

GRIGORY GRABOVOY
The Teaching about God
Goal management
21.12.2004

Hello

The topic of today's seminar
this is my Teaching about God
Goal management

in this topic i show
how is the goal that you created for example
as the beginning of management
this goal needs to be controlled as if
bring to a level of concentration, etc.

i.e. the methods of this seminar
apply to any purpose
which you initially created
in the form of precisely the management goal

therefore in this system and in this problem
First of all, it is necessary to consider
Soul status
i.e. how your Soul itself, generally speaking, reacts to the goal

for this it is necessary to identify
movement of the Soul towards you
just as, for example, a person strives for God
also the Soul has a movement towards you
to your physical body including

so when you look at this case
management objective
you must show yourself first
in general, practically the status of your Soul
at the level of God

How God perceives your Soul
and through the sight of God through the Action of God
try to get out
to the level of systemic management

i.e. here the status of management is that
what do you have in fact let's say so

the level of global tasks coming from God
the level of interaction between God and your Soul

i.e. you have to visualize
this area of interactions

then you should see
how does distribution occur , for example?
some physical systems in the World yes
i.e. to see where God implements physical systems
for example sound forms
some forms of interaction of matter

and at the same time you can see
how does God even detail
some exchange processes yes For example
processes of interaction between you
with some elements of Reality

i.e. you delve deeper into the system
where God interacts with your Soul in fact

and when you start to learn this level
i.e. to see the depth of this process
i.e. where is your Soul so deep
that it achieves the Action of God
and where does she know God yes

then you start to see
what is the thought of your Soul
i.e., precisely Thinking
or is there a sound form of interaction
of your Soul with external Reality
this is the level of your realization as a person
and your goal is defined from the start
not only for example well, let's say, with some personal motive
here we need to see the external motive for the goal

i.e. if a person is in some room
then his motive for the goal is connected with that
that he is also indoors
he must either exit yes or enter the next one, etc.
i.e. there are, as it were, external structures here
absolutely which specific

therefore, for the purposes of
definition of specific systems

this is also the Action of God

because if we look at

suppose the status of the Action of the Soul of God
why did God create any linear systems at all ?

space some connections
movements
and in order to specify the goal
was revealed

if we meet in some place
then it is clear that this place is marked
Well, this is, for example, one of the positions in this technology

so when we talk about target management
we must understand
how your personal system interacts
generally speaking in the status where you are

i.e. the task for any combination of events
a person must have Eternal development
therefore he must be able to do this combination
choose the status of your action yes

the status of the action can be completely different
it can be local there prolonged
but it must be unambiguous
leading precisely to Eternal life to Eternal development
That's why
and in the physical body

so just like God does
He takes on the tasks of his Soul
and realizes in the form of space-time
in order to specify the goal
and direct it to execution and management execution
a space-time constant is required
this is the one that God visualizes in front of you
to be able to direct this constant
to achieve the goal
as universal yes
as local

i.e. for example Well, it's a simple situation
there is some door yes
let's deal with the issue

let's assume that this is some abstract element of Reality
what is the purpose of the door anyway
this is just such an abstract question
Well for example, to open

i.e. we are starting to move in management
there, so there is no need to open it, yes
free passage, etc.

i.e. we begin to interact
with a lot of things then yes

why is the world expanding
and the number of things increases
because there is more stable management
according to the goal of striving for God
exactly do as God does
and the quantity increases

here is an increase in the quantitative level
this is that characteristic
that it is possible to create some kind of system of Reality
without resorting to , let's say, an external "fence" of information

and for this you need to take and specify the goal
i.e. make the goal so specific
so that the information is already in it yes

well, that is, we get, actually speaking
from superconcentration self-management
or we 'll say matter or we can say
since the energy is conditionally sufficient
for control, etc.

in fact it's just a personality status
which is developing
i.e. you are developing into the structure of your own future yes

i.e. we thus approach the system of the future
your real

then it turns out that we have future development
as a system of practically future goals
where you are already beginning to visualize in the future
i.e. the future is so real
for example as present current tense

because to a greater extent
the goal is set in relation to future events
moreover, if it is placed to the past
as an axiom, it is obvious to everyone
we are talking about the fact that the result will be obtained in the future, ^{yes}
for some time

so it turns out that we work all the time
with the future faction

therefore the target must be located
^{as if} in the space of future events
in this case the location ^{means} this control
it should be like this
what you practically have to identify
system of universal development
in its local target

because you can clearly tell right away
that ^{yes} your goal is fulfilled
if ^{for example} there is Earth ^{there}
there is no possible global catastrophe, etc.

i.e. interaction ^{as if} with the Macro level ^{yes}
must be determined
as the level of external control of the goal

because after all, you are ^{not} moving around the Earth
move when the earth exists

so it turns out that the control is external
must be tied very clearly
with the level of implementation
namely the technological implementation of the goal

that's why I say it quite often
that it is even necessary to remember logically
to managers
what needs to be done first Macrosalvation
Macro Rescue Management
i.e. select a fragment specifically to visualize it
then solve the specific problem

because it is known a priori of course
that according to my Teaching

it happens anyway
Macrosalvation Salvation of everyone ^{there}
and each one personally

however, we must still identify here
namely a more general goal, including social one
i.e. when people do it
i.e. we still have to see
what and how people do in the same context
namely Macro Salvation

and when, ^{for example,} a person does it unconditionally
then he ^{kind of} gets used to it
that it is really so and it is happening

and the fact that it really is clear
because any action
is done through Macroregulation

and so we came to this level
that there are some objective Laws
which simply exist for nothing
and they need to be studied

this is where the selection occurs
or generally speaking, the appearance
this faction of Macroregulation
in action

i.e. if we can, and we must do it
in any case translate Macroregulation
into the system of achieving goals
then we get a dynamically controlled target

i.e. the management statistics are as follows
that almost all processes of Macroregulation
already flows into the event space of the target

in this case the control action
and practically ^{so let's say} the action ^{let's say} external ^{yes}
or ^{there is} your action
all these actions intersect in that
that the goal is beginning to be achieved

this is where we start to see
what for target control
necessary as God does

still need to determine the beginning of the target

here for God
where does His purpose even begin?
if you put the question like this
He always has an Infinite level of development.

