

GRIGORY GRABOVOY
The Teaching about God
Management in the field of Eternity
06.04.2004

Hello again
the topic of my seminar today
This is my Teaching about God
Management in the field of Eternity

In this topic I consider the principle of management
and also at the same time a method and technology of management
at which the control level
is in the information of Eternity

in this case when we speak
about the structure of Eternity
then here it turns out like this
what is the control element itself
for example, a control signal
it must be inseparable from the management level

i.e. information for example there of the Eternal Man
it doesn't have any final form
from the point of view of the primary impulse of Perception
because the concept of "Eternity" is an Infinite quantity

and it turns out that in this control system
we are faced with the fact that
that when it comes to management through this technology
then a person, for example, is located
let's assume in the Infinite Future
in the system of Eternal development
he gets into such a situation
that in order to isolate the control signal
First of all, it is necessary to formalize the management level
for your Perception

i.e., to actually impart some control characteristics
for the control area
because in the coordinate system
where all systems are Eternal
we have a generalized area of Perception of the Creator
and God at the same time

i.e. in this system we see
that any Action of God is in Eternity

i.e. we see it immediately and quite openly
and at the same time we can say
that His governing action
coincides with human action in that case
if a person is real
with all your information
is in the information of Eternity

then it turns out that target management
precisely for the purpose of Eternity
according to the purpose of Eternal development here coincides

i.e. the important point here is this
what exactly a person should do
really be in this information

and it turns out that in order to do this type of control
it is necessary first of all to deduce
it turns out that you yourself and your area of information
into the structure of Eternity
and for this you need to do this
so that your level of management is like this
so that you can see for example how
a transition into the structure of Eternity occurs

To do this, you first need to highlight
their specific tasks
here it turns out that the selection of target tasks
this is the level of transition to the management structure
through Eternal development through Eternity

because if you don't have structural tasks
or there are target tasks
then it turns out that you cannot record the fact
namely the Eternal development of your action
from solving any problem

that's why first of all in this technology
you highlight your own tasks
as structures already located in the realm of Eternity

i.e. in fact it looks like this
that you are, for example, at the level of Perception
as God does

at one of the levels, for example, of Your Thinking
consider your tasks
already in Eternity

and at the same time any of your control
in fact, this is a control that you decide
both independently and with God's help

because in this case you see
that you are at level
where God solves your problems

this technology is quite complex
but at the same time you make the control unambiguous and such
that you have precisely Eternal development in your action

i.e. your action is your development
because in the structure of Eternity
action and for example the purpose of management
it is the same value for the Perception of God
because He perceives precisely in the categories of Eternity

and from here we get the next level of control
which speaks about that
what if you want to highlight for example
your own management phase from your goal
then it turns out that your goal should be
is practically singled out as the goal of God

and then you must understand
and is your current goal, for example,
God's purpose

in order to understand this
you have to go out first
to the level of interaction, for example , with God
understand God's tasks in this coordinate system
in relation to your action
and that means getting, for example, a level of control

but there is another one here
completely so to speak human level of management
which speaks about that
what if you for example go to target management
where can you prove to God that you need this management

then you immediately enter the structure of Eternal development
through its control system

i.e. here is the first way it turns out
getting in touch with God
and determination of exact coordinates

but then you have to be sure
what God really needs in this situation

or you define the management goal and implement it

it turns out that the second level
he is actually more adapted
precisely to the human spectrum of action

i.e. a person interacts more with God
for management purposes
and in control dynamics
when he realizes his own tasks

if for example he implements it like this
what does he prove to God and that it is necessary
and God, for example, recognizes his actions as just
it turns out that here a person achieves
the main element of freedom of action
and freedom of action in the structure of Eternal development
this is the Eternal Action

complete freedom is local Eternity
how it would be translated
from Human Perception
to the Perception of God

and it turns out that here we have, in general, a mechanism
when a person can realize any creative action
and then get really
a very specific level of management
when can you say here
that for example any of your actions can be implemented

when you come to such an understanding of Reality
then generally speaking you can
means to cure any disease
you can make any control

and you can tell for sure
that your technology is absolutely specific
is related to your desire

i.e. for example , you have some specific problem
here in this management
it is necessary to immediately highlight some specific problem

i.e. now we need to do it like this
so that you are immediately in the structure of Eternity
did the management

