

GRIGORY GRABOVOY
The Teaching about God
Expansion of the Eternity of the Soul
14.03.2005

Hello again
The topic of today's seminar
this is my Teaching about God
Expansion of the Eternity of the Soul

in this topic i show
that the Soul is Eternal
which has the technology as if from the very beginning
she can transform
firstly, the outer space towards Eternity
and thus man is already then Eternally Living
is as if in a natural environment

i.e. well if we consider
for example, how does a fish swim in the water ?
from the point of view of the dynamics of movement
then internal systems
they are actually comparable in reactivity
with the external environment
i.e. pressure
reaction of the external environment, etc.

and based on this we can say
what if we have
Well there is a movement of the internal muscle of the fish, let's assume Yes
how does analogy in nature mean
and this movement causes
some reaction of the external environment
i.e. acceleration of the speed of movement of the fish
for example, fish scales bend in some way, etc.

and because of this we can see
Well, on this generally schematic example
that there is a phenomenon
which if we assume to transfer to the structure
as God does
It can carry over the management structure.
from similar objects
into the structure of internal Reality

i.e. any object of the same type
can serve as the beginning of fundamental Reality

for example, consider the fundamental World
and we can say that this is a projection
more simple phenomenon yes
external or internal

it turns out that here
an internal state, as it were, of the Eternal Soul
can be released into the external environment

i.e. actually do it
structure of external space
Eternal level of management or development

i.e. to make it so that the Soul that is
well, actually, let's say, inside a person
how can a person perceive it
inside the physical body of a person

so that this Soul she
so it was practically the same
and outside the physical body

i.e. the Soul is still Eternal
from the point of view
from the point of view of the status of Eternity
It makes absolutely no difference to the Soul where it is located, yes
it turns out inside the body there or outside
for self-perception of the Soul, so to speak

in this case it turns out
what is the external control of the Soul or the Soul
that once the Soul realizes the whole Reality
Means well, practically the same level of information
what is she like herself
i.e. like a crystal of Eternity yes
or some such substrate of Eternity
here the Soul itself is considered

then it turns out that the outer space
also Eternal

here the body begins to perceive
outer space as the Eternal Environment

just as the body perceives the Soul
like Eternal Wednesday
but from the point of view of the Dynamics of the Soul and God

i.e. the Soul interacting with God
and then it is perceived as Eternal
as a person yes

it turns out to be one person
i.e. the personality of a person
physical body
Consciousness
Soul
perceives the Soul in principle
as a personal element too
when interacting with God

i.e. interacting with God
any element of information
nevertheless acquires personal characteristics
Well, this is generally clear, these are the characteristics of the Personality of God

and when we start to analyze this structure
then it turns out that it is precisely the personality
personality structure
this is the path to such self-perception
when the external environment is the same
as well as the internal one
as the environment of the Soul, so to speak, Eternal

then it turns out
where would this level of management go ?
or this view of the Soul did not spread
everywhere we see Eternity
this is exactly the form in which this Eternity exists

i.e. it turns out that this is, in general, a certain position
or some point of view yes

for example, you can see the forest from afar
and can you go inside and see
well, some other one like this
the fundamental structure of this forest yes
there let's say what's inside

and when it turns out that we see as if
Well, if it's objective like that
then it turned out to be like another property of the external environment

after all, we can look at the horizon, for example
and we can consider that the horizon is Eternal
but we can see some finite quantities

it turns out that here we are looking at
it's like some kind of pressure from Eternity, yes
like some wind or like some windlessness
It depends on how each person perceives it
namely the structure of information
where Eternity is still the environment

and that's when we are this Wednesday
we are already starting to visualize
The most important point here is
see
where is the difference between Soul
with your Soul
and this external one
Well as if some kind of block of Eternity

it is perceived as a very big Eternal
and by the way, quite a tough array of information

and when you start to see the difference
then here is your physical body
this is a separator
there is a difference

and that's when you start
this is how to look at the structure of information
then it turns out
that projective systems are from all over the world
all external control systems there

i.e. if we have, say, the entire external world
as information, well, some optics, yes
which shines from all sides at the same time

i.e. the personal structure of the glow
the outside world
and your personality is somewhere
in such a huge array of information

then it turns out that personality management
at that level

it is the physical body first and foremost
given that level of information

means that it somehow highlights the personality
management is not such a difficult task

