

GRIGORY GRABOVOY
The Teaching about God
Implementation of the principle of self-government
21.10.2004

Hello again
the topic of my seminar today
this is my Teaching about God
Implementation of the principle of self-government

in this topic I am considering the management position
when a person has some kind of management tasks, for example
First of all, it considers
control as if from the outside
i.e. he looks at himself and sees some tasks
which exist before him for example Yes
here in the area of Macrosalvation first of all

and this management is such
what are you doing
Firstly, the status of the management of the Eternal
i.e. you should do it like this
so that future governance will be universal

and for this you begin to manage in this way
that when management is implemented as universal
then you get a reverse wave
already as a wave of self-government

those. self-government
this is a universal structure that originally comes from you

and therefore you are in Infinite development
you see ahead naturally
your own image yes
and with this image it turns out that you can work

i.e. you can do it like this
so that your governance is universal
because you make your future status
actually Eternal
i.e. you do it so that the future Eternal development
it was entirely up to you

i.e. at the moment you are just looking at everything
its position as the position of Eternity
but which is widespread
as in your inner world yes
and in some external level of control, for example
Well For example there in the external Reality

and it turns out that when you make management universal
then you come to yourself
but already on a more internal level

i.e. it turns out that Eternity is still an internal quantity
and you begin to see that the structure of Eternity
which, for example, relates to you personally
this is something that you personally have sort of worked out
i.e. that level of management
which is primarily aimed at
so that you can see yourself
but already as if at a very great distance yes
into Infinity

i.e. every local action of yours
this action is aimed specifically at Infinite development

and when you have this kind of echo of Infinity
you begin to see closer to yourself
it turns out that you see the general status as if
well, in your heartbeat for example Yes
in action Infinite development
when you see for example the structure of the future World
as Eternal Peace
i.e. it is important to see the structure of the World here
how exactly is Eternal Peace
which is generally in a state of rest

i.e. Eternal World future World he Peace calm World

that's why it turns out
what exactly is the structure of the Eternal Management
it is first and foremost creation
harmonious calm Eternal Peace
where tasks are solved practically according to your will, for example Yes

and based on this you can get
future management structure
as a structure for solving Eternal problems

where is self-government
first of all, the principle of Macro-management again
i.e. Macrosalvation including

and it turns out that the creation of, for example, any system
even the creation of any organ in humans, generally speaking
this is a problem that is actually being solved
well, at the level of very distant events

i.e. in this design you can see
that even an extremely distant event
for example an event that for example Well, it would seem that it doesn't affect
on the radical structure of the powerful Eternal World there
this event is such that you get the status
this is precisely the powerful management in this way
what do you see in every event
regulatory structure
the outside world
and inner peace

and it turns out that when you
for example, make the control Infinite
then it turns out that it is precisely the status of the outer World
where any signal has a meaning
this status comes to that
what can you do for example
any external impulse
in relation to himself as a manager

i.e. you need to select the control status like this
so that the external impulse is absolutely controlling yes
for example, there is a leaf of some tree
there you noticed him
and through the light impulse of this leaf
you got suppose
the status of the Eternal Administration yes
and in relation to oneself

i.e. in fact, one movement of the leaf makes you Eternal
there in Infinity

as soon as you see this status
which one well as if multiplied
for a large number of events
then it becomes clear
that any external level of control
i.e. yes any external quantity

this is the controlling quantity
in general, in the Infinite status again

i.e. the concept of a certain "finite"
or "of minor magnitude" is absent
in this management

as soon as you arrive
into such a management structure
you see that all your further tasks
in fact, you have decided
Well as if in the depths of the soul yes

The soul is the bearer of form
carrier of content in general
and level of development
your physical body into Infinity

then it turns out you get a closed system
i.e. considering the entire external system of the World
as a management structure
where you can influence external systems
i.e. it is possible to influence oneself yes
you thus come to the conclusion that
what well in general it arises
some kind of map of peculiar control

i.e. any external situation is like that
that you see it as a system
or dynamic
or for example static yes
but it is an open situation

i.e. you see that the structure of external management
let's say here is a map of the area
and you can always know what is in this area
You can plant a tree somewhere , dig a canal somewhere, etc.
supply water or, on the contrary, drain the area

you start to see the same thing
what is the controlled level
i.e. Eternity
perceived Eternity
this is some kind of platform
and any system that is on it
this is the level of Infinite control

i.e. the Eternal platform
therefore the control is infinite

i.e. if you plant it in the ground
to the Endless Land yes
which has the properties of Eternity
plant a seed
the grain grows Eternally
i.e. the tree becomes Eternal

in fact, you are building the structure of the World
where each structure has the property of Eternity
it is not necessarily Eternity in the literal sense

i.e. it's not a piece of bread, yes For example
such a figurative expression
which can be bitten off and counted
that means he ate a piece at least in the mouth area
at the first piece already Eternity

