

GRIGORY GRABOVOY
The Teaching about God
Light Control
06.10.2004

Hello again
the topic of my seminar today
this is my Teaching about God
Light control

in this control option
position under consideration
First of all, light control as such
i.e. the use of personal management abilities
technological levels
in order to configure the light

and control by light

as a rule when it means intensity of control
as the intensity of light increases
then these two levels coincide in principle

i.e. control of both light and through light
because the configuration immediately calls the control

therefore, in this technology it is necessary to identify
light source
i.e. first you need to determine
what is light in principle in itself

and when you start in your Perception
reveal the structure of light
then you see that
first of all you look right away
on the element of your Perception
because this is also perceived as light

when you start to consider
movement as if further and closer to oneself
then you see that this is the development of light
but already the Light of God

i.e. the body is the development of the Light of God

and when you see the source of this Light
as an Infinite quantity

then you see that God is nearby

i.e. the body
and for example body interaction
with some element of Reality
this is that level
which allows you to see
what is happening in this Reality

i.e. when the body emits light
and at the same time catching light
as if he sees future events
then you can see the body of the event
i.e. you can see
how God builds events with you
and builds with the help of Light

i.e. you can see
that's exactly how the function of Light is
widespread
and on God and on man

and when you see all these components here , as it were
at the same time yes
then you start to see
what is Light in itself
i.e. you start to see
the structure of light, for example, your Soul

i.e. where does control come from?
how does the light of your Soul spread
how the light of your Soul intersects
with the light of your Spirit
and how does the management take place

when I talk about these issues
as if I were saying "how" yes
then in fact management is already taking place
It's enough for me to say this
i.e. to see and show the inner light where it is
management is taking place

and at the same time the management is always harmonious
because the light is very like that

in general a controlled system
controlled system

when you can see quite well
that it is enough to see the form or impulse of light
and you get precise control

i.e. in principle, light itself is already control

and if you need to do management for example
with some let's assume Well, let's say it's a difficult to control quantity Yes
or you need to achieve a mandatory control effect
and this effect is important specifically for you
from the point of view of your Infinite development
then it turns out you can see the following levels
this is an approximation to the structure of light yes
exactly the light that needs to be controlled

then visualization
at the level of the Soul, for example
i.e. it is one thing to perceive with Consciousness
another thing is to perceive with the Soul

and here you can see the difference
i.e. when you start to manage
through Soul Perception
then it is clear that your light will sooner or later
it starts as if an external control impulse
bring out the most harmonious point
how is it for you
and for everyone around

i.e. enough light of your Soul
direct to level well as if an object of control
and you get Norma

for this you must open your Soul
i.e. you should see
how the light of your Soul
passes for example there through the body so to speak Yes

The soul is in the moment
in your physical body
you start doing management

but it is a physical body
also, in general, at the micromolecular level
these are wave elements, like light vibrations

and it turns out that
at least these are wave oscillations
but this is also light

it turns out that for that
so that the light of the Soul passes through the body as if yes
when, let's say, the Soul is inside the body
you need to highlight where the Soul is then
light optics of the Soul

and how does the radiation of the light of the Soul
begins to form, for example, an impulse or a form of light

i.e. it is often enough
the event light is easy to do this way

there is an event
it is enough , for example, to catch some photon of light
and see as if a trace of the movement of this photon
there may be several many photons there
and bend this photon

and this is the reflected glow that results
even it is not directly reflected
and just when you start to bend the pulse of light
then the beam goes into Infinity
here he comes at the right event
like Norma
normalizing beam from there

here goes the one going into Infinity
this is the level of action that goes to God