i.e. the word "being in the structure of Eternity"
or for example the word "in Eternity"
here in this case I specifically highlighted
the concept of "words" yes

the word "being" and then comes the phrase
i.e. you can put the emphasis on the word after the word
show the structure of Eternity
and at the same time Eternity begins to work
or you can just say the word "Eternity"
and we are in the information of Eternity
from the point of view of the logic of knowledge

and it turns out that when we work
on the border, for example, a finite value and Eternal
that word and phrase often is one level of control
exactly like that in the structure when we work
already being in the Eternal Plane of Management
here often a phrase or a word or for example a thought
it's the same thing

this information shows that a person can control
it doesn't have to be every other word, it doesn't have to be every other phrase
Sometimes just a thought is enough
fixed at a specific level
for example, near yourself, near the body, yes , physical

and it turns out that if we, for example, set a task
and this problem needs to be solved
then this task has a fairly general effect
i.e. if at the final level of management
where the final values are
expressed more correctly let's say yes
a person perceives there for example the shape of the human body
a person perceives some finite quantity

human action
and knows that the action has been implemented
even if it's some kind of group
or is it a disease that has a local nature

then getting into the structure of Eternity
he gets into a situation
when he needs extra control
for local information
because the information starts to spread

and it turns out
that in order to make this control systemic
he must first consider his own tasks

because my own tasks are the closest

and that's enough for him
establish control over your own tasks
and all external Reality
it starts like this
in terms of precisely the beginning of Perception
that she becomes controllable

i.e. it is precisely in this system that it is expressed
the task of working with your level of tasks

and it turns out that in order to identify
this kind of spreading Reality yes
you need to find the point where it starts to spread
i.e. this is the point where your problem is already solved

i.e. be extremely careful here
i.e. you must be constantly at the level of Spiritual Perception
perceive that your task is solved

and only then do you kind of fix this point
in some place
and the light of this point
gives , for example, an image of your physical body
for God

i.e. God finds you in information
Well, if you put it figuratively, yes, you can say it
due to the fact that your Spirit knows
that you are able to solve this problem

and then it turns out that you are realized in Eternity
i.e. a person who is able to solve the problem
it is realized in any case in the structure of Eternity
in the event that he knows before experience, i.e. a priori
he knows that he will solve this problem

here in the structure of Eternity
this is the structure of the human Spirit
optical system for example the work of the human Soul
his Consciousness
they are intertwined in a way similar to DNA
but going along the linear level as if into Infinity

i.e. the DNA system develops
but it seems to fall into the scattered information of Eternity
and then the man himself appears

i.e. if we want to see
how is a human being built in general
from the point of view of the information of Eternity
then we should see that root in DNA yes
where DNA begins to disperse
and the form changes into the form of, for example, a person

if we want to use this mechanism
for example for treating a person
then it turns out that in order to, for example, cure a blood disease
just some element of blood is enough
highlight in this case
and give the functions of the Norm
at least in one place once

i.e. if we bring out this technology
into the structure of precisely Eternal development
then giving these functions to the Norm in this way
that a person will be able to perceive them
we will get the Norm of the whole organism

and how to make a person perceive it
here in the structure of Eternity all systems are mixed up, as it were
i.e. there from the point of view of an external observer
this is how god sees this system
there is just one general mass of information

enter this mass of information
and select one fragment that is the Norm

then the fragment becomes the Norm for the whole organism

and for this, as I said, you only need to
how to get into this system of Eternity
when have you already made it through?
the main thing is not to get distracted there
i.e. so that your attention is not distracted
due to the fact that the processes there are truly Infinite

i.e. if you are used to seeing the system
at the final level in the final environment
then there is a different form of information
i.e. there you perceive
any finite level for example as an Infinite system

and it turns out to build yourself in this system yes
reproduce in plan of action
this means that control over remote systems is needed
it's like many rivers flowing down yes
and your task is to take and seize all these rivers as if

and bring it into a standardized event

i.e. it is a rather complex technology
but nevertheless it can be simplified
if you are constantly at the level of Spirit
perceive the purpose of management

for example, there is treatment for some person
or management organization
or some system connected, for example, with a personal event
or you need to resurrect
or meet a resurrected person
but then you must understand it already with your Soul