In fact
this point of view also exists
but she's further when you've already grown up
Well as if at a higher management level
when you've already grown up
those trees that are Eternal
then the next piece
yes he is Eternal in terms of contact

and here is the first level
This is the Spiritual level of control
therefore it is clear that events of the material world, for example , yes
next level events
this is the contact level

i.e. why does it exist at all
For example there is physical Reality in that form
that the Eternal structure of life is laid down
for example, in some current values

because contact with the next level
i.e. the built Spiritual system of Eternity is like this
that you are the next level well like material yes
through the Spiritual level you already make it like this
that he is starting to get closer

that's why God created physical Reality

because He needed to bring them closer to Himself
in general, His own Perception of Eternity

it turns out that physical Reality
this is an approximation
when we look at our hand
we are approaching the status of Eternal development

i.e. everything that we see on the physical level
this is the approach of distant Eternity as if
Well, it would seem to be the opposite action
distant Eternity
approaches with physical development
that's why the physical world is expanding

and why is it expanding?
because there, well, in Infinity
there is Eternal development
it does exist
as if the source of this physical world
is some kind of generator there

for people it's quite simple
there is , for example, a sexual pathway, meaning development, yes
it means biological level
but when we talk
about the level of development of matter
then there must be some similar values there

so, for example, to get a cure
from well in general, from any disease that prevents yes
development
or just get cured
it is possible to find counter quantities in Infinity

i.e. two optical quantities are found
which correspond
well, like this for example there is a man-woman yes
and there is a concentration on this value
but through the structure of the pre-built
namely Spiritual Eternity

i.e. you see the structure of Spiritual Eternity
as a structure, as if self-constructed
because the principle of self-government
it also consists of this
that you first manage yourself after all

and through self-management
you kind of do the following control yes

Well, self-management is also that
in general, besides the fact that it is an information value
it is also informative
i.e. here it turns out that "ts i" turns into "t i" yes
means that one level of the vowel sound is preserved
all the time "and"

i.e. if we want to build words
which possess the property of Eternity
we must be able to exclude sounds in the Infinite development
and build speech at the level of direct action yes

for example, a simplified description in speech
but she decides the same thing
i.e. some sounds can well as if to be absorbed by an echo
or just drop out
but nevertheless the speech must be understandable

why does echo exist yes
to understand the principle of Eternal development
where some sounds are incomprehensible

because this is also a reflection of the Eternal magnitude
but of the Infinite Plan
precisely in an informative sense

i.e. how to see an informative constant
Now
in what is information generally manifested

we can see it in the form of optics
but we can see it in the form of a clap of echo
where some sounds are incomprehensible

but we understand the essence of this echo
we know approximately the source yes
we can understand what is being discussed, etc.

if you replace the echo
well, with flags like in the navy, yes For example
it turns out that this flag exchange, so to speak
optical exchange of different movements
this is already a human action

here the person becomes on the level
who decides issues
related to dynamics with Perception
but as if by my own method yes

this is why God needed man
do it anyway for example, to make general management
in order to resolve issues on their merits
man was created to solve the problems of Eternal development

I actually gave such a very schematic line
there he showed beyond the horizon
as if a reflection of the Eternity of man
what is waving flags there to transmit a signal
Well now there is a radio there yes radio waves etc.
I mean what was before in the optical level

and when we consider
signal transmission in optics in general
as if, for example, there are some elevations
Previously, they transmitted light signals

but there was a parallel path
here were technologies of development of Thinking
thought transmission is comparable to signals
there to convey the idea
two signal sources were enough

i.e. one torch
second torch
focus on a specific distance
and the thought was always unambiguous

i.e. the signal transmission existed outside the torches
torch he worked
but there was a management system
a large number of people
through thought forms
i.e. transfer of knowledge at least
thoughts were transmitted
due to the simple precise reflection of the optical signal

in principle, the technology can generally be worked out
but now in the collective Consciousness there are telephones, etc.
now in the collective Consciousness
it's kind of hard to create this system
there is an evolution of civilization

if there was no cell phone before
I had to ^{come} up with control systems ^{there}
Well, let's assume with an army

and now there is a cell phone
or ^{there is} radio communication satellite communication
therefore, it is possible to create the same design
we have to make ^{a kind of} autonomous decision
we must sphere of collective Consciousness
bring into the structure of the past

and so God created evolution in this way
that He Himself considered his past development
i.e. He looked at the management structure
I saw my development ^{for example} in the past ^{yes}
did dynamics
and created man

i.e. He was Self-Created
at the level of a person ^{in general}, including
i.e. the reaction of all systems to a person
this is the level of self-construction

then a person must have
level of self-control
through any system of Reality
Well, this is a logical conclusion, even somewhat mathematized

i.e. if there are several areas
created or reproduced systems at least once
there are still points of contact ^{yes}

