

GRIGORY GRABOVOY
The Teaching about God
Management of the spatio-temporal environment
25.04.2005

The topic of my seminar today
this is my Teaching about God
Management of the spatio-temporal environment

In this topic I show how
to integrally connect the concept of "space-time"

and when you do the management
so that for you it would be a single management system
i.e. you must perceive a single management environment

in this system the main thing is to decide specifically
their tasks almost continuously
within the environment itself

i.e. when you do the management
the inner spiritual level should be like this
what do you see all the time
that your own target tasks are being solved
within this system

basically it looks like this
just like an optical communication system
at the level of Perception

and in connection with this it turns out
what is the task now in this seminar
is to be considered first of all
my tasks well as if at the level of information

however, they do not need to be defined as
more specific than the positions you have about them

This is the advantage of this control system
You don't have to specify the tasks

i.e. there are some tasks that previously existed
which are now or will be in the future

and can these tasks be simply considered in general

here in some space and in time

it turns out that these tasks are a certain
spatio-temporal environment

if we don't make a difference
between "time" and "space"
we just look at a certain level of glow
which unites these two concepts

then the specification of tasks
it's still complicated though
because if we want to specify the task
we must see the specific time ^{yes}
or see the solution in space

i.e. in this case we are more implementing the task of the Spirit

and when we start doing this, we see
what between the Spirit and the Soul ^{for example}
the transition also has some indefinite forms

i.e. to say strictly what a person has time to perceive
where exactly is the action of the Spirit, ^{for example}
in principle it is possible

but here is where the transition from the action of the Soul
often this is a special task
and to understand where exactly the Soul segment is

this is how God does it, ^{for example}
how does he separate one event from another ^{yes}
in Your Perception

He simply organizes events in the Infinite essence.
according to logic

and here is the Infinite component
which is already returning back to God
it is an indicator of some thing or event

and if we do the same
it turns out that the separation of the structure of the Soul
from the structure of the Spirit
these are basically ^{practically} the same
two lines of light that go towards you

after B infinite number of events

and the only difference is that
that God determines the position of the Soul from the very beginning
and He initially knows what the Soul is

and it turns out that a person should appoint here
here is to assign a certain interval of information
which is an interval
as if differentiating the state

i.e. well, some kind of diagnostic parameter needs to be entered
then determine
what is Spirit
and what is the Soul

and here a person is left with one level
which from the point of view of God the Creator
is implemented very clearly

a person can assign an information system
in the signal in which it receives the signal

i.e. he can say
that this line is the line of the Soul
and this is the Spirit
and that's all

why can he do this
because on the border of Perception
he can put a switch as if information yes
and that's all

even if the left stripe there was the structure of the Soul
then he can put some filter and say
that I just transfer control like this
and I will make this information let it be the Spirit for example
the conditional designation introduces

and in this way we can
at the first axiomatic level , so to speak
consider the first axiom
that in the spatio-temporal level of control
where control through space-time immediately occurs
we must assign information
the one we want to get
and assign from the point of view of the primary model

i.e. in fact we have a goal
which is constantly being implemented
in the structure of space-time
we take it and add it additionally

or we just take and identify the point of its implementation
or point of action

what is happening with the target now

and that's when we start to act like that
then by analogy with how God does it
It creates any event

we start creating an event
and it happens naturally
because it's a scheduled event
and an event that takes place over time
this is already strengthening and control

and if we begin to control the event
this is already the next strengthening of control

i.e. in fact we are observing
for the accomplishment of an event
the event seems to happen by itself

that's what the technology is all about
very effective by the way
in the treatment of tumor diseases there
where exactly is the tumor reproduction
this is the structure that is based
on the previous, well, there, tissue system, let's assume

then it turns out that if we appoint
control
and the structure is constantly being healed
and we constantly assign an even better condition yes
less tumor
then we can thus tumor
not just there as if to dissolve or bring out yes

and we can make this environment natural
i.e. get the Norm in the same place

there is nothing left after that

no scars or any data
that he even existed

i.e. then this is exactly the natural system
well, the Norms of the World organization

because in normal condition
The world is organized like this
that people should be healthy

it turns out we arrive in space-time
precisely to a certain fundamental system
which practically means
The norm of the whole world is only for the whole world
Well, we just come to her

but to get to her for sure
we must be abstracted from concepts
i.e. we must come to her
as to some such
absolute substrate yes information

if only we get attached
to some one concept
for example space
then we immediately start to get into particulars

