

GRIGORY GRABOVOY
The Teaching about God
Future Management System
22.10.2004

Hello again
the topic of my seminar today
This is my Teaching about God
Future Management System

at this level of management
I look at it at a systemic level
expressiveness of future information
as information existing and including now

i.e. we have such a management plan
when considering the future with your Perception
we can see quite clearly, let's say so
what from the current Perception
we can manage quite well
and at the systemic level
processes of the future and so
as needed at the level of Spiritual knowledge

here is the Spirit perceiving in this status
the whole Reality
he simultaneously receives information yes
and at the same time it seems to distribute all the information

those. here you need to highlight a completely clear outline
in this management methodology
the contour of the very simultaneity of the Spirit
in obtaining information
i.e. the properties of the Spirit we distinguish the properties of the Spirit
and the fact that the information gets there almost immediately
in Infinite structures of the future

and here in the future such a level exists
as Infinite structures
i.e. in the future Infinite structures look like
as specific areas for example
specific micro levels
and at the same time Infinity has a specific form

Well , logically, in general, it's clear
because when we want to consider
processes of the future
then it turns out that we should
Visualize infinity somehow

and in connection with this Perception
thus forms Reality
that Infinity has the appearance of some kind of signs sometimes

that's why a person often faces this
that there is some kind of symbolic form of future events
in the form of some kind of projection level

maybe this can be expressed in the form of some action, let's say
this may be the level that is expressed, let's say, by
that there is some plant yes
here a man meets a plant on his way
and yet with all this we see that situation
that the plant he sees has some kind of sign

i.e. he can even perceive
the future as a symbolic structure
expressed in physical form
just a plant yes
or passes by
Well, maybe this is a very rare case
but theoretically here in the collective Consciousness
I see this exists
that a car is passing
here the intersection of the contours of the cars gives a sign
i.e. he seems to be considering that at this moment
there is such and such a sign
and perceives some information

ultimately any situation of the World
this is the structure of the expressed future
but at the present time
i.e. any information at all

and from here we can understand that our Thinking
it is a system that constantly scans and actually controls
and tries to somehow correct it
here even correlate future processes
i.e. thought is inextricably linked with that process

what we call
with this abstract distant form

i.e. thought is an expression of the Infinite future
but in a specific action

i.e. if we want to clearly understand and know
why do we do something
from the point of view of the logic of knowledge
logic, well, let's say, adequacy of actions
and why do we
not that there is any adequacy there
in terms of specific movements there
and so it is clear why we do what yes

and here's why we do it
in essence of the world order where there is a future
exactly such a stable one for example yes harmonious

then we begin to see the lines very clearly
which are like some kind of corridor systems
there are vertical light-optical lines
immediately become visible
and a person walks as if between all systems

well, that is, there is a certain system
For example let's say secret and such knowledge
where besides physical Reality
man well as if secret means he still sees the inner meaning
some physical process
or before the physical process

so that in case of the World's salvation
there was no concept of secrets as such yes
and it was necessary to achieve control
Well, I mean there are some moral principles there
secrets personal secrets I do not touch upon
I mean secrets from the point of view of knowledge
for the salvation of the world

yes of course it is impossible to infiltrate
there in the process of thinking of another person
or try to understand somehow
if he doesn't allow it to be done yes
except of course when he

not creative, for example, wants to do something
not creative
then of course you need to teach him

i.e. how does it work to provide information
who manages to teach him how to do that
what will be constructive next

i.e. he must have time to learn
and it turns out that it doesn't even influence Thinking
and in fact the transmission of information is very fast
when he, through the knowledge of the Laws of the World
becomes creative
i.e. it does not cause harm

and it turns out that this is the structure of external Reality, yes
it is arranged according to a often similar principle
for example, there is a remote system of Reality
well, some kind of vacuum and some planets
They don't fall to Earth for some reason.
Well, it's clear that there is gravity
what if we abstract from these physical concepts

then we must understand
the inner meaning of what is happening
why are the planets in equilibrium and do not affect the Earth

and because there is a level of advancement
namely creative knowledge
knowledge for example there is Eternal development
and other systems simply accept this knowledge
and thus the design develops
which we see physically for example yes or informative

i.e. it turns out that the design of the future
this is a system of constant advancement of creative knowledge
so it is clear that good will win yes
that's how it's usually said
because this is the design of the entire world order