and therefore, based on this
can be seen in the essence of every thing
self-access

i.e. when you see a thing frankly
^{as if} inside its essence
you see your expression in this thing
and what do you see then?
How do you even carry it in this World?
i.e. your level of self-government management

i.e. you actually
in this case, the level of self-government indicates that
what you manage yourself you personally manage

because it is very important to track your signal

when the principle of self-government is applied
precisely to the implementation of the action
in general as a principle if you consider it
simply the principle of self-government
then this is a very important value

you can here simply by self-government
make the level like this

what can you regulate

for example sound forms yes

telepathic forms

you can adjust the level of Infinite Development there

as if twisting this or bending the structure of Eternity

receive an item

receive for example there is food there

obtain a level of natural nutritional development

or the level of the structure of the Eternity of civilization

but in dynamics

in any dynamics of Thinking

once you start to understand

how is the supporting structure of any object

this is your action

This is, by the way, extremely important

from the point of view of mastery

the structure of my Teaching

in general, as a rule, any technology

where you personally see your result

i.e. in fact it is a system

where do you differentiate self-government

i.e. you know where this system is located

what is this local government

it turns out you work very clearly yes

First of all, you have a set of experience

because you see what you personally did

secondly you can control

control signal

i.e. because you do it yourself

First of all, no one is forcing you

and the level of control i.e. the source

Well For example there is your physical body
, for example, light coming from the body
and it closes only on your body
All

you can adjust it to raise it there
to spin it any way you like

For example there in my practice I solved and still solve
tasks, for example , that are not related to the physics of the process
so I just take some system
and I look at it from all sides
i.e. outside of time

i.e. any physical process
You can watch as long as you like
there you can watch a microsecond for five minutes
it depends on me, I wanted to do it this way
I'm interested in detail and micro-substances
I take and place
into the space of its own time
or just put control on everything
so i need to achieve detail
I achieve that's all

and that's why it turns out here
self-government can cause
it is precisely the level of such a status of the reaction of the external world
that the outside world becomes more as if coordinated yes

for example how to solve a problem
many tasks for example there in physics even yes
I often decided this way
that I simply set a task
what can i get more quickly

i.e. I didn't set the task there to count something for a long time, etc.
I thought so
what do i need to speed up the process
get this value here
This suits me
and to get it
I developed the management around this

then as it turned out in the experiment
and so it was confirmed
i.e. but I did set up the controls

I just needed to solve a problem in three days, for example
because there is a plan and so on in normal working conditions

and if I counted
that there are some third model solutions
then I could maybe spend three months, yes
and I need to decide in three days
i.e. the solution is determined
amount of time, number of situations, etc.

and if you pay attention to the basic physical laws
then they are usually based on the author's worldview
who implemented these laws
well at some point

i.e. it is necessary to follow up
what time did he catch the first impulse
as he consolidated at the level of his own understanding
and why the law was implemented

and for example to increase the force of gravity on the Moon
it is enough to follow the history of the development of the first man
who needed it
For example there is a certain level of gravity there

and when we start to analyze
the structure of the World
where there is participation of a person
it turns out that this is the entry level into all things, yes
the structure of all Reality
Well, at one time they searched for a long time for a certain philosopher's stone,
etc.
but in principle there really is an entry point
in any control systems
To do this, you just need to realize the Action of God

i.e. what God wants from you at this moment
and do it accurately

then it turns out that you are doing
using all systems of Reality
i.e. you are actually in them
i.e. you basically don't even have anything to look for

and at the same time you can track
as if by reverse action
what do you want to get yes

i.e. you only need to get everything
inverse coordinate input system

i.e. if you need to understand something
localized area of control
then you start to do the opposite movement
and get a specific input

because the next situation
the whole world changed in a few seconds yes
or there are a few moments
The world changes even when there is no flow of time

that means and therefore it turns out
what are you next time
in a completely different system

but so that it would be like twice yes
from the same river to pass
from the same coordinate system
need to have exact coordinates
this is the coordinate of the human body

and therefore for the accuracy and dissemination of the World
to guarantee Eternal development
God created man for this too

human body coordinate system
this is a system through which you can
firstly, enter multiple times yes
Moreover, you own
you are in control all the time
you are not swimming in a river
and you are actually sailing in a kayak, so to speak
well on some ship
on some platform

and this platform is like this
why should you go into the river next time
when can you swim
Well, I use this image to show
that there are other options of Thinking

and through other options of Thinking
we can say yes we are not just entering the river there

We generally swim on it, for example Yes
we are unsinkable

this is exactly how management is structured
future distant events
we need an unsinkable platform

future events should not be transferred
beyond a certain limit
they should be here

i.e. if we start management
the return wave should be here
echo of the outside world yes

i.e. we can't
well, for example, having some kind of tool
one type of construction tool
to stretch out one's hand somewhere far away
or every time to hammer a nail you have to run very far
we need to build here

and it turns out that for this we must
be able to see
very distant events
here now in front of us

so the physical body has
with all the arsenal of control
ultra-distant events
and moreover, first of all, the physical body
designed for very long-range control

