

GRIGORY GRABOVOY
The Teaching about God
Expansion of the human personality into Eternity
03.02.2005

Hello again
the topic of my seminar today
this is my Teaching about God
Expansion of the human personality into Eternity

in this case the topic means it is set in this way
that the concept of "expansion" itself is meant
Well as if in the first degree yes
This is an informative extension

i.e. the development of personality precisely into the structure of Eternity
where is the physical presence of a person for example
in Infinite Development
this is also a factor of expansion after all
well, some kind of external development
when a person develops his structure
into the structure of seemingly distant events

and if we take a closer look
to this situation or information
then distant events for example
more distant yes from man into the future
they are considered as events
with ever more careful control over oneself, as it were

Here's how, for example, a person can separate information
distant future from the nearer one
Well For example there take a million years into the future
and as if for example, there is a hundred years into the future, yes
what is the difference between this information

distant future
still starting from there with a hundred and into Infinity
this is still a more careful, more dynamic control
a person has a question about himself

and if we start from here
for example, move back to yourself and to personality
then such a specific task arises
what does from a remote level mean from a dynamic level

we have to get to the point where we can connect with ourselves
already in a static position

and here is a fragment of Consciousness
which is sort of engaged or can be directed
so that this is human development
into the structure of Eternity
to fix exactly how the technological tool

this fragment of Consciousness works
as if a dynamic system
somewhere at a certain level of Eternity
here is the information of Eternity
this is specific information of life
i.e. "Eternity" and "life"
here the concepts are practically identical

and when you start looking at the structure here
Well, why is it like this anyway?
why if we take
in general just ordinary information yes
in some distant future
then we can consider
that it is simply information of Eternity

but when we consider the development of personality
we are always dealing with life

because there is a person's current life there
always directed towards that structure of Eternity
which is precisely life
and what do other shades have to do with it

from a greater distance
it is a rich silver color
when we approach
it takes on a golden color appearance
i.e. there are even other shades of informational
color management is obtained

and if we want to understand the light nature of man
from this point of view yes
for example, a person living right now
what is its optical medium yes
from the point of view of external analysis

and if we consider man in Eternal development

how does it look in color
just set a simple task as a management task

then it will turn out that now
to get a signal and look at yourself
in color perception
a criterion arises here
For what
where is it needed
from what point of view

and in principle management
i.e. the dynamics of awareness is such
that being at the point of Consciousness "now" "here"
consider complex colors as if
It can be quite difficult for a person

because he ^{kind of} has to abstract himself
go beyond the structure of your Consciousness
to look at ^{oneself} from the outside
it complicates ^{things well} as if it lengthens time

Of course, anyone can do this
you just need to know the technology
and at the same time the person is recorded
in the current tense

i.e. it has a local spectrum of colors
each of which
as soon as a person penetrates the tissue structure
has Infinite properties

i.e. the color emitted by a person in this case
it actually means
Well, the transition to the tissue system
you can see the fabric ^{for example} yes

if you look at Eternity
forward to Eternity
i.e. a person who is precisely in the information of Eternity
then the colors there have a static structure
and they are expressed
completely confined to certain static areas
at the same time they are flatter there

i.e. if in the current time a person is expressed
so more such volumetric forms of color

and more uniform colors, so to speak
there they are more diverse but flatter
because there is a very large layering of events
is happening

and now if we want to consider
it is the expansion
that's how it would be even in a mechanical sense
and in the optical sense of human optics
into the structure of Eternity
then you can see the following, well, property or something

that these multidimensional systems are like three-dimensional ones, etc.
that exist near a person
Well, as a rule we are talking about three-dimensional systems
which pass, as it were, into a flat version of Eternity

then it is clear that the structure of Eternity
generally speaking, it radiates
from any perceived system

i.e. then we end up transferring control
into the plane
but the plane is here, the table, the plane is there
some object of Reality, plane, etc.

it turns out that in the structure of the plane
there is always a radiation into the structure of Eternity
we can find then
points from which radiation comes

i.e. development of personal information
the structure of the future is such
that we get the structure of Eternal development
actually from the distant future

i.e. the entire material world
which is perceived by a person
in this case it can be considered
as a projection of the Infinite World
in the future

and from the structure of any object
moreover, any social event
I can understand
whose projection is this system
from the point of view of the Infinite number of future events

and from here if we consider
already an inseparable connection
current events and the future
then you can even determine the shape

