisions of the elements of manifestation
as if in the collective Consciousness
namely the elements of Eternal development

and it turns out that if we understand correctly
the system of these joints
then no chaos occurs
there are no tornadoes, no volcanoes , no earthquakes, etc.

i.e. to stop an earthquake, for example
It's quite easy to see everything often
cause and linear effect
why is this happening
i.e. find the logical [...]
understand this phenomenon
and that's all

and it turns out that here
how i just took such an example
what if for protection from bow from arrow yes
which often wasn't really that striking there
due to the weakness of the action
there was one technology of Thinking
for example, it has changed somehow, yes

if we are talking about the fact that there are some planes

there are other fast-flying structures there, etc.

then it turns out that here

Well there are external structures like bullets and so on.

then here's to understand

a person mean in the conditions of such an action in general

when there is for example there are some military actions there
rapid-fire systems, etc.

how a person must survive in any case

because the human Soul constantly accumulates

after all, Eternal action for man

how to make sure there is no earthquake there

so that a person actually survives

under any combination of events

and the Eternal number of years

then in this problem

it is enough to follow

level of reaction of Thinking

as in one case a person thought

as in another

as he thought, it was quite clear

to protect yourself from onions you need to

have, for example, at least armor, etc.

and when we start coming

to the material calculation, yes, as if means

its existence and development

then we see why and how steel is produced, for example, yes

why exactly does such a thing as steel exist

and in general why exactly a certain person

took and mined the ore at some time

you can even time it down to the second

when did he get it for the first time?

i.e. it works here too

that this man already knew the future

i.e. he received the information there in the Infinite Future

and so he came to this place and took

i.e. reproduction is

the dynamics of the next person's action

if you think about it

how does Thinking work at all?

why does a person go somewhere in particular

and he thinks that he does it on his own

and ^{in general} he really does it on his own

This is precisely where his main freedom lies
independence
that he does it personally himself
and understands all processes simultaneously
^{kind of} lead him to this

i.e. it forms its action
all the time in Macroregulation
those. in Macro Interaction
he ^{seems to} breathe simultaneously with the whole world in essence
i.e. his Soul has synchronous breathing

and when you start listening
how the Soul breathes with the whole World
you can define the lungs ^{for example} Mira
on information, ^{well}, relatively speaking, of course
i.e. to see comparative systems of organs

and when you start to come into that harmony
what are your organs ^{and} your systems
manifested in external Macroreality
and ^{there is} a hand movement
or ^{there is} a breath
this is the level of Macrosalvation
level of regulation

that the World is constantly interacting with you ^{yes}
then there are no management problems in fact

then you gain another ability of the Soul
^{then well} how do you visualize it for yourself
the ability to act in Infinity
from the point of view of the final action of manifestation

i.e. your thought and its infinite development
and in general for all Realities
This is a traceable process
i.e. you start to see
what will your thought lead to anyway
in the Infinite development of all in general
civilizations including ^{yes}

then you come to the process
similar to what God does

i.e. the process that allows
practically He is ^{there} Well, to be aware of everything
i.e. the process of Macro-awareness

and here you come already
to equal conditions, ^{generally speaking}
even though you are, ^{for example,} on already known systems
created ^{yes for example on Earth}
on the material plane, etc.

i.e. precisely the possibility
take ^{as if} the level of dynamic control
under ^{the following} prolonging control
allows you to do this

and logically it is understandable
because future events
they haven't happened yet
when you start seeing future events accurately
you are equated with the Actions of God
and his Infinite freedom
and that's all

i.e. the logic is very simple and clear
that's how it's built by the way
the logic of the development of the human Soul
as a rule, we are talking about the development of the structure of the Soul
because the Soul is already like that, as I often say
already has all the possibilities and abilities
namely the structural ones of your Soul

but here you can see
radical level of this type
that you will be able to learn the level initially
why did God create your Soul exactly like this
i.e. why is your body designed this way?

there is some
^{Well as if} the criterion of course is the property of the organism
to react to something ^{somehow}
have some type of Thinking
for some events

then you can see it initially
where does this come from
and how does God actually address you

i.e. this is your deep inner state
this is often God's appeal to you

and when you start to differentiate
this is a state
you see that after He turned to you
only then did you form the thought
or decided to do some event

so it turns out that you got it from somewhere
this event
you created the following action from somewhere, right?
Well, let's look around there
For example there is a person who needs help there
well they helped
so it turns out that you kind of took the event
from collective neighboring action
there there let's say the person was treated, cured
or they saved the world from a global catastrophe

here it turns out that this is exactly it
the structure of this Eternal substance
which is reproduced precisely by the development of the Soul
to form the ability means to form the action
in dialogue with God

i.e. God poses a question asks a question
you take action and respond
i.e. action is response
i.e. the external real World is the answer to God
your physical body is the answer to God it turns out
in this dialog mode

and it turns out if you
do you hear and understand God correctly yes
well at least there if you need to take your time somewhere
if you need to, hurry there, etc.
i.e., as if you even move into dynamics

then this is what causes it
and specific configurations of your body
some specific ones
or problems
or vice versa, complete health, etc.

i.e. in this case it is a disease
it's like a system of absence
differentiation of external information
logically it is also clear that this is so

but when you start to enter
already deep into the system
then it is clear that in this case
to be cured of an illness
It would be enough to have just 2-3 pulses, yes
in this case, a person can see

where did God even address him?
what did he do next
Well how to go through all these lines 2-3 times
and then the person becomes healthy

and can this system be transferred to another person yes
treat it the same way
but the other person is unique
and you can understand his system of thinking
if you consider
how man for example was created by God

i.e. there is ethics
for example, it means you can't invade , yes
in Thinking of his personal plans
but for Salvation you need to understand
where was the dialog mode
i.e. this is control as if without information yes
vision skill
but there is no need to take detailed information

that's why God created uncertain systems
in order to create
freedom to any person of any personality
or any entity to any object in general

i.e. systems are created by God specifically
empty so-called space
this is space
An infinite number of decisions and choices

i.e. a person, well, in terms of freedom , so to speak
he can
go wherever he wants
do whatever he wants

that's why this system allows
to diagnose another person ^{there}
to cure it without invading
as if in his inner desires ^{there are} thoughts, etc.

i.e. to treat according to the principle of that
what does he perceive
i.e. you give it and it perceives it
he may not perceive may perceive

so here the system is exactly that
that then the treatment of another person turns out
On the one side
absolutely the same level
or not necessarily treatment
helping another person
some kind of external control system
It seems to be fundamentally different, ^{yes}
because then you have to act
as if for someone else ^{and} for another system

but on the other hand, this is precisely the difference
shows the way of God
from you
in relation to
to any other information object

and you just have to take this path
all actions become completely open
completely understandable
and then you act accurately

i.e. means accordingly
there is a Macro-salvation of civilization
^{there is a cure if needed}
if absolute health ^{so to speak} practical health
this means some next action control etc.

because then your action
to the outside world
this is the same thing that God has already shown you
in this case you are not mistaken and act accurately

Thank you very much for your attention

This is where I ended today's seminar.