Here, pay attention to why
after all, many diseases
many some problematic situations
in a person
are overcome only
correct position
in Body Perception

that's if you perceive the body correctly
from the point of view of the Infinite magnitude of the Infinite light
but coming from the body itself
from Infinity
i.e. you actually see light
but you understand that this is your light

from your own body

then they are overcome
very difficult situations
very extreme situations
to overcome the extreme system in general
and in general any disease, even a simple one
sometimes it requires some extreme and extreme level

because how can a person understand
complex disease or not
when it is impossible to diagnose but he needs to be healthy

because if the diagnostics are control
it must rule out disease

and therefore, strictly speaking
the simplest level of control
just make this light universal
and understand that this light intersects
with the light of the future world

i.e. how to understand what this light is
exactly coming from your future yes let's put it this way
happy sustainable good future at least
then you need external light
had the same timbre, the same angle

because the future is infinite
you see
you can see the air
you see a future that is sustainable, yes

once you learn at that level
at the level of Perception through structure
there is Infinite development of Consciousness
perceive your light
and connect
with the outside world
everything is going well for you, sustainable development

here is that platform
through which you receive a reverse impulse
and you get completely controlled management
from the point of view of at least the technologies of Eternal Development

it's the word "at least" that I added

for Eternal Development technologies
it doesn't ^{really} play a role in minimizing here

because if you learned
manage infinitely
i.e. to live forever
then at least this or to a greater extent
it's the same thing ^{yes}
the concept begins to level out
i.e. sounds may disappear, meaning may remain

and when you start to enter the space
where there is no sound form ^{yes}
where there is no control over time, ^{for example}
then you get
exactly the True meaning of the word
and how do words grow in general
how does time grow in general ^{yes}
you begin to see

this is where time begins to grow as a structure
what you see is, ^{let's say, a piece of} at least that Eternal World
which exists in Infinite Distance
but it is reflected back to you like an echo
you can see the different structured actions

those. ^{well, for example yes} man-woman
in this case the type of development
two elements that develop
and see
how did the One God create the second element
at the level ^{of} the logic of the Soul
i.e. the mind of the Soul or the logical phase of the mind of the Soul

The soul can also ^{think} logically
i.e. how does the Soul think in its pure form?

although the Soul when He thinks
the body is constantly involved
but the body participates in the Infinite development

here is an important nuance
if you want to see your body healthy
in Infinite Development
Let your Soul think

and you will see how your body is transformed

how does the body gain knowledge in general

and from here you can see
that self-government is also governance
with one's own physical body

i.e. well, it's clear that you can make an impulse
to cure something ^{there}
or make control when to direct your body
Well as if into some future position
but that doesn't mean that you are there yourself, as it were
like, well, you kind of push yourself, or you force yourself
you do the same

this is the principle of absolute freedom laid down by God

when you do self-government
but you are creating self-government for yourself
It's not like someone is taking you by the hand and ^{saying}
"do this" ^{for example} Yes

it turns out that this is self-government
this is also a criterion, a fairly serious criterion
True freedom of the individual

and when you start to understand this
then your action no longer causes resistance in you
because the principle is still self-government
this is still a principle of managing oneself, among other things

when you start to manage yourself
as if by an external optical level
will still differentiate
even your own impulse

i.e. you are so designed that you are not always, ^{for example} there
Well, let's say you decide for yourself
some level of optical luminescence
even near some ^{for example}
shop ^{yes}

you need to buy something
you can make self-government
you can make it for yourself
that at this moment you come to this place
but you have a different idea
maybe you want to save someone

then it turns out that the Soul is leading you
towards Macrosalvation
but to
even local Salvation
to unite the principle of Macrosalvation
and local movement
here we need to do Macrosalvation at all levels
on all
and at the local government level too

i.e. before moving on to yourself
i.e. to exert optical pressure on oneself ^{yes}
you need to do Macrosave first
then you are at a general level
this is the common light ^{and} the light of universality
this is also your light
and then you don't feel it at all
impulse of this optical
in relation to myself too

i.e. everything happens naturally
because it comes from God

i.e. that's when you learn
do as God does
let it be according to your local tasks
it is not necessary that there is a universal option ^{there right away}

well at least universality in Macrosalvation
and then you can already see ^{the light of universality}

i.e. the light of universality
where all people live forever rule
well let's say they are engaged
exactly the usual, ^{ordinary}, Eternal development
I mean this light

i.e. there is the light of Macrosalvation
this is ^{basically} where it needs to be done
next light where already done

here's how to understand it
there, many designs have been modified
For example ^{there} the echo has a different criterion
some sounds are modified
word interaction systems

they may also differ somewhat yes

and it turns out that there is a criterion here after all
to recognize it you need to understand it
what's going on there yeah