God is originally good
He gives control to everything
The main thing
and completely identical
the main thing is to be able to understand how it is done
and in principle then harmony is ensured

but so that high-speed processes associated with people's lives
were synchronized were compared so
that people understand this consciously
they must see that the system
namely the management of future processes
this is their personal action

i.e. they must learn at every step
your internal connections

that's why they are here
here in some situation according to the totality of events
as soon as they begin to understand
Well, I mean groups of people
maybe one person starts to understand
that there is a fundamental meaning yes
his personal position in this World
then the future also becomes stabilized

i.e. as soon as he determines his True status
in fact, he is the person who determines at this moment
your Infinite status
and when he sees it
it is clear that in order to systematically manage the future
you need to know the system of Eternal development
at the level of the Spirit

i.e. the Spirit must work out clearly
all future situations
at super high speed

I explained why speeds are needed
this is actually a transfer of knowledge
exactly the knowledge that is
precisely by knowledge of the absolutely creative type

i.e. therefore the Spirit is divided into optical fractions
to the level of absolute creation
where he contacts God
Spirit
here it turns out that
it turns out that the Spirit who sees God is like this
so that the Spirit of God and the Spirit of man
often in Perception these are one and the same
for a person
but for God this construction is almost equal to this value

i.e. the Spirit of God and the Spirit of man
here it is practically the same value
here the structure of sounds ^{in general} begins to disappear
there is no sound form of expression of Reality

so if we ^{assume} we start changing
the construction of the sound form in this environment
then we see that sound is actually a quantity
which is reproduced
For example there ^{by man} and natural phenomena

but God who exists outside of time
then it turns out
how can His sound form spread
that's logical ^{yes}
sound is, ^{after all}, a temporary system

and it turns out we can insert it there
any words any sounds
but we can understand even short sounds
what's happening
i.e. absolute knowledge
because we see this structure at all

and that's when we enter into this structure of knowledge
it is clear that this is precisely the perfect adequacy
and the adequacy of Perception
i.e. linearity concreteness
it should be clearer
than even in the physical world

i.e. here the management processes are as follows
what is there where sound forms are erased , ^{yes}
spatial forms are transitioning
into the structure of the Infinite Sound
here is the Endless Sound
this means you can insert any sequence of sounds
and get the right word on understanding

and it turns out that the word is formed
Infinite Series Event
one word, ^{yes}, any word at that

I say a word here

The endless row is immediately visible
i.e. the word is the birth of a series
but there is such a concept
that "the word gives birth to Reality" too
and in principle the logic is the same
a word is said and an action results
word is action yes
and further action
action in the future

because first the word is pronounced
then there is the future design
i.e. what do we mean
well, that is, the reaction is yes to the word, but it is in the future

and it turns out we have a lot of systems
the management has access to the system
ordinary
for example, the transition of a sound form into a non-sound form
this is a sustainable position for the future

so that we can diagnose
what we built for example Yes
a sustainable design for the future
at the system level
we should kind of hear this transition
where is the sound conversion
i.e. substitution of even one letter
in some control system
another
speaks of universality
i.e. about the presence of God in any phenomenon
and at the same time speaks about that
a sound stretched to Infinity, for example
becomes silence
i.e. the sound disappears there

and it turns out that when we start to analyze
well not just sound
sound is basically one of the forms
there is therefore a light-optical level
which is expressed in that
that a long beam, for example, curls up
into a specific form
and a specific one at that For example there is a question mark

exclamation mark or some words
i.e. words in the form of letters

Well, if we ask ourselves the question
how are letters created in general
then they could actually be read
i.e. this says that
that firstly from the point of view of Thinking
A person can of course come up with anything, yes
create letter shape
but in the information of the future this also exists
it is logically clear that in the information of the future
any symbol exists

i.e. we come to the conclusion that
that the personality is somehow in contact yes
with external Reality, well, well as if the outside world
and this connection is constant

i.e. a person is constantly under control
the outer world system
and he generally feels it at a certain level
this is what I understand

and this understanding is knowledge
all connections of all Laws
and so we built it
the first construction of future events
the closest

to build the most basic structure
we must clearly understand and know
all Laws all connections
and the human body knows and can do this

i.e. it turns out that the human body
Well, I mean something related to the body.
Thinking or means the body as an investigative structure yes
originally Soul

i.e. all constructions that relate to humans
this is a level that is constantly involved
in a very complicated mechanism of World Exchange, yes
exchange even worlds there with entire macrostructures

