GRIGORY GRABOVOY
The Teaching about God
Dynamic structuring of the Soul
24.11.2004

Hello
the topic of my seminar today
this is my Teaching about God
Dynamic structuring of the Soul

in this case i am showing
what is the structure of the human Soul
this is the totality of information
which manifests itself
as for a human
as well as for the external level of Perception

i.e. a person sees his Soul
as a certain concentration, among other things
some kind of optical environment
which, generally speaking, is still
universal and concentrated area of control

so when we talk
about the dynamic system of structuring the Soul
for event management for example and for Macrosaving
we must first of all consider that position
what a person is looking at
Soul creation area
can see this area as generally quite remote
for your Perception

because where the Soul is created by God
this is a level of externality, as it were
in relation to a person
information

so when we talk
about the structuring of the Soul
we are talking about influencing events
in which we still have a real management system
provided that the management itself is actually located
both in the area itself, i.e. in the structure of the Soul
and the fact that this management

by external influence, yes
i.e. external control by you personally

i.e. we find such a point in the Soul
which has
as internal content
and external
and at the same time we can find here
level of creating one's own Perception

because from the Soul you can find
any system of action
including one's own perception

so when we in this case
for the Macro Salvation level
we want to suppose to allocate
area of the whole world
or for example there is the globe
then in this area it is quite easy to do it

and here is the logical consequence of this control in that
what when we see
that the globe is a controlled system
for the Soul level
then naturally the area of personal tasks
this system is also almost completely controlled

and we see that this is the control over this system
it may be like this
that the level of the Soul is widespread
exactly for example yes away from the action
this is the next action
i.e. you can see how the next action is created

i.e. within the structure of the Soul we are actually
we can the following structural area
create
by way of the following action

we see that the action is generally continuous
i.e. statics and Infinity of action are visible
and as a result it is visible
what for example Eternal number of events
this is Norma

i.e. here are quite a few

Well in general, voluminous concepts
such as "Eternal Development"
for example "level of Infinite development"
what matters here is generally the point
but quite understandable

in principle, it is immediately clear

i.e. in this area we have that
that we are familiar with it generally speaking

and when we start looking
Action of God
similarly here is what for action
Generally speaking, the structure of the Soul is this

and if we are in this action yes
here is the statics of the Soul
and Action of God for example
just like a person should do, for example
is being considered
as an action, for example, to create the next event

it turns out that God creates the action
almost like looking at another person

i.e. here is an action, some event
in the structure of the Soul of God
is created precisely by the Perception of another person
or for example there is Self-perception of God

then it turns out
what exactly is the level of the physical body
this is the level of some canon
around which arises
exactly, well, like this is how it appears around the crystal
system of events and some
the crystal grows, develops, for example, in width or concentrates
somehow even changes inside

then it turns out that we have somewhere
not exactly like that of course
but in outline it is a similar system

those. this is the structure of the Soul
this system is still quite clear
and quite clearly manifested

i.e. if, for example , you ask a person
for example, how is the Action of the Soul of God expressed?
localization of the Soul what is it like for example Yes
objectives tasks
these are, in general, personal positions to a greater extent
and often they are defined at completely different levels
there are controls of Perception, etc.

but here is the system of the structure of the Soul
this is still a very clearly defined area
here is the structured area

and it is structuring
by tasks by classes by management level
it can happen like this
that we can quite well know the structure of the Soul
bring to the level of precision
i.e. precise or, in other words, understandable control
as an external level of Perception yes
i.e. Perceptions of all
and for example at the level of the personal management plan

i.e. in fact, this action generally speaks of that
what is your personal perception
your personal action becomes clear to everyone
and you understand that this is understandable

i.e. external control systems are visible
who, generally speaking, can adopt the experience

in this case in my Teaching
once the structure of the Soul is revealed
and if we are in the dynamics of a state of some action
a person is always busy with some kind of business or problems
or some management actions

this means , as a rule, management
in any problem
always happens one way or another

it turns out that it is precisely when we speak
about the dynamic level of control
we are talking about what is in a normal state
the structure of the Soul can be controlled

and that's where it turns out

that the maximum level of concentration of events
this is an element of the structure of the Soul of a person

i.e. it turns out we can find that one like a level
where is some matrix of events
this is the level of organization of the structure of the Soul

logically clear
The soul is always doing something.
and at the structuring level
she is involved in some processes

and when we start talking about that
Well , that's basically why you need to manage
let's assume it is the structure
when it is possible , let's say, to carry out some external control
there to develop the dynamics of action and the development of the Soul

then here is the answer again
I would like to emphasize this once again
that this area is very clear
this is a clearly defined optics
which is, in principle, quite easy to work with

the main thing is just to get into this area
well, actually enter the management level
and get
For example there is a space for the realization of all events
in a positive way
or space there Macromanagement

and at the same time we always have a stable phase
i.e. we know where the control is
i.e. precisely geometrically

when we are, for example, at this level of management
we start making exactly the structure, which means it is mobile
those. management in the structure of the Soul
then in fact it is an influence
on the whole structure, in fact, on the whole picture of the World

because the Soul
This is a very tough position in the world, let's say so
in the modern world in the current yes
at the current time level

but if we want to spread the effect

there in the Endless Past
then we must see the structure of our Soul
in the Infinite Past

then it turns out that we can
time
coming from an infinitely distant magnitude
in the past
project actually into the current time
and at the same time the whole sequence of events
consider within the framework of the projected again
i.e. the current event

i.e. we can know
the entire system of previous actions
just one compression level yes

bring optics into the Infinite Past
for example at the beginning of all events yes
near the level of the World Organization
or the first Glance of God
i.e. the level for a person
where God first looked at the world
or to the level where the World will be

i.e. when we get into this area
in the system of Perception
then instant compression occurs
and the maximum concentration of the event occurs
from our point of view
we act in the same way
as God does

looked at the system of their events
received maximum concentration in positive action
This is, generally speaking, the quintessence of management
in this method, it is precisely inside the structure

now the task is to get there
still in a structured area
still inside, as it were Yes
for this you need to mean
i.e. having previously selected the control optics
by the system of Perception
by means of logical actions there

generally speaking, structuring
this is exactly the first element of the structure
it's basically a very simple geometric line
in the form of a certain level with a silvery-white slope
and now we clearly understand
that this is exactly the structure of the Soul

