

GRIGORY GRABOVOY
The Teaching about God
Illumination by Soul
19.05.2005

The topic of my seminar today
this is my Teaching about God
Illumination by Soul

in this topic i show
how to follow the lighting position
as an element of action
consider from the point of view of Macro access

i.e. the ability to transfer the light of the Soul
to the level of a private event
this means macro access after all
because the Soul is present everywhere

and make this access personal
i.e. to be able to do it this way
so that you can your personal action for example
well, in any time in any space to do it like this
so that every action of yours was
and private
and at the same time Infinite, i.e. universal

and then it turns out
that you can create your own management structure
in this action to discover
as in Macrosystem
and also at a personal level of action
doing seemingly ordinary things practically

and this is the level of light of the Soul
which is actually in front of you and often
i.e. we are talking about what we can say
about the external space of the Soul that is near a person

and then it turns out that we can, for example
spreading this space
i.e. the light is specific
light that touches only the Soul and is the light of the Soul

the light that touches is external light

and the light that appears is the light of the Soul itself

and so there is a level of contact here
which already gives the third level of light

i.e. the light of the Soul is actually multi-level, as it were
many-faced light
which has the status
and Infinity in Infinite distance
and the close light that is located
for example at this point
or for example is located near you

therefore, spreading the light of the Soul, for example, around yourself
you can make the space harmonious and universal

it turns out that the task is
so that this is exactly the lighting
the ability to bring light out as if into the structure of external space is
nevertheless considered as an original action
i.e. that this action was

this is what action you do
it is an action that seems to exist initially

when you understand this status of your Soul
what the Soul meets in its World
in this level of light, so to speak, where the Soul reproduces light
in the first plan only what already exists

this is an important aspect of activity, so to speak, in management
because from God's point of view
God also meets what exists
upon further viewing

He does it first
and then it comes to the same thing
at the level of the personal management plan

i.e. His management
in fact, this is following the Self

and the Soul, by analogy, is structured in this way
what we are looking at when we consider the primary position
that's exactly the light of the Soul
then this is an action that has already actually happened

which exists as if in the general status of the World

and it turns out that we can do this with this action

It's very easy, for example, to return people to Norma there, yes
when they have problems

well, from the point of view of, let's say, some diseases there

if there are no diseases

then normalize some situations

it is enough to just introduce the management structure
exactly what is visualized as the light of the Soul

what is important to see here is that

that you see exactly the light of the Soul

i.e. differentiate

as soon as you, well, some kind of peculiar field of the Soul

you begin to perceive those around you

in this area, events are actually regulated

and then the question arises as follows

if you are, for example, considering a certain person

is located near you, for example, yes

there are no problems, it is enough to distribute it physically
this light

and you normalize the action around the person

and in general you align some processes there

precisely from the point of view of the Norm

improve your health, etc.

and when, for example, we are talking about a person who is distant

then in this case the technology is as follows

Soul

this is exactly your Soul

in this case, by the way, you need to work

It is obtained exclusively by the Soul

i.e. the Soul works logically

i.e. the Soul works like the Mind in fact

and when you start translating the structure

into some Infinite action

i.e. to provide assistance to some person

in the next time or space

it is necessary to do it this way

so that another person
perceived what you perceive now
exactly the same way you perceive it
such a simple formula

then it turns out he perceives the action
which brings Salvation

for example, if you perceive
what God perceives, for example yes at the moment
then it turns out that we are saved
i.e. the action takes place Salvation
because it is the same type of action
this action is actually by the Will of God

The perception of God is the action of God
in the spiritual understanding, it is the Soul

By the way, this can be understood. By the way, this is exactly what the Soul
There are things that are understood only by the Soul

and that's when you consider
the structure of the concept of "Soul"
then by analogy with how God does it
for example how does God think yes
Well, if you ask this question

it turns out that it is precisely the development of His Soul
that's unlike a human
God can do it this way
what is His Action
any of His Actions is an event Action

i.e. as if He is always in dynamics
there are no static objects
He always produces from the point of view of the logic of development
any structure
because He creates all Reality
around the structure the structure itself

and that's when we enter the structure of Reality
what is this Reality then?
original for God which He creates

for Him it's as if it doesn't exist
you could say some kind of system

so if we are talking about a new object

object is created
from the point of view of human perception
and then it's as if an object was created
but He also created what does not exist