because any system contains all the following

and it turns out
that this transition when any
Macrosystem
microsystem
contains everything outside of it
This transition can be traced very subtly here
and see
how thought is formed and shapes Reality

i.e. it is, in general, a very subtle control system
but it is very effective
because you can see
as an optical phase crossing
thoughts
with an external, even uncertain Reality
Firstly, it creates a healthy human body
and secondly it determines
harmonious level of all future events
and into Infinity

i.e. we can see our thoughts
as a system that is fairly easy to manage

i.e. this optical system of expression is enough
in Thinking
take it as if just increase the length yes
volitional control
for example , by your Spirit
and we see how thought affects Reality

i.e. Reality begins to transform
and softly
here are soft forms, these are transformable forms firstly
i.e. system-controlled forms
and secondly they are transformed
completely into specific matters
i.e. they are transformed into specific houses of the machine

we can consider the technologies of the future as fact
i.e. to know what we need in Eternal development
well for example there is a system of temperature control of the housing of the future
yes

and there are different ion exchange processes there
if we have a closed system
it turns out that the ions must have a higher speed
towards the person

then you get a heat emission system
what should be the dwelling

because in Eternal development
the system becomes more autonomous always
here is the ideal Eternal design
a person does everything himself based on his body

and it turns out that when we begin to understand this
we see that quite clearly right up to that
where is this level, there is some kind of tube running through there , yes
where some hose is pumping
we see the entire structure of this dwelling of the future
i.e. we don't need to invent anything, it is one of the tasks
this system

and it turns out that based on this we are again
in the stable phase of control here yes
We, for example We don't worry there , we are quite calm
we know the future design
and with all this
Well of course there are emotional people
You can worry, it's not forbidden
however, it often happens that it is more useful to build more calmly

i.e. you need to be able to determine
your level of sensory control
and then it turns out that it is precisely the level of feelings
often gives birth to light for example yes
physical vision and what is vision

i.e. if we can reverse the level of feeling
to oneself as if inside
our physical vision opens up

i.e. they can [...] in general it turns out that they can regenerate
not just the eyes so to speak Yes
but there may be tissue regeneration there in the brain
any fabrics at all
if we see how feelings interact
with physical Reality
feelings associated with the future

after all, the future is in many ways not very certain by the way
for many people it is often that the person doesn't even know

what store does he want to go to and at a specific time

it turns out that the future is a very good tool
to control yourself

i.e. we can , as it were, enter the structure of the future
create an impulse that is multi-variant
and based on where we go

Firstly, we are already planning a favorable future for ourselves, yes
to form an impulse towards oneself
for example there to improve health

because in optical systems

Well like, that's just how they are , in general, like lever systems
it's enough to just move the optics
and get, for example, a healthy cell
or a healthy organism as a whole

and it turns out that given that the future is multi-variant
why did god create the future
It is precisely the multivariant that becomes clear
This is the most powerful achievement system
any control result

because for God it was all the same
He could make the future development linear
but firstly, then there is a limitation of free will
the most important thing is that you can't do this
and secondly, it turns out that it does work here
it is the system that is more control

coming as if from Infinity

i.e. Infinity is born precisely by the enumeration of options

and it turns out that
after all, it is the person himself who does the sorting through of options
and when we start to see this control system
then it turns out that we are still well in general we come to the conclusion that
that the future is very distant
it still turns out to be more manageable
because at each hinge level yes
management of future processes
we have a constant addition
as if the next iteration of management

i.e. we only need to make control in one joint
light goes both to us and there
the next light already strengthens the next block as if

one block already has two structures shining on it, etc.
and it turns out that the distant future is more stable

i.e. why did God create
the management structure of the Infinite
because in order to create local mobile stability
dynamic stability
it is still necessary that the control structure
was stable
this position was stable
even the Spiritual Perception was stable
precisely at the level of Perception of the Infinite Signal

i.e. here there is a goal, a desire for Eternal development
and so it is like a legislative function
of this process
i.e. that's exactly how everything is arranged
because this is the Law of development of future systems
systems of the future

and here we reveal the personal level of God
i.e. God as a Person and as a universal level
shows on a logical level
why is everything arranged this way
why is man created in the Image and Likeness of God

because he can do it on a logical level too
build this Infinite Control
well, for example, by learning about the spheres of your Thinking

i.e. I can output the control of the Infinite status
i.e. do not differentiate where this information comes from