By the way, this is how many diseases are treated
well almost everything
first of all, here are the longest ones along the current
when can you bend
at the level of development of the so-called event structure of the disease
elements of light
and leave them in the place where they are bent
then there is a cure for chronic diseases
or from some complex problems that exist yes

i.e. you basically don't touch anything
just take it and adjust it
event reflection impulse
in your Perception

so that's when the light comes to you
for example, highlights the level
which corresponds to your Soul
then you see clearly
where is the body and where is the soul

this is where the Soul is from an optics point of view

and when you start to see
your body with physical sight
it turns out that there is a level in physical vision
clearly dividing
Soul level and physical body level

i.e. before you look at the physical body
with my own physical eyes
first you see your Soul and completely

and at every level of physical vision
the control system is actually concentrated
which interacts
with the level of the Soul

i.e. in fact
everything you perceive in this Reality
this is that level
which interacts
with the level of the Soul
Well, logically it's clear that it is

that's why it turns out
what do you when you start to perceive
for example, the future level of your development
naturally you can perceive accurately
what to do in the future
i.e. to approach as accurately as possible
to the configuration of the future world
because here you can see everything down to the details
what can for example yes to happen
what is the best way to get out of this situation?

and in principle it exists here
such an aspect of management
that you can see events in complete detail
another question is how to get out of this situation yes

because many events are already logically clear
not necessarily predictive
as if the functions of Consciousness yes
or there are Souls
bring into control

and here it turns out
what exactly is the core level of Light
i.e. the Light of Eternal life , so to speak, is immediately visible here
in the form of a kind of rod coming from the body
so this is a window that actually opens the Soul
towards the outside world

those. Soul light optics
is based
for your Perception
at the level of this very rod
going to the outside world

then there is no break with the physical body
i.e. it is not a separate system
and you just look at it differently

there is a nuance here
Of course, you can say that this is a certain point of view, yes
and I need you to see it for real
as a tool technology
i.e. how one should look so that the light of the Soul is revealed

and when you start doing this viewing
then it turns out that it is precisely Infinite Development
does not allow this light to be discrete

i.e. as soon as you look
on the Infinite development of you personally
then you can clearly highlight
the light of one's own Soul

it works out for yourself
you can fully perceive
your own Soul
only with the task of Infinite development

logical status sounds like an axiom
and logically it is understandable

but then it turns out that you can see
a full-fledged physical body of its own yes
or other people
and this is a very powerful level of control
for treatment including
by the level of solving situations

i.e. when you put it on the rod
event where there is a Soul Infinitely developing
where there is a body that has infinite development
and the body's tasks are the same

here, pay attention, the body has
in the structure of cells for example Yes
Infinite Development Function
but the body's tasks are the same
where tasks exist virtually on their own
and yet with all this there still exists
level of seemingly introduced tasks

i.e. one thing is, for example, a method to highlight
the light of Infinity in cells
and live forever

and can you do it like this
well, from the point of view of one's own initiative
set yourself such a logical goal
well, seeing that this is being implemented, for example, health improvement, etc.
yes
event management

and then we get external light
i.e. as if the Light coming from God as well
knowledge that is given by God

when you start putting it together
then it turns out
that the physical body is a unification
Light of the Acting
those. actions through the body yes
through Light through the body
and the Light created
those. There's almost body movement there
some transcription of Consciousness yes

some kind of even physical movement
produces some things some impulses
and generally controls Reality

i.e. it turns out that the World is completely controllable
you need to feel and see the body as the Eternal Light
as the structure of the Eternal radiation
that's exactly how it is Endless events

i.e. formally in Perception it looks like this
that the line of all events comes practically from you
and events begin to unfold ^{there}
^{there let's assume} decade by decade
as some ribbons flow towards God

God actually takes these events ^{for} Himself
i.e. those that you created

and it turns out that He is the one who gives them to you
i.e. you create events for yourself