this is what human perception is like
to spread it like that
so that Perception would be as God thinks

it turns out that what is needed here
just technically create that part
which kind of doesn't exist

and it turns out that the question here is precisely one of external
management
i.e. the question is that everything external should be created then

and logically the simplest option
this is just the simplest version of such a creation
this is a consequence of the object from everything external

i.e. the object seems to grow
from the entire information system of the entire external World
well, how can you schematically reflect some kind of crystal
that it is based on everything
as for previous growth for example
if we look at the process like this
although often crystals of course physically grow autonomously

but for example if we consider the process like this
that's completely clear
that the Soul always seems to self-diagnose
she always sees herself

that's what I'm getting at in order to see
this light of the Soul
what does he even look like to a human
where is this well like an eye but where is this point of view
which allows us to highlight the light of the Soul
where is this fragment of Consciousness

this fragment is obtained
is located precisely in the remote, as it were, Infinite action
where the Soul perceives itself exclusively

and when the Soul perceives itself
and in the Soul any processes are Infinite
they are generally not contradictory
from the point of view of Infinite development

and then it turns out that you can see them here
knowledge systems of action
and those systems that the Soul itself gives

i.e. it is an element of self-knowledge that is inherent in a person
i.e. a person knows himself
and enters into the internal system
i.e. internal glow internal light
and the illumination of the Soul as if of itself is obtained

then it is clear that if you illuminate yourself
this is already work, as it turns out, from the point of view of logic
longer in time , yes

Well, if you ask yourself the question
where does time come from anyway
from the point of view of matter, for example

if we consider that time is matter
whereas time must be worked out from the Soul

then it turns out that it is necessary for everything
look at yourself and determine
where is the action of the Soul

as if to be in front of a counter-action
be before the action anticipate the action

i.e. the forecasting system in this case is
that the future exists well there for example useful for you
you set the structure of the Perception event
until some impulse
before the impulse of your action
and you see this action as it approaches
well to your fragment of Consciousness in the future

the simplest element of action
it is you who are constantly moving this beam away
like some two rubber bands that stretch out
and the future begins to tense up
not the future itself but rather the management structure

then it becomes clear
why does the material world arise during development

further development
The action of God was supposed to lead
it turns out to be to the material World
from the point of view of those Laws that God gave
showed here

and based on this
so in this I mean the material world
we must see the structure in this way
that this is the tension that is growing
leads to the realization of the physical object

the further we spread
Light of the Soul by self-knowledge

the more physical objects arise

and based on this we get
that when we work for example there to heal a person
I often show that, for example, you need to work
somewhere specifically there in a specific area
then here we still need to consider
here is also this process of action of the light of the Soul

it's the lighting
the inner light of the Soul it has an Infinite status
and the further you go, the more physical objects appear

why does civilization develop like this?
from the point of view of the Soul
the number of people, objects, etc. increases.

and when we look at management in this way
after all, logically it could be assumed
that there is a certain system
It is clear that a person develops intellectually

nevertheless, here is precisely the status of Infinite development
which is expressed in the action of the Soul
is decisive
i.e. the light of the Soul is constantly expanding
it forms the following systems of events

if we consider the process
how are event systems related to each other in general
how each event participates in every other

this must also be some kind of mechanism
in all these processes

it turns out that from the point of view of illumination by the Soul
the action of the light of the Soul is actually
element of light of the Soul

we see that participation exists
a rather complex technological path in general
so let's say which the Soul passes through
in the structure of concentrated light actually
precisely concentrated light

where Reality seems to split
or there it enters into a single point as if Yes
i.e. exactly where there is a multifactor system
Perception Management

for example, how can you know there
about the entire aviation field
or about all the planes at once yes
which are there in the airline
for example, there are seventy of their planes
how can you know everything about them at once in one place

if you know for example in words
then it turns out that we need to talk about it in detail
this is already scattered information

but you can know differently
you can know about them right away
but to know in the area of, as it were, maximum concentration

and by the way, this is often how complex diseases are treated
when there is knowledge
there is action
but there is no definition of structure

why exactly particulars yes
why not
because there is no recording of information
and in addition there is also speed control
the disease is curable

because you are constantly there
in a more severe phase
in a more concentrated phase of management