i.e., for example, in such a large array of information
of course there are forces there to normalize the situation yes

if a person has any health problems
it means it's natural when it's very big
amount of Eternal information
you can level it out by simply even that
that contact with this system
gives Eternal Fabric
i.e. the person recovers yes
from, as it were, contacts

here is where the next element appears
for health improvement in this technology
you just have to see and examine
as many contacts as possible
of your physical body
and this information of Eternity

then it turns out that you actually
as if you are entering Eternity
and in reality the body begins to realize
the structure of Eternal development
due to the technology of your Perception
and bodies
and the outside world turns out

and here the problem arises
namely the inner world
everyone has something like Thinking inside them
some of their own tasks

and when do you start
Now this inner world can be visualized
then it turns out that the tasks themselves are clear
you kind of create them yourself
pulling from the structure of Eternity

well it looks like some kind of so to speak "plasticine"
conditionally or figuratively speaking
and these figures begin to stretch out
your events
and "plasticine" is this environment
which seems to stick to the structure of Eternity
in essence, it is Eternity
but somehow in such an automorphic or something in a controlled version
as a certain level from which events can be molded yes
figures

and it turns out that when you start
personal factor see more
and you start to wonder

and what is personality
in general in the structure of information of Eternity
i.e. how does the personality look there

it turns out that this is exactly your level of will
the creative level there is the Spirit of the Soul
the level of development, yes
your personal in Eternity
this is actually the individual level
Where
Soul
Spirit
Consciousness
physical body
implement their own concept of future development

and here is the structure of Eternity
this is your personal path
i.e. this whole big Eternity
is inside your creative concept actually
according to your Eternal development

i.e. within the natural state of Eternity
i.e. I just gave it now
there is this certain light crystal there
or even a large crystal
which is located
in the ordinary dynamics of ordinary Consciousness
any person at all

and when you start this structure
bring it out on yourself

then your problems are solved quite quickly
because you are considering
not just mechanically
here you can take an element of information
find in the structure of Eternity
in this information

and do you understand here?
what is inside any structure
there is an Eternal Wednesday

and that's when the connection of this Eternal environment
with your understanding
with this information actions
that's exactly what you see, this connection
as already an action

then the action itself turns out
this is the connection of any system of Eternity
with each other

i.e. what happens
God created at this level
control action
as a connection as an intersection
different projective systems of Eternity

and this is exactly the topic
my Teaching about God
it's easier to see it that way
The eternal structure of His further development, perhaps?

that is why in the future God is always Eternal
if you think about this situation
then it turns out that He is Eternal because
that this is precisely the projective system of all events
brings Him to a level, as it were
well, the most distant from the current level of events
i.e. in the very Infinite event yes
controlled by God

but He is still He is still further

i.e. it turns out that based on this we see
although He is near, yes, He is present here
He is there, for example, as a person

can perform any actions

another question

that He shows control in this way

so that it is clear to everyone

this is when we talk about personality

He is a personality, yes.

here can be one person sitting at the computer

and do some management

and on the network there is the Internet for example

in any other virtuality

actions are visible

but the person himself can be perceived

as a certain level of action

although he is an ordinary person

the same thing, not quite in direct analogy

but nevertheless it works out here

that when we consider

here is the Personality of God as a man precisely

then in this Personality it is quite simple

there are some sort of

or naturally there isn't even any

as if there was no fundamental difference

meanwhile, there is information of Eternity

and what is information of finite magnitude

there is only at the strategic level

absence of finite quantity

and that's all

and when do you start

this is sort of a strategic level

search

then you see that God is definitely

for myself I have already found it and being a man

that this level exists

He saw it as if

and it turns out your task is simply to see

where is this structure of Eternity that is natural

Well, if you ask yourself the question logically

Eternal Soul

as soon as she starts looking

something outside the body

naturally she sees the Eternal Wednesday

and what does it intersect with
who does she cross paths with
all these phenomena become Eternal
for her at that moment

but if we teach all people
think like this and act like this
then it turns out that this is the difference
between Eternity
real Eternity that God gives
precisely for Eternal development
and some perceived Eternity
she starts to disappear

perceived becomes real Eternity

and when you see this status
like God
Perception is Reality
God's perception of Eternity speaks of that
that He Himself is Eternal
It perceives comparable quantities.
for His own, in fact, well, Eternal level
development of creation

it turns out that we can do the same with this
see how
solve your private problems
in the structure of precisely Eternal information

and here by the way
private tasks are very clearly identified
if we suppose we need to know
there in the hall in the city or in the world in general

what are the most basic tasks
for you now
from the point of view of for example there is universal salvation
from the point of view of your personal tasks in general

then it's enough to just consider
Eternal Configuration of the World
just look at some level there
precisely the optical Eternity

and then the main tasks are immediately revealed
which are revealed as information
then you can see it in action in dynamics, etc.