why structure because God created the Soul
can create a Soul
for example, a person can move a structure to influence the World

then it turns out that this is when the movement occurs
it is precisely the entry into the internal event that occurs
of this optical level

at the same time, it is necessary to understand
that here optics generally speaking it has
such other properties
this is your specific optics personally
i.e. this is your Soul structure
so you get into the system of your action, yes
i.e. know yourself

there you understand yourself
it's clear that you are working

by the way, it is quite important in management
allocation of optical systems
when the area of understanding is clearly defined
i.e. the person understands
that it was he who achieved this result
by his personal action
then it is easier to accumulate the result
it's easier to do analysis and gain experience

that's why this technology
it is also useful from a tracking point of view
precisely the level of one's personal action

in this case, you can enter into this system
generally speaking, any control system
and understand
what does your control impulse mean
achieved some result, for example , or some action

what is the result of your action
and what exactly have you achieved?

because when you see
what's going on action well for example another person yes
some level of Macromanagement
then it turns out that we have that level
what if we want for example yes, and this must be done without fail
and always do
knowledge specifically on Macro-salvation
distribute to everyone at once
then we see that participation is immediately in the opposite direction
often instantaneous
i.e. there is no primary action yet
another person is already doing a kind of warning control

i.e. at some level
this person perceives the signal earlier
than you even kind of fully form it yes

this is a spiritual action
he begins to see your Spiritual action
and you receive Macrosalvation from him already

and here is your personal action
this is exactly the same
sufficient optical system
and configured in a very specific way
in the form of a local level of some grain yes
there is a grain of events there
and by the way, you see it here in the visualization
it really does look like a grain of wheat
if you project it into a material image
it's quite similar

and when you start moving on
Well there for other regions it is possible there is rice grain, etc.
but it is this grain

and when you start to see
Well as if it were a granular or coarse-grained system of events
then you can see what's inside this grain
exists
as if a very dense system of action

this is when the action is super fast

i.e. the person really wants to do yes for example Macro Rescue
he sees the structure of his own Soul
in its entirety from the beginning of the organization
then his entry into all events is quite simplified

why does a person immediately save the previous ones
because he is basically here in many ways
at the initial level of the organization

i.e. you see its initial creation level
even often at the level of his tasks
for example, the child has not yet been born or he is there , let's say so
must have some tasks yes
and you can already see
his level of structuring of his Soul

i.e. generally speaking
before the Soul begins to be born
i.e. before, in fact, from the point of view of man, its creation by God
her task has already been manifested
i.e. it already influences the World

and it turns out that we have
well, with such a certain level, quite unique
here's the deal
that the element is like information yes
i.e. the Soul has not yet been created by God but is already active
so it is naturally present
in any event

i.e. an element that is not manifested can be everywhere, yes
Well , the philosophy of the logical plan is manifested in this case

then it turns out that when we start
proceed from this point of view
then you can see that this is the turn
as if into the structure of the external world
at the expense of well, pulling this through
some kind of knee and lever
it literally looks like this well there if you compare
one to one almost as if
if you take a course like strength of materials
some kind of physical rigid structures

there is a certain system that is quite strict

we just need to move it a little
here in optics with some effort yes
that's how much effort it takes to move forward

so here it is precisely "what" that is clear
you need to make an effort
which is not part of the organization's system
i.e. this is also a property of the system
i.e. the Soul before its creation
as well as the simultaneous action of the system
when the Soul already has an instrument of action after creation

it turns out we come to the personality of a person
when personality shapes external Reality
to the factor for example there of their own creation

this is how a person can know
that he will live forever
i.e. Forever
how will he know
that all events will turn out favorably
the longer he lives, the more prosperous it is, etc.

then it should work
outside the system, as if it were my own organization, yes it works out
how to control any system of your actions

and it turns out that in this regard
this technology
it is quite close to mandatory implementation
For example there is Eternal development for a specific person

and here you can see that
By the way, the technology is quite simple
logically there is only one thing to go to
in the field of logical control
into the area that exists
Well, let's say it's a certain external area
through which the local system is managed yes
or an autonomous system
here is an autonomous system
this is everything that is connected specifically with a person

in logical terms it's just a matter of
some kind of external sphere is being built there
which means it is a sphere of external control
and we kind of start working through it, yes

in the usual practice of direct control

so that in the system, for example, it is Souls
make such control
you have to move the layer first
well, that is, as if they shifted this peculiar level there
Well, you could say it looks like a hatch
but it's not really a hatch because it's
this is the way up
exactly where Infinity and upward movement are
this is your physical body

i.e. you actually start to see
why generally speaking the body is a part of the Soul including
there it is visible at the level of knowledge of the Spirit
i.e. the Spirit knows it

so here you see
that knowledge of the Spirit is action
it is clear that when you know your Spirit knows
so you are acting yes
the knowing Spirit is always active
but the Spirit, in principle, of course, always has some knowledge

as a rule, quite accurately or absolutely accurately
in case of Macrosalvation
The spirit, by the way, acts absolutely accurately

and when you start finding here
here are the structures as if what you are getting to
how can I move this structure a little further?
there by a millimeter
Well, I'm speaking conditionally there well at least a little bit further

because in this case
movement of the structure of the Soul structuring
this is the act of Salvation in essence

because here is your event yes
in the structure of the Soul
normal event
your event depends on you
you took it and entered it there
the next one hundred happy years of life for example

this is something like this in optics, for example, some kind of optical action
and you need
let's assume this level of this optical action
make it so that the action covers, for example , the territory yes
there did not explode, etc.

then you just take everything
just move this structure
and with this hard pillar of Light actually yes
blocking the possible development of other systems
i.e. you normalize the events of the structure of your own Soul
moving

that's why God didn't define it here
for a person
the need for creation
The soul already exists with all its properties.