's assume that there is such a task
how to make meeting with resurrected mandatory yes

then it turns out we have to deduce
control
precisely in the spatio-temporal environment

where is the resurrection structure for example
can be replaced by the Norm structure
i.e. there is no concept of "death" for example

well, that is, we take and derive the management structure
we normalize the world at our own discretion , so to speak
it turns out that the meeting is natural and understandable
just like meeting any other person

i.e. as if naturalness by replacing the concept
which happens because

that we ourselves have replaced the concept

it is also possible to reach the structure of healing
because the structure of healing is
although it has a fundamentally different structure
nevertheless, well, too in general, on a logical level
in this management concept
it's just an output of information
into the structure of non-existence

in this system you can output
information of some kind of destruction
in the area when after re-viewing
as if this area

can be determined
that information was practically non-existent

here the information level becomes
well, almost identical to that one
what are you doing as if they were not taking any action
and there was simply no negative information

i.e. for example if you are doing management
let's assume this type
what, let's say I take from my left hand
I output some optical signal there

I just take it for everything
and I think that the right hand
somehow it must perceive the left hand yes For example
at the level of Perception

so it turns out that at the information level
how does he actually perceive it
not just the hand but the whole person

i.e. perceives
well, moreover, the entire systemic Reality
people perceive for example

and when we consider
It is the Perception of people
then it turns out that this is the transfer of information
this is exactly the signal transmission
if the signal is specific
then it happens almost instantly

i.e. specifics
this is the instantaneous fulfillment of the Will of God
there in any Reality

if we give a unified signal
i.e. we translate information

that's exactly the difference
information between people
it is perceived instantly
because God is in the Image and Likeness
created a transmission level
between people almost instantaneously

and by the way, if we look at this level in more detail
you can cure diseases just as quickly

solve some very complex problems
by means of only the entire selection
here you just need to highlight everything
the outline of the action as if to highlight the border
this as if concept of this Reality

then due to high speeds
there is an instant shift in Reality
to Norma

this is exactly what he looks like
like instant travel to Norma
and if at the first level
this contact is like a shift level

i.e. you can see it right there
that a little bit Reality starts to move
but it's not in the sense that there is some small shift in Reality, yes

in a mechanical sense
it looks exactly like shear deformation, as it were

i.e. there is simply a layer of Reality
which has uncertainties
spatiotemporal structures
and there is your goal

as soon as you start connecting
there is an instantaneous click of substitution

Well , you can even hear it as if you have such a fine ear
you can hear a certain sound like a click

Reality falls into the environment in which it is located.

and a certain type of information shift occurs
and then the picture shows how the crystal is instantly fixed
as if all over the field
well for fast growing crystals
The world is immediately fixed in the Norm

and this Norma is originally like this
that the primary property did not exist as if the crystal

i.e. if we know about this yes it is clear we remember that
and for an outside observer
it's still there as it was fixed

it turns out that the event status is negative
did not exist

and when we, for example, have this option
we start implementing
then you can see that God
it can certainly manage
processes of the past as much as He needs

then it turns out why it exists
picture of perceived Reality yes Means
from a logical point of view

Well for example from the point of view
The law is precisely about the general resurrection
it is clear at the general resurrection
everything falls into place yes

then it is clear that memory is needed
from the point of view of not allowing it there
recurrence of some problematic events
like wars there and so on.

but from a logical point of view
change structure locally
God can always naturally
as if preserving the general picture of the action
and in the past it can change

that's why it turns out when we are engaged in management
space-time system
we must understand
that the structure should be better after all
so that it is timeless
and even as if extra-spatial

i.e. we get into the management structure
which to a greater extent
well, it corresponds to the concept of "development of the Soul"

that's exactly the concept
it is precisely the concept of "development" that is introduced

because the Soul
it is still created by Infinitely developed
and here is the concept of "development"
it's just a person who kind of enters
as a structure of one's own goal yes
own personality own initiative

when we begin to see this structure
we see that a person can, for example,

in principle, develop your Soul
only if
precisely at the management level
if he sees his own initiative here

and when we understand
that the Soul is still infinitely developed
i.e. in fact, it's as if the person is not doing anything
from God's point of view he already has this development