For example, there is a demonstration on the street
you can watch the demonstration with your physical eyesight
see absolutely clearly
I'm specifically showing it with my hand
where could this be located

demonstration for example here and here
a little higher, literally there, well, at a distance of about 50 meters
a meter above the demonstration
the structure of future events is located

and the projective form of this structure
this is this specific demonstration

i.e. if we want to determine
for example why is a person in one form or another yes
or in one place or another physically

then here a rather ambiguous situation arises
in general, it's even a multi-tiered task

a person is an absolutely free personality
and future events
cannot be an imposing system
what is the position of man now

therefore a person chooses his own path
it means it should dock
somehow, well, we know how
there informative intellectual
as a rule, this is the level of the human Soul
with Endless Events
and in fact he simply participates in these events

that's why he's going to this demonstration now
or goes to the store does not go to the demonstration
so he kind of negotiates
with all future elements of Reality
chooses some optimal solution
and still decides for himself

it turns out that the manifestation of a person in the future
so that he may live forever
he should have this principle as if an agreement ^{yes}
constantly throwing into an even more distant future

i.e. he came to an agreement with one link
projected got to the demonstration
or didn't get in, ^{for example,} didn't want to
but then he must at this moment
Control with consciousness
the next overlap ^{of events,} the next link, etc.

i.e. and when it starts intensively
^{Well ,} by the way, that's how DNA develops too
next signal throw
always further than the previous one ^{and}
i.e. formally the human tissue system
is always in integration with the Eternal development
precisely on information

and when you do it with Consciousness
then it turns out that this is how it is
you translate
structure of one's own personality
into the structure of Eternal development
but already in a natural way

i.e. you don't need to strain yourself or get tired for ^{this}
or do some complex exercises, etc.
you just need to translate the personality structure
into Infinity

mechanically literally
take optical phase expand
and that's all
and not just there in ordinary space
namely, into the structure of Infinity

and based on this, as soon as you start
to do this
and I said that Infinity is projected
to the system level
^{for example,} specific quantities ^{and} spatial
in what a person perceives

then here it is clear that the Infinite quantity
it is distributed in Perception

at the level, in fact, it is the same
how does it look on the information
man's action woman's action

i.e. Infinite quantity has a gender characteristic , so to speak
Well, that 's basically an element of human development
by gender
this is also the development of the structure in Eternity yes
structures that are laid down by God

and when we consider the problem
like God, yes one
as if it were developing like a human being
He is alone
then he should get a monolithic system
monolithic
in this case it is information of Eternity
which would have the appearance of being
gender distribution yes

if we start to consider
the structure of the human sexual
there it is meant gender male gender yes female
some third options may exist yes
but we are considering
known personality characteristics

then it turns out that if we, for example, clearly record
structure by sexual characteristics
then this is the structure of the next Perception
i.e. a born child
for example, which perceives
the next Reality, etc.
it clearly records everything that exists now
from the point of view of Eternity
i.e. there is a kind of control by minus space
i.e. past events

because he who looks forward
he already knows what was behind him
this is its development platform

it turns out that if so
then the supporting information system
is this manifested in Perception
Eternity

and then it turns out that it is ^{actually possible}
this is a very good system
to control the human body

i.e. a person can create a body shape
^{well,} within the limits of a known value
and the one he needs

there is a very powerful control system here
physically, precisely by the physical parameters of the body
arises

because ^{well} the body is considered in general
as a result, ^{so to speak,} of life activity
two organisms ^{means}
namely male and female

and it turns out if we want to control the body
precisely from the point of view of the tissue system
we should also consider the information ^{yes}
and distribute it across the system level exactly like this

then we can differentiate
to grow more intensively, ^{for example}
some missing element
^{well,} let's say a person has an organ resection

then here is the distribution by gender
allows you to systematize the structure
and this is what Eternity is manifesting
in the form of reproductive systems
The One Eternity manifests itself in the form of sexual systems

and here it turns out
what does the process of systemicity ^{mean} from God's point of view
it's ^{like} a branching off
^{for example,} monoinformation of Eternity
for God
into the structure of man and woman

but the branching is like God gives one
to everyone
then it should be the same
i.e. both for men and women
there is a level that is absolutely the same
which allows

^{For example} there to develop independently Forever

just like God does ^{Yes}

and at the same time it is still systemic
because in this case
this is the transfer of knowledge , the birth of children, etc.