after all, God also has a function like, say, Actions, yes
and He Himself is such that He possesses all the properties
a person must be similar

i.e. not because a person has
as if the possibilities are limited in some way
and because the structure of the Soul is sufficient
to make any management essentially

i.e. it is enough to visualize it
as if in the area of as if strict constructions
and to be able to means to simply move the control
in the area of mandatory implementation

or at least there if the time is different
then you know for sure
that this is a very powerful and tough control

this is where you start making management
you are faced with such a level of Perception
that working with optics
you begin to see the structure of your body
i.e. working with optics is the same
as if you were working with your physical body

and here is the transition
from the optical level to the physical level
it's quite appropriate in this case

already an indefinite quantity

i.e. this is how fast the transition is
what we are beginning to see and understand
what between for example human skin
and for example the internal level
i.e. internal organs
this is the light of Eternal life of Eternal development
exactly in one physical body
it penetrates almost instantly
and it seems to be constantly running
there vibrates inside the body

i.e. this Light , well , some glare and Light
they are constantly interacting
with internal organs
there For example they are restoring it there
If a person needs it, he can improve his health, etc.

here is the regulation
these internal light images are actually there
this is the structuring of one's own Soul
through thought forms through Thinking
i.e. you don't need to use external control
it is enough to act inside

i.e. deeply, as if removed yes
into the deep realm of the Soul
Well, exactly positively
creatively directed Soul by the way
She is always Macro - namely Macro-creative

therefore, in this case it is revealed
that the thought that corresponds or cognizes something
your Consciousness

which, for example , interacts
or even be at this level of the Soul
has exclusively creative
precisely the creative functions
and at the same time you get this level of control
that is the very concept of "creation"
this is your well let's say there is some intellectual stuff there
your inner your simple light action

I'm just sort of seeing it off
the same level of actual equality yes

for any of your actions
i.e. it is possible, for example means to act there in some way
let's assume there move your hand think somehow perceive yourself
or just emit light yes
and all actions are equal

here inside the structure of the Soul
every human action has an equal sign

i.e. all actions are equal and have the same force
for precisely Eternal development
well actually for Macrosalvation

so here is a study of this area
this is quite important
when a person is in this system
here it is, yes for example, some kind of vertical powerful column of light
from the point of view of the sustainability of such human perception
the light is strong enough
has the same density as in general
Well, as a first approximation
like the human body
but in reality the density is on a completely different level
in this case we are
on a specific platform of the World
i.e. these are rigid systems of Worldbuilding

i.e. we begin to see
how the external world system develops
at your action
and we can actually observe from the side
how does the action happen

By the way, here a person can already rest
some time, even if it's just for a short time
just like there is a traveler who is walking
and sees that the outside world is calm yes

for the modern world
there are cars moving there, no accidents
and everything happens normally if it's a city
if for example it is not a city
then it is still possible to differentiate the Norm
even if for example there are no cars yes

and when do we start

see the management structure precisely in the Norm
it turns out that a person sees
that the management is sufficiently formalized
i.e. everything is normal and quite calm

this is the management of the Soul
through the management of the structure
i.e. the structuring of the Soul occurs

you begin to be able to structure
your own Soul
then it turns out that you can generally shift
level of earlier tasks

i.e. for example you can have
Let's assume for task management
well, some of the earlier plans
and you need to speed up the control, for example
and you as a person on the Macro level
first, work on some earlier tasks

then that's when you can control the structure of the Soul
then you can current task
make it closer to a solution

at the same time old tasks
of course they exist
you can differentiate them
i.e. having understood the meaning of earlier tasks
you are simply on everything by moving the structure of the Soul
you are actually changing that
that you often even pawned it on yourself
in the form of a need for a solution

because it's like changing Well or something of my own
It's not essential of course
there is a general level there which is macro-directed yes
Macro salvation of all
it is a completely unchangeable design
I mean what you put here
management objective

let's say we need to cure a person quickly
and you have a task, your Soul has a task
For example well, even knowledge of some element of the World

This happens, but it all depends on the individual

the personality is completely free, any task can be set

and the Soul begins to work
at this point in time it means
and this is completely visible here
with a certain development of prognostic systems
it is clearly visible which task is currently running

and then it turns out that you can
so by means of actually, in general, approximation yes
to the structure of your own task
when did you form it for yourself
accordingly, even work there
this is some kind of geometric, simply elementary action

look, you have some earlier task
it is being worked on now
you need to quickly cure the person there
or do some Macrocontrol action
even if it's a private action by the way

this system works very clearly
in the implementation of private actions of an individual
but the individual must still realize himself
your actions
so that management is effective
so that a person can understand that he works effectively
then he must carry out his private tasks
through Macrosalvation

it turns out that here you are
by movement of this structure
here in real time you take and change the point
i.e., as if earlier systems of connections were laid down
in terms of your own actions you change

because here you still have to
clarify very clearly for yourself
that for example any external tasks
some external control systems there are situational tasks
to do is often enough well for a person
basically it's simple
a person is always primarily oriented towards that
to help people there and work in a social environment

but how to change something
not in the plan there again as if radically

there are goals that don't change, that's right
again helping people Macrosalvation

and here are some exactly
absolutely may not be urgent tasks
this often turns out to be quite difficult
essentially a task for a person
because it is often a very long time a huge time
hereditary systems also play a role there
as if regional levels
i.e. information intersects there
often according to the plans of previous generations, etc.

and so it turns out that you
here you need to identify your task
By the way, you can increase the resource
due to the activity of the cellular systems of yours
i.e. to increase the cell resource
In fact, it is a powerful self-healing system
i.e. the cell receives more information

look straight ahead here
at the level of, let's say, inner vision
Spiritual vision and Spiritual knowledge
and watch how the increase in the cellular resource is going

then it turns out that you are the problem that you are solving
you don't have to pass it on at all
at a later time yes in management
or you can just decide at the same time

here is the creation of simultaneity of action
this is precisely the main task
from the point of view of God's Action

this is God when He controls the structure of His Soul
and He can also create His own structure
and can manage
He's actually heading in that direction.
simultaneity of action
for God all events in general
they practically happen at the same time here

if we abstract
or just look with your inner eye
at least there for a moment
how God sees events simultaneously

then you can see the part that is available
for example for the primary da Perception of a person
when at least the bulk of events
here in one impulse yes
appears as simultaneous

and here we get inside the structure of the Soul
at any viewing
well, like on a big screen or something
means any segment of this screen

as a rule, this is a spheroidal level
if Perception by Spirit

if Perception by the Soul
this is a plane level

i.e. it is even possible to differentiate
what do you work on
if a sphere is revealed
so in this case you are working with the Spirit

at the same time you do not show the optics of the Spirit
that's what's really important here
you work in natural conditions
just like an ordinary person
which, in general, does not go deep into the management area

and at the same time you work with complete clarity
what to do at each level of management
and you control the whole process

here you have entered the structure
when all actions are at the same time yes
in the management segment
enter the segment if planar
Well, at the level of the Soul, for example, you entered the control
and you start to pluck strings there, yes
the lower level there
there let's assume the lower region is the upper region, etc.