The soul she can
well, from the point of view of some level
or something of the collective Consciousness
it can be structured somehow
but so that it is somewhere
precisely in the concept of "Spiritual development"
developed
this is precisely an initiative action

it turns out that it is an initiative
here is the personality of a person
It is the personality that allows us to level out the boundaries
between the Soul

and the Spirit of man
and even with the body by the way

and that's when this process of transformation begins
in fact, the personal factor in Infinite Development
at the level of the connection of such concepts
How
"Soul"
"Spirit"
"body"
here it actually hits and really then
a person gets into
into a non-spatial and ^{generally} non-temporal environment
from the point of view ^{of} many observers there
in the collective Consciousness

and the very first level
this ^{well} like "hits" and in quotes
this is the physical body of a person

if you look closely at the management level
and take with Infinite speed
get close to human skin
^{well,} to the finger ^{for example}

then when approaching very closely

space time is not perceived
closer to the skin, there in a millimeter ^{for example}

if a little further
we see the dynamics of the skin there

but if we start moving in the other direction
then we start to see the speed

here is Infinite speed
gives proximity to human skin ^{yes}
i.e. the glow is visible here
^{well,} the one that is often seen there
when a person has an enlightened level

this is the level of glow
Every person has it
just near the skin
it is clearly visible at Infinite speeds

i.e. it can be seen in everyone
and in principle if we enter this control system
then next to each person
there is timelessness and spacelessness
control system

as soon as we begin to recognize this optics, for example
it turns out that, by and large,
in general, if we are talking about that
well, the same process, for example, meetings there
with a resurrected man
just the process of that management
where the structure of the World comes to Norm

because well, the resurrected meeting with him
it's just the normalization of the world
according to the Law of God about Eternal development

and when we begin to see this process
from the point of view of the logic of supposition

it turns out that this management process is like
beyond space and beyond time
it happens all the time

a person perceives all the time
at that level exactly
where does he consider such a position
as the development of the Soul

because the development of the body
when it is integrated with the Soul for example Yes
Human
he perceives this as the development of the Soul too

but the truth is here there is truth like this
if, for example, you think about the level of communication
then there is a level here
well, some higher positions anyway

because the Soul of man is Infinite
with its local body, for example, yes

so it turns out that it doesn't matter
this is the docking
Infinite Soul where there are tasks
and for example the physical body

it's quite complicated

This is ^{generally} a matter of principle for a person
task

if he understands what exactly needs to be done
from the point of view of the Soul
when a person understands this
he sees that the Soul itself gives development
for space and time

i.e. there is a certain path of formation
space and time
and then a person begins to learn
your space and your time

this is when we begin
to perceive such a level of knowledge
everything becomes clear

i.e. where what is happening
^{Well as if} controlling clairvoyance ^{yes}
where you need to make some kind of control
where initiative can be applied
and change some events there
^{let's assume} at the level of the further Norm, etc.

and here arises
this is quite a unique characteristic
The reality in this case is
how and why do they happen
still negative events

in this case a person
if he is, ^{for example,} practically engaged
this is the level of knowledge

^{Means} Well, first of all, it is still needed of course
own practice ^{yes}
need level of tasks
^{Well,} it's good if it already works very well
in management

then it turns out to be a negative event for him
this is a model level after all his actions ^{yes}
on some plane of Perception

then it turns out that by excluding
as if radically negative events
which are simply no longer possible
under no circumstances allow as if

excluding such a series of events
everything else can be considered
internal management system

then you need to understand
why is this happening yes
why is the structure of the negative plan formed
and why does a person allow it to form

with natural primary exclusion
any completely radically negative events

and here it turns out that we begin to understand
or rather here you can even consider
that a person gives the opportunity
to form this space and time

as God does
It gives freedom of action
formed Reality

and as soon as the Reality is formed
begins to take shape in terms of further development
here there is already a dialogue mode

i.e. well, just like God does
it is part of the interaction structure
with the system

a person gives some coordinates as follows
what he thinks is necessary
and the system begins to form
in accordance with his actions yes For example