therefore, a person has a similar task
he must clearly highlight the beginning of the goal

although for a person it is more natural, so to speak
there if cause and effect relationships
and he considers that the beginning of the goal
for example, somewhere there in such and such an area
related
happy day there
Happy New Year
or with an event
or with space yes
with a specific size

i.e. if you take and draw a line
then on the ruler it is a specific number
i.e. i.e. there is a certain beginning

for God the process is still resolved differently
God first of all finds in the Soul of Himself
feasibility yes Actions
those. goal formation
this is expediency for God yes
in general development

and since God gives knowledge to all people
then knowledge is thought
should, in general, be in the form of some kind of canvas
go to the level of His knowledge
i.e. it should be some kind of channel and some kind of connection

and practically this level it should be like this
what a person should see clearly
what God gave him
i.e. his personal line
God and man
a person must see it in continuous time

and this is this level of continuity
forms the beginning of the goal for God

i.e. the beginning of God's goal is man
in this case

and when you consider further management
it turns out that God practically implements
Well, including Myself
when a person develops forever
i.e. it corresponds to the goal of His development and God
i.e. Eternal development

that's why the beginning is even specifically linear
here is the beginning, exactly known
still has a very deep
almost Macronature
i.e. the nature of precisely Spiritual action
actions of the Soul Spirit Consciousness of man

and when a person reveals
Well as if his True position
from this point of view from this position

in management
then he begins to see
what we are practically dealing with
Well, first of all, with ourselves
i.e. a person with himself
as if at a certain level an agreement is reached
that all the Infinite that is included in his Soul yes
as if external control, i.e. so to speak, an external factor
external action of the Soul of man
or external status in relation to a person
Souls of man
it includes all the positions that I just mentioned

i.e. we are talking about the fact that the Soul interacts
at the level
and deep
seemingly simple processes manifested

and when he starts to visualize
your Soul
it turns out that it determines stability
their own purpose

i.e. he gets the Soul's goal
defined in space and time
i.e. the Soul makes both space and time

i.e. as if it folds or organizes sometimes
if there is already space-time ready

and then it turns out that we actually
we build Reality in this way
what should
first of all, to feel simultaneity
i.e. to perceive clearly absolutely
action of the soul body
and for example there is basically no person at all as such

because all the time it's about a person yes
at God's

and when we see the status of a person, i.e. human status
the goal is more defined

so it is clear that we must be peace-loving
must develop creatively
because when we consider this faction of the goal
then a person cannot harm himself
and therefore it turns out that

By the way, that's basically it
there are levels when a person
can't do any harm to himself at all

for example God He is Eternal in any case
let it not harm anyone
including Himself

therefore in target management
the line is quite clearly shown
when a person
acting precisely in the Infinite development
towards God
he won't harm himself in any case

i.e. development towards the action of that
as God does
and how God shows
this means at least harmless development

so when do we start to consider
control system
why for example any action

to make it harmless there in Macrosense
on the contrary, we suppose it's even useful

then it turns out that this is the level

Well as if even useful yes

implies that it

Well, at least it should be creative

at some initial levels even

even if it is a personal action of a person
which is

Well in general, some personal everyday aspect

let's assume it means a person performs some action

and this action is not reflected, yes

in external Reality

if his personal action

related , for example, to his physical body, etc.

but God is present everywhere

God is originally connected with the Soul

and His Action is the action of the Soul

here is the Action of God, this is the action of the Soul

and in this case the Soul which is completely free

but created by God

and the action of the Soul is also the Action of God

it goes as if Well, let's call it "sticking together" and in quotes goals

the original, as if a priori, is like this

i.e. fundamental "goal fusion"

God and man

generally speaking, it always coincides in Macrodevelopment

there are no contradictions here

because we will not analyze it here

for example that line

what how is everything divided and created yes

because it's already a subject, so to speak

in principle the same level of target management

and we will just find

more detailed areas of creation in this case

in this case we are talking

that ideologically the goals coincide

therefore we cannot have any contradictions

we must move together

that's why it turns out
that a specific level of target control
is found in the optical expression
here is the level of your Soul
which represents, as it were, a nodal point for target selection
but this point is not visualized, it is understood

that's why understanding is born
in general, how does understanding arise in a person?

i.e. if we consider the process of this concept
that's why a person understands
why does he call it understanding
some element of Perception

and because there are elements
which should not be visualized optically
i.e. a person who moves
in free space we suppose
and the more space
the more free and open the movement becomes

i.e. for freer movement
there should be more space
but space implies
that are in this space
should increase themselves as if

i.e. to increase the status of personal freedom
due to the action of the following

a person when he is more free
then God is also more free in Soul
due to the fact that His creation
the created man becomes free

the status of his freedom increases in a personal context
although he is already free
huge space
nevertheless it means basically the same
it's about personal space
space for understanding each other yes
space of mutual understanding

this is where it comes from

element of understanding goal management
where the element itself is not identified, for example in optics, yes
it may not even be revealed as knowledge as such, by the way
that is precisely what is perceived in the form
there are no specific terms, sounds, etc.
this is a specific level of understanding

and when we begin to see
it is the status of understanding that is the goal
then it turns out that target management
it exists after all a more global task
which actually determines the overall dynamic status
constant understanding of the development of your goal

i.e. a certain thread that constantly connects
you with the implementation
even if you don't fix the control, for example, yes
and at the same time you do this , for example
so that you make some other management systems
maybe even some that are very complex yes
but some one-time goal must be realized