and it turns out that if we consider
Here, for example, is the development of Eternity
even in human understanding

i.e. from God's point of view it is already clear
what from a mono system
a multi-level system is developing

but from a human point of view
it should actually be the other way around
people should have
high level of concentration for example in Consciousness
and through this level
the same work is done that God does

and in order to get
this is like a reverse level of control
need to consider then
how the personality of a person is integrated into reality
to myself

because in Infinite development
primary element of personality development
will meet anyway
through Infinite Time
your own impulse

This is basically a normal physics problem
if you launch a beam of light into Infinity
he will go through all of Infinity
and it will still have some impact
but during this time he will accumulate colossal experience

i.e. a person is forced
to be confronted with oneself all the time
but at an incomparably higher level
of its own development is obtained

the same for God ^{yes}
God has
each element of its own development

it turns out to be incomparably higher

because any element
after the primary impulse
as if a reaction or diagnosis of the following condition
it already contains an infinite amount
a huge number of the following events

then God is forced
constantly solve the problem of interaction
in fact, yes, with Himself, as if from a human point of view
at least that's what happens
where is the next element
much more information-rich

then the whole outside world
which a person perceives
this is his own reaction
but in its more, as it were, greater, more intensive development
through Infinity

those. any item
which in Perception comes into contact with a person
for example with human vision
with body yes
it is the product of Infinite activity
the man himself

and in this a person turns out
he is similar in actions to what God does

and therefore if in this way
then his own body is canon
by which you can create
any other body in principle

then any other physical body
it is controlled by this person

i.e. he developed his personality
just as God does
but spread it to another person
and that's all

if another person has some problems
there are physical ones, there are physiological ones
it can simply be standardized for everything

because the person who is in charge of management
He just developed the analogy and that's all

he developed his personality
knowing the Law of Information Distribution
what is external Reality
this is basically what it is
what a person perceives
about myself
myself

and if so, then a person can control his hand
Well, at least with my body
so it turns out that he can naturally control then
external environment
in such transcription

the only difference is that
that here he seems to be in control
there physically with the body
and there he is forced to enter the structure of Eternity
and simply determine the path of movement towards yourself

i.e. in fact, a person has the opportunity
never get lost
even in physical space

and even more so if we spread it
this Reality into the information level
there in the level of Spiritual development
then he has a completely clear opportunity
always find a reference point
in the Infinite level of diverse phenomena yes
life

and if for example the level there is Macrosalvation
Salvation of all
this is more often the required level
in order to do some action the following yes
in the World

then this is the level of the next development
when a step towards Macroregulation has already been taken
and then the person thinks
what to do next yes

further goes well as if high often control speed

what to do next specifically
how to live for example it's happy there
how to make management of Eternal development

for example, where is the guarantee of that
that a person having mastered a thousand methods there
and the main amount even if it constantly works yes
and works systematically

where is the guarantee that he is alive
not just there forever but for example he lives like this
like this, for example, from the point of view of information
it's all the same
and he lives like any other person
For example there a million years ago or there a hundred years ago

well from the management point of view
million years ago
overlaps for Perception
as if into the information of the future
still the Infinite Future

because the further we go into the past
the more space is compressed
and there is a kind of natural release of information
into the future

i.e. it goes
Well, there is a Law of development of optical systems.
where there is too much information from the past
so it falls into such a system of perception or something
for example, human consciousness
this is what from a human point of view
what Consciousness can contain
it is some finite value
for example the whole world is this certain sphere yes

if you go to the Infinite Past in minus
The endless past begins to displace
Current events
and the future is obtained

i.e. Infinite Past
always hits the mark
into some element of the future
possibly Infinite

and it turns out that based on this
from the point of view of the logic of human perception
based on this if
why did I say "possibly Infinite"
because if in the Infinite Future
it turns out that we don't really record it
we do not create stability for the Infinite Past

i.e. there is Infinity there, as it were well, such
requiring constant concentration
size
in the future Infinite
in the past for example
it turns out that a person begins to perceive
as if dynamic systems are constantly

but man is accustomed to perceive
including static systems
by sight for example yes or by Thinking

and it turns out that based on this
we have what well For example there to create dynamics yes
to create dynamics inside the human body
need Infinite past Infinite future
how to close

then the static outer body
creates dynamics within
there is blood moving there
some molecular processes are taking place, etc.

