

GRIGORY GRABOVOY
The Teaching about God
Logic control system
17.03.2004

Hello
the topic of my seminar today
This is my Teaching about God
Logic control system

in this topic
it is necessary to consider first of all
management status
connected with a person's daily affairs

i.e. under normal conditions
a person is put in a situation
when logical levels of control
must also work for its Eternal development

so here we should consider
a control system in which
a person can, for example, do some action
consider immediately
as if the primary source of this action

i.e. if we consider
The Logic of God's Action
then here we see that God is at work
based on the initial Eternal level
Of your own development
i.e. initially He is Eternal
and therefore any action of God
naturally has the context of Eternal action

so when we look at
let's assume the logic of the creation of man
it is clear that there are points of intersection here
logic of man and God
and from here, for example, at the moment of a person's birth
a kind of primary glow is laid down
where human logic also has
spectrum of Eternal action

i.e. if we, for example, in everyday life

we meet the aspect of such action
that a person, well, doing some action, yes

has some third thoughts, let's say
then in general the regulation of these third thoughts
can be done in just a few
observing the structure of the primary glow
i.e. the point of contact
the logic of man and the logic of God

and when we look at this point
then we see
what exactly is in the structure of, for example, the creation of man
there is always a community structure
both logic and the Spirit, for example, man and God

and in this case any supposed action
decision-making related
this is an act of choice well for example, a person's logical choice
i.e. as if it wasn't said there but the person is in any case
makes decisions independently
and exercises control on his own behalf
even if, for example, he exercises control
in the context of a decision making process , let's say

and it turns out
that responsibility for any management
lies specifically on the person

and in this case if we consider
let's assume more of today's meeting
for example, let's assume a meeting at the level
for example, where we do the management from ourselves
and at the same time we work, for example , with ourselves, yes
for some of their own purposes

then here we see that the level of decision making is supposedly
this is for example Well, let's assume that it's normal health , yes
you and those around you

then the action is aimed at, as it were, highlighting
let's say some other information
rather than information such as Eternal Development

and in this technology it is very easy to see
what is the initial level
precisely from the point of view of the Eternity of logic

including human logic
allows immediately any other systems, for example
than for example your positive action system
immediately bring it into the structure
that these systems are absolutely harmless to you

i.e. you are in the system of precise development
if you see this glow
the original, as it were, Eternal level
logical actions of a person
and God at the same time

and that's why when I say
about the Action of the One God
then here we see
what if we assume we are looking at
the context of some destructive systems
then it turns out that from God's point of view
because He is Eternal
any system of destruction
this is a structure of some other information yes
i.e. the structure of information distribution

if we from this point of view
let's look at the structure of destruction, for example
then it turns out
what we see is God's action
in general it turns out that this aspect is being resolved
towards Eternal development after all
i.e. in any destructive action
there is an element of the following kind of educational act, so to speak, it can
be called
where information on Eternal development is distributed somewhere

based on this we see on a logical level
this information is distributed
in general, in the control space
into human logic

and it turns out that we see something like a drain
in general or a receiver of information
where any action taking place in the World
including the action it turns out that as if of any plan
this action still turns out to be regulated
it is precisely the phase of a person's seemingly rigid logic

that's why when I give control technology for example

I always say try your best if possible
on a normal logical level
i.e. at a level where there are no trance states, for example
in some calm situation
just do management through Thinking

in essence this is the structure
provides more stable control
in some special cases

when you need to, for example , or think hard
or, for example, to carry out some, for example in general you can say so
that some long-term concentrations
then it turns out that here we see
that when a person leaves for example
into a system of some voltage
then he can do it by using logic
consider management from oneself due to the fact that
that he can simply perceive himself
at this moment

i.e. if you enter the concentration system
where it is necessary well how to concentrate strongly
Please pay attention if possible
in your image
but only from the front
i.e. you look at yourself from the outside from the side of the face

This fixes the logical phase of control
i.e. you see yourself in your Perception
and the factor of the logical plan
what about your presence ?
in this case it turns out that it is aimed at that
that you are still working in a fixed state
as if a logical environment of Perception

and here in the logic control system
we still have to consider in general
process
when a person's logic is aimed at that
to know the Logic of God
here is the same example
how does god perceive
some kind of destruction system
if He practically her this system
takes out of the structure of Perception

i.e. he is Eternal
while He should understand
the structure of some destruction yes For example
if you put the question like this

then it turns out that from God's point of view
destruction structure
this is what a person perceives on a logical level
i.e. the system of human action
to overcome some act of destruction

i.e. God sees everything
in the direction of creation

it turns out that this is the creation of this direction
this is the work of the human Soul
to create a precisely logical act of management
by creation

i.e. it turns out that the Soul of a person
connects
when god is watching
to the logical level of human action
and helps God in his work

it turns out from here if we want , for example,
make Soul management
then you can set up a kind of logical control phase
i.e. to pose a logical question
trace a signal as if
how does God view this action
and then the management of the Soul
is carried out more specifically and, in general, quite often easily

i.e. in this case the technology allows
without strong mental efforts, so to speak
carry out actions comparable
with some strong effort

and therefore it turns out that if we, for example, ask the question
concentrations of any long-term yes
and we need to do something at this moment
some logical actions
then we can quite as if committing
any kind of actions, well, at the everyday level

make management intensive enough
if we follow
God's control phase
for your logical behavior

i.e. God's logic is aimed at that
that you act in the context of precisely Eternal development

so here it becomes quite clear in general
that situation
that when you for example want to achieve
some kind of control very quickly
then here is the logical phase of control
it kind of spills out, if you can call it that
and so it can be called

it looks exactly like a logical phase release
into non-rigid control systems

i.e. if logic is more
as a spheroidal system in information
i.e. hard logical spheres
then the emission is like that, well as if it were given
for example, strongly spiritual or mental action
in this case the sphere seems to stretch
and takes on an indefinite form

i.e. this is when the logical sphere of action
acquires a more contourless, so to speak, form
then it turns out that we are leaving
into the structure of future events
and based on this
this is the emission that is meant
to a greater extent in future events

from here one can observe on a logical level
what is in the future
i.e. it is very easy to enter
into the structure of future areas of development
at the logical level
and from there trace the structure of your personal events
or any other person
being as if in the current time system

i.e. the logic is very clearly and tightly connected
with future events in that case
if you work

precisely as a factor in overcoming some task
as if by super action

i.e. for example , one action is not enough for you
you need to achieve results quickly
or do some creative management
then it is possible to do it on a logical level
this creative management
but for this you just need to
Well how to output the control system
into the structure of future events

i.e. you must look through the sphere of logic
as if from the Infinite level
but to myself
i.e. to enlighten her in fact