i.e. the diagnosis that you are dismantling
does not have time to form in this Reality

and you are constantly ahead
then as a result you have
the structure lowered onto the physical body
like health for example Yes

i.e. again, distancing
the further you move away
the healthier the body you get
the more in control

well actually in time
the more you do management
the naturally healthier the body
i.e. the question of health is only in time, then yes

and if we
or even the Norm of events is not necessarily only health

if we lower the time parameter from there
or we want to see well as if the optimization environment in general

what do we need to do
so that the same as the action occurs, for example, Macrocontrol
to get some kind of , well, some kind of work schedule, let's say yes
for myself
i.e. if someone needs it, for example, to pose the question in this way

you can work simply with your Soul
and see it in terms of the next action of the event
already determine the entire concentration

then there is no question here
but if we want to put everything in its place
then we should get a time axis as if to plan
and get some structure of what to do there now, etc., etc.

i.e. the projection system of this concentrated light

so here is the easiest option
break it down into events

and perceiving events it is simply natural to do
what do you want

as God does
He also perceives
i.e. I take and do the management in this way
just to look at it
how does Reality develop

i.e. it simultaneously looks at the structure
and the structural systems of events themselves in general
any events
are a system of action

there is no need to invent anything there
there is no need to build any extra graphs, etc., etc.

i.e. here it turns out
what exactly is some kind of approximation of the superposition of events
on physical Reality
and the creation of Reality
this is the action

and it turns out that when we start doing it this way
then this distant concentrated light
which I said about
which becomes more and more concentrated as you approach it yes

from a logical point of view
he starts to get closer then

because you kind of like it well, in quotes there, well as if "hooked"
or they were able to move closer to the events
and events are closer to this light

and that's when you start
this weave is like a fabric of action
when the Infinite event is distant from you
this is a controlled system
through , for example, physical and informational events
who are close to you
then you clearly design the entire field of light of the Soul
of that light which the Soul makes

for example, to control the Soul , so to speak
it is often necessary to consider the light that it reproduces

because the primary level of management
anyway the soul is for a person

and that means it turns out to be a person
as if negotiating with himself
inside some autonomous system

here is the Soul, this is the Infinite structure of information
and it turns out how can you influence it ^{yes}
on your own Soul

i.e. the mechanism is actually quite simple
It's quite simple to find an event
which requires attention
from the point of view of Salvation, ^{for example}
The soul itself is oriented towards action

therefore, ^{well,} not that manage
and ^{how} to understand the action of the Soul
and in fact to manage the structure of the light of the Soul
this is orientation and understanding
how these rays of the Soul go

similar to what God does on the halo
so here it turns out if you look
^{well,} some kind of level of light on a ^{person}
^{well} let's call it a kind of halo over a ^{person}
each one has a certain glow above it

if this is this peculiar halo

^{means} to spread
into the structure from the point of view of the Light of God
then it is clear that the light is precisely from this halo
and the Light of God, i.e. the upper light of man's luminescence
what comes out ^{as if} into the space of Macro access

and the Light of God
this is a combination at the level of the Soul of God and man
where the Soul of God shows
and the Soul of man teaches

it turns out that if we see
what God shows and this is teaching
i.e. the person teaches exactly the action

to learn means to act independently

and God shows this and this is teaching

because this is the concept of "teaching"

Well, in this particular concentrated control system

because when He shows

He also gives the structure of training

Well , this is the "sticking together" of information, yes
multifactorial information

if we want to consider this system

we must, as it were, actually see with our eyes

in general, what happens, for example , in the human body
to cure him there

from the point of view of this technology

we just have to kind of show someone yes

i.e. actually teaching means from the point of view of a person

so when do we start making this system?

or is there an action going on from God's point of view?