either it is external
or is this a system for transforming my Perception

i.e. I take and constantly go out into the field of that
that I do not specify the information
here is some information I take from her once and as if went to the side yes
I still just see a glow

but if you see a glow for a long time , for example
then there may also be the glow of God there, yes

i.e. I can see myself for example
I can see the structure of Infinite Development
this is what I no longer differentiate

well, the state of rest again, yes
if I am at rest
in terms of Perception of the global structure
then the structure begins to transform
and this is where the freedom of action of external systems begins

so God created the world so to speak quite quietly
in terms of yes, for example, that there is a vacuum there macro bodies
because it is a creation
local actions local events

i.e. we can see the specific magnitude of the connections
to create some specific event
the man went to the store
how much external system of Reality needs to be created

i.e. God's work is very clearly defined
but it doesn't specifically consist of this only
and it is not , generally speaking, linear of course
God makes things that are macro-stable
and now we are only learning the mechanism of an analytical nature, so to speak
Yes

nevertheless, it still exists here
very clear, well , at least at first glance
a control system that says that
that we can connect the action of the future
to make it come true
with the amount of external matter even up to this
i.e. a common counting quantity

i.e. so that there will be oxygen in the future
for example Infinite time
Well, let 's single out a simple faction in management
where should the planets be

and we begin to understand quite clearly
which is at least good
that they are where they are
and then what's next, what's the problem, yes

and we begin to see
and that means there shouldn't be a nuclear war
we begin to see
specific source of a possible problem
in Macrodevice

this is a specific nuclear power plant
located on the territory of a specific country
we see that a specific person is walking
who doesn't have time to do something there , yes

and here the resource comes into play
well, if this design is oxygen
for example, it starts to collapse somewhere in the future

then we start doing it right away
this is where it works
it is the level given by God to every person
why am i saying
every person can save the whole world too
one and the same person

then the level of this very correlation is triggered
i.e. a throw into the system of the future
Thinking is given to this person
he is there For example there is no button to press
he's right, he's spinning some kind of unit in that nuclear power plant, right? For
example
if it's a nuclear power plant
in this case I am talking specifically about nuclear power plants

and it turns out that the balance is stabilizing again
i.e. here is a controlled future through Macroregulation
it is enough to single out the fraction of systemicity
according to one parameter
Everyone needs oxygen
If something affects oxygen, then there is a problem somewhere.

but the simplest option and the most effective
I just brought this up as if I was distracted
from the overall complete design , yes
systems of the future
see this
at least one person in Infinite Development

and that's when you
Why exactly at least one and not all at once
because if you see one
This is a generalized system for everyone
one man gives life to all
in this case

and that's why it turns out
that's why God is one
and because in the design of the future
He gives life to everyone.

after all, he must be, he must live
actually happy Everlasting man specifically yes
if it has universal characteristics
then everyone lives the same way
that's all

i.e. specific houses and specific production lines have been created there
these specific glows
it's sort of unified for everyone

why else did God create it exactly
man in the Image and Likeness
because otherwise there is simply no other form

i.e. He first Self-reproduced the form
which gave infinite development
and people turned out the same
that's all

the only difference is when they recruited
high-speed entry systems into the future
someone's knowledge system was diminished
Now the task is simply to collect this system of knowledge
that's all
i.e. how to connect to this structure yes
future glow

and here this very different light begins
this other one is enough, well, this one is alive
let's describe
although in fact it is the Light of Infinite Concentration
there life is a matter of course
although this is essentially a basic characteristic and personal
but there is not only life there
there is everything there, it looks like this
Well, at least it feels that way

and when we take this structure here
can be cured enough
Well, what about such complex, very problematic diseases?

only because we are this light
were taken to a specific place
and we kept him at least a little bit

i.e. the task is to maintain not just light in this technology
and the configuration of light