Well for example, the goal which, generally speaking,
may not be formulated as a goal
there is a very strict goal which is strong-willed yes
but here is the task of saving the world, this is just a logical goal
in general, the logical world of each person
so that there is no macro-destruction

and when he is a person doing any other tasks
this goal must still be realized
somewhere there yes it's like on the periphery

but without increased control
but it must be implemented all the time
i.e. there are goals that have the status of continuous implementation

and so it turns out that we are dealing with
in target management
as a status well factology yes or even factography even
here it turns out that the factor has a certain graphical manifestation
in the form of a kind of Perception of this graphic
in the form of for example in fact, the action graphics themselves

that's why we can determine for example
laws of creation of writing how it was created
why does writing somehow correspond to speech

and how does the slowdown in management happen there ?
expand space or delegate the task to others
expand space

i.e. here it turns out that we have
the possibility of such control
when the management task overlaps, as it were
from afar Yes as if it were very possible, well, not very far away
but at least a promising target
which is necessarily implemented

it turns out that the interaction of souls of different people
and in essence the Soul of God is in general
and in his own self-understanding, so to speak

because God initially understands absolutely everything
for a person when he looks at this status
everything also becomes clear
i.e. it is enough for a person to look at this status
it becomes clear to a person
action

he doesn't need to be there how to take some kind of microscope
and for a long time to study, for example, often some process
he can understand what is inside the substance
he can determine the structure of a substance
simply because he understands what is around this structure

i.e. the world is structured like this, among other things
that there are many concepts that are not defined
but at the same time, with all this, we have a status that is practically the
same
what when is the management going on
for example, going into Infinite magnitude
then interaction with other systems
occurs on the understanding of that

that there are some other systems
for example , they have some properties
a person understands this but he does not record the system, for example Yes
he doesn't explore it

so understanding is that factor
which actually controls
a system of external events or external goals yes
in relation to you or there in principle your own

i.e. to create a continuous level of control
we need to create some kind of generator that would support
this level is constant yes in space-time

for this we take
all elements of external interaction
without singling out the faction specifically
often we just understand that they exist
there are some macrogalaxies there yes

We have this understanding
but we don't have to be there every second
to study these macrogalaxies

but the understanding itself provides an element of interaction
as if an external Macro-quantity
for the purpose of, for example, saving the world

and when you start the element of understanding
well, some kind of bag, yes
let's imagine that we are pouring
there in a plastic bag
water
and we say this is the macrogalaxy
some kind of steamship is sailing
the third is the sea
here you have several plastic bags with water yes
Well, with pure water you can basically drink it

but we, for example, don't drink it
we take it and say put a compass on it
and we look to see what it means on the water
i.e. we build such a complex structure ourselves
so that on these three cellophane bags
this compass did n't really vibrate
although the water is dynamic

i.e. we actually create
as if the control space is independent

Well, basically, considering that water is, for example, a conductor
as an element in the creation of life on the planet
that there is a lot of it

we take segments as if purely mechanically
we are building a model
when the compass connects with water

as if we are creating an element of involvement in the Macro level
such an element as direction
we just create a mechanical model like this
as if completely abstract

but when we start to think further
if the direction is related to the Macro level ^{yes}
through the cellophane we can determine
the structure of cellophane itself

i.e. there is no need to do anything further here
you just have to see this structure
in the cellophane itself

direction related to the Macro level
through an intermediate medium
Macro level is water ^{for example yes} there is a lot of water on Earth

so and when do you start to know it
then the structure of cellophane becomes clear to you
you don't need to know her ^{deeply}
no need to cut the cellophane, firstly the water will spill out

so it turns out that based on this
we can know the external Reality
because it exists
Well let's say I built it
some abstract connection

so when do we know this element?
i.e. a clear position of knowledge emerges
we gain knowledge about this subject of management
^{for example} about cellophane
we clearly master specifically on the heart
i.e. the heart is Eternal because the heart knows ^{yes}

the heart knows all Reality
it turns out that at least you
on the reverse line you discover the property of Eternity
in your heart

and so in management ^{it means} the goal
there is another very simple element
you need to look at what level of Eternity
from your physical body, ^{as if} it illuminates

the purpose of your management

and based on this

we are practically seeing the next level of management

that when we have ^{for example} management

coming from your specific organ ^{yes}

where you can basically see as a certain

the level of glow from the skin ^{there} from the body part

it is not necessary to consider internal organs

and you see in the management goals

connection between oneself and the element of Eternity

from the level of complicity again

the model is not the same anymore, it's completely different

because a person cannot be modeled

mechanical level

why did I also bring this cellophane element with water ^{there}

because it's clearly not a person, ^{yes}

i.e. there is no relation to a person in terms of action

because man cannot be mechanically modeled

and I ^{sort of separated} the external nature of the World, ^{yes}

depending on the level of understanding

a person can understand the structure ^{of any}

but at the same time it cannot be dynamically modeled, ^{for example}

from this it is clear

that when God did create in His Image and Likeness

created man as an Infinite quantity

then interaction with the goal ^{yes}

any people

it happens exactly the same way

i.e. in the same segment of your Eternity

the Eternity of all people is realized

i.e. you can basically teach very simply

you have enough in your management goal

identify your own fragment

and show it to everyone else

all people are basically already here

because they look at it all the time

how do you implement the law

your goal

the goal is fulfilled according to completely canonical Laws
any goals have a number
absolutely clear canonical Laws of implementation

Well for example Laws of universal action yes
Laws of self-correctness
i.e. the goal is clear to itself, for example and so on.
from the point of view of an outside observer

well if we well such a fragment
why the goal is clear to yourself
who understands
well, that is, the goal itself
and who perceives themselves as a goal at all

then we begin to come to ourselves again
i.e. a person
man is the definition of purpose
the one who put it here is actually implemented here

and when a person already begins to realize
almost completely myself
in the Macro-target management system
then he sees that he, for example, and that 's the goal
in principle they are inseparable

this is when the element of inseparability of the physical body
arises from the goal, whatever it may be
at least there are some macrogaxies flying back and forth, for example Yes

and then when you see this
in real time as if I were here
then it turns out that the theme is macrogalaxy
this is already a subject material
i.e. it is focused on you

because you kind of lead the structure in the essence of the World
and as if such a structure
which actually defines the relationship
yours with the whole world

i.e. here it turns out that you see yourself
in the center of the world
you can see yourself here quite clearly
that you are in the center of the world