i.e. if we take for example
An endless future picture of the whole world
and that means all the past
then it is precisely the projective section, as it were, the section
in general a real link
is the man himself
and any person

it turns out from the point of view of logic
It seems like the same place
in the current time all events of the World
for example defined
some one projective meaning of time

there the current second and precisely the future World

and the same thing from the past
the intersection occurs at this second

those. in fact everything
all systems fall under the control of one person

but in relation to God it is so
everything falls on God

and when do you start to see
that this applies to all people
then from the point of view of people
there is one person
but at the same time all people exist

why do people look alike and have the same shape

because the optical system
there can only be one
it is precisely in this manifestation

so, and based on this it turns out
that expansion i.e. spreading of one's personality
to the level for example there are creatures of the world yes
to the levels of world governance
this is an understanding of that
that there is basically nothing special there
anything special or complicated

you are already in the projection
of the entire Infinite future and past
and this projection is projected
as if in your personality yes
has the level of such a human body
human body

and if we want to see
Well as if in a deep personal understanding yes
why exactly is it like this
it's not like some light was projected there
and such a body appeared in a specific person

and because what does it mean if we get down to the essence
we can see
who can this person help
i.e. who can he save?
to whom to bring some benefit yes

well, some kind of principle of kindness
which takes place precisely in the Infinite Future

pay attention here
help someone
it always refers to the future
but he is a man
or at least in the current time

but man is still created like that
what time for God
past present and future
it's all the same thing
then a person must have a level
which would have the same characteristics

so here is the only place
which allows one to control the likeness of God
as God does
this information
this is the Eternity of the human body
i.e. it is precisely his presence in Eternity
but from the point of view of precisely somehow there is still more control

then for him
past in Perception
will have the same meaning
like all the future

and he begins to have confidence
that he really lives forever
because it is located
in the correct control position
inside which there knowing which
no negative event of the World
it's definitely not enough anymore

i.e. he needs to clearly understand and calculate
that there really is no World event
his well it really won't hurt there

then he should
it is precisely the negative that will not affect
then he should
take control of the entire World system
down to the details
and here is another level of expansion of personality

just like God does
for management
is the accounting of private systems of the external World yes

and this is this system of so-called particularities
quite often
highly objectifying the world
system

because it is enough to allocate in the future
some special case
but it is correct to highlight

and it may be so for the next five years
no problems at all
or there ten twenty
just one is enough
precise selection of a particular task
for you personally

if you want to have Infinite development right away
when solving one particular problem
it is possible
but for this you need to know all the structures of Eternity
these are the ones that you have defined as Eternal structures

i.e. here you must clearly define
in my personal opinion
what is personality for you then in Eternal development
specifically indicate some specific things there

and if this doesn't match at least once for you
for example, do you imagine yourself in the Infinite Future
that you have a vase on your table and there is, for example, there is a flower there

if there really is no such thing in your future
then you should be able to build it yes
to get precise control
i.e. you must create it

but as a rule, this is how it is in life
what is an absolutely static future
which does not change at all

and there are, as it were, varied systems
absolutely static refers
to known physical quantities, for example, yes

well, those that don't change
in the visible time range
but the strongest structure is still the Spiritual one
when it is clear that certain events are happening

and when for example you see that the event
Well it happened there
and the influence is already underway
to the Spiritual sphere as if post factum Yes

to the background of management
at an earlier time
then earlier time can acquire
personal character too
i.e. the time of the past can organize
certain personality structures

and if, for example, you think about it
like the Souls that are born by God
Well, new ones come to Earth
how are they informed yes

then here is where the intersection occurs
from the level that at first they still pass
the level of the past, as if on information, so to speak
and then they get there in the current time
with the capture of the entire future there

and that's when the actual capture happens
this is the most interesting moment that manifests itself
what's here well in general it works out
what if for example you have control like this
well , you need to do some action, right? For example there
in the distant future

and consider it from the point of view of, for example , human evolution
what will a person look like
Here are some of his physical actions
the same ones are preserved
completely like he is now, for example
and in the future, who is he there?