i.e. it turns out that this element
this is the development of space-time
in conditions of dialogue level
some there, well, like pseudo -negative
or well as if not very negative events yes

because if the event is radically negative
then this picture of the world is in principle completely different
it means the manager does not take control
to the level of, well, knowledge , so to speak yes, the required size

this is already a task for the individual
and that is why God initially determined the level here
that He originally created the Soul
Infinitely developed

and here is the development system
just a person's personal opinion
he actually just learns faster
the structure of the Soul
or slower

then it turns out if it's faster
he thinks he is developing
if slower
he thinks maybe he is resting at this moment
or it doesn't develop there

and that's why it turns out
that when at the level of integration of Souls
where Souls have the same
in principle, control properties
well, for example, the Spiritual structure

sometimes they meet
some kind of collective idea arises
collective knowledge for example there
knowledge of the general resurrection
this knowledge is seen by all Souls of all people by the way

and that is not why
actually just information
it's like a form of Reality

but echoes of this form of Reality
we see in the form of opinions or information
some specific actions

this is what is shown for example there
specifically resurrected people, etc.
who were resurrected by someone

or it just happened ^{there}
Well, maybe it's because of a person's knowledge
resurrection may occur, etc.
God raised ^{yes}

although any resurrection
this is the Action of God
in any case initially

and so it turns out that when we start
here is this information analysis
consider
why exactly this theme of resurrection
there is enough evidence here
when it comes to managing a whole mass of information
which is not separated ^{from} space-time

and because ^{well}, any value is here
which is obtained from here
it is a derivative
^{Well} as if the willpower of the initiative of the individual

and that's when we start to see here
management structure
then we see how a person's personality
here, ^{for example}, a person is located
in Perception
in the structure of ^{well} awareness of the World ^{yes}
of his own physical body
of your personality
very clearly graduated
and generally speaking sees
any structure of the entire external World

i.e. he is actually at a certain level
he clearly understands and perceives
everything that happens around
there in any building in any alley, etc.

and when do you start
to enter into this structure of Reality

it is clear that the structures are quite massive
that exist in this World
^{Well} as if physically massive structures
they are also controllable

i.e. in principle it is possible to move on
on the earthquake countermeasure structure there
if you have time then
or you can switch to the management structure there
there is no global accident, etc.

by and large
this system gives control over any Reality so
that there may not be any surprises, generally speaking
the main thing is to choose this position

here the initiative lies in the system of choice
after all, God originally chose
position of overall control management
This is His personal position
God could basically make any decision
but He made a decision to control
it kind of goes without saying yes

God must control all Reality
but on the other hand, he is God
He is absolutely free.
He had to make a decision.
yes , myself.
God

so it turns out that based on this
This is also His decision

and when we start to wonder
here is where the person's decision lies
when he experiences some kind of illness there, for example
i.e. what is the problem , for example ?
why does he think
why did he make such a decision
why does he need it yes For example

or some problem
why does a specific person need this problem

so, i.e. it turns out at some level
he should have
or agree
or as usual there are a lot of things to do

and it's like he 's missing
but at the same time he makes a decision

i.e. the problem is always visible to a person
by and large and generally speaking by the nature of man
The soul still knows
God gives all knowledge in any case

somewhere in the distant past
where space-time is by the way one
at that level everything is always known

and here is this beam that goes
it is always like a marker or level
which determines a person's decision
that means he still makes a decision at some level

and if we, for example, try to understand here
how does a person make a decision in this case
this is where detailing is very important

i.e. every person
in his own way, yes, he sees the structure of the World as if by his own path
but always goes along the same streets
i.e. you can see the same picture, the same alley
but to come to this from different places yes
physically
and from different places Spiritual development

and it turns out that although all people are different
but they form the same Reality
what do they need it for

so that similar decisions are made more easily, for example Yes
well, from the point of view of the obligation of some decision

and when a person comes to some store
where there is a favorable decision before him
then it falls into the structure of the World's norms
i.e. people themselves regulate the World
for example, what they build Well, some buildings are the same.
some of the same systems of social relations

i.e. if we are talking about that
which is similar to what God does
People must themselves at a certain level
to unfold space-time for oneself
this means they must do it according to some specific laws