Well For example a lot of time passes there
a person at the same level appears in the same area
but something has changed there
other buildings appeared there yes
if people talk about something but don't talk about this building
then he can only understand
that it's about something else correctly

but to understand that we are talking about a building
after all, a person can't always say
there were trees there but not to mention buildings

but to understand what is really happening
a person must see this building
he must understand what is there

and here to see
see structure
he must become self-aware somehow
i.e. he should , as it were, mentally put himself in this position
to that level
and perceive all the information of that local segment

i.e. it should be
as if a construction of the same optical level and spiritual
then he understands what the other person is talking about
but again he doesn't need to know
that they put up a new building
he can just understand it yes

i.e. a person can understand a person
because he understands it spiritually

so it's enough just to go out
on oneself in future development
and you already understand

the only question is how you will go through this path yes
how will you find yourself there

because a person has

different system of thinking
he can think, well, did he do the right thing?
at every step he can think about this
is he even taking the next step correctly?

so that you know in advance what is right
need future level means
as if external sound forms and external Reality
move here
i.e. in the future the same sky yes
in the future the same Earth
Well, maybe there are more there, etc.

but there are criteria that are the same
there are criteria, you can finally look there
on your finger and it's the same
or on yourself as a whole yes

this is the easiest way to realize yourself
then you will get a very accurate signal
i.e. to realize oneself as if at any level
equally

and this is where the principle of self-government arises
how to manage yourself
so the control is from you
where you move linearly and get
the structure of Eternal development
because you are constantly self-aware
This is exactly how you correctly realize yourself

this is the level
harmonious internal structure of development
you start to see
that's your inner world
This is also the external world

i.e. you understand that you regulate the external world yes
by the fact that you comprehend it on an internal level
as if at the same time my inner world
not even that you comprehend
like your inner world
he accepts what lies ahead harmoniously

i.e. you still have to be able to accept
maybe you won't like everything in some aspects
then it turns out you should be able to accept

again the system of differentiation
to accept something you need to
First of all, know exactly what you're talking about

so, to know exactly what we are talking about
you need to do it this way
so that you control those impulses
that are coming to you
due to its presence, as it were

i.e. a person actually and really
this is your presence
a person always knows very precisely
when he well as if he were feeling with his fingers, yes
i.e. he sees the whole process, he is present there

here is the structure of presence
this is also to identify it
We also need a level of self-government, and this one
which allows you to see
here is the current optical signal
as a level that you are simultaneously accompanying
but at the same time you are here
i.e. you do not change your position
but you are present there at all levels

and God is also structured to a certain extent
It is located in one place.
but He is always present there
where He actually has Reality yes

this is a very fine line
speaking about the possibility and the real presence of God
in any system of Reality
but He doesn't have to be there for that
in the form of a Physical Body
after all, He can be in one place
in the form of a Physical Body
and then he just understands what's happening
and this is His presence
i.e. understanding

right here by the way now do all the controls
this type
find your presence
at any point in Reality

exactly find it like let 's say you look at yourself there Yes
at some point

By the way, this is a very powerful restorative level of control
because you just have to find yourself correctly
you are healthy and that's it
By the way, this is the instant recovery system
here you can restore organs, grow them there and so on.
who needs it

it is possible to do so in order to avoid any problems
in general with organs, i.e. to make organs Eternal
one organ is enough, for example, a finger , a little finger
make one Eternal
and it glows constantly
and then, like a crystal, a person begins to grow
with this Eternal Glow system

i.e. that is why this technology allows
especially if these glows are not interrupted
allows the body structure to be backed up very seriously
to the level of Eternal development

i.e. after all, Eternal development Eternal all technologies
this is specifically technology after all
you need to be able to do this so that you gain control
specified by results

i.e. just consider that Eternal control
it's good to be healthy all the time, for example
This is also good of course
so this is what is required at least yes
the manager still needs to at least periodically
take care of your health

but it means here like any rescuer
Often a person does not pay attention to himself for some time
but nevertheless, such a task always exists

just imagine in Eternal development
there are still a lot of situations
a person still has to at least cope with that
that he owes health
Well at least keep it under control yes
at the level of self-government again
i.e. in fact, he should be practically healthy

and when you start doing management from this position
then it turns out that Eternal development
it is still a specific technology

and you are at any level of Eternal development
must understand this technology
study it, so to speak

and additional methods

but it is quite necessary to have in general
such an impression and such knowledge
that one mastered method is enough