that's exactly the category
which relates to the elements of resurrection
where the element of Eternity is embedded in action
this is already the work of the Soul

i.e. it turns out when you are in the information of Eternity
the action is very simply defined
logical action is a dynamic control system
Spiritual action is the statics of the Spirit
and the action of the Soul is the processes that lead to Eternity

and then you can

in this regard, it is possible to differentiate events ^{yes}
inside the system
Spirit Soul Consciousness or ^{there} physical body
and it turns out that your events
they are ^{sort of} laid out on shelves
between these concepts

generally speaking, this is not a concept in this case
and the specific value
i.e. you see it there quite specifically
how are your events arranged

that's when you are in the structure of Eternity
then your events are practically given in this way
to you
for your Perception
what is the final action of the event
goes into Eternal Global Information

those. any action you take
any action ^{means} according to the management goal
This is the junction with the global mass of information

so manage from this point of view
It's pretty simple in principle
i.e. you this global mass
just focus on a little bit of everything
and your event is realized

another question
what how to manage this global mass ^{yes}
at the expense of what
so here is the control
this is the Norm of your physical body
expressed in the fact that control comes from the physical body

here management occurs through regulation
the state of health ^{is obtained}
through the normalization ^{of} the actions of the physical body
i.e. you perceive a signal from the physical body
for God created the body
He used the structure of Eternity ^{yes}

i.e. the mechanism is located next to you
and it turns out that you can only do so much
highlight this mechanism

into the system of one's own knowledge

and then you get this glow coming from the body
this is a connection with Eternity
therefore control must come from the mind of the body

I'll introduce a term here
what is "the mind of your physical body"
and then you can control this form of intelligence

and the movement turns out like this
that the influence of your personality has already been expressed
where in the concept, for example, "form of mind of body"
the concept of "actions of the Soul of the Spirit of Consciousness" is embedded
yours
and where God gives you knowledge about Eternity
it is this area of information

then it turns out
what can you do to manage this mass
actually as if moving the body

i.e. at the level of thought form you commit
at the level of, so to speak, an internal plane of Thinking
that plane of Thinking which is connected with the body, so to speak

and you can just make a mental movement
and at the same time you get control
this huge mass, well, actually, like energy

in essence it is
manifestation of God
and the Action of God
as the world is built

i.e. Eternal status which originally exists in the World
i.e. there is that Truth which is given by God

and because the concept of "energy"
this turns out to be a rather conditional sign
in this control system
because this environment reproduces itself
any energy any kind of energy

i.e. you can see
what if you see and notice this environment for example

then on its surface it seems like yes
where the junction of this environment with the external system
where the quantities are finite
you can build any shape
including you can, for example, restore the shape of a person

i.e. in this case, the technology of, for example, resurrection
it looks simple enough
the image of the resurrected is quite simple
bring this environment to the junction
and environments of finite forms

and it turns out that he will then recover
i.e. he will be resurrected because
that he seems to be succeeding and there is no other option for development
for God created all things Eternal
he only has to approach real Eternity
and he regains his form
i.e. the body as an expression of the Eternity of the Creator
human body

and then when you look at this technology as if from the outside
you see that your body
it also creates environments like these
i.e. the vision of certain spheres yes
these environments are moving and seem to be coming from you
towards God
and the question is how quickly they arrive

or they are intercepted somewhere by third systems
either you see what you have
direct contact with God

then it turns out that if we suppose you see
that your sphere reaches God
then you see how God sees you
but you already see with your body
i.e. your body becomes controllable, so to speak
because God also controls the whole world

those. body control and your movements
and the whole world
you begin to understand how connected
your body and all events in the World
some physical informational ones there

i.e. it is complete harmony
from the point of view of understanding that
how god sees you
and the whole world
how He creates you and the whole world
at this moment in time

then it turns out that your personality
it is also an active process of creation
like the whole world
so it turns out that you see yourself in the status of Eternal development
i.e. in the status of Eternity

i.e. for a person to create his own body
this includes seeing yourself as Eternal

and at the same time it turns out that you participate in the development system
and the creation of the whole World
but at the same time you see yourself as Eternal
because this is the level where God created you
and you thus fix it
as if you find yourself in the structure of God's Consciousness

i.e. in this way you carry out
the transition precisely into the Consciousness of God
and in the Consciousness of God
this is a technology specific technology

i.e. you can, for example, highlight the status of Eternity
cure any disease
if only there are signs of illness