and the result is this level

here is a radical, as it were, problematic action yes
some wars there, even if local
not to mention global ones
this is what generally requires initial effort
to overcome
some kind of like that or something like this possible situation
which was in the historical past

i.e. it turns out that a person must
be able to shift events in the past
as soon as he knows how to shift it
or he clearly guarantees himself
that such an event will not happen in the future
some social actions
then he comes to the standardization of his positions in management

i.e. it turns out to be Macroregulation
or is there a policy of universal access
to management
and personal tasks
it's practically the same thing

i.e. in the social sphere we find
very clear intersection
as if Well as if spatio-temporal actions
at the personal level

as soon as we get into space from this point
here we find ourselves in a specific space in this case
in physical

i.e. in fact I showed you the point
finally where from the point of view of this seminar
how we get into the structure of physical space

as soon as we got through this structure
by the way this is a specific path
here through the social system
then we can do whatever we want
there go out to the physical cell to normalize it

and this will be
not some kind of information-energy action
and specifically we will work with this cell
specifically

i.e. Thinking and the cell of another person
it will be a continuous system of work
with physical Reality

or some organ
i.e. the work is carried out specifically with the organ
there are no intermediate systems there
i.e. no so-called energy-information field
there are no visible movements there
that some kind of information transfer is taking place
or information outflows

there is simply a lot of work going on there
i.e. the work is going on as it should be

because if there is
it's just that the logic of the Norm is like the Matrix of the World
it still exists

and the logic is that all people should be healthy, yes
at least

it means that the person does not bring anything new
he's just on top of everything in this case
leads to a certain criterion of normalization

i.e. it actually creates
spatio-temporal environment of the future
according to the criterion of some kind of Norm
exactly the Norm that is familiar to man

and it turns out that for this he needs
generally speaking, my personal experience

personal experience is his primary level of birth
and personal experience is
own level of creation of the Soul of man
development of his body

i.e. ultimately we come to the experience of God yes

i.e. the experience of God is always His
and primary and final action

i.e. the concept of "experience" as such
God does not introduce this into the system of His governance
He simply realizes Reality.

at the level of actually just a high Spiritual level
as his own
and people first of all
and then the level of information development of the whole World

i.e. there is an integral Reality

which does not carry out the concept
well, some kind of statistics of the result set

because how can you get the result
in the conditions of the developing world ^{yes}
it changes all the time

and a person is forced to work in this system like
it should work unambiguously and equally correctly
^{no matter how} difficult the circumstances are, it turns out that way

or on the contrary they are very simple
which by the way is ^{often} roughly the same thing
because it is important for a person in management
find precisely the Spiritual stimulus
what is the movement of his Spirit

Well, by and large, a person always considers
structure
Spiritual development
development of the Soul as an initiative level

and if at the level of knowledge
the entire structure of the Soul
then this is structuring
i.e. the movement of individual systems of the Soul
and due to movement
he sees that once he can create the movement of the Soul
and this is already a change in the whole picture of the world

if a person can do one
optically even the expressed line of the Soul
move it even a millimeter
in visual perception
so it turns out that he somehow changed the whole world

by the way, you can't just move the Soul
in terms of structure, ^{so to speak}

something is definitely needed for something

i.e. it is necessary to identify the cause and effect

i.e. it turns out that it is necessary to create a goal
and only through the target can you move for something
while changing the entire structure of the World

the goal is achieved

identified target

example, if people say that there is a goal

and you need to make management

what is it needed for as such

this is the goal in general

it is logically clear that there are many different things to do
and the goals *seem* to arise by themselves

but if we abstract from the concept

"current Reality" as such

because we work outside of space-time

and outside of space-time

in this case the analysis of the situation is as follows

that we consider the goal as a task in general

why is it needed

so it turns out that from this point of view

the goal is needed so that we can consider

reaction of the movement of one's own Soul

somewhere in the remote Infinite level

then you need to form a goal

without a goal without any task

there is no movement

this means that the Soul is manifested in the conditions of the task being
implemented

so it turns out the same way as that

to see God physically

you need to see what task he is performing

by analogy with seeing your Soul

in the conditions of the problem

namely the optically manifested line

for God the Soul and body are one level

he has a Soul and a physical body

this is so as if a monolithic, undivided level of control

it turns out that based on this
we define our goal
for example for the Action of God