Infinite level where there is God
where God creates all Reality
and you see the glow of God

it turns out that the glow of God
coming to you
this is what you see, including yourself
at the moment of fixation of the logical phase
So God is also a man, yes
i.e. you see a person then

and based on this action
you are making a very simple logical conclusion already yes
on a human level

since God is Eternal
and He can, in general, perform such an action
why don't you develop in this direction
and not to set the task the same way yes
it is quite possible
if you know the mechanism of release
exactly as if of the Infinite level
logical phase of actions

i.e. the essence of the phenomenon is that
so that every action you take
at the logical level
creative means of course action

it would be realized

i.e. what you perceive
at the level of logic
this should be implemented
in the form of, in general, often not very active action

i.e. you perceived some
at the level of physical Reality signal
and then it turns out that you have to differentiate the signal
and if you are driving along the road
or do you make any decision at all?
for example, for the treatment of a person
then it turns out that the decision making
this is the action to achieve
i.e. decision making
what you need to cure you cure

and then it turns out that your logical level
should be like direct light
going as if into the treatment system yes

i.e. or into the control system

here is the selection of the phase, for example, where it is needed
direct , for example, an optical pulse
treatment impulse
or where you need to direct your events, let's say

if these are future events
that is, the so-called macrological phase of action
i.e. a very large hemisphere covers
spectrum of partially past events
and that means [...] part of the future
for example one third of past events
and two thirds of the future

and this sphere gives a projective glow
on your so-called logical plane
and you see in the plane
reflection of a sphere
also the principle is the opposite yes
you perceive a volumetric multidimensional object
at the level of a seemingly reflective system

then it turns out that you see
do you actually need to do practically

as on the action map

and at the same time each system is under control
on a logical level it looks like this
what do you do for example control from yourself
and this control is actually quite simple
that you are just making a decision
as if surveying the control system
more like from above yes
i.e. with an ordinary logical gaze

it turns out to be a Macrosystem
projected into the plane
you get a logical control system

and if we consider for example
Well, in application to some countries, let's say, yes
and some regions there
then if we consider
for example, an environmental safety system
in France, Spain for example
then we see that in order for there to be
environmental safety
in these countries well let's assume there in the next 100 years or there 10 years

we have to consider the following status here
what are these 100 years or 10 years
they should fit quite easily
in the system of our Perception

as God does for example
if He wants on a logical level
make management
He must first compress the system.
and make it familiar to Perception yes

here is the formation of the system
into the system of habitual Perception
well, in quotes "habituality" if you can call it that
and in general it can be called that
because here it turns out that in the logical phase
for example, the system "if necessary" or "further possible" yes
we are revising somewhere on a logical level
event system
and then we say what is possible

i.e. logic develops

in accordance with the development of the World
and so it is indeed
a person moves somewhere in space
or reviewing the mental level of events
Of course, he takes into account at the same time
all connections of the world

it turns out that we are in a logical phase
we have a very significant control system
as if following external events
and understanding of these events
why on a logical level
can be done much more often faster
than going out into some systems where there are strong concentrations
for example, even on the Spiritual plane

and it turns out that when we do management
for example, coming from oneself
as if by collecting events yes
for processing this information
then here first of all it is necessary to highlight those events
which, for example, are not immediately perceived
as events are complete

i.e. here is a discrete system of Perception of events
this is some kind of problem
because the full events are all quite clear

i.e. you understand on a logical level
what did you cover for example there are 200 or 100 years of future development
but if something somewhere seems to vibrate
like the structure of light on some sphere
so we just need to consider it here
what vibrates
i.e. where this light manifests itself

and here you see precisely the presence and work of God
create a creative level of development
your logical control systems

keep that in mind
what is it like viewing future events
maybe even a second ahead
not necessarily 10 yes let's assume years
here you can highlight
the structure of God's presence in your action

i.e. for example you can see
how do we suppose your own action
expressed from the point of view of the Will of God
i.e. from the point of view of all connections
and see this plane of Action of God's Logic
and its plane
compare
with His plane

i.e. this is generally enough
simple technical element in control
the plane of God is somewhere nearby
you take and compare your human plane there
and watch further as a game of chess
God moves the figures yes
you move, etc.

and it turns out that you can kind of manage it
just like God does
according to the aspect of the logical management plan
i.e. without straining, for example, in the structure of the action, yes
a move in chess is an action

what God thought before this is another question
there is action
Souls
Bodies, for example, of the Physical God
or His Spirit
or for example aspects of the Action of His Consciousness yes

and it may be that element
which is in your physical body

and when you consider this
then you see
where does your body even get organized from?
from the point of view of God Consciousness

i.e. the body as an element of God's Consciousness

and when you see such a control system
you see that the plane
this is the very plane of control logical
it is being built
maybe not even a plane
and some other geometric system

it is built exactly the same way by your body
simultaneously

i.e. here you can basically just observe
what is the glow of your body
i.e. you just have to detect it

(replicas)

you just need to just about everything
view body action
i.e. how the body operates

and actually view the action of a body photon
quite simply by the way
i.e., you need to , for example, mentally consider
movement of your hand yes
or just look at this situation
that the hand is a level of some kind of gateway yes
for example, if you mentally imagine a hand
even mentally or you can physically put it there in front of you

and then let's say you start working
from the body just looking at everything
how does it go
heart signal distribution
for example, listen to the work of the heart as a sound

and then this is how the sound reaches your hand
in what form

this is the form
it's like a mirror image

the level is basically the following
i.e. you can look at this sphere or there plane
what builds your body
as a system of logical events for the body

because any object of information
builds a system of future events for himself in some way
due to the glow of, for example, the structure of God

i.e. God shines ahead of everyone
and we just see this glow everywhere
and if you observe correctly
then we will see all these figures in front of us

further, as if settling management issues
for example you don't like something yes
in one's own health or in the health of another person

then it turns out
in yours it turns out easier, you did it
just a logical signal lit up the area yes
and standardized according to form
pre-seen as if yes
in the control system
It is advisable to work through the system, namely hands

the hand is further, the system is bigger, yes
and the control lever is more optical
stronger control
the only level of control in this case
should not work with your hand
and just imagining the hand
because that's what we're talking about
that you are still working at the level of Thinking

and so when you imagine a hand
it should be exactly this length
here is the one you have
i.e. it is impossible to work with a system that is as if imaginary
the hand must be just a hand , even in the imagination

and when you suppose you start working further
i.e. see what system you get hands yes you have
i.e. how is the hand built in general
from the point of view of your Perception
you can see God in action
i.e. to see God from the physical body

i.e. concentrating on the physical body logically
see where God shines from
i.e. you come into contact with Him

and from here it turns out that you are in this way
you can see specifically the Physical Body of the One God
and what does that have to do with it
what does god do in this case
i.e. in the form of Spiritual action
this is where Spiritual comprehension develops further

i.e. we see here that when the Spiritual action takes place
then in principle it works out
what we can do through spiritual knowledge
observe as if prognostic phases
development of the physical body
i.e. the so-called logic of the Spirit
The spirit develops towards life
that means he is helping somewhere
for example, the development of your system in general as if development
in the physical body
and so what he is considering
how do you even need your body to be healthy

i.e. the system of organization of your Spirit
or the system can be called "Thinking and in quotes your Spirit"
although it can be called without quotation marks