and then you start to notice over time
that no matter how much you sort through
you are constantly inside your own body
at the level
Souls

Spirit
Consciousness
i.e. you have a certain point

which is constantly located
inside your physical body

and then it's clear
why does a person need a physical body
exactly what is the Eternal number of years

because this is the level of generation well like knowledge here
i.e. in fact this is the level
which is permanently fixed
well at some point in space-time

what in principle turns out to be longer there yes
the body develops
the higher the concentration

those. body matter concentration
like little by little or you can't say it's slow
but you can say that without rushing yes
as if it were slowly approaching
to the level of the Soul's information

i.e. the body becomes
no longer in terms of logical perception
part of the Soul
and generally speaking at the level of matter
starts to intersect
here with this pillar there is the structure of the Soul
pillar of light
which in general is even just optical Light
generally impossible to call it that way
there the properties of both Light and matter exist simultaneously
in this environment

i.e. in this case you perceive
well almost like if you are a human physical body
you perceive , for example, a person
i.e. no other information object
in this case, comparative knowledge does not provide

then you take it and as if by an effort of will
introduce, as it were, the external optics of your Perception

and this is what happens, mixing as if by an effort of will
Perception from the human body
and external optical level
you get something similar

in fact, the concentration there is completely different
there is God's Action
which is expressed in universal knowledge

i.e. you can know everything
while constantly acting
positively on the management structure
i.e. the main system
where you can act most positively
it manifests itself for you almost immediately

i.e. you know right away
what do you have to work with
this is very important in this control system

because the next level of the Soul structure
i.e. it is not necessarily just one column of information
the Soul itself is manifested in this case like this
what could be the next pillar there some information
next etc.

but as a rule there are not so many structures themselves
under linear action
i.e. if you are constantly developing
towards future events
there are not many of them

but if you start to analyze
there to enter into the structure of the past
then each structure can have a million there
or there is an infinite number of some such threads
leading out such paths
i.e. similar to some kind of ball
which is constantly unwinding
and the golden threads are already starting to scatter

i.e. the past from this point of view
if you enter through the structure of the Soul
it has a golden hue

i.e. why, for example , can you walk along the ball there
these connections
this is how linear systems are wrapped into a sphere
and always find a way well For example there in space yes
if you are in a city in some area
where you need to find your way
it's very simple, you take it and go to the golden spectrum
and where on a silver background there is a golden spectrum
according to the purpose of the tasks arises

so basically this place is usually
or place of management
or a specific place
well, which you need physically , i.e.

it is important from that point of view
what you can do in your body
similarly find the systems you need
for management

for example, the body has
there is an infinite number of connections
Human
and you can, well, in principle, in this case
this is a more general formulation of the question
there is an animal organism
any system
the system always has an infinite number of connections

right now
what system should be dealt with

i.e. this is what this system is for
on structuring the Soul
it means precisely at the dynamic level of management
i.e. in a natural state during natural events
as if not constantly
because in natural events you can get distracted
do something else
but at the same time you are there in principle constantly clearly
keep control

here is the structure, it is like a very rigid construction
it is a structure standing at this point
for example, you got distracted while driving
She's standing there, she's not moving anywhere.

at least you can come back to her in a month
it is in the same place at the same level and is located
and this is absolutely controllable
the will of management
this is very important

i.e. over time you will have some practice in this system
you will be able to see
for example, here
why the general resurrection will definitely happen
because in any case the system is at this level
maximum strong glow yes

where the body and the Soul are one information
in any case it will be comparable to the Action
and generally speaking to the Soul of God
here is the Soul of God acting
i.e. it will be possible to see
how does it work in a completely linear way

in this case it is natural that all bodies
have their own physical form

and it turns out that we have this technology
we can extend to Infinity
to see there some kind of Infinite of your own, for example there
here, by the way, we need to see a generally happy future

i.e. your control is already here
your control

i.e. this is where a person's personal choice lies
here at the level of a completely rigid control system
he chooses personally chooses
your happy future

i.e. well, a normal level of events
what he himself considers to be a happy level
in this case, definitely yes
at least a positive solution to current issues

but in fact here is a happy future
it is often a very distant construction
as if from the Infinite Future

therefore this system has even more
and a powerful control system in itself

so now you make such control
look ahead
namely the structure of a happy personal future
let this future be technologically
then it solves your problems

i.e. you take at the expense of what was said on the structuring of the Soul
get information
when control occurs
in general an external element of Reality
i.e. external level of control
and directly see this Light that solves your questions
but coming from the future
I will work with you

when do you work
system for example external control
Please note that your internal state, for example, Yes
maybe not quite like that we'll tell you something specific there
i.e. why are people's thoughts protected completely there
why is inner peace considered
level which is
precisely at the personal level of a person

because the level of this management is very important here
consists in the fact that
that this is exactly the happy future
you can see inside in the depths of your Soul
you kind of throw momentum forward yeah
but deep down in the Soul it is generally speaking there

and this system is precisely equilibrium
where exactly the depth of the Soul is needed
to get there really yes
happy future there in Infinity
it turns out it all comes down to
to the Soul control system
with your own Soul
in terms of the implementation of Macrosalvation
here first of all

so when you start to see
what well there is a certain person there who cannot know something
Well, we need to give him knowledge that would show
that your future is absolutely happy , yes
specifically defined