For example, we took

Well for example, there is snow somewhere, right in front of us
we can take and throw snow towards ourselves
but here in this case
we need to somehow configure this snow
and somehow carry it specifically

this is when we keep the glow in shape
in fact, we are overcoming ever closer hinges
what we know
because the articulated control system
namely future processes
that in each case we acquire new knowledge
and we need more through this knowledge
knowledge is a filter, it is itself a kind of independent system

every element of knowledge
has the property of filtering external information
this is what we see here in general in the construction of the World
that it is only worth building something
how the element becomes completely independent again
It's worth thinking about something
the system becomes completely independent
now we'll have to work with her yes
we still need to convince ourselves that the knowledge that we are dragging to
ourselves
this is right for us

i.e. it turns out the more we work
the more often the system develops in that direction
what we get here is that we have
Well, it's like we have to solve the opposite problem
that more often than not you have to put in extra effort
and here in order to get the designs
from the distant future here

and therefore often the treatment of a person, for example
sometimes it's connected, after all
with some difficulty positions

because in the collective Consciousness
there is such a principle, as it were, such a concept
what we will say in the future in the collective Consciousness
Means Well, it is assumed that the disease is treated for some time
it means the person is forced
take the result from somewhere far away
as if to pull it towards itself and here

that's why I say that it is possible to save the world and instantly yes
to be cured
yes of course you can instantly
the question is what does a person understand in this case
i.e. he should, in principle, see here very clearly
the design of the tasks that are, as it were, assigned to him

i.e. it turns out that he must define it quite clearly
how does it solve the problems that it solves , for example
these tasks well it's like from a piece of paper
that's where God writes, he takes and reads these tasks, actually
and yet with all these tasks they are like this
what you are dealing with in general
that well, in many ways you write for yourself

because the future design
well, which you see even if you put your hand here, yes
between future information
and you
just a flat system
then the projective signal system
on this hand
anyway, these are your letters

why writing
Well, the letter of the Soul of every person
always different
yes, you can write in a universal language
but God accepts letters from everyone

moreover, one and the same person
can write about the same subject
but he will get a different connection
i.e. different music Perceptions yes

and that's where it turns out a person crosses over
in the structure of the absence of sound form
there the music of the Soul arises

i.e. the singing of the Soul begins
it is not often heard in the form of sound forms

and that means the Soul sings quietly and this happens
there is such a very subtle meaning in Perception
that the singing of the Soul is often not heard by others yes

i.e. the person clearly understands that others at this moment
maybe they don't hear
that his soul sings
but he can say about it
you can by the color of the eyes by the shine of the eyes
determine that this is so
but if he is on the side it is not always possible to determine

i.e. it is a unique design
as God has it
God has unique designs
which are not always visualized from the outside

but to be able to visualize
God's unique design for Macrosalvation
we must know God in this way
so that He could show any person
that in the case of Macrosalvation there are no unique designs

i.e. systemic future
it is always access to God's information
and the ability to apply it for that
so that there is no such thing as there well at least macro-catastrophes
for starters yes

in connection with this it turns out
that when we do management in this way
that it is like an external control system
passes
into the system well let's say future actions
into the internal reaction system

then here is the selection of that value
that there is no macro-catastrophe, for example
this is the level that actually shows
what does it mean we highlight the structure that exists
Well, first of all, it's unstable

i.e. here is the concept of "macrocatastrophe"

as if there is a lack of systemic elements
it's unnatural
because you are here
so why does it suddenly mean that something can influence this yes
logical status

there is a system of certain habits
Perception system

and it turns out that the more events happen in the World
the more events in general, well, in general , yes
in Human Perception
the more stable the structure of the future

i.e. from here it means the more technological the World is
the more so the future is stable

although well, different connections arise there
any thoughts on that
that here or even real situations
that cyborg systems there can be very developed
but in reality it works out
what exactly is the speed of information development
still strengthens the future Reality

Well, logically it looks very simple
if the civilization is very highly developed
and there are, for example, means , well for example, protection from external comets
it is clear that in Infinite development
civilization is more sustainable

not necessarily an external comet
it needs to be there let's say we blow it up with a nuclear bomb
although this may be completely ineffective

the development of civilization consists in the fact that
in this case
what is possible and as a rule is what is being discussed in this case
on the application of Spiritual Management technologies

but here, strictly speaking
after all, the more people work
the more this form of Spiritual management will be manifested

one thing one person works
another thing is that he works with capture

all the mobile conversations of the world and in information
he has
he has an increased number of contacts
number of connections with individuals
the more people, the more sustainable the future

and it turns out that's why
process of universal resurrection
i.e., in fact, the element of immortality of any person

this is precisely absolute stability

because it's worth losing even one person somewhere
the structure still remains loose
i.e. it becomes such that it is almost like the initial form