Please note I use it all the time
either in quotes or without
and at the same time I often say that it is one and the same

i.e. if we consider such a question
then we see that at the logical level of development
quite possible to consider it
transition system
one sign to another yes
transition system
one action into another
due to some impulse of events
Well, time as a rule

you can work without time
for example, so that there is no explosion at the AC
it is enough to move the event sign
by simply concentrating attention on the fact that there is no explosion

i.e. consider the phase of events
where is an explosion possible or for example the next phase that is not

and not waste time
and just compress the object structure into just one
i.e. to compress the source of the nuclear power plant itself
how to compress in information
to bring out the glow between two signs
and translate into a sign of absence

i.e. you can work without time

as if well almost instantly yes

or as a rule, pay attention

your logic works like this

after all, there are quite a lot of technical systems

which are not stable

if you pay attention to the person

which passes near these objects

it turns out that a person regulates with his presence

this object

and this is the level that we see

precisely as control by a person

it is like an unconditional logical action

action of human movement logic yes

The spirit organizes the space in front of the body

or the body itself

man builds body

God makes space before him

and at the same time this action in relation to the object

this is a logical action

once you learn to see in the logical phase

as if hard fragments of events

it is clear that passing by the nuclear power plant

this nuclear power plant won't explode near you

moreover, if you think that it would not explode

it may not explode either

and as a rule it doesn't explode yes

i.e. it may not explode even if there are prerequisites

and when you, for example, consider the process

but how about from a logical level

make a control system after all

the nuclear power plant there doesn't explode in any case

or didn't start there for example some war

using nuclear weapons, chemical weapons, etc.

then you see

what is the first aspect of your action

is this your healthy physical body

well, practically healthy for example

i.e. you see that the correct organization of your body

or any other person in principle
It would be better if everyone was healthy
It is in this context that we work
and when you see that your action is like that
then it turns out that in terms of events
you don't allow the same explosion
or information about the explosion

because information also works
on the physical body of a person

it turns out when you
for example, you consider your action in this way
you see how God organizes everything
simultaneously in current real time
and at the logical phase of Perception you see
your Soul
your Spirit
your physical body
and the structure of Consciousness
It is precisely this structure that Consciousness receives
where do you perceive this process

and based on this you can very well
see the control coming from you
but also coming to you at the same time

i.e. you see the simultaneous work of God
although the initially organized Soul, for example,
then there was the organization of the Spirit
bodies, etc.
but nevertheless at the moment of the current action
you can see God's work at the same time

and based on this you may well consider
process of action
when you can see for example
how can it also be done at the same time
to involve, for example, in solving some issue
in total
and logic and for example the logic of the Soul
the logic of the Soul's actions
you can see the logic of the Spirit's actions, etc.

and at the same time the logic of the Soul's action

this is what contains
all logical control level systems
i.e. in this case it is like a supporting plane yes
or supporting sphere

and it turns out that we can consider
this is the logic of the Soul's action
what does it consist of

in this case if we consider let's assume there
Well, the glow is closer to a bluish color or something
as if inside a sphere yes
the whole sphere in itself
this is the logic of the Soul's action
example, to prevent an explosion at a nuclear power plant

i.e. I introduce some systems in this case
although they often exist in exactly this form
and they actually exist in this form
I'm just showing
that they can be entered into systems
i.e. you can paint it in different colors, for example
at the expense of Consciousness

and the external structure
let this be the system of the Spirit's action
i.e. the Spirit is limited, as it were, by an external system

i.e. in this case it turns out
surface of a sphere
this is the action of the Spirit
although the Spirit is Infinite and it is considered that this is a finite system
Quite difficult , yes
for Perception
however, we are in a logical phase we can do it
i.e. in the logical phase we can
translate one system into another

and when we want to look for example
action of the human mind
i.e. his personality for the preservation of life on the planet, for example
or the preservation of the World as a whole

then we see that this is an action
this is the system of formation of the mind by God
i.e. well, just the usual , as it were, normal Perception is connected with that
that a person should perceive everything in the Norm of development

it turns out that God acts where the human mind is
maybe in general it turns out that he can
not only convert as if Yes
here is one system into another
but he can also act
at the moment of this action
i.e. when one element passes into another

i.e. in this case we can consider the following
what is the Soul of man
when it comes to the management level, as it were
and at the same time wants to do it like this
so that the Spirit would be perceived by Consciousness more clearly yes
after all, we work in a phase, as it were , and in a system
a higher logical level of Perception
or you can say it like this
that we can even say so here
that we are working in the phase of Spiritual Perception yes

and when we look at different different systems
then we speak with different words actually
i.e. you can talk about the same thing in different words
you just have to go into the system
for example, a different level of management

and it turns out that when we, for example , want to understand
what system are we working in at the moment yes
at the logical level
i.e. in this case we are talking about
what we don't use
for example, technologies of some special level of development
but we just want it on a logical level
understand
what is now being demonstrated in this case
as the main element of the work yes for this action
or it is the action of the Soul
or it is the action of the Spirit
or is it just an element of Consciousness
of your Consciousness
or the Consciousness of another person

i.e. we can differentiate then
who helps you and how
i.e. in this case a fairly specific system
manifested in the form of a connection

we can differentiate all signaling systems
in your Perception

and so that's what I said
when we build a plane
and unify the plane to understand it immediately
this is an element when we
We understand all Perceptions
We understand all control systems
and on a logical level
This can be done due to the fact that
that we can move from one system to another

i.e. we can consider
that being in the system of Spiritual management
see what the Soul does
and if we can do it like that
respectively within the logical level
we are completely free

i.e., logically we can assume
the same actions as God does
at the level of the Macrosalvation of universal Salvation

i.e. to carry out any control systems

and when you try for example
achieve control quickly enough
then it turns out to be an accent yes
allocation of the control system
in this case it is
that you can simply raise this whole system as if
at the optical signal level
to yourself
i.e. simply bring closer to the physical body