then you will see that some have been done
here are the actions now at this time physically
you will understand clearly
what's there in any billions of years
they will be the same they will not change

i.e. the human body always reproduces
the same actions
one of the levels of development of the Personality of God
any physical action of His Body
Always preserved Infinite time

if you clearly record
what did you take there rubbed your finger on your finger
made some kind of movement with the body, yes any
there you can make a move

then any sign is appropriate
only to the physical body of a person

and if you consider the canonical path , so to speak
which connects with that
what if you wanted to do it in the Infinite Future
then you should get the same thing
i.e. a sign of self-recognition in Infinite development

and this is the level of your acquaintance
with the outside world
i.e. a person always perceives the World
as a familiar quantity in fact

here, pay attention to what a person can do
For example there to be amazed by some beauties of the outside world
some unknown places, as if new

but when he just looks
The world seems familiar to him

it is very important that he sees in principle
well, the design that is known to him
i.e. at a certain level of Consciousness
he already had this information

or here if from God's point of view
God singles out his own element of Perception
God always highlights what is familiar to Him.
He created Reality.

and by analogy with this
it turns out that this is the level of the familiar World
this is the static stability of the World

when the same building exists for all people
not because one is a tourist and the other lived there for a long time
because there is a completely universal level
the level of the World being generally familiar to man
This is not news at all

and here is this situation
Well, that sounds a bit unusual.
It seems clear that it is familiar, yes

we are talking about stability information
in Human Perception
that yes first we get into the structure of fame
then comes Perception

if a person even perceived it logically
all the time the world is like there for example, some unknown quantity
then there would be very little time left
for the process of Perception itself

the main resource would be spent on process stability
as if a constant primary recognition of the World

and it turns out that once a person
practically perceives
Infinite system
in general, real information right away
then the parameter of acquaintance as such
by and large for the main one at least
there is no number of people

they learn almost instantly
as if they are mastering
the entire system of the external world
then they detail something, they just detail something
and that's all

and it turns out that the main process of cognition
to react as quickly as possible
on the structure of the external world
well from the point of view of human logic
and then comes the detailing

i.e. capturing a large amount of information
further details follow

and it turns out that when you start

so the process of detailing is precisely
do it naturally for yourself
i.e. to arrange according to some tables of features
or just view it in your mind in the form of dreams

By the way, there is an interesting level here
that sleep is a property of the organism's systemic nature
i.e. from the point of view of that
that a person gets into an unusual state , yes
when he sees some systems
different from that
which is simply related to Thinking
and at the same time he can see some plots

i.e. the dream is often characterized by that
that this state is somewhat unfamiliar
for a person
from the point of view of process stability

i.e. there is a plot but no control , for example
there is a store
but in a dream you can buy something there
but for example there in Reality a person understands
that is a somewhat unusual unstable system yes

and now if we distribute the system of wakefulness there
as a system as if familiar to the World yes
and for example a dream
Well, it doesn't have to be a dream
you can take some level of Thinking
which is happening
against the background of the distant Infinite magnitude
and how to introduce a level of unfamiliarity
i.e. to perceive the system as unfamiliar simply on purpose

i.e. then it turns out
there is a stable phase
instant acquaintance
and further development

and the phase is also stable in principle
for example a dream
but passing through a level of unfamiliar information
as if unfamiliar to the World

so here's how to calculate
this one here well let's say an unfamiliar world

calculate the coordinates of a possible event
there through sleep for example yes
or through the primary level of Perception

here it is necessary
just as God does
for God
every situation has an infinite structure of meaning
and all phenomena are reflected there
that exist in the world now
there will exist

i.e. in fact it is , well , let's say, similar to that
that there is a database
which has there infinite development
and be infinitely manifested so to speak

and that's when you have this factor
let's say unfamiliarity with the World
or acquaintance with the World yes
the size of the physical body of man arises again

as a system that connects concepts
"known" or " unknown "

and it turns out that this is really it
the physical body is therefore Eternal
because it means between
known and unknown concepts
there is always a possibility
the existence of some other level, as if external yes
for example, such as the physical body

and let's assume that here by the way it is visible
what is the physical body of a person
in principle, it also has unique properties
Well, precisely from the point of view of Eternal development
also because here
Well, a lot of things known to man are revealed
here are some observations of this kind
for example, in a dream a person sees himself
how more does it represent
in what form of system where is it located

in the plane level of Perception there
in volume
if in volume

how does he differentiate himself ^{Yes}
what is the difference between actions in a dream
human
and simply in ordinary Thinking
Why
i.e. where is this very texture of sleep

for example, a person sees a dream
how can he figure out that this is a dream
he basically understands that this is a dream
then what are the signs of understanding

and when do you start
Well for example, disassemble this system
the only difference is that
what a dream is from the point of view of even human logic
it's not always a familiar state
and will the dream continue to be dreamed is even a question

as a rule, there is a repeat of the dream
this means you have to be able to
well, in fact, to develop your management
what is there to order for some one to do a dream ^{for example yes}
some specific script direction
and ^{how to see it for example}

but first of all why does a person need this ?