i.e. so that the goal was
God must do something first

and that's when we look at this action
we definitely see God's information

i.e. how to get accurate information from God
the connection level needs to be considered
His Physical Body
and Souls
in the structure of, for example, your Thinking Perception

and consider it as if independently
what is he doing

Well, that's what it does, it's clear
There is
space
time
there are some tasks

and when you start to consider this
you see how God himself distributes the details

i.e. one thing exists
private some buildings tasks events
and this is like your personal perception
they kind of exist on their own, yes
or existed there for many years before that

and if we consider
as God does
it is clear that He walks through those channels
which do not contain time at all

and then it's clear
that any structure that is attached yes in His movement
this is the structure of Eternity
He actually walks through the channels of Eternity.

and Eternal structure
it contains the substance in the Eternal manifestation

i.e. it turns out that there, actually speaking
the substance itself in such a manifested form
as such in the distant Infinity
there is no
there is simply an idea for implementation

because it happens
An infinite amount of time
in development
and then it turns out that you have
well some kind of change in matter yes
there, etc.

and in the end
if we take it
and we will extend it into Infinity
the path of any material level
For example there are Earths

then it will work out
in the end, only man remains, generally speaking
the whole structure changes
only man does not change
this can even be traced
at the level of some kind of model action
or there is a special action

just watch the event from the sidelines
take some ancient castle
and view it Infinite Development
let him be there for many hundreds of years
somewhere in Infinity anyway
matter is transformed

only the observer remains yes
Human

if we take the position of a person
we begin to move to Infinity
he can also observe there
he also diagnoses the system ahead

and it turns out that this is the output of this problem

i.e. exit

this is management in Infinite development
and the translation of a certain level of negative events
into a structure as if extra-planar there extra-spatial
this is real
a very powerful level of healing indeed
prevention of even some problems
diseases

it means just some negative events
so that they don't happen

precisely the selection
level as if a contour
and the real person as such
in information

when you start approaching this level
then you see that in principle

the main number of people
that's pretty much how he perceives it
your own state

let it be not always obvious there
in a dream or more in childhood
but precisely as a level of an absolute plan of action, or something like that
here is my own
own body of one's own personality
when a person has a property
and over spatial control and over temporal control

when do you start
to perceive this system of Reality
at the same time, the personality is of course not separated there
as such
from development systems yes
a person also walks and breathes the same air
and in general the task is only that
to be able to combine for management
for example the concept of "space-time"
and get into development
the right space and the right time

i.e. actually a person
if so, well for example, set a task
do the same work that God does

he must in his Perception
it means to instantly unpack space
but in the right direction

For example there is some kind of transport going there, like a tram
need to instantly unpack the space like this
so that space means to be that
well which one do you need
so that it develops in the next second

i.e. skill in existing management
make your personal action

and here here
Well, I call it "existing management"
and it's clear that it's some kind of transport
somewhere anyway

but you make your contribution
here the initiative is already increasing

i.e. you start to bring in control and feel
Well as if some kind of resonant environment
that the external environment has the same properties

the more precisely you make this control
the more accurately you will get well like a reverse wave

the question is why do this management
not from a training point of view as I said
in this case you need to act immediately

and from the point of view of the next action
do as God does
i.e. so that your action is indistinguishable

as soon as you have done the same action
Well, we learned it in a few times , yes For example
then the structure of Perception is actually fixed
in some place
there is no need to do this anymore

because it's enough
learn one technique of such control action
and in principle you can watch

that the majority of people
they do this almost all the time
in order to stabilize
structure of future events

because they kind of heat up the experience
at the expense of well there is some external Reality
or internal understanding of Reality
and the following events are more positive
can become
and as a rule they become so through experience

and here it turns out that based on this
so as not to do anything, for example
there is some external space
well, which simply exists and as if by itself, yes
although in each level there is a personal level

in the collective Consciousness
which defines this space
there is your personal level
anyway, according to the general connection system