Having this knowledge, he already acts in a way that is consistent with you

for example, God originally gave control
to the Macro-Creative World
due to the fact that He personally knows how to do it
and generally speaking it will reach in any case

so when you do the management like this
what do you see all the time
the following system is sustainable for you
First of all, people learn from you very quickly.
although you may not often say it out loud , let's say
although it is better to teach with words

and here is a personal action that, for example, you show
due to this very management plan
where you control future processes
it is then reduced to another person

generally speaking for you to that
that you have this dynamic future of yours
where the structure of the Soul can move
quite quickly or instantly even

i.e. this is a very powerful level of control
when the structure of the Soul begins to be dynamic itself
normal system of connections in principle, even yes
this is a large volume in general
but in every control
the Infinite connections of your Soul are visible

and in this management you go very deep
into the system of internal connections
there are no internal problems
you detect them much earlier by the way

here in this system you can see
why is the event some
Well, there is a saying
what if some event happened
well then as if well, like maybe it could have been worse
but here's an example some event happened there , yes

here it is revealed
how does a person generally prepare to overcome an event
why some systems well as if some negative events
they seem to be approaching the person

but he still manages to do it in advance
means to somehow transform the situation
somehow it is formed together with the given situation
or does it react to her somehow?
and then the events are not so acute, yes
they are calmer and are still resolved favorably
in the end

this is a normal human system of knowledge management
and in principle God gave this system
to a greater extent even for that
there is no such thing as previous knowledge
what from God's point of view
In principle, he should act like a human being.
well, it 's also basically the same for a person
or act like this
so that a person could see the path of a person there too
learn knowledge simply faster

that's why it turns out
this is the system of structuring the Soul

when this hard fixed Light
Soul structures
moves into action dynamics
it's the same as with God
This is, after all, a system of knowledge transfer
cognitive system

if from the point of view of well there is a question of God
what is the system of knowledge for God
what is interesting to him for example

what is interesting to man is of course interesting to God
because in principle He created people
He must definitely live by their interests too.
generally speaking, first of all, yes

i.e. He is often interested
more interesting is what people are interested in, for example

and it turns out that based on this we see
that this is this system
precisely a preventive action
soft enough profiling
She is so powerful that logically
no other system even if it is maturing yes

you start to think logically
that yes, in any case, some problem is possible

Well For example there is a nuclear reactor there
which started to get out of control
i.e. according to physical laws it is possible, for example Yes
will have some emissions there Yes
there might even be an explosion or something like that
but through this system you are generally able to overcome
these are the negative development systems

i.e. a system that, as it were,
well, how powerful is the level of Macrocontrol, yes
this system it overcomes practically
basically any system
possible external influence

This is where it is very important to see
that when you see that there is control
which is capable of overcoming any system
Means Well as if there was a negative impact yes
then it is important to highlight why at all
Well, in general, this impulse of negative influence is like
it is possible that it is static yes

possibly static
what does it depend on
maybe there's not much that needs to be done logically at all
so that this impulse can be disbanded

i.e. logically it often happens
that as if these are warning systems of action
they are like this
that you have very powerful control
just by learning the accuracy in the system

accuracy
here's what to do locally right now
maybe there won't be any special movements there
there is no need to implement in management

and this precision, i.e. exact knowledge
which at the same time
at the same time it is linked to the purpose of your yes
with Infinite Development
this is what God does for man
as a structuring of the Soul

i.e. this is how He structures the Soul
God

He makes sure that every next event
at the natural level of control
in this case, I actually got pretty close
to the natural background level

and as if at a natural level of control
a person shouldn't have problems anyway
on the merits

and so that the knowledge of the manager who got there
from the depth of this level and controls all processes
pass it on to ordinary people
You just need to highlight the general area

i.e. the structure of the Soul is arranged like this
that the background, so to speak, easy to understand levels
or current effective levels of control means
they are almost unambiguous
almost identical to those levels
which are very complex

to convey complex knowledge there
to the level of some simple control system

and the simplicity is not that it is simplified there
often it's just not that many events

but so that, for example, a nuclear power plant explosion does not occur
this is just one event no nuclear power plant explosion
it's a simple system in principle
for Perception

and then it turns out
we must equalize as much as possible
a very large amount of knowledge
where there are, let's say, some drawings
where are the technological cycles for example
where let's assume we have, let's say, a level
where to stop this explosion
Generally speaking, colossal control is often needed
make it personal or resourceful
there must be specialists, etc.
i.e. this is a very large amount of knowledge

and we need to equalize this knowledge
it doesn't even have to be a nuclear power plant
let's say to make sure there is no nuclear bomb explosion there
there was no negative event at all
maybe it's not even that big , yes
but in the long term the event could be very problematic

i.e. this is when we work with the structure of the Soul
these events are, in principle, very visible
i.e. we see
what event can be exactly negatively developed

because there are primary event systems
and so that means to influence as if in essence
we must also have a logical status
what to influence first
and at what point in general

then it can be revealed naturally
possibility of developments

and often events can be like this
what well as if the negative meaning of these events is such
that you should be taller anyway
that's how it should be in any case
at the pre-management level yes
and negative situations should not be realized
well, that is, the plane shouldn't fall there , etc., etc.

or some personal event should not happen there

then it turns out that you should now
here in its natural state
be able to balance the event in any case yes
and then it turns out that this is again a state of peace, by the way
in the statics of the Soul

again in the structure of the Soul
i.e. one of the structures of the Soul where events are already aligned
you must be internally confident that you will do it
i.e. to know generally speaking

but in any case the action
you must always be at the level of knowledge
that you will achieve this

i.e. at any level of management
you are always in this event as if in full

that's the peculiarity of management
through the structure of the Soul
when you work in this structure
after all, it is a fairly static structure
and you see very clearly in any management
that you achieve it anyway

i.e. you basically don't have to rush
you always know
that you will be able to reconfigure the event
i.e. everything is in your will
everything depends so flexibly on your will
that your will is manifested to the maximum
just like with the Action of God, for example there
into distant Reality yes

you are starting to get the same thing
in comparative i.e. in local Reality
in some particular tasks

if for God in this case
it is still some kind of Infinite Action
and everything is like the previous ones by the way first of all
as well as future events
in His Perception, as if by equivalent constructions

then for a person this is a local action

and in this case if we consider the issue
and how does God even form an event?