and when you, for example, this level of management

so in the center of the world you kind of visualize yes

then it turns out that you are very clear
see the following constant of goal development

you should see that at the moment of control
you are in the control center of the World
Well as if it were the center that you created for yourself personally

because it is clear that there is a lot in the world
various processes occur
and so that we clearly manage the goal
and achieved control for sure
we should in principle do it this way
to gain control of the whole

i.e. we must control practically
all world processes from the point of view of the goal and management
and at the same time be in the control center
the model is logically clear
i.e. it's as if it couldn't be any different
if we want to achieve control correctly

then it turns out that based on this
inside the Soul of man
and the Soul is the perfect goal of God
i.e. the realized purpose of God
in this understanding

and it turns out that the level is found
which allows a person to actually go out
in general, into the structure of your Soul
i.e. to see the control in this way
what does it mean you see this exact level
like the center yes
a certain level of awareness of the center

i.e. you understand where the center is
but this does not mean that we need to take, for example, the geometry of the
Soul
arrange the optics there into quadrants
and figure out in general where this Soul is located

this is precisely a task not from this plan
although such a task can be set
and it can be said quite correctly
where it mostly happens

the action of your Soul ^{yes}
and where is the form of the Soul

this can be highlighted this control
but then it will be a different management

the allocation of localization and volume ^{there}
from the point of view of your Perception it doesn't matter

because you can perceive a part of the Soul ^{there}
and the Soul at this moment reproduces Perception
^{as if} it were still in the external control system

and it turns out in this case
which is exactly what we don't do
here's ^{an example there} by search
geometric location of the Soul
and we work with the space of the Soul

that's exactly what we understand
that the space of the Soul is here
We understand where the cellophane is

what difference does it make why we can't understand by analogy
where is the Soul
the mechanism is also universal

so that's why it turns out that we understand
where is the Soul
and in this aspect of management
we start making management
precisely for the purpose of achieving the goal

i.e. it is enough to make the control
^{as if} on the platform of his Soul
and the goal is achieved

at least for the Soul it is definitely realized
and this is already ^{almost} ninety percent minimum
solutions to management problems
from the point of view
personality-God
or personality-Peace ^{yes}
personality - in general, universal Reality
where God is an active character, ^{for example, etc.}

when you implement this control ^{for example}

then on the physical level of course
firstly you can speed up
i.e. it can be implemented very quickly to speed up
processes that can be quite lengthy ^{yes}
can stretch
i.e. this is acceleration after all
quite significant through this technology

and in principle the main thing is that here is Macroregulation
here it is expressed in that you
when controlling the target ^{as if}
external level of target control
express exactly the level of interaction
personal ^{as if} level ^{as if} Macrosystems
so that you regulate
as Macro level
and their systems

i.e. this is, in general, quite a strong ^{external} control , ^{yes}
your personal and actually continuous in essence

because you can only work
around the target
and around the goal it is continuity all the same
after all, it is around the target, it is a continuous value

so now make such control
go out as I said to the level of the Soul
i.e. understand where you control in your Soul
specifically it can be near the physical body
space
and set the task of management precisely on understanding

i.e. you understand how to achieve the goal
how the goal is achieved
but you don't have to spend a lot of time on the goal itself
the goal is still set

Well, first of all, set a specific goal
better right now
and ^{so, work} out this goal directly
on the platform is precisely the space of the Soul
where there is an understanding of goal management

I will work with you
Do not stop monitoring and surveillance during work

well, i.e. controllability of the goal
constantly
heart is the goal
body-target
must be connected all the time

so i will work with you
work more actively if possible
i.e. constantly increase the control speed

and then when you do the management
this factor needs to be considered
that's why a person in some situation
I need exactly this and some situation

i.e. what does the control angle mean , for example?
and how is this perspective supposedly connected with that
that's how the task of a person is the task of other people
defined for example with Infinite development

i.e. if you set a task
that Eternal Development is a specific technology
which is always realized
in the form of technological principles, yes
for example in management purposes

i.e. there is such an option
that a person in any case is eternally developing
but he doesn't have to constantly set this task

but if we still set this task
it turns out that it is precisely as a management goal
then they must be identified
specific technological techniques
realization of the Eternal development of one's own

a kind of strategic model for this, yes
promising
all people are included there
and it turns out that all people must master the technique

so it turns out that some people should see
some control space
that they at some point
we should transfer control to other people, yes

or pass for example there in the Infinite Future

and it turns out that when you do management
as if coming from you for the purpose of management
there is such a moment
Firstly, the task of concentration
level of knowledge transfer
to show at this moment
what happens in reality yes

i.e. well For example there are many people who already have it
technologies of Eternal life
but in principle it doesn't mean that there is a lot
very many first of all

secondly, it means they need to pass it on to others
but even if almost everything, it doesn't mean that everything

and the task is to identify, for example
how many people
pass on this knowledge

the task is to identify there, as it were, the last person
to whom you can transfer there and then everyone can

i.e. this is a task that is originally from God
is set as the goal of His actual personal development

i.e. it turns out that from the point of view of God's development
if such a term can be introduced
then God is like an element of development , yes
or let's say there is the meaning of one's own life there

let's assume we can ask the question
what is the meaning of god's life
so then it turns out that it is precisely in that
to be able to convey to everyone and teach anyone
Well in general, about the same or completely the same
or at least not specifically to exactly the same thing
but similar to what He Himself does

i.e. it turns out from the point of view of other people
the meaning of God's life is clearly understood

i.e. it turns out that, well, anyway, He doesn't die
i.e. God lives Eternally in any case

the element of Eternity is obtained
logically it is still connected
with the Eternal development of other people

i.e. if other people are always developing
God is even more Eternal

and it turns out that based on this
how do such logical connections exist?
which say that God is in any case
from a human point of view
should show some path to self-development in fact
although the paths of development for God may be quite conditional
anyway, God knows everything somehow yes Infinitely developed

nevertheless He must
have similar mechanisms

which exist in humans

and so that these mechanisms were similar
It must create elements of knowledge transfer.