Here in front of you is the control system
so that some element would just happen faster
it just needs to be highlighted yes
or as if it is quite simply visible
in Perception
like some kind of luminous point

this point is just lifted up
and you pull her towards you

in this way you form a control plane
already as if on a multidimensional level

i.e. as God does
He just takes everything and the control plane
makes it seem multidimensional yes

i.e. one event intersects
with some other event systems

and it turns out that in this case
you are from some level of one
move to another
it doesn't even have to be a plane
but just a connection of events

i.e. at the logical level
you can link one event to another
i.e. one chess piece moved to another place
or one shining point
as if moved to another place
and from here comes the control over your country , for example , yes

i.e. so that there are no problems in Russia
you need to do it like this
so that there would be no problems in Spain in the future, etc.

and it turns out that we proceed from this
we can see on a logical level
It's quite simple how the distribution of events goes
when we just think logically
over some situation

and logic it becomes well as if everything became more understandable
from the point of view of action
how does logic participate in the processes of all connections, yes
on the planet
i.e. the task is very simple
we need to achieve Eternal action
simultaneously using logical communication systems

i.e. what we perceive
and what we want to do yes For example
or we can think so
that we can go into a state of just peace
let things get done

but for this there is, as it were, an external level of logic

i.e. some logical phase
still projected onto an element of your Consciousness

and it turns out that in order to achieve control
you should see distant phases
logical development of action
i.e. any logically embedded action
always developing somewhere

and it turns out that since this development exists
it is necessary , as it were, at the level of the internal aspect of Consciousness
i.e. Consciousness that is in the physical body
or you can say it this way
that the elements of the physical body including
although it's not the same thing
Consciousness in the physical body can work
in any control system ^{yes}
and the physical body is a physical body

and it turns out that when we look at such a system
Well as if exactly a projection
and the distant projection is obtained from the external glow
i.e. this is the projective system
inner Consciousness
this is something that you are constantly aware of

i.e. when you concentrate this system on yourself
i.e. you are aware of the control element
even happens often to all people
especially in solving complex problems
when you start to realize
you must elements of awareness
this system ^{of sorts of} internal Consciousness
at the logical level

i.e. Spirit
Soul
body work
Action of God
all this holds up
in the system of internal Consciousness
i.e. under your control

and when do you start this system
as if to aim at solving the issue

then it turns out that you do this work anyway
even if you are just for a while
well, at the level of an active logical system of actions
do not do this work

it turns out that you have to learn
practically do the following

when some action for example yes you don't
you must here the investigative phase of events
constantly monitor
as if at the level of the essence of the Soul

and go ahead now
to the next control system
i.e. you have a task in front of you
I also set some specific tasks
from myself yes

there is for example the level of Macrosalvation
and some other tasks
and we, for example, solve these problems
logically
and due to the elements of internal logic, yes
all the logical connections that were before
solve your problems
and focus them on the solution
your specific task
I will work with you

in this case, just as an example of practice
consider this element
that's when the microphone was turned off there was talk yes
the microphone is disconnected
where did the logical phase of control go

i.e. let's assume there is development
some system of Thinking
there is no sound and no verbal level
I stop talking for example at the moment
how does this happen
just like an optical glow
after all, the level of control also comes from the body

and that's why this glowing element is obtained
Well like a clot of photons yes

how was it distributed at all at that moment
he was going somewhere

i.e. there are elements that seem to go by themselves
i.e. they can develop
there are macrogalaxies in the system
or they can go to a specific person
right here
the system works precisely chaotically

Now, pay attention to what happens when we move on
into the control system from logic
then the so-called arises
as if not a structured system of external control
i.e. the external system of the World
it works as a system, as if chaos results

well from the point of view of perception

and it turns out that when we work, for example,
Push

i.e. let's assume we work
in the system of logical connections
then we get this system of some kind of chaos, so-called yes
this is some kind of local manifestation
Actions of God

i.e. God is currently performing some actions
that would attract our attention
and we are quite this action as if
Well, we consider it as an action
why is it happening
this is like an element of further education

because if we consider
only linear systems
where is education then?
what is the point of development anyway

because logically you can say so
yes, there are elements of the World
and so, everything goes on as usual
these elements can be studied
what to do next

then it turns out
that the element of the next development

is well like some kind of chaos yes
but at the same time everything that we looked at
before this action
because it is as if at this level of management
it's still developing, yes

i.e. we believe that when, let's say, an action takes place
coming from you for example
Well as if to the action of some chaos yes
i.e. you see some such
illogical systems of actions suppose
then it turns out that this is the movement
this is what you form
as if in the form of understanding behind this action

i.e. there is some manifestation
Well as if there was no logical action
and then it turns out that if, as it were, these manifestations
not logical actions as if connected with that

what are you doing as if you renounce yes
and look at this illogical action
then it turns out that you should watch right away
and how did this action develop further?

i.e. this is what will happen next
for illogical action

if you are considering this action
such as as if completely chaotic
then the element that develops is this one
it's just called by the name well
as we can say, let's say
clairvoyance or clairvoyance

Well let's assume there's someone turning on the phone
and what is the next step?
i.e. why does he turn it on yes For example there etc.

and when you look
on further developments
you go as if those systems
which are not related to each other
i.e. you begin to understand
that the world is structured in a fairly manageable way
here you are entering the system
so-called soft control

where logic works as a soft control system
i.e. the management there is quite calm

i.e. you can see
How God Shapes Your System of Knowledge
for this we just need to consider
any illogical action
any discrete action yes
turning off the microphone there, etc.
and see what's next
why did this phenomenon happen at all
and why in a system of seemingly clear logical connections
i.e. it shouldn't turn off often , at least

and how do we further consider what is happening
this is where this system of God's Action is
i.e. where is God manifested at all?

why does he seem to do it like that
that we do some action based on this yes
of his condition
or there from your level for example Thinking

just as very strong for example
the level of health recovery is that
that when you look at a communication system
as if Well, not such trivial ones
i.e. you want to understand
what led to this process yes

and this is this understanding
where the connections are often quite complex
or completely unusual
i.e. they can be simply
as some kind of acceptor points
i.e. as elements of illumination

and once you find them
then you often go into the system of understanding
and in general why is this action implemented yes

i.e. here are what comes next
a completely clear logical spectrum of understanding
i.e. you begin to understand
all connections
all thoughts
you can understand the actions of each person

what are they even basing these actions on?