Well, in this structure, ^{well as if} a photonic flow of light
it is clear that every event
this is your participation in one way or another
once upon a time or a long time ago ^{yes}
or it could be very quickly literally recently
you made a certain decision somewhere

and you can reach the structure of your own solutions
i.e. when they were accepted
at what time for what reason

and here you can do the management already on the merits
according ^{to} the light optics of Infinite development

i.e. it is enough to see here
that you harmonize with the Light of Eternity
i.e. you are ^{there yes}
then external event management
is ^{, in general,} a purely mechanical procedure
i.e. you apply the impulse of volitional control
also in the form of something like ^{that as if of} invisible Light
but you understand that you work here

you are suitable
^{as if} to the convex part of the Light of an external event

and you just start with, well , let's say, some figure
or like with plasticine
figuratively speaking, well, really tough, yes
which peels off ^{there} in hard pieces
start working here

i.e. Light is not plasticine
in any case, these are rigid systems
i.e. it cannot be molded, ^{for example}
what if you start to mold it
you get yourself your own fabric

as soon as the Light becomes soft
this is you
Well, it 's precisely in management

and it turns out that it is logically very simple to make the control
external events rigid structure
soft systems , ^{so to speak}, more like plastic ones
it's you yourself

and so you gradually highlight
structure of yourself
in the physical control option

the structure of one's own Soul

and when you start to see
that the Soul ^{seems to exist} and it turns out by itself
i.e. you come out purely on the optics of the Soul
then you start to see
where the Soul organizes in the form of a pulse of light
physical body

by analogy you can
organize all external Reality

to make event series management
which is projected, ^{let's say}, somewhere in front of you
and there may be some completely banal things
^{there is} something to buy in the store urgently ^{yes} what do you need
maybe it's not difficult, ^{but} you just need to spend an extra five minutes ^{there}
but you need it now ^{yes}

then you do the management
and watch the projection
Soul-body

this is where the Soul organizes the body
do something similar
just a symmetrical similar impulse
as if from the Fabric-Body frame yes
but in reality it looks like the impulse is coming from you
therefore, it is like a different point of view

and with just one impulse you decide the control
how to stand in this world
the system you need
and that's all
and just approach her on a physical level
you can even watch how to walk

and so you can treat there yes
to make completely background control systems

i.e. that's when we're talking
about control through the properties of light
or you can even use colors
i.e. the use of color optics in control
then it turns out
as if color optical power

here you can see what happens
we can actually have process control
at the level of background values

why is this happening
because the Macro Salvation system
i.e. Salvation of all
in this case it is also light
and the optics can be adjusted
i.e. it is possible to have the level of Macrosalvation
make the intensity equal to the level for example there
well, the ripening of some fruit on a tree

and when you start to see
that there is a comparison of these values, as it were
what you get is what you see
it's the background level here
and at the same time this background level
it turns out that he starts to develop himself

i.e. objects become convex

and when you for example start to see

that these are well as if manifested objects yes
how the physical world grows
everything you perceive
as if it floats onto your Perception
then you see the nature of the growth of this World

why are these objects like this
why is a person supposed to be in this place yes
he has a specific well For example there is a form
he is manifested in the form of this man
located in this place

i.e. the Laws of Connections are visible
and completely individual Laws
i.e. you can actually see
How does such a level of management arise in you?
what do you see
that the World seems to be growing

that's why, for example, if we look at photosynthesis
it is clear that there is a plant growing there
due to the energy of light there yes For example

then it turns out that here
this is exactly the growth movement towards the light
for the same principle in general
you can take this rule
when you can do the management quite like that
that let the world just grow
in your direction

then your movement in this World is obtained
it is quite simple and not burdensome
i.e. you can do it in principle, so to speak
a powerful control system powerful enough
comparable to long-term management
but you just have to do it right
in the right place as if well yes, step on it
i.e. make the right move

and when you start walking in this World
which actually grew up in front of you
i.e. you thereby grew it in your Consciousness
and your Consciousness has defined this World exactly like this

then it turns out that there is no division between
Light of the World and Light of your Consciousness