For example , you don't even know about it
and let's assume that somehow they are given
in the form of, let's say, simply conventional information

i.e. if you, let's say, don't want to record the diagnosis
and do you want to prevent future events?
then it turns out that you should receive information
including from conventional images

for example why do some superstitions exist in the world
where Infinite volumes of information
let's say a person is driving along the road
but the Infinite level there is a starry sky
and some kind of superstition , well, which is realized as if

as a connection of infinite magnitude
and his Perception of man

it turns out that it's superstition
as a sign of external Infinite action
what is the Infinity of action
that people think for example that superstition can influence
Well, some situation connected with superstition
can influence the course of events yes For example

then it turns out to change the current course of events
it's enough just to have this seemingly infinite quantity
just turn it around a little, i.e. change the course of events

i.e. an active way to counteract , so to speak, superstitions
this is if some action occurs
perceive a huge layer of external information
for example, the sky, for example, can be perceived
or just imagine there
what's next? An endless amount of information
and take and mentally turn this wheel a little bit , as it were
and that's all
then no superstition is realized anymore

this is why I said specifically about the sign
such a well-known and everyday thing, in fact, like a superstition
because all the signs of the World
really carry information

and here if you can see
your information system
through the signs of the World
there through the arrangement of trees there
through some systems just physical yes

then it turns out that you can live like this
so that you don't develop any diseases
no problems were organized

because if you consider the Life of God
then it turns out he can do it

somehow He built Reality that way
what for example there if you even consider physical Reality yes
at every level there let's assume galaxies
are there any planets there star systems

but they still exist
they basically don't intersect
for example, the Moon does not intersect with the Earth, etc.

i.e. this is the internal level of harmony
i.e. God felt the harmony of His Action
created the world in such a way that it functions harmoniously

if you start the inner harmony of the World
precisely in Eternity
where Eternity is already manifested by finite quantities
i.e. behind each value there is the following Eternal connection
i.e. you see
around some corner of the house
behind some tree
how does this tree affect you in general
and why is it here now yes
or why you perceive information this way

as a rule, this is a situation of external Reality
because the person's information
this is life-bearing information
and therefore helping life

i.e. God created it this way
what is in the system of Eternal development
another person is absolutely independent
if he wants to help you yes he helps
but it was originally created
as a level of Reality that helps necessarily
as God showed him

and it turns out that this is a dynamic system
which also solves your questions, well, as in society

and to understand the management structure
Generally speaking, you can just do the following

take to solve any problems of this person
what kind does he have there ?
and it turns out you get
already your specific help that you need
from the point of view if you see a person

and if you see some system of Reality
then you can find a sign of this Reality

and see how through the system of Infinite actions
this Reality is manifesting
i.e. what does this system of Reality mean?

i.e. in fact, what I am giving now
This is an information reading system
in the presence of, for example, some elements of Perception
such as physical Reality
or there for example the form of Thinking
or just a thought yes let's assume or dream

i.e. you are analyzing some elements
can you understand
how to do it so that it is set up correctly , for example
some kind of management process

i.e. you can do it like this
to see
how can you solve some problem
or you can see
what needs to be done to prevent it from getting organized
some unfavorable situation

and just observing or perceiving everything
in the right perspective , so to speak, yes
phenomena of Reality

i.e. take some object of Reality
follow up
how do root systems touch you
and you immediately see what to do next

i.e. either you, for example , go further
or you can change the event

but in order to change the event
this is already a different value

here in this technology
warning system yes Reality

without revealing a negative status
it is very advanced in this technology

i.e. you can identify and practically bypass
system

it will not be implemented
because you know about it that it can happen
but there is no information about this anywhere

but when you want a negative event
restructure
then it turns out you should go out
already in the event management system
i.e. into the final system of events

i.e. you should be like from this level
from this wheel as if from this level of the sphere
come out into final manifestation
and work with the final level of events there

i.e. in this case it turns out that as I said
between control
from the Spirit
and from the Soul
there is a certain layer
where is the event area
you can simply by revealing the optics of the Soul and Spirit
see where the event intersects for example
again with the Eternal magnitude
and just to draw in the event area
in Eternal Development