and it turns out that we have Eternity
precisely as a system of action
when static i.e.

well, actually "motionless" as if in quotes yes

Eternity

gives dynamics in the form of knowledge

i.e. it is sufficient for the comparative level

pay attention

for Eternity

and we have dynamics

although this is essentially a complex concept

because you still have to create a system

and here it turns out that based on this

you participate in the same way as the Creator does

that means exactly well as if in a general sense

Creator

any person

Creator God etc.

well, in creation as an element of natural Reality

i.e. well, something to create and create

when you start to see in the structure of creation

element of Eternity

then you see what the person can do

unite there

lead, transmit knowledge

it's exactly in that aspect well as if without words even yes

without words, mainly at the level of direct transmission

and here is the knowledge transfer mechanism

in the structure of Eternity

it is precisely this form itself or the block there

by the way, the structure is diagnostic

optical is like some kind of block of ice even according to logic

Well like somewhere for example there in the twilight

i.e. it is determined informatively even like this

here is the structure

the further the thing

the more saturated the tones are, as if some even

Well as if similar to

Well as if taking information from books
and take some as just volumes of books
and see
how they look in the structure of Eternity

then these are the ones that are saturated with Eternity
here are the volumes of the book
Well, if you take a volume of a book that has been lying around for a long
time, yes
on the shelves
and see the information of Eternity

then you can see this glow like this
right next to the volume it's bluish-gray

and from here to get for example the structure
silver control color
you just need to concentrate the structure
at the control point
i.e. the key idea of this system
find books yes
and here is the lever principle
you immediately recognize what is here

in principle, when you look at books
anyway, you will immediately recognize it in general
you are forming
still some opinion about these books
you will recognize it somehow

it turns out that the main quintessence of the book
do you see somewhere
and any information in general, not just books

and this one
level of constant, as it were, synchronous recognition
or let's say so means a certain level
where does some kind of quintessence flow or something?
for you at this moment

if you look
this is how this information flows

this is the structure in principle just like that
that along the "walls" of Eternity, as it were
knowledge about this book is flowing

i.e. interaction occurs
with level
where the platform is the form of Eternity
and they move along this form
as if information-containing systems

here you can go deeper into understanding
what is information then
how is it distributed
but this will already be a theoretical aspect of management

in this case it is desirable to see
applied aspect
i.e. light specifically
control of light optics in this case

and when you start to see
how this environment flows
which characterizes some object or control
to some point
then it turns out that Eternity, generally speaking,
at the level of, as it were, distant Perception
this is a drain of some events

Well, if all the events of the World
project onto Eternity
they concentrate and it turns out
Action of God
in relation to all to all events
kind of the opposite, yes
God's stream
God's lines

or these light levels of God

and it is clear why in the structure of Eternity
it is precisely the level of God that is separated after all

God originally gives the living Eternal
development structure
here Eternity is life itself

right here with God
Eternal life is exactly that
in fact the concept of "Eternity"
or the concept of "central Eternity"

and the management structure, for example, well , as such, yes
in Human Perception

we can say that yes the phenomenon is Eternal
it seems to be working out already
well, some kind of natural objectified
management aspect
some information that exists
like Eternal Wednesday

but a person can essentially guarantee, so to speak
at least at the Spiritual level immediately
that when he is Eternal
he can say that peace is eternal

and what's next in this World that he perceives
he can say that the world is eternal
but how can you prove it?
he can prove if he is Eternal

and when he already knows
that's exactly when he goes
by comparison level
this is how it transfers the properties of Eternity
into the external environment
then it turns out that in principle it is the person who decides
his own task

he is just the structure of Eternity
as if it makes it objectified for itself

i.e. he looks at his own structure of Eternity
and looks that he begins to recognize her
it's even a kind of, you know, moment of recognition
in a good sense