It's still useful to study
where is this level of yours located

but nevertheless, this is precisely the translation into the Spiritual sphere
so that a person does not have to do it constantly
Well as if by the fact that I spent additional time there
some kind of parallel control
what is needed as I said only for the Reality of management
and not for training

it exists precisely
this is precisely the level of translation or transition
into the Spiritual Sphere
namely the Perception of the Spirit
Spiritual vision

then it turns out in Spiritual vision
the physical space itself
already transformed into the action of the Spirit

i.e. the Spirit contemplating
The spirit at work
The Spirit of Perception
already contains this information

and you are in your own environment
you don't need to change the space

i.e. you work
in the structure of one's own Perception
The spirit contains this knowledge.

so it turns out to be external space
it exists as a kind of reflection

then we see how it goes
from the Spiritual sphere
into the structure of the Soul
structure of the external world

in this case, by the way, it is completely transparent
when we work
precisely in the spatio-temporal environment
where space-time is one component
we don't share it

here is the transition
from the Spiritual environment
precisely into the structure of the human Soul
it is always a very transparent action

i.e. it is visible how the Spirit performs
some kind of information provider function
or even knowledge

but knowledge is always in the Soul of a person
so this is another person's knowledge ^{yes}
external knowledge

and the knowledge of another person
this is first and foremost
level of collective Consciousness
i.e. this is generalized and integral knowledge

and integral knowledge
by properties are the most characteristic
just arrays of information
there are no specific manifestations there
it's usually some kind of optical level

which is perceived and translated
into the structure of the human Soul

and therefore it is the closest
precisely to the spatio-temporal level of Reality
where space-time is not separated

integral knowledge
this is what actually happens
spatio-temporal environment
by optical properties

and by the way at a great distance
something like this just happens there
well, not a very strong golden glow

they are almost indistinguishable
you can only look very closely and see the border
between the entrance
as if in information of development towards God
between knowledge in the collective Consciousness
and space-time

i.e. docking position
where is the collective consciousness
and what's happening
here is the transformation of this Consciousness
i.e. space-time itself
they are not very different

the difference is that it is the Consciousness of God
gives a brighter level for the collective Consciousness

and space-time
has a darker golden hue
color even

it turns out that it's like some kind of golden drop
which is constantly well as if trying
a certain sphere which is like the sphere of Infinity
constantly tries to push it forward, so to speak
into the future

sphere of infinity
in this case it looks like a material structure

then it is clear that the only substrate of matter
is Infinity itself

and that's when you look at the heart rhythm
something similar is happening there
with this system of Reality
action
it's all the time pushing the body structure
in Infinite Development

and even from the inside it looks like that by the way
the same rhythmic movement
and the same ones
the most important thing is that they are even geometrically close
systems
if you look from the side of the heart for example

and when you start looking like that
here you can watch
such a golden color for example on the heart
then you can create
some kind of Eternal Generator
there is development there of Eternal life yes
in yourself independently

due to simply correct understanding
and even as if collecting information

when you look like that
then the body can be healed very quickly
if it is necessary then

and when for example
well, moreover, it works locally
as if work in the area of the heart

although in reality we are talking about your body
and at such a level
when the body acquires
property of Infinite development
it is acquiring
you can see how the body actually learns to do this

and when do you start

Well, the body is clear that it is your mind, your Perception

you start to trace the lines
this is again to a greater extent
First, the work is done near the skin
i.e. where Infinite speeds of information exchange

and then even earlier sections are visible
optical
which enter the body
there well from a distance there
15
5
25 centimeters

they seem to get there
and it's not like they get inside the body there
you can even see

there is no concept of "suction"
the body from God's point of view is also created inviolable

even working in optics
to manifest a signal that touched the body
we still need to consider it
path trajectory of the task and the structure of the input

i.e. not everything is so simple, not everything is so simple
the body is such that some optical photons get in
and that's all
it is possible at a higher level
the body is completely independent
nothing gets in there at all

and God created inaccessible
body
for external invasion by and large

even the level of Thinking or optical
there is such a level

and if for example we consider this structure
just as the Soul is inaccessible
for some kind of external radical
in fact, some kind of impact

therefore what exists

there is some kind of psychotropic effect there
that's basically it
well , or some kind of remote-control machines

this is how long I work in practice in general
such that some
exactly the ones that are acting , well, like that
how you can act with Thinking, etc.