and Eternal development
it is still a realization on a positive level
doesn't matter

i.e. God specially created Eternity for that
so that in this regard
so that any event has a favorable development
first of all for a person

and it turns out that if you can
from an already local area
event for example to bring into the structure of Eternal development
then it turns out that you get a full level of control
which is expressed here in that
that you are actually again approaching the level of implementation
to yourself

and the main property is accomplished
that your Spirit is convinced that you were right

that you knew that an event favorable for you would come true
and you did it technologically

and you have experience personal experience
that you can make events happen
i.e. you have a control system being implemented
for your actions
you get a fairly large store of knowledge
in all these actions
Moreover, you can use this tool
as a tool that manifests itself constantly
i.e. this element is like this
that it can work constantly as a rigid scheme

and therefore it means that if we deduce
in the structure of events where there is a level of Eternity
and then we bring in an external event
into the same structure
then we can show with this element
action to God immediately and God immediately gives correction
i.e. It immediately shows in the following knowledge
for example yes what to do next
at the level of the Soul already
i.e. your Soul starts working

this way you activate
although the Soul always works
but you activate the interaction level
Consciousness and your Soul

and it turns out that then you become
significantly stronger in terms of control

and when you start to think like this, for example
it turns out that you created yes
specific control mechanism
from the point of view of being in the information of Eternity
act as God acts
and shows the goal of precisely Eternal development

but here the next level arises
in order to resolve a particular action
in this case we looked at the area
which is analogous to the area of God's Action

when we consider a private action of a person
then first of all it turns out

man must apply the form of Eternity
i.e. it must have
at least from the point of view of what God sees
that he has these technologies
he must have the status of the Eternal Development level
and then its final event will be controlled in the same way
even if outside this area
i.e. in the final value yes For example

why am i showing it here
because when we deal with final actions
then it is necessary that any level of Consciousness
worked the same way
as a structure of Eternal development as possible

and it turns out that here we need to give status
namely Eternal development of your body
i.e. you must obtain the knowledge that
when god looks at you show
that you have the potential for Eternal development

and for this you need to do
very simple in general, in mechanical understanding, or something like that
control system
just on everything from this wheel so to speak yes Eternal development
it looks like some kind of remote
at the same distance
sphere
such a milky white color here in Perception
for the Soul

and when, for example , you start this sphere
For example Well as if to move towards oneself yes
then it is enough to show that you have discovered this sphere
for God
this is enough to understand what God means , I already understood
that you are the technology of Eternal Development
in principle, you know since you even singled out this area

i.e. in this technology
there is the following principle
what if you highlight
the right management system
then this is quite a big force in management

Why am I introducing this term now?

as "control power "
because here these characteristics are expressed very simply

the right path and the right knowledge
here in this technology according to my Teaching
it is precisely because the dissemination of my Teaching occurs
that the correct fragment is highlighted
namely the Eternal development of the event

it turns out that if I'm there for example, I'm laying
control system
then it can be made Infinite
only by introducing into the area of Eternal development
into the realm of Eternity in fact

i.e. to highlight the area of Eternity
enter and the system begins to be omnipresent
immediately instantly

further you can see that it really works

here you are as a practice
take and make the same control

enter some positive information for example
for everyone
and make sure the information spreads
really to everyone
in real time

and you will see that through this mechanism
you can really act unconditionally
i.e. you can act without words
almost all at once
and the person receives a completely comparable
management level
as if he had received for example there reading a book yes
or he would have gotten it by studying the technology for a long time

i.e. through this mechanism
it can be done very quickly
for example, to cure very serious diseases
because in this case
the information is absolutely unconditional

i.e. you only need the level of your own Norm there

or the level of the usual objective Norm
withdraw

means to the level of contact with the border of Eternity
and introduce, if possible, into the internal form of this sphere

but even if you touch
here is the sphere of Eternity you enter the Norm
for some disease or other
just the body's norm
as you see it

for example, taking a matrix
or from the concept of "Norm"
or simply reflecting, let's say, from ourselves

here is a very simple level
enough of your own information

for the body is the source of Eternity

it turns out you just formed a local impulse
highlighted in their system
and it turns out that the next event
which, for example, is unfavorable there, yes
the person needs to be treated urgently
or is it enough just for everyone
as if to simultaneously touch this sphere

i.e. from here you introduce the Norm
and from here you just these events
just on everything at the same time to the boundary of the sphere