He looks and points

and then the person passes it on

here is the integration of man with God

that mechanisms from the point of view of Perception here are actions

It is precisely in the rapid action of the Soul that they are defined differently

i.e. God for Himself defines the concept differently

He forms the word differently

if you begin to understand how He puts the word yes

and places it there for Perception

then it turns out that you can quite easily implement it
there for a lot of people

control

passing this structure

at the level of for example well, some kind of Macro Events

i.e. trying to translate the word through Macro Access

and then you get a local word

which is technology i.e. many words

means overcoming some kind of control

this concentrated area

this is getting a large enough number of words

and obtaining by analogy with that
how we perceive the development of the Soul
from an optical point of view
this is getting to the event before the glow

behind this glow there are words
there is such an opinion that "initially the Word was"

and then it turns out that when we come
to the structure of the Word
which means it is located outside the structure of the glow
we get control of light
actually control that light that lighting
that's exactly it, well, some kind of purity
which comes originally from the original Soul
which was created by God

purity originally laid down by God
it always remains in a person
there is always a certain level there

and if we consider
how to control this light yes
or even illuminated by the level of the Soul
illuminated from God's point of view

then it turns out that this verbal control is like in the first phase
Well For example there is digital
therefore some kind of expressed control
expressed at some level

why exactly is the word there or the person's action
what is understood by others
here is the criterion of this action

what is understood by others
Well, maybe these are some kind of signals, signs, etc.
the main thing is that it is understood by the other person

hence the main output level
on the spectrum of your Soul
and the definitions of its contours are no longer just
and as if dynamic action and tasks of the Soul

it turns out that the light of the Soul
here is the lighting, the illuminated part, yes

and God
and with light from the Soul
this is the structure of understanding by others

as soon as you start to see
that at least one element of information
understands what you are doing
there you start spreading
there, for example, the structure of the Soul on Infinity
then here is precisely this very texture, so to speak
in the material sense of the Infinite development

mutual understanding, transfer of information, interaction
and this is the structure of interaction
this is the status of the Soul
namely the Infinite free status of the Soul

the status of the Soul gives birth to Reality

i.e. these multifaceted actions there Infinite actions
they happen not because there are a lot of movements
there inside the Soul for example Yes
and because the Soul is located and gets there
when he realizes himself in this status
it seems to start synchronizing with itself
in Human Perception
exactly in this status of Infinite action

i.e. Infinite action still guarantees a person
that it cannot be destroyed
in the Soul such guarantees are absolutely clearly laid down

and when he begins to understand this
from here comes the understanding of the Eternity of the Soul
here is the next status of the next light

but here is already the light of Consciousness
understanding of Eternity is the light of Consciousness, this is already a
different light
it is not the light as such, the original Soul

I was just talking about the original light of the Soul

when we begin to see the light of Consciousness
we see that Consciousness is kind of coming here

Well, creative people often say

what about the creative processes
some thought came
from somewhere out there yes

but if we analyze this "external" space in general
if you make it a rule to periodically analyze
source of information
this or that is always whoever wants it

here it turns out that it is visible
what exactly is interaction
as if the end of some kind of physical contact
with the physical world you can even say that
between the Soul's original depth as if the Soul
and the physical world
this means this level is like the next action

i.e. this particular contact
it actually defines this position
Well like a pre-action that you get here
there closer to yourself and closer to the physical body

and you get exactly this position
that it can be recognized, for example
well, by some discrete action

i.e. you suppose start doing management
then go from this control
on the structure of the next action
and then you begin to learn the previous management

i.e. the level of such a multifaceted interaction
which allows to recognize
that this element of light of Consciousness that comes to you
that it can be controlled for example
from the point of view that management is an Infinite factor
and you will always achieve control yes well, some kind of postulate

i.e. the external element of Consciousness will still be controlled
i.e., for example , you can not pay special attention to it
he will fall under your control anyway
in the process of Endless exchange of information

and why will it hit?
because the status of the Soul is clear to you
at this point

from the interaction of the Soul and the physical World
the actions of Consciousness occur
external thought

therefore the system of discrete actions
which returns this element back
it's just to show that no matter what you do
the element of Consciousness will still be, as it were, objectified
at least at the first level of Perception
always accurate

Well, that's why sometimes they try to take the primary answers there
and it is believed that this happens to be reliable information
first wave

in fact, as a control level
where the governance structure is as follows
that here it is often necessary to tighten
there is the word tighten the sound tighten in general the control itself

say a lot of words there, for example
and the management is slow
or, on the contrary, speak few words
and during this time to implement
there are a lot of control pulses there yes

i.e. in a word as in some kind of superstructure
the structure is laid down
as if there is some hidden meaning in the management

and it turns out that here we see
that there is some kind of matrix source
there is an element of Consciousness
which in some Infinite environment somewhere in the distance
comes back to you already from the point of view of knowledge of Reality
contains the structure of your own Soul
in contact with the physical world
well, actually somewhere on the level
namely the junction with the physical World

if you think about that question
how the Soul perceives the structure of the physical World