The world is your Consciousness, and that includes

and the transition from the level of Consciousness
to the level of action for example yes
this is still a transition that is clearly manifested
as the transition goes
at the interaction level
man and God

i.e. where a person understands God well
the transition is very simple
The world is well manageable
The world is becoming quite active
greeting a person

if a person, for example, is at a transition point, let's say so
he's trying to do things his own way there
and doesn't listen very much yes
to the Action of God
to the Light emitted
that's exactly how it would be to this level of Light
which is emitted by God

and if you look at the Light that is emitted by God
then when a person, for example, does not differentiate this Light, yes
and does not look closely at this Light
then it turns out that he does have it after all
The action of the Light of God but deep in the Soul
Here

i.e. a projective similar system
it starts to work in the other direction
inside a person

i.e. in his Soul he still has this knowledge

and it turns out that then
The soul begins to well as if to shrink
and the outside world too
the number of events begins to decrease

and if a person wants something
then he may not get it
because he doesn't see
as if external to the Light of God
or doesn't want to see Him
for him, for example they don't like this philosophy there

and then it turns out that when you set a task
teach another there, for example, whether he likes it or not
but we still need to save everyone
it turns out that maybe those who don't like it
that for example a large amount of work

but if you work with the right technique
then it is not necessary to work as if hard
or it's been going on for a very long time, etc.
it's enough to simply understand, i.e. correctly, yes

this is the concept of "literacy"
the word "literacy" has a double meaning yes
"literacy" is something that is given in the form of a certificate, for example to you

but there is "literate" there

and it turns out that there is a small transition at the end of the word yes
it gives different meaning
there is "literate" or "literate" yes
from the word "gram" weight function

and it turns out that in this case
this is the Spiritual level there is "literacy" yes
as if Spiritual encouragement some piece of paper

and what if "literately" is a function of knowledge, yes
but the root word is still "gram"

i.e. as soon as we start
light optics study these connections
then we get that the usual weight is yes
has Spiritual functions
Infinite Knowledge functions

including very specifically
what is the certificate given for
for some correct knowledge yes
and it is done correctly

and here we see something like this Well, it's an intersection.
For example there is such a thing as "-no" yes "-no" if there
that's exactly when we'll look at it
this very light optics of this word
for example, "literacy" let's assume a comma and "-no" we put

it turns out that we can move to a digital system

"O" is like zero , yeah

and when we are from the end of this word

we are moving towards ourselves

i.e. if you move from zero to yourself

we are starting to grow the world

i.e. well, the letters begin

there are sounds

External Reality

therefore the number turns into a word

and vice versa

from the number grows the word yes

i.e. this fine line is very visible here in optics

you can see the rings of the numbers as they touch

like rings of words

it turns out to be something that looks like a lot of eights

and if you also tighten them, for example

then it is completely clear how God does the management

it will be clearly visible how God's management is going

and then a person sees the Light

due to technological advancement

i.e. it is enough to set the goal of technological efficiency

and God immediately gives control practically

Well, how right away?

we need to make some preliminary movements yes

upon obtaining this level of knowledge

it is precisely according to Macrosalvation, first and foremost

and when you start to see

what is Light

This is a fairly technological design

to receive knowledge coming directly from God

then in principle a cure for any disease

what does it have to do with anything

there is such a universal phase of control here

as a cure for any disease

by simple compliance

Well as if a canonical model of Light

and the model that corresponds

just a healthy person

so do you when you perceive it
then this Light is coming to you
it normalizes all your organ systems
it regulates precisely the development towards Infinite life, etc.

and shows where you are now
and where in this level is your Infinite Life level
and how should you position yourself, for example ?
in the future space
so that you are truly in the Infinite Life
in Eternal development

i.e. there are these coordinates, they are very clear
like escalators it's just elementary
they have a completely rigid form
just enough to fit
to a certain level of Light
but not in such a common form, just like an escalator, yes
but these connections are simply visible

but it is enough to feel these connections with Consciousness
well, like some kind of microcircuit
and you understand what we are talking about, you gain knowledge

and knowledge is the essence that allows you to already
on the Spiritual level
at body level
on a physical level
physicists so to speak bodies
body dynamics
develop forever

i.e. existing knowledge
which in principle often do not have yes
namely the Axial Light
in the direct sense
i.e. knowledge is a level of , as it were, universal Reality
to reveal the light component of knowledge
you still need to apply some external knowledge

i.e. "that which exists" yes, such a term

and this level is the level of Eternal development
which is what you need

because that's what really happens
not every person thinks about it
what should he do for example live there forever
what does he need for this right now at this moment
you need to eat a piece of bread there for example Yes
or is there something else?