here the transfer of knowledge is a similar value
a person can also transmit knowledge
to any other

so there are some moments
which occur at the level of one number of people
which can pass on to the following

why is the number of people controlled
for example , why didn't God just take it and do it
An infinite number of people at once
take and for example let it be or Infinite quantity
or the quantity is generally uncontrollable

here is the very concept of "quantity" yes
why does the concept of "increase" occur

because there is an element of knowledge transfer here
and the knowledge of God
God controls the transmission of knowledge by increasing
the amount there is transmission
from one number of people to another, etc.

at the same time, it is right here

each person emerges as an individual
when knowledge is transmitted

if everyone there has knowledge
then what is the manifestation of personal factors of management
how did he even gain knowledge himself ?
what is the level here

because when there are many people there are large numbers of people
personality manifestations
and the personality is revealed very precisely
completely individual
quite practically
precisely at the exact Divine level
when among a very large amount of information
a person, for example, gains his personal knowledge
and is personally promoted

i.e. the more information
the more the personality becomes revealed

i.e. on the one hand it seems logical
it turns out that the personality works , so to speak, more individually
logically as if or from one point of view
when there are n't that many people
in fact, when there are many people
personality is revealed more individually

because there are systems of interaction
between almost a person
and the external environment
and this is where the personality begins to choose
it means that interaction is the goal of management

well, that is human goal reproduction
depends on what surrounds it

and the more accurately the target is reproduced
i.e. the more precisely he sets the goal
from interaction with all of Reality
the more the person is revealed in the personal aspect

personality that works
in a large amount of information

naturally I should know more

i.e. therefore it turns out that identifying the target

target management

implies the same correspondence of action

how does it happen in the case how does God set the goal in general

i.e. there is an infinite amount of information

and when is this Infinite amount of information

For example Means Well, it is visualized by God

and God does the following action

and God must perform a precise action

He has practically no opportunity

let's assume to perform some action

which may not be accurate

i.e. in any case God will not allow it

for example, the destruction of the Earth

therefore He must

always perform absolutely precise actions

so it turns out that based on this

in order for God to perform the exact action

so from a human point of view

he must correctly define the goal

in the Infinite level of knowledge

therefore, the more information a person has

the more precisely he defines his goal

Well, logically it's clear, yes

the more information a person has

well, conscious information, precise information

generally speaking, it is correctly located

the more precisely it acts

it turns out that the task of managing the target

the task of target management is to

what you perceive practically means all external control

as a task of formation in general

Well there by purpose or connection with purpose

or connections with well such connections with the purpose

so that you have some kind of corrective systems yes

i.e. how to choose a corrective one

exactly when there is a kind of correction

it doesn't depend on the word yes

shorten the word there, you can make it longer
but you do the management

i.e. you don't have to talk at all but do the management
i.e. then it turns out
what how can you shorten a sound form
spatial form temporary there if necessary
i.e. how to take the next one at all
can be correlating sometimes or corrective
information

rather, as a rule, it is still a correlating one
because correction sometimes implies
more like a rude interference , yes
if we identify the exact target
it turns out that we should not interfere in principle
into the autonomous unit itself

i.e. God set a goal to create man
He created man
man does not change
regardless of millennia

it turns out that based on this
we have a structure such that
so that the goal is manageable and, as it were, practically adjusted

with the facts of external Reality
it must be completely autonomous

i.e. in fact it should be as if "torn off" yes
Well, in quotes of course
but from Reality
by and large at least
in the process of action
turn on here is the initial level
what is the beginning
determining the level when the goal is formed

and the same goes for God
It is as if he is also outside of people.
but making the control external at the same time
He is natural
human
and as deeply as possible to be among people yes
in terms of contact

because He has a list here
He must manage, i.e. all development systems.
it means external system
actually, for God this means
not isolation but on the contrary the endless development of man

and based on this
when God sets a task
namely the Infinite development of man
then He just comes to Himself
i.e. well in general well it turns out to the level or there to the meaning of your life
from the point of view of the person observing there
Endless development

and when He begins to see the Infinite development ^{yes}
He understands His meaning as He understands it.
i.e. precisely by Divine or God's intention ^{yes}
or there with the mind, etc.
or Soul, i.e. precisely the Soul of God

and here it turns out that we clearly identify the optics
i.e. the optical expression of the Soul of God
in general, and in the variant
i.e. at any point
Personality characteristics of the Soul of God
she is very specific

as I said, a person perceives logically
Well, one of the positions is logical

what if there is an external Reality
therefore the meaning of God is to create Reality
the meaning of His life or His development or Action in general
then it turns out
including creating a human being

and the Infinite Development of Man
this is where you need to be extremely careful
here is this construction, try to remember it again
right now

and then this system several times
I'll have to look at it further

the thing is that the process begins next
already transferring knowledge
a person who knows such a Reality

well for example there I said that the meaning of life is God
is Infinite Development
Eternal development of humanity

this thought is in the Perception of one person
and then God begins to look
through another person
as if the first man
who has this information
about the meaning of God's life
is the Eternal Development of Humanity
There is

and when God looks as if with his eyes
it means this person or there personality
then it is immediately clear to all other people
why does man live forever
because the Soul of God is revealed
and people see it as if in real time
another person is created

He's looking at this very moment
to understand a person's point of view

and then it becomes clear how it is created at all
in real time

and here, by the way, is the first aspect of understanding
that man is absolutely free

i.e. he is practically free to accept there
any independent own decisions

Well, to a greater extent he accepts constructive ones of course
usually from birth at least

and then, as it were, formation
precisely the creative status
it is still his personal internal affair
i.e. a person must understand
why then does he personally live

and when does he start
Well, of course, it's an aspect of life to perceive
as an action of the Soul
i.e. it turns out that he has been in the Soul of God for a long time
Human

he begins to realize it

remembering elements of childhood
who tell him about it
that he literally touched it right there
with the Soul of God he lived there at all

so why is he for example a contact
let's assume Well, he disappeared somewhere, right?
if he thinks he's disappeared
or it still can't disappear
there is only the level of personal Thinking
which kind of takes you into your own reproduction
Perception

why are the worlds different among other things
it reproduces perception to man
God gives him the following Reality

so that's when it works out
that when he is on a human level
goes into the depths of his thinking
he understands that in every thought
is also present
Soul of God
Action of God
life of God

and it turns out that based on this
Man and God coincide in Thinking
just in time in the Thinking of the physical body

here we come to the point
that the physical body has Thinking

it is clear that it is logically clear to everyone
the body and the person thinks so to speak
but Thinking is connected with a specific person
so with the physical body too

and it turns out as soon as we move on
for synchronization
The thoughts of man and the thoughts of God yes
for management purposes
then we understand well For example there is a driver coming
and the navigator goes to races and cars

or is there a second pilot?