this should guarantee you

Well, at least for ten years , and at least ahead

and in general, on the Infinite development in essence
Eternal development

i.e. methodology

they must exist, by the way they exist

that's the principle of self-government

for the implementation of, for example, Eternal Development

there are technologies that allow

really get

Eternal development

because one method is very well mastered

and here the problem arises

self-differentiation of this method

i.e. the self-government method begins to develop

self-government of the external environment arises

which works in principle often according to the same Laws

and this environment must be balanced

with you

i.e. a segment of external Reality

which is called the method in the form of optics

still needs to sync with you

i.e. in fact, he himself must leave

Well like from a level or something

external signal

i.e. he must get out or he is sort of eliminated

from the structure of background signals

the level of static begins to appear

Well For example there is a spherical type

or just information

and this level must still be related to you

how is the level of his will
i.e. the segment is still ^{given} by its own will
must interact with you

i.e. it turns out that not only did you create it
he is still completely free
and he must still interact with you of his own free will
Well, God created people like that too
this is the principle of creation of people
into any control system

and it turns out that this segment should
that's how to define it
self-government structure
as the structure of his presence ^{yes}
storage medium system

so for this person
well, for example , who is involved in this design
management of this segment
this is first of all that he must give knowledge
to this level of information
that this segment perceives it
as the structure of Eternity

i.e. he should have already laid it down
another management segment
that he is the Eternal ^{and} man himself
then only then will the segment recognize the person
who created it

and that means in this case too the natural process is already underway
level of human development in the future
i.e. this information helps a person
in its future development

i.e. it turns out to introduce the structure of Eternity
a person should not just be there for himself
and he must be truly Eternal
so that this segment can actually recognize it

so it turns out that
Firstly, it is a powerful system of knowledge transfer.
about Eternal development
and in general, basically, ^{let's say} secondly, thirdly, etc.
this is a system of self-knowledge where you can receive
precise knowledge

only because the element of Eternity
you defined in optics

i.e. you made it so fast
that you put it
and he has already perceived you

for example, in diagnostics
there are only one airline's planes there
For example there are about seventy planes there
I had some jobs at one time
that means seventy planes at once
It is necessary to provide all the information on prognosis

it was enough for me to record one impulse
which had these properties
I know about all the planes right away
i.e. an airplane that is , well, unfavorable , let's say
from a forecasting point of view
it's just visualized specifically

i.e. the system of optical construction of the World
if you work with optical development technology
very fast and correct
is such that we get a physical image
well, that is, we get
that Reality which is located means
as if in the outside world

but for God this action is the same as creating
for example some kind of Reality yes
The plane was created by people
but for God this action is more external

Here is a similar action in humans
it's still worth trying to understand
how does it happen means creation yes
of such a design as an airplane
or any other design
and see the structure of action in the direction of God's task
namely Eternal development

i.e. like every person
puts the structure of Eternal development
for example, in your Infinite development and in the development of other people

then it turns out that we see

the structure of, so to speak, future development
to the whole civilization yes
of all mankind
in general the whole World of all worlds
so that the outside world
he's absolutely ok as if democratic
he is absolutely creative, etc.

that's why there is such an infinite space
but there are aggressors
because there is practically nothing from the outside space
and because there is a very simple Law here
that the outer distant world
he is more creative , so to speak, more loyal, yes
to the tasks of people there for their development

and it turns out
that this distant Infinite space
if we don't set a task, for example
want to get in touch
or we think for a number of reasons
that we can bring some problems
because there are some aggressive systems, etc.

then this is the creative level on the planet
will of course lead to an expansion of Spiritual contact
with the external level of Reality

I'm not specifically saying that it should be
just for example there are aliens or some systems there
Well let's say, artificially reproduced
or there in natural biological life

I mean the whole world should be controlled

for example, if we consider the implementation structure
Well let's say in Infinity
any person yes

then this structure is like this
like for example level well let's say manifestations in Eternal development
individual personality
it is such that it is still necessary to manage the whole Reality

Well, let's say a simple example when Jesus was resurrected
he showed that since there is no death
means he has other tasks

the tasks of managing any system of Reality

then it turns out that he has already overcome the structure of dying themes
that in the future he is still alive
i.e. as if the structure of death is absent
even in his biography
and although this would seem to be a fact of collective Consciousness

but here it turns out that he does the management
according to the World Order
are completely different tasks there
other management plans
nevertheless, he still teaches
Well there are many people through prayers through the church
they learn the system as if it were an initial plan , so to speak, yes
in fact, the internal Spiritual plan of control