so if we consider it as a control system
yes it is useful but it is easier to manage during the day ^{for example}
and that's all ^{yes}
or in your free time

it turns out that this one
level of absence of a ^{seemingly} familiar quantity
he is enough
well, from the point of view of the future development of the Infinite
this level is quite problematic

if there is no familiar quantity anywhere in the information
then it turns out that the future becomes
well, actually unstable

the future is sustainable
if all elements are manifested in a completely linear manner
clearly understandable
and there are no surprises ^{to be expected from anywhere}

this is systemic development

and it turns out that

Well, ideally it means exactly this kind of systemic development
which allows us to guarantee exactly
that man has Eternal development
because he is convinced of it
from the point of view of, as it were, extrapolative systems
Push

and he thinks that he is proving it to himself
that all further actions are under control
due to the fact that he now controls everything

and based on these levels of management
we see further

what if we want to see the level of sleep for example yes
in the form of a certain information space

then if you think about the question
and where in this information space
it is precisely the gender characteristic of information distribution again yes

then it is clear that the level of sleep of any
there is a base level

Well as if the basis of sleep is in information
it's in the form of spheres

as soon as you start to cross
to the base of sleep
here in the space of Perception
you get into the structure of the brain

i.e. geometrically the dream corresponds
actually at the level well let's say human heads yes
Well as if to that plan or something on the physical plane
where exactly is the brain located
in the first in the first reaction of Perception

and that is why it is considered
what for example there the brain has well as if by property
to exhibit some intellectual processes
seemingly irrational processes, etc. Yes

and so we need to apply this control
get for example there is instant healing
control of the physical body
there some create future Infinite events

favorable for us

we want, for example, not only sleep
there is a dream in particular
well, unite the whole system into one, so to speak, channel of control
where there is neither sleep nor wakefulness
nothing prevents Infinite Control

i.e. the level where you get
virtually absolute control system
because you are short-circuiting all systems
under your personal control

and how do you do that?
then it turns out that you have expanded your personality
already from myself
how exactly would you be on a dynamic level
at the dynamic level of control
along the lines of one's own will

and that's when you clearly follow
what is it really
the level of your personal will
i.e. you see that everything you do
underneath this lies the foundation of your will

then in principle it is a question of the stability of your development
it's already been decided
when it goes for example well, it's like Infinite Development
from the point of view of translation
there are microsystems in some global systems

and you see
that a person can practically use
for example, the concept of Infinity there
and "female" parts of management
although these are universal, absolutely identical things
in management

you start to see
a certain status of things which is such
that at the everyday level yes
here is a person, now he can sit and reason
about certain things
which well concern him personally

then at this level

you can also clearly guarantee
that you are Eternal
for this you just need to see
all Infinite development
future
and all the past
but united at least in one person

and when do you start
Well, this is management in general to carry out
and where, for example, is such a person
surveillance systems need to be created there
to sort of vote that it is he there , etc.

then here it turns out
that this is like an internal vote, yes
it is your personal choice
i.e. you are never wrong about the information
and you define yourself correctly
system of future development

it turns out that your choice is actually yes
in Eternal Development
i.e. your personality expands in terms of
that you can set goals for yourself
who teach you how to solve
tasks of some future

i.e. you can actually organize those tasks
which are controlled
not just in the form of some one- off tasks
but they are controlled in all the subtleties of manifestation

and when you start to see this situation
you understand clearly
that any Spiritual structure
manifested yes For example there
in a person or by a person
you can always withdraw
for example there is any level of management

because between the personality now
there in the current time
or a personality in Infinite time
it can be proven that there is no fundamental difference at all
just like
how do you know if there is a difference

between the Infinite Past and the Future

The infinite past has completely different criteria
and the Infinite Future has not yet arrived yes
for a person
there in physical time

it turns out that this is also a certain
management specifics
if we take it from the sphere of the Infinite Past
and just ask the question
and then what does the Infinite Future look like from there , for example?

you can pass by a fragment of Consciousness
and see what it is for example there is a sphere there yes

but when you pass the current time
the sphere will no longer exist
will it be you personally
where did this sphere go then