then it turns out they should be synchronized
this means that thoughts must be somehow synchronized
in terms of action, it is necessary

the same thing when you enter such a parameter
in management
then it turns out that your synchronization is with God
gives a lot of knowledge right away
i.e. you do it right right away

Here, for example, is where this concept comes from
what is it called "controlled clairvoyance" or just "knowledge"
or is there "clairvoyance" well as if there is simply knowledge of some situation
it is synchronization with the Action of God in the purpose of management

there is a goal to save the world
if we synchronize in principle, as if correctly, yes
then it turns out you already have the knowledge
this is the contact with the Soul of God

therefore on a personal level
to control the target
there must be contact
your Soul and the Soul of God
and I just showed you the technology specifically

i.e. it is precisely the controllability that is such
that as soon as a person knows that he has received contact
he is free to do whatever he wants
he can do some other thing there, etc.

how do other things arise for a person
Well, it's just an abstract question, quite simple
if you can name the question
in relation to any phenomenon of the World

then why does a person have another case
why doesn't he do one thing there for a long time
or why does he make it short

and because as soon as contact occurs
at the level of knowledge with the Soul of God
the person understands that now he is developing further

it turns out that the concept of "the end of the case"
this is a completed contact of one level
and if so, then the completion happened with God
so this is the Eternal construction again

i.e. the final value
So it turns out she is Eternal
in all our daily affairs
I just now deduced it in this control logic

and from this see the Eternal system
inside the final case it's very simple
Well, take it back from this optics
ending
go down and look inside

that's why God sets the task this way from the very beginning
that the matter in principle has nothing to do with it
in fact, there was no beginning for Him
It's still an Infinite Level of Control
and it turns out that
or Infinite Personality so let's say yes
but man is also an Infinite personality

and it turns out that as soon as a person identifies
in every matter Eternity and Infinity
i.e. his Soul perceives
Infinite magnitude Infinite vibration
in every case
i.e. in principle in every management goal
that's all
target stabilized at Infinite development

what I was talking about
how can a person live forever
how to get to some level of management
exactly
do as God does
exactly

for this he must
See the system endlessly
in all phenomena of Reality
how to even highlight it specially by the way

i.e. if, for example, we are talking about that
that there is a lot of information in the world
it turns out that it is easier to highlight the exact outline of the action

especially since a person often excretes
a clear decision
he goes to some of the same places
there he leaves the house and goes into shops known to him yes
i.e. these are the same places
here it seems like a person can't really think of anything else

he is often forced to act
within the limits of some of their specific control systems

and it turns out that it is the selection that is important here
Here a man goes into a store and enters
he used to go there
how in this case he should live forever
what he must discover for himself is this
on the steps known to him there is something to react to
to live forever

this is how he is supposed to get here

for this he must allocate
super concentration of your Soul
where the Soul is declared for him
i.e. he knows his Soul completely
this is the point of concentration

it is revealed by what he understands
i.e. the Soul understands it
The soul understands the actions of a person in general
The soul is aware and how they work synchronously

just as a person works with God
can work synchronously or there is a person with a person
also the physical body of a person
can interact
precisely to interact with the Soul synchronously

the path is in principle determined
the very level that God when means developing
to the level of a person in the transfer of knowledge

it turns out that this is the concept of "development"
again from the point of view of understanding

in fact, God already has it

and when we have exactly the concept of "in fact"
we look at how God has it
we see how he transmits knowledge
this is the development towards a human being

i.e. there must be a person there
and transmit ^{there} ordinary knowledge that everyone can perceive

and when on the usual, ^{as it were,} these steps again
or somewhere else in the forest a person highlights a level
how should he go where
where exactly to step with your foot, etc.

then here comes this level
that the body develops according to knowledge
your synchronization with the Soul

because the Soul is Eternal
therefore if the body develops exactly like this
and the body can be considered as the level of action of the Soul
then it turns out that the body is also Eternal

i.e. simply a mechanism for the development of the Soul
will be transferred to the body
and that's all

so it turns out that it simply exists
need for docking
between the development of the physical body and the Soul
as if the level of understanding
here is a heartfelt ^{well for example} a person sees silence ^{yes}
some forest there or a ringing sound of silence ^{for example}
it is a kind of penetration into external Reality
and awareness of interaction

i.e. you understand the external Reality
^{like a forest or some object of Reality}
gives you knowledge ^{yes}

the same thing Soul at certain moments
gives you truly profound knowledge
i.e. it is completely open to you
she actually teaches you

i.e. it turns out that you proceed very simply

in the entire parametric control system there is a different
the optics may be different
different Thinking
you are exactly where there are many parameters
I called it a parametric control system
where there are many simple elements of information

and now we need to react to something
to make the right move towards Eternity
Be careful here
because having learned to take the right step here
no problem
your body becomes at this point exactly Eternally

if you start to pull this point behind you, yes
prolong
then there is a day, two, ten, and generally speaking, Infinity
can be pulled out by such exercises
you then have an Eternal physical body

therefore, it means choosing parameters
you must see it means
firstly, not everything is so clear-cut here
that the Soul is connected with other people
and there is always a task to teach others

here's the tricky part until you teach everyone else
how to master the technology quickly, of course it is possible
but then you need to master it with a large number of methods yes

so but still in the end
the technology is fully implemented
when there is absolutely any person there
Eternally living

because then God accomplished His task
it's clear that you can already do something else

but there are other tasks for something else
when a person already has Eternal development
he just often has completely different tasks
not radical but they often don't fit together at all
with tasks that exist before mastery
with this mechanism of Eternal development

as if, in principle, even the logic of actions is different there
and other mechanisms

and it turns out that in this case
we are only talking about tasks
which a person should simply do for everything
I'll definitely do that
God doesn't make mistakes, man doesn't make mistakes either, so yes
so he may not be wrong

and here we finally come to that
what does the Soul that teaches a person mean
So she passes on this knowledge, yes