This does not only apply to Jesus Christ
and in general to any progressive individuals
even to organizations and movements there
where is the internal management structure
for example, this is a level well as if of an internal essence
where there is already influence on the world order
well , for example, Jesus as the son of God and God He personally proved yes

and everyone's task is now
He showed that there is no dying
it means it's already working, it means people have had it for a long time
just being in physical life and Eternal

and so, in principle, if we develop the process logically
it turns out that logical knowledge
precisely according to Eternal development
this is a level that could lead to, for example,
well, even at an earlier time
that many processes could have developed differently yes
now it's a necessity

i.e. if it is shown that a person must live forever
and these technologies have been worked out, which was initially shown
but here we need precisely the concentration of collective Consciousness
great concentration to make it happen

so in my technology it is precisely self-management
even if a person masters one
anyway the world should not be destroyed

and it turns out that here everyone is responsible
is already rising to the level of its implementation
this person
precisely on a universal scale

i.e. from a person who understood the structure
there the previous practice and development of information civilization
he understands what he can bring to the outside world
a lot personally from myself
but then he must also live forever

i.e. he is like a technologist
it can influence external Reality
he can show Eternal development
but then it turns out that his task is a natural task
live forever

this is where the interest comes from
natural interest in Eternal development

this is very important in the self-government system
highlight the structure of personal decision
but that means which well no matter how it was created
artificially so to speak Yes

you can propagate for a long time that yes
Eternal development is needed
you can make long posters
but from the fact that these posters will work
Well, maybe some people will react there.
and they will follow these posters
but he must choose as Reality is built

here is a man walking or, let 's say, fishing
Well, he didn't even catch it, but he sees this river and this canal.
but he understands that this is it
that he came here and this is happening
and then there are some other tasks
in general, any moment of personality is still determined
natural level
as if the development of Reality
or the revelation of Reality
he must clearly understand that no one forced him
this person

and when he realizes it
he sees absolutely clearly that he is healthy

he immediately perceives that he is happy ^{there yes}
he lives forever
he understands it
at some specific moments it is absolutely clear

and here the Soul opens up
the future development of this person is predetermined by
that it will still evolve forever
Well that's not it
no, not some kind of ^{there} For example there is fatal Eternal development ^{yes}
although the word seems inappropriate
but nevertheless, if someone forces him
then it turns out that he is ^{well} as if he were carrying a load on his shoulders

so that's why and at that time
and the resurrection of Jesus took place
He showed that it doesn't matter anyway
First of all, Eternal life ^{does} exist.
and the body overcomes physical death
i.e. there is no point in talking about it

i.e. Jesus, ^{as it were,} from the very beginning, practically
preserved Eternal Life
with this next one ^{and} with his resurrection
and showed that there is no need to die

it turns out that when we see this structure
^{well} from the point of view of the fact of knowledge ^{given by God}
we see that, ^{well,} take ^{for example} fundamental manuscripts
some religious confessions are completely different, ^{there is} the Koran, etc.
we see that there are very clear lines there
technologically expressing Eternal development
personality of a particular individual

and when we start reading further
any texts by the way
we can also find there how to develop forever

then we can look at any object
and see the structure of Eternal development

for this you just need to have a reverse action
because first of all it's about self-government
we identify the platform that carries ^{it}
this item is all over the world
and there we recognize
our own Spiritual essence

where we develop creatively ^{yes}

your creative development
it is always interesting to a person

i.e. a person can live forever
if he learns
it's right to sharpen ^{there}
some wooden objects
there is interest in everything
this is enough for Eternal development
i.e. the main thing is to find at least one interest
but a person can have a million interests ^{there}

i.e. the structure of Eternal development is obtained
embedded in the diversity of the external world

and why else is a diverse World needed?
so that Eternal development is a mandatory fundamental

God made the development of Reality diverse
completely new systems will develop
increase many times over

then potentiality
exactly, ^{well}, an ever-evolving quantity ^{, so to speak}
will increase

if someone doesn't like being a carpenter
please he can be a programmer ^{there}
or a radio electronics engineer
it doesn't matter

the main thing is that he has interest
and the structure of its development
^{Well} , I just gave an example, it could be any list, ^{yes}
An infinite number of specialties of desires, etc.
creative desires are meant

and when you start already
make management in Infinity
then you see that you are already harmonious from the start
that's how you understand this structure
All
your control is included
precisely in the static phase of self-government
not only that you control yourself ^{yes}

and at the same time from myself
but also because through self-government
self-government
you pass on knowledge to other people

i.e. when you find this value
All
you are already living happily
then it is clear why you need to live infinitely
many people An infinite number of people
you must constantly pass on that knowledge
which you have ^{yes}
it turns out that you are responsible
in social terms in front of people

and when you, ^{for example,} come to this management
then it is clear that society should
well interacting ^{yes} then with you
or the action of interaction between members of society
should also study the general system of self-government

this is what self-government of society is
Well, at one time there were self-government cells ^{there,} etc.
now we are talking about the fact that True self-government
this is the movement of society
precisely to the Eternal development
but such movement when you see
future development independently and clearly

i.e. in the future
you see every member of society happy
and if somewhere ^{there he has} for example it doesn't work
then we need to help him

i.e. collective action
to freedom feeling ^{there}
development of another person
and at the same time developing a personal path

i.e. external Reality in this case
a big fundamental difference
other people are involved there, they are absolutely free, ^{yes}

and although in any information system everyone is free
but people are created in the Image and Likeness of God
they have completely open individual levels
absolutely unique