Well, imagine that it's a big drop, right?
and you need to do it like this
so that the surface is generally deformed at the same time
so that there are no strong vibrations

not first one action
and then another
because there may be distortions yes
this is a mobile system

and then it is enough to do it simultaneously
you can see a very powerful effect

i.e. the diagnostic system is
actual light level
which starts to rise up here

if you did it right
then starting from the glow of this sphere
it becomes closer to silvery white color
and a flow arises that goes upwards

and which is because it goes up
from above attracts the Endless flow of God

i.e. it is very important to see here
this differentiation
i.e. the upward flow
this is the action of your Spirit
but you perceive the flow of God
and Soul and body at the same time

i.e. here we can highlight the situation
when you perceive
work of the Soul and body
apart from, *for example*, the work of the Spirit

this is of colossal importance
because then it turns out
that it is enough to change the *structure*
even correlate *as if yes*
restructure the goals of the Soul
just in this process
and your body then instantly becomes healthy

because the process of building the human body
By God
this is a constantly new process
for God there is no such concept as "gravity", etc.
because in principle there is no

God creates
and gravity and any microparticle
in real time

so it turns out that for Him
the process of creating the human body, *for example*
this process is quite specific
i.e. it is expressed in that

that the knowledge of the Soul creates the body

and in this regard it is a fairly developed mechanism
from the point of view of, for example, the application of this mechanism
to the processes of resurrection

because as soon as you suppose you see

Well, let's say this is the status of Reality
that it is enough as if the information of the Soul
take out

on the projection of the Infinite level of the flow of God yes
another person

it is very clearly visible

that for example, information from the Soul of a person comes from above
which needs to be resurrected
and from below it's only just
you just need to add the body
management

i.e. for this

that's why for example the procedure
which takes place in orthodox churches
because they remember people there
they are very useful for resurrection for example
because it exists here all the time
like a memory matrix yes

and it is enough as if this matrix
just select from the form
insert resurrection in progress
because the body is a part of the Soul
in this case it is a linear quantity

that's how it works in the systems of Eternity
that very complex concepts become linear concepts
very simple in geometric perception

and if for example you need to cure a person
then it turns out that you should actually do
in this system the following
that just for example there is a physical body of a person if yes
which, for example, needs to be managed
although it is possible to make control
without necessarily focusing on his physical body
not necessary

it can only be done through an image
through the model ^{level}
because it turns out that you can do it
for example here see the following property

when you work in the structure of Eternity
then it is enough to work, ^{for example}, knowing
just at the level of the person's thoughts
it is not necessary to take information
his real physical body

and it turns out that you too
it turns out that comparable management in this area is achieved

and here the treatment then looks like this
that you just add a vertical line
that's all

i.e. this is precisely the model ^{level} of a person
in this case it is very simple
i.e. where there is a disease, the line is not ^{quite} drawn out

and you take control by will
just reach the level of Norma ^{yes}
the body begins to stabilize
recovery is underway

and it turns out that if you take into account more quantities
i.e. as a fundamental conclusion in this technology
then the easier you make specific management

i.e. you need to , for example , sign some kind of agreement ^{there}
so that he would pass ^{yes}
then it turns out that you need it then
only for everything ^{well} here in principle
all you have to do is just take and carry out the implementation
in terms of at least the Perception of the signed agreement
in the future

i.e. linear feature
here it is not signed
here it is signed
and here is the action that we ^{suppose}
and the action that will be ^{yes}

this is especially colossally important
in relation to treatment, however, apply
this simple technology
because there are very many revealed here
Complete healing systems
even if you don't form a diagnosis
this is very important

i.e. because the most important thing for a person is health
he doesn't really care what his diagnosis is
he just needs to be healthy

and therefore here in this system we get
you can simply improve the management system
to the Norm without isolating the fraction
what is she like
because the principle is simplified

here you have a vertical line
it seems to spread into Infinity
and it turns out that you are basically even here
You can't give a negative diagnosis, no matter how hard it is
because it means God gave Norma
He did not make Eternity as if it were anomalous.