Well, first of all, the fact that a person happens
in the space of the Soul in general
or in the space of the Soul
there is even a term there Well for example, "like in God's bosom" yes
there is such a term, just a common well-known one

i.e. these feelings are known
in this case I still highlight this feeling
this is a different process, this is the Soul teaching the physical body
it's as if it's being drawn into the body

i.e. it means that there is such a concept
that "the Soul enters the body there " yes at the moment for example there are
conceptions
or even up to the moment
the body is formed or birth, etc.
i.e. there are certain points of view
that the Soul as if moves in , enters into the body

in this case actually
The soul is always inextricably linked with the body.

and I think it makes sense to look at this point of view here
where is the moment of all the organization of information about a person
there is his Soul
for example, God decided to create man specifically

then he must consider
Soul connections
with every cell of the body
i.e., as we say, a system [...] that knows everything and can do everything
He must know all the connections.
absolutely right

here the concept of "inaccurate c t" in principle cannot exist at all
He must know every vibration of every blade of grass
at any time when a person is present
at any point in space-time

then it turns out that based on this
The soul practically actually means possesses
generally speaking, a tool for interaction
with this knowledge
i.e. the Soul at least knows this, yes
and that means she also controls herself in addition
to accomplish this

i.e. the Soul turns out to be like this
what is the Macro-creative path
which God originally gives
she already always has
at least she has this knowledge about general development
their successful development, etc.

that's why she is also Eternal
purely logically why is she Eternal
because how else can she control it
all these processes

only because it is Eternal
She can control all connections
Eternal number of connections

and it turns out that based on this
we specifically highlight the optical structure of the Soul
which is already inside a person

i.e. this glow is there for example, the beating of a person's heart there
or the movement of blood or simply in human action
how any human action is optically revealed

and now take the word yes
and what is the connection between words and actions

and what happens here is that the word has
similar systems
for example, I'm talking about some function of the human body
and this function appears in the information

i.e. the result is a reproduced sound environment
creates Reality
where did the sound come from

Well, there is air for example Yes

it means vacuum there are other processes there

why do I say that for example Eternally Living
which means it cannot be destroyed
after all, he must first create air in a vacuum

that's why say for example Yes

i.e. here are different mechanisms
between the elements means where Eternal development is achieved
and where development is still underway

but when the future develops
this is the goal of the future
Here it is very important to identify the goal
a person knows the goal is already protected
he is already in principle Eternally developed

and it turns out that this is the moment of every life
this is an element of the manifestation of the Eternal development of man

and to say in advance
that man is not Eternally evolving
based on this position it is impossible

because if we start this mechanism
prolong
and set it as a goal in life and as a system of knowledge
suppose actions
by any person

it turns out that the person is enough for him
at some point synchronize your actions
with the action of the Soul, i.e. to see the optics of the Soul
Well for example, something like this
Well let's rehearse for a while
to conduct some training

for example, you want to make a movement with your hand
and how does the Soul move?
where is the Soul contour
well, you just do it synchronously too
practice on the geometry of action

when you start the Soul action
see that the Soul is practically ^{so} it works
Well in general ^{so} let's just say a little bit forward ^{yes}
she determines events

i.e. you have an idea
after this thought you can see
where is it located
namely the contour control of the Soul is geometric

i.e. the same hand
but precisely modeled by your Soul

i.e. you just physically put ^{it in}
like a glove, etc.

^{so} when is ^{one} of the levels
why do you need to take off the glove
it has a level, after all, it is a direct contact with the Soul, ^{yes}
and when, ^{for example}, based on
Well, when a person greeted by taking off his glove
i.e. based on another explanation of this phenomenon

i.e. it is possible to find an explanation for some phenomena of the World
if earlier it was considered that this was ^{just} a knight's tournament
I had to take off the glove, they were made of iron, ^{for example}
then we can explain it from the point of view of this technology

i.e. in this technology they change
it is possible to give concepts a different meaning
find another explanation

and that's when you start to find another explanation
then you see that for those who have achieved
technologies of the Eternal development of Eternal life
^{this means that} elements arise
where you can get an explanation yourself

this is a penetratingly subtle stream of the Soul
where is the explanation this is Reality
i.e. God understands because He both creates and understands
simultaneously

Well, that's roughly what it looks like

in fact, He explains and teaches, in general, He does everything, ^{yes}
at the integrated management level

hence
and another one of the levels of target control
it's complex

i.e. from the point of view of, ^{for example,} there are no predictive characteristics
the future is revealed like this
what if we take and conduct the entire circle of control
^{for example} across the whole Earth
then the future ^{for example} next year ^{there} December next year
is located practically next to us
but at the same time we understand
that this future will happen in any case

each of us has at least one ^{place} in the Infinite Future

there is no difference
what next year what Infinite future
we begin to concentrate
^{for example,} it's December next year
in some specific design

then we control all the phenomena of the Earth ^{there}
nothing happens to us no problems happen
some ^{well} as if unfavorable ^{yes}
and we at least
from some sharply unfavorable levels
we can always ^{somehow} level the situation back to normal

i.e. it turns out that we are practically
we own the control mechanism
because we understand simply
that there is some aspect
which can be fixed and ^{simply}
^{how to} realize or present the meaning of management
due to the current control point

i.e. we ourselves bring in the meaning
the man himself
forms its own management goal
He himself makes the realization of the goal
He himself basically creates the management
so that management is effective
i.e. it is still his personal decision always

and the goal of management is obtained
must be balanced
with the properties of something like personality with the development of desires
every person can see in themselves
there are a lot of Infinite levels of development

i.e. the personality is not actually conflictual
because they have
An infinite level of conceptual systems
and they can create for themselves
in this system where there is Eternal development
any system that is acceptable to them