How
why does Perception configure control this way
that when crossing a time interval
the image of perception changes
as an approximating image precisely

so if we start thinking further here
then it turns out that God
when Reality had already been created
as soon as I passed from
from one level of Perception to another
He saw the man immediately.
i.e. He created man naturally

why is another world like yes
different from a human
externally

because man is the natural Will of God
the natural state of the Soul of God

and the external world
this is a more rigid, earlier design, so to speak
you can consider it as earlier yes

but from the point of view of Infinite future processes

earlier level of management
is still a person
level of creation

because it means in the Infinite level
it turns out that the Infinite Past
it still intersects somewhere
from the point of view of what a person perceives
For example there is some final value possible there

i.e. a person can perceive Infinity
but how will he physically expand his Consciousness
to embrace this Infinity
where does it go
back to myself again

to the task
just ask yourself the question
and what is Infinity ^{yes}
he gets to himself again

i.e. if you try to stretch the control
precisely by Consciousness into Infinity
it's still a question of self-diagnosis
at yourself
a person must ask
that's what happens

God does the same
God always answers His own tasks
He self-diagnoses all the time. It turns out
Gives himself answers
He has nowhere to take it from

if we do it by analogy with this position
it turns out that the person answers ^{yes}
for example to others
or gets some questions there
that he simply trains the next people

God imparts knowledge and man teaches.

and it turns out that the mechanism for transferring knowledge
this is a universal mechanism ^{yes}
expansion of human personality
to an external system
and God in relation to man

at some point there is an intersection
and you get an exact match
tasks of God and man

and based on this
Well, I just showed you that
system of personality development
Well as if into the deep structures of the World
where on some philosophical or practical level
interaction can be identified
there for example, yes, different human systems, for example

then it's completely clear here
that the very status of a person
also has a certain correlating effect

i.e. if there is a human form
in some specific place
well, from the point of view of logic there
there are people who see another person
they try not to be rude there, etc. yes

i.e. the image of a person is an image
canonizing all external Reality
well, just like God
for example, there is a canon, actually , yes
means external Reality
is the form of a human

if we want to understand
how can a person
For example there you can regenerate yourself and improve your health
then just synchronize correctly
myself
with its level of manifestation in the external World

i.e. there are some objects of Reality there
there is nature for example
during synchronization occurs
corresponds to your level
to the level that through Infinite development
appeared before you

but each element of development can be unpacked
well, i.e. you can see
how do you have for example a task

i.e. where did it come from in the first place

i.e. you can see it absolutely clearly
all about myself
as for ^{there} for example further development
i.e. levels that concern you
you can see everything absolutely precisely

Well, basically like any other person
but then you need to get his permission ^{yes}
to the management level

and it turns out that since you are for yourself
Well, ^{well} as if you have it in your Soul
that yes such an action exists
you can see
to any of your controls

then it turns out that such an action exists
then we can formulate and put
tasks ahead

and here is the preliminary formulated task
before , for ^{example}, even its implementation ^{there}
Well kind of a paradoxical level

without formulating the main task
be able to manage the task already ^{yes} as if without formulation
^{well}, like a fairy tale ^{there} "go there
there is no knowing where" a person can go
and "take that he doesn't know what" ^{for example}
but he does something
this concept of "doesn't know what" is also some kind of concept

basically, so that by the way, I don't know anything
you need to know quite a lot
at least everyone around
and say that it has nothing to do with it

then it turns out
that ^{it's like} this sign ^{of} differentiation of the system
leads to the fact that
to know God ^{and} to know the Action of God
you need to know absolutely clearly
all the works of God mean

and man is an act of God

then we need the simplest option
to know a person
his Infinite development
from his personality
then this is the path to God yes in this case
Well, this is a logical conclusion in general

and when you see for example
personal development
already then in an integrated version

i.e. you see God
this means that there is development from God to personality
then you see that there is an inextricable connection
personality and God
guarantees true harmony of Perception

and then the implementation of your events will be exact
at the level of high harmony
at the level of free harmony

because God
interaction with God
this is freedom

and then you get it already
True free event
which often happens without tension there
without any complicated action
but this is already surely the salvation of the world
it turns out that everything is happy there
everything there is calm, balanced and controlled

and there are levels of absolutely complete control
in the normal state of Consciousness
without any additional technologies

i.e. in principle there is often a determining level
is its state
just at the current time
i.e. external control over oneself is management

find yourself
make a simple external control layer
browse for information
this is already management in this technology

any work with yourself
this is the control in this technology

This is where I end today's seminar.

Thank you very much for your attention