that this recognition always brings a solution

the solution is very common
in complex problems in very subtle problems
which often last for years there associatively
on some seemingly unique ones
or maybe some one-time signs
management is being built

for example, many years ago you had an image

and then you this image well as if you keep it in your memory

and then this image
which passes somewhere subtly
in your information
if it is comparable to the structure of Eternity
i.e. it will appear in the right place
you know that everything will be fine
although the situation is difficult , yes

can be controlled
why do i say that there is something here right away
knowledge of information
and here in principle it is quite important
what exactly is the structure of knowledge information
this is a very important element

and here is the knowledge
this is the correct behavior as it were
this is very important in the control system
understand that you are behaving correctly

because when you understand
that you are behaving correctly
and from this your events will turn out more optimally
then you don't have to

Well For example there to double-check some information channels
you don't have to worry yeah Means
It's better not to worry at all so as not to waste time

but in primary management practice
elements of experience still arise
and still
after all, any manager believes more, as it were
Well, it turns out that's exactly what it is, first of all
in terms of management
he looks at what God is doing

but it turns out
that when he looks at what God does
he is trying to understand if he is doing the right thing
i.e. time is spent on this

and that's when we use this kind of control
that you still need to watch and understand

what does god do
but you can learn here
in interaction with Eternity
do this constantly

and then the behavior will be natural
Well For example there like a skier who feels there
or is there a wrestler doing some movements
any athlete in general
who trained the controls

or not necessarily an athlete
and who knows the material well, yes
who controls through Thinking

when these elements
namely , in fact, well, some such systems of Thinking
large arrays become manageable
because you kind of casually
between them you move in control

and when you start to see this structure
this is where the main aspect comes in
where do you start building the future

i.e. this is where in management there is a construction yes
when you can just see
you can behave correctly

so here at the level of Infinite information
you are still obliged to build
and this is where the aspect comes in

that the Infinite system of information is Eternal
she actually brings you
to the tasks of your own life

i.e. it turns out you have tasks
not only because you invented them there, for example
you see that it is like a projective external environment
and the properties of the external environment mean
which actually well as if it sets tasks

She has these tasks too
but what does it mean to "put" in quotes yes in many ways
but not always
because there are people who just set tasks

if it's not a person
then these are external systems of some circumstances
then it's mostly visible
that the control is carried out by the person himself

and when you enter the structure of Eternity
and so there are many circumstances, as if circumstances yes

look at your own Soul
why is the Soul actually
Well how would I implement this level
and it is possible to perceive it
due to information coming from Eternity

pay attention
that when well even difficult situations
the person is often calm
because he does n't do anything
for example, rash actions
he can be calm
because this structure of Eternity is information
which is sent to him yes
it's like at the same time
and peace
and in general a guarantee that everything will be fine in the future
and he can take a difficult situation calmly

because the external situation
it's like basically he himself
but it is precisely at the Eternal or something like that level of realization
where it really is, that's how it's built
what is the Eternal Soul
and Eternal Peace
it is an inseparable system

in every structure of the Eternal World
there is an ordinary human Soul of his own

i.e. in essence, the person has no gap at all
i.e. how is the logic from this point of view
that's why for example a person then
having such a characteristic
in a certain position of Perception yes

has some meaning Well, there are problems , as it were

which relate to the concepts of "finite quantities"

here, after all, there is a problem of personal choice
as a rule people watch
on what's going on around
and try to implement
general, like, understandable, or something
or a systemically expressed model of behavior

if a person rebuilds himself and lives
at the level of expansion into Eternity
then he lives simply forever
because as soon as a person moves
expansion wave
he seems to be swirling around in it
how the DNA system is built

means the primary impulse of creation
all the time it is built into a DNA helix

i.e. it turns out that the action
static system
shows
spiral there
sometimes it can be block or batch development
but nevertheless we can in the structure
as if already an ordinary material fabric in fact Yes
we can have dynamic positions

there is human tissue
there is DNA
there is a gene system
just cells
but he needs to see the dynamics
here we can see through a microscope for example Yes
but we can see through Perception

and that's when we see the dynamics of light
from as if well, such a local tissue
then it is clear that it is only for us
characteristics of this light
to do in external Reality
the same as, for example, the material system
then it turns out that we
translate into the structure of light
material fabric
like some kind of eight it turns out

not quite upright there

and it turns out that in this way we get
constant level of communication
material fabric
light, i.e. Eternal fabric, etc.