for this you only need to find, as it were, just on the whole
a point practically from a seemingly random set of events yes
from the point of view of random variables
but from the point of view of Perception
this is only one value

and when you start moving
you are looking at how to differentiate, for example, a random variable
and how to see your own management system

i.e. in this case, in general, everything is quite simple
for example, if I diagnose some technical system there
then from a large number of random variables
I specifically highlight the one that, for example, has a defect, yes

then it turns out that here
It is not possible to work by iterating through events
but by simply highlighting a fragment of the action

what i said
the glow point just rises
as if above its level, just closer to the body

which is, in simpler terms, to diagnose an object
regarding his safety there
move even generally any point in Perception
meaning yes to this object
to yourself and that's it

you can even use any
it's just that the diagnostics will take longer
if you learn to push
exactly the most as if from your point of view
as if on a second and deeper level of Perception
namely acceptor points
then you will be able to take control almost immediately

i.e. it turns out that you can do it here
how to push the control in this way
so as not to waste time
for a precise understanding of the state of the object
and get control almost immediately

and it turns out that based on, for example, the level of management

you can do something like the following
internal level of management
this is where the exact information seems to shine
there you can just kind of come to an agreement with yourself

we believe that everything that shines on the inner level
which is as if inside the physical body
this is where all the logical lines point yes
you are their concentration of will
took and as if united within themselves

and it turns out that when you see external events
as if by this internal level
i.e. in fact you see with your Soul
but the Soul having here the logical status of Perception
i.e. the logic of the Soul's actions
why does she act like this
and this is simply a concentration of light , as it were, according to logic
this light is perceived as information

and when do you look?
i.e. I am now explaining the technology of Perception in this case
you see the main aspect right away

for example, I look at an airplane, let's say yes some
I see the defect right away
I see because I'm just in this case
it turns out that with this technology

I'm just missing the element of Perception
Well, I don't block this element on the first gateway , yes
in the first optical level of simple logic
and I translate it into internal logic

and then this internal system
it has a reflection
and I just kind of see the signal in its finished form
it is already in a completely concrete form, i.e. visible
if necessary, you can see the item itself
what kind of object is that, what kind of device is there or what?

i.e. it turns out that it is precisely the ability to skip the system
through seemingly logical barriers
Well as if the first level of Perception
allows for accurate diagnostics
or do diagnostics there that controls the person there
where the next step is mandatory treatment

i.e. in human diagnostics, of course, this is treatment
in object diagnostics, this is an action to save the object

so when you analyze the situation in this way
do you see where God is?
makes the structure of Eternal development
in general he somehow folds it the same way
over a period of time

Here is His logic in this case
it intersects with yours in that
that you can see the control system and such
what do you see in general how God builds
as if central control lines

i.e. here are all the external events
it is like a construction of some external actions
and God is everywhere
such a central line of control
and when you see this line
you are quite capable of managing other people
who can't see and you can talk
"do it this way, it will be better"

and here in this technology
it is precisely the dissemination of my Teaching that consists in this
what you get by highlighting the central system of God
logical phase of development from God
from the Physical Body of God for example
or from the Soul of God

and here you can easily make the control like this
that just show other people
that just look and through the transfer of knowledge

when they see well like some kind of plan yes
some kind of rigid structure
then they see the future specifically
i.e. the more information a person sees
in the current tense
the more stable he perceives his future

because the future is essentially
there's just a very large amount of information
and here it turns out that when you
assume that you start considering this information

as action information yes

let's say you need to look at the process like this
that you want to know the future exactly
i.e. entered the logical sphere
looked at ourselves yes For example there from all sides
and you definitely need to see it
what specific positions should you get, let's say
Well, in the details there is something to sign
look at some specific letter there
and then put a period

i.e. you can do whatever you want
with processes of future events
also if you are exactly the management structure from the Soul
make it flexible
i.e. the Soul must perceive the signal
from the hard logic phase
after all, "logic" is often a rigid, concrete concept

and it turns out that the Soul must be able to
accumulate these signals
i.e. translation of the logical phase of signals
into the structure of the Soul's action
this is control already coming from the Soul

and it turns out that from a human point of view
God controls the Soul mainly
where the Soul is also His Logic of development
i.e. the Soul of God as an Eternal construction
contains all development systems

and then it becomes clear here
that God always gives only positive events

because his Soul is indestructible
and He Himself is indestructible

it turns out that when you look at this
from the point of view of the human physical body
then the structure of your presence
this is that you too cannot be destroyed

i.e. you can , as it were, on a system of soft logical development
see
that no negative thought is inherently
or there is a negative prognostic phase

it can't have a negative impact on you

i.e. when you see this you are always calm
and in general you are in a phase of sort of safety

i.e. it's enough to just see it ^{yes}
kind of easy to diagnose yourself
but precisely as if at a normal level of management
i.e. when the angle is normal

i.e. there is a Norm of events, everything is fine with you
health events normal
I mean this by Norma

and based on this it is often enough to simply highlight
fragment from future events

i.e. you start to leaf ^{through it} like a book
watch some set of events ^{yes}
or let's say you like this specific value
you like yourself there in some specific position
here you have fixed and installed
well, you can conditionally see the spheres ^{there}

as a rule I just do it
I fix some system in the most optimal way
and it turns out that as soon as I recorded
if ^{for example} I am considering
that God is Eternal
and He creates only Eternal structures
what should I do next?
I just do something different at all
because there I already know that there are no problems
I am proceeding from the point of view of the radiance from God

i.e. where my logic intersects
^{for example} with logic
like all people
so it is with the Logic of God's Action

it turns out that here I can be quite confident
what next I ^{basically} don't need to do anything here
some kind of scheme of events is enough ^{there}
and that's all
then I can do some other things

i.e. being at the everyday level of actions ^{or something}
at the same time I am at the level of, ^{so to speak}, internal
states of the Spirit

when here is the internal
it is precisely the internal projection of action
this is Norma
I can do some things then
at the same time, it turns out that I can show this
still different

i.e. I can understand what is happening there at the level
let's assume transmission even in the optical system
you can also tune in quite well
and how does optics look in general in the logical phase
how is she there let's assume it could be in the form of a wave
is some kind of vibration there
in the form of a thought of some thought

and then any complex systems
you can perceive at the level
as if a universal system of Perception

keep that in mind
that a person somehow perceives any system anyway
at the level of exactly
Souls
Spirit
and Consciousness
I meant keep in mind
what exactly is at this point and in this area

and when you, for example, consider this design
then it is very easy to consider the following mechanism
For example there we can consider
how does the human heart work
and what connections exist in this regard
for example from a human point of view
and there is an external system

or how the heart provides suppose beds yes

i.e. working in a system of some logical connections
we see that the person thinks quite concretely

usually in certain situations
from some one area
from some one as if yes concentrated area
in the form of even a specific point

as a rule, you can consider the point

even near the body
i.e. not necessarily ^{inside} the body
or somewhere very far away

and it turns out that when you learn to see, ^{for example,}
where does the process of Thinking come from
i.e. where does the illumination of events come from, ^{as it were}
because in essence it is a glow
event-oriented

^{for example,} to rejuvenate
a person needs to unwind events, it turns out back ^{yes}
but at the same time the events remain real
it should just transform itself

i.e. he must specifically highlight the cellular ^{system}
i.e. exactly what corresponds to the organism
and process only the information
relating to the organism
while maintaining all communication systems