That's why we are in a general resurrection
everyone will be resurrected

where sustainability is concerned
which in this case looks like this
as a legislative form of information development

and in connection with this, the process of non-dying as such
in this case it is expressed
it is precisely in the happiness of internal development
i.e. a person must see this system
in general, a peculiar one
inner happiness
what attracts him in life, generally speaking
what does he want to do in this Infinite development

i.e. he must generally build the structures of the future for himself
which have after all
Infinite Status and Infinite Goals
he must understand that the future
that is precisely why it must be Infinite
because that's how they're built
Laws of development of information of the future

not just because he's there For example Well, that's what I wanted, yes
Well, he wanted it, of course, it could be a one-time impulse
and that's good too
if he wanted to, he already built it
by the way, a comparable design
i.e. man wanted to live forever
he has already moved it forward in front of him

this light

and then, as it turns out, there are Laws
which I am talking about now
which means that they must be fulfilled
i.e. there is basically no other way
he must go down that road
which is perceived by a person
which always works functionally

The laws of communication must be there
in fact, there shouldn't just be

and they are more rigid than in physical Reality
it is in this very construction of Infinite development

and it's completely clearly visible there
that by doing one action
a whole mass of similar consequences

if gravity can still fluctuate somewhere else
in some time interval
nothing fluctuates here
there is an absolutely stable absolute structure

and that's why this value exists
which is called the absolute future
i.e. it is implemented in any case

a person only needs to see himself
in this structure
and he clearly understands that he will be there, for example yes at this level
it will be expressed there etc.

and that is why there is still such a personal dimension here
structure for building the future
i.e. on the one hand
the structure is built completely
according to specific canons of laws

In this case I only gave a general description
of this process
and there are also very specific ones
well, literally like in strength of materials , in mathematics, in any exact science
connections

and here when he penetrates into the future and sees

that everything is so
he has another level
in collective Perception
such information is immediately disseminated
what does it mean it turned out to be enough for a person
how to look into the future
and everything is ready ^{yes}
i.e. everything is there

but that was God's plan
that everything is ready from the start
i.e. nothing like that awaits a person
what would be unfavorable for a person

and the opportunity to see and receive
return signal
it's just a property of this design
i.e. its implementation

so receiving ^{means something} good about yourself ^{yes}
good information
this does not mean that the entire network of Laws
it ^{kind of} levels out, ^{yes}
but the person just looked and that's it

firstly, the future is still built on these same Laws
and secondly, what he saw
it just means that he just knows the technology
he knows the hinge joints
he knows how it's built

and ^{it} turns out that there are problems in the development of this
this system practically does not exist
i.e. it is enough to just know
and you immediately see a signal from the future
stable signal
i.e. your future becomes an absolutely stable process

once you start to understand this
at the level of development ^{there is} the speed of thought
i.e. to synchronize, ^{for example,} the speed of Thinking, ^{yes}
to this process
i.e. you begin to see that the speed of your Thinking
or actions ^{there}
comparable to Thinking

this is the harmony that ensures
and knowledge of the Laws
and receiving an external signal there
about your future

then you see that the human body
it's just very harmonious
and even harmonizes all these processes
but it is also very harmonious

i.e. you start to see
well it arises you know what it means well, that's it
similar to the feeling of Love for the body
this is how the entrance to the body is through Love, yes
but it is not in its own manifestation Love yes

because there is
there is no concept here, well, let's assume here you can think

that a person becomes a kind of egoist yes
although it is clear that it is useful to love yourself
but in this case technology

after all, a person who thinks about others
God who created others
First of all, he loves them in general, in fact.

so here it turns out that when you have an angle
for example actions towards oneself
it turns out that a structure arises here
which forms Love of such a form
as a space interacting with a person
i.e. space has a property similar to Love
this is a form of Love

i.e. you start to see
that the structure has reactivity
which gives birth to a wave of Love
and then you allow the structure to come to you

i.e. as soon as you recognize the structure of Love
you allow it

this is why many diseases arise
the person is just asking for it
into rigid fragments of future systems
and does not differentiate

i.e. it doesn't catch anything Yes
without catching this warm wave of Love
from the outer even space
he gets into tough situations

if he learned to differentiate
then, in general, even in a difficult situation in a very difficult one
it is enough for him to allocate
this structure in front of you
and then he clearly goes along his already very good path
well at least to a favorable future

i.e. not a single tough situation
practically can't for example there somehow crush his plans yes
well maybe there somehow maybe so that in time
something will change there
but in essence nothing changes

God is One
He created everything and in essence nothing changes.