and when does a person get used to it?
when the glow of Eternity
and fabric
for him it's the same thing
at least somewhere there on some level of Perception
in some cage
this is where he becomes Eternal

and really
events unfold around him like this
whatever happens there
external control systems yes
he still carries out his business
one way or another
but usually with the best option
than if he had not considered
such a position
namely Eternal development for example

and further it is clear that the position of Eternal development
this is generally speaking as an absolute characteristic
for Infinite Development
for the property of the Soul
expand into Eternity

to perceive some kind of Infinite horizon
model this in his Soul
he must understand first
at the level of the Soul
how is Reality structured?
then it's exactly that part
into which he looks with his physical sight

and pay attention to this
Well let's say if we put the question like this
why do you often travel
here are the people
Well, they feel a certain desire to go further there.
experiencing some resistance from the external environment
i.e. some pressure is growing yes on

light pressure

i.e. the light is generally background at the control level
but there is some following light pressure

how exactly a large mass of light

that there is generally unknown information there

it is a certain amount of information

some mass of light

including, for example, physical

see something for example Yes

and through physical light

we perceive surprise

i.e. some new phenomenon

so that at all

well from God's point of view

how to create surprise at all

for Himself

this means it is clear

what to take a large array of information

like some big ball there is a sphere

and that means to clearly record

somewhere attention on the sphere

while it's spinning it's some kind of big array

this Eternal array for example

take some new event

consider in conjunction with that

that some big wheel is spinning

then we can say

what for this big wheel

a one-time event is an event

in principle, absolutely controllable

and it can be made unexpected

i.e. it turns out from this point of view

unexpected event

it is an element of absolute control, so to speak

from the external environment yes

from external information

Well, that's a peculiar position of explanation

in this case here
however, it is simply logically so

and it turns out
so that unexpected systems are manageable
we need to make sure that everything
Well as if large arrays of information

from which something unexpected may arise
they were absolutely controlled
from your personality point of view

i.e. the light coming from your personality
it must be connected somewhere or supported there
or react to something somehow
with this large array of information
and get full control in any case
over any array of information

i.e. from the point of view of logic
that's why we're back to the topic of travel
a person strives to travel
it sort of pushes this light apart
because it builds up in this way
control of external space
but in essence he seems to go deep inside himself

here is the logic
the more a person develops, the further he goes
the more information he accumulates
as if inside myself, yes it works
and the more it goes in width
the more deeply it develops, the more deeply it turns out
from the point of view of light or simply knowledge or logically

and it turns out that based on this
we have the next level
For example there for the treatment of diseases in people

I just need as much information as possible
perceive
external
to get information about the disease there
make health information there
as if in this place

i.e. how to simply fill it due to that

what does it mean you perceive large arrays
and there is Norma and everything

at the point of connection between the Eternal quantities
this is precisely the physical body of a person
you just take and adjust the Perception
on large arrays
and that's all
nothing else needs to be done

some silver one of any color is fine
golden sometimes well light tones

this means that the system distributes light
and which actually solves the issue
well, given your level of external control
from the side of the Soul , for example

i.e. you see clearly
what is the information of the Soul
there is a body there
Consciousness
often it is one piece of information
The One Action of God
your action
and for example the Actions of Eternal Development
towards you

because in this case I entered this
a few there with a direct level of novelty so to speak
element
external development system in relation to you
as some kind of external control information

Well, logically that's how it is
because Eternally to develop
and you if you have an Eternal amount of information
coming towards you
then it turns out that this information
somehow it still affects you
Well as if it controls yes

at least not what controls
but some external control is carried out
in general, your tasks, among others

and if there is a case to turn to God
you can always just turn to us
get control, advice and knowledge, etc.