Well, the physical body is obviously also a part of the Soul
I mean, as it were, the informational part of the Soul

that which is manifested in the structure of Thinking

then it's clear

what if the reference point is for example a body
rays go there into thought forms and into thought
rigid support system

The soul perceives the external system
on a fairly rigid foundation
for her there is the only platform
is the human body in action
the man himself yes

and when the Soul begins to act
except that of course it's God
is the initial level for the Soul
but God is the Creator of the Soul

and when the similarity of action is such
that the Soul begins from the point of view of Eternal development
recognize
where is the structure of Consciousness yes
where is the Action of the Creator God

and such a multi-factor system
she starts organizing
exactly that system, that structure of the World
this is the one called
it is precisely the action of a person that is actually

i.e. the level of human action is different
it differs from the level
there are actions of other elements of Reality

and it turns out that the level of a person is
as if in a timeless system
because it is word-based
for the mutual transfer of information

and based on this
we can control it quite naturally
all external events are obtained
because here it is the same as God does
is outside the event

here it can be shown from the point of view of the light of the Soul
that a person can also be outside the event

and although other people take part in the event
nevertheless, from the point of view of Macro-creation

he still benefits all people then
and then he is again in the control zone

i.e. he can control the event
because he sees it for example Yes
controlling clairvoyance
and makes correct logical decisions
the most there as if an elementary method of management

or maybe just manage
because it controls a direct signal
some technologies, etc.

and when do we already understand this structure?
we see already concentrated
as if the corporeal light of the Soul inside the body

this is what distinguishes the light of the Soul that is inside the body
what is the difference

there begins some kind of golden glow
in a certain area
but there is something else there too
because if we consider the body precisely as a structure
Well or something like a component of the Soul's action

i.e. the body as a part of the Soul is in the physical sense
and if we consider the tasks of the body and the Soul
that they are, for example, united , for example, we set such a position

although in reality they are truly one
from the Eternity of the Soul
the Eternity of the physical body flows out

we just take this task and pose it logically
and we just put this abstract example if we take
that means having proven or having recognized or having postulated
that the Soul is Eternal
so we can simply set a task

each object in the information
has the property of transmitting yes
so the Soul can teach the body to be Eternal it turns out
simple logic problem

Well like in junior high school, so to speak
you can logically put it that way or at any age

and it turns out that if a person
who simply set himself this task

begins to implement it
then the implementation is just as simple

i.e. you just need to follow the light of the Soul
the marker of action is light

and what is the light of the body and the physical body of a person
this is his personal action
Well, there is some information that he leaves behind.
in the physical World there in Thinking in actions

and a very simple option
take some screen
as in the cinema in the big
precisely to imagine it as big
so that large projected objects could be placed there

and project the action
and the Souls as if on this plane yes
and try to go first along these contours
so that the physical body projects the same way

so it turns out the first element was found yes
the planar projection is the same

but the plane is not an expression of the whole system
it's just a projection
as in ordinary geometry
we need to return to the object itself
and try to understand, after all, this is essentially the geometry of light

and try to understand where then is the perspective of, as it were, universality
and it is precisely in the glow
that's exactly how it is in these fluctuations yes
in the very quanta of this light
if you can say that about these optical systems
which are perceived by a person
they can also be recognized as quantum systems

there are just different laws
there the light is simply drawn differently

and immediately enters the Infinite phase
and in the physical World
quantum from the light may be limited in volume

and it turns out that if we take a quantum
as if light in Perception
here we see the Infinite form
i.e. the form of transition from planar systems
from Soul to man
everything turns out very elementary

and then we see what needs to be done in this event
so that the physical body is eternal

i.e. it is actually quite powerful
in general, Spiritual, one can even say Soulful
vision of the Soul

clairvoyance which allows a person
work in an autonomous system, i.e. within the framework of its tasks

without bowing down to any external systems there
without recognizing additional unnecessary information there
there is simply a task
and only this projection configuration is enough
understand at this moment

in any problem there is the action of Infinity

i.e. we have come to the following actual axiom
that in any problem there is an Infinite action

and when we define this structure
then there are no problems
a person calmly at the expense of even his own resources
can calmly become Eternal there
self-healing, getting healthy
if he is healthy there then
or there if he is constantly healthy
so it turns out to be possible to project
to help some structures there with Infinite Events, etc.