Moreover, he still has to learn
catch the following events

here is the main problem
why can't a person, ^{for example,} quickly rejuvenate
even if, ^{for example,} he wants to , like ,
Well at least not everyone can do it quickly

but nevertheless the main aspect here is
selection of , ^{as it were,} previous systems of events
and most importantly, taking into account future
because the selection of events
this is ^{generally} clear, ^{yes,} it's easy to do
^{as if} one glance and all events are clear but
at least you remember the basic amount
as a rule, a person remembers all events

and then it turns out that the following events
where, ^{as it were,} the inertia of the external glow is embedded
at the photon level
this is already a question ^{of} the next plan

because there are intersections there
exactly ^{as if} the next movement
i.e. the photons ^{are as if} early recorded

in the process of information
they keep moving like that
Well, I'm talking about photons from the point of view of a simple, ordinary
concept

actually these are photons
I refer to the system of photons of Consciousness, for example
i.e. it just means glow
what Consciousness perceives
and not exactly the physical flow of quanta

and it turns out that when you consider such a movement
the main thing here is to somehow correlate a complex system
i.e. well, a ship is sailing and, for example, it needs to stop
he'll still float for some time anyway
but how to stop what maneuver to do

then it turns out to make the right maneuver
then in logic it happens very quickly
and needs to be regenerated
well, that is, to restore practically
all body systems
i.e. this process
it can be quite manageable
i.e. a person can, for example, do rejuvenation
it's not necessarily at a certain age, so to speak yes old
but according to clinical indications
for example, he can rejuvenate himself
at some specific interval
to be cured there

i.e. translation of the state of the organism
to earlier systems or something
when the body was not yet sick
and at the same time maintaining all the functions of the body
at the current time
i.e. complex work at a logical level

although in essence it may not be very complicated
because it's just logic
i.e. I don't come up with anything special
I'm just saying that it's possible at the logical level

in this case, it's exactly like the word "invent" here, yes
using logic you can come up with very different constructions
there are very complex ones, let's assume Yes

You could say that it's based on logic
there you can build a very complex system of actions
but in this case
that's when I work on the logic coming from the Action of God
for example, the Logic of God is precisely
then it turns out that the logic is quite unambiguous
every person should have Eternal development
and what should I think about here further ?
absolutely clear
these are precisely planes in optical expression
i.e. where are you located
and this logic is quite clear at the moment

when you consider such a position
then here, for example, the restoration of the body of any other person
this is a completely solvable problem
and it is quite simple, i.e. it is definitely solvable

i.e. you can see in this system
that it is only worth recording
as if a rigid system of logical actions
and you can always cure anyone else
and from any disease

i.e. you can do it like this
so that the other never dies in essence

for this you just need to
exactly this phase of your action, yes
i.e. to be able to perceive at a complex level
where is your so-called reference level located?
logical phase action level

because logic
where logic is infinite gives that
that the body can also develop eternally, etc.

i.e. glow
based on the initial level of logical actions
where logic was created
and was originally created by God
this is that action
when you can create Eternal structures

it turns out that in this case again approaching further yes
logically you can see

in general how to differentiate these channels generally speaking

i.e. here it becomes very simple in general understandable
such action
that when you are in the logical phase
you are building exactly the Infinite system of life
i.e. you are putting together a system of Eternal development
then logic starts to work
as a system of possible, precisely possible development
i.e. you see why the World
it is, in general, multi-tiered, so to speak, multi-level
where are the events, here they begin, it turns out
that they seem to start to glow
it seems like from one point
but on many levels at once

as a rule
or are these tiers
or some kind of just glow
but enough dense information

that's when you work on logic
precisely on logic
then the glow is quite dense
i.e. you should be here
very clearly fix yourself for the future
that work on logic
from the point of view of constructing future events
namely Eternal development
in this case I am speaking specifically
about the Eternal status after all

in logic we can distinguish
it is the glow of Eternal development
highlight very clearly
just a plane of information
it is the most difficult area, so to speak
i.e. the largest possible

Well for example, there is some bright light there, but it is very dense, yes

i.e. it is comparable
with the density of the human physical body
but only in Thinking

i.e. the recognition criterion is very simple

we perceive the physical body with our thoughts
and as if some density yes
we select the weight function, so to speak
and then if the same thing happens in the light
so there you do what is Eternal

and then it turns out
that is, direct such a system inside a person
what needs to be restored
the person is recovering
and from the point of view of Eternal development
you give the structure of Eternal development

or if it is an object
who can there for example, collapse
then inside the object
it may not necessarily be inside even the entire object
at least light up one atom in this structure yes
then the more people they expose
the less likely it is that it will collapse, etc.

it turns out that based on this
here is the logical phase, it is simple
take the whole world for example
and very strongly pro-activate
the system of sustainable development of the Eternal

but for this to happen people just need to know
where is it located
it is precisely the logical phase in management
i.e. they knew how to highlight it
this is what I was talking about, this is the allocation of the logical phase

and therefore, in this structure of my Teaching
it turns out that it is a collective action
it has a very great educational effect

i.e. the person sees at the same time
what others do
because he understands what he is doing
here in the control system simply even separating the phases
i.e. they are very clearly visible there
contact lines of other actions

for example, now we will do it like this
so that in Moscow for example yes in Russia in the World everything was normal

then it's very clearly visible
where is the first tier logical
who did what here, etc.

i.e. where is Moscow's information
where is the World, where is Russia, etc., where are any other countries of the
world
or there locally in some region
or or even someone thought about something of their own
let's assume in some region there is Ryazan

and here it is clearly visible
where is this Ryazan located and what will happen to it

i.e. it is clear that the forecast there is good
i.e. it's immediately clear
it is clear that prognostication for example we take the element of Ryazan yes
you can immediately see that there is a norm there
i.e. in principle, there is no need to do anything special there
For example yes for the current year

and it turns out that here is the selection
at the logical level
it allows you to work very concentratedly
and at the same time work universally

i.e. all conceptual systems merge as if into a phase
namely the density of control
i.e. a very simple level of understanding as I said
simply light must have the density of a physical body

and it turns out that when you learn
for example, to perceive the differentiation of light
it's done very simply
there is a random event, yes
Means Well, let's just say that there are mostly people sitting in the hall.
here someone stood up this is another event
the result is a fractional selection of light
this is a very simple action
there is a different density there
and that's all

i.e. here is the understanding as if
what exactly is the density of an optical event
very simple
i.e. just tune in to a certain amount of information
and tune in to some other one