for example, from the point of view of this question again, yes
where does he get connections from the past for example

those. His system is equivalent
it turns out that it must have transitions somewhere
there from the spheres of past events to future events
and the current time must be determined necessarily stably
the obligatory occurrence of some specific event
so it turns out that
and that is precisely why God always orients himself towards
precisely on the creative meaning
i.e. Macroharmonic

and that's just the will of man
it defines modifications there in essence
i.e. God made man absolutely free
and therefore He teaches that man should be able
comparable
i.e. to do creation by personal choice
here is a sign of personal choice in that
what why is man free

because then
these are the structural systems of the Souls of people
i.e. the structure of the human Soul
she begins to move towards God
and here it turns out that you see an approach to God
here is a person with the same eyes
as he sees well in the Infinite distance
man God
i.e. you start to see
how God gives knowledge for Infinite development

you're starting to get into it well generally understand
process in interaction dynamics
as with personality
as man to man

i.e. not some kind of absolute construction
namely, the structure of the Soul allows
to understand more deeply the ordinary, as it were, everyday level of knowledge
which also contains absolutely clearly adequate
often in general, you know, it even happens
what is more in a concentrated system
contains the usual, so -called, everyday
management level
contains exactly Macro Access Macro Rescue

after all, a person still does the management, yes
from somewhere
from this system, well, the so-called household one
or normal background information
comparable
i.e. exactly the same action occurs

so when you start
the structure of the Soul
translate into dynamic domain

i.e. to obtain dynamic control from it
while keeping the static areas normal
you can work
from virtually any area with maximum force
without going beyond the level
some background concentrations there
background control systems

because after all, a manager is one who works for a long time
he often has a concentration
such a pronounced shade
if he wasn't a special manager there
balancing the optical environment
then in principle this requires additional effort
to balance out at the background level
because all people do for example yes

then it turns out in this system
you don't even need to do that
right inside the structure of the Soul
the main control takes place
and here is the control light
it practically does not go out into the outer region

because if we look at statics
these are precisely the structures of the Soul
then it is always homogeneous and always static
i.e. it doesn't seem to change at all
and here it is
By the way, it really doesn't change in many ways
if you haven't moved it there yourself

By the way, there is a person's personal choice
only a person can personally shift his structure
no one can grab him there or pull him by something
and for example move there

and therefore it turns out that based on this
you see very clearly

that this is precisely the structure of the Soul
the ability to control the structure of the Soul
This is your personal control

for example, you were there somewhere, well, well there in action yes
some kind of systems of Perception
and you clearly understood

what is the level that is yours personally
and generally speaking it depends on you
how to step on
what to do yes

and this is the personal level
and expressed specifically in physical action
let's assume like this there is somewhere to step with your foot
i.e. well let's assume the question
how should you walk so that splashes don't get on your feet , yes
a technical question for a child, so to speak

then it turns out that if you start to analyze
after all, you probably had this question before, yes
maybe stood
each person learned some kind of primary action

so here inside the structure of the Soul
there are those answers
which in the future
the man grew up and learned, as it were, those elements
which worried him
and at elementary levels

I specifically highlighted what seems to be an elementary level
but for a child it can be a comparable level
This
Well at least the child is forced
get distracted for a few seconds
to somehow formulate this question for myself yes

then it turns out that we come to the fact that
that based on the level of Macromanagement there
a child at some point
why did I even identify this area?
to understand and show that there was a point yes
she is

i.e. at some time
there was some action
in general it would seem quite simple
but this action is this action

led , for example, to the system of Eternal Development
to Eternal Life

It would seem like a simple question, yes

and Eternal life
here is precisely the statics of the human Soul
when a person begins to learn by other criteria yes

I just showed some kind of criterial choice
in the system of knowledge
in the system of action
i.e. I take, generally speaking, any action in information
not corresponding at all for example there is a task to save the nuclear power plant
and I receive Eternal development
in comparison to just another person
there is just a person nearby

that's why god created
For example there is the first person
created people
because the presence of a person is already a solution to the problem

the same the same thing exactly Macro Macrocreative
precisely aimed at Eternal development
and therefore the person himself should already be there
i.e. God naturally created man in a unique way
when He gave it to him
namely the road of Infinite development

i.e. constant interaction with a person
a person cannot be excluded
here is from the interaction system
then the event really happens

and the World is an event that has been realized and will be realized

i.e. Peace in any case
can't be restructured somehow there Yes
So man is Eternal
logically from the point of view of the logic of the Soul
and from the point of view of ordinary logic
in this case we already see
that the logic of the Soul begins to affect ordinary logic

and when a person, for example , becomes confident in this, yes
it falls on a certain period
really into the structure of Eternal development
i.e. Eternal control

if this level is extended

i.e. to be able to hold it for a long enough time
this is a powerful healing level firstly
this is the level when even if you are in it
just heal others
due to well clarity due to this
enough concentrated glow

and of course it's easiest to do this
again in the statics of the structural level of the Soul
some kind of structural link yes
the structural channel of the Soul , so to speak

when you are in this system
then to keep the statics of the Eternal development of Eternal life
quite simple
You can keep it there for hours if you like

but then let's suppose let's say
you need to see this concentration constantly
the easiest way is to look there
perceive from the level of the heart
here is the opposite Perception must be Spiritual
to see as if with optical vision
those. behold the Spirit who sees yes
a person who sees the light

this is what a person sees

you can say
that a fragment of Consciousness
sees some other fragment there
but this is how the personality perceives it as a whole

here you can understand
what do you see Personality Perception
how does your personality perceive this Light in general?
what is for your personality
generally speaking, Light itself is of this type

or you can ask any type of question there
but then the dynamics of Perception arise
but in statics we can say
yes, here is the light
you are personally aware of this
here is personal awareness
there where
body

Soul

Consciousness
in general, all this together as if in Perception
each subsequent element gives the same result

therefore your Perception of personality
built in the same way as the structure of the Soul
by uniformity

i.e. the personality perceives itself as a Macropersonality
which accurately perceives all events
when the elements of Perception are very compressed very pronounced
and at the same time you have Macrodevelopment
because you know
Well, first of all, it exists, you see it

i.e. in principle, well, this is actually a normal road
here a person can go one way to the store
maybe go there to do sports
but this is the road of simply Eternal development
these are basically equal systems

and you know that both are possible
naturally, this means it's a normal choice
take it and develop forever

there is no such thing, well , actually speaking
some kind of other meaning or something
Well, for this you need to have some kind of creative idea
or is it necessary for this
let's say to do some special exercises
this is just one of the glow options
which is located by the way
at the level of contact
here with the structural links of the Soul