and here it turns out that ^{well}, the concept
there is "help", "self-help" and "mutual aid"
this is already an ordinary Reality
^{Well like} she's like this
you can't even say that it's just everyday

Well , it is both universal and private.
what exactly do you do all the time
do you participate in all these events yes

and this certain hum is the light of this Reality
if you recognize it deeper
then the upper contour is precisely the light of your Soul
which is already integrated we combine
and with your physical body and with the event

and that's when you start perceiving the physical body
working from it, i.e. your physical body
this "film" is like being pulled off the event

then it turns out that the event
becomes completely transparent
i.e. any essence of the event is completely clear

and then well this reminds me
For example Well, there is some old train there.
which was covered in dust yes
and this dust can be wiped off
and then it turns out to be made of glass, for example , everything inside is visible
and then it becomes clear what the train is
every detail is visible to him

and if we, for example , want to control it
then the train must be real
and we must know how to manage it

knowledge itself allows one to see it from a distance
control the situation
at the primary level

but to drive it there or to avoid an accident
we must move into the past
and so that it is not glass but real

and then we still have to know the whole structure of the train
if we want to ride it

if we want to warn the driver
this means we should have access and so on.

it turns out that when determining information

Well as if at the level of any sane action
adequate
the man is just looking for a way out
from some more optimal system

here it turns out that the most optimal
is just that you can just go
to the future event
and having built the previous part

here pay attention to the distant parts of the Soul
where the light is already following the light of Consciousness
they are constantly building the structure of the future

so we moved on to that
what is the light of the Soul
which is behind the light of Consciousness

to the light of Consciousness, actually
to some sphere of Consciousness
the light of your own Soul also gets through
except that of course it hits the mark
structure of all external events

means the ability to identify this light
this is knowledge about one's own events

and if you start well for example, do macrodiagnostics
and you need to look
where in Infinity the situation is developing , for example
connected in general with any element of Reality

then it turns out that here
it is precisely the ability to often bring out the impulse
on yourself
in the gap there touching
to some distant system
where are you in your Perception , so to speak
where is your element of Consciousness
you consider that it is yours

reflected light comes to you
you start to see
how exactly is the Norm of your events
folds

there is a very important element in today's lecture
that when you as well there is a seminary administration
do management in this technology
then it is precisely what emerges that you can determine
Light Norma of its events

this is what light is like
from this point of view, this is the reflected beam
he shows exactly Norma
which, generally speaking, is of great importance
sometimes fundamentally important
when you constantly see the Norm of Events
why do you need any other spectral system
in principle it is not needed naturally

and this well, some kind of stripe is so peculiar
like some field so infinite yes

or the road first then the field
clearly defines what problems may arise
in general, in principle, often in the Infinite level
it means it is clear that it is necessary
still have to solve some problems
from the point of view of the Infinite level

for example, arise somewhere
they can be solved now
i.e. this system allows you to control
strategic future

because having reached the structure of the Norm
you practically free yourself from the need
means to perform some additional control
there is time to spend on analyzing the situation

because you came out to Norma and that's it and hold her

and depending on how long you hold it
in management
so many informative positions arise
or further Norm
or maybe some positions arise somewhere
which need to be adjusted

then we get a correction position
this is an elementary and precise action at once
you immediately understand where to go again in this Norma

to enter the impulse is already just a normal control
for example , from oneself and from the physical body
and so we get standardization

the question arises that in some cases
the situation means well how is it holding up like this
that it needs to continue to be rationed

then you need to understand the reasons right away, of course
why is she holding on, what is the root of the situation?

people are all free
so somewhere it is necessary by free will
give a safer picture, perhaps
maybe it's not dangerous at all
but a more harmonious picture of development

as soon as you see it
Well in each case on this field
a person solves primarily generally specific problems

and that's why they are so intersected here
Macrosalvation structures
and private tasks of the Soul

because it is precisely in this system of action
it turns out that the private tasks of the Soul
they are defined in this way
that they precisely encompass the universality of action
because your Soul really needs it

and when your Soul needs it radically in the root sense
so it turns out that this is
by a general faster action here

and considering that in ideology
Every Soul always needs
in the original correct understanding
this is Eternal life
including Eternal life of the physical body
then it turns out to be Eternal life for everyone
This is a fairly quickly achievable concept.
even in the social sense

the only question is that people just have to agree
what do they need this for?