Well like a random control element
or which is not a common control
namely selection by criterion
that the element is still external
i.e. it does not enter the logical phase of control

i.e. it is important here
then you see very clearly
contours of the logical phase of control

and in this case you see
that then it is in principle already quite simple to manage

i.e. it's easier to work, for example
when there is more concentration of control

after all, with logic, control is often done very quickly
in this regard
and there is no need to make any strong concentrations there
or apply some long-term technological control systems
because you can easily work here
due to the weight of the light itself

i.e. one thing for example Well let's say you can take it with your hand
there is some glass to move and physical action
the density of the event is almost completely under your control
you will do whatever you want

also on logic
you can this density of the event
translate into a system of action
this is how God does it for example
He just takes and makes some quantity super dense yes
it is revealed in the information and that's it
i.e. a specific event occurs there
including at the physical level

also built and elements of Reality
i.e. if you look at any element of Reality
that is the glow of God's logic
going along His, as it were, Macrological level of development

and from here we can make contact with God
knowing that we are working
on very dense optical control systems
and there you can see that the status is controlled

is again your Soul
i.e. the Soul is revealed there
precisely as a control segment
i.e. around which the event moves yes
this is all the external density

i.e. the Soul is actually a space
it means in which and as if on the core of which
logical control occurs

i.e. it is very easy to see your own Soul
as a system where there are specific goals and objectives

then you can change the system, for example, in this regard
that you kind of took some very quick actions

you need to rework the management system
you simply reveal the structure of the Soul in everything
and you set another task and that's it

because the Soul
well, how is the system in this case?
it is very clearly manifested in optics
it's a system where there is basically no density at all
from a logical point of view, no
but at the same time any action is infinite at once

i.e. it is very easy to enter the Soul system
here is the logical phase
's assume the core of the Soul of control
let's go in for example, so that there are no explosions at the Kursk Nuclear Power
Plant
in the next 25 years or better yet never at all yes

the next level is "never" somewhere above
25 years is a short period of logical management phase
i.e. we can immediately differentiate
what object
what is the optical length
in management

and then the exit to management is very simple
we just need to enter the core
i.e. We don't want this in our souls for example we don't need it
it is clear that the Soul is generally directed towards that
that this shouldn't happen

then it turns out
we see the primary level of management
what comes from God
and we see the status of the Soul

if at some point you
Well, take some action
something was needed quickly
or some undifferentiated systems yes
external information appeared
i.e. you think they need to be analyzed
where are they from anyway

then how logically did you have this action
firstly it happens constantly yes
in the information space
Moreover, other people are beginning to realize this.
and help you

and if some action
which well as if it possibly has some negative context
then you can simply not let him into this phase
and that's all
i.e. you can see that it is approaching
but so what, so let it come closer
here are different cars driving but they don't intersect

and it turns out that you can do it quite well
keep the control status on logic very tightly
i.e. constantly
and for this purpose, having performed such a logical action
and by translating the management structure
already in the structure of the Soul it turns out yes
The soul has accepted your action.
and knowledge is an action that can no longer be shifted
this is where the difference lies precisely in knowledge
from some of them for example well, unconditional actions

and it turns out that when you know
then this is already concentrated logic
but no longer having weight

that's why god
He can be present everywhere at the same time.
although there are Macro objects

because it's like another level of Reality
where exactly it goes , just a different system of concentration

i.e. knowledge is at a different level of understanding
in another level of existence , yes
they are located everywhere
and God is everywhere too
although He is also in the physical body here for example

and it turns out that when you see
this management
then you can do the management
already going from oneself
i.e. well, as God does
From here on everything is quite simple
doing the same thing
you are in a state of equilibrium all the time
i.e. the hard, as it were, densest optical phase
in logic it is translated
into the structure of the state of the Soul
and that's all
and then you can do the next action

but as a rule the number of actions at the logical level
this is some specific amount
here is the main quantity
which generally concerns you, let's assume there are 10 things to do there
simultaneously

Well, you did them, yes
next what to do next

here it still exists
the status of your very rapid development
as God evolves
i.e. the speed of your development according to logical status
she must be very tall

because even if you have done a certain amount of things
then you still have to do something
as if at the management level even logically

it turns out that you have the next job
you always do it on Macrosave
i.e. here at the logical phase
a person is constantly moving

in the phase of creating future events
where there is no destruction , etc.

and this phase is again very visible
how exactly are your personal events
why is it that in logic a person is always absolutely free
May be
logic is a factor of complete human freedom
by the way, here is revealed the given by God

and it turns out that you can do it quite well
for example, your current events
connect with the future quite specifically
i.e. you see, for example, future events
at the level of logical perception
took and drew a line
and that's all and no need to do this anymore
i.e. you made the control
and you already see or feel on the Spiritual level
that this is normal

this is the concept of "feeling"
that the Spirit must be perceived
through the heart and by the heart
i.e. the Spirit is already building the heart at this moment

very simple
when the Spirit builds the heart concretely
then everything is normal

phase means optics of the Spirit
i.e. we tuned in to some event
and you see
what if you are tuned in to this event
and the Spirit builds the heart, then this is the Norm

i.e. it is possible to introduce such diagnostic systems
which allow
for example, not to spend extra time on those events
for example, those that are already in the norm
even in the distant future
and concentrate the main efforts
on specific events
for example, which need to be done quickly

and it turns out that when we, for example, well let's say we want to do it

some kind of super fast event
since Macro level
this is the level of mandatory status of logic
i.e. you do it all the time
bring the Macro-salvation system to implementation

then here is precisely differentiation and achievement
for example in a private event of some result
this is what you should
private here is your event to logically justify
why for the salvation of all
you need to make this event faster

often it's because it's just your personal opinion
and for example you think that you can quickly save everyone
if your personal opinion is realized

All
this is often enough for that
so that a quick action for example happens
but at the same time you should, if possible,
have more fixed states some yes
external events on the logical status
i.e. to know that other events are under control
and they are calm

although in order to do Macrocontrol
Often you can just do the management
as if not paying attention to other events at all

because once you have concentrated control
on your current specific task
then you are still there
and in Macromanagement
on the logical status you do the management in the future yes
create the next element of your development

and concentration on logic makes it possible
be resilient to all events
i.e. other events will be more stable
if you are here now here work more steadily

i.e. you can logically do a lot
think through some options
do a lot of logical actions
inside a kind of logical sphere
or there is a logical ray there yes For example

and then your concentration
already reaches superconcentration
i.e. a system of mandatory achievement of events

and when you, for example, enter such a state, yes
then it's enough to work through the events
at the level of including