from God there is always Eternal life is real
i.e. it is immediately visible there
there is something happening on a human level

why is god and man at the same time
because it's clear to everyone here then
that God is a man
He always gives everyone Eternal development
because He has already given Himself such

and it turns out that then
this is exactly the Eternal development
this is just the way of God to Himself but where is He man

but when you look inside
your own position
do you see yourself as a person
i.e. your Soul for example Yes
journey inside
it is always maximally you yourself
it turns out that in this, in this control position

to say at all
what does a person's personality look like
how is it developed
in general how to do well For example there is such a management there
to realize what a person is for oneself
in this position or in general as a person

he is a man who can look around
study knowledge for a long time
but he still comes to himself
and is aware of himself as a person
where is the external knowledge that he mastered
but he is at the moment of realization
looks at himself again

i.e. to look at yourself steadily enough
and you actually have it often
generally speaking, absolute
and one that is so close to ideal
The norm of events at this moment

but at that moment
you do as God does
for all development

You endlessly make some time element there
and it turns out that next
as soon as you look at yourself next time
You should feel this difference
just once you looked at yourself
on your personality
then the second time ^{yes}
so first you need to get distracted ^{and} then look again

i.e. you enter
some kind of artificial action itself

you leave yourself without ^{for example there is} no control
for some time in this regard locally ^{yes}
which I said about
then take it and look again

and to leave yourself without control
to do the second action
I need to ^{somehow} turn off the control
from this optics where are you yourself

Well for example, why does a person not perceive himself
How ^{come} he doesn't constantly ask himself questions there
and constantly does not respond to this
that his personality is such and such, he is such and such
in the absolute sense

different points of view
it means that for someone this person is one person
for another person
there may be another point of view

then it turns out
what a person should value and bear first of all
my own point of view ^{yes}
of his own personality

and the same thing here
as soon as you get there
into the system of one's own personality
you control all the endless arrays of information

because they are no longer in terms of huge blocks there, yes
they are you
where is your very own Eternally living physical body

precisely the harmonious level
physical body
allows you to solve, generally speaking, all issues
there is no pressure there
An infinite amount of information

you have formed as a person
you have your own physical body
and all of it is Eternally living
because you know this picture of the world
you know this side of the world

see Infinite level
my one well as if a local physical body

and this is clearly visible on the optics
what looks at the physical body
and straight golden light goes there
Eternal life

i.e. everywhere there is information of the physical body
although at the same time you know
what are you here and what do you have there in some place
and the light comes out
this is exactly where the information starts to change
properties and form

i.e. information that is familiar to you
looked at the physical body and
and there, for example, they perceived it as informative
body forever

Well, this is useful, this is correct, generally speaking.
but the information changes too
for example, to diagnose an organ
it is not necessary to see the organ in its entirety
it is often enough to do management right away
so that the organ is healthy yes

then why do you need to see it?
the point is simply for a person to be healthy
what's the difference, well generally speaking, what are they in essence

here from the management point of view
only control links matter
that a person should be healthy
and that's all

then then the criterion of his action
is that a person should also simply be the same
is built the same way as God is built
and that's all

and here is the knowledge of God
internal ^{yes}
With soul
knowledge of God ^{there} by body

makes it easy to manage
without wasting time on detection
there are, ^{as it were} , negative systems

if a person doesn't know and it's not necessary
we just need to make it healthy
and that's all

another question if he knows then we need to get around it ^{yes}
i.e. to be able to make it so that he
regardless of this knowledge was healthy
i.e. if he knows that he has a certain diagnosis

if he is healthy, just ^{for example}, absolutely healthy
this means he has third tasks
and he usually invites you
to do something
there is the next thing to do is control
there to participate in some kind of Macro-creation tasks
proactively

and then it turns out that
not necessarily any person by the way
there sometimes regardless of health condition
just practically healthy

when he participates it's better, apparently it's easier for him
but if he should get well
then he must do it
from the point of view of the technology of Eternity

and that's when you see

body information form
exactly different
why shouldn't a person's body change over the centuries
i.e. it shouldn't change at all by the way

the body is given forever
no mutations or modifications
nothing will happen to the body
with the physical body of a person

and from this it is clear
that all external systems
any configurations of information
can be cited
firstly to the Eternity of the body
and not only one ^{but all} physical bodies
all together
in one impulse

for example, well, well let's assume if we consider
there is a position of universal resurrection
that's what we're talking about here
that external information is folded ^{as if} desires
and it takes the form of people
those who must be resurrected

or which must be perceived
at some point, ^{for example} , by everyone ^{at the same time}

because there is Perception
it's like it's periodic
i.e. when you can see ^{there}
well, some systems of those who were initially resurrected, ^{for example}
and at the information level if you look
in Infinite Development
then you can see such a level of Reality
when you see the whole world like ^{this}
that all people are alive
this is the level of Reality
to see in Eternity