For example Well, the meaning is simple
if there is some resistance
There are builders who want to build something but there is a big wall
what's the point of doing something with the wall

you can bypass it
or something like to realize its meaning
the meaning of the following control is that
that management takes into account existing nuances

and considering that on your part
Infinite number of actions
really, like, these are precisely conflicting systems
as a rule, in principle, it does not exist

here we need to consider this position
why does God not conflict with Himself
take here the Infinite matter of God yes
although He means Well, you can consider it locally, yes, but
and His Actions are Infinite

if there was even one real conflict
between the neighboring elements there are the Essences of God
then the design of the microworld yes it could just then
Well as if it were not in that form to exist at least

i.e. it turns out that God has a structure
as if there was an absolute absence of conflict systems
because in His position
in the Eternal level of life everything is achievable
It simply allows people to learn how to create
Infinite number of implementation goals
based on the fact that in space

just information is endless

the space of Thinking is Infinite
but a person perceives himself there, for example
he perceives through the structure of the Infinite Environment

i.e. he already goes through knowledge and understanding
Infinity

therefore it turns out that the management goals
it is necessary to identify such a factor
here it turns out that a person must first of all
consider how he comprehends Infinity
but definitely yes
i.e. through any control impulse

i.e. the management goal contains knowledge
here is a rather subtle and peculiar concept
but quite simple technologically

i.e. there is a management goal
for this we need to consider
where does your optical impulse go
where Infinity is being mastered , as it were
and how does the impulse come from this Infinity
towards your goal
i.e. some well let's say so the angle of reflection is simply optical

and when you visualize it
then your goal
Firstly, it means it is executable
in the perspective of Infinite Time
secondly, it becomes more stable
but the main thing here is that she begins to possess
properties of some plasticity

because when you have this knowledge of Infinity
transfer to the target management structure
the goal begins to be dynamic in implementation

well, that is, it is not a static system
it is a system that can bypass a certain system there
there is something to be completed there, etc. i.e. this is dynamics
this is already a system of Infinite development again
where there is dynamics there are elements of Eternity

and when we start to look at the goal
as a system well as if even autonomously developing
that's why it's clear by the way
why is it necessary when managing there target yes
people should be taught precisely Eternal development

then they have
Infinite in fact
the amount of knowledge there are solutions
and always from two elements of Infinity yes
some mutually acceptable systems will coincide

it will turn out that on such a status
we are dealing with that level
what is learning as such
why does God teach people all the time
informs the elements of Reality

because this system is generally speaking sustainable development
and the more knowledge
the more stable the more specific
and more people
has this specific knowledge

namely, a more concrete development
towards Eternity

I want to highlight here
it's not just that there is development as such
and if we take and give, for example, an infinite amount of knowledge
group of people
which are carried out, these are some kind of these knowledge they have, yes
i.e. they are somehow realized

i.e. for example, you want to just walk along the sidewalk
a thought comes to you
why do i always highlight the sidewalk again
I mean it's an outer space
people can be completely different
and this is harmony

then you set up control for yourself
although it is possible to highlight the idea in any other environment
but another environment can be initially harmonious
because you adjusted it

Well, we just did it ourselves , it's not even possible to regulate it

and even as if they retouched it

i.e. some kind of retouching where you can
very subtle systems of the Soul to use

i.e. for example if we use such control yes

what does the word "from" mean ? Yes, that's the word.

let's assume if we have others

for example, "from" yes from something, for example , from God yes

if we have "from"

but from God

then we get all the knowledge

if we have "from" and call

just literally the first two letters of the word

we can understand the meaning of a word without finishing

i.e. please note that many controls are done at once

and the level of control is carried out as if by that

what well the word "re" there for example there could be reconstruction there
or some other meaning of the words

but when you see

at the beginning of a word its final action

you see that the word starts to match

with the Reality system

i.e. by adding some sound forms

some elements of external control

or there are simple forms there are simple words

creates a level of control such

that there could be a simple word there

Well how to work as a level of a polysyllabic word

Well , that's why it can be considered in speech

abbreviate by first letters yes

there well for example, there is the name of the party, etc.

because what happens next is known

i.e. and when we sound form of understanding of a person

we are taking it to the next level of development

i.e. a person only encounters information

and immediately takes control

then we see that the Soul of God is already

in such a clear, as if manifested form

interacts very closely in practice

with the Soul of man

firstly, there is the construction of the human body
i.e. in real time
creating precisely the level of health

and when is the canonical level
revealed precisely in Eternal Development
then we see that the person actually did it with his own hands
everything builds

i.e. well, just like for example there is the human immune system
remembers some systems and regulates them
also the person himself can regulate
event system

considering the following development
as a system associated with it

here is God having there the One Physical Body of man
He still created the Infinite World
and is connected with any element of the World

it turns out that based on this
you can the following development system for example your own
see such
that all events are connected with you
and you are the direct creator of events
including
but or for example some things
completely just personally created

and when you start to see
control from God
and do it yourself
then it turns out that this is really an event
you specifically created and even some segment

as soon as you start to see
this control system
well, exactly the one that is directed, let's say, to Infinity

i.e. you begin to see that all events coming from you
have a status associated with you yes
even more so, all events in general
not only from you who come

then the goal is absolutely clear

it is being implemented
and, moreover, target management is also implemented at the same time

just like the body has a kind of controlling organ, yes
from the side of the Soul
you enter the same thing into the control logic here
level of such Macro-general control
and then the goal is definitely achieved
Moreover, it is achieved harmoniously
and in the general aspect always

i.e. in this case even often
that's exactly why it's necessary to conduct Macromanagement there once
again
even well, it 's not necessary
because you can immediately see how you spend it
you can immediately see that you have already carried out Macromanagement
and you do the management

then everything will be absolutely harmonious
and you will always make the management
to accomplish the Macro-meaning there
taking into account the promising favorable situations for themselves, etc.

This is where I end today's seminar.

Thank you