and if he doesn't think about it
but he must still live forever
then this technology is obtained
allows people
who, for example , are not actively or regularly engaged in
precisely in a targeted manner according to Eternal development
allows them to live forever
because if at least one of them is engaged in it
there within a kilometer radius yes
they receive this Light
there may even be one who appears on TV, etc.

i.e. here is this Light, it is visible
and this is how this Light is seen
also the Soul shines from the physical body

i.e. now I have shown exactly this optics of the Soul
how is it revealed
due to the external control system

as soon as you see the light of your own Soul
then consider that everything
your events are harmonized
provided
at least it's an adapted function
i.e. you have a structure of the next future
The Earth is definitely not exploding from a possible nuclear problem, etc.

i.e. you clearly decide
the system of its future development according to the main parameters
if you see the light of your Soul
crossed with the Light of the World of the outer World
in your Perception
in the Perception of God

how to highlight here Perception of God
just brighter light as a rule

or Light more distant

or Light on the contrary is close
very close to the Spiritual level , etc.
there are basically a lot of characteristics there
you can find them individually

but when you start working and seeing
what is going on management
Well as if in all phases
Infinite
approximate
distant
then you begin to attract this Light to yourself
most closely
your own line

and here is your line often
it has a kind of transcription
such a system of spaces
that something else still needs to be decided there
what are the current tasks
which really require
is no real quick solution there

Now take your tasks
start solving them there right away yes
by the core of the tasks

it turns out that the more you do it
external analysis
the thinner this line becomes
Well as if which needs to be overcome yes
to resolve the issue

and all questions are visible on the merits
how he reacts to questions
your soul yes well including the body yes
physical body
Spirit
Your consciousness, in principle, you know, is this
an integral part of your own
your Infinite future development

i.e. Eternal development is a part of you

and when you see for example what it means in principle
this is also a property of your information
then you understand yourself more precisely

then it is clear that the Soul that passes
to the outside world
she just seems to be reaching out for everything
to you yes but in the future more
and to you too
but from the point of view of mastering the knowledge of Eternal development

i.e. the Soul is basically from here all the time
gives into the future
knowledge of Eternal development
here we have revealed its optics
perfectly linear concrete optics
transfer of knowledge about Eternal development

and when you walk on this bridge yes
in the flow of information
then you can't be knocked down anymore
you have inside as i said
even the one who is actively involved in management
still has more in the Soul
structures of Eternal development

so you have a connection with the outside world yes
in fact with its own events
and that's all
you are completely protected
you are an autonomous system in this world
and by that system
which is absolutely independent of external factors

and here you have enough in this model
focus
I can actually formulate such a word
the light of your task already solved
and you will definitely solve it

because you can't be influenced

but the only thing is that any, well, actually, requirement
it always exists as if a priori
before even this is said so to speak
and in general there can only be such an option
that there should still be this Macro-creativity here

i.e. to catch the impulse of light towards Macro-creation

i.e. you just need to say exactly in this system
that you get mandatory Macro Management

as soon as you see
that one pulse of light
goes into Infinity
and that's all
towards God, yes

you can even trace it
how does he go
what is the trajectory
then you see for sure
where is god at this moment

and when you know where God is
then there are no problems
you know absolutely clearly
how to find any other person
find event
you can find the event management structure
also in the form of light

i.e. it turns out
what is the coordinate system of your knowledge
it is very developed here, even if not in terms of volume
i.e. no need to look for large spaces
and it's enough for just about everything
constantly as if with internal light vision yes
feel where God is

what is light vision
i.e. you see the Light flowing towards you
and do you understand how you perceive it in general?