and it turns out that here
the level is exactly ^{as if well,} resurrection ^{so to speak}
he is already in that Reality, there is no such concept there
there anyway, everyone is already alive, and everyone is Eternally Living

i.e. they were resurrected

then this information was sort of disbanded
the society itself , so to speak, yes, in the social order
and there are only Eternally living people here

just look at this Reality

it can be done, for example, at the management level
somehow create it so it can be seen
but it is clear to everyone that the Eternal system of development
necessarily implies restoration
any element of an earlier

and therefore there is not only resurrection
there is any restoration if needed
any blade of grass that ever grew at all
any creative object of information

and it turns out like this , then it's clear
what for example why if you ask the question
why good will always triumph over evil
here in this direct version

that the arrays of goodness are enormous in Infinity
but the light from there still comes here
The world is still evolving
into the structure of Eternal development

and if a person thought that there is Eternal development
Well then yes of course there is Eternal development
this is already information

and then we need to study
the object of Thinking is obtained
control is given here to the object of Thinking
into our reality

and it turns out that we can say
what does the element mean development of Eternity
it's just like a harmony of thinking even
exactly that Well, harmony is where there is consideration of factors
that any thought is Reality

and when we start to see this technologically
i.e., for example, a person can do it there through Thinking
by controlling the technologies of Consciousness

he can restore tissue yes For example there
can perform resurrection
he can do some kind of control over the equipment there, etc.

then it turns out that all Reality
which is sort of located
at a great distance from you in time
she is actually moving away from you
on a certain road
which has a certain shape

and if this form
we begin to transfer into the structure of understanding
then this form is the physical Reality
custom and moreover
that's the one we just walk on there
there for example there is land, sidewalks, roads

and from here it follows
that is formed here at the projective level
Reality
which you are walking on
this is the level of your own management
the control of God and other people

and here it means to configure
your own event
often does not present any problems at all

just for example there if we assume we have
even this elementary thing

there is something that needs to be done in some building
Well, the store is just
he's big there for example, multi-storey
took control
and you can see how it is quite easy to configure

i.e. as if there weren't even any links there, generally speaking
the light there is different
I'm actually showing it right now
that light which passes into Reality

this is how God perceives Reality in general
He
He also creates light.
and as soon as He looks

He sees Reality itself.

and we need to learn to do the same
it turns out you have to be able to
translate light into Reality
and moreover, to create light in essence
but this is already a distant strategic task

for easier management
this is the created light
consider that he is simply in Infinity
then there are no problems
it turns out that this light created in Infinity
he is already the light that he brings to you
exactly the solution to your problems

and that means solving problems, i.e. action yes
this is the light of Infinity among other things
and to a significant extent

and when do we start
inside any event
here is how to draw the structure of the action
Well, inside there is material fabric, yes
there DNA molecules atoms interatomic level etc. intergalactic level can even be
taken

we see that there is a level of interaction
where the carrier i.e. the link level of control
is a certain light

if there are many phenomena
then this is precisely the expansion towards Eternity
this is the dynamic

which is perceived by a person
as the dynamics of the final events of the link events

here is the final system, this is some kind of link, yes
some pivot points
this is a simplification of management

if you for example start
bring the structure of Eternity into control
and at the same time the structure of Eternity itself, for example Yes
you are controlled simply by your personality

i.e. you
your personality
and Eternity
these are kind of organic concepts
for you there is no such big block of information
large array
it's natural for you

Well , for example , that knight there puts on armor
you just have to get used to it
he doesn't notice them later

and it turns out that here
it's like the same principle or something
in the management environment
First you work with these blocks
then you start to get used to them
and then it becomes natural for you
you don't notice them at all

in a natural state a person does not notice
generally speaking, he doesn't pay attention

In this case I gave the technology
when you see this Reality
you must return to your normal state
through the technological level of control

but you know that you are already there
in Eternity
at a natural level

then it turns out at the level of natural control
there is always a solution to the problem that is positive for you
Always

and that's when you get to this level
well, some kind of like a beam looks very bright, then
but it's not that bright
and in terms of knowledge content, let's say so Yes

and when you are in this beam
There is an infinite number of actions going on there
you see
that you will always solve your problem

then in principle it is a powerful control mechanism
this is essentially a methodology, generally speaking
and the accuracy of the solution to the problem

that's when you'll learn
this is the level to bring to yourself
this ray
it turns out that control of any environment
i.e. development towards Eternity
this is your natural state
which implements if necessary
this is this concentrated beam
management

i.e. under normal conditions you can
Well, actually, to manage at the level
like any systems you need
and in cases if you need
it is precisely the structure of Eternity that we would like to advance
forward here