This is where I just showed it
that touches the structure of the Soul

it means because when I say
that you need to go inside the structure
I'm not saying what needs to be done there
for example, such an action as management
by means of managing the whole world yes
shift the structure to influence the whole world
then we go inside

and here it is enough to stand up
on the platform of the contacting system
and we get almost comparable action

we are practically at the same time
outside the system of the Soul structure
and inside
well, that is, a transitional level

then we can see
how is the structure formed in general
well, that is, it is some kind of star rain and some kind of light systems
that are constantly coming at you

and these are the systems that
Well as if they were high up there or far ahead
these are systems that are being disbanded
begin to approach in the form of certain events

that's what's most interesting here, generally speaking
and important in management
what if the system is disbanded
From afar you can see whether she is positive or not
if she has
some negative characteristics
then in principle it is visible quite quickly
that such action is really possible
precisely the negative action

and in principle it's very simple here
can be disbanded
it is precisely the control system in this way

without unpacking the event itself
i.e. what is typical here
you can know what event but not unpack it

this is basically enough
in general, in normal management , I guess
quite a complex design
because if you know about some event
you are forced to get in touch with him yes
and start managing the system
like by some kind of means
optical mass interaction systems, etc.

and here it turns out you can identify events
but not necessarily
Well at least not necessarily
get in touch immediately
i.e. you have time

and then it turns out
what if you have some urgent event
you can go around it from the other side
and still in a way that is convenient for you
align the controls in this system

i.e. that's when you are
on the intermediate control system
between the revealed optics of the Soul structure
and so, let's say, the outside world
then it turns out that you are in control
Quite confidently , in general, always by the way

although the events may be different yes
i.e. they can be dynamic
they can develop somehow
Well there for example, even as if chaotically
which is often the case in the modern world
there may be traffic on the roads, etc.

but you always have time
event correct
Well, here 's a certain situation on the road, for example Yes
possibly unfavorable
you need
or you're just in a hurry to get somewhere
then you can identify the control in this way
that you get a system of this action
as a system well like a marker
take it, go around it from the back side, so to speak
from some system
Well there is a sphere in front of you
and control it
you get the result in another place

that's what's important
that the result should be obtained elsewhere
this is the principle of this management
i.e. not in the same place

then it turns out that you act in a similar way
how do you work with the structure of your Soul
you just shift the event a little bit, shift it yes
and the event comes back to normal

i.e. management of the structure of the Soul
This is a universal control
here I am just now
Well, I actually proved it in analytical logic

that this action is comparable
it's often the same thing

for God made the management
showing that the structure of the human Soul
works for example there on Infinite development
of course it gives comparative knowledge
from a person
any other system

i.e. you are actually teaching, so to speak
well, either in quotes or without , or any other event
Well at least you pass on this knowledge
any other event
it doesn't matter what the event is
there is a microcosm
there is a macrocosm
or just a set of events

that there are structural links that are very linear
each next level
in terms of well or what about management?
it may well be inside a static system
some optimization yes

then it turns out
impulse coming from God
it goes through the entire system of knowledge

why exactly a person
must first accept
Action of God

because as soon as he made up his mind
structured the area around itself
all other phenomena of Reality

they begin to receive comparable knowledge systems, etc.

and then it turns out that in Infinite distance
as soon as a person copes with himself there in Infinity
with specific tasks
so he already gets a specific one
the direct path to God in Infinity
but at the level of Eternal development
where is his physical body
this is an increasingly concentrated level
as if the bearer of this knowledge

i.e. we see that the path here in this case
here is a personal control element
why should a person
i.e. here it's not even like " why" this question sounds
and that a person chooses his path to God personally
according to his personal interest desire

because he sees that there is Eternal development there
and this development is as I said
if you put it at the transition level
between the optics of the Soul structure
and the external level
then here between the optics of the structure of the Soul
and the internal level
by the way, I need to get up then

and see that this is the future development
as i said it is a positive area
there you can see any system in this system
i.e. not only there are some negative events
as in the outer region
you can see inside
as a rule, an exclusively positive system

and you see that here is your Infinite development
this is also the same information
which is already personally determined

i.e. if in one case as I said
this is one of the options
the usual way that you know

then here it is your personal choice

i.e. within the system it is your personal choice

it turns out that what's inside, for example yes inside a person
the structure of your body
it's your personal choice
Well, if you take a logical diagram like this
take as if just to impose

and if you personally chose something for yourself
then at least you should know all this

so then it turns out that when you enter
into the system of knowledge on managing your body, for example
then you must clearly understand
that somewhere you chose
there is some kind of connection between the internal organs

if you chose somewhere
at some point of your Consciousness yes
what questions
then try to go there if there is such a need
enter yes

For example there if you need to improve your health
or make your physical body
where does it mean there is filling
that is precisely the information coming from the Soul
has the properties of Infinite development after all
that you instantly give away information
and here is your physical body
knows that yes Eternal development
it is achievable for everyone

that's when you start
enter this level
information it is practically
Well how can I say it like this
the outer area of information it calms down
i.e. the system of Reality is stabilized
and here your outer world opens up
which comes from the structure of your Soul

i.e. I show it all the time
any one area
and here's what happens next

then the structure of the Soul moves into the outer World

i.e. the person is practically located
not only in that system
what is the outside world
here is the optics of the Soul structure
and therefore it is precisely the natural transition of the structure of the Soul
to the outside world

then it turns out
that a person leaving for example yes in control
Well there or walking as you can call it
it's just that he simply perceives
that in optics it goes into a further area
and here is already the whole outside world
at any point

this is what is most powerful controlling clairvoyance
in this system

i.e. you can learn this
if you can
precisely to ensure a smooth transition

the main task here
to be able to
By the way, here you need to learn systematically
precisely to the predictive vision
by the meaning of controlling clairvoyance
know about events
what is happening where and why
what are the connections in these events
see specifically if you like it there and have time yes

so here too it is very important that you see those events
which are permitted by others

i.e. the Soul is a system of interaction
one structure and another
these are completely independent quantities
there, for example , if the other person doesn't want to
Well of course if he acts constructively
then this is his personal system

but by and large it is usually possible to overcome this
generally speaking, if the other person doesn't want to
it is forbidden