as soon as they, for example, think that it is necessary
super fast action happens instantly
i.e. the souls of people unite
exactly at the right level
as if the location of this Reality of the Norm

and it turns out that any combination of events can happen here
this should already be the norm
with Eternal development

and therefore the Norm that we see now
for example at the current time
provided that there are restructuring different systems there
destructive there, etc.

The following point can be seen here
that this is precisely the light of a certain distant future
completely real
where this Eternal development has already been achieved

i.e. synchronization with the Soul now
The soul is actually
this state reflects that World _{yes}

where do we get this status from

this means that such a World exists physically
the external world is created in the image and likeness
in the likeness of human action

A person has an Eternal Soul
therefore it turns out
that the element of the World in the future will also be Eternal
just similar systems

so we take and recognize this similar system
and we actually get the information output to ourselves
in the form of specific elements
already real in the future of Eternal development

Well , what's the point in us dragging it out there?
and it takes a long time to recognize this system
we can just recognize it now
how does it work
what laws of connection with it exist _{yes}
in terms of just some information

but that's how it is what I said
this person must be convinced
that the system exists
at the level of a kind of logical phase of the development of the Soul

i.e. Soul
but logically thinking in fact with the Soul too
through the structure of well, just some kind of such
ordinary apparatus of general logic
well, that logic which all people actually use

and there is such an option here
people use this logic, well
there the logic of life the logic of birth yes
and in fact Infinite development

then it is quite easy to transfer such knowledge
and it turns out that this is the level of pre-action
i.e. what existed before the action
these are, as it were, some channels of knowledge transfer specifically
dynamic systems
which do not concern a specific action
and they go to the next address , yes

i.e. this is the external space
where well for example, there is no such specific information

in relation to your action
this is the transfer of information

i.e. before the action there always exists
action
between any two systems there

and then if we recognize them immediately
we take control of almost all space
where the action takes place
only through knowledge

i.e. how to open the system
external control space
in management

it is enough to know the external action
this is how the Soul is arranged
which acts on Infinite development
it means in a structural form or something

and any Soul acts on Infinite development
that's exactly part of it yes

if we begin to know
interaction of these elements
there is an infinite element of the finite
then it is clear that the conversion system
from Infinite Element
to any expressed element
well, that is, having a finite form
this is the physical body of a person

therefore the element of healing the body there or healing
just create it for him there
for example real systems of Eternal life
so this is the transformation of this light in this way
to understand as light from Infinity
passes through the human body
and comes to the end of the current object
to anyone

for example, when there is a person near
for example, there is some object there
who is not a human being
because the light from a person is from Infinity
to another person
there is a different transmission system
it is instantaneous, as if infinite

there is often not even a pulse system

i.e. falling from the Infinite environment onto a person
it's wednesday
but the control comes from the Soul
instantly transferred to another
if it's a person

i.e. information is transmitted to everyone at the level of the beginning of the
action

and if it is another object of information
then the light is already investigative
comes from a person

and if we take the investigative light
and we look at another person

beginning of action
then it is clear why, for example, God created some objects, yes
exactly like this physically manifested
as they are for example now and how they are developing

then you can follow
the state of any technical system
because it is a very rigid system of connections
it stands at a very, as it were, rigid level of primary action
and all the time it is directed towards the Norm towards the Macronorm

so if something goes wrong
then as a rule, especially if it is some kind of Macro event
then you can immediately determine
You just have to pay attention at all
to this area

and in this system of information is very
very powerful is that
that even so it can be said that it is important
that here we can identify , as it were, those peripheral systems
well, distant from a person, or something
which he, for example, does not do or has no time to do

i.e. he sees a certain influx of information
this is where we need help
he puts in some kind of system
into the system of collective Consciousness
personal management system

and receives impulse from there
that he, for example, somehow brought the management
without recognizing the signal , he moves on