Eternity is always standardized
from the point of view of God and man
i.e. this is the level that allows
to align or self-align
because there is access

i.e. the main characteristic of this action
this is to find access

it turns out that when overcoming
as if of a boundary value
when you enter the structure of Eternity
there is some tension here
on the status of your physical body
because you are actually moving
in the beginning yes for Consciousness
to a certain level
where control is of a slightly different form

i.e. you have to do as I said
work in a dynamic control phase

which is sometimes unusual

but after some time when you get used to it
you are quite capable of working
in the structure of Eternity even more effectively
even more simply and with all this
you can do it this way for example
to simplify the management system

i.e. it turns out that you
for example when you make controls like this
what do you need
for example, make some specific event like that
let it be a universal event
it's not even necessarily a treatment
but here any event can be made universal
i.e. to get a universal action
which allows you to manage any level of events

why is this a very necessary technology in this regard
because even managing such a process
such as treatment and cure for serious diseases
or from some very complex disease
often have to manage social processes

and it turns out that here we need to highlight
like a root system yes
how to make sure there is time for a complete recovery
At the same time, the external social plan was standardized
i.e. no one would rush, etc., etc., yes
if time is needed to heal

then it turns out that you need to highlight
root system
connecting the healing itself for example
or the time required for healing
so that social events are normalized

in principle this applies to any business
i.e. as a rule, events do not exist
outside of other events

and it turns out that if we say so
for God, generally speaking, there is such a version of Reality

i.e. He can single out an event ^{as if for himself, yes}
but for a person it means his Perception

here is the highlight of the event's own status
for a person
it's his own perception

and it turns out that
Perception is a way of individualizing events
and the same as God's

we just have to understand this
this is what God put into the system of Perception
if He Himself builds Perception
God to Himself
then it turns out that a person ^{sort of} singles it out
by the will of God

the boundary of Perception and Reality
this is the Action of God in Infinity

and here is the highlight
that's exactly the root level of the event
in this case it is a level

where the perception of man and God coincides
i.e. the tasks of God and man
in any creative action they coincide

a person doesn't need to think ^{there}
is he doing the right thing at this moment
or is it even by God's Will?

by the Will of God
from the point of view of Infinite development
everything related to the creative level
aimed at Eternal development

because He Himself created Reality this way
at a unidirectional level

and that's why when I talk about that
that we should ^{generally} carry out some kind of synchronization of that
how do you want to do the control, ^{for example?}
get ^{an} answer from God
is this correct in the first level

then when you already start working
in this system
there is no question there
i.e. there is a question that you always work correctly

there is a fundamental point here
because once you log in
you must see that any action you take is correct
you must be sure of this
The spirit must be confident

and when you start doing this
it turns out that all events are normalized
because you did the first action
and all the following ones are as if they are correct
because the first one is correct

and the first action of a person
this is his organization by God
initially this is the right action from God's point of view
He created man
it turns out that you are at the primary signal level
i.e. you are at the level
the very first plan of creation of man by God

and then synchronization of actions is that
what do you want to get
how the system is obtained
and controlled external Reality
and the realization of your goals
and the fact that you act like this
how God shows and what His tasks are

and here in this system
selecting the root control element yes
i.e. the link that influences
as for the event itself
as well as on the peripheral system of events

i.e. you take into account that the event itself
must be implemented
but you also manage at the same time
some peripheral series of events
there can only be one main one

and maybe if possible by all systems

it turns out that the allocation of this system
this is what you are first and foremost
see your physical body
in a state of practical Norm
meaning health according to the Norm of Events
and your body is therefore at the level, so to speak, of Eternity

while being in the same place
i.e. Consciousness perceives Reality in this way
that you are not increasing for example and not decreasing
i.e. having the same physical image
at the level of your Thinking
you begin to output your thought into the control system

i.e. as soon as you see
what exactly is controlled by the Thinking phase
exactly the one that is called there, for example
Thinking yes for man

i.e. in the collective Consciousness of people
there is a form called Thinking

and if we look at the process
that the action of the Soul is also Thinking
and there the action of the Spirit is perceived as Thinking yes

then bringing it here
let's assume a phase of collective management

what for those people who for example
Well, they don't deal with this issue, for example.
but they need to be educated
that Thinking can be
action of the Soul
Spirit
Consciousness
it's like a form of information
and the concept of "Thinking"
is divided into the work of the Soul, for example, etc.