i.e. here you can go deeper and understand
how do your senses work in general
light optics

and the more you go deeper
the more clearly it can be seen
that each organ is originally Eternal

and if we have this knowledge
then we just bring it into line

with Reality

Eternal organ ^{yes}

The eternal level of cellular composition ^{there}
metabolic functions of the body

^{it means} it starts to connect

with the level of Eternal development and the more so

which you have defined for yourself

due to the action of the Soul in the external World

often this happens ^{as if} already at birth

^{as if} a choice ^{and} immediately a glimpse of all events

^{so} here you also see the root event

i.e. where God is, ^{well} ^{as if} it concentrates the main tasks

here He gives the opportunity

this event is clearly visualized

in childhood a person understands his tasks very clearly

which, by the way, he installs himself

and so to set myself a task

it is necessary to have external control

access to target ^{yes}

this means that light always contains external control

^{as if} to myself

i.e. light in principle turns out to be an autonomous system

the same as there is human action

i.e. a person acts on the same principle

how does light work

then he has exactly this

here is the Eternal Infinite development

or even when it develops there

^{Well} ^{there} for a long time or ^{there} for a short time

in a second ^{yes} its development

it is located in this very interval

then it is important to highlight and understand here

^{then} the level of Infinite

and highlight that a second has passed

you clearly highlight where the structure of your Eternity is

Little by little you will learn ^{how to} set it up

your body

and all the time walk along the line of Eternity

not only the body ^{there}

Spirit

Soul

Consciousness

body if ^{means} in this case we can consider

as part of the Soul

then in principle we are talking more about the action of the Soul

and further when we see

this is actually something unique

development of ^{the actual} Soul

towards the Infinite Light

here the Soul has the status of development

which is extremely rare

because the Soul ^{well} it is structured ^{there}

or for ^{example} Well, maybe it can do management

according to the following development

but it is precisely the development of the Soul

by the person himself ^{yes}

perhaps towards the Light which is Infinite

then it turns out to be development

because in this case

The soul connects with the Infinite Light

Light carrying information of Infinity

and it turns out that we already have

control by Light

because the Soul simply perceived it

and that means the Soul made a choice ^{yes}

i.e. we use logic when we make a choice

we do management

all external Reality

that's why logic works

in such ^{seemingly} rigid structures

wow, ^{wow} as if a logical control phase was being flipped

does anyone even have a different effect ^{yes}

in management

that logic is structure

frequent changes of the entire external Reality

for remote areas of Reality

and to see

how did your logical opinion influence ^{there}
to a super-distant galaxy
or any other level of information
but precisely distant
can be traced very clearly
again the impulse of your action
and see how God is already watching over this impulse

i.e. it is possible to determine the coordinates of God
just looking at everything
as if on Him ^{yes}
and on your impulse

i.e. then it turns out look at Him
immediately knowing where He is
you find the way to access God's knowledge
how to contact with God and what is this path
which happens almost immediately
every person has
i.e. well, in continuous time , yes, it exists

and it turns out that when you start doing
such management
that interaction with God in this case
this is the task of your Soul
but this is also God's task
pass on knowledge to you

i.e. you see what God does for you
that's how Personality is
i.e. you see that He is ^{well there} we will say as a hard worker ^{yes}
is also looking for a way to you
because you are completely free
and I showed that in the lighting system
it is also a completely autonomous system
Human

to bring knowledge to such a system
with complete freedom of choice
we still need to
Well let's say such an autonomous system as a person
this system had a co-directional development
there is also super speed God works
at high, very high speeds, ^{so to speak}
Its manifestation is very high-speed.
Any manifestation of Him has infinite speed.

it turns out that
approaching is very high speed
compliance with light levels , etc.