this is all only up to the level of a person's access
if a person accepts that
or there agrees
that something might affect him
then he starts to conduct it himself
if no then no

i.e. it turns out that it is real
stronger than the structure of the human Soul
there are no cars anyway and there won't be any by the way

so it turns out that it is some kind of psychogenic weapon
as if it were being made by someone somewhere
it's all simple for those levels of Perception
who think
that it is possible to influence the Soul of a person

which is really impossible to do by and large

but from here you can also get to the structure of the body

and you can understand
what is the level where it is impossible to influence
and on the body too

and then we can create
a certain security policy
and very useful
for all kinds of travel options for travelers
who, for example, makes long trips

be able to integrate well how can I also imagine
in the form of a capsule
all the way
and if the movements of the Infinite Environment are rhythmic
this is a diagnostic system that everything is normal yes

he arrives back at the final destination

if somewhere the rhythm starts to change
then we need to go for a walk
it's like some kind of map
Infinite environment you can immediately see where
the problem is to take it into account
This is very powerful by the way
level of development of controlling clairvoyance
what I'm saying right now

and you can clearly see
where the event takes place
and here time and space opens up

i.e. it turns out to be mainly a person
works to a greater extent
on a timeless and spaceless level
due to Thinking _{yes} as a rule

if you look closely at the structure of human thought
then the thought happens
as well as some constant generation of action

and if you set yourself a task
and in general in this case where is it implemented
Not every thought _{turns} into an event

then already in the structure of the event action
here at a more distant level
thought
this is an internal action of a person
where the form is not yet completed

well, that is, strictly speaking
it is a certain product of preliminary actions

when he's already getting into shape
then here the space opens up

so first of all
space-time
a person needs to determine

to determine your own path
well, more _{like} at a favorable level, _{yes}

i.e. take into account some possible problems
or just see them
if you have developed Spiritual vision

logic is also important here of course
you can choose logical transport
logically choose some places to stay

but it is best to use it of course
direct vision
i.e. Spiritual vision
develop your Spirit
to the level of Reality of events

your Spirit
and future events
it's actually well as if the Perception of the Soul
it could actually be a uniform structure

just like the Infinite Future Level
There is an infinite level of space-time
in the form of one golden-colored capsule
and your personal task

it happens when you start
see everything from this perspective
it is precisely in the movement of the Spirit that
you can get very accurate information about everything

here is the movement of your Spirit
can reveal a very specific problem
what will happen in detail

well, just in some details
totally third level

for example, a drop of water dripped somewhere there
from some tap that is not quite closed
in some event in the distant future
you can understand this

i.e. to see specifically
see the specific composition of water
microstructure, drop shape, time, etc.

i.e. you start unpacking space
in detail

and that's when you start
you just have this opportunity
Well, it's quite clear that you are capable of doing this.

when do you start doing this
you see that God is at this level of control
created the World from private systems and how
and so that they are reduced to a single Essence of the World
well, that is, to Him himself
the management structure is developing

and why from private ones?

because in every element of the primary action
still a private element
This is considered a more primary element
from a logical point of view

and here is the development of the elements of Reality
to Him
so it shows that God has
the control system is like this
what is in each element
there is a fairly coherent scheme of knowledge
where each next element is located

i.e. in any particular element
there is actually a whole path of development
neighboring element

and if we approach it from this point of view
then we get the primarily created human body
always has the resource of Infinite development
because the original knowledge exists
at the moment there is no problem happening yes

or here a person was born no problem
or did he just pass the conception level there

then it turns out that when you
in space-time management
come to that level
what is the initial state
this is a state

there is the original
following
or Infinite
then in fact any problem
located
outside of your kind of space-time yes
self-perception

and in the conditions that this is space-time
can be brought into physical Reality
then it turns out that the problem is just for everything
at this level of management
she's a negative problem , let's say
she can't be realized
because there are no levels of contact with you

i.e. you just output this control
into that structural space
which will not unpack in any way
and there simply won't be such a problem

which is very effective there for example
when not just there managing events
It is also effective in treating diseases
just to prevent some events

and to a greater extent, by the way, effectively
in order to achieve some of your strategic goals
were implemented most quickly, so to speak
less means were they affected ?
some external peripheral control systems
which you don't need

here you can work very clearly
on strategic distant targets
and always achieve them

This is where I end today's seminar.

Thank you very much for your attention