and when you translate this phase of Thinking
in the collective understanding
then this root action becomes universal
it is enough to single out in the collective Consciousness
what is human thinking

i.e. how a person actually works on the Spiritual level
from the point of view of the more logical phase of the work of his Thinking
it's more of a logical phase of work

it turns out that we see here a very simple element
the sphere of Thinking of all people
so it immediately shines through
root event node

because it's the easiest transition
to the level of general management
this is taking into account the interests of all people
in terms of creative development

to save all people
we need to give them a control impulse
which will decide in general here it turns out
not only will it solve their problems from the point of view of Macrosalvation
but also implements their own tasks
simultaneously

it turns out how you can implement the tasks
for example, yes, a person
if the person is initially completely unavailable
according to the level of external influence there
you can only show it to everyone
as a subject of Thinking
i.e. he can, having thought through it, for example, take it as an element of
knowledge
or maybe refuse, for example

then it turns out that when you work
with the Thinking phase

you do not violate the will of a person
free will of man
because you give on interaction
thought and your action yes
collective thought and your action

and highlighting a fraction of your Thinking
but highlighting, for example, the fraction of work by the Soul
you get directly to the root level of the event

i.e. working on your task
you get control immediately

as a rule, the entire external Reality
precisely for target management

i.e. not just like managing plant growth there, yes
or the state of water in nature
this is also like general management
but that means you are first of all solving the issue because
as for you
from a work point of view, well as we say of the whole world, yes, we say so
and the Actions of God

and at the same time you highlight the main target line
because Eternity
this is the selection of the target line

in Eternal development all other lines
become less significant, yes

it is clear that when there is a certain value
then through for example there is an Eternal number of years
if I may say so
through Infinite Time
there remains some kind of specific main path, yes
and it is immediately clear that all external events
these are generally those that often did not touch the main path , so to speak
they are also principled
they have equivalent meanings by the way
for God and often for you
but nevertheless you are for the control mechanism
can you highlight exactly this value

because I'm a technologist
Here I highlight the magnitude of control

then it turns out that you are this line
By the way, it looks exactly like the path
as a road in general in information

i.e. the bright path, and it really does have one
shades of light

and when you are at the level of Thinking yes
just get on this path
and then you can go to hell as if on the platform so let's say yes
seeing your physical body
you can see that you just have to step correctly
on this path

as things around you start to be favorable for you
events to be realized

i.e. there is interaction with the body here
i.e. with the presentation
i.e. you can actually just imagine
what did you take from this dedicated area of control
and stepped on this platform ^{yes}
on some kind of tape, ^{so to speak}

At the beginning it seems to have unstable systems
but as soon as you stepped on it
all events begin to unfold before you
because you are on the right path
event selection path
and management of events in Eternity

then it turns out that you have
it is clear that you have the implementation of your events
because you are on the right path
in management and generally speaking really

so it turns out that here Reality is in control
they intersect in terms of Macro access
and ^{in general} here we have such a level of management
when you can vary the controls
depending on your desire

i.e. you can vary the controls
adding ^{for example} there is some kind of sound verbal form
you can vary the controls
if you ^{suppose} you are doing management
going to Infinity

i.e. you can very clearly choose the control time
and you can see that in the management in the Infinite plan ^{yes}
it is often very effective

i.e. setting the tasks of Infinite development
For example there ^{twenty five years ahead}

or there is some very large distance in time , ^{so to speak}
there ^{thirty five years ahead}
and then you can get the light of the event
Here
and already manage through even this event
through this light

i.e. here the quantities are often very clearly defined

on the other side
you can then clearly manage your events
even in the Infinite Future
here in this coordinate system

precisely in the management structure
through the technology of Eternal Development
in the structure of Eternity

as a specific management
do as many entry elements as possible here
personal and of one's own personality
into the information system of Eternity
control
and then see your reaction to the final value
she immediately becomes the manager

an important element
that you gain management experience
"final" so to speak, yes often in quotes, events
when you work with this system

i.e. your state becomes the controlling one
because you are like let's say like on a simulator
really helping all the people there
really creating
already have control
coming from your actual body
from your mind
from your will

this is a kind of training
and an element of pumping up the power qualities of control
element of a set of power management qualities

This concludes today's seminar.

Thank you very much for your attention