it turns out that interaction with God
it's often very internal
Well as if a deep construction of personality
where does a person see
how his Soul was organized by God
and just on this string
he talks to god

because that's where the Soul was organized
there it turns out that the speed is appropriate

i.e. he just needs to understand
where the interaction of velocities occurs
Well, a certain amplitude arises, yes
and the whole external world arises

so it turns out to be the Personality of God
where God is man
that's exactly why she created the entire outer world
because this is precisely the inner string of a person
and correspondence with God
gives this amplitude and creates external Light
that's all
this is where events come from

i.e. in order for the external World to be created
It was enough for God to become a human personality

and then the external Light is obtained

so that this external Light
I'm just using the example of two strings
For example there take two harp strings yes
but unlike this design
second string
this is all external and internal Reality
for God

for a person who perceives
Here, human perception is structured in a very complex way
Perception to see

the structure of God in linear manifestation ^{yes}
and ^{there} in personality
but also where is this string
Well ^{as if} the inner Light of the person himself
this is what he sees again with his own eyesight

i.e. a person constantly sees much more
i.e. very large arrays
sort of mastering management all the time
what he ^{seems to} perceive as the purpose of management

so the selection is, ^{as it were,} actually the goal of management, ^{yes}
this is the level that ^{actually}
well what is the level of optimization
so that the management goal is realized
enough from a huge number , ^{so to speak}
a very large amount of information
dynamic and information
highlight the implementation immediately

that's why it's important to always be in the mindset of implementation
not at ^{some level} ^{there}
some intermediate details in management
namely, the immediate implementation of the goal
and all the time hold on to this light ^{yes}
the goal has been achieved

then it turns out that you have a simplified design
and you don't do it
by going through a large number of options ^{there}
and you just keep this goal
For example ^{there} the goal of universal Salvation is simply Light
and this Light is this goal
i.e. Light and target information are the same thing

and when you start to see
that this glow of Light is such
that Light becomes personal
then you see what God sends you
already the first knowledge of God
from what you do right

you can always determine it here
what are you doing right
this is a personal glow
those. Light of Personality
Personalities of God

through this Light
you can help other people very well
those. personality color
Light of personality I mean color
It can also be a certain characteristic of a person
in terms of Infinite development
you already perceive it like that

i.e. God who created man
He gave him the coordinates of some kind of matrix.
means its dynamic development in the light version
and you have a completely clear understanding of how to help a person

you can see what God put in place at that moment
for a person
and in order to provide assistance
there is enough of just everything here
how to get control out
at the level of , well , practically, let's say, compliance , yes

i.e. there we get if you
the person corresponds to his level exactly
then you get the implementation of its events

i.e. management well as if regulating it with events
it's just well as if for everything
here, well, in general, there is such a term as
there is a concept of "norming" yes
but there is a transition of the word to the level of events, as it were

i.e. if we, for example , do such control here
that there is some kind of matrix laid down by God
and this matrix is such that you see the control
let's assume that we are going well in this way
that you clearly distribute some network of events yes
you see that this particular chain of events
or the sequence of events is as follows
that one event intersects another

then, for example, if we take such control
as a standardization of events
it's your personal business and your personal practice
then when you see such an action
as the normalization of events of external Light

i.e. here you have to see
that there is some external Light, ^{yes}
i.e. there is a standardization ^{of} events that is completely external

and it turns out that you are also present there
here it is in full
here is the ability to reveal yourself in any phase of management
this is precision control

i.e. here is one thing, ^{as if} the normalization of events is underway
according to some ^{matrix} that you looked at
in the Action of God
in relation to a person

but there is still that action
what you see is still some kind of external influence, ^{so to speak} Yes
there are such positions
that there is some external influence
Well ^{as if} an action or ^{influence} of a person
the influence of circumstances ^{there, etc.}

but when you start in external influence
see your own Soul impulse
i.e. its own power of action

then it turns out that there is external influence
it's you again, actually
but ^{as if} coming from a certain level of light

i.e. everything depends only on the level of light

and it turns out that the light level in this case
this is the level actually ^{well as if from} your point of view ^{yes}
your position

and once you start to determine
what is your position on that
so that for ^{example} all external circumstances ^{yes}
perceive
as the level of your own reaction ^{yes}
on interaction with the environment
with some ^{objects}
in management
for the purpose of management