Well, there is the Eternal Development of Information
some light of Eternity
it looks like light as an event
and you still need to be able to
this structure of events as a rigid system
often even promote

just imagine there is some element there
Well for example, you can even take and examine
in the final value
although in reality it will be a ray there
or is there just a straight endless line
but nevertheless we can consider some element
like this element where the light starts to bend

and this is the compression of light
it's a certain bend, yes
this is the human body
as you would like to know it

for example, completely right up to the cell there
to each muscle there any tissue is simple

Look carefully what you can see
such as collect bone tissue there
and what is the difference over that

build muscles there, for example
muscles are built in remote light
and bone tissue in close-up light
support system yes musculoskeletal

why bone tissue is musculoskeletal

and why did God create exactly this gravity system

and because in Consciousness
this is a specific place specific place

i.e. the original status of Consciousness can be seen
as in the structure of Consciousness in general
every muscle there yes every cell
is functioning

and then you start to get used to it
to the structure of the management of any system

i.e. to you in the future
again when you practice practice
you won't have to search for every cell
you wanted to make management
it immediately appeared before you
the cage you need in this place

and when do you start this system
Well how to draw something in management
it's not just about cells
that's where most of the people are
have completely healthy cells
at least there are no dangerous pathologies there

and it turns out that what we are talking about here is that
that you just end up seeing events
which are favorable for you
and you understand this information
at body level yes
at the level at which God understands it

and that's when you come to this understanding
then this is precisely the expansion of Eternity

in this technology
in this particular seminar today
it turns out that here you have today's concepts

you can develop ^{there} into an Infinite system of knowledge
see how the structure expands The devil is of course ^{there}

although this is still today 's ^{information}
the word "today"
but there is development into Infinity

i.e. the light of a single concept in this system
has infinite development

and then you see
that all projective knowledge systems
which all systems have
not necessarily even for people ^{there}
even the cells have ^{gained} experience
some molecules ^{there}

all creative knowledge ^{there is} positive development
this is a fairly powerful concentrate of Consciousness
which is not immediately visible ^{there}

but with a certain dedication ^{there, so to speak}
human
he can see the connections that are available
precisely from the point of view of the construction ^{there}
Macrogalaxies microgalaxies ^{for example} Yes
simultaneously Macro micro level

and you can see that this is the light that is given
^{well there are} others who know ^{there} For example ^{there are saints} ^{there}
^{well,} those operating ^{there} at the level of Infinite development
or understanding the tasks of Infinite development
all this actually configures the information so
what comes naturally
as if the human level of God

i.e. God is just a man who has
specific Physical Body
specific action

and then it turns out
what is the difference between this point of view then?

as soon as a person sees God like this, ^{for example}
he becomes ^{generally speaking} Well like the same or ^{something}
in Action and Infinite Development

precisely in Action

that's why i'm showing it now
that it is the action that is a very important characteristic

and that's when a person stops feeling
this is ^{some} level of that
what is between him and God
there is some isolation
when he stops feeling it naturally
and understands that this isolation does not exist

i.e. he is in direct contact with God ^{yes}
at any point
naturally

not even that there is some kind of address there
and there is no gap there
in his there actually ^{as if} Perception
or in the action of the Soul
in his condition ^{so to speak}
to gain knowledge
because everything will be fine for him ahead
or just good in general

it turns out that he gets there just the same
in the expansion of the Soul towards Eternity
exactly into such a system again

that and at the same time specifically with the Personality of God
it interacts in harmony ^{yes}
and in complete harmony

and then it turns out you already get
that you set the tasks yourself
you must solve them yourself
all creative tasks are then solved
absolutely definitely by you
you can even record time

and in this one, it's quite nodal
^{well,} there is enough free position, ^{yes}
try to implement this control
already in today's seminar

i.e. Forever
towards the Eternity of Perception

towards God

this is the one Eternity of your free state
where you implement any control

then the control is really carried out
often even as if by itself

it is enough to make a well-controlled thought
put
it means it is being implemented

but this is also the power of this kind of management

I'm finishing today's seminar for today

Thank you very much for your attention