i.e. to live with another person altogether
It is possible Infinitely and interestingly
if there is at least one more person

why did God create man in the Image and Likeness
because then it's clear he can live
he has a reason to live forever

and it turns out that
and since he lives forever anyway
God
then it turns out that the meaning itself is a person, yes
for God the meaning is man

and when you start to think for example
how is the man there
Well, there is Reality, yes.
are there any other systems of Reality
animals there are spaces worlds

but God is also a man
then we begin to understand
that God is also a man

and from here we see the management structure
and then what are the problems if we understand this, yes
that God is also a man
then what's the difference
what does God teach there
that another person who learned from God
or just got the result yes

but better
Well, really, he should get results then
received again from God
teaching from God

and that means he can transmit
but it can also teach you to develop infinitely

i.e. here in the structure of Eternal development
where is it shown why God is also a man
It is quite clear that knowledge of Eternal development
this is actually the most basic knowledge in essence

i.e. anyone can use them

all the more so to master it there

they may not need to be studied for very long
they can be studied ^{there} in a short time
at least that which will ensure Eternal development
and then go into detail and develop yourself ^{there}, etc.

those. at the moment of birth
a person already has all the knowledge on Eternal development
i.e. how can it be just a single impulse
transmitted from person to person

but here there is such a structure
that in their time there was and is their action of these saints
they essentially never went anywhere
their action exists all the time
enlightened individuals

this is how individuals are taught to act
because it shows ^{how} God works
and ^{well} this is a peculiar level
where can i watch
the path of some enlightened personality
which is here before God
^{for example}, this person did a lot
and it doesn't even have to be a very famous person ^{there}
and ^{in general} it is not necessarily only the saints

and maybe the person is very bright inside, ^{yes}
you can see contact with God from a distance
and the correct development is into Eternity, ^{yes} , into Infinity

By the way, there are more and more such individuals now
it could be a completely ^{ordinary} person
^{'s a driver} ^{there} For example ^{there is a shepherd} ^{there}
It doesn't even matter what his position ^{is there}
but the light of Eternal development already shines in it

and when you start seeing such a person
^{Well at least one} ^{yes}
or did you make the control at all
and they got that the person lives forever
All
you yourself just
self-government giving knowledge to another

then this light passes on to you

you are also Everliving
All

i.e. as if closing the picture
so that I ^{can} show it from a human level
that man lives forever
God must pass absolutely clearly
this is the human path

show what is there
Well like these very simple mechanisms
in human development are completely simple
which allow Him to do just that
by understanding self-differentiation
well, to a greater extent, again, in many ways, ^{yes} , self-government
control other systems through
from myself , etc.

and allows a person to gradually
even if or sometimes instantly
if he needs it ^{there} for Eternal development
or to solve some situations

to know
that the transfer of knowledge
from one person to another
this is the most intense the closest the most real
and most importantly reliable
this works 100% of the time
precisely as a structure for the transmission of knowledge of a mandatory
nature

i.e. it is enough for one person
just wondering
^{it means} that he wants others to live forever
all this is being implemented

he doesn't even need to do this
Well how to fully own ^{there} some cargo of large ^{and} systems
he just needs to perceive the other correctly
and convey this desire to him

i.e. he can make another one Everliving
I myself am by the way in this impulse
he is already becoming the Everliving

enough thought to connect ^{yes}

with its own level of next management

therefore self-government also implies
very precise attitude to their tasks
exact ratio is exact transmission

but sometimes it may be to teach ^{there}
^{there is} a lot needed ^{there} ^{there are} several thousand hours of study ^{there} ^{yes}
yes, maybe that's how it's done in the world
and if so, that's how it should be done ^{and} taught

but this means that even one hour
can be educational
i.e. I think that there is one level of management
including even one lecture can
^{Well}, here is my lecture that I give on management, even an ordinary one
it may still lead to that
that man will understand the technologies of Eternal development

and here in today's management
try to do it this way
that if necessary, yes, you can study ^{there} for example, for years
No problem

but connect the control level
powerful big
with one-time
and get the same effect
that is, but nevertheless, always keep in mind
that more knowledge is of course better

i.e. this inner line of Spiritual behavior ^{yes}
hold on
i.e. make control from all sides
right now with my personal tasks

and direct them to Eternal creative development
i.e. tasks that are developed in the Eternal level
they are necessarily resolved creatively

there is also a level of self-government
^{as if} by itself ^{yes}
Push
and the level when you see clearly
that the solution to the problem is your harmony

why do you need them

Well, it's clear that there are some that need to be addressed, yes.
healing there, etc.

but that's exactly what your harmony is
in general terms, I guess

that Macrosalvation is your harmony
Eternal life is your personal harmony
no one invented it
it's just you personally
Everliving

This concludes today's seminar.

Thank you very much for your attention

work more with self-management systems
immediately after the seminar
straightaway