then it turns out that this is powerful

as if squeezing out the outer world yes
in your direction
like some kind of external cliché
the outside world
this is also your action somewhere

i.e. it is enough to recognize
i.e. find where you operate
in the control system
and you get a very clear system
Well like, you can pull this link , yeah
and you get an event management system
very powerful
which considers all spheres of action

i.e. for example you can find
coordinate system of this event
highlight this link, make it for example management
and we get this link
how completely as if all the same
contradictory type of information

i.e. on the one hand, complete control is done
on the other hand, somewhere here there must exist
a system that is outside the control zone
because through this system
you can go to God's Action

here is the absence of yes
do systems exist
which must be outside the control zone
but to be at a remote level of control

because that's what it is
access to the structure of God's presence
through a kind of projection of the external world

i.e. in management, in essence, such a position is always built
what to
Well, first of all, to achieve control
secondly, to minimize the area where you are
you don't apply active management

and considering that you can do it on purpose
i.e. do not apply to the control system
it turns out that you are supposed to be here

still control somehow yes
somehow control the processes

as a rule, it is well controlled
through prolonged i.e. remote systems

and it turns out that for example now you have
some action is happening yes
well, which could be problematic there
and you need to do something like this
so that in the future it will become a norm yes
then it turns out that you should just see
this action is just in the future yes

i.e. you should see this action in the future
well, regarding the regulation of this situation
and how would this action
which is normal in the future
it should just shine here in the form of light
then we get standardization up to a certain level
Here

but in principle this is how the World's position is structured
that this one here
Well as if the incoming schedule means some kind of Norm yes
where there is absolute controllability
and there is a level well as if remote control
where you don't enter
special characteristics of full standardization
to have access to the Macrosystem

because there is a very simple argument here
if there is some plant and a leaf is moving there
then this does not mean that this is such an option
that this sheet needs to be controlled

i.e. there is no need to control everything
and considering that it is not necessary to control everything
we still need to introduce a lighting system
which allows areas that are not controlled to
so in the future, as if to enter
into the standardization system
i.e. well, some kind of Norm

and it turns out that based on this
an area that is , as it were, outside the zone of regulation

it should still have Eternal development
i.e. it is basically now or in the future
should receive some comparable knowledge
for further future Eternal development

and it turns out that
to transfer this knowledge of this area
it is necessary to concentrate maximum control
i.e. to create a form of that area
which is within your control
and this area should be very clearly as if
well, to perform this control action or something
towards a seemingly distant level of future events
as if an unregulated area

i.e. the area that is normalized
goes into the area
which you seem to leave without any control at all
but it passes due to the knowledge of your Soul again

i.e. you perceive the World as a whole
so you have to have areas
which well actually look like
how can the area be
you can't say that they are, for example there are unstable ones
or they are in the area of as if absence yes
level of control

but they should be like this
well which at the moment
you think that you should be like according to Macro connections

i.e. it turns out that you should see very clearly
that at the Macro level there are
well, there are some connections
which need suppose so let's say in regulation yes
to determine these connections
you should have a picture of the world in light optics
Well how can we say let her go yes

here light optics should develop a little on its own

and then you start to see
this is what is around this point of all connections
some situations or other begin to be worked out

and when you see this connection point, let's say

as a structure for example there are future events
then here you can see that any event
you can decide there or now yes or decide it later

but the general management system
let's assume there is Macrosalvation
it is always an achievable system
i.e. you see that it can be achieved in any case, yes
for example, there is always everything you want there yourself
there or you want for all

and yet with all this you achieve it
being in principle in any conditions

that's when you come to an opinion
that you can achieve control
being as if in any conditions yes
but in the Soul there at the level
Souls
Spirit
Consciousness
i.e. all your optical systems are united
then this is the purpose of today's lecture

the ability to achieve results in any conditions
and the standard is fixed and static

Thank you very much for your attention