He also exists in the future, yes
He knows everything that will happen.
He has already created the future.

and it turns out that a person must have the same property

then he should accept what he accepts , for example , yes
it should have its own development like that
which would not depend on external quantities

i.e. the autonomous value of a person
absolute Infinite development with complete openness
i.e. the system must be
both autonomous and like a physical body
as well as Infinitely developed
into the entire Infinite system of the future

and here it is
this is already the Spiritual Love of God

i.e. we see that God
By Your Spirit
With the body
i.e., in general, even with your own Love
here His Love gives birth to the next Love

interaction here somehow highlights
It seems logically impossible
but at the management level it is all absolutely clearly visible
that the action of God's Love gives birth to the next Love
i.e. God creates only Love
here in the standard of living so to speak Reality

and this is absolute stability
it's tough it's harder than any stone there yes
super-dense super-rigid substance
this is the structure of Love that is located
in the virtually Infinite future

i.e. it is a value that is removed to Infinity
and no matter how much you approach it
She is always at the same distance

and so when you start moving for example
and what does it radiate?
these are the structures of Love that begin to be built
then approaching her is the path to God

and when you want to get it closer
you get real love

i.e. real Love arises as well
this is also of course real Love, of course
it's just that in this case it's your Love
which arises simply as a human factor of management yes
or as a human feeling
which has no value at all again
i.e. the point is perceived as an Infinite quantity

i.e. through Love one can know the structures of connection
namely future processes and current ones
the future is a localized glow
the same Love as if its concentration yes
and the present is its diffuse form in optics

and it turns out that any structure of action on you
i.e. your physical body
why is it by the way here it is immediately clear that it has
functions in general really Eternal
Ever-evolving

because in this design
Generally speaking, there is no room for other levels

i.e. to understand this you need to understand
that in any household systems yes
in any seemingly relaxed systems
where there are practically no connections, for example ,
Well, a person is just walking down the street, for example Yes
it's some kind of information level
it is a fairly dispersed system

and when you start to see that this system
this should be absolutely protected
a man just walks along the sidewalk
it must be absolutely protected
a comet shouldn't fall on him
there should be no nuclear war
he shouldn't get sick, etc.
everything should be happy and harmonious for him

then it turns out like in this scattered system
provide him with this yes
this is God's task

so it should be at the normal level
at the usual level of self-awareness
to have it all

i.e. his usual so-called everyday Perception
all this should be guaranteed to a person

and so here is the transition to the level
how should God in general through the ordinary everyday level
in his daily life to convey this information
through his Thinking through his Perception yes

this means there are very specific linear channels
in Reality
which allow a person to understand absolutely clearly
i.e. go through these channels
i.e. people walk on the sidewalk but they don't collide
Well, it is clear that a person has Thinking
and he just walks around the other person
but nevertheless yes

for God the task of management is this
what he should

Yes, He gave the property of independence
but he should have thought
about the absolute level of stability of future processes

and if a person overlooked something
God helps him here, yes
that's why he doesn't hit anything
but God has already helped him in his future

and it turns out when you see this design
Well, let's say in reality yes in your own
exactly clearly translate into your explicit level
i.e. your reality is what appears to you
and is a reality in the current time
this is dynamics and statics
I said I used such a level as "in reality"

and when you start well actually, this word is used
then here is also action in reality , i.e. do it
action appeal well for example to God

and so you start to see
that an ordinary person has
all functions of such action
he walks so that people gather around him
these geometric even images of trees buildings
not just arbitrarily but because it must be protected
and therefore he initially knew his future
he chose this route

i.e. we can already get closer to that
why do we act in a certain situation
like this or for example somehow differently yes
i.e. not otherwise than either

i.e. because here we can already recognize the symbolism
i.e. why did our thought determine the position in this way
well or clairvoyance
that it's better to be here
came here let's see the intersection of trees
so it's clear what these structures mean
as a rule, these are just optical structures
but it is possible to get to the physics of the process
where does this type of perception come from?