for example Souls

Spirit

logics

or contact with God

or some systems, for example technological ones

and this concentration

when it is within the scope of a logical action yes

why are you acting you want to achieve some result

for example very quickly or necessarily

and then it turns out that you have no time to get distracted
to external events

and here is the regulation of the external event system

so this is the derivation of this construction of events

into a system of sorts of control

from the point of view of the structure of God's Logic

from God's point of view

many events are normal anyway

look how normal they are

and don't deal with them

and it turns out that then you don't waste time

you are constantly working on your yes

i.e. being obtained

in the maximum concentration system

you don't waste time differentiating other signals

i.e. you spend almost all your time on that

to achieve the result

and let's do it now as a control

take some of your events

primarily to restore the health of the body

to full health and bringing there personal health

or maybe even other people there in the first place

look

and then come to your health

i.e. make the control level like this

and precisely through health
look what the maximum concentration is
must definitely be brought to completion
health of all people to the norm
because there is nothing else except your personal action
in this case it may not be
i.e. you have to do it yourself

and accordingly when collective action
it will just happen faster

i.e. in this case it turns out
that the implementation of your actions will simply be faster
because due to this glow and maximum optical
other rays will also go to your action

so i start working with you
set a task
and at the level of high logical concentration
work on your specific task
or your specific tasks
I will work with you

and as a control system
in this case, use the opportunity
change control systems based on logic

i.e. first work with a specific diagnosis
i.e. now do it like this
everyone represents that person

Well for example, the best one is the one he would like to cure, for example Yes
first of all

i.e. everyone represents this person
in front of you or somewhere there
or simply in the space of Thinking
or better yet , for example, something more capacious
at the level of, for example, Spiritual and Perception

and you need to work this way
that when you introduced this person for example Yes
at the level of Thinking
maybe not even in the form of an image there , but in the form of a name there
but it's better to see because you see better with your eyes

and when you start working ^{for example}
then you can start with a diagnosis
let's concentrate the ^{collective} sphere, ^{yes}
above the hall, ^{let's assume}
who will watch the video ^{yes} in this case
or read this lecture
maybe it will work like this again in the future
on my tasks by the way

and here is this sphere
let the work go on in the collective sphere above the hall
which is now
and from further development systems
i.e. in the future of this control structure

and first by specific diagnosis
Here we have worked out what you consider necessary
for a specific diagnosis
to be more specific
logic requires concrete actions
and so first here is a specific diagnosis

worked out a specific diagnosis
even if ^{it took three or four seconds}
more is possible, i.e. there is an after-effect of the logical phase
and this after-effect continues all the time
until you cure

then they took control
^{for example} throughout the body
i.e. simply the Health Standard
because it often happens that it is absolutely necessary
give the Norm of health throughout the body
and here is the second control, this is throughout the entire body

additionally, immediately there is this, pay attention
Norm of events
logically it is clear health is normal
including when normal events
a person at least has ^{yes}

then we do the ^{opposite}
first the whole organism

then a specific diagnosis
and then just in case
differentiated possible situations by events
and they lit them up again

i.e. your personal control
just a beam of light shines on everything that goes by
even from the body
already has this technology
control effect

and don't forget to concentrate the sphere above the hall
concentrated and directed from its glow
here is a collective action
aimed at solving your issues

and in this case it is decided
as a question for each person independently
and so it goes Macro management is mandatory
because logic is always an overflow of the phases of future events
mandatory overlap
you can see it right there on the optics
that there is a current time very clearly distinguished

for example, to differentiate
what is current time
here you go into the logical phase of optical perception
you can immediately see the specific boundary of the sphere

what is current time
and what is the future for example
overflow of future events
this is your personal action
and then you connect with the Action of God

i.e. going beyond the boundaries of your actions
you can see where God fits in
Your own management system
i.e. to see God, in simpler terms

but for this you need to rise again from the Soul
here you need to see very clearly the optics of the Soul
when i say "see"
I mean see with the body even more

i.e. here is the so-called "vision of the body"
i.e. here is the thought that can be seen first of all
and then the vision of the body
meaning the whole body
well not specifically there let's suppose with our eyes
although this mechanism allows very much
restore vision
because if you only focus on vision
then it turns out that you already see in any case

because what difference does it make
if you see even with a cage, then even more so with your eyes

and it turns out that you can recover in this way
i.e. on how God builds your future events
you can recover

logically it's clear you're just on everything
recognize the system of actions of those
from the point of view of the ones God gives you
maximum of force and maximum of Norm

and in this case if you want
for example, to modify something
then you need to agree with God about that
to somehow reformat the development system
Well for example, you think
that you need to do something faster now
and then you have to get in touch

and it turns out in this case
contact is an action that is still ongoing
and from the body
and to the body
simultaneously
well, that is, a state similar to prayer
or appeal
here is an appeal to God, this is a simultaneous state
bodies
and information to the body
in this technology

it turns out that when you are in this management structure
come in

then it turns out that you see God as He is
i.e. you see Him and understand

what is it He
but not necessarily, for example, even in this case
find His place
i.e. you have the correct information
but if you want to find His place
you find Him and you see Him
including in the human physical body

when you start to take such action
you see that your logic of action
God directed
in a very simple and acceptable form, yes
in the form of for example there is a physical world
some objects of the physical world

i.e. it is possible to do logical control
for example, due to objects of the physical world
i.e. there is, for example, there let's assume there's a table or a car there
concentrating simply in one point
by giving weight to some function
those. let's say on the edge of the table
it is possible to highlight more of the logical control phase
then the healing is more effective
because there is a reflection as if from this sphere
and everyone gets exactly what they want
but you need to know the point yes

i.e. in each system you need to know the point
where to concentrate maximum weight

and it turns out that from this point of view
God has concentrated the greatest possible weight
precisely in the physical body of a person
from an event management perspective
the body is the control in this case
precisely by the Logic of God
the body is created to control

when you start to see
why can the body then live forever
because God is Eternal
so the body is also Eternal
i.e. this is already God's logic
The Logic of God's Thinking as God Thinks

and you can quite as if considering the Actions of God
i.e. in general, here it's just looking at it, so to speak

or thinking about it
how god thinks
it's very easy to do the controls
this is the synchronization of your actions
i.e. in this case you have already agreed
with God it works out ^{yes}
i.e. you act simultaneously
and it's easy for you to act

but as a rule the tasks of God and man coincide
i.e. if a person wants to
generally speaking, implement actions correctly
then it is best for him to know exactly
as from God's point of view
Generally speaking, the control structure looks like this

and in this case the simplest option is obtained
work from the point of view of a mechanism understandable to a person
i.e. this is human logic

after ^{all}, in essence, when we consider, for example,
control process from logic
It's pretty clear to us that ^{well for example} the same letters
this is a logical, understandable system

and when you consider, for example, the Logic of God
then it turns out that logically you can quite see
that the docking of the Logic of God and man
this is a single action
this is an action that is absolutely free and conscious
and the most ^{accurate} and correct
coming from a person

This concludes today's seminar.

Thank you very much for your attention