i.e. internal assistance
which is not differentiated
this is how the Soul realizes information in many ways
exactly at the Infinite level
even at the level of well as if already somewhat closer to the body
from Infinity

example, if we consider
how does the approximation occur
there to the physical body

you can see it here
that there is, let's say, some kind of Infinite environment

it sort of "comes unstuck" well, in quotes, a certain area of light

it turns out that as soon as from the Infinite Environment
first piece from the wind
moved to the side there for example your Perception
then it turns out that it is a person right away
and then all the systems of Reality

i.e. the primary physical level
this is a man
if you watch this process carefully

and that means the interaction of the Infinite system
through well as if a person first of all happens
and with all other elements
the connection goes through the person
Why
because the person understands everything

here it is clearly visible that there is no person, for example
who doesn't understand something there

at that level he understands everything and acts
depending on the circumstances somehow
either expressing one opinion or another

but all people see the structure of Macrosalvation
they see that this light is coming
he is, in principle, the light that organizes life

it turns out that you begin to see
how can they help these people
which for example well, they are distant
or they don't know the control system there
for example , they don't practice there in the Salvation system, etc.

and it turns out that well , this very system
if we consider it as a system
well, there is some kind of remote action there
dissemination of information
in terms of action from you
then you can see what it means for example, if we take as the initial value
there is a field of information this is my Teaching yes

then it turns out that this area can be considered
as a structure of universal action

because these are the nodal ones
as if distant elements of light movement
and the transition of light into some physical objects
on the contrary, it is an area that is technologically embedded there
in the structure of the Teaching

but if we for example Well, let's see how we can find out
it is enough to take some facts there, objective data
someone learned and got concrete results
and consider this data
as a system of the next action

it turns out that there is an expansion into outer space
here are the structures of your Soul
then it happens anyway
no further than that place, let's say, in the physical realm
which you initially noticed

but this place exists often as if nearby
i.e. on the one hand it is Infinite
you just have to move a little bit away from the border

and on the other hand
this is actually a border area
i.e. you work all the time
at the level of finite and infinite quantities
in the structure, for example, it is the action of the light of the Soul

and that's when we start from here already
this illumination that comes from the Soul
there to place well in relation to people

i.e. already having seen it specifically
that somewhere a person needs to add this light yes
in his physical body
as if taken from the Infinitely Remote Region
this light

it is clear that this is a very strong system

as well as healing at the same time
there are improvements in events
in a person
and the transfer of knowledge to this person

i.e. the control action leads to that
that a person learns

Well as if deliberately without any long-term levels
there is mastering the material
simply because they took and passed on the knowledge
as if well, somewhat mechanically
the glow was taken and transferred

that's why it exists
another factor of control means the Soul
via highlights
that it is possible to take ordinary light levels
which are kind of neutral
and transfer to the structure that is defined
as a structure, well, actually , it's the same
which normalizes the situation
a specific person or a group of people, etc.

i.e. we are talking about the fact that we work with light
as if mechanically
but that's already the light of events then

and here is a very clear definition of this situation
that working with the light of events must take place
in the contour or in the area, so to speak, in the Perception of the Soul

and it is this difference that allows us to see
what if you made the lighting with Soul
i.e. with the light of the Soul they illuminated the event and illuminated it , so to
speak
positive development structure
then it is clear that it is God's action
this is an action from Infinity immediately firstly here

and then the events that are so covered
they begin to carry light actually well further
into further development structures
i.e. you start to see
this light is already spread by investigative systems
there, even with any objects, etc.

and as soon as you spread the light
from a very distant object
received from the action of your Soul
you start to bring it back to yourself

and see the Soul already
in an inseparable understanding of the connection
all of you have achieved the management of the inseparable absolutely

at any level of Reality

as soon as this action is recorded
although it would seem to be the same light
but he is already Infinite
he already has Infinite Detailed Action

then naturally any event is controllable
i.e. you can get the Health Standard there
and for any person here

and that is why this is precisely the achievement of this system
this is also a level of Perception
as a certain level of harmony

this is when the feeling
and harmony
and real harmony
this is how perception and action coincide
then you get, generally speaking, very precise control

i.e. not just control but precise control
and which often does not need to be observed

i.e. there is a primary signal
you got control go further

and the control is always precise
in the Infinite level of realization

This is where I end today's seminar.

Thank you very much for your attention