then you begin to understand

the whole organism in general in full
here I showed you the nodal point
that there is a clear point in future processes
understanding all processes fully

all future information can be logically clear
scan study and understand immediately
what is it at the moment
that one way or another
the body shows ^{yes} at this point

i.e. you begin to understand
the role of your Soul in God's task
unifying function of space-time

and your personality which is unique
and which has ^{well} For example there is a physical body locally ^{yes}
becomes universal in your Perception
you see your own work
not because you are doing something somewhere in the macrogalaxy, etc.
and because you are doing something specific

i.e. the personality becomes whole and complete
because he even sees that he is doing the job correctly

i.e. having connections a person already begins to understand
what he does right

moreover, he has
spectrum of absolute independence already
he begins to know
^{Well,} good if he understands it
what's the difference add control and go wherever you want ^{yeah}

i.e. it turns out that he has
the level of complete freedom then already

This is very important in the treatment of diseases
because the disease as a system ^{of} some kind of conservation even
when things start to tighten up
and you have to spend time on them
then find a way to cure
this is a correction again control

then it turns out
Of course, then another question arises
here he came, he is a man, he understood why it is so

but this is knowledge

he came here to understand
the next level of your development

as soon as he realized
he gets this ball of freedom
namely the Infinite level of freedom
he doesn't need to worry anymore, he doesn't need to analyze there
why where to go
he goes anywhere
and he is safe everywhere

the level of precisely universal freedom of universal action
on a systemic level
interactions with God's information
in general with God as such

and when you start to understand this
you already see yourself in the Infinite level of development
not because you are looking there
and because you have technology

i.e. at this moment you are already calm and stable
you don't need to think about anything else
except that there is some specific thing to do there
and you see yourself in the future

i.e. it turns out that each person has
such a line of behavior such a structure
the future is naturally sustainable
everyone knows what's going on
even if it's just on a whim
or just at the technology level
it is not necessary to see any events there even to begin with
but it's better to see it in general

and how does it go from there?
that a person becomes even more free
in a creative way
i.e. if something is pressing on it, yes
he can quickly get out of this event
and become even more mobile and stronger

i.e. his skill increases
with each level of understanding
he is becoming more and more of a master, so to speak yes in control

and then it turns out that
well, for example, so that there would be no control
there is only some kind of task or end in itself
he must see that in the natural level
with him well For example nothing negative happens there
moreover, it doesn't happen to anyone
and that's okay
and he can be convinced of this
if it really doesn't happen to anyone

i.e. if he recognizes
that at least one person doesn't know how to do this
Of course, he's starting to have a stability system
Well, first of all, it's unstable.
because he is forced to give to another person
then control

i.e. to make your even management stable
he must give
This is the Law of Development of the Future Situation

God gives to others because
Well, first of all, He loves them from the level of Love, but
But
and because it works here
that Love gives birth to the logic of the process

this is when logic is born from Love
this is a stable system
and further
although the level seems to be not very comparable things
that's logical yes

but nevertheless, it is worth us only
highlight the structure of Love
in any processes, including logical ones
and direct these rays into the future
then we see that the future is absolutely stable

and at such an Infinite level
that a person understands that he is Eternal but this is just natural

i.e. this is his natural state
he understands that he is going nowhere
into some kind of unfavorable, excessively bad situation
won't hit

if he wants to he won't get there
even in the most unfavorable situation
i.e. he begins to understand it

i.e. he becomes like a manager
and already then in his will
get into this situation
or not to get there
at some point
maybe not very unfavorable
but he can afford to ignore it
but he understands what will come of it
he starts to be a level

Well either on your own or on your perception
or to perceive Reality this way
that there is complete controllability
provides him with freedom of choice
what to pay attention to
what not to pay attention to

and then he is completely free in any situation
he is really protected in any situation
and by God too
and yourself
and all people

and that's when you enter this system
Of course it's better to pay attention
and not allow unfavorable systems
much better

but as they say there are a lot of connections
at least the main ones
most of all , so that there are no radically unfavorable ones
With the help of this technology it is possible to achieve
but here are some nuances
it's already your personal choice
but it would be better not to allow them

when do you start
Well, I mean unfavorable nuances of course

so as soon as you see
the structure of Love in any relationship
including logical
you begin to understand that the future of man

always absolutely stable
he only has to see it in any system
in the first Perception
Love that creates Love that builds yes

God giving Love building with Love
and this is, generally speaking, the Action of God

although there is technology here
it is precisely the work of man that is expressed in this way
that a person simply acts the same way
Well, it definitely just works

he sees what God does and acts accurately

you just need to practice here and try to see
here is the expressed Love and Action of God at the same time
that's all

then your action becomes free and conscious
and absolutely stable
and you see that you really have
all technologies of Eternal development
what's real

This concludes today's seminar.

Thank you very much for your attention