only god can really see
what a person thinks and wants

and basically here
it is enough for a person to learn
help

i.e. even if a person doesn't want to
but he may not know
then look at its next structure

i.e. how to understand
how to help a person in general

so you took it and looked at it yes
in an external system
i.e. they simply perceived the first impulse, for example
to look at him there
as if on an individual
that's exactly what knowledge is
regarding this there is information

i.e. you know that this applies to this person
then you take or in general the person in general
to save humanity
he must live yes and forever
one of the problems that is being solved
also with the same approach as to one person
what to work with one person
what's wrong with all of humanity
Generally speaking, it's the same task

and when you see the next element
what does a person need
from an outside observer
it's often easier to determine
some segment
this is the next simple structure

i.e. a normal, so to speak, light-optical line
which by the way again goes over
into the structure of the external world
like on the border
and where the structure is, there is this light optics
it starts to sort of minimize
i.e. it is as if it is removed

in the system of Spiritual Perception

for the logic of the logical phase of Perception
she is always on the same level
but this is the outside world
you can see yourself there by the way

i.e. how a person perceives you
This means you can do it faster and more efficiently.
to transfer knowledge to someone specifically yes
or to everyone at once
and you can see in general how to interact with a person

i.e. here you can see the solutions to the questions
not by means of logical knowledge
and through connections throughout the world
with you
with other people

i.e. somewhere there is a bird flying and some ship sailing
the events are all connected
and how does this relate to you

For example there the man on the ship thought about Macrosalvation
he has very correct knowledge

you see it and it is still support for you, yes
if he thinks the same
and he discovered this knowledge

usually people who think macro-creatively
they think as if for everyone
they just show that they know or can do it

and therefore the level of support
this is the reverse Spiritual action […]
i.e. coming to you and forming your personality

those. personality formation
at the expense of well like other systems or other people
this is some kind of educational work
here is the interaction of personalities

why is the system of personal freedom important again
in Macro-creation
because then the person
not because he is forced there

to accept something or to learn something
he just takes positive impulses
just accepts
because it is a support of his own Thinking

in the structure of the Soul this happens as if instantly
i.e. because the structure is still the Soul
this is a Macro-creative design
this is not some other information

and that's why it's happening here
interaction is very fast

and here is the concentration of all the Souls of people
in principle a generalized system of Macroconcentration
all elements of information
so this whole system is arranged this way
that the concentration of all the Souls of people
for example this is one area
one glow
one sphere
all phenomena of the World are a different system

and we see
that the maximum concentration of all human Souls
this is precisely the structure of the Soul
straight in a straight perfect way
God

i.e. by and large it means the Soul of God
at a sort of linear level
constantly interacts with all people

and when we, for example, do this action
we begin to understand
we see very clearly
that all these external events
which are like the whole world and the outside world
it's just a very small one
generally some microscopic level
which is naturally manageable

i.e. there is some kind of nuclear power plant or all of these nuclear power plants taken together
all these nuclear bombs or everything that is possible
from the point of view of destruction
this is a very small part

because God is huge
People
those. God is Infinite
Well, it's huge for primary perception
and so He always has an Infinite status
from the point of view of inner knowledge
internal logic
Souls
human

and that's why it turns out
that any event is naturally surmountable
it is enough to look at the event in this area
just look at it from this point of view

concentration of all the Souls of people
interaction with the Soul of God
and there are no questions at all
of course any event is controllable

then logically put the idea of Eternal development
and that's all
it is achievable, even logically achievable

so now make the control like this
that at the point of external control, as it were
where the whole world turns into a microdot
where everything is manageable
put your events
and through integration the unification of all the Souls of people there
with the Soul of God
make light control
but from my own Soul again

that's what's important
see the structure of your Soul
you clearly see your optics
in this whole combined structure
and it shines
into the structure of the external world
and you implement control

Now work, I will work with you

Now pay attention to this
are some external control systems

external states are also in the form of a single signal
where is the future development for this level
always provided always favorable
this is the external system
this is always a favorable future for a person

this is what is different
any element of information at this level yes
you have translated the area
made themselves Macro management
and looked at the other
and how exactly does another person control
what is the future for him and his entourage
always optimal
always implemented in the most creative way
Well at least and generally speaking it's always like that
that the future is favorable

i.e. such as sharply unfavorable systems
does not exist
this person has

then he should see
that firstly from the point of view of logic
Macro salvation will still be achieved by everyone
so they really do exist

i.e. see the following logic
where, as it were, in the next link
You're doing Macro Salvation again
at the expense of, for example, there is instant spiritual action
well it doesn't matter
If only you would appear at the information level there
and received this information
that yes everything is Macro-creative

and this is the level of the next management plan
This is a level where you can build any events
obviously clear
it is obvious that they will be built constructively
even if you are there well For example that's where you learn to build

which is also important for those managers
who wants to build right away, for example , more precisely, for example
but at the same time he thinks that it is necessary
or to achieve something in terms of management
or it is necessary there for example it takes a long time to study there, etc.

then this is a very good platform
in order to show
that's enough, well, basically there
often even one lecture yes
one correct management
and exit through the structure of the Soul
into the system
when the platform itself allows you to act
that at least the next management
it will always be better

and even more distant prognostic
will not contain extremely negative consequences
that's for sure

i.e. you start to see
here is this information
In fact, this is the level of your internal stability.
i.e. you are basically always calm at this moment, yes

The spiritual structure corresponds to the structure of the Soul

i.e. the Spirit begins to take the form of a structure
level of external calm
external information
for you
always brings you
it's just a fairly calm state, so to speak Yes

and when do you start
it's precisely in the dynamics of some events there
in the dynamics of some in the most diverse situations
means being able to manage in this way
what exactly through some option
some level of calm Spirit
always see
that you have positive events

at the level of the Spirit, too, yes

so instantly almost immediately you even
earlier
than the event itself occurs
you see that everything is favorable
here is the Spiritual Administration

then it is clear that everything
all events are then obviously controllable
even in any dynamic system

i.e. it is enough to select at least one static
for example, the statics of your Spirit's confidence
in future management
that it is Macrocreative
and that's it, no problems
you definitely solve almost all the issues
and confidently

including technologies of Eternal development
for you, in principle, this is normal management

This concludes today's seminar.

Thank you very much for your attention
